## **Summary in respect of Risk Factors**

### **The Notes**

#### **Notes may not be a Suitable Investment**

A potential investor should not invest in the Notes, which are financial instruments the value of which is subject to various factors, unless the investor has the expertise (either alone or with a financial advisor) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor's overall investment portfolio.

#### **Liquidity Risk**

There can be no assurance that a liquid secondary market for the Notes will develop or, if it does develop, that it will continue. In an illiquid market, an investor might not be able to sell the Notes at any time at fair market prices. The possibility to sell the Notes might additionally be restricted by country specific reasons.

#### **Market Price Risk**

A holder of the Notes is exposed to the risk of an unfavourable development of market prices of the Notes which materialises if such holder sells the Notes prior to the final maturity of such Notes.

#### **Risk of Early Redemption**

The Issuer has the right to redeem the Notes prior to maturity for reasons set out in the Terms and Conditions of the Notes. Therefore, a holder of the Notes is exposed to the risk that due to early redemption his investment will have a lower than expected yield. Also, such holder may only be able to reinvest on less favourable conditions as compared to the original investment.

#### **Fixed Rate Notes**

The Notes are fixed rate notes. Therefore, a holder of the Notes is exposed to the risk that the price of the Notes falls as a result of changes in the market interest rate.

## **EWE AG**

The following is a summary of risk factors that may affect EWE AG's ability to fulfill its obligations under the Notes.

- Increasing pressure of competition on national and international procurement and sales markets may affect EWE AG's energy and ICT business areas.
- Changes to the overall economic climate and to certain aspects of the legal and social environment caused by the financial crisis may have an impact on EWE AG's business.
- Shortening or stoppage of the supply of natural gas from Russia may have an adverse impact on EWE AG's financial position.
- Failure to meet safety standards and legal requirements may lead to problems in the operating of EWE AG's telecommunications and energy infrastructure and thus may adversely affect the financial position of EWE AG.
- Failure to invest or make acquisitions in its core business may adversely affect EWE AG's business and financial position.
- EWE AG is exposed to financial risks such as liquidity, interest and exchange rate risk.
- EWE AG depends on the proper functionality of its information and communications technology.

## **Zusammenfassung in Bezug auf die Risikofaktoren**

### **Die Schuldverschreibungen**

#### **Schuldverschreibungen als nicht geeignetes Investment**

Potenzielle Anleger sollten in die Schuldverschreibungen, die Finanzinstrumente, deren Wert von verschiedenen Faktoren abhängt, sind, nur investieren, wenn sie (selbst oder durch ihre Finanzberater) über die nötige Expertise verfügen, um die Performance der Schuldverschreibungen unter den wechselnden Bedingungen, die resultierenden Wertveränderungen der Schuldverschreibungen sowie die Auswirkungen einer solchen Anlage auf ihr Gesamtportfolio einzuschätzen.

#### **Liquiditätsrisiko**

Es besteht keine Gewissheit, dass ein liquider Sekundärmarkt für die Schuldverschreibungen entstehen wird oder, sofern er entsteht, dass er fortbestehen wird. In einem illiquiden Markt könnte es sein, dass ein Anleger seine Schuldverschreibungen nicht jederzeit zu angemessenen Marktpreisen veräußern kann. Die Möglichkeit, Schuldverschreibungen zu veräußern, kann darüber hinaus aus landesspezifischen Gründen eingeschränkt sein.

#### **Marktpreisrisiko**

Ein Gläubiger der Schuldverschreibungen ist dem Risiko nachteiliger Entwicklungen der Marktpreise seiner Schuldverschreibungen ausgesetzt, welches sich verwirklichen kann, wenn der Gläubiger seine Schuldverschreibungen vor Endfälligkeit veräußert.

#### **Risiko der Vorzeitigen Rückzahlung**

Der Emittentin steht das Recht zu, die Schuldverschreibungen vor Fälligkeit auf Grund des Eintritts eines Ereignisses, welches in den Anleihebedingungen dargelegt ist zurückzuzahlen. Daher ist der Gläubiger der Schuldverschreibungen dem Risiko ausgesetzt, dass infolge der vorzeitigen Rückzahlung seine Kapitalanlage eine geringere Rendite als erwartet aufweisen wird. Außerdem besteht die Möglichkeit, dass der Gläubiger der Schuldverschreibungen eine Wiederanlage nur zu schlechteren als den Bedingungen des ursprünglichen Investments tätigen kann.

#### **Festverzinsliche Schuldverschreibungen**

Die Schuldverschreibungen sind festverzinslich. Daher ist ein Gläubiger der Schuldverschreibungen dem Risiko ausgesetzt, dass der Kurs der Schuldverschreibungen infolge von Veränderungen des aktuellen Marktzinssatzes fällt.

## EWE AG

Es folgt eine Zusammenfassung der Risikofaktoren, die sich auf die Fähigkeit der EWE AG auswirken können, ihren Verpflichtungen unter den Schuldverschreibungen nachzukommen.

- Wachsender Wettbewerbsdruck auf den nationalen und internationalen Märkten für Ausschreibungen und Verkauf kann einen Einfluss auf das Energiegeschäft und die ICT Sparte der EWE AG haben.
- Veränderungen des generellen wirtschaftlichen Klimas und einiger Aspekte des juristischen und sozialen Umfelds, die durch die gegenwärtige Wirtschaftskrise verursacht wurden, können einen Einfluss auf die Geschäftstätigkeit der EWE AG haben.
- Eine Verringerung oder ein Ausfall der Gaslieferungen aus Russland kann die finanzielle Situation der EWE AG negativ beeinflussen.
- Falls Sicherheitsmaßnahmen und gesetzliche Standards nicht eingehalten werden können, könnte dies zu Schwierigkeiten in der Energie- und Telekommunikationsinfrastruktur führen, wodurch die finanzielle Situation der EWE AG negativ beeinflusst werden könnte.
- Falls keine geeigneten Investitionen und Akquisitionen in den Kerngeschäftsfeldern der EWE AG gemacht werden können, könnte dies einen negativen Einfluss auf die Geschäfts- und Ertragslage der EWE AG haben.
- Die EWE AG ist finanziellen Risiken, wie zum Beispiel Liquiditätsrisiken, Zins- und Wechselkursrisiken, ausgesetzt.
- Die EWE AG ist auf die volle Funktionalität ihrer Informations- und Kommunikationstechnologie angewiesen.
- Gerichts- oder Verwaltungsverfahren sowie sonstige juristische Risiken können einen negativen Einfluss auf die finanzielle Position der EWE AG haben.
- Die EWE Gruppe ist dem ständigen Wechsel des politischen, juristischen und sozialen Umfelds in dem sie operiert ausgesetzt. Dies kann einen negativen Einfluss auf das Ergebnis der EWE AG haben.
- Der juristische Rahmen füraufsichtsrechtliche Entscheidungen lässt Interpretationsspielraum. Abhängig von der jeweiligen Interpretation der Aufsichtsbehörden kann der Umsatz der EWE AG aus Nutzungsentgelten von Netzwerknutzern negativ beeinflusst werden.
- Mitglieder der EWE Gruppe könnten in Verfahren verwickelt werden, die im Zusammenhang mit öffentlichen Ausschreibungen stehen. Solche Verfahren könnten einen negativen Einfluss auf die finanzielle Situation der EWE AG haben.

## RISK FACTORS

The following is a disclosure of risk factors that are material to the Notes in order to assess the market risk associated with these Notes and risk factors that may affect EWE AG's ability to fulfill its obligations under the Notes. Prospective investors should consider these risk factors before deciding to purchase Notes. The following statements are not exhaustive. Prospective investors should consider all information provided in this Prospectus and consult with their own professional advisers if they consider it necessary. In addition, investors should be aware that the risks described may combine and thus intensify one another. The occurrence of one or more risks may have a material adverse effect on the own funds, the financial position and the operating result of the EWE Group.

### **Risk Factors in respect of the Notes**

#### ***Notes may not be a suitable investment for all investors***

Each potential investor in Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes;
- (iv) understand thoroughly the terms of the Notes and be familiar with the behavior of financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

A potential investor should not invest in the Notes, unless it has the expertise (either alone or with a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor's overall investment portfolio.

#### ***Liquidity Risk***

Application has been made to list the Notes on the official list of the Luxembourg Stock Exchange and to admit the Notes to trading on the regulated market of the Luxembourg Stock Exchange. Regardless of whether the Notes are listed or not, there can be no assurance that a liquid secondary market for the Notes will develop or, if it does develop, that it will continue. In an illiquid market, an investor might not be able to sell the Notes at any time at fair market prices. The possibility to sell the Notes might additionally be restricted by country specific reasons.

#### ***Market Price Risk***

The development of market prices of the Notes depends on various factors, such as changes of market interest rate levels, the policies of central banks, overall economic developments, inflation rates or the lack of or excess demand for the type of Notes. The holders of the Notes are, therefore, exposed to the risk of an unfavourable development of market prices of their Notes which materialises if the holders of the Notes sell the Notes prior to the final

maturity of the Notes. Notwithstanding the factors described above, the Issuer is obliged to redeem the Notes at their principal amount at maturity.

#### ***Risk of Early Redemption***

EWE AG will always have the right to redeem the Notes if it is required to pay additional amounts (gross-up payments) on the Notes for reasons of taxation as set out in the Terms and Conditions. If EWE AG redeems the Notes prior to maturity or the Notes are subject to early redemption due to an early redemption event, a holder of the Notes is exposed to the risk that due to such early redemption his investment will have a lower than expected yield. Additionally, such holder may only be able to reinvest on less favourable conditions as compared to the original investment.

#### ***Fixed Rate Notes***

The Notes are fixed rate notes. Therefore, a holder of the Notes is exposed to the risk that the price of the Note falls as a result of changes in the market interest rate. While the nominal interest rate of the Notes as specified in the Terms and Conditions is fixed during the life of the Notes, the current interest rate on the capital market ("market interest rate") typically changes on a daily basis. As the market interest rate changes, the price of a fixed rate note also changes, but in the opposite direction. If the market interest rate increases, the price of a fixed rate note typically falls, until the yield of such note is approximately equal to the market interest rate. If the market interest rate falls, the price of a fixed rate note typically increases, until the yield of such note is approximately equal to the market interest rate. Notwithstanding the factors described above, the Issuer is obliged to redeem the Notes at their principal amount at maturity.

#### ***Taxation***

Potential purchasers of the Notes should be aware that stamp duty and other taxes and/or charges may be levied in accordance with the laws and practices in the countries where the Notes are transferred and other relevant jurisdictions. The summaries set out under the heading "Taxation" discuss only specific tax considerations, and they do not purport to be a comprehensive description of all tax considerations in any particular jurisdiction which may be relevant to a decision to purchase the Notes. Potential purchasers of the Notes should note that the tax treatment of payments in respect of the Notes may be different (and in some cases significantly different) from that set out in those summaries. Potential purchasers of the Notes who are in any doubt as to their tax position should consult their own independent tax advisers. In addition, potential purchasers should be aware that tax regulations and their application by the relevant taxation authorities may change from time to time (Please see in particular subsection EU Savings Tax Directive under the "Taxation" Section). Accordingly, it is not possible to predict the precise tax treatment of the Notes which will apply at any given time.

#### **Risk Factors in respect of EWE AG**

##### **Business Risks**

In its Energy and ICT (information and communication technologies) business areas, EWE remains exposed to volume and margin risks due to the increasing pressure of competition on both national and international procurement, supply and sales markets. Customers' reluctance to invest in core markets as a result of the financial crisis is a particular risk for IT activities in the ICT business area.

EWE AG currently obtains natural gas from seven main suppliers based on long term contracts. In 2008 26 per cent. of natural gas procured has been delivered (indirectly) from sources in Russia. Economic or political instability or other disruptive events in any source or transit country through which gas must pass before it reaches its final destination in Western Europe can have a material adverse effect on the supply of such gas.

## **Business environment risks**

The changes to the overall economic climate caused by the financial crisis pose potential risks to the development of the Group's business and the achievement of target figures in the operating business areas. Further, the EWE Group is exposed to changes in the political, legal and social environment in the countries in which it operates. Such changes may have a potential to adversely influence the business position of the EWE Group.

Regulatory decisions made by the German Federal Network Agency (*Bundesnetzagentur*) are and will continue to have particular significance for EWE AG. They will have a notable impact on network use charges for electricity and gas as well as the competitive environment in the telecommunications market. Legal risks also continue to exist in connection with the enforceability of necessary gas price adjustments.

## **Operating risks**

EWE's activities require reliable and efficient operations of the complex telecommunications and energy infrastructure facilities as well as of the underground natural gas storage caverns. If the Group would not be able to maintain such operations also in the future, this may have an adverse effect on the business prospects of the Group.

## **Strategic risks**

EWE AG's business strategy involves acquisitions and investments in its core businesses. The success of this strategy depends in part on its ability to successfully identify and acquire, on acceptable terms, suitable companies. The consequence of an inability to comply with its business strategy may be an adverse impact on the Group's business position.

## **Financial risks**

The operational business gives rise to financial risks in the form of liquidity, credit, security prices, interest and exchange rate risks as well as market price risks on the international energy procurement and sales markets which are vital to EWE. In light of the crisis on the financial markets, EWE has stepped up its continuous monitoring, position evaluation and active risk management and is implementing instruments related to relevant target figures to manage risk on the basis of risk guidelines for specific business areas. If one or more of the described risks materialize EWE's financial and/or business position may be adversely affected.

## **Risks from joint Group functions**

The latest information and communications technology is required to provide efficient support for all business processes in the individual business areas. The quality and, in particular, the permanent availability are a critical factor in the success of the business and the further development of the business. In this context extensive hardware and software measures are implemented and constantly refined. If the Group is not able to secure efficient support of the individual business areas the Group's financial and business position may become adversely affected.

## **Legal Risks**

EWE Group is involved in various court cases in connection with its ordinary operations. Claims have been filed against some companies of the Group. Furthermore, Group companies are directly involved in various procedures with public authorities or are affected by their results.

In the end-customer business, EWE is affected by legal procedures including class actions concerning the effectiveness of price mechanisms.

The realisation of one or more legal risks could have adverse effects on the financial position and results of operations of the EWE Group.

### **Regulatory Risk**

The EWE Group operates its business in a political, legal, and social environment which is expected to have a material impact on the performance of the Group.

As of 2009, the network user charges will be set by what is referred to as incentive regulation (*Anreizregulierung*). The legal framework for the calculation of network user charges opens room for interpretation by the competent authorities (e.g. in relation to the skimming of additional proceeds or the retroactive increase of upstream network fees in the segment electricity). Depending on the actual interpretation of the competent authorities the revenue deriving from network fees might vary and thus have an adverse effect on the financial position of the Group.

### **Public Procurement Risk**

EWE is subject to the German public procurement law if they conclude contracts in their capacity as public principal and if no exemptions apply (sections 98 et seqq. of the German Act Against Restraints of Competition – *Gesetz gegen Wettbewerbsbeschränkungen* "GWB").

If a public principal does not comply with the rules of the GWB competitors are allowed (i) to initiate proceedings to achieve a revision of the conclusion of the contract or (ii) to claim damages before civil courts. EWE may become subject to such proceedings because EWE does not comply with german public procurement law.

Furthermore, pursuant to the GWB contracts are void if they have been concluded under violation of the obligation to publicly advertise for bids if this violation is asserted within a period of six months after conclusion of the contract. EWE believes that the probability of proceedings or claims for the voidness of agreements is low. However, it cannot be excluded that such proceedings are opened in certain singular cases. Such proceedings may lead to substantial economic disadvantages in particular if competitors successfully claim damages or EWE is required to obey an unfavourable result of a revision of conclusions of contracts.

#### **A. INCORPORATION, REGISTRATION, REGISTERED OFFICE**

EWE AG was created by the merger of two electricity utilities in November 1930, WESAG, established in 1929 by the City of Leer and Preussische Elektrizitäts Aktiengesellschaft, and OLDAG, established in May 1930 by the City of Oldenburg and Preussische Elektrizitäts Aktiengesellschaft, to form Stromversorgungs-AG Oldenburg Ostfriesland (STROSAG). A number of acquisitions of mostly local government-owned electricity utilities and regional supply associations and the subsequent merger with Landeselektrizitätsverband Oldenburg (LEV) in 1943 led to the creation of Energieversorgung Weser-Ems Aktiengesellschaft, whose name was changed in 1992 to EWE Aktiengesellschaft. EWE AG's registered offices are at Tirpitzstrasse 39 in 26122 Oldenburg, Germany (Tel.: +49 441 803-0). The Company is registered in the Commercial Register of the Local Court (*Amtsgericht*) of Oldenburg under the number HRB 33.

The Senate of Bremen has agreed on 23 June 2009 to the sale and the federal cartel office (*Bundeskartellamt*) has authorized the transaction on 30 June 2009. The closing of this transaction is expected in August 2009 following the closing of the transaction between Essent N.V. and Bremen. The funding for the additional stake of up to 51 per cent. will occur either by a bridge loan facility already in place or a cash inflow by way of capital increase in connection with the announced EnBW Energie Baden-Württemberg AG ("**EnBW**") participation in EWE AG.

EWE AG currently invests more than EUR 130m in storage capacities for natural gas in Lower Saxony and Brandenburg.

## 4. BUSINESS OVERVIEW

### A. OVERVIEW

\* Associated Company \*\* Subgroup (as of 1 April 2009)

As a multi-service provider, the EWE Group is active in three business areas: energy, network, and information and telecommunications technology. EWE has developed an integrated service for its customers. The Group is a major employer in its region with more than 5,000 employees.

EWE is one of the largest energy companies in Germany. Approximately one million electricity customers and approximately 1.2 million natural gas customers are supplied by EWE. The EWE Group is involved along the entire value creation chain in the area of natural gas and electricity supply. EWE has expertise in transporting and storing natural gas as well as operating its own networks. EWE also decided early on to focus on producing electricity and heat from renewable energies. The Group is one of the leading energy service providers in the northern German core region between the Ems and Elbe rivers. EWE is also increasingly marketing its services in other regions as well as internationally, for example in Poland and Turkey where EWE holds stakes in enterprises that have more than 600,000 customers.

EWE's network infrastructure is the basis for an efficient energy supply and contributes actively to a sustainable energy supply. Environmentally friendly energy – for example wind or solar energy - is produced locally, placing huge demands on network management. EWE developed its expertise in efficient energy network management into a

new core competency in the early 90's and established its information technology and telecommunications segment against the background of the liberalised telecommunications market.

The telecommunications segment comprises several regional telecommunications service providers, increasing presence in their respective regions. The Group's products range from traditional landline connections to internet services and mobile telephone services. EWE's landline segment is one of the leading providers in the northern German Ems/Weser/Elbe region. The IT segment is another strong supporting pillar in this business area. This segment comprises IT consulting services as well as agency services such as setting up online shops or websites. EWE AG's subsidiary BTC Business Technology AG ("BTC") has grown into one of the largest IT consultancy houses in Germany and is involved in several industries in addition to the energy sector. The ICT business area is one of the Group's growth drivers.

EWE AG operates branches all over the Ems/Elbe region.

## B. PRINCIPAL MARKETS

EWE is a multiservice group for energy, telecommunications and information technology. It combines a strong regional position in the energy market with the dynamic growth of the technology-driven telecom-munikations and IT market. Geographically EWE operates in the Ems / Weser / Elbe region of Germany as well as in Lower Saxony and Bremen and its gas operations extend to Eastern Germany, Poland and Turkey.

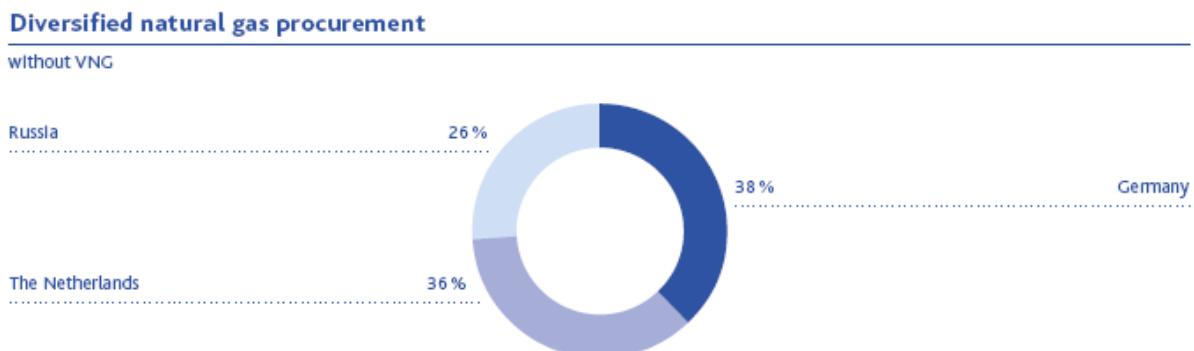

## C. THE SEGMENTS AND BUSINESS AREAS OF EWE

### *Energy*

The supply of energy is the EWE Group's core business. The Company delivers natural gas and electricity to customers in northwest and northeast Germany. The Group also conducts business through foreign affiliates in Poland and Turkey.

EWE covers the entire value creation chain for the supply of energy with natural gas, from production to distribution and sales. The natural gas comes from its own production as well as several domestic and overseas sources. Long-term contracts ensure that EWE will continue to have access to international natural gas sources in the future. As a direct importer EWE is also an upstream supplier of the municipal utilities in the region. EWE AG has special expertise in the area of natural gas storage. As a pioneer of underground storage, EWE is capable of compensating for supply bottlenecks with natural gas stored underground and distributing it to customers through its own network infrastructure.

EWE buys natural gas from suppliers in Germany and abroad. The following diagram shows the origin of total purchases of 40.7 billion kWh in 2008:

EWE operates 25 caverns at the Huntorf and Nüttermoor natural gas storage facilities in Lower Saxony and a further one at Rüdersdorf near Berlin. This gives EWE a current storage capacity (working gas volume) of 1.5 billion cubic metres. More than half of the storage capacity is sold to third parties. Increasing gas trading, declining domestic gas production in Germany and North-Western Europe and stronger gas flows from East to West mean that the need for storage capacities in Europe is set to grow further. This is the background to EWE's investment in expanding and modernising the gas storage facilities and the plans to develop new capacities which were pursued in 2008.

EWE AG also covers the entire value creation chain for electricity as a one-stop supplier. Renewable energy sources – particularly wind energy – play an increasingly important role in the Group's own energy production. The network area includes the windy coastal areas of Lower Saxony. For this reason EWE AG made the decision early on to expand and develop its comprehensive expertise in wind energy technology. The Group considers itself to be one of Germany's technology leaders in this area and continuously implements progressive technology to expand on the advantage provided by its expertise through participations in important offshore projects like alpha ventus and Riffgat. EWE also makes use of the rural character of the region in which the Group is mainly active in order to exploit the energy potential of biomass. The EWE Group has also recently intensified its commitment to photovoltaics: it plans to install the largest photovoltaics system in any stadium in Germany as part of the expansion of the Weser stadium in Bremen.

EWE purchases electricity from upstream suppliers and on wholesale markets. In 2008 the EWE Group purchased a total of 12.9 billion kilowatt-hours (kWh) from third parties. Electricity is primarily purchased by using short-term buying and selling on the spot market. Although the procurement markets as a whole were affected by the turmoil on the international financial markets the financial crisis had no direct impact on the EWE Group's supply and procurement contracts in 2008. EWE also provides services and manages energy trading for municipal utilities.

In the area of power generation EWE has its own production capacities in the field of renewable energies (wind, biomass, biogas, solar), with total output of 87.6 megawatts (MW). In 2008, installed capacity for wind energy was again expanded (up 20.2 per cent). EWE intends to further develop the production of electricity from renewable energies. Two off-shore wind energy projects in the German North Sea are under development.

#### *Network*

EWE is developing new integrated multi-service products and services by combining natural gas, electricity and telecommunications networks. The Company believes that its network infrastructure is one of the most modern, secure and efficient in Europe.

EWE has concentrated its network infrastructure expertise in its wholly owned subsidiary EWE NETZ GmbH. EWE NETZ GmbH was founded in 2006 as a result of EU regulations for the unbundling of energy supply. It operates an electricity grid some 80,000 km in length in the Ems / Weser / Elbe region, a 50,000 km gas network in the Ems / Weser / Elbe and Brandenburg regions, on the island of Rügen and in the Northern part of West Pomerania as well as a telecommunications network covering some 30,000 km. All the activities for providing drinking water to Bremervörde, Cuxhaven, Oldenburg, Scheeßel and Varel are also pooled in this business area. The electricity network is almost entirely underground, making it more resistant to disruptions. The Company believes that EWE NETZ GmbH's energy networks are among the most secure and powerful in Europe.

EWE NETZ GmbH is not only responsible for operating and maintaining the networks, but also provides innovative solutions for modern network management. This is the foundation which EWE uses to develop and provide complex products and services for supplying energy, conserving energy and improving energy efficiency. The Group aims to intertwine the supply of energy with telecommunications services to a greater extent in the future.

## *ICT*

EWE's information and telecommunications technologies are important for customer-oriented value added services and products with high future potential which incorporate an efficient electricity and gas supply. An attractive multimedia range drives growth in the traditional telecommunications area.

EWE AG believes that its subsidiaries in the information technology and telecommunications segments have established themselves successfully in their markets. Several telecommunications companies in northern Germany as well as the international IT services provider BTC, together with its own subsidiaries, belong to the Group.

EWE's telecommunications companies provide their customers with the entire range of landline, internet and mobile phone services. The Group's high-performance network infrastructure, which it has consistently modernised over recent years and intends to expand in the future, is an important driving factor. One example is the expansion of fibre optic networks which makes it possible to provide attractive bundle offers of traditional telecommunications services, TV and multimedia products. The subsidiary EWE TEL GmbH is one of the largest regional telecommunications companies in Germany with approximately 433,000 customers in 2008.

EWE AG's subsidiary BTC has developed itself into an IT company which is both domestically and internationally active in providing a wide range of tailored IT solutions. Since 2000, the company has provided innovative system solutions for its corporate customers, from process consulting to integrating IT systems and system management. EWE's telecommunications and IT expertise also plays a key role in innovations in the convergence of energy, telecommunications and IT services. The Group is particularly involved in this area and is already developing new services for tomorrow's markets.

EWE's training building "ZentrumZukunft" is one example of the convergence of telecommunications, IT and energy services. In addition to a wide range of information and entertainment services, all of the information related to the building's energy supply can be accessed and controlled from a central information portal. Another example is the eTelligence pilot project, which makes plans for the energy supply of the future a reality. At its core lies a regional electricity marketplace which brings producers, consumers, energy service providers and network operators together. Participants can connect with each other through cutting edge information and communications technology.

## **5. RESEARCH AND DEVELOPMENT**

EWE's research and development is a central element in the strategic development of the Group and a foundation for the development of new products and services.

EWE's energy research is focussed on finding solutions which allow decentralised renewable energy to be integrated into the existing energy system. EWE AG also focuses its activities on decentralised micro combined heat and power and producing electricity and heat from renewable energy sources.

EWE's own research and development is complemented by a network of external research institutions and experienced market partners. This allows the Group to expand its expertise, open up new possibilities and bring innovations onto the market without delay.

EWE concentrates on energy conversion projects which attempt to increase efficiency by using combined heat and power and producing electricity and warmth from renewable resources. One example of the Group's commitment to the field of energy conversion is fuel cell technology, which EWE has been advancing in field tests for years together with fuel cell system manufacturers. EWE is an active partner of "Callux", the nationwide largest field test of fuel cells for privately owned houses. EWE has developed into an acknowledged pacesetter in fuel cell technology and regularly brings its expertise in this area to bear on funded projects, both domestically and overseas.

One form of renewable energy that EWE particularly focuses on is wind energy. It is heavily involved in developing innovative solutions in this area. One example is the implementation of the first German offshore wind park, alpha ventus. The wind park is being constructed by DOTI (Deutsche Offshore-Testfeld und Infrastruktur-GmbH & Co. KG), which was formed in 2006. With a 47.5 per cent holding, EWE AG is the largest shareholder of the Company. The alpha ventus test site will comprise 12 multi-megawatt ( $> 5$  MW) wind turbines which produce enough electricity for 50.000 households per year. The project partners are working closely with wind turbine manufacturers and the Federal Environment Ministry. EWE AG is also involved in the development of another wind park project in the German North Sea. Together with the partner ENOVA, in November 2008 EWE AG founded the company RIFFGAT GmbH & Co. KG, which will be responsible for building and operating of the wind park.

Another regenerative energy that EWE AG believes has an interesting future is biogas. At the end of 2007, EWE opened one of the first biogas purification plants in Germany in Werlte, Lower Saxony. The plant processes the biogas that it produces in such a way as to achieve the quality of natural gas and then feeds it directly into the local network. This allows biogas to be used as a fuel as well as to create electricity and heat.

One of the latest R&D projects is a strategic partnership in the field of electric mobility. EWE AG is convinced that eco-friendly motorised transportation and mobile electricity storage devices will play an important part in the energy supply of the future. EWE and car manufacturer Karmann (Osnabrück) are planning to construct a number of pilot vehicles between 2009 and 2011. These electric vehicles will be incorporated in EWE's electricity and telecommunications network and intelligent control systems will be developed for battery and net-work management.

## **6. MATERIAL CONTRACTS**

On 10 July 2008, EWE AG and its direct and indirect shareholders entered into agreements with EnBW pursuant to which EnBW will acquire a stake of 26 per cent. in the ordinary share capital of EWE AG. To acquire the stake EnBW will purchase shares deriving from a capital increase at EWE AG and further shares disposed by Weser-Ems-Energiebeteiligungen GmbH, a current shareholder of EWE AG. The transaction described above, which has a total value of approximately EUR 2bn, has been approved with certain conditions (*Auflagen*) by the federal cartel office (*Bundeskartellamt*) on 6 July 2009. These conditions require that either VNG (as defined below) or GESO Beteiligungs- und Beratungs AG, which is currently held by EnBW, be disposed to third parties.

On 14 May 2009, EWE AG entered into an agreement with EnBW pursuant to which EWE shall dispose its stake in Verbundnetz Gas AG ("VNG") to EnBW. The transfer of the stake is conditional upon *inter alia* the approval of VNG's general meeting and the approval of the federal cartel office (*Bundeskartellamt*).

EWE AG entered into agreements with Bremen which allow EWE AG to acquire 51 per cent. minus one share of a stake in swb AG (*Stadtwerke Bremen*). The Senate of Bremen has agreed on 23 June 2009 to the sale and the federal cartel office (*Bundeskartellamt*) has authorized the transaction on 30 June 2009. The closing of this transaction is expected in August 2009 following the closing of the transaction between Essent N.V. and Bremen.

## **7. TREND INFORMATION**

Save as disclosed in this Prospectus, there has been no material adverse change in the prospects of EWE AG since 31 December 2008.

### **A. OUTLOOK**

In light of the severe economic slump brought on by the financial crisis, EWE AG can make no quantitative statement about how its sales and earnings figures will develop. Qualitatively, EWE is cautiously optimistic that Group sales will remain stable or grow in 2009. However, if the economic situation deteriorates further, sales as well as earnings figures could turn out lower than in the 2008 financial year.

## B. RECENT DEVELOPMENTS

EnBW is looking to acquire a 26 per cent stake in EWE AG. EWE's shareholders had agreed to EnBW's acquisition in July 2008. The federal cartel office (*Bundeskartellamt*) has given its approval with certain conditions (*Auflagen*) on 6 July 2009.

Depending on EnBW acquiring a stake in EWE AG, EWE AG has announced to sell its shareholding in Leipzig-based Verbundnetz Gas AG. The transfer of the stake is still subject to certain conditions including the consent of the VNG general meeting and the approval of the federal cartel office (*Bundeskartellamt*).

Further, EWE AG is preparing to raise its stake in Bremen-based utility swb AG (*Stadtwerke Bremen*) and turn it into a shareholding of 100 per cent. minus one share.

## TAXATION

The following is a general discussion of certain tax consequences under the tax laws of the Federal Republic of Germany, The Netherlands and the Grand-Duchy of Luxembourg of the acquisition and ownership of the Notes. This discussion does not purport to be a comprehensive description of all tax considerations which may be relevant to a decision to purchase the Notes. In particular, this discussion does not consider any specific facts or circumstances that may apply to a particular purchaser. This summary is based on the laws of the Federal Republic of Germany, The Netherlands, the Grand-Duchy of Luxembourg, the United Kingdom, Ireland and the Republic of Austria currently in force and as applied on the date of this Prospectus, which are subject to change, possibly with retroactive or retrospective effect. The information contained within this section is limited to taxation issues, and prospective investors should not apply any information set out below to other areas, including (but not limited to) the legality of transactions involving the Notes.

**PROSPECTIVE PURCHASERS OF THE NOTES ARE ADVISED TO CONSULT THEIR OWN TAX ADVISORS AS TO THE TAX CONSEQUENCES OF THE PURCHASE, OWNERSHIP AND DISPOSITION OF THE NOTES, INCLUDING THE EFFECT OF ANY STATE OR LOCAL TAXES UNDER THE TAX LAWS APPLICABLE IN THE FEDERAL REPUBLIC OF GERMANY, THE NETHERLANDS, THE GRAND-DUCHY OF LUXEMBOURG AND EACH COUNTRY OF WHICH THEY ARE RESIDENTS.**

### **I. Federal Republic of Germany ("Germany")**

#### **1. Tax Residents**

Persons (individuals and corporate entities) who are tax resident in Germany (in particular, persons having a residence, habitual abode, seat or place of management in Germany) are subject to income taxation (income tax or corporate income tax, as the case may be, plus solidarity surcharge thereon plus church tax, if applicable) on their worldwide income, regardless of its source, including interest from debt of any kind (such as the Notes) and, in general, capital gains.

##### **a. Taxation if the Notes are held as private assets (*Privatvermögen*)**

In the case of German tax-resident individual investors (*unbeschränkt Steuerpflichtige*) holding the Notes as private assets (*Privatvermögen*), the following applies:

###### **i. Income**

Payments of interest on the Notes qualify as taxable income from capital investments (*Einkünfte aus Kapitalvermögen*) pursuant to section 20 para 1 no 7 German Income Tax Act ("ITA" - *Einkommensteuergesetz*).

Capital gains / capital losses realised upon sale of the Notes, computed as the difference between the acquisition costs and the sales proceeds reduced by expenses directly and factually related to the sale, qualify as (negative) income from capital investments. If the Notes are assigned, redeemed or repaid rather than sold, such transaction is treated like a sale.

###### **ii. Taxation of income**

Income from capital investments is taxed at a separate tax rate for income from capital investments (*gesonderter Steuertarif für Einkünfte aus Kapitalvermögen*), which is 26.375 per cent. (including solidarity surcharge (*Solidaritätszuschlag*)) plus, if applicable, church tax. When computing the income from capital investments, the saver's lump sum amount (*Sparer-Pauschbetrag*) of EUR 801 (EUR 1,602 in the case of jointly assessed husband and wife) will be deducted. The deduction of the actual income related expenses, if any, is excluded. The taxation of income from capital investments shall take place mainly by way of levying withholding tax (please see iii. below). If and to

the extent German withholding has been levied, such withholding tax shall, in principle, become definitive and replace the investor's income taxation. If no withholding tax has been levied other than by virtue of a withholding tax exemption certificate (*Freistellungsauftrag*) and in certain other cases, the investor is nevertheless obliged to file a tax return, and the income from capital investments will then be taxed within the assessment procedure. However, the separate tax rate for income from capital investments applies in most cases also within the assessment procedure.

### **iii. German withholding tax**

With regard to income from capital investments, German withholding tax will be levied if the Notes are held in a custodial account which the investor maintains with a German branch of a German or non-German credit or financial services institution or with a securities trading business or securities trading bank (a "**German Disbursing Agent**"). The tax base is, in principle, equal to the taxable income as set out in i. above. However, in the case of capital gains, if the acquisition costs of the Notes are not proven to the German Disbursing Agent, withholding tax is applied to 30per cent. of the proceeds from the redemption, sale or assignment of the Notes. When computing the tax base for withholding tax purposes, the German Disbursing Agent may deduct any negative income from capital investments in the same calendar year or unused negative income from capital investments in previous calendar years.

German withholding tax will be levied at a flat withholding tax rate of 26.375 per cent. (including solidarity surcharge) plus, if applicable, church tax.

No German withholding tax will be levied if the investor filed a withholding tax exemption certificate (*Freistellungsauftrag*) with the German Disbursing Agent, but only to the extent the income from capital investments does not exceed the maximum exemption amount shown on the withholding tax exemption certificate. Currently, the maximum exemption amount is EUR 801 (EUR 1,602 in the case of jointly assessed husband and wife). Similarly, no withholding tax will be levied if the investor has submitted to the German Disbursing Agent a certificate of non-assessment (*Nichtveranlagungs-Bescheinigung*) issued by the relevant local tax office.

### **b. Taxation if the Notes are held as business assets (Betriebsvermögen)**

In the case of German tax-resident corporations or individual investors (*unbeschränkt Steuerpflichtige*) holding the Notes as business assets (*Betriebsvermögen*), interest payments and capital gains will be subject to corporate income tax or income tax, as the case may be, (in each case plus 5.5per cent. solidarity surcharge thereon), trade tax, if applicable, and church tax, if applicable. Capital losses might be ring-fenced.

The provisions regarding German withholding tax apply, in principle, as set out in section a. iii. above. However, investors holding the Notes as business assets cannot file a withholding tax exemption certificate with the German Disbursing Agent. Instead, no withholding tax will be levied on capital gains from the redemption, sale or assignment of the Notes if (a) the Notes are held by a company satisfying the requirements of section 43 para 2 sentence 3 no 1 ITA or (b) the proceeds from the Notes qualify as income of a domestic business and the investor notifies this to the German Disbursing Agent by use of the officially required form.

Any withholding tax levied is credited as prepayment against the German (corporate) income tax amount. If the tax withheld exceeds the respective (corporate) income tax amount, the difference will be refunded within the tax assessment procedure.

## **2. Non-residents**

Persons who are not tax resident in Germany are not subject to tax with regard to income from the Notes unless (i) the Notes are held as business assets (*Betriebsvermögen*) of a German permanent establishment (including a permanent representative) which is maintained by the investor or (ii) the income under the Notes qualifies for other reasons

as taxable German source income. If a non-resident person is subject to tax with its income from the Notes, in principle, similar rules apply as set out above with regard to German tax resident persons (please see 1. above).

If the income is subject to German tax as set out in the preceding paragraph, German withholding tax will be applied like in the case of a German tax resident person.

### **3. Inheritance and Gift Tax**

Inheritance or gift taxes with respect to any Note will, in principle, arise under German law if, in the case of inheritance tax, either the decedent or the beneficiary or, in the case of gift tax, either the donor or the donee is a resident of Germany or if such Note is attributable to a German trade or business for which a permanent establishment is maintained or a permanent representative has been appointed. In addition, certain German expatriates will be subject to inheritance and gift tax.

### **4. Other Taxes**

No stamp, issue, registration or similar taxes or duties is currently payable in Germany in connection with the issuance, delivery or execution of the Notes. Currently, net assets tax (*Vermögensteuer*) is not levied in Germany.

## **II. Luxembourg**

### *Withholding Tax*

All payments of interest and principal by the Issuer in the context of the holding, disposal, redemption or repurchase of the Notes can be made free and clear of any withholding or deduction for or on account of any taxes of whatsoever nature imposed, levied, withheld, or assessed by Luxembourg or any political subdivision or taxing authority thereof or therein, in accordance with the applicable Luxembourg law, subject however to:

- (i) the application of the Luxembourg laws of 21 June, 2005 implementing the European Union Savings Directive (Council Directive 2003/48/EC) and several agreements concluded with certain dependent or associated territories and providing for the possible application of a withholding tax (20 per cent. from 1 July 2008 to 30 June 2011 and 35 per cent. from 1 July 2011) on interest paid to certain non Luxembourg resident investors (individuals and certain types of entities called "residual entities") in the event of the Issuer appointing a paying agent in Luxembourg within the meaning of the above-mentioned directive (see section "**EU Savings Tax Directive**" below) or agreements;
- (ii) the application as regards Luxembourg resident individuals of the Luxembourg law of 23 December 2005 which has introduced a 10 per cent. withholding tax (which is final when Luxembourg resident individuals are acting in the context of the management of their private wealth) on savings income (i.e. with certain exemptions, savings income within the meaning of the Luxembourg laws of 21 June 2005 implementing the EU Savings Directive (Council Directive 2003/48/EC)). This law should apply to savings income accrued as from 1 July 2005 and paid as from 1 January 2006.

Responsibility for the withholding of tax in application of the above-mentioned Luxembourg laws of 21 June 2005 and 23 December 2005 is assumed by the Luxembourg paying agent within the meaning of these laws and not by the Issuer.

## **III. The Netherlands**

*The following summary of certain Dutch taxation matters is based on the laws and practice in force as of the date of this Prospectus and is subject to any changes in law and the interpretation and application thereof, which changes could be made with retroactive effect. The following summary does not purport to be a comprehensive description of*

*all the tax considerations that may be relevant to a decision to acquire, hold or dispose of a Note, and does not purport to deal with the tax consequences applicable to all categories of investors, some of which may be subject to special rules.*

*Generally speaking, an individual has a substantial interest in a company if (a) such individual, either alone or together with his partner, directly or indirectly has, or (b) certain relatives of such individual or his partner directly or indirectly have, (I) the ownership of, a right to acquire the ownership of, or certain rights over, shares representing 5 per cent or more of either the total issued and outstanding capital of such company or the issued and outstanding capital of any class of shares of such company, or (II) the ownership of, or certain rights over, profit participating certificates (winstbewijzen) that relate to 5 per cent or more of either the annual profit or the liquidation proceeds of such company.*

An entity has a deemed substantial interest in such company if such entity has disposed of or is deemed to have disposed of all or part of a substantial interest on a non-recognition basis.*

*For the purpose of this summary, the term entity means a corporation as well as any other person that is taxable as a corporation for Dutch corporate tax purposes.*

***Investors are advised to consult their professional advisers as to the tax consequences of purchase, ownership and disposition of Notes.***

## **1. WITHHOLDING TAX**

All payments made by the Issuer of interest and principal under the Notes can be made free of withholding or deduction for any taxes of whatsoever nature imposed, levied, withheld or assessed by The Netherlands or any political subdivision or taxing authority thereof or therein, unless the Notes qualify as debt effectively functioning as equity for the purposes of article 10, paragraph 1, sub d of the Dutch Corporate Tax Act 1969 (*Wet op de vennootschapsbelasting 1969*).

## **2. TAXES ON INCOME AND CAPITAL GAINS**

### **Residents**

#### **Resident entities**

An entity holding a Note which is, or is deemed to be, resident in The Netherlands for corporate tax purposes and which is not tax exempt, will generally be subject to corporate tax in respect of income or a capital gain derived from a Note at rates up to 25.5 per cent.

#### **Resident individuals**

An individual holding a Note who is, is deemed to be, or has elected to be treated as, resident in The Netherlands for income tax purposes will be subject to income tax in respect of income or a capital gain derived from a Note at rates up to 52 per cent if:

- (i) the income or capital gain is attributable to an enterprise from which the holder derives profits (other than as a shareholder); or

- (ii) the income or capital gain qualifies as income from miscellaneous activities (*belastbaar resultaat uit overige werkzaamheden*) as defined in the Income Tax Act (*Wet inkomenbelasting 2001*), including, without limitation, activities that exceed normal, active asset management (*normaal, actief vermogensbeheer*).

If neither condition (i) nor (ii) applies, an individual holding a Note will be subject to income tax on the basis of a deemed return, regardless of any actual income or capital gain derived from a Note. The deemed return amounts to 4 per cent. of the average value of the individual's net assets in the relevant fiscal year (including the Note). Subject to application of personal allowances, the deemed return will be taxed at a rate of 30 per cent.

#### **Non-residents**

A holder of a Note which is not, is not deemed to be, and - in case the holder is an individual - has not elected to be treated as, resident in The Netherlands for the relevant tax purposes will not be subject to taxation on income or a capital gain derived from a Note unless:

- (i) the income or capital gain is attributable to an enterprise or part thereof which is either effectively managed in The Netherlands or carried on through a permanent establishment (*vaste inrichting*) or permanent representative (*vaste vertegenwoordiger*) in The Netherlands; or
- (ii) the holder is an individual and the income or capital gain qualifies as income from miscellaneous activities (*belastbaar resultaat uit overige werkzaamheden*) in The Netherlands as defined in the Income Tax Act (*Wet inkomenbelasting 2001*), including, without limitation, activities that exceed normal, active asset management (*normaal, actief vermogensbeheer*).

### **3. GIFT AND INHERITANCE TAXES**

Dutch gift or inheritance taxes will not be levied on the occasion of the transfer of a Note by way of gift by, or on the death of, a holder, unless:

- (i) the holder is or is deemed to be resident in The Netherlands for the purpose of the relevant provisions; or
- (ii) the transfer is construed as an inheritance or gift made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be resident in The Netherlands for the purpose of the relevant provisions; or
- (iii) the Note is attributable to an enterprise or part thereof which is either effectively managed in The Netherlands or carried on through a permanent establishment (*vaste inrichting*) or permanent representative (*vaste vertegenwoordiger*) in The Netherlands.

### **4. VALUE ADDED TAX**

There is no Dutch value added tax payable by a holder of a Note in respect of payments in consideration for the issue of the Notes or in respect of the payment of interest or principal under the Notes, or the transfer of the Notes.

### **5. OTHER TAXES**

There is no Dutch registration tax, stamp duty or any other similar tax or duty payable in The Netherlands by a holder of a Note in respect of or in connection with the execution, delivery and/or enforcement by legal proceedings (including any foreign judgement in the courts of The Netherlands) of the Notes or the performance of the Issuer's obligations under the Notes.

## **6. RESIDENCE**

A holder of a Note will not be, or deemed to be, resident in The Netherlands for tax purposes and, subject to the exceptions set out above, will not otherwise be subject to Dutch taxation, by reason only of acquiring, holding or disposing of a Note or the execution, performance, delivery and/or enforcement of a Note.

## **7. EU COUNSEL DIRECTIVE ON TAXATION OF SAVINGS INCOME**

In accordance with EC Council Directive 2003/48/EC on the taxation of savings income, The Netherlands will provide to the tax authorities of another EU member state (and certain non-EU countries and associated territories specified in that directive) details of payments of interest or other similar income paid by a person within The Netherlands to, or collected by such a person for, an individual resident in such other state.

### **IV. EU Savings Tax Directive**

On 3 June 2003, the EU Council of Economic and Finance Ministers adopted a directive regarding the taxation of savings income (the "**EU Savings Directive**") effective from 1 July 2005. Under the directive, each Member State is required to provide to the tax authorities of another Member State details of payments of interest within the meaning of the EU Savings Directive or other similar income paid by a paying agent within the meaning of the EU Savings Directive, to an individual resident or certain types of entities called "**residual entities**", within the meaning of the EU Savings Directive (the "**Residual Entities**"), established in that other Member State (or certain dependent or associated territories). For a transitional period, however, Austria, Belgium and Luxembourg are permitted to apply an optional information reporting system whereby if a beneficial owner, within the meaning of the EU Savings Directive, does not comply with one of two procedures for information reporting, the relevant Member State will levy a withholding tax on payments to such beneficial owner. The tax rate of the withholding is of 20 per cent. from 1 July 2008 to 30 June 2011 and 35 per cent. as from 1 July 2011. The transitional period is to terminate at the end of the first full fiscal year following agreement by certain non-EU countries to the exchange of information relating to such payments. See "European Union Directive on Taxation of Savings Income in the Form of Interest Payments" (Council Directive 2003/48/EC).

Also with effect from 1 July 2005, a number of non-EU countries (Switzerland, Andorra, Liechtenstein, Monaco and San Marino) and certain dependant or associated territories (Jersey, Guernsey, Isle of Man, Montserrat, British Virgin Islands, Netherlands Antilles and Aruba) have agreed to adopt similar measures (either provision of information or transitional withholding) in relation to payments made by a paying agent (within the meaning of the EU Savings Directive) within its jurisdiction to, or collected by such a paying agent for, an individual resident or a Residual Entity established in a Member State. In addition, Luxembourg has entered into reciprocal provision of information or transitional withholding arrangements with certain of those dependent or associated territories in relation to payments made by a paying agent (within the meaning of the EU Savings Directive) in Luxembourg to, or collected by such a paying agent for, an individual resident or a Residual Entity established in one of those territories.

The European Commission has announced on 13 November 2008 proposals to amend the EU Savings Directive. If implemented, the proposed amendments would, inter alia, (i) extend the scope of the EU Savings Directive to payments made through certain intermediate structures (whether or not established in a Member State) for the ultimate benefit of EU resident individuals, and (ii) provide for a wider definition of interest subject to the EU Savings Directive.

## SUBSCRIPTION AND SALE

### **Underwriting**

Pursuant to a subscription agreement dated 14 July 2009 (the “**Subscription Agreement**”) between the Issuer and the Managers, the Managers will agree, subject to certain conditions, to subscribe and pay for the Notes at an issue price of 98.976 per cent. less certain customary management and underwriting commissions and to sell the Notes. The conditions as referred to in the first sentence of this paragraph will be customary closing conditions as set out in the Subscription Agreement. The Issuer has furthermore agreed to reimburse the Managers for certain expenses incurred in connection with the issue of the Notes. The expenses of the issue of the Notes will be approximately EUR 500,000.

In the Subscription Agreement, the Issuer has made certain representations and warranties in respect of its legal and financial matters. The Subscription Agreement entitles the Managers to terminate its obligations thereunder in certain circumstances prior to payment of the purchase price of the Notes. The Issuer has agreed to indemnify the Managers against certain liabilities in connection with the offer and sale of the Notes. The Subscription Agreement is governed by German law.

The Managers (or their affiliates) have provided from time to time, and expect to provide in the future, investment services to the Issuer (or its affiliates), for which the Managers (or their affiliates) have received or will receive customary fees and commissions.

To the Issuer’s knowledge, there are no interests of natural and legal persons involved in the issue, including conflicting ones, that are material to the issue.

The Notes will be issued on 16 July 2009. The rights attached to the Notes take effect as of such issue date. For the subscribers of the Notes the yield is 5.368 per cent. *per annum*.<sup>1</sup>

"The Notes covered hereby have not been registered under the U.S. Securities Act of 1933, as amended (the "**Securities Act**"), and may not be offered or sold within the United States or to, or for the account or benefit of, U. S. persons by any person referred to in Rule 903(b)(2)(iii) of Regulation S under the Securities Act (i) as part of their distribution at any time or (ii) otherwise until 40 days after the later of the commencement of the offering and the closing date, except in either case in accordance with Regulation S under the Securities Act. Terms used above have the meanings given to them by Regulation S under the Securities Act."

- (c) Each Manager who has purchased Notes hereunder shall determine and notify to the Principal Paying Agent and the Issuer the completion of the distribution of the Notes. On the basis of such notification or notifications, the Principal Paying Agent agrees to notify such Manager/Lead Manager of the end of the restricted period with respect to the Notes. Terms used in this paragraph have the meanings given to them by Regulation S.
- (d) Each Manager has represented, warranted and undertaken that it has not entered and will not enter into any contractual arrangement with respect to the distribution or delivery of Notes, except with its affiliates or with the prior written consent of the Issuer.
- (e) Notes will be issued in accordance with the provisions of U.S. Treas.Reg. § 1.163-5(c) (2) (i) (C) (the "**TEFRA C Rules**").

In addition, Notes must be issued and delivered outside the United States and its possessions in connection with their original issuance. Each Manager has represented, warranted and undertaken that it, in connection with the original issuance of Notes has not offered sold or delivered and will not offer, sell or deliver, directly or indirectly, Notes within the United States or its possessions in connection with their original issuance. Further, each Manager has represented, warranted and undertaken in connection with the original issuance of Notes, that it has not communicated, and will not communicate, directly or indirectly, with a prospective purchaser if either such Manager or such purchaser is within the United States or its possessions and will not otherwise involve its U.S. office in the offer or sale of Notes. Terms used in this paragraph have the meanings given to them by the U.S. Internal Revenue Code and regulations thereunder, including the TEFRA C Rules.

### **Public Offer Selling Restriction Under the Prospectus Directive**

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive (each, a "Relevant Member State"), each Manager has represented, warranted and agreed that with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State (the "Relevant Implementation Date") it has not made and will not make an offer of Notes which are the subject of the offering contemplated by the Prospectus to the public in that Relevant Member State except that it may, with effect from and including the Relevant Implementation Date, make an offer of such Notes to the public in that Relevant Member State:

- (a) *Approved prospectus*: if the Notes specify that an offer of those Notes may be made other than pursuant to Article 3(2) of the Prospectus Directive in that Relevant Member State (a "Non-exempt Offer"), following the date of publication of a prospectus in relation to such Notes which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State in accordance with the Prospectus Directive;
- (b) *Authorised institutions*: at any time to legal entities which are authorised or regulated to operate in the financial markets or, if not so authorised or regulated, whose corporate purpose is solely to invest in securities;
- (c) *Significant enterprises*: at any time to any legal entity which has two or more of (1) an average of at least 250 employees during the last financial year; (2) a total balance sheet of more than EUR 43,000,000 and (3) an annual net turnover of more than EUR 50,000,000, all as shown in its last annual or consolidated accounts; or
- (d) *Fewer than 100 offerees*: at any time to fewer than 100 natural or legal persons (other than qualified investors as defined in the Prospectus Directive) subject to obtaining the prior consent of the relevant Manager or Managers nominated by the Issuer for any such offer; or
- (e) *Other exempt offers*: at any time in any other circumstances falling within Article 3(2) of the Prospectus Directive,

provided that no such offer of Notes referred to in (b) to (e) above shall require an Issuer or any Manager to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

For the purposes of this provision, the expression an "**offer of Notes to the public**" in relation to any Notes in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the

Notes, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State and the expression "**Prospectus Directive**" means Directive 2003/71/EC and includes any relevant implementing measure in each Relevant Member State.
