Each investor contemplating subscribing for or purchasing Notes should make its own independent investigation of the financial condition and affairs and its own appraisal of the creditworthiness of the relevant Issuer and the Guarantor and each recipient of this Prospectus or any Final Terms shall be taken to have made its own investigation and appraisal of the condition (financial or otherwise) of the relevant Issuer and the Guarantor.

No person has been authorised by any of the Issuers or the Guarantor to give any information or to make any representations not contained in or not consistent with the information and the representations set out in this

Prospectus or any other document entered into in connection with the issue or sale of any Notes under the Programme, and, if given or made, such information or representations must not be relied upon as having been authorised by the Issuers, the Guarantor or the Dealers.

Neither the delivery of this Prospectus nor the offering, sale, issue or delivery of any Notes shall, in any circumstances, imply that the information contained herein is correct at any time subsequent to the date hereof or that any other information supplied in connection with the Programme is correct as of any time subsequent to the date indicated in the document containing the same. The Dealers expressly do not undertake to review the financial condition or affairs of the Issuers and the Guarantor during the life of the Programme or to advise any investor in the Notes of any information coming to their attention. Investors should review, *inter alia*, the most recently published financial statements of the relevant Issuer and the Guarantor (if applicable) when deciding whether or not to subscribe for or purchase any Notes.

Each Issuer and the Guarantor have undertaken with the Dealers to supplement this Prospectus in accordance with Article 13 of the Prospectus Act or publish a new Prospectus in the event that any significant new factor, material mistake or inaccuracy relating to the information included in this Prospectus which is capable of affecting the assessment of the Notes to be issued under the Programme arises or is noted between the time when this Prospectus is approved and the final closing of any Tranche of Notes offered to the public or, as the case may be, trading of any Tranche of Notes on a regulated market begins, whichever occurs later. Such supplement or new Prospectus will be obtainable free of charge during normal business hours from the Issuing Agent (Citibank N.A., London Branch, Citigroup Centre, Canada Square, Canary Wharf, London E14 5LB, United Kingdom), the Paying Agent in Germany (Citigroup Global Markets Deutschland AG, Reuterweg 16, 60323 Frankfurt am Main, Germany), the Paying Agent in Luxembourg (BNP Paribas Securities Services, Luxembourg Branch, 33, rue de Gasperich, Howald-Hesperange, L-2085 Luxembourg), DAG (Daimler AG, Mercedesstraße 137, 70327 Stuttgart, Germany), MBAP (Mercedes-Benz Australia/Pacific Pty. Ltd., 44 Lexia Place, Mulgrave VIC 3170, Australia), DIF (Daimler International Finance B.V., Van Deventerlaan 50, 3528 AE Utrecht, The Netherlands), MBJ (Mercedes-Benz Japan Co., Ltd., Roppongi First Building, 9-9, Roppongi 1-chome, Minato-ku, Tokyo 106-8506, Japan), DCFI (Daimler Canada Finance Inc., 1 Place Ville Marie, 37 Floor, Montréal, Québec H3B 3P4, Canada), MBF (Mercedes-Benz Finansman Türk A.Ş., Akçaburgaz Mahallesi, Mercedes Cad. Such supplement or new Prospectus will also be viewable on, and obtainable free of charge from, the website of the Luxembourg Stock Exchange (www.bourse.lu).

The Notes may not be offered or sold, directly or indirectly, and neither this document nor any other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable laws or regulations.

This Prospectus has been prepared on the basis that, except to the extent sub-paragraph (ii) below may apply, any offer of Notes in any Member State of the EEA which has implemented the Prospectus Directive (which expression shall, for the purposes of this paragraph, include all amendments thereto, including Directive 2010/73/EU of the European Parliament and of the Council of November 24, 2010, to the extent implemented in such Member State) (each, a "**Relevant Member State**") will be made pursuant to an exemption under the Prospectus Directive, as implemented in that Relevant Member State, from the requirement to publish a prospectus for offers of Notes. Accordingly any person making or intending to make an offer in that Relevant Member State of Notes which are the subject of an offering/placement contemplated in this Prospectus as completed by Final Terms in relation to the offer of those Notes may only do so (i) in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive, in each case, in relation to such offer, or (ii) if a prospectus for such offer has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State and (in either case) published, all in accordance with the Prospectus Directive, provided that any such prospectus has subsequently been completed by Final Terms which specify that offers may be made other than pursuant

to Article 3(2) of the Prospectus Directive in that Relevant Member State and such offer is made in the period beginning and ending on the dates specified for such purpose in such prospectus or relevant Final Terms, as applicable and the Issuer has consented in writing to the use of such prospectus for the purpose of such offer.

Except to the extent sub-paragraph (ii) above may apply, neither the Issuers nor the Guarantor nor any Dealer have authorised, nor do they authorise, the making of any offer of Notes in circumstances in which an obligation arises for the Issuers or the Guarantor or any Dealer to publish or supplement a prospectus for such offer.

Each Dealer and/or further financial intermediary subsequently reselling or finally placing Notes to be issued under the Programme may be entitled to use this Prospectus as set out in the section entitled "*Consent to the Use of this Prospectus*".

Tranches of Notes may be rated or unrated. Where a Tranche of Notes is rated, such credit rating and the respective rating agency will be specified in the relevant Final Terms. Any credit ratings assigned to the Notes are not recommendations to purchase, hold or sell the Notes inasmuch as such ratings do not comment as to market price or suitability for a particular investor. There is no assurance that these ratings will remain in effect for any given period of time or that the ratings will not be revised or withdrawn entirely in the future by the respective rating organizations if in their judgment circumstances so warrant.

Any credit ratings assigned to the Notes may not reflect the potential impact of all risks related to structure and other factors on the value of the Notes. In addition, real or anticipated changes in any credit ratings assigned to the Notes will generally affect the market value of the Notes.

Any credit ratings in respect of the Notes or an Issuer are, in respect of an offer or invitation for the issue, sale or purchase of Notes in Australia (including an offer or invitation which is received by a person in Australia), for disclosure or distribution only to a person who is not a "retail client" within the meaning of section 761G of the Corporations Act but is a sophisticated investor, professional investor or other investor in respect of whom disclosure is not required under Parts 6D.2 or 7.9 of the Corporations Act and, in all cases, who is otherwise permitted to receive credit ratings in accordance with applicable law in any jurisdiction in which the person may be located. Anyone who is not such a person is not entitled to receive this Prospectus and anyone who receives this Prospectus must not distribute it to any person who is not entitled to receive it.

IN CONNECTION WITH THE ISSUE OF ANY TRANCHE OF NOTES, THE DEALER OR DEALERS (IF ANY) NAMED AS THE STABILISING MANAGER(S) (OR PERSONS ACTING ON BEHALF OF ANY STABILISING MANAGER(S)) IN THE APPLICABLE FINAL TERMS MAY OVER-ALLOT NOTES OR EFFECT TRANSACTIONS (IN EACH CASE OUTSIDE AUSTRALIA AND NOT ON A FINANCIAL MARKET OPERATED IN AUSTRALIA) WITH A VIEW TO SUPPORTING THE MARKET PRICE OF THE NOTES AT A LEVEL HIGHER THAN THAT WHICH MIGHT OTHERWISE PREVAIL. HOWEVER, THERE IS NO ASSURANCE THAT THE STABILISING MANAGER(S) (OR PERSONS ACTING ON BEHALF OF A STABILISING MANAGER) WILL UNDERTAKE STABILISATION ACTION. ANY STABILISATION ACTION MAY BEGIN ON OR AFTER THE DATE ON WHICH ADEQUATE PUBLIC DISCLOSURE OF THE TERMS OF THE OFFER OF THE RELEVANT TRANCHE OF NOTES IS MADE AND, IF BEGUN, MAY BE ENDED AT ANY TIME, BUT IT MUST END NO LATER THAN THE EARLIER OF 30 DAYS AFTER THE ISSUE DATE OF THE RELEVANT TRANCHE OF NOTES AND 60 DAYS AFTER THE DATE OF THE ALLOTMENT OF THE RELEVANT TRANCHE OF NOTES. ANY STABILISATION ACTION OR OVER-ALLOTMENT MUST BE CONDUCTED BY THE RELEVANT STABILISING MANAGER(S) (OR PERSONS ACTING ON BEHALF OF ANY STABILISING MANAGER(S)) IN ACCORDANCE WITH ALL APPLICABLE LAWS AND RULES.

This Prospectus contains certain forward-looking statements. Forward-looking statements are statements that do not relate to historical facts and events. They are based on the analyses or forecasts of future results and

These sections include more detailed descriptions of factors that might have an impact on each of the relevant Issuer's business and the markets in which it operates.

In light of these risks, uncertainties and assumptions, future events described in this Prospectus may not occur. In addition, none of the Issuers assumes any obligation, except as required by law, to update any forward-looking statement or to conform these forward-looking statements to actual events or developments.

Section D – Risks

D.2	<p>Key risks that are specific to the Issuer [in case of Notes to be issued by MBAP, DIF, DCFI, MBF or DFNA insert: and the Guarantor].</p>	<p>[in case of Notes to be issued by MBAP, DIF, DCFI, MBF or DFNA insert:</p> <p>The Issuer is [a direct] [an indirect] subsidiary of DAG. The Notes are unconditionally and irrevocably guaranteed by DAG in respect of principal and interest payments. Accordingly, the Issuer is affected, substantially, by the same risks as those that affect the business and operations of DAG and/or its consolidated subsidiaries. Therefore, references in the following section to DAG and/or its consolidated subsidiaries shall include references to the Issuer (if applicable).]</p> <p>DAG is subject to various risks resulting from changing economic, political, social, industrial, business and financial conditions. The principal risks which could affect DAG's business, financial condition, profitability, cash flows, results of operations and future business results are described below. DAG's overall risk situation is the sum of the individual risks of all risk categories for the divisions and the corporate functions and legal entities. In general, the reporting of risks takes place for the individual segments. If no segment is explicitly mentioned, the following risks relate to all divisions.</p> <p>In addition, risks that are not yet known about or classified as not material can influence profitability, cash flows and financial position.</p> <p><i>Industry and Business Risks</i></p> <ul style="list-style-type: none"> • The development of the US economy will be decisively impacted by how the planned exit from the expansive monetary policy is further managed and whether investors and consumers boost the rate of growth. This expected change in monetary policy could lead to unforeseen effects, particularly on investment. After a long phase of very low interest rates, an increase in interest rates could have a profound effect on economic recovery and slow down the pace of growth. This would also affect the housing market and its recovery, along with other sectors. • If there is no continuation of the required consolidation of state budgets and reform efforts in the countries of the European Monetary Union, this could cause renewed turmoil in the financial markets, leading to increasing refinancing costs through rising capital market interest rates, and thus jeopardizing the already fragile economic recovery. The European market continues to be very important for Daimler across all divisions; for the Mercedes-Benz Cars and Mercedes-Benz Vans divisions, it is in fact still the biggest sales market. In connection with the very expansive monetary policy of the European Central Bank, there is growing concern about the extent to which this policy has increased the danger of speculative bubbles on stock and bond markets.
------------	--	--

		<ul style="list-style-type: none"> • Due to the significant growth of the country's importance in recent years, an economic slump in China would present a considerable risk for the world economy. The extremely high level of debt in the economy as a whole and the high level of investment in the construction industry have considerably increased the risk of an abrupt adjustment in the real estate market or a banking-sector crisis. China is now a key sales market for the Mercedes-Benz Cars and Mercedes-Benz Vans divisions in particular, which means any disruptions caused by the above-mentioned risks could result in lower-than-planned growth in unit sales. • Another risk is to be seen in a renewed weakening of growth in major emerging markets. There were disappointing developments already during 2013 and 2014, especially in major economies such as India, Russia and Brazil, although other countries such as Indonesia and Turkey also developed below their possibilities. • The conflict between Russia and Ukraine has led to an additional risk for the development of the world economy since 2014. An escalation of the crisis and the resulting tightening of sanctions and counter-sanctions would have a massive negative impact on the economy in Europe especially, whereby the exact scope of this effect is very difficult to predict. • The conflict in Syria, which has heated up as a result of the offensive of the "Islamic State", is threatening the stability of the region, especially in neighboring Iraq. • A too-rapid rise in interest rates in the United States would not only negatively affect the US economy but could also lead to a renewed sell-off on stock markets in particularly sensitive emerging markets. The tapering of bond purchases by the US Federal Reserve already triggered unrest in the financial markets in 2014. Long-term interest rates increased and there were capital outflows and currency devaluations in the emerging markets. In addition, tensions resulting from exchange rate volatility and possible exchange rate manipulations carried out to preserve global competitiveness could lead to an increase in protectionist measures and a type of "devaluation race". This would put a substantial strain on world trade and threaten future growth. • Daimler is subject to risks that are inherent in operating in other countries and is therefore exposed to material location and country-specific risks. • Operations in emerging markets involve a greater risk resulting from economic and political systems that typically are less developed, and likely to be less stable, than those of more advanced countries. Daimler is therefore exposed to a number of factors, over which the Group has little to no control and which may adversely affect the Group's business activities. These factors include, but are not limited to, the following: political, social, economic, financial or market-related instability or volatility; foreign currency control regulations and other regulations or the negative impacts related to foreign exchange rate volatility restrictions on capital transfers;
--	--	--

		<p>absence of independent and experienced judiciary and inability to enforce contracts; reimbursement rates and services covered by government reimbursement programs; trade restrictions and restrictions on repatriation of earnings.</p> <ul style="list-style-type: none"> • The risks for the development of automotive markets are strongly affected by the situation of the global economy as described above. • The danger of worsening market developments or changed market conditions, especially due to the macroeconomic environment and political or economic uncertainties, generally exists for all divisions of the Daimler Group. • Some dealers and vehicle importers are in a difficult financial situation. As a result, supporting actions may become necessary, whereby such actions would negatively impact the profitability, cash flows and financial position of the automotive segments. • Segment-specific risks also exist. In the Mercedes-Benz Cars and Daimler Trucks divisions, these include increasing competitive and price pressure. A change within the framework of a product's lifecycle bears the risk of a negative volume effect in relation to the anticipated sales volumes. In addition, aggressive pricing policies, the introduction of new products by competitors and price pressure related to the aftersales business could make it impossible to enforce targeted prices. • Further risks at Mercedes-Benz Cars relate to the development of the used-car market. If general market developments lead to a negative deviation from its assumptions, there is a risk of lower residual values of used cars. • Risks for the Daimler Financial Services segment are mainly due to borrowers' worsening creditworthiness, so that receivables might not be recoverable in whole or in part due to customers' insolvency. • Procurement market risks arise for the automotive divisions in particular from fluctuations in prices of raw materials. • The risks from the legal and political framework also have a considerable impact on Daimler's future business success. Regulations concerning vehicles' emissions, fuel consumption and safety play a particularly important role. Complying with these varied and often diverging regulations all over the world requires strenuous efforts on the part of the automotive industry. In addition to emission, consumption and safety regulations, traffic-policy restrictions for the reduction of traffic jams, noise and pollution are becoming increasingly important in cities and urban areas of the European Union and other regions of the world. • The position of the Daimler Group in key foreign markets could also be affected by an increase in bilateral free-trade agreements, at least to the extent to which the European Union fails to reach similar agreements with the markets in question.
--	--	---

		<ul style="list-style-type: none"> • Particularly in China and the markets of developing countries and emerging economies, Daimler is increasingly faced with tendencies to limit imports or at least reduce the rate of growth of imports, and to attract direct foreign investment by means of appropriate industrial policies. Furthermore, a tendency of tightening the regulatory environment in general and in particular with regard to competition law is to be observed. <p><i>Company-specific Risks</i></p> <ul style="list-style-type: none"> • The demanding combination of requirements, complexity and quality can lead to higher advance expenditure and thus also to an adverse impact on the automotive segment's profitability. • Daimler cannot rule out the possibility that IT disturbances will arise and have a negative impact on the Group's business processes. • Daimler's success is highly dependent on employees and their expertise. • Daimler generally bears a proportionate share of the risks of its equity interests. <p><i>Financial Risks</i></p> <ul style="list-style-type: none"> • Daimler is generally exposed to risks from changes in market prices such as currency exchange rates, interest rates, commodity prices and share prices. Market-price changes can have a negative influence on the Group's profitability, cash flows and financial position. • In addition, the Group is exposed to credit and country-related risks. • The Daimler Group's global orientation implies that its business operations and financial transactions are connected with risks of foreign exchange rates against the euro, especially for the US dollar and other currencies such as currencies of growth markets. • Daimler employs a variety of interest-rate sensitive financial instruments to manage the cash requirements of its business operations on a day-to-day basis. • The Group's business operations are exposed to changes in the prices of consignments and raw materials. • A negative development of the capital markets could increase the Group's financing costs. More expensive refinancing would also have a negative effect on the competitiveness and profitability of Daimler's financial services business if Daimler was unable to pass on the higher refinancing costs to its customers; a limitation of the financial services business would have a negative impact on the automotive business. • The Group is exposed to credit risks which result primarily from its financial services activities and from the operations of its vehicle

These reforms may cause a Benchmark (including the [insert relevant reference interest rate] (if affected by these reforms)) to perform differently than in the past, or have other consequences which cannot be predicted.</p> <p>Although it is uncertain whether or to what extent any change in the administration of or method for determining the [insert relevant reference interest rate] could have an effect on the value of the Notes, investors should be aware that:</p> <ul style="list-style-type: none"> (i) any change to the [insert relevant reference interest rate] could affect the level of the published rate, including to cause it to be lower and/or more volatile than it would otherwise be; (ii) if the [insert relevant reference interest rate] is discontinued, the rate of interest will then be determined by the fallback provisions of the Notes. This may cause the interest to be lower than it would otherwise be; (iii) the methodology or other terms of the [insert relevant reference interest rate] could be changed, and such changes could have the effect of reducing the rate or level or affecting the volatility of the [insert relevant reference interest rate]; and (iv) the administrator of the [insert relevant reference interest rate] will not have any involvement in the Notes and may take any actions in respect of the [insert relevant reference interest rate] without regard to the effect of such actions on the Notes. <p>Investors thus face the risk that any changes to the [insert relevant reference interest rate] may have a material adverse effect on the value of and the amount payable under the Notes.</p> <p><i>Taxation</i></p> <p>Potential purchasers of Notes should be aware that stamp duty and other taxes and/or charges may be levied in accordance with the laws and practices in the countries where the Notes are transferred. Abschnitt D – Risiken

D.2	<p>Angaben zu den zentralen Risiken, die der Emittentin [im Fall von Schuldverschreibungen, die von MBAP, DIF, DCFI, MBF oder DFNA begeben werden, einfügen: und der Garantin] eigen sind.</p>	<p>[im Fall von Schuldverschreibungen, die von MBAP, DIF, DCFI, MBF oder DFNA begeben werden, einfügen:</p> <p>Die Emittentin ist eine [direkte] [indirekte] Tochtergesellschaft der DAG. Die Schuldverschreibungen werden im Hinblick auf die Rückzahlung des Kapitals und Zinszahlungen unbedingt und unwiderruflich von der DAG garantiert. Dementsprechend ist die Emittentin im Wesentlichen den Risiken ausgesetzt, die den Betrieb und die Geschäftstätigkeit von DAG und/oder ihren konsolidierten Tochterunternehmen beeinflussen. Im Folgenden sollen daher Bezugnahmen auf die DAG und/oder ihre konsolidierten Tochterunternehmen Bezugnahmen auf die Emittentin beinhalten (soweit anwendbar.)</p> <p>DAG ist Risiken ausgesetzt, die aus Änderungen der wirtschaftlichen, politischen, sozialen, industriellen, geschäftlichen und finanziellen Bedingungen herrühren. Die zentralen Risiken, die den Betrieb, die Finanzsituation, die Profitabilität, die Kapitalflüsse, das Betriebsergebnis sowie zukünftige Geschäftsergebnisse der DAG beeinflussen können, sind nachfolgend dargestellt. Die Gesamtrisikosituation der DAG setzt sich aus den Einzelrisiken aller Risikokategorien der Geschäftsfelder, konzernweiten Funktionen und rechtlichen Einheiten zusammen. Grundsätzlich erfolgt die Berichterstattung über Risiken für die einzelnen Segmente. Sofern kein Segment explizit hervorgehoben wird, betreffen die folgenden Risiken alle Geschäftsfelder.</p> <p>Zusätzlich können Risiken, die heute noch nicht bekannt sind oder als unwesentlich eingestuft werden, die Ertrags-, Finanz- und Vermögenslage beeinflussen.</p> <p><i>Umfeld- und Branchenrisiken</i></p> <ul style="list-style-type: none"> • Für die Entwicklung der US-amerikanischen Wirtschaft wird entscheidend sein, wie der weitere Ausstieg aus der expansiven Geldpolitik gelingt und ob Investoren und Konsumenten wie erhofft das Wachstumstempo beleben. Diese absehbare geldpolitische Wende könnte insbesondere bei Investitionen zu unvorhersehbaren Beeinträchtigungen führen. Nach einer langen Phase mit extrem niedrigen Zinsen könnten Zinserhöhungen einen tief greifenden Effekt auf die wirtschaftliche Erholung haben und die Wachstumsdynamik schwächen. Dies gilt unter anderem auch für die Erholung des Immobilienmarktes. • Falls in den Ländern der Europäischen Währungsunion die weiterhin notwendige Konsolidierung der öffentlichen Haushalte sowie die Reformbemühungen nicht weiter fortgesetzt werden sollten, könnte dies an den Finanzmärkten für erneute Unruhe sorgen, die Refinanzierungskosten über steigende Kapitalmarktzinsen erhöhen und somit die ohnehin fragile konjunkturelle Erholung gefährden. Der europäische Markt ist für
------------	---	---

		<p>Daimler über alle Geschäftsfelder hinweg auch künftig von großer Bedeutung; für die Geschäftsfelder Mercedes-Benz Cars und Mercedes-Benz Vans ist dies weiterhin sogar der bedeutendste Absatzmarkt. Im Zuge der sehr expansiven Geldpolitik der Europäischen Zentralbank gibt es wachsende Bedenken, inwieweit sich hierdurch die Gefahr von spekulativen Blasen an den Aktien- und Anleihemärkten erhöht hat.</p> <ul style="list-style-type: none"> • Aufgrund der in den vergangenen Jahren deutlich gewachsenen Bedeutung ist in einem konjunkturellen Einbruch der chinesischen Wirtschaft ein erhebliches Risiko für die Weltwirtschaft zu sehen. Durch das extrem hohe Niveau der gesamtwirtschaftlichen Verschuldung und der Bauinvestitionen ist das Risiko einer abrupten Korrektur auf dem Immobilienmarkt oder einer Bankenkrise deutlich erhöht. Insbesondere für die Sparten Mercedes-Benz Cars und Mercedes-Benz Vans, für die China inzwischen ein bedeutender Absatzmarkt ist, könnte hierdurch der angestrebte Absatzzuwachs geringer ausfallen. • Ein weiteres Risiko ist in einer neuerlichen Wachstumsabschwächung wichtiger Schwellenländer zu erkennen. Schon 2013 und 2014 enttäuschten insbesondere große Volkswirtschaften wie Russland, Brasilien und Indien, aber auch Länder wie Indonesien oder die Türkei entwickelten sich unterhalb ihrer Möglichkeiten. • Mit dem Konflikt zwischen Russland und der Ukraine belastet seit 2014 ein zusätzliches Risiko die Entwicklung der Weltwirtschaft. Eine Eskalation der Krise und die daraus resultierende Verschärfung von Sanktionen und Gegensanktionen hätten massive negative Auswirkungen auf die Konjunktur vor allem in Europa, deren Ausmaß schwer abzuschätzen ist. • Der Konflikt in Syrien, verstärkt durch die Offensive des "Islamischen Staats", gefährdet die Stabilität in der Region, vor allem auch im Nachbarland Irak. • Eine zu rasche Zinserhöhung in den USA würde sich nicht nur dort negativ auswirken, sondern auch in den anfälligen Schwellenländern für einen erneuten "Ausverkauf" an den Aktienmärkten sorgen. Schon im Jahresverlauf 2014 hatte das Zurückfahren von Anleihekaufen der amerikanischen Notenbank für Unruhen an den Finanzmärkten gesorgt. Die Langfristzinsen zogen an, und in den Schwellenländern kam es zu Kapitalabflüssen und Währungsabwertungen. Außerdem könnten Spannungen aufgrund der Volatilität der Wechselkurse und möglicher Manipulationen der Wechselkurse zur Wahrung der globalen Wettbewerbsfähigkeit zu einem Anstieg protektionistischer Maßnahmen und einer Art "Abwertungsrennen" führen. Dies würde den Welthandel deutlich belasten und künftiges Wachstum gefährden. • Daimler ist Risiken ausgesetzt, die mit der Tätigkeit in anderen Ländern einhergehen und ist daher wesentlichen standortspezifischen und länderspezifischen Risiken ausgesetzt.
--	--	--

		<ul style="list-style-type: none"> • Unternehmerische Tätigkeiten in Entwicklungsländern unterliegen einem größeren Risiko, das von wirtschaftlichen und politischen Systemen herrührt, die typischerweise weniger entwickelt und vermutlich weniger stabil sind als diejenigen von höher entwickelten Staaten. Wenn Daimler in Schwellenländern tätig ist, ist Daimler einer Vielzahl von Faktoren ausgesetzt, über die der Konzern nur wenig oder keine Kontrolle hat und die die geschäftlichen Aktivitäten des Konzerns negativ beeinflussen können, einschließlich, jedoch ohne hierauf beschränkt zu sein, politische, gesellschaftliche, wirtschaftliche, finanzielle oder marktbezogene Instabilität oder Volatilität; Devisenkontrollbestimmungen und andere Bestimmungen oder negative Auswirkungen aufgrund von Beschränkungen mit Bezug auf Wechselkursvolatilitäten im Zusammenhang mit Kapitalübertragungen; mangelnde Unabhängigkeit und Erfahrung der Justiz und die Unfähigkeit, Verträge durchzusetzen; Erstattungssätze und Leistungen, die von staatlichen Erstattungsprogrammen gedeckt werden; Handelsbeschränkungen sowie Beschränkungen hinsichtlich der Rückführung von Erträgen. • Risiken für die wirtschaftliche Entwicklung auf den Automobilmärkten sind maßgeblich durch die in den vorhergehenden Absätzen beschriebene konjunkturelle Lage der Weltwirtschaft beeinflusst. • Die Gefahr sich schlechter entwickelnder Märkte oder sich verändernder Marktbedingungen, insbesondere aufgrund des makroökonomischen Umfelds sowie politischer oder wirtschaftlicher Unsicherheiten, besteht grundsätzlich für alle Geschäftsfelder des Konzerns. • Aufgrund der zum Teil angespannten wirtschaftlichen Lage einiger Händler und Fahrzeugimporteure könnten Unterstützungsleistungen notwendig werden. Diese würden die Ertrags-, Finanz- und Vermögenslage der automobilen Geschäftsfelder belasten. • Es bestehen segmentspezifische Risiken. Hierzu gehören in den Geschäftsfeldern Mercedes-Benz Cars und Daimler Trucks der zunehmende Wettbewerbs- und Preisdruck. Wechsel im Rahmen eines Produktlebenszyklus bergen bezüglich der erwarteten Absatzvolumina die Gefahr negativer Volumeneffekte. Zudem können aufgrund einer aggressiven Preispolitik, der Einführung neuer Produkte durch Wettbewerber oder des Preisdrucks in Bezug auf das After-Sales-Geschäft gegebenenfalls Preise nicht wie erwartet durchgesetzt werden. • Weitere Risiken bei Mercedes-Benz Cars betreffen die Entwicklung der Gebrauchtwagenmärkte. Sollte aufgrund allgemeiner Marktentwicklungen eine negative Abweichung von den Annahmen eintreten, besteht das Risiko schlechterer Fahrzeugrestwerte von Gebrauchtwagen. • Risiken für das Segment Daimler Financial Services liegen vor allem in einer Verschlechterung der Kreditqualität der
--	--	---

		<p>Kreditnehmer, sodass Forderungen aufgrund der Zahlungsunfähigkeit von Kunden ganz oder teilweise uneinbringlich werden.</p> <ul style="list-style-type: none"> • Die Konzernrisiken auf der Beschaffungsseite ergeben sich für die automobilen Geschäftsfelder insbesondere aus den Preisschwankungen bei Rohstoffen. • Auch gesetzliche und politische Rahmenbedingungen haben einen nicht unerheblichen Einfluss auf den künftigen Geschäftserfolg von Daimler. Dabei spielen insbesondere die Emissions-, Verbrauchs- und Sicherheitsbestimmungen für Fahrzeuge eine wichtige Rolle. Um die vielfältigen und weltweit oftmals divergierenden Regelungen einzuhalten, sind erhebliche Anstrengungen seitens der Automobilindustrie erforderlich. Zusätzlich zu Emissions-, Verbrauchs- und Sicherheitsbestimmungen nehmen in Städten und Ballungszentren der Europäischen Union und anderer Regionen der Welt verkehrspolitische Restriktionen zur Bekämpfung von Staus, Lärm und Emissionen an Bedeutung zu. • Darüber hinaus könnte die Position des Konzerns in wichtigen ausländischen Märkten durch die Zunahme bilateraler Freihandelsabkommen beeinträchtigt werden, falls nicht die Europäische Union im Gegenzug gleichwertige Abkommen mit den entsprechenden Märkten abschließt. • Insbesondere in China und in den Märkten der Entwicklungs- und Schwellenländer stellt Daimler zunehmend Tendenzen fest, Importe zu begrenzen oder zumindest die Steigerungsraten abzuschwächen und mithilfe von industriepolitischen Maßnahmen Investitionen ins Land zu holen. Im Weiteren ist auch eine Tendenz zur Verschärfung des regulatorischen Umfelds im Allgemeinen und insbesondere auch im Wettbewerbsrecht zu beobachten. <p><i>Unternehmensspezifische Risiken</i></p> <ul style="list-style-type: none"> • Das Spannungsfeld aus Vorgaben, Komplexität und Qualität kann zu höheren Mitteleinsätzen und damit auch zu einer nachteiligen Wirkung auf die Profitabilität der automobilen Geschäftsfelder führen. • Daimler kann Störungen in der Informationstechnologie und daraus resultierende negative Auswirkungen auf die Geschäftsprozesse des Konzerns nicht vollständig ausschließen. • Der Erfolg des Konzerns ist wesentlich von seinen Mitarbeiterinnen und Mitarbeitern und deren Know-how abhängig. • An den Risiken der Beteiligungen partizipiert Daimler grundsätzlich entsprechend seiner jeweiligen Anteilsquote. <p><i>Finanzwirtschaftliche Risiken</i></p> <ul style="list-style-type: none"> • Daimler ist grundsätzlich Risiken durch die Veränderungen von Marktpreisen, wie Wechselkursen, Zinssätzen, Commodity-Preisen und Aktienkursen, ausgesetzt. Marktpreisveränderungen können
--	--	---

		<p>einen negativen Einfluss auf die Ertrags-, Finanz- und Vermögenslage des Konzerns haben.</p> <ul style="list-style-type: none"> • Ferner ist der Konzern Kredit- und Länderrisiken ausgesetzt. • Aufgrund der globalen Ausrichtung des Konzerns sind mit dem operativen Geschäft sowie den Finanztransaktionen Risiken aus Wechselkursschwankungen verbunden. Diese resultieren insbesondere aus Schwankungen des US-Dollars und anderer Währungen, wie zum Beispiel Währungen von Wachstumsmärkten, gegenüber dem Euro. • Daimler nutzt eine Vielzahl zinsensitiver Finanzinstrumente dazu, die Liquiditätsanforderungen des laufenden Geschäfts zu erfüllen. • Daimler ist im Rahmen seiner Geschäftstätigkeit einem Marktpreisrisiko aus dem Bezug von Teilelieferungen und Rohstoffen ausgesetzt. • Eine negative Entwicklung an den Kapitalmärkten könnte die Finanzierungskosten des Konzerns erhöhen. Eine Verteuerung der Refinanzierung könnte sich negativ auf die Wettbewerbsfähigkeit und Profitabilität des Finanzdienstleistungsgeschäfts des Konzerns auswirken, soweit die höheren Refinanzierungskosten nicht an die Kunden weitergegeben werden könnten; eine Begrenzung des Finanzdienstleistungsgeschäfts könnte zudem negative Folgen für das Fahrzeuggeschäft haben. • Der Konzern unterliegt Kreditrisiken, die vor allem aus dem Finanzdienstleistungsgeschäft und dem operativen Fahrzeuggeschäft resultieren. • Daimler unterliegt Länderrisiken, die vor allem aus grenzüberschreitenden Finanzierungen von Konzerngesellschaften oder Kunden sowie Kapitalanlagen bei Tochtergesellschaften oder Joint Ventures resultieren. <p><i>Risiken im Zusammenhang mit Pensionsplänen</i></p> <ul style="list-style-type: none"> • Daimler gewährt leistungsbasierte Pensionszusagen und hat in einem geringen Umfang Zuschussverpflichtungen für Gesundheitsfürsorgeleistungen, die zu einem großen Teil durch Planvermögen gedeckt sind. Der Marktwert der Planvermögen wird maßgeblich von der Situation an den Kapitalmärkten bestimmt. Ungünstige Entwicklungen, vor allem bei Aktien und festverzinslichen Wertpapieren, können den Wert des Planvermögens vermindern. <p><i>Risiken im Zusammenhang mit Ratingveränderungen</i></p> <ul style="list-style-type: none"> • Die Kreditwürdigkeit von Daimler wird von den Ratingagenturen Standard & Poor's Credit Market Services Europe Limited, Moody's Deutschland GmbH, Fitch Ratings Ltd. und DBRS Limited bewertet. Herabstufungen der von diesen Ratingagenturen erteilten Ratings könnten eine negative Auswirkung auf die

Diese umfassen zum Beispiel, ohne hierauf begrenzt zu sein, wettbewerbsrechtliche Verfahren. <p><i>Andere Risiken</i></p> <ul style="list-style-type: none"> • Neben den beschriebenen Risikokategorien gibt es unvorhersehbare Ereignisse, die Produktions- und Geschäftsprozesse stören können, beispielsweise Naturkatastrophen oder terroristische Anschläge. In diesem Zusammenhang werden unter anderem Erdbeben, Wetterschäden sowie politische Instabilitäten in Absatzregionen als Risiken betrachtet. • Zusätzlich zu den beschriebenen Risikoarten gibt es Risiken, die die Reputation des Konzerns als Ganzes betreffen. Die Haltung des Unternehmens in Bezug auf Themenstellungen wie Ethik und Nachhaltigkeit steht im Fokus der Öffentlichkeit. Darüber hinaus verfolgen Kunden und Kapitalmärkte, wie das Unternehmen auf die technologischen Herausforderungen der Zukunft reagiert und wie es ihm gelingt, zeitgemäße und technologisch führende Produkte auf den Märkten anzubieten.

RISK FACTORS

The following is a disclosure of risk factors that are material to the Notes issued under the Programme in order to assess the market risk associated with these Notes and risk factors that may affect each of the Issuers' or the Guarantor's ability to fulfill its obligations under the Notes or (in the case of DAG) the Guarantee. Prospective investors should consider these risk factors before deciding to purchase Notes issued under the Programme. In addition, prospective investors should be aware that the risks described may combine and thus intensify one another.

The Issuers believe that the risks described below represent the principal risks inherent in investing in Notes issued under the Programme, but the inability of any Issuer to pay interest, principal or other amounts on or in connection with any Notes or the Guarantor to fulfill its obligations under the Guarantee may occur for other reasons which may not be considered significant risks by any of the Issuers or the Guarantor based on information currently available to it or which it currently may not be able to anticipate and none of the Issuers nor the Guarantor represents that the following statements are exhaustive.

Prospective investors should consider all information provided in this Prospectus and should consult with their own professional advisers (including their financial, accounting, legal and tax advisers) prior to making any investment decision.

Risk Factors Relating to DAG, MBAP, DIF, MBJ, DCFI, MBF and DFNA

MBAP, DIF, MBJ, DCFI, MBF and DFNA are direct or indirect subsidiaries of DAG. All Notes to be issued by MBAP, DIF, MBJ, DCFI, MBF or DFNA are unconditionally and irrevocably guaranteed by DAG in respect of principal and interest payments. Accordingly, MBAP, DIF, MBJ, DCFI, MBF and DFNA are affected, substantially, by the same risks as those that affect the business and operations of DAG and/or its consolidated subsidiaries. Therefore, references in this section to DAG and/or its consolidated subsidiaries shall include references to all Issuers (if applicable).

DAG is subject to various risks resulting from changing economic, political, social, industry, business and financial conditions. The principal risks which could affect DAG's business, financial condition, profitability, cash flows, results of operations and future business results are described below. DAG's overall risk situation is the sum of the individual risks of all risk categories for the divisions and the corporate functions and legal entities. In general, the reporting of risks takes place for the individual segments. If no segment is explicitly mentioned, the following risks relate to all divisions.

In addition, risks that are not yet known about or classified as not material can influence profitability, cash flows and financial position.

Industry and Business Risks

Economic risks

Overall economic conditions have a significant influence on automobile sales markets, and their development is one of the Group's major risks.

Economic risks are linked to assumptions and forecasts. Overall, economic risks for the business environment have tended to become rather serious and the opportunities for an improvement of the world economy have declined. This is primarily a reflection of higher political risks.

The development of the US economy will be decisively impacted by how the planned exit from the expansive monetary policy is further managed and whether investors and consumers boost the rate of growth. This expected change in monetary policy could lead to unforeseen effects, particularly on investment. After a long phase of very low interest rates, an increase in interest rates could have a profound effect on economic recovery and slow down the pace of growth. This would also affect the housing market and its recovery,

along with other sectors. Although the US Federal Reserve could attempt to counteract any negative impact through its monetary policy, it has little room to maneuver here, which means the effectiveness of such possible measures would be limited. Such an event would have significant consequences because the Daimler Group (and especially the Mercedes-Benz Cars and Daimler Trucks divisions) generates a considerable volume of its unit sales in the United States, and diminished growth could also spread to other regions.

If there is no continuation of the required consolidation of state budgets and reform efforts in the countries of the European Monetary Union ("**EMU**"), this could cause renewed turmoil in the financial markets, leading to increasing refinancing costs through rising capital-market interest rates, and thus jeopardizing the already fragile economic recovery. Further effects could be triggered by the debate about a possible exit of Greece from the EMU. Such an event could trigger the risk of contagion for other member states. This could lead to greater uncertainty and volatility in the financial markets. The extremely low rate of inflation harbors an additional risk in that a longlasting and broad-based fall in prices would constitute a considerable threat to the economic recovery of the EMU and make it even more difficult for the debt-ridden countries in the euro zone to finance their remaining debt. Although the threat of deflation seems to have receded recently, if this danger returns, the negative effects on domestic demand could be significant. The European market continues to be very important for Daimler across all divisions; for the Mercedes-Benz Cars and Mercedes-Benz Vans divisions, it is in fact still the biggest sales market. In connection with the very expansive monetary policy of the European Central Bank, there is growing concern about the extent to which this monetary policy has increased the danger of speculative bubbles on stock and bond markets. Greater turbulence in the financial markets would then have direct effects on the economic outlook.

In Japan, the second stage of the value-added tax hike from 8% to 10%, which had been planned for October 2015 — a significant risk to growth in Japan — was postponed at the end of 2014 with the announcement that the tax increase was to be postponed until 2017. Apart from that, the failure of the country's expansive monetary and fiscal policy and the lack of structural reforms could trigger a growth slowdown in Japan, although this should be regarded as only a regionally limited risk. A slowdown of growth could lead to lower demand for cars and trucks, which in turn could negatively affect the Mercedes-Benz Cars and Daimler Trucks divisions, for which Japan is an important sales market.

Due to the significant growth of the country's importance in recent years, an economic slump in China would present a considerable risk for the world economy. The extremely high level of debt in the economy as a whole and the high level of investment in the construction industry have considerably increased the risk of an abrupt adjustment in the real estate market or a banking-sector crisis. China is now a key sales market for the Mercedes-Benz Cars and Mercedes-Benz Vans divisions in particular, which means any disruptions caused by the above-mentioned risks could result in lower-than-planned growth in unit sales.

Another risk is to be seen in a renewed weakening of growth in major emerging markets. There were disappointing developments already during 2013 and 2014, especially in major economies such as India, Russia and Brazil, although other countries such as Indonesia and Turkey also developed below their possibilities. Turkey can also be subject to economic weakness triggered by current high account deficit and political instability. In addition, there have been military and civilian hostilities in both directions across the Syrian-Turkish border. The political and military tensions between Syria and Turkey have not yet normalized and may escalate in the future. A combination of weak growth and high interest rates increases the risk of a rising number of defaults, especially in view of the substantial expansion of credit in some cases over the past few years. As Daimler is already very active in these countries or their markets play a strategic role, such a scenario represents a risk.

The conflict between Russia and Ukraine has led to an additional risk for the development of the world economy since 2014. This risk has increased macroeconomic uncertainty and had a negative effect on the business climate and consumer confidence. An escalation of the crisis and the resulting tightening of sanctions and counter-sanctions would have a massive negative impact on the economy in Europe especially, whereby the exact scope of this effect is very difficult to predict. It is conceivable that such an escalation would negatively impact oil prices through a higher risk premium, and it would also dampen the mood, and

demand, in markets that depend on oil. Furthermore, the consequences of a possible debt default by Russia or of failure to service due debts cannot be predicted.

The considerable tension in the Middle East is a significant source of political risk. The conflict in Syria, which has heated up as a result of the offensive of the "Islamic State" ("IS"), is threatening the stability of the region, especially in neighboring Iraq. Although most Iraqi oil production facilities are located in regions not controlled by IS, concerns still remain that Iraqi oil deliveries could be interrupted or that the armed conflict in Syria could spill over into other areas. An abrupt increase in oil prices brought about by an attack on oil refineries could endanger the recovery in fragile European economies or in the United States, and could also negatively affect emerging markets that depend on oil imports. The effect on the world's stock markets would also be noticeable, and this could undermine investment and consumer confidence on a broad scale.

Moreover, a too-rapid rise in interest rates in the United States would not only negatively affect the US economy but could also lead to a renewed sell-off on stock markets in particularly sensitive emerging markets. The tapering of bond purchases by the US Federal Reserve already triggered unrest in the financial markets in 2014. Long-term interest rates increased and there were capital outflows and currency devaluations in the emerging markets. In some countries, this also resulted in additional inflationary pressure, which, in combination with a more restrictive interest policy, reduced the potential for growth. If a possible decrease of liquidity in the United States in 2015 leads to more substantial effects, this could significantly reduce GDP growth through the chain of cause and effect described above, especially in the emerging markets. Increased volatility in the financial markets would also dampen investor and consumer confidence, with an impact on the global economy. In addition, tensions resulting from exchange rate volatility and possible exchange rate manipulations carried out to preserve global competitiveness could lead to an increase in protectionist measures and a type of "devaluation race". This would put a substantial strain on world trade and threaten future growth.

Location and country-specific risks

In conducting business around the world, Daimler is subject to risks that are inherent in operating in other countries and is therefore exposed to material location and country-specific risks.

In general, operations in emerging markets involve a greater risk resulting from economic and political systems that typically are less developed, and likely to be less stable, than those of more advanced countries. Daimler is therefore exposed to a number of factors, over which the Group has little to no control and which may adversely affect the Group's business activities. These factors include, but are not limited to, the following: political, social, economic, financial or market-related instability or volatility; foreign currency control regulations and other regulations or the negative impacts related to foreign exchange rate volatility restrictions on capital transfers; absence of independent and experienced judiciary and inability to enforce contracts; reimbursement rates and services covered by government reimbursement programs; trade restrictions and restrictions on repatriation of earnings.

The realisation of any of these risks could have a material adverse effect on Daimler's business, cash flows, financial condition and results of operations.

General market risks

The risks for the development of automotive markets are strongly affected by the situation of the global economy as described above.

The assessment of market risks is connected with assumptions and forecasts about the overall development of markets in the various regions. The danger of worsening market developments or changed market conditions, especially due to the macroeconomic environment and political or economic uncertainties, generally exists for all divisions of the Daimler Group. The only differences between the divisions have to do with their varying regional focus of activities.

Some dealers and vehicle importers are in a difficult financial situation. As a result, supporting actions may become necessary, whereby such actions would negatively impact the profitability, cash flows and financial position of the automotive segments.

In addition to these issues affecting all segments, segment-specific risks also exist. In the Mercedes-Benz Cars and Daimler Trucks divisions, these include increasing competitive and price pressure. A change within the framework of a product's lifecycle bears the risk of a negative volume effect in relation to the anticipated sales volumes. In addition, aggressive pricing policies, the introduction of new products by competitors and price pressure related to the aftersales business could make it impossible to enforce targeted prices. To a lesser extent, the same also applies to sales volumes at the divisions Mercedes-Benz Vans and Daimler Buses. Depending on the magnitude of regional unit sales, various measures taken in weaker markets may affect Daimler's projected earnings.

Further risks at Mercedes-Benz Cars relate to the development of the used-car market. As part of the established residual-value management process, certain assumptions are made on the local and corporate levels regarding the expected level of prices, on which basis the cars returned in the leasing business are valued. If general market developments lead to a negative deviation from the assumptions, there is a risk of lower residual values of used cars.

As the target achievement of the Daimler Financial Services division is closely connected with the development of business in the automotive divisions, the existing volume risks are also reflected in the Daimler Financial Services segment.

Risks relating to the leasing and sales financing business

In connection with the sale of vehicles, Daimler also offers its customers a wide range of financing possibilities — primarily leasing and financing the Group's products. The resulting risks for the Daimler Financial Services segment are mainly due to borrowers' worsening creditworthiness, so that receivables might not be recoverable in whole or in part due to customers' insolvency (default risk or credit risk). Other risks connected with the leasing and sales-financing business involve the possibility of increased refinancing costs due to potential changes in interest rates. An adjustment of credit conditions for customers in the leasing and sales-financing business due to higher refinancing costs could reduce the new business and contract volume of Daimler Financial Services, also reducing the unit sales of the automotive divisions. Risks could also arise from a lack of matching maturities with the refinancing. Further information on credit risks is provided in note 32 (*Management of financial risks*) of the notes to the Annual Consolidated Financial Statements 2014 of DAG, incorporated by reference into this Prospectus. With regard to the leasing business, the automotive divisions also have a residual-value risk resulting from the risks associated with the development of used-vehicle prices.

Procurement market risks

Procurement market risks arise for the automotive divisions in particular from fluctuations in prices of raw materials. There are also minor risks that result from dependency on certain materials and capacity bottlenecks caused by supplier delivery failures.

During 2014, raw material prices developed in a varied manner and were marked by a high level of volatility. Due to almost completely unchanged macroeconomic conditions, Daimler expects price fluctuations with uncertain and uneven trends in the near future. Raw-material markets are strongly impacted by political crises and uncertainties — combined with possible supply bottlenecks — as well as by a volatile demand for specific raw materials. Vehicle manufacturers are generally limited in their ability to pass on the higher costs of commodities and other materials in higher prices for their products because of the strong competitive pressure in the international automotive markets. A drastic increase in raw material prices would at least temporarily result in a considerable reduction in economic growth.

Risks related to the legal and political framework

The risks from the legal and political framework also have a considerable impact on Daimler's future business success. Regulations concerning vehicles' emissions, fuel consumption and safety play a particularly important role. Complying with these varied and often diverging regulations all over the world requires strenuous efforts on the part of the automotive industry. Daimler expects to expend an even larger proportion of the research and development budget in the future to ensure the fulfillment of these regulations.

Many countries have already implemented stricter regulations to reduce vehicles' emissions and fuel consumption, or are now doing so.

The Mercedes-Benz Cars segment faces risks in China in particular, as the Chinese authorities have defined fleet average fuel consumption as of 2015 of 6.9 liters per 100 kilometers (approximately 160 g CO₂/km) as the industry's target for new cars. The legislative process for addressing the period 2016 – 2020 has not yet been concluded. Failure to meet the fleet target could prevent new vehicles from being registered in the country. For the year 2020, the current five-year plan stipulates a new, very demanding target of 5.0 l/100 km (approximately 117 g CO₂/km). Discussions on the final version of the target are now being conducted as part of the final phase of the legislative process.

Regulations concerning the CO₂ emissions of new cars are also quite demanding in the European Union. For 2015, all new cars in Europe will have to meet a fleet CO₂ average of 129 g CO₂/km following a transition period. The relevant limit for Daimler depends on the portfolio of cars it sells in the European Union and is derived from vehicle weight. For 2020, new cars in the European Union will have to meet a fleet CO₂ average of 95 g CO₂/km. The new regulation will apply to 100% of the fleet in 2021 following a one-year transition period. Daimler will have to pay penalties if it exceeds its limits. The planned elimination of the NEDC (New European Driving Cycle) and its replacement with the WLTP (Worldwide Harmonized Light Vehicles Test Procedures) is also creating uncertainty, as there has been no final decision on introduction dates, the conditions associated with the new test cycle, or the continuation of the fleet targets. According to present knowledge, the WLTP will make it difficult to achieve CO₂ targets beginning in 2020.

In Germany, considerations are being made to change the taxation of company cars in order to make taxation dependent on vehicle emissions. This could cause fleet customers to switch over to smaller and more fuel-efficient cars.

Legislation in the United States on greenhouse gases and fuel consumption stipulates that new car fleets in the United States may only emit an average of 163 g CO₂/mile as of 2025 (approximately 100 g CO₂/km). These new regulations will require an average annual reduction in CO₂ emissions as of 2017 amounting to 5% for cars and 3.5% in the beginning for SUVs and pickups (this rather lower rate applies until 2022). This will impact the German premium manufacturers and thus also the Mercedes-Benz Cars division harder than the US manufacturers, for example. As a result of strong demand for large, powerful engines in the United States as well as Canada, financial penalties cannot be ruled out.

Similar legislation exists or is being prepared in many other countries, for example in Japan, South Korea, India, Canada, Switzerland, Mexico, Saudi Arabia, Brazil and Australia.

Daimler gives these targets due consideration in its product planning. The increasingly ambitious targets require significant shares of plug-in hybrids or cars with other types of electric drive. The market success of these drive systems is greatly influenced by regional market conditions, for example the battery-charging infrastructure and state support. But as market conditions cannot be predicted with certainty, a residual risk exists.

Pursuant to EU Directive 2006/40/EC, since January 1, 2011, vehicles only receive a type approval if their air-conditioning units are filled with a refrigerant that meets certain criteria with regard to climate friendliness. The directive calls for an introductory period until December 31, 2016 for such refrigerants to be used in all new vehicles. Mercedes-Benz Cars had originally planned to use the refrigerant R1234yf in its

new vehicle models as early as possible and therefore did not intend to make use of this transitional period. However, due to the safety risks identified by Mercedes-Benz Cars in the summer of 2012, Daimler is not using the new refrigerant R1234yf in its vehicles at the moment and has started with the development of safe alternatives.

Strict regulations for the reduction of vehicles' emissions and fuel consumption also create potential risks for the Daimler Trucks division. For example, legislation was passed in Japan in 2006 and in the United States in 2011 for the reduction of greenhouse-gas emissions and fuel consumption by heavy-duty commercial vehicles. In China, legislation has been drafted which is likely to affect exports to that country and require additional expenditure as of 2015. The European Commission is currently working on methods for measuring the CO₂ emissions of heavy-duty commercial vehicles that will probably have to be applied as of 2017. Daimler has to assume that the statutory limits will be very difficult to meet in some countries. Very demanding regulations for CO₂ emissions are also planned, or else have been approved for light commercial vehicles. This will present a long-term challenge for Mercedes-Benz Vans especially, because the division primarily serves the segment of N1 vehicles. The European fleet of N1 vehicles may not emit an average of more than 175 g CO₂/km as of 2017 and not more than 147 g CO₂/km as of 2020; penalty payments may otherwise be imposed.

In addition to emission, consumption and safety regulations, traffic-policy restrictions for the reduction of traffic jams, noise and pollution are becoming increasingly important in cities and urban areas of the European Union and other regions of the world. Drastic measures are increasingly being taken, such as general vehicle-registration restrictions like those in Beijing, Guangzhou or Shanghai. These can have a dampening effect on the development of unit sales, especially in the growth markets. Pressure to reduce personal transport is also being applied in European cities through increasing measures, such as restrictions on vehicles in inner cities, congestion charges and other types of road-use fees.

The biggest challenge in the coming years will be to offer an appropriate range of drive systems and the right product portfolio in each market, while fulfilling customer's wishes, internal financial targets and statutory requirements.

The position of the Daimler Group in key foreign markets could also be affected by an increase in bilateral free-trade agreements, at least to the extent to which the European Union fails to reach similar agreements with the markets in question.

Furthermore, the danger exists that individual countries will attempt to defend their competitiveness in the world's markets by resorting to interventionist and protectionist actions. Particularly in China and the markets of developing countries and emerging economies, Daimler is increasingly faced with tendencies to limit imports or at least reduce the rate of growth of imports, and to attract direct foreign investment by means of appropriate industrial policies. Furthermore, a tendency of tightening the regulatory environment in general and in particular with regard to competition law is to be observed.

Company-specific Risks

Production and technology risks

Key success factors for achieving the desired level of prices for the products of the Daimler Group, and hence for the achievement of the corporate goals, are the brand image, design and quality of the products — and thus their acceptance by customers — as well as technical features based on innovative research and development. Convincing solutions, which for example promote accident-free driving or further improve Daimler's vehicles' fuel consumption and emissions (e.g. diesel-hybrid or electric vehicles), are of key importance for safe and sustainable mobility. Due to growing technical complexity, continually rising requirements in terms of emissions, fuel consumption and safety, and the Daimler Group's goal of meeting and steadily raising its quality standards, product manufacturing in the various automotive divisions is subject to production and technology risks.

The demanding combination of requirements, complexity and quality can lead to higher advance expenditure and thus also to an adverse impact on the automotive segment's profitability. One of the associated risks is that development expenditure cannot later flow directly into the end product if the solution is not ideally usable for the customer or proves not to be marketable.

In addition, the launch of new products is generally connected with high investment and can lead to a short-term decline in production volume during the initial production phase. In order to achieve a very high level of quality, which is one of the key factors for a customer's decision to buy a product of the Daimler Group, it is necessary to make investments in new products and technologies that sometimes exceed the originally planned scope. This cost overrun would then reduce the anticipated earnings from the launch of a new model series or product generation. These automotive segments are affected, which are currently launching new products or that are planning to do so, in some cases in conformance with specific regional conditions.

In principle, there is also a danger that due to problems with or the failure of production equipment or a production plant, it might not be possible to maintain the planned level of production, and that would consequently generate costs. Such risks mainly exist for the Mercedes-Benz Cars division.

Product components also have to be available at the right time. Bottlenecks could also be caused by interruptions in the supply chain.

Warranty and goodwill claims can arise when the quality of the products does not meet customers' expectations, when a regulation is not fully complied with, or when support is not provided in the required form in connection with product problems and product care.

Information technology risks

Information technology plays a crucial role for the Daimler Group's business processes. Storing and exchanging data in a timely, complete and correct manner is of key importance for a global group such as Daimler. Appropriately secure IT systems and a reliable IT infrastructure must be used in order to protect information. Risks are the interruption of business processes due to the failure of IT systems or the loss or corruption of data. Daimler cannot rule out the possibility that IT disturbances will arise and have a negative impact on the Group's business processes.

Personnel risks

Daimler's success is highly dependent on employees and their expertise.

Competition for highly qualified staff and management is still very intense in the industry and the regions in which Daimler operates. The future success of the Daimler Group also depends on the magnitude to which it succeeds over the long term in recruiting, integrating and retaining executives, engineers and other specialists. Because of demographic developments, the Group has to cope with changes relating to an aging workforce and has to secure a sufficient number of qualified young persons with the potential to become the next generation of highly skilled specialists and executives. There is no segment-specific assessment of the human resources risk because the described risks are not related to any specific business segment but are valid for all segments. If this risk materializes, depending on the size of the personnel shortage, an impact on the Group's activities and thus also on the earnings of the Daimler Group is to be expected. Collective bargaining negotiations could also have an impact on the earnings of the Daimler Group.

Risks related to equity interests and joint ventures

Cooperation with partners in associated companies, joint ventures, joint operations and other types of partnerships is of central importance for Daimler. Along with ensuring better access to growth markets and new technologies, equity interests and joint ventures help Daimler exploit synergies and improve cost structures and thus enable it to successfully respond to competitive pressures in the automotive industry.

Daimler generally bears a proportionate share of the risks of its equity interests. The possible risks include negative financial developments and delays in the set-up of development and production structures in equity interests and joint ventures, all of which can negatively impact the achievement of growth targets in the affected segments. Risks exist in connection with equity interests in the segments Mercedes-Benz Cars, Daimler Trucks and Mercedes-Benz Vans.

The development of production capacities and the acquisition of equity interests in the Chinese market are particularly exposed to risks due to the uncertain nature of market development in China. Furthermore, dependencies between contracting parties and possible changes to political and legal conditions in China must be included in the local decision-making processes. In view of the tense situation in Russia and Ukraine, the Group is also paying closer attention to affected equity interests and joint ventures in those countries.

Financial Risks

Daimler is generally exposed to risks from changes in market prices such as currency exchange rates, interest rates, commodity prices and share prices. Market-price changes can have a negative influence on the Group's profitability, cash flows and financial position.

In addition, the Group is exposed to credit and country-related risks.

Further information on financial risks is provided in note 32 (*Management of financial risks*) of the notes to the Annual Consolidated Financial Statements 2014 of DAG, incorporated by reference into this Prospectus. Information on the Group's financial instruments is provided in note 31 (*Financial instruments*) of the notes to the Annual Consolidated Financial Statements 2014 of DAG, incorporated by reference into this Prospectus.

Exchange rate risks

The Daimler Group's global orientation implies that its business operations and financial transactions are connected with risks of foreign exchange rates against the euro, especially for the US dollar and other currencies such as currencies of growth markets. An exchange rate risk arises in business operations primarily when revenue is generated in a currency different from that of the related costs (transaction risk). This applies in particular to the Mercedes-Benz Cars division, as a major portion of its revenue is generated in foreign currencies, while most of its production costs are incurred in euros. The Daimler Trucks division is also exposed to such transaction risks, but to a lesser degree because of its worldwide production network. Exchange rate risks also exist in connection with the translation into euros of the net assets, revenues and expenses of the companies of the Group outside the euro zone (translation risk); these risks are not generally hedged.

Interest rate risks

Daimler employs a variety of interest-rate sensitive financial instruments to manage the cash requirements of its business operations on a day-to-day basis. Most of these financial instruments are held in connection with the financial services business of Daimler Financial Services, whose policy is generally to perform a term-congruent refinancing. However, to a limited extent, the funding does not match in terms of maturities and interest rates, which gives rise to the risk of changes in interest rates.

Equity price risks

As of December 31, 2014, the only shares that Daimler holds are shares that are classified as long-term investments (especially Nissan and Renault) or that are included in the consolidated financial statements using the equity method (primarily BAIC Motor and Kamaz). DAG does not include these investments in a market price risk analysis. For more information on equity risks, please see the subsection entitled "*Risks related to equity interests and joint ventures*".

Commodity price risks

As already described in the subsection entitled "*Procurement market risks*", the Group's business operations are exposed to changes in the prices of consignments and raw materials.

Liquidity risks

In the normal course of business, Daimler makes use of bonds, commercial paper and securitized transactions as well as bank credits in various currencies, primarily to refinance the leasing and sales financing business. A negative development of the capital markets could increase the Group's financing costs. More expensive refinancing would also have a negative effect on the competitiveness and profitability of Daimler's financial services business if Daimler was unable to pass on the higher refinancing costs to its customers; a limitation of the financial services business would have a negative impact on the automotive business.

Credit risks

The Group is exposed to credit risks which result primarily from its financial services activities and from the operations of its vehicle business. Credit risks also arise from the Group's liquid assets. Should defaults occur, this would negatively affect the Group's financial position, cash flows and profitability. The risks related to leasing and sales financing are addressed in the subsection entitled "*Risks relating to the leasing and sales financing business*".

Country risks

Daimler is exposed to country risks that primarily result from cross-border financing for Group companies or customers, as well as from investments in subsidiaries and joint ventures. Country risks also arise from cross-border cash deposits at financial institutions.

Risks Relating to Pension Plans

Daimler has pension benefit obligations, and, to a lesser degree, obligations relating to healthcare benefits, which are largely covered by plan assets. The balance of pensions obligations less plan assets constitutes the balance total or funded status of these employee benefit plans. The valuation of the pension obligations and the calculation of net pension expenses are based on certain assumptions. Even small changes in these assumptions, such as a change in the discount rate, could have a negative effect on the funded status or could lead to changes in the periodic net pension expenses. The market value of plan assets is determined to a large degree by developments in the capital markets. Unfavorable developments, especially relating to equity prices and fixed-interest securities could reduce the value of plan assets. Further information on the pension plans and their risks is provided in note 22 (*Pensions and similar obligations*) of the notes to the Annual Consolidated Financial Statements 2014 of DAG, incorporated by reference into this Prospectus.

Risks from Changes in Credit Ratings

Daimler's creditworthiness is assessed by the rating agencies Standard & Poor's Credit Market Services Europe Limited, Moody's Deutschland GmbH, Fitch Ratings Ltd. and DBRS Limited and MBF's creditworthiness is assessed by the rating agency TurkRating. There are risks in connection with potential downgrades to credit ratings by these rating agencies which could have a negative impact on the Group's financing (in the case of ratings applicable to DAG) or MBF's financing (in the case of ratings applicable to MBF) if such a downgrade leads to an increase in the costs for external financing or otherwise restrict the Group's (in the case of ratings applicable to DAG) or MBF's (in the case of ratings applicable to MBF) ability to obtain financing. A credit rating downgrade could also damage Daimler's (in the case of ratings to be applicable to DAG) or MBF's (in the case of ratings applicable to MBF) reputation or discourage investment in DAG. A risk to the credit rating of Daimler or MBF could also arise if the earnings and cash flows anticipated from the Group's or MBF's, as applicable, growth are not realized.

Risks from Guarantees and Legal Risks

The Group remains exposed to risks from guarantees and legal risks. Provisions are recognized for those risks if and to the extent that they are likely to be utilized and the amounts of the obligations can be reasonably estimated.

Risks from guarantees

The issue of guarantees results in liability risks for the Group. For example, Daimler holds an equity interest in the system for recording and charging tolls for the use of highways in Germany by commercial vehicles. The operation of the electronic toll-collection system is the responsibility of the operator company, Toll Collect GmbH, in which Daimler holds a 45% stake and which is included in the consolidated financial statements using the equity method of accounting. In addition to Daimler's membership of the Toll Collect consortium and its equity interest in Toll Collect GmbH, risks also arise from guarantees that Daimler has assumed with the other partners in the Toll Collect consortium (Deutsche Telekom AG and Cofiroute S.A.) supporting obligations of Toll Collect GmbH toward the Federal Republic of Germany in connection with the toll system and a call option of the Federal Republic of Germany. Claims could be made under those guarantees if toll revenue is lost for technical reasons, if certain contractually defined performance parameters are not fulfilled, if additional claims are made by the Federal Republic of Germany, if the final operating permit is not granted, if Toll Collect GmbH fails to meet contractual obligations, if it fails to have the required equipment available, or if the Federal Republic of Germany takes over Toll Collect GmbH. The maximum loss risk for the Group from these risks can be substantial. Additional information is provided in note 29 (*Legal proceedings*) and note 30 (*Financial guarantees, contingent liabilities and other financial obligations*) of the notes to the Annual Consolidated Financial Statements 2014 of DAG, incorporated by reference into this Prospectus.

Legal risks

Various legal proceedings, claims and government investigations (legal proceedings) are pending against DAG and its subsidiaries on a wide range of topics, including vehicle safety, emissions, fuel economy, financial services, dealer, supplier and other contractual relationships, intellectual property rights, warranty claims, environmental matters, legal proceedings relating to competition law and shareholder litigation. Product-related litigation involves claims alleging faults in vehicles, some of which have been made as class actions.

Adverse decisions in one or more of these proceedings could require Daimler to pay substantial compensatory and punitive damages or undertake service actions, recall campaigns or other costly actions. Some of these proceedings may have an impact on the Group's reputation. It is possible, as these proceedings are connected with a large degree of uncertainty, that after the final resolution of litigation, some of the provisions Daimler has recognized for legal proceedings could prove to be insufficient. As a result, substantial additional expenditures may arise. This also applies to legal proceedings for which the Group has seen no requirement to recognize a provision.

The final result of any such litigation may influence the Group's earnings and cash flows in any particular period. Further information on legal proceedings is provided in note 29 (*Legal proceedings*) of the notes to the Annual Consolidated Financial Statements 2014 of DAG, incorporated by reference into this Prospectus.

Other Risks

In addition to the risk categories described above, unpredictable events, such as natural disasters or terrorist attacks, are possible, and these can disturb production and business processes. This could adversely affect consumer confidence and could cause production interruptions due to supplier problems and intensified security measures at national borders. In this context, Daimler also considers as risks earthquakes (especially in Asia), weather-related damage and political instability in sales regions. Other smaller risks relate to project and process risks as well as the implementation of organizational changes and possible resource shortages.

In addition to the risks described above, there are risks that affect the reputation of the Daimler Group as a whole. Public interest is focused on Daimler's position with regard to issues such as ethics and sustainability. Furthermore, customers and capital markets are interested in how the Group reacts to the technological challenges of the future and how Daimler succeeds in offering up-to-date and technologically leading products in the markets.

Risk Factors Relating to the Notes

The Notes May not be a Suitable Investment for all Investors

Each potential investor in Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the relevant Notes, the merits and risks of investing in the relevant Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement hereto;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the relevant Notes, including where principal or interest is payable in one or more currencies, or where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the relevant Notes and be familiar with the behavior of any relevant indices and financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Sophisticated institutional investors generally do not purchase financial instruments as stand-alone investments. They purchase financial instruments as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to their overall portfolio. A potential investor should not invest in the Notes unless it has the expertise (either alone or with a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor's overall investment portfolio.

Liquidity Risk

Application has been made to list Notes issued under the Programme on the official list, and admit them for trading on, the regulated market of the Luxembourg Stock Exchange appearing on the list of regulated markets issued by the European Commission. In addition, the Programme provides that Notes may be listed on an alternative stock exchange or may not be listed at all. Regardless of whether the Notes are listed or not, there can be no assurance that a liquid secondary market for the Notes will develop or, if it does develop, that it will continue. The fact that the Notes may be listed does not necessarily lead to greater liquidity as compared to unlisted Notes. If the Notes are not listed on any stock exchange, pricing information for such Notes may, however, be more difficult to obtain which may affect the liquidity of the Notes adversely. In an illiquid market, an investor might not be able to sell his Notes at any time at fair market prices. The possibility to sell the Notes might additionally be restricted by country specific reasons.

Market Price Risk

The development of market prices of the Notes depends on various factors, such as changes of market interest rate levels, the policy of central banks, overall economic developments, inflation rates or the lack of

or excess demand for the relevant type of Notes. The Holder of Notes is therefore exposed to the risk of an unfavourable development of market prices of his Notes which materialises if the Holder sells the Notes prior to the final maturity of such Notes. If the Holder decides to hold the Notes until final maturity the Notes will be redeemed at the amount set out in the relevant Final Terms.

Risk of Early Redemption

The applicable Final Terms will indicate whether the Issuer may have the right to call the Notes prior to maturity for reasons of taxation or at the option of the Issuer (optional call right) or whether the Notes will be subject to early redemption in case of the occurrence of an event specified in the applicable Conditions (early redemption event).

An optional call right is likely to limit the market value of the relevant Notes. Prior to or during any period when the Issuer may elect to redeem the Notes, the market value of those Notes generally will not rise substantially above the price at which they can be redeemed.

If the Issuer redeems the Notes prior to maturity or the Notes are subject to early redemption due to an early redemption event, a Holder of such Notes is exposed to the risk that due to early redemption his investment may have a lower than expected yield.

The Issuer might exercise its optional call right if the yield on comparable notes in the capital market falls and the Issuer's cost of any new borrowing is lower than the interest rate payable under the relevant Notes. At those times, an investor may only be able to reinvest the redemption proceeds in notes with a lower yield. Prospective investors should consider reinvestment risk in light of other investments available at the time when they are deciding whether to invest in the relevant Notes.

In case of Notes issued by MBF, investors should note the following: The withholding tax rate on interest payments in respect of bonds issued by Turkish legal entities outside of Turkey varies depending upon the original maturity of such bonds as specified under Decree No. 2009/14592 dated January 12, 2009, which has been amended by Decree No. 2010/1182 dated December 20, 2010 and Decree No. 2011/1854 dated April 26, 2011 (together, the **Tax Decrees**). Pursuant to the Tax Decrees: (a) with respect to bonds with a maturity of less than one year, the withholding tax rate on interest is 10%, (b) with respect to bonds with a maturity of at least one and less than three years, the withholding tax rate on interest is 7%, (c) with respect to bonds with a maturity of at least three and less than five years, the withholding tax rate on interest is 3%, and (d) with respect to bonds with a maturity of five years and more, the withholding tax rate on interest is 0%. However, Turkish tax regulations may be subject to changes from time to time due to political and economic instabilities and high budget deficits. There can be no assurance that the withholding rates set out above will not be changed in the future for any reason. A change in the withholding rates may require MBF to pay withholding taxes in excess of those levels which are applicable to interest or other payments on the Notes on or after date on which the first tranche of any relevant series of Notes is issued by MBF. In such case, MBF may exercise its right to redeem the Notes prior to their maturity date. Therefore, prospective investors should consider reinvestment risk in light of other investments available at the time when they are deciding whether to invest in the relevant Notes to be issued by MBF.

Currency Risk

A Holder of Notes denominated in a foreign currency is exposed to the risk of changes in currency exchange rates which may affect the yield of such Notes. Changes in currency exchange rates result from various factors such as macro-economic factors, speculative transactions and interventions by central banks.

A change in the value of any foreign currency against the Euro, for example, will result in a corresponding change in the Euro value of Notes denominated in a currency other than Euro and a corresponding change in the Euro value of interest and principal payments made in a currency other than in Euro in accordance with the terms of such Notes. If the underlying exchange rate falls and the value of the Euro correspondingly rises,

the price of the Notes and the value of interest and principal payments made thereunder, expressed in Euro, falls correspondingly.

Fixed Rate Notes

A Holder of a Fixed Rate Note is exposed to the risk that the price of such Note falls as a result of changes in the current interest rate on the capital markets (the "**Market Interest Rate**") for comparable debt securities of the same maturity. While the nominal interest rate of a Fixed Rate Note as specified in the applicable Final Terms is fixed during the life of such Note, the Market Interest Rate typically changes on a daily basis. As the Market Interest Rate changes, the price of a Fixed Rate Note also changes, but in the opposite direction. If the Market Interest Rate increases, the price of a Fixed Rate Note typically falls, until the yield of such Note is approximately equal to the Market Interest Rate. If the Market Interest Rate falls, the price of a Fixed Rate Note typically increases, until the yield of such Note is approximately equal to the Market Interest Rate. If the Holder of a Fixed Rate Note holds such Note until maturity, changes in the market interest rate are without relevance to such Holder as the Note will be redeemed at a specified redemption amount, usually the principal amount of such Note.

Floating Rate Notes

Floating Rate Notes tend to be volatile investments. A Holder of a Floating Rate Note is exposed to the risk of fluctuating interest rate levels and, consequently, uncertain interest income. Fluctuating interest rate levels make it impossible to determine the yield of Floating Rate Notes in advance. Neither the current nor the historical value of the relevant floating rate should be taken as an indication of the future performance of such floating rate during the term of any Floating Rate Notes.

If Floating Rate Notes are structured to include caps and/or floors, their market value may be more volatile than those for Floating Rate Notes that do not include these features. The effect of a cap is that the amount of interest will never rise above and beyond the predetermined cap, so that the Holder will not be able to benefit from any actual favorable development beyond the cap. The yield could therefore be considerably lower than that of similar Floating Rate Notes without a cap.

Floating Rate Notes Linked to LIBOR, EURIBOR or another "Benchmark"

As a result of concerns in recent years regarding the accuracy of London Inter-bank Offered Rate ("**LIBOR**"), changes have been made to the administration and process for determining LIBOR, including increasing the number of banks surveyed to set LIBOR, streamlining the number of LIBOR currencies and maturities and generally strengthening the oversight of the process, including by providing for U.K. regulatory oversight of LIBOR. In early 2014, Intercontinental Exchange (ICE) took over the administration of LIBOR from the British Banker's Association (BBA).

LIBOR, the Euro Interbank Offered Rate ("**EURIBOR**") and other indices which are deemed "benchmarks" (each a "**Benchmark**" and together, the "**Benchmarks**") are also the subject of recent national, international and other regulatory guidance and proposals for reform. Some of these reforms are already effective while others are still to be implemented. These reforms may cause the relevant Benchmarks to perform differently than in the past, or have other consequences which cannot be predicted.

Key international proposals for reform of Benchmarks include (i) IOSCO's *Principles for Oil Price Reporting Agencies* (October 2012) and *Principles for Financial Market Benchmarks* (July 2013), (ii) ESMA-EBA's *Principles for the benchmark-setting process* (June 2013), and (iii) the European Commission's *proposed regulation on indices used as benchmarks in financial instruments and financial contracts* (September 2013) (the "**Proposed Benchmark Regulation**"). In addition to the aforementioned proposals, there are numerous other proposals, initiatives and investigations which may impact Benchmarks.

The Proposed Benchmark Regulation, if passed in its September 2013 form, would apply principally to "administrators" and also, in some respects, to "contributors" and certain "users" of Benchmarks in the EU,

and would, among other things, (i) require Benchmark administrators to be authorised (or, if non-EU-based, to be subject to an equivalent regulatory regime) and to comply with extensive requirements in relation to the administration of Benchmarks, and (ii) prevent certain uses of Benchmarks of unauthorised administrators. The scope of the Proposed Benchmark Regulation is wide and, in addition to so-called "critical benchmark" indices, could also potentially apply to many interest rate indices where referenced in certain financial instruments admitted to trading on a trading venue (or for which a request for admission to trading on a trading venue has been made), financial contracts and investment funds.

Any changes to a Benchmark as a result of the Proposed Benchmark Regulation or other initiatives could have a material adverse effect on the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with any such regulations or requirements. Such factors may have the effect of discouraging market participants from continuing to administer or participate in certain Benchmarks, trigger changes in the rules or methodologies used in certain Benchmarks or lead to the disappearance of certain Benchmarks.

Although it is uncertain whether or to what extent any of the above-mentioned changes and/or any further changes in the administration or method for determining a Benchmark could have an effect on the value of any Notes whose interest is linked to the relevant Benchmark, investors should be aware that:

- (i) any change to the relevant Benchmark could affect the level of the published rate, including to cause it to be lower and/or more volatile than it would otherwise be;
- (ii) if the applicable rate of interest on the Notes is calculated with reference to a currency or tenor which is discontinued, such rate of interest will then be determined by the fallback provisions of the Notes. This may cause the interest to be lower than it would otherwise be;
- (iii) the methodology or other terms of the relevant Benchmark could be changed, and such changes could have the effect of reducing or increasing the rate or level or affecting the volatility of such Benchmark; and
- (iv) the administrator of the relevant Benchmark will not have any involvement in the Notes and may take any actions in respect of the relevant Benchmark without regard to the effect of such actions on the Notes.

Investors thus face the risk that any changes to the relevant Benchmark may have a material adverse effect on the value of and the amount payable under Notes whose rate of interest is linked to a Benchmark as reference interest rate.

In addition, the administrators of Benchmarks may publish and adhere to error policies (the "**Error Policies**"), which set out how such Benchmark administrators will deal with errors which occur during the fixing process of the relevant Benchmark. These Error Policies may include materiality thresholds, which means that an erroneously fixed Benchmark will not be refixed in case the relevant materiality threshold is not breached. In addition, Error Policies may differentiate between errors which are discovered during compliance checks prior to a cut-off time set out in the relevant Error Policy for a refix of the relevant Benchmark and errors which are discovered after such cut-off time. In case the error is discovered prior to the relevant cut-off time, the Error Policy may allow the Benchmark administrator to refix the relevant Benchmark. Any such refix may result in the relevant Benchmark being lower than originally fixed.

Taxation

Potential purchasers of Notes should be aware that stamp duty and other taxes and/or charges may be levied in accordance with the laws and practices in the countries where the Notes are transferred and other relevant jurisdictions. In addition the summaries set out in the section entitled "*Taxation*" discuss only specific tax considerations, and they do not purport to be a comprehensive description of all tax considerations in any particular jurisdiction which may be relevant to a decision to purchase Notes. Potential purchasers of such

Notes should note that the tax treatment of payments in respect of such Notes may be different (and in some cases significantly different) from that set out in those summaries. Potential purchasers of Notes who are in any doubt as to their tax position should consult their own independent tax advisers. In addition, potential purchasers should be aware that tax regulations and their application by the relevant taxation authorities may change from time to time. Accordingly, it is not possible to predict the precise tax treatment of the Notes which will apply at any given time.

Resolutions of Holders

If the relevant Conditions provide for resolutions of Holders a Holder is subject to the risk of being outvoted by a majority resolution of the Holders. As such majority resolution properly adopted is binding on all Holders, certain rights of such Holder against the relevant Issuer under the relevant Conditions may be amended or reduced or even cancelled.

Joint Representative

If the relevant Conditions provide for the appointment of a Joint Representative it is possible that a Holder may be deprived of its individual right to pursue and enforce its rights under the relevant Conditions against the relevant Issuer, such right passing to the Joint Representative who is then exclusively responsible to claim and enforce the rights of all Holders.

Risks Related to Notes Denominated in Renminbi

Restrictions on convertibility of Renminbi and remittance of proceeds into or outside the PRC

At the date of this Prospectus, Renminbi is not freely convertible. The People's Republic of China ("**PRC**") government continues to regulate conversion between Renminbi and foreign currencies, including the EUR, despite significant reduction in control by it in recent years over trade transactions involving import and export of goods and services as well as other frequent routine foreign exchange transactions. These transactions are known as current account items. Participating banks in Singapore, Hong Kong, Macao, Taiwan, London, Frankfurt, Seoul, Toronto, Sydney, Doha, Paris, Luxembourg, Kuala Lumpur and Bangkok have been permitted to engage in the settlement of current account trade transactions in Renminbi under certain pilot schemes.

However, remittance of Renminbi by foreign investors into the PRC for purposes such as capital contributions, known as capital account items, is generally only permitted upon obtaining specific approvals from the relevant authorities on a case-by-case basis and subject to a strict monitoring system. Regulations in the PRC on the remittance of Renminbi into the PRC for settlement of capital account items is developing gradually.

On December 3, 2013, the Ministry of Commerce of the PRC ("**MOFCOM**") promulgated the "Circular on Certain Issues Concerning Renminbi Cross-border Direct Investment" (the "**MOFCOM Circular**"). Pursuant to the MOFCOM Circular, the appropriate office of MOFCOM and/or its local counterparts were authorised to approve Renminbi foreign direct investments ("**FDI**") with certain exceptions based on, among others, the size and industry of the investment. The MOFCOM Circular also stipulates that the proceeds of FDI may not be used towards investment in securities, financial derivatives or entrustment loans in the PRC, except for investments in domestic companies listed in the PRC through private placements or share transfers by agreement.

On October 13, 2011, the People's Bank of China (the "**PBoC**") promulgated the "Administrative Measures on Renminbi Settlement of Foreign Direct Investment" (the "**PBoC FDI Measures**") as part of the implementation of the PBoC's detailed FDI accounts administration system. The system covers almost all aspects in relation to FDI, including capital injections, payments for the acquisition of PRC domestic enterprises, repatriation of dividends and other distributions, as well as Renminbi denominated cross-border loans. Under the PBoC FDI Measures, special approval for RMB FDI and shareholder loans from the PBoC,

which was previously required, is no longer necessary. In some cases however, post-event filing with the PBoC is still necessary. On June 14, 2012, the PBoC promulgated the Notice on Clarifying the Detailed Operating Rules for RMB Settlement of Foreign Direct Investment ("**PBoC FDI Notice**") to provide further guidelines for implementing the previous PBoC FDI Measures. This PBoC FDI Notice details the rules for opening and operating the relevant accounts and reiterates the restrictions upon the use of the funds within those accounts as specified in the MOFCOM Circular.

As the MOFCOM Circular, the PBoC FDI Measures and PBoC FDI Notice are relatively new circulars, they will be subject to interpretation and application by the relevant authorities in the PRC.

In the event that the Issuer decides to remit some or all of the proceeds into the PRC in Renminbi, its ability to do so will be subject to obtaining all necessary approvals from and registration with the relevant PRC government authorities. However, there is no assurance that the necessary approvals from and registration with the relevant PRC government authorities will be obtained at all or, if obtained, they will not be revoked or amended in the future.

There is no assurance that the PRC government will continue to gradually liberalise control over crossborder remittance of Renminbi in the future, that any the pilot scheme introduced will not be discontinued or that new regulations in the PRC will not be promulgated in the future which have the effect of restricting or eliminating the remittance of Renminbi into or outside the PRC. In the event that the Issuer does remit some or all of the proceeds into the PRC in Renminbi and the Issuer subsequently is not able to repatriate funds outside the PRC in Renminbi, it will need to source Renminbi offshore to finance its obligations under the Notes, and its ability to do so will be subject to the overall availability of Renminbi outside the PRC.

Limited availability of Renminbi outside the PRC

As a result of the restrictions by the PRC government on cross border Renminbi fund flows, the availability of Renminbi outside the PRC is limited. While the PBoC has established Renminbi clearing and settlement mechanisms for participating banks in Singapore, Hong Kong, Macao, Taiwan, London, Frankfurt, Seoul, Toronto, Sydney, Doha, Paris, Luxembourg, Kuala Lumpur and Bangkok through settlement agreements on the clearing of Renminbi business (the "**Settlement Agreements**") with Industrial and Commercial Bank of China, Singapore Branch, Bank of China (Hong Kong) Limited, Bank of China, Macao Branch, Bank of China, Taipei Branch, China Construction Bank (London) Limited, Bank of China, Frankfurt Branch, Bank of Communications, Seoul Branch, Industrial and Commercial Bank of China (Canada), Bank of China (Australia) Limited, Industrial and Commercial Bank of China Limited, Doha Branch, Bank of China, Paris Branch, Industrial and Commercial Bank of China Limited, Luxembourg Branch, Bank of China (Malaysia) Limited, and Industrial and Commercial Bank of China (Thailand) Limited (each, an "**RMB Clearing Bank**"), the current size of Renminbi denominated financial assets outside the PRC is limited.

There are restrictions imposed by the PBoC on Renminbi business participating banks in respect of cross-border Renminbi settlement, such as those relating to direct transactions with PRC enterprises. Furthermore, Renminbi business participating banks do not have direct Renminbi liquidity support from the PBoC. The Renminbi Clearing Banks only have access to onshore liquidity support from the PBoC for the purpose of squaring open positions of participating banks for limited types of transactions and are not obliged to square for participating banks any open positions resulting from other foreign exchange transactions or conversion services. In such cases, the participating banks will need to source Renminbi from outside the PRC to square such open positions.

Although it is expected that the offshore Renminbi market will continue to grow in depth and size, its growth is subject to many constraints as a result of PRC laws and regulations on foreign exchange. There is no assurance that no new PRC regulations will be promulgated or the Settlement Agreements will not be terminated or amended in the future which will have the effect of restricting availability of Renminbi offshore. The limited availability of Renminbi outside the PRC may affect the liquidity of the Notes. To the extent the Issuer is required to source Renminbi in the offshore market to service the Notes, there is no assurance that the Issuer will be able to source such Renminbi on satisfactory terms, if at all.

Risk of depreciation of Renminbi

The value of Renminbi against the EUR and other foreign currencies fluctuates from time to time and is affected by changes in the PRC and international political and economic conditions as well as many other factors. The Issuer will make all payments of interest and principal with respect to the Notes in Renminbi unless otherwise specified. As a result, the value of these Renminbi payments may vary with the changes in the prevailing exchange rates in the marketplace. If the value of Renminbi depreciates against the EUR or other foreign currencies, the value of the investment made by a Holder of the Notes in EUR or any other foreign currency terms will decline.

Risk of Notes being settled in U.S. dollar

If the Issuer is not able, or it is impracticable for it, to satisfy its obligation to pay interest and principal on the Notes as a result of RMB Inconvertibility, RMB Non transferability or RMB Illiquidity (each, as defined in the section entitled "*Terms and Conditions of the Notes*"), the Issuer shall be entitled, on giving not less than five or more than 30 calendar days' irrevocable notice to the Holders prior to the due date for payment, to settle any such payment in U.S. dollar on the due date at the US Dollar Equivalent (as defined in the section entitled "*Terms and Conditions of the Notes*") of any such interest or principal, as the case may be.

Risk of increased interest rate volatility

The PRC government has gradually liberalised its regulation of interest rates in recent years. Further liberalisation may increase interest rate volatility. In case the Notes carry a fixed interest rate, the trading price of the Notes will vary with the fluctuations in the Renminbi interest rates. If Holders of the Notes propose to sell their Notes before their maturity, they may receive an offer lower than the amount they have invested.

PRC tax laws

Under the PRC Enterprise Income Tax Law and its implementation rules which took effect on January 1, 2008, any gain realised on the transfer of Notes by non resident enterprise Holders may be subject to enterprise income tax if such gain is regarded as income derived from sources within the PRC. However, there remains uncertainty as to whether the gain realised from the transfer of the Notes would be treated as income derived from sources within the PRC and be subject to PRC tax. This will depend on how the PRC tax authorities interpret, apply or enforce the PRC Enterprise Income Tax Law and its implementation rules.

Therefore, if non resident enterprise Holders are required to pay PRC income tax on gains on the transfer of the Notes (such enterprise income tax is currently levied at the rate of 10 % of the gross proceeds, unless there is an applicable tax treaty between PRC and the jurisdiction in which such non resident enterprise Holders of Notes reside that reduces or exempts the relevant tax), the value of their investment in the Notes may be materially and adversely affected.

Interests of Natural and Legal Persons Involved in the Issue or the Offer

Certain of the Dealers and/or their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for, the Issuer and the Guarantor (if applicable) in the ordinary course of business. In addition, in the ordinary course of their business activities, these Dealers and/or their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or the Guarantor (if applicable). Certain of the Dealers and/or their affiliates that have a lending relationship with the Issuer or the Guarantor (if applicable) routinely hedge their credit exposure to the Issuer or the Guarantor (if applicable) consistent with their customary risk management policies. Typically, such Dealers and/or their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the

creation of short positions in securities, including potentially the Notes. Any such short positions could adversely affect future trading prices of the Notes. The Dealers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

Risks Related to FATCA and U.S. Tax Treatment of the Notes

While the Notes issued by DAG, MBAP, DIF, MBI, DCFI and MBF (together, the "**Non-U.S. Issuers**") are in global form and held within Clearstream Banking, *société anonyme* or Euroclear Bank SA/NV (together, the "**ICSDs**") or Clearstream Banking AG, Frankfurt ("**CBF**"), in all but the most remote circumstances, it is not expected that the new reporting regime and potential withholding tax imposed by sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 ("**FATCA**") will affect the amount of any payment received by the ICSDs or CBF (see "*Taxation — Foreign Account Tax Compliance Act*"). However, FATCA may affect payments made to custodians or intermediaries in the subsequent payment chain leading to the ultimate investor if any such custodian or intermediary generally is unable to receive payments free of FATCA withholding. It also may affect payment to any ultimate investor that is a financial institution that is not entitled to receive payments free of withholding under FATCA, or an ultimate investor that fails to provide its broker (or other custodian or intermediary from which it receives payment) with any information, forms, other documentation or consents that may be necessary for the payments to be made free of FATCA withholding. Investors should choose the custodians or intermediaries with care (to ensure each is compliant with FATCA or other laws or agreements related to FATCA) and provide each custodian or intermediary with any information, forms, other documentation or consents that may be necessary for such custodian or intermediary to make a payment free of FATCA withholding. Investors should consult their own tax adviser to obtain a more detailed explanation of FATCA and how FATCA may affect them. The relevant Non-U.S. Issuer's obligations under the Notes are discharged once it has made payment to, or to the order of, the relevant Clearing System and the relevant Non-U.S. Issuer has therefore no responsibility for any amount thereafter transmitted through the relevant Clearing System and custodians or intermediaries. Further, foreign financial institutions in a jurisdiction which has entered into an intergovernmental agreement with the United States (an "**IGA**") are generally not expected to be required to withhold under FATCA or an IGA (or any law implementing an IGA) from payments they make.

Payments on Notes issued by DFNA will be subject to withholding under FATCA if the holder, beneficial owner or an intermediary in the chain of payments is not FATCA compliant.

In addition, an Issuer may also redeem early any Notes under the Programme if certain payments made to the Issuer or the Guarantor (if applicable) become subject to withholding under FATCA or if the Issuer is required, under FATCA, to redeem such Notes. In such case, all Notes of a series may be redeemed early.

Finally, in the case of Notes to be issued by DFNA, the Issuer may redeem early such Notes if the Notes are or will be treated as being in bearer form for U.S. federal income tax purposes.

RESPONSIBILITY STATEMENT

DAG and each of the other Issuers accept responsibility for the information contained in, or incorporated by reference into, this Prospectus and for the information which will be contained in the Final Terms (as defined below) except that each Issuer other than DAG accepts responsibility only for information which exclusively refers to it. Each Issuer declares that, having taken all reasonable care to ensure that such is the case, the information contained in, or incorporated by reference into, this Prospectus for which it is responsible is, to the best of its knowledge, in accordance with the facts and does not omit anything likely to affect the import of such information.

GENERAL DESCRIPTION OF THE PROGRAMME

Under the Programme, the Issuers may from time to time issue Notes denominated in any currency agreed between the relevant Issuer and the relevant Dealer(s).

The maximum aggregate nominal amount of all Notes from time to time outstanding under the Programme will not exceed EUR 35,000,000,000 (or its equivalent in other currencies), subject to any increase in accordance with the terms of the dealer agreement dated May 26, 2015 (the "**Dealer Agreement**").

The Notes may be issued on a continuing basis to one or more of the Dealers specified on the cover page of this Prospectus and any additional Dealer appointed under the Programme from time to time by the Issuers, which appointment may be for a specific issue or on an ongoing basis (each a "**Dealer**" and, together, the "**Dealers**"). References in this Prospectus to the "**relevant Dealer**" shall, in the case of an issue of Notes being (or intended to be) subscribed by more than one Dealer, be to all Dealers agreeing to subscribe such Notes. The Notes will be issued in such denominations as may be agreed between the relevant Issuer and the relevant Dealer, save that the minimum denomination of any Notes will be, (i) in the case of Notes to be issued by DAG, MBAP, DIF, DCFI, MBF or DFNA and admitted to trading on the regulated market of a stock exchange located in a Member State of the EEA or publicly offered in a Member State of the EEA, Euro 1,000 or nearly its foreign currency equivalent on the relevant date of issue, (ii) in the case of Notes to be issued by MBJ and admitted to trading on the regulated market of a stock exchange located in a Member State of the EEA or publicly offered in a Member State of the EEA, Euro 100,000 or nearly its foreign currency equivalent on the relevant date of issue, and (iii) such amount as may be allowed or required from time to time by the relevant central bank (or equivalent body) or any laws or regulations applicable to the relevant specified currency. In the following, Notes with a minimum denomination of at least Euro 100,000 or nearly its foreign currency equivalent will be referred to as "**Wholesale Notes**". The Notes may be offered to qualified and/or non-qualified investors.

Where Notes have a maturity of less than one year and either (a) the issue proceeds are received by the relevant Issuer in the United Kingdom or (b) the activity of issuing the Notes is carried on from an establishment maintained by the relevant Issuer in the United Kingdom, such Notes must: (i) have a minimum redemption value of £100,000 or nearly its foreign currency equivalent and be issued only to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold, manage or dispose of investments (as principal or agent) for the purposes of their businesses; or (ii) be issued in other circumstances which do not constitute a contravention of section 19 of the FSMA by such Issuer or the Guarantor.

The Issuer and the relevant Dealer will agree on the terms and conditions applicable to each Tranche of Notes (the "**Conditions**"). The Conditions will be set out in a document specific to such Tranche referred to as final terms (the "**Final Terms**"). Copies of Final Terms prepared in connection with the issue and admission to trading on a regulated market or public offer of Notes will be obtainable free of charge during normal business hours from the Issuing Agent (Citibank N.A., London Branch, Citigroup Centre, Canada Square, Canary Wharf, London E14 5LB, United Kingdom), the Paying Agent in Germany (Citigroup Global Markets Deutschland AG, Reuterweg 16, 60323 Frankfurt am Main, Germany), the Paying Agent in Luxembourg (BNP Paribas Securities Services, Luxembourg Branch, 33, rue de Gasperich, Howald-Hesperange, L-2085 Luxembourg), (in the case of Notes to be issued by DAG) DAG (Daimler AG, Mercedesstraße 137, 70327 Stuttgart, Germany), (in the case of Notes to be issued by MBAP) MBAP (Mercedes-Benz Australia/Pacific Pty. Ltd., 44 Lexia Place, Mulgrave VIC 3170, Australia), (in the case of Notes to be issued by DIF) DIF (Daimler International Finance B.V., Van Deventerlaan 50, 3528 AE Utrecht, The Netherlands), (in the case of Notes to be issued by MBJ) MBJ (Mercedes-Benz Japan Co., Ltd., Roppongi First Building, 9-9, Roppongi 1-chome, Minato-ku, Tokyo 106-8506, Japan), (in the case of Notes to be issued by DCFI) DCFI (Daimler Canada Finance Inc., 1 Place Ville Marie, 37 Floor, Montréal, Québec H3B 3P4, Canada), (in the case of Notes to be issued by MBF) MBF (Mercedes-Benz Finansman Türk A.Ş., Akçaburgaz Mahallesi, Mercedes Cad. No:2, 34522 Esenyurt-İstanbul, Turkey) and (in the case of Notes to be issued by DFNA) DFNA (Daimler Finance North America LLC, c/o Corporation Trust Corporation,

Corporation Trust Center, 1209 Orange Street, Wilmington, Delaware 19801, USA). Copies of Final Terms prepared in connection with Notes to be admitted to trading on the regulated market of the Luxembourg Stock Exchange will be viewable on, and obtainable free of charge from, the website of the Luxembourg Stock Exchange (www.bourse.lu).

Notes may be issued at an issue price which is at par or at a discount to, or premium over, par (as specified in the relevant Final Terms). The issue price and the amount of the relevant Notes will be determined before filing of the relevant Final Terms of each Tranche, based on then prevailing market conditions. Where for a particular Tranche the issue price or aggregate principal amount are not fixed at the time of issue, the Final Terms shall describe the procedures for calculation and publication of such information.

CONSENT TO THE USE OF THIS PROSPECTUS

The Final Terms will specify that either (i) none of the Dealers and/or financial intermediaries, or (ii) only one Dealer or financial intermediary or several Dealers and/or financial intermediaries named in the relevant Final Terms ("**Individual Consent**"), or (iii) each of the Dealers and/or financial intermediaries ("**General Consent**") subsequently reselling or finally placing Notes issued under the Programme is/are entitled to use this Prospectus and the relevant Final Terms in connection with the subsequent resale or final placement of the relevant Notes.

In case the Issuer has given its Individual Consent or General Consent to the use of this Prospectus and the relevant Final Terms, the following shall apply:

The Issuer accepts responsibility for the information given in this Prospectus also with respect to such subsequent resale or final placement of the relevant Notes for which it has given its Individual Consent or General Consent.

This Prospectus may only be delivered to potential investors together with all supplements published before such delivery. Any supplement to this Prospectus is available for viewing in electronic form on the website of the Luxembourg Stock Exchange (www.bourse.lu).

In the event of an offer being made by a Dealer and/or a further financial intermediary the Dealer and/or the further financial intermediary shall provide information to investors on the terms and conditions of the offer at the time of that offer.

In case the Issuer has given its Individual Consent to the use of this Prospectus and the relevant Final Terms any new information with respect to any Dealers and/or financial intermediaries unknown at the time this Prospectus was approved or the relevant Final Terms were filed with the relevant competent authority/authorities will be published on the website specified in the Final Terms.

FORM OF THE NOTES

Each Tranche of Notes will initially be in the form of either a temporary global bearer note (the "**Temporary Global Note**"), without interest coupons, or a permanent global bearer note (the "**Permanent Global Note**" and, together with the Temporary Global Note, the "**Global Notes**"), without interest coupons, in each case as specified in the relevant Final Terms, which will be delivered on or prior to the issue date of such Tranche to a (common) depository of Clearstream Banking, *société anonyme*, Luxembourg ("**CBL**") and/or Euroclear Bank SA/NV ("**Euroclear**") or to Clearstream Banking AG, Frankfurt ("**CBF**" and, together with CBL and Euroclear, the "**Clearing Systems**" and, each, a "**Clearing System**").

Each Global Note issued will be kept in custody by or on behalf of the relevant Clearing System that maintains a book-entry system for transfers of interest in the Global Note until all obligations thereunder have been satisfied. Definitive Notes and coupons will not be issued.

The relevant Final Terms will specify whether United States Treasury Regulation § 1.163-5(c)(2)(i)(C) or any successor provision in substantially similar form (the "**TEFRA C Rules**" or "**TEFRA C**") or United States Treasury Regulation § 1.163-5(c)(2)(i)(D) or any successor provision in substantially similar form (the "**TEFRA D Rules**" or "**TEFRA D**") are applicable in relation to the Notes or that neither the TEFRA C Rules nor the TEFRA D Rules are applicable. Each Tranche of Notes for which the relevant Final Terms specify TEFRA C will be represented by a Permanent Global Note, each Tranche of Notes for which the relevant Final Terms specify TEFRA D will initially be represented by a Temporary Global Note exchangeable for a Permanent Global Note and each Tranche of Notes for which the relevant Final Terms specify that neither the TEFRA C Rules nor the TEFRA D Rules are applicable will be represented by a Permanent Global Note.

It is the intention of DFNA that each Tranche of Notes issued by DFNA (the "**U.S. Notes**") will be treated as "immobilized" and issued in registered form for U.S. federal income tax purposes. Each U.S. Note will be represented by a Global Note (the "**U.S. Global Note**"). U.S. Global Notes will only be issued to CBF pursuant to a book-entry registration agreement (the "**Book-Entry Registration Agreement**") and may not be delivered, sold, assigned or otherwise transferred by CBF except (i) to a successor custodian that agrees to hold the U.S. Global Notes on the same terms as set forth in the Book-Entry Registration Agreement or (ii) to DFNA for cancellation. Pursuant to the Book-Entry Registration Agreement, CBF will be appointed as registrar in respect of the U.S. Notes. As agent of DFNA, CBF will maintain (i) a register showing the aggregate number of U.S. Notes represented by each U.S. Global Note until all obligations of DFNA under the U.S. Notes have been satisfied, and (ii) records of the holders of interests in the U.S. Notes represented by the U.S. Global Note (the "**Register**"). CBF will hold the U.S. Global Notes in custody for the holders of interests in the U.S. Notes as evidenced by the Register until all obligations of DFNA under the U.S. Notes have been satisfied. CBF and DFNA will provide a certified copy of a U.S. Global Note to any holder of an interest in such U.S. Global Note upon request. Such copy shall not itself be an enforceable bearer instrument.

Payment of interest on the U.S. Notes will be made only after delivery of a properly completed U.S. Internal Revenue Service (IRS) form certifying that the holder is a non-United States person and demonstrating a complete exemption from withholding taxes pursuant to Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 in respect of interest payments.

Temporary Global Note exchangeable for Permanent Global Note

If the relevant Final Terms specify the form of the Notes as being "Temporary Global Note exchangeable for Permanent Global Note", the Notes will initially be in the form of a Temporary Global Note, without interest coupons, which will be exchangeable for interests in a Permanent Global Note, without interest coupons, not earlier than 40 days (or later than 180 days) after the issue date of the relevant Tranche of the Notes (the "**Exchange Date**") upon certification as to non-U.S. beneficial ownership. No payments of principal, interest or any other amounts will be made under the Temporary Global Note prior to such certification of non-U.S.

beneficial ownership having been received by the relevant Clearing System and such Clearing System having given a like certification (based on the certifications it has received) to the Issuing Agent.

Whenever any interest in the Temporary Global Note is to be exchanged for an interest in a Permanent Global Note, the Issuer shall procure (in the case of first exchange) the prompt delivery (free of charge to the bearer) of such Permanent Global Note to the bearer of the Temporary Global Note or (in the case of any subsequent exchange) an increase in the principal amount of the Permanent Global Note in accordance with its terms against:

- (i) presentation and (in the case of final exchange) surrender of the Temporary Global Note at the specified office of the Issuing Agent; and
- (ii) receipt by the Issuing Agent of a certificate or certificates of non-U.S. beneficial ownership.

The principal amount of the Permanent Global Note shall be equal to the aggregate of the principal amounts specified in the certificates of non-U.S. beneficial ownership; provided, however, that in no circumstances shall the principal amount of the Permanent Global Note exceed the initial principal amount of the Temporary Global Note. Payments of principal, interest (if any) or any other amounts on a Permanent Global Note will be made through the relevant Clearing System (against presentation or surrender (as the case may be) of the Permanent Global Note) without any requirement for certification.

Terms and Conditions of the Notes applicable to the Notes

The Terms and Conditions of the Notes applicable to any Global Note will be attached to such Global Note, as more fully described in the section entitled "*Issue Procedures*".

Legend concerning United States Persons

In the case of a Tranche issued in accordance with TEFRA C or TEFRA D, any Global Note will bear a legend to the following effect:

"ANY UNITED STATES PERSON WHO HOLDS THIS OBLIGATION WILL BE SUBJECT TO LIMITATIONS UNDER THE UNITED STATES INCOME TAX LAWS, INCLUDING THE LIMITATIONS PROVIDED IN SECTIONS 165(j) AND 1287(a) OF THE INTERNAL REVENUE CODE."

The sections referred to provide that United States Holders, with certain exceptions, will not be entitled to deduct any loss on a Note and will not be entitled to capital gains treatment of any gain on any sale, disposition, redemption or payment of principal in respect of such Note.

ISSUE PROCEDURES

General

The Issuer and the relevant Dealer will agree on the terms and conditions applicable to each particular Tranche of Notes (the "**Conditions**"). These Conditions will be constituted by the relevant set of terms and conditions set out in the section entitled "*Terms and Conditions of the Notes*" (the "**Terms and Conditions**") as completed by the Final Terms (the "**Final Terms**") as described below.

Sets of Terms and Conditions

A separate set of Terms and Conditions shall apply to each type of Notes, as set out below. The Final Terms shall provide for the Issuer to choose among the following Options:

Option I - Terms and Conditions for Notes with fixed interest rates; and

Option II - Terms and Conditions for Notes with floating interest rates.

Documentation of the Conditions

The Issuer shall document the Conditions in any of the following ways:

- The Final Terms shall determine whether Option I or Option II and whether certain further options contained in Option I or Option II shall be applicable to the individual issue of Notes by replicating the relevant provisions of, and completing the relevant placeholders set out in, Option I or Option II in the Final Terms. The replicated and completed provisions of the set of Terms and Conditions alone shall constitute the Conditions (the "**Integrated Conditions**"). The Integrated Conditions shall be attached to each global note representing the Notes of the relevant Tranche. The Issuer shall document the Conditions in this way if the Notes shall be publicly offered, in whole or in part, or initially distributed, in whole or in part, to non-qualified investors.
- Alternatively, the Final Terms shall determine whether Option I or Option II and whether certain further options contained in Option I or Option II shall be applicable to the individual issue of Notes by making reference to the specific sections of the relevant set of Terms and Conditions. The Final Terms and the relevant set of Terms and Conditions (the "**Long-form Conditions**"), taken together, shall constitute the Conditions. The Final Terms and the Long-form Conditions shall be attached to each global note representing the Notes of the relevant Tranche.

Determination of Options / Completion of Placeholders

The Final Terms shall determine whether Option I or Option II shall be applicable to the individual issue of Notes. Each set of Terms and Conditions constituting Option I or Option II contains certain further options (characterised by indicating the respective optional provision through instructions and explanatory notes set out in square brackets within the text of the relevant set of Terms and Conditions as set out in this Prospectus) as well as placeholders (characterised by square brackets which include the relevant items) which shall be determined by the Final Terms as follows:

Determination of Options

The Issuer shall determine which options shall be applicable to the individual issue of Notes by either replicating the relevant provisions in the Final Terms or by making reference in the Final Terms to the relevant sections of the relevant set of Terms and Conditions. If the Final Terms do not replicate or make reference to an alternative or optional provision (as set out in the relevant set of Terms and Conditions) such provision shall be deemed to have been deleted from the Conditions.

Completion of Placeholders

The Final Terms shall specify the information completing the placeholders in the relevant set of Terms and Conditions. In case the provisions of the Final Terms and the relevant set of Terms and Conditions, taken together, shall constitute the Conditions the relevant set of Terms and Conditions shall be deemed to have been completed by the information contained in the Final Terms as if such information were inserted in the placeholders of such provisions.

In that case, all instructions and explanatory notes and text set out in square brackets in the relevant set of Terms and Conditions and any footnotes and explanatory text set out in the Final Terms shall be deemed to have been deleted from the Conditions.

Binding Language

The Terms and Conditions have been prepared in the German and the English language. The following shall apply with regard to the language in which the Conditions shall be prepared:

- In the case of Notes which shall be (i) publicly offered, in whole or in part, or (ii) initially distributed, in whole or in part, to non-qualified investors, German will be the binding language. If, in the event of such public offer or distribution to non-qualified investors, however, English is chosen as the binding language, a German language translation of the Conditions shall be either set out in the relevant Final Terms or be available from the principal offices of the Issuing Agent and the Issuer as specified at the back of this Prospectus.
- In other cases the Issuer shall elect either German or English to be the binding language.

Der Zinsbetrag wird berechnet, indem der Zinssatz auf die festgelegte Stückelung angewendet wird, dieser Betrag mit dem Zinstagequotienten (wie nachstehend definiert) multipliziert und das hieraus resultierende Ergebnis auf die nächste Untereinheit der festgelegten Währung gerundet wird, wobei eine halbe Untereinheit aufgerundet wird oder die Rundung ansonsten gemäß der anwendbaren Marktkonvention erfolgt.

([5]) *Calculation of Amount of Interest.* The Calculation Agent will, on or as soon as practicable after each date at which the relevant Rate of Interest is to be determined, calculate the amount of interest payable under the Notes in respect of the Specified Denomination for the relevant Interest Period. The amount of interest shall be calculated by applying the Rate of Interest to the Specified Denomination, multiplying such sum by the applicable Day Count Fraction (as defined below) and rounding the resulting figure to the nearest sub-unit of the Specified Currency, half of such sub-unit being rounded upwards or otherwise in accordance with applicable market convention.

3. Information about DAG

DAG is a stock corporation organized under the laws of the Federal Republic of Germany and registered at the commercial register of the Stuttgart district court under HRB 19360 with its executive offices at Mercedesstraße 137, 70327 Stuttgart, Federal Republic of Germany, telephone +49 (0)711-17-0. The legal name of DAG is Daimler AG.

It was incorporated on May 6, 1998 under the name DaimlerChrysler AG for an unlimited duration. On October 19, 2007, following the transfer of a majority interest in Chrysler, it changed its corporate name from DaimlerChrysler AG into Daimler AG.

Portfolio Changes

DAG further developed Daimler's business portfolio in 2014 and early 2015:

In March 2014, the Board of Management and the Supervisory Board of Daimler AG decided to exercise an option to sell the company's interest in Rolls-Royce Power Systems Holding (RRPSH) to Rolls-Royce Holdings plc. Daimler will remain a key supplier of heavy-duty and medium-duty diesel engines to Rolls-Royce Power Systems. Daimler also plans to further expand its business activities with engines and drive systems for professional non-bus and non-truck (off-highway) applications. The transaction generated proceeds of €2.4 billion for Daimler in the third quarter. In March 2014, Daimler AG and its Chinese partner Beijing Automotive Industry Corporation (BAIC) signed an agreement to increase production capacities at Beijing Benz Automotive Co., Ltd. (BBAC). This move will lead to a further expansion of Daimler's activities in China and will also strengthen Daimler's strategic partnership with BAIC. Around €4 billion is currently being invested at BBAC, with €1 billion earmarked for the expansion of local car and engine production capacity alone through 2015. The existing annual capacity at BBAC for production of the C-Class, E-Class and GLK will be more than doubled to over 200,000 units by the end of 2015. This figure also includes the GLA compact SUV, which BBAC will begin manufacturing in 2015. Daimler had already deepened its strategic partnership with BAIC in November 2013 with the acquisition of a 12% equity interest in BAIC Motor, the car division of the BAIC Group. BAIC Motor has been listed on the Hong Kong Stock Exchange since December 2014.

In April 2014, the umbrella company for the car2go, car2go black and moovel mobility services was renamed as moovel GmbH. In September 2014, moovel completely acquired Intelligent Apps GmbH, which offers the mytaxi service, and also took over the US mobility services provider RideScout LLC. With the acquisition of RideScout, moovel is strengthening its presence in the international mobility services market and accelerating its global development.

In April 2014, Daimler AG and Evonik Industries AG reorganized their electric mobility activities in Kamenz and Kirchheim unter Teck. Daimler has now acquired the shares of Li-Tec Battery GmbH previously held by Evonik (50.1%), as well as Evonik's stake in Deutsche ACCUmotive GmbH & Co. KG (10%). This makes it the sole shareholder in both. Daimler has decided to discontinue production of cells at Li-Tec at the end of 2015. Deutsche ACCUmotive will significantly expand its lithium-ion battery production capacity in Kamenz. Daimler will invest approximately €100 million in this expansion over the next few years.

Daimler laid the cornerstone in April 2014 for a new assembly plant to be operated by Daimler's Star Transmission subsidiary in Romania. This additional capacity in Sebes will supplement existing transmission activities at the Untertürkheim plant, where the new nine-speed 9G-TRONIC automatic transmission from Mercedes-Benz will go into production in 2016.

Within the cooperation between Daimler and Renault-Nissan the number of joint projects has increased fourfold, from three to 12, since the partnership commenced in 2010. An important milestone in 2014 was the market launch of the first vehicles fully co-developed from scratch: the new Renault Twingo and the new smart fortwo and forfour models. The smart fortwo is built at the smart plant in Hambach, France, while the

Renault Twingo and smart forfour are manufactured at the Renault plant in Novo Mesto, Slovenia. The Renault Twingo was launched in Europe in September 2014; the smart fortwo and smart forfour followed in November 2014. In June 2014, joint production of a two-liter, turbocharged fourcylinder gasoline engine began at a new plant in Tennessee in the United States. The engines, which are built at the Infiniti Decherd Powertrain facility, will initially be used in the Infiniti Q50 sports sedan for the European market and in the Mercedes-Benz C-Class. When fully ramped up, the new plant will have a production capacity of 250,000 units per year. Also in June 2014, Renault-Nissan and Daimler AG announced an agreement covering the development of premium compact cars and the joint production of vehicles in Mexico. A new 50:50 joint venture is responsible for building and operating a new manufacturing facility in Aguascalientes, Mexico. The new plant is being constructed at a site in the direct vicinity of an existing Nissan facility. After the production launch, the new plant will be ramped up to an annual capacity of 300,000 units. Production is scheduled to begin with Infiniti models in 2017. The plant will start manufacturing Mercedes-Benz brand vehicles in 2018. In the van segment, Daimler's Mitsubishi Fuso Truck and Bus Corporation (MFTBC) and Nissan Motor Co. Ltd. signed a contract in October 2014 covering the supply of finished commercial vans for export. Under the terms of the contract, Nissan is supplying its "NV350 Urvan" (gross vehicle weight (GVW): 3.5 metric tons) to Mitsubishi Fuso, which has been selling the model as the "Canter Van" in the Middle East since the end of 2014.

Daimler reorganized its cooperation with Tesla Motors Inc. in October 2014. Within the framework of this restructuring, Daimler terminated the share-price hedge initiated at the end of 2013 and sold Daimler's stake of approximately 4% in Tesla. The partnership and cooperation with Tesla does not require Daimler to have a financial interest in the company. The sale of Daimler's Tesla shares generated proceeds of approximately €0.6 billion, which will be used to strengthen business operations. Cooperation with Tesla will nevertheless remain an important part of Daimler's activities in the field of electric mobility in the future.

In October 2014, Mercedes-AMG and the motorcycle manufacturer MV Agusta S.p.A. signed a cooperation agreement that will create a long-term partnership. The two brands, which have long traditions and histories, will cooperate in the area of sales and marketing. After the agreement was approved by the responsible antitrust authorities, Mercedes-AMG GmbH acquired a 25% interest in MV Agusta S.p.A. in November 2014.

Principal Future Investments

Capital expenditure

In the context of Daimler's global growth strategy, Daimler wants to make good use of the opportunities presented by international automotive markets. This requires substantial investment in new products and new technologies as well as in the expansion of the worldwide production network. In 2014, Daimler therefore once again invested a very high amount of €4.8 billion in property, plant and equipment (2013: €5.0 billion). Daimler did not quite reach the investment volume that Daimler planned in 2013 and announced in the DAG Annual Report 2013. As of December 31, 2014, no material financial obligations exist in connection with future investment in property, plant and equipment.

In order to achieve its growth targets, Daimler will expand its product range in the coming years and develop additional production and distribution capacities. Daimler also wants to ensure that it can play a leading role in the far-reaching technological transformation of the automotive industry. For this purpose, Daimler will slightly increase the investment in property, plant and equipment in the year 2015. Above all, the Mercedes-Benz Cars and Daimler Trucks divisions will account for this increase, whereas Daimler expects a lower volume of capital expenditure at the Mercedes-Benz Vans division compared to 2014. In addition to capital expenditure, Daimler is developing its position in the emerging markets by means of targeted financial investments in its holdings. That includes the expansion of its car production capacities in China, together with its partner BAIC. At the Mercedes-Benz Cars division, the focus of capital expenditure will be on renewing and expanding its product range. The most important projects include the new E-Class family, additional versions of the C-Class and the new SUVs. Substantial investment is also planned for the modernization and expansion of Daimler's German production sites as competence centers, as well as for the

expansion of the international production network. Daimler Trucks will mainly invest in successor generations of existing products, the expansion and modernization of the plants and new global component projects in 2015. At Mercedes-Benz Vans, the focus will be on further developing the existing model range, expanding the sales-and-service organization and establishing production of the Sprinter in the United States. Key projects at Daimler Buses are advance expenditures for new models and product enhancements and a new bus plant in India.

Research and development

As Daimler had already announced in the DAG Annual Report 2013, it once again invested a very large amount of €5.7 billion in research and development work in 2014 (2013: €5.5 billion). Of that amount, €1.1 billion (2013: €1.3 billion) was capitalized as development costs, which amounts to a capitalization rate of 20% (2013: 23%). The amortization of capitalized research and development expenditure totaled €1.2 billion during 2014 (2013: €1.1 billion). With a rate of 4.4% (2013: 4.7%), the research and development expenditure also remained at a high level in comparison with revenue. Research in 2014 focused on new vehicle models, extremely fuel-efficient and environmentally friendly drive systems and new safety technologies.

With its research and development activities, Daimler's goal is to further strengthen its competitive position against the backdrop of upcoming technological challenges. Daimler wants to create competitive advantages above all by means of innovative solutions for low emissions and safe mobility – in the fields of autonomous driving or hybrid drive for example. In addition, Daimler intends to utilize the growth opportunities offered by worldwide automotive markets with new and attractive products. In order to achieve these goals, Daimler will significantly increase its expenditure for research and development in 2015. Key projects at Mercedes-Benz Cars include the successor generation of the E-Class and the new SUVs. In addition, Daimler will invest considerable amounts in new low-emission and fuel efficient engines, alternative drive systems and innovative safety technologies. Research and development spending is likely to rise also at Daimler Trucks in 2015. As in 2014, the main areas here are the successor generations for existing products as well as developing and adapting new engine generations with which Daimler will further reduce fuel consumption and fulfil increasingly strict emission regulations. Also at Mercedes-Benz Vans and Daimler Buses, an important area of research and development is to meet future emission standards and to increase fuel efficiency. At Daimler Buses, alternative drive systems also play an important role and at Mercedes-Benz Vans the further development of engines.

Refinancing Measures

Daimler's refinancing measures are primarily determined by its financial services activities. For this purpose, Daimler makes use of a broad spectrum of various financing instruments in different currencies and markets. They include bank credits, commercial papers in the money market and bonds with medium and long maturities. Customer deposits at Mercedes-Benz Bank AG and the securitization of receivables from customers in the financial services business (asset backed securities, ABS) serve as additional sources of refinancing.

7. Board Practices

Audit Committee

The Audit Committee of DAG (the "**Audit Committee**") is composed of four members, who are elected by a majority of the votes cast on the relevant resolution of the Supervisory Board. The Chairman of the Supervisory Board is not simultaneously the Chairman of the Audit Committee

As independent members of the Audit Committee, both the Chairman of the Audit Committee, Dr. Clemens Börsig, and Joe Kaeser have expertise in the field of financial reporting, as well as special knowledge and experience in the application of accounting principles and internal methods of control.

Current members of the Audit Committee are:

Dr. Clemens Börsig – Chairman
Michael Brecht*
Joe Kaeser
Dr. Sabine Maaßen*

* Representative of the employees

The Audit Committee deals with the supervision of the accounting process, risk management, the effectiveness of the internal control system and the internal auditing system, the annual external audit and compliance. At least once a year, it discusses with the Board of Management and the external auditors the effectiveness, functionality and appropriateness of the internal monitoring systems and the risk management system. Also at least once a year, it discusses with the Board of Management the effectiveness and appropriateness of the internal auditing system and compliance management. Furthermore, it regularly receives reports on the work of the Internal Auditing department and the compliance organization. At least four times a year, the Audit Committee receives a report from the Business Practices Office, which has been established to deal with complaints and information about any breaches of guidelines, criminal offences or dubious accounting, financial reporting or auditing. It regularly receives information about dealing with these complaints and information.

The Audit Committee discusses with the Board of Management the interim reports on the first quarter, first half and first nine months of the year before these are published. On the basis of the report of the external auditors, the Audit Committee reviews the annual company financial statements and the annual consolidated financial statements, as well as the management report of DAG and the Group, and discusses them with the external auditors. The responsible auditor at KPMG, the company of auditors commissioned to carry out the external audit, is Dr. Axel Thümler. The Audit Committee makes a proposal to the Supervisory Board on the adoption of the annual non-consolidated financial statements of DAG, on the approval of the annual consolidated financial statements and the appropriation of profits. The Audit Committee also makes recommendations for the proposal on the election of external auditors, assesses those auditors' suitability and independence, and, after the external auditors are elected by the annual shareholders' meeting (*Hauptversammlung*), it commissions them to conduct the annual audit of the company and the consolidated

financial statements and to review the interim reports, negotiates an audit fee and determines the focus of the annual audit. The external auditors report to the Audit Committee on all accounting matters that might be regarded as critical and on any material weaknesses of the internal monitoring and risk management system with regard to accounting.

Finally, the Audit Committee approves services that are not directly related to the annual audit provided by the firm of external auditors or its affiliates to DAG or to companies of the Group.

Corporate Governance

Declaration by the Board of Management and Supervisory Board of DAG pursuant to Section 161 of the German Stock Corporation Act (*Aktiengesetz*) regarding the German Corporate Governance Code (the "Code")

DAG satisfies the recommendations of the German Corporate Governance Code Commission in the [Code] version dated June 24, 2014, since their publication by the Federal Ministry of Justice in the official section of the Federal Gazette on September 30, 2014 with the exception of Clause 3.8 Paragraph 3 (D & O insurance deductible for the Supervisory Board) and one deviation from Clause 5.4.1 Paragraph 2 (concrete objectives for the composition of the Supervisory Board), which was declared as a precautionary measure, and will continue to observe the recommendations with the aforesaid deviations. Since the issuance of the last compliance declaration in December 2013, DAG has observed the recommendations of the German Corporate Governance Code in the version dated May 13, 2013 with the aforementioned exceptions and the deviation from Clause 4.2.3 Paragraph 2 sentence 6 (upper limits for the remuneration of the members of the Board of Management and its variable remuneration components) declared as a precautionary measure in the last compliance declaration for the period until December 31, 2013.

D & O insurance deductible for the Supervisory Board (Clause 3.8 Paragraph 3):

As in previous years, the Directors' & Officers' liability insurance (D & O insurance) also contains a provision for a deductible for the members of the Supervisory Board, which is appropriate in the view of DAG. However, this deductible does not correspond to the legally required deductible for members of the Board of Management in the amount of at least 10% of the damage up to at least one and a half of the fixed annual remuneration. Since the remuneration structure of the Supervisory Board is limited to fixed remuneration without performance bonus components, setting a deductible for Supervisory Board members in the amount of 1.5 times the fixed annual remuneration would have a disproportionate economic impact when compared with the members of the Board of Management, whose compensation consists of fixed and performance bonus components.

Specific objectives for the composition of the Supervisory Board (Clause 5.4.1 Paragraph 2).

The Supervisory Board has limited its target objective for its composition regarding the number of independent members of the Supervisory Board and consideration of potential conflicts of interest in its composition to the appointments for the shareholders' side in the light of the German Co-Determination Act (*Mitbestimmungsgesetz*) and due to the lack of influence on the appointments for the employee side.

The deviation from clause 4.2.3 Paragraph 2 sentence 6, which was declared as a precautionary measure in the compliance declaration of December 2013, (maximum amounts for the overall remuneration and variable remuneration components of the Board of Management) ceased to apply effective from January 1, 2014, when the members of the Board of Management approved the inclusion of the upper limits recommended in Clause 4.2.3 Paragraph 2 sentence 6 of the Code in their current service agreements.

9. Financial Information Concerning DAG's Assets and Liabilities, Financial Position and Profit and Losses

Historical Financial Information

The Annual Consolidated Financial Statements 2014 of DAG as set out in the DAG Annual Report 2014, the Annual Consolidated Financial Statements 2013 of DAG as set out in the DAG Annual Report 2013 and the Unaudited Interim Consolidated Financial Statements of DAG as set out in the Q1 2015 Interim Report are incorporated by reference into this Prospectus.

Legal and Arbitration Proceedings

Save as stated below, DAG has not been involved in any governmental, legal or arbitration proceedings in the twelve months preceding the date of this Prospectus, which are likely to have, or have had in the recent past, significant effects on DAG's financial position or profitability.

Various legal proceedings, claims and governmental investigations (legal proceedings) are pending against Daimler AG and its subsidiaries on a wide range of topics, including vehicle safety, emissions, fuel economy, financial services, dealer, supplier and other contractual relationships, intellectual property rights, product warranties, environmental matters, antitrust matters and shareholder matters. Legal proceedings relating to products deal with claims on account of alleged vehicle defects. Some of these claims are asserted by way of class action suits. Adverse decisions in one or more of these proceedings could require Daimler to pay substantial compensatory and punitive damages or undertake service actions, recall campaigns or other costly actions.

In mid-January 2011, the European Commission carried out antitrust investigations of European commercial vehicle manufacturers, including Daimler AG. If antitrust infringements are discovered, the European Commission can impose considerable fines depending on the gravity of the infringement. In November 2014, the European Commission served Daimler with its statement of objections which, from the European Commission's perspective, further explains and legally evaluates the relevant facts. Resulting from knowledge gained from access to essential documents of the European Commission's file, Daimler AG, in December 2014, decided to increase provisions by €600 million. Daimler is taking the Commission's initial suspicion very seriously and is also – parallel to the Commission's investigations – carrying out its own extensive internal investigation to clarify the underlying circumstances. The company is cooperating with the authorities but will at the same time – while stating the company's legal view – safeguard its rights in the further proceedings and is also reviewing all of its procedural options. In accordance with IAS 37.92, the

Group does not provide further information on this antitrust investigation and the associated risk for the Group, especially with regard to the measures taken in this context, in order not to impair the outcome of the proceeding.

The Federal Republic of Germany initiated arbitration proceedings against Daimler Financial Services AG, Deutsche Telekom AG and Toll Collect GbR and submitted its statement of claims in August 2005. It seeks damages, contractual penalties and the transfer of intellectual property rights to Toll Collect GmbH. In particular, the Federal Republic of Germany is claiming

- lost revenue of €3.33 billion for the period September 1, 2003 through December 31, 2004 plus interest at 5% *per annum* above the respective base rate since submission of claims (an amount of €2 billion as at the date of September 29, 2014);
- and contractual penalties of approximately €1.65 billion through July 31, 2005 plus interest at 5% *per annum* above the respective base rate since submission of claims (an amount of €225 million as at the date of September 29, 2014);
- plus refinancing costs of €196 million.

Since, among other things, some of the contractual penalties are dependent on time and further claims for contractual penalties have been asserted by the Federal Republic of Germany, the amount claimed as contractual penalties may increase. Defendants submitted their response to the statement of claims on June 30, 2006. The Federal Republic of Germany delivered its reply to the arbitrators on February 15, 2007, and the defendants delivered their rebuttal on October 1, 2007 (see also note 30 (*Financial guarantees, contingent liabilities and other financial obligations*) of the notes to the Annual Consolidated Financial Statements 2014 of DAG incorporated by reference into this Prospectus). The arbitrators held the first hearing on June 16 and 17, 2008. Additional briefs from the claimant and the defendants have been filed since then. A hearing of witnesses and experts took place between December 6 and 14, 2010. The parties submitted further written statements on July 15 and November 15, 2011. After the Tribunal's President resigned for personal reasons as of March 30, 2012, the new President was determined by the Administrative Court in Berlin as of October 29, 2012. The arbitrators held further hearings in May and October 2014. In accordance with IAS 37.92, no further information is disclosed regarding the arbitration proceedings and the related risks to the company, in particular regarding the measures taken by the company, in order to prevent negative effects on the proceedings. Daimler believes the claims of the Federal Republic of Germany are without merit and will continue to defend itself vigorously.

Significant Change in Daimler's Financial or Trading Position

10. Additional Information

Share Capital

DAG's capital stock consists of ordinary shares without par value (*Stückaktien*). The ordinary shares are issued in registered form. Under DAG's Articles of Incorporation, each ordinary share represents one vote. Major shareholders do not have different voting rights.

As of April 30, 2015, the share capital of DAG amounted to approximately € 3,069.67 million divided in 1,069,837,447 registered ordinary shares of no par value. Each share represents a nominal value of approximately €2.87 of capital stock. The shares are fully paid.

11. Material Contracts

There are no material contracts that have been entered into in the ordinary course of DAG's business, which could result in any Group member being under an obligation or entitlement that is material to DAG's ability to meet its obligation to Holders in respect of the Notes to be issued under the Programme.

12. Ratings

DAG has received the following short-term and long-term ratings from DBRS Limited ("**DBRS**"), Fitch Ratings Ltd. ("**Fitch**"), Moody's Deutschland GmbH ("**Moody's**") and Standard & Poor's Credit Market Services Europe Limited ("**Standard & Poor's**").

Short-term ratings:

DBRS: R-1 (low)

Fitch: F-2

Moody's: P-2

Standard & Poor's: A-2

Long-term ratings:

DBRS: A (low); outlook stable

Fitch: A-; outlook stable

Moody's: A3; outlook positive

Standard & Poor's: A-; outlook stable

For the purposes of **DBRS** ratings, an **R-1 (low) rating** means good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable. An **A** rating means good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than AA. May be vulnerable to future events, but qualifying negative factors are considered manageable. All long-term rating categories other than AAA and D also contain subcategories "(high)" and "(low)". The absence of either a "(high)" or "(low)" designation indicates the rating is in the middle of the category. Rating trends provide guidance in respect of DBRS's opinion regarding the outlook for the rating in question, with rating trends falling into one of three categories - "Positive", "Stable" or "Negative". The rating trend indicates the direction in which DBRS considers the rating is headed should present tendencies continue, or in some cases, unless challenges are addressed. In general, the DBRS view is based primarily on an evaluation of the entity itself, but may also include consideration of the outlook for the industry or industries in which the entity operates.

For the purposes of **Fitch** ratings, an **F-2** rating means good intrinsic capacity for timely payment of financial commitments. An **A** rating denotes expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings. The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Rating outlooks indicate the direction a rating is likely to move over a one- to two-year period. They reflect financial or other trends that have not yet reached the level that would trigger a rating action, but which may do so if such trends continue.

For the purposes of **Moody's** ratings, a **P-2** rating means that an issuer has a strong ability to repay short-term debt obligations. An **A** rating means that an obligation is judged to be upper-medium grade and is

subject to low credit risk. Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from Aa through Caa. The modifier 3 indicates a ranking in the lower end of that generic rating category. A Moody's rating outlook is an opinion regarding the likely direction of an issuer's rating over the medium term. Where assigned, rating outlooks fall into the following four categories: Positive, Negative, Stable, and Developing.

For the purposes of **Standard & Poor's** ratings, an **A-2** rating means that an obligor has satisfactory capacity to meet its financial commitments. However, it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in the highest rating category. An **A** rating means that an obligor has strong capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong. The ratings from "AA" to "CCC" may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories. A Standard & Poor's rating outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future CreditWatch action. Stable means that a rating is not likely to change.

In case Notes to be issued by DAG under the Programme will be rated such ratings and, in case of Notes other than Wholesale Notes, any explanations of the meanings of such ratings published by the rating agencies will be set out in the relevant Final Terms.

TAXATION

The following is a general discussion of certain tax consequences under the tax laws of the Federal Republic of Germany, the Commonwealth of Australia, The Netherlands, Japan, Canada, Turkey and the Grand-Duchy of Luxembourg, and of the acquisition and ownership of Notes. This discussion does not purport to be a comprehensive description of all tax considerations which may be relevant to a decision to purchase Notes. In particular, this discussion does not consider any specific facts or circumstances that may apply to a particular purchaser. This general discussion is based on the laws of the Federal Republic of Germany, the Commonwealth of Australia, The Netherlands, Japan, Canada, Turkey and the Grand-Duchy of Luxembourg, currently in force and as applied on the date of this Prospectus, which are subject to change, possibly with retroactive or retrospective effect.

PROSPECTIVE PURCHASERS OF NOTES ARE ADVISED TO CONSULT THEIR OWN TAX ADVISORS AS TO THE TAX CONSEQUENCES OF THE PURCHASE, OWNERSHIP AND DISPOSITION OF NOTES, INCLUDING THE EFFECT OF ANY STATE OR LOCAL TAXES UNDER THE TAX LAWS APPLICABLE IN THE FEDERAL REPUBLIC OF GERMANY, THE COMMONWEALTH OF AUSTRALIA, THE NETHERLANDS, JAPAN, CANADA, TURKEY, THE GRAND-DUCHY OF LUXEMBOURG AND EACH COUNTRY OF WHICH THEY ARE RESIDENTS.

Federal Republic of Germany

The information provided below does not purport to be a complete, exhaustive or final summary of the tax law and practice currently applicable in Germany. In particular, it does not take into account the specific circumstances that may be relevant for particular purchases. Investors or other interested parties are required to obtain individual tax advice in connection with the acquisition and holding, as well as the sale or repayment of Notes. Tax laws are subject to change, possibly with retroactive or retrospective effect.

a) German Tax Residents

The following paragraphs apply to persons who are tax resident in Germany, *i.e.* persons whose residence, habitual abode, statutory seat, or place of effective management and control is located in Germany.

aa) Taxation of interest income and capital gains

- Notes held as private assets

Private income derived from capital investments (*Einkünfte aus Kapitalvermögen*) is subject to the flat tax regime (*Abgeltungsteuer*). Such income from capital investments includes, *inter alia*, any interest received and capital gains from the disposal, redemption, repayment or assignment of Notes irrespective of a holding period. The taxable capital gain is the difference between the proceeds from the disposition, redemption, repayment or assignment on one hand and the acquisition costs and directly related disposal costs on the other hand. If similar Notes kept or administered in the same custodial account have been acquired at different points in time, the Notes first acquired will be deemed to have been sold first for the purposes of determining the capital gains. Where Notes are acquired and/or sold in a currency other than Euro, the disposal proceeds and the acquisition costs each will be converted into Euro using the exchange rates as at the relevant dates, so that currency gains and losses will also be taken into account in determining taxable income. If interest claims are disposed of separately (*i.e.* without the Notes), the proceeds from the disposition are subject to taxation. The same applies to proceeds from the payment of interest claims if the Notes have been disposed of separately.

Related expenses (*Werbungskosten*) other than transaction costs are not tax deductible, however, an annual tax allowance (*Sparer-Pauschbetrag*) of up to Euro 801 is granted in relation to all income from capital investments in a given year (up to Euro 1,602 for married couples and for partners in accordance with the registered partnership law (*Gesetz über die Eingetragene Lebenspartnerschaft*) filing a joint tax return).

Accrued interest paid separately upon the acquisition of Notes or other securities may give rise to negative income from capital investments. Such negative income and losses from capital investments can only be set off against positive income from capital investments. Any losses not offset in a given year are carried forward to future years and can be deducted from income from capital investments.

Pursuant to a tax decree issued by the German Federal Ministry of Finance dated October 9, 2012 a bad debt-loss (*Forderungsausfall*) and a waiver of a receivable (*Forderungsverzicht*), to the extent the waiver does not qualify as a hidden capital contribution, shall not be treated like a disposal. Accordingly, losses suffered upon such bad debt-loss or waiver shall not be tax-deductible. The same rules should be applicable according to the said tax decree, if the Notes expire worthless so that losses may not be tax-deductible at all. A disposal of the Notes will only be recognised according to the view of the tax authorities, if the received proceeds exceed the respective transaction costs.

Income from capital investments is generally subject to German income tax at a special tax rate of 25% (plus a solidarity surcharge (*Solidaritätszuschlag*) at a rate of 5.5% thereon, arriving at a tax rate of 26.375%) plus, as the case may be, church tax. Subject to certain requirements and restrictions, foreign withholding taxes levied on income from capital investments in a given year may be credited against the income tax liability of the Holder.

As a rule, the flat tax is generally imposed by way of withholding (*Kapitalertragsteuer*) as described below under the section "*Withholding Tax*". The withheld tax generally settles the income tax liability of the Holder. To the extent that no withholding tax has been withheld (for example in cases where the Notes were kept in custody abroad), the relevant income has to be declared in the tax return of the Holder and income tax is generally assessed on the gross income from capital investments at the special tax rate of 26.375% (including solidarity surcharge, plus church tax, if applicable). An assessment may also be applied for in order to set off losses, to credit foreign withholding taxes or to take advantage of the annual tax allowance if this was not done within the withholding process. An assessment may further be applied for, if a taxation of all income from capital investments in a given year at the progressive rates applicable for the Holder would lead to a lower tax liability as under the flat tax regime with the result that any amounts over withheld being refunded (so-called favourableness test – *Günstigerprüfung*). However, a deduction of related costs on an itemized basis is not permitted.

Where the income from the Notes qualifies as income from letting and leasing of property, the flat tax regime is not applicable. The Holder will have to report income and related expenses in his tax return and the balance will be taxed at the applicable progressive tax rate of up to 45% plus solidarity surcharge of 5.5% thereon and, if applicable, church tax. Subject to sufficient documentation withholding tax withheld is credited against the income tax liability of the Holder.

- Notes held as business assets

Where Notes are held as business assets, any income derived therefrom (interest payments and capital gains) is taxed as income from agriculture or forestry, trade or business income or as income from a self-employed activity (*selbständige Arbeit*), as the case may be. The taxable income has to be calculated generally under consideration of interest accrued. The flat tax regime is not applicable. Any withholding tax is credited against the assessed income tax or corporate income tax liability, as the case may be.

In the event that Notes are held by an individual, the income is subject to income tax at the progressive tax rates of up to 45% (plus solidarity surcharge of 5.5% thereon and plus, as the case may be, church tax). In addition, the income – to the extent it is income from a trade or business – is subject to trade tax (trade tax rates ranging from 7 to approx. 17% depending on the trade tax multiplier of the municipality concerned). Trade tax may in principle be (partially) credited against the income tax liability of the Holder by way of a lump sum procedure.

If the Holder of Notes is a corporation, the income is subject to corporate income tax of 15% plus solidarity surcharge of 5.5% thereon and trade tax at the above mentioned rates.

If Notes are held by a partnership, the income derived therefrom is allocated to the partners. Depending on if they are individuals or corporations, the income is subject to income tax or to corporate income tax at the level of the partners. The income – to the extent it is income from a trade or business – is further subject to trade tax at the above rates at the level of the partnership. In case of a partner who is an individual, the trade tax may in principle (partially) be credited against his income tax liability by way of a lump sum procedure.

bb) Withholding Tax

Withholding tax, if applicable, is levied at a rate of 25% (plus solidarity surcharge of 5.5% thereon). A German branch of a German or non-German bank or financial services institution, a German securities trading bank and a German securities trading company (each a "**German Disbursing Agent**") is in principle obliged to withhold withholding tax and pay it to the German tax authorities for the account of the Holder of the Notes, provided that the Notes are kept or administrated in a custodial account with the German Disbursing Agent. A German resident Issuer may be obliged to deduct and withhold withholding tax where (i) no German bank or German financial services institution is the disbursing agent and where additionally (ii) the Issuer holds Notes in custody, administers them or effects a sale of the Notes and pays or credits the relevant amounts of interest or sales proceeds.

For individual Holders which are subject to church tax an electronic information system for church withholding tax purposes applies in relation to income derived from capital investments, with the effect that also church tax will be collected by the German Disbursing Agent by way of withholding unless the investor has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*) in which case the investor will be assessed to church tax.

Withholding tax will be levied on the gross income from capital investments. To the extent the Notes have not been kept in a custodial account with the German Disbursing Agent since the time of acquisition, upon the disposal, redemption, repayment or assignment, the withholding tax rate is applied to 30% of the disposal proceeds plus interest accrued on the Notes, if any (substitute assessment base – *Ersatzbemessungsgrundlage*), unless the Holder of the Notes provides evidence of the actual acquisition cost by submitting a certificate of the previous German Disbursing Agent or a foreign bank or financial services institution within the European Economic Area or certain other countries in accordance with art. 17 para. 2 of the Council Directive 2003/48/EC on the taxation of savings income (the "**European Union Savings Directive**") (e.g. Switzerland or Andorra).

For private Noteholders the German Disbursing Agent, when computing the withholding tax, will take into account accrued interest on the Notes or other securities paid separately upon the acquisition of the respective security, credit foreign withholding taxes levied on investment income in a given year and, according to a specific procedure, settle losses from the disposal of capital investments (other than stocks (*Aktien*)) entered into through or with the same German Disbursing Agent. If, in this context, losses cannot be offset in full against positive income from capital investments, the German Disbursing Agent, will upon request issue a certificate stating the losses in order for them to be offset or carried forward in the assessment procedure. The request must reach the German Disbursing Agent by December 15 of the current year and is irrevocable.

In general, no withholding tax will be levied if the private Holder of the Notes files an exemption certificate (*Freistellungsauftrag*) with the German Disbursing Agent, but only to the extent the income derived from the Notes together with other income from capital investments does not exceed the exemption amount shown on the withholding exemption certificate. Similarly, no withholding tax will be deducted if a Holder of Notes has submitted to the German Disbursing Agent a certificate of non-assessment (*Nichtveranlagungsbescheinigung*) issued by the relevant local tax office.

If Notes are held as private assets and the income derived therefrom is not allocable to income from the letting and leasing of certain property, the income tax liability of the Holder is, in principle, settled by the tax withheld. A tax assessment may be applied for in the cases outlined above under section "*Notes held as private assets*". In assessment cases and in cases where the Notes are held as a business assets or are

allocable to other types of income, the withholding tax is credited against the income tax or corporate income tax liability of the Holder of the Notes, or is refunded.

Capital gains from the disposal of Notes derived by a private law corporation that is subject to German residents taxation are not subject to German withholding tax. The same applies for capital gains allocated to a domestic business, provided the sole proprietor declares this to be so to the German Disbursing Agent on the officially required standard form. However, ongoing payments, such as interest payments, are subject to withholding tax (irrespective of any deductions of foreign tax and capital losses incurred).

b) Non-German Tax Residents

aa) Taxation of interest income and capital gains

Income from capital investments (including interest and capital gains) is not subject to German taxation, unless (i) the Notes form part of the business assets of a permanent establishment, including a permanent representative, or a fixed base maintained in Germany by the Holder of the Notes; or (ii) the income otherwise constitutes German-source income. In cases (i) and (ii) a regime similar to that described above in the section entitled "*German Tax Residents*" applies.

bb) Withholding Tax

Non-residents of Germany are, in general, not subject to German withholding tax on interest payments and capital gains from the Notes. However, where income is subject to German taxation as set forth in the preceding paragraph and Notes are held or administrated in a custodial account with a German Disbursing Agent, withholding tax is levied as described above in the section entitled "*German Tax Residents*". The withholding tax may be refunded based on an assessment to tax or under an applicable tax treaty.

c) Inheritance and Gift Tax

No inheritance or gift taxes with respect to any Note will arise under the laws of Germany, if, in the case of an inheritance *mortis causa*, neither the decedent nor the beneficiary, or, in the case of an endowment *intra vivos*, neither the donor nor the donee, has its residence or habitual abode or, as the case may be, its place of management or seat in Germany and such Notes are not attributable to a German trade or business for which a permanent establishment is maintained, or a permanent representative has been appointed, in Germany. Exceptions from this rule apply, for example to certain German citizens who previously maintained a residence in Germany.

Inheritance or gift tax may apply *inter alia* – without any transfer – in intervals of 30 years, if the Notes are held by a qualifying family foundation (*Stiftung*) or a family association (*Verein*) having its statutory seat or place of management in Germany.

d) Other Taxes

No stamp, issue, registration or similar taxes or duties will be payable in Germany in connection with the issuance, delivery or execution of the Notes. Currently, net assets tax (*Vermögensteuer*) is not levied in Germany.

The European Commission and certain member states (including Germany) are currently intending to introduce a financial transactions tax ("**FTT**") (presumably on secondary market transactions involving at least one financial intermediary). It is currently uncertain when the proposed FTT will be enacted by the participating member states and when the FTT will enter into force with regard to dealings with the Notes.

For details see the section entitled "*The Proposed Financial Transactions Tax (FTT)*" below.

e) European Union Savings Directive

By legislative regulations dated January 26, 2004 the German Federal Government enacted provisions implementing the information exchange on the basis of the European Union Savings Directive into German law. These provisions apply from July 1, 2005.

Commonwealth of Australia

The following is a summary of the taxation treatment under the Income Tax Assessment Acts of 1936 and 1997 of Australia (together, the "**Australian Tax Act**") and any relevant regulations, rulings or judicial or administrative pronouncements, at the date of this Prospectus, of payments of interest (as defined in the Australian Tax Act) on the Notes to be issued by MBAP under the Programme and certain other matters.

This summary is not exhaustive and, in particular, does not deal with the position of certain classes of Holders of the Notes (including dealers in securities, custodians or other third parties who hold the Notes on behalf of other persons and Holders who otherwise hold Notes on revenue account). Prospective Holders should also be aware that particular terms of issue of any series of Notes may affect the tax treatment of that series of Notes.

The following is a general guide and should be treated with appropriate caution and should not be construed as legal or tax advice to any particular Holder. Prospective Holders should consult their professional advisers on the tax implications of an investment in the Notes for their particular circumstances.

1. Interest Withholding Tax

MBAP

Interest withholding tax ("**IWT**") is payable at a rate of 10% of the gross amount of interest paid by MBAP to a non-Australian resident (other than a non-Australian resident holding his/her Notes in the course of carrying on a business at or through a permanent establishment in Australia) or an Australian resident holding his/her Notes in the course of carrying on a business at or through a permanent establishment outside Australia unless an exemption is available. For these purposes, interest is defined in section 128A(1AB) of the Australian Tax Act to include amounts in the nature of, or in substitution for, interest and certain other amounts.

An exemption from IWT is available, under section 128F of the Australian Tax Act in respect of the Notes issued by MBAP if the following conditions are met:

- (a) MBAP is either a resident of Australia or a non-resident carrying on business at or through a permanent establishment in Australia when it issues those Notes and when interest is paid;
- (b) the Notes are "debentures" (as defined for the purposes of section 128F) and are not "equity interests" for Australian income tax purposes;
- (c) those Notes are issued in a manner which satisfies the public offer test set out in section 128F(3) or section 128F(4). In relation to the Notes issued by MBAP, there are five principal methods of satisfying the public offer test, only one of which needs to be satisfied. The purpose of the public offer test is to ensure that lenders in capital markets are aware that MBAP is offering those Notes for issue. In summary, the five methods are:

offers to 10 or more unrelated financiers or securities dealers;

offers to 100 or more investors;

offers of listed Notes;

offers via publicly available information sources; and

offers to a dealer, manager or underwriter who offers to sell those Notes within 30 days by one of the preceding methods.

The issue of any of those Notes (whether in global form or otherwise) and the offering of interests in any of those Notes by one of these methods should satisfy the public offer tests and will be eligible for the exemption from IWT provided that:

- (d) MBAP does not know, or have reasonable grounds to suspect, at the time of issue, that those Notes or interests in those Notes were being, or would later be, acquired, directly or indirectly, by an "associate" of MBAP, except as permitted by section 128F(5) of the Australian Tax Act; and
- (e) at the time of the payment of interest, MBAP does not know, or have reasonable grounds to suspect, that the payee is an "associate" of MBAP, except as permitted by section 128F(6) of the Australian Tax Act.

Associates

An "associate" of MBAP for the purposes of section 128F of the Australian Tax Act includes, when MBAP is not a trustee, (i) a person or entity which holds 50% or more of the voting shares in, or otherwise controls, MBAP, (ii) any entity in which more than 50% of the voting shares are held by, or which is otherwise controlled by, MBAP, (iii) a trustee of a trust where MBAP is capable of benefiting (whether directly or indirectly) under that trust, and (iv) a person or entity who is an "associate" of another person or company which is an "associate" of MBAP under any of the foregoing.

However, for the purpose of sections 128F(5) and (6) of the Australian Tax Act (see paragraphs (d) and (e) above) "associate" does not include:

- (A) an onshore associate (i.e. an Australian resident associate who does not hold the Notes in the course of carrying on business at or through a permanent establishment outside Australia, or a non-resident associate who holds the Notes in the course of carrying on business at or through a permanent establishment in Australia); or
- (B) an offshore associate (i.e. an Australian resident associate who holds the Notes in the course of carrying on business at or through a permanent establishment outside Australia, or a non-resident associate who does not hold the Notes in the course of carrying on business at or through a permanent establishment in Australia) who is acting in the capacity of:
 - (i) in the case of section 128F(5), a dealer, manager or underwriter in relation to the placement of the relevant Notes or a clearing house, custodian, funds manager or responsible entity of a registered managed investment scheme; or

in the case of section 128F(6), a clearing house, paying agent, custodian, funds manager or responsible entity of a registered managed investment scheme.

Compliance with section 128F of the Australian Tax Act

Unless otherwise specified in any relevant Final Terms (or another relevant supplement to this Prospectus), MBAP intends to issue the Notes in a manner which will satisfy the requirements of section 128F that are in effect on the date of the issue of the Notes. If Notes are issued which do not satisfy the requirements of section 128F, further information on the material Australian tax consequences of payments of interest and certain other amounts on those Notes will be specified in the relevant Final Terms (or another relevant supplement to this Prospectus).

Exemptions under tax treaties

The Australian government has signed or announced new or amended double tax conventions ("**New Treaties**") with a number of countries (each a "**Specified Country**") which contain certain exemptions from IWT.

In broad terms, once implemented the New Treaties effectively prevent IWT applying to interest derived by:

- the government of the relevant Specified Country and certain governmental authorities and agencies in the Specified Country; and
- a "financial institution" which is a resident of a "Specified Country" and which is unrelated to and dealing wholly independently with MBAP. The term "financial institution" refers to either a bank or any other form of enterprise which substantially derives its profits by carrying on a business of raising and providing finance. (However, interest under a back-to-back loan or an economically equivalent arrangement will not qualify for this exemption.)

The New Treaties are in force in a number of jurisdictions including, for example, the United States and the United Kingdom. The Australian government is progressively amending its double tax conventions to include this form of IWT exemption.

The Australian Federal Treasury maintains a listing of Australia's double tax conventions which provides details of country, status, withholding tax rate limits and Australian domestic implementation which is available to the public at the Federal Treasury's Department's website.

Issuers other than MBAP

So long as each Issuer other than MBAP continues to be a non-resident of Australia and does not carry on business at or through a permanent establishment in Australia, payment in respect of the Notes issued by them will not be subject to IWT.

Notes in bearer form - section 126 of the Australian Tax Act

Section 126 of the Australian Tax Act imposes a type of withholding tax on the payment of interest on the Notes if MBAP fails to disclose the names and addresses of the Holders of the Notes to the Australian Taxation Office ("**ATO**"). A withholding rate of 47 per cent. will apply temporarily in respect of payments of interest made from July 1, 2014 to June 30, 2017. Under current law, a withholding rate of 45 per cent. Will apply from July 1, 2017. Section 126 does not apply to the payment of interest on the Notes held by non-residents who do not carry on business at or through a permanent establishment in Australia where the issue of those Notes has satisfied the requirements of section 128F of the Australian Tax Act or IWT is payable. In addition, the ATO has confirmed that for the purpose of section 126 of the Australian Tax Act, the holder of debentures (such as the Notes) means the person in possession of the debentures. Section 126 is therefore limited in its application to persons in possession of the Notes who are residents of Australia or non-residents who are engaged in carrying on business in Australia at or through a permanent establishment in Australia. Where interests in the relevant Notes are held through Euroclear or CBL, MBAP intends to treat the operators of those clearing systems as the Holders of the Notes for the purposes of section 126.

Payment of additional amounts

As set out in more detail in the relevant Terms and Conditions of the Notes, and unless expressly provided to the contrary in the relevant Final Terms (or a relevant supplement to this Prospectus), if MBAP is at any time compelled or authorized by law to deduct or withhold an amount in respect of any Australian withholding taxes imposed or levied by the Commonwealth of Australia in respect of the Notes, MBAP must, subject to certain exceptions, pay such additional amounts as may be necessary in order to ensure that the net amounts received by the holders of those Notes after such deduction or withholding are equal to the respective

amounts which would have been received had no such deduction or withholding been required. If MBAP is required in relation to any Notes to pay such additional amounts, MBAP will have the option to redeem those Notes in accordance with the relevant Terms and Conditions.

Other Australian tax matters

Under Australian laws as presently in effect:

- (a) *income tax – offshore Holders* – assuming the requirements of section 128F of the Australian Tax Act are satisfied with respect to the Notes issued by MBAP, payment of principal and interest (as defined in section 128A(1AB) of the Australian Tax Act) to a holder of the Note, who is a non-resident of Australia and who, during the taxable year, does not hold the Notes in the course of carrying on business at or through a permanent establishment in Australia, will not be subject to Australian income taxes;
- (b) *income tax – Australian Holders* – Australian residents or non-Australian residents who hold the Notes in the course of carrying on business at or through a permanent establishment in Australia ("**Australian Holders**"), will generally be assessable for Australian tax purposes on income either received or accrued due to them in respect of the Notes (see also paragraph (l) below). Whether income will be recognized on a cash receipts or accruals basis will depend upon the tax status of the particular Holder of the Note and the terms and conditions of the Notes. Special rules apply to the taxation of Australian residents who hold the Notes in the course of carrying on business at or through a permanent establishment outside Australia which vary depending on the country in which that permanent establishment is located;
- (c) *gains on disposal or redemption of Notes – offshore Holders* – a Holder of the Notes, who is a non-Australian resident, will not be subject to Australian income tax on gains realized during that year on sale or redemption of Notes, provided:

if the non-Australian resident is not a resident of a country with which Australia has entered into a double tax treaty – such gains do not have an Australian source; or

if the non-Australian resident is a resident of a country with which Australia has entered into a double tax treaty – the non-Australian resident who is fully entitled to the benefits of the double tax treaty does not hold the Notes in the course of carrying on business at or through a permanent establishment in Australia.

A gain arising on the sale of the Notes by a non-Australian resident Holder to another non-Australian resident where the Notes are sold outside Australia and all negotiations are conducted, and documentation executed, outside Australia would not be regarded as having an Australian source;

- (d) *gains on disposal or redemption of Notes – Australian Holders* – Australian Holders will be required to include any gain or loss on disposal or redemption of the Notes in their taxable income. Special rules apply to the taxation of Australian residents who hold the Notes in the course of carrying on business at or through a permanent establishment outside Australia which vary depending on the country in which that permanent establishment is located;
- (e) *deemed interest* – there are specific rules that can apply to treat a portion of the purchase price of Notes as interest for IWT purposes when certain Notes originally issued at a discount or with a maturity premium or which do not pay interest at least annually are sold to an Australian resident (who does not acquire them in the course of carrying on trade or business at or through a permanent establishment outside Australia) or a non-resident who acquires them in the course of carrying on trade or business at or through a permanent establishment in Australia. These rules do not apply in circumstances where the deemed interest would have been exempt under section 128F of the Australian Tax Act if the Notes had been held to maturity by a non-resident;

- (f) *stamp duty and other taxes* – no ad valorem stamp, issue, registration or similar taxes are payable in Australia on the issue or the transfer of any Notes;
- (g) *supply withholding tax* – payments in respect of the Notes can be made free and clear of the "supply withholding tax" imposed under section 12-190 of Schedule 1 to the Taxation Administration Act 1953 of Australia ("**Taxation Administration Act**");
- (h) *goods and services tax ("GST")* – neither the issue nor receipt of the Notes will give rise to a liability for GST in Australia on the basis that the supply of Notes will comprise either an input taxed financial supply or (in the case of an offshore subscriber) a GST-free supply. Furthermore, neither the payment of principal or interest by MBAP, nor the disposal or redemption of the Notes, would give rise to any GST liability in Australia;
- (i) *additional withholdings from certain payments to non-residents* – section 12-315 of Schedule 1 to the Taxation Administration Act gives the Governor-General power to make regulations requiring withholding from certain payments to non-residents. However, section 12-315 expressly provides that the regulations will not apply to interest and other payments which are already subject to the current IWT rules or specifically exempt from those rules. Further, regulations may only be made if the responsible minister is satisfied the specified payments are of a kind that could reasonably relate to assessable income of foreign residents. The regulations promulgated prior to the date of this Prospectus are not relevant to any payments in respect of the Notes. Any further regulations should also not apply to repayments of principal under the Notes as in the absence of any issue discount, such amounts will generally not be reasonably related to assessable income. The possible application of any future regulations to the proceeds of any sale of Notes will need to be monitored;
- (j) *taxation of foreign exchange gains and losses* – divisions 775 and 960 of the Australian Tax Act contain rules to deal with the taxation consequences of foreign exchange transactions. The rules are complex and may apply to any Holders of Notes who are Australian residents or non-residents that hold Notes in the course of carrying on business at or through a permanent establishment in Australia, in respect of Notes that are not denominated in Australian dollars. Any such Holder should consult their professional advisors for advice as to how to tax account for any foreign exchange gains or losses arising from their holding of those Notes; and
- (k) *garnishee notices* - the ATO has the power to issue notices requiring any person who owes, or who may later owe, money to a taxpayer who has a tax-related liability, to pay to the ATO the money owed to the taxpayer. If MBAP or the Guarantor is served with such a notice in respect of a Holder, then MBAP or the Guarantor will comply with that notice.
- (l) *taxation of financial arrangements* - Division 230 of the Australian Tax Act contains tax timing rules for certain taxpayers to bring to account gains and losses from "financial arrangements". The taxation of financial arrangements regime does not contain any measure that would override the exemption from IWT available under section 128F of the Australian Tax Act in respect of interest payable on the Notes.

In addition, the rules do not apply to certain short term "financial arrangements" and to certain Holders, e.g. Holders which are individuals and certain other entities (e.g. certain managed investment schemes and certain entities involved in the management of provident, benefit, superannuation or retirement funds), unless they make an election that the rules apply to their "financial arrangements". Prospective Holders should seek their own tax advice regarding their own personal circumstances as to whether such an election should be made. Section 230-30(1) and the associated explanatory memorandum indicates that interest payments, which are exempt from IWT as a result of the exemption in section 128F, will not generally be subject to tax under Division 230.

The Netherlands

The following is a general summary of certain Netherlands tax consequences of the acquisition, holding and disposal of the Notes. This summary does not purport to describe all possible tax considerations or consequences that may be relevant to a holder or prospective Holder of Notes and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as trusts or similar arrangements) may be subject to special rules. In view of its general nature, it should be treated with corresponding caution. Holders or prospective Holders of Notes should consult with their tax advisors with regard to the tax consequences of investing in the Notes in their particular circumstances. The discussion below is included for general information purposes only.

Except as otherwise indicated, this summary only addresses Netherlands national tax legislation and published regulations, whereby The Netherlands means the part of the Kingdom of the Netherlands located in Europe, as in effect on the date hereof and as interpreted in published case law until this date, without prejudice to any amendment introduced at a later date and implemented with or without retroactive effect.

Please note that the summary does not describe The Netherlands tax consequences for:

- (i) Holders of Notes if such Holders, and in the case of individuals, his/her partner or certain of their relatives by blood or marriage in the direct line (including foster children), have a substantial interest or deemed substantial interest in the Issuer under The Netherlands Income Tax Act 2001 (in Dutch: "*Wet inkomstenbelasting 2001*"). Generally speaking, a holder of securities in a company is considered to hold a substantial interest in such company, if such holder alone or, in the case of individuals, together with his/her partner (as defined in The Netherlands Income Tax Act 2001), directly or indirectly, holds (i) an interest of 5% or more of the total issued and outstanding capital of that company or of 5% or more of the issued and outstanding capital of a certain class of shares of that company; or (ii) holds rights to acquire, directly or indirectly, such interest; or (iii) holds certain profit sharing rights in that company that relate to 5% or more of the company's annual profits and/or to 5% or more of the company's liquidation proceeds. A deemed substantial interest arises if a substantial interest (or part thereof) in a company has been disposed of, or is deemed to have been disposed of, on a non-recognition basis;
- (ii) pension funds, investment institutions (in Dutch: "*fiscale beleggingsinstellingen*"), exempt investment institutions (in Dutch: "*vrijgestelde beleggingsinstellingen*") (as defined in The Netherlands Corporate Income Tax Act 1969 (in Dutch: "*Wet op de vennootschapsbelasting 1969*")) and other entities that are exempt from Netherlands corporate income tax;
- (iii) Holders of Notes who are individuals for whom the Notes or any benefit derived from the Notes are a remuneration or deemed to be a remuneration for activities performed by such holders or certain individuals related to such holders (as defined in The Netherlands Income Tax Act 2001); and
- (iv) Holders of Notes if such Notes are or treated as (a) shares (in Dutch "*aandelen*"), (b) profit-sharing certificates (in Dutch: "*winstbewijzen*"), (c) debt characterized as equity for Netherlands tax purposes, or (d) redeemable in exchange for, convertible into or linked to shares or other equity instruments issued or to be issued by the Issuer or a related entity.

Withholding tax

All payments of principal or interest made by the Issuer under the Notes may be made free of withholding or deduction of, for or on account of any taxes of whatever nature imposed, levied, withheld or assessed by The Netherlands or any political subdivision or taxing authority thereof or therein.

Taxes on income and capital gains

Residents of The Netherlands

Generally speaking, if the Holder of the Notes is an entity that is a resident or deemed to be resident of The Netherlands for Netherlands corporate income tax purposes, any payment under the Notes or any gain or loss realised on the disposal or deemed disposal of the Notes is subject to Netherlands corporate income tax at a rate of 20% with respect to taxable profits up to € 200,000 and 25% with respect to taxable profits in excess of that amount.

If a Holder of the Notes is an individual, resident or deemed to be resident of The Netherlands for Netherlands income tax purposes any payment under the Notes or any gain or loss realised on the disposal or deemed disposal of the Notes is taxable at the progressive income tax rates (with a maximum of 52%), if:

- (i) the Notes are attributable to an enterprise from which the Holder of the Notes derives a share of the profit, whether as an entrepreneur or as a person who has a co-entitlement to the net worth (in Dutch: "*medegerechtigd tot het vermogen*") of such enterprise without being a shareholder (as defined in The Netherlands Income Tax Act 2001); or
- (ii) the Holder of the Notes is considered to perform activities with respect to the Notes that go beyond ordinary asset management (in Dutch: "*normaal, actief vermogensbeheer*") or derives benefits from the Notes that are taxable as benefits from other activities (in Dutch: "*resultaat uit overige werkzaamheden*").

If the above-mentioned conditions (i) and (ii) do not apply to the individual Holder of the Notes, such Holder will be taxed annually on a deemed income of 4% of his/her net investment assets for the year at an income tax rate of 30%. The net investment assets for the year are the fair market value of the investment assets less the allowable liabilities on January 1 of the relevant calendar year. The Notes are included as investment assets. A tax free allowance may be available. An actual gain or loss in respect of the Notes is not subject to Netherlands income tax.

Non-residents of The Netherlands

A Holder of Notes that is neither resident nor deemed to be resident of The Netherlands will not be subject to Netherlands taxes on income or capital gains in respect of any payment under the Notes or in respect of any gain or loss realised on the disposal or deemed disposal of the Notes, provided that:

- (i) such Holder does not have an interest in an enterprise or deemed enterprise (as defined in The Netherlands Income Tax Act 2001 and The Netherlands Corporate Income Tax Act 1969) which, in whole or in part, is either effectively managed in The Netherlands or carried on through a permanent establishment, a deemed permanent establishment or a permanent representative in The Netherlands and to which enterprise or part of an enterprise the Notes are attributable; and
- (ii) in the event the Holder is an individual, such Holder does not carry out any activities in The Netherlands with respect to the Notes that go beyond ordinary asset management and does not derive benefits from the Notes that are taxable as benefits from other activities in The Netherlands.

Gift and inheritance taxes

Residents of The Netherlands

Gift or inheritance taxes will arise in The Netherlands with respect to a transfer of the Notes by way of a gift by, or on the death of, a Holder of such Notes who is resident or deemed resident of The Netherlands at the time of the gift or his/her death.

Non-residents of The Netherlands

No Netherlands gift or inheritance taxes will arise on the transfer of Notes by way of gift by, or on the death of, a Holder of Notes who is neither resident nor deemed to be resident in The Netherlands, unless:

- (i) in the case of a gift of a Note by an individual who at the date of the gift was neither resident nor deemed to be resident in The Netherlands, such individual dies within 180 days after the date of the gift, while being resident or deemed to be resident in The Netherlands; or
- (ii) the transfer is otherwise construed as a gift or inheritance made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be resident in The Netherlands.

For purposes of Netherlands gift and inheritance taxes, among others, a person that holds The Netherlands nationality will be deemed to be resident in The Netherlands if such person has been resident in The Netherlands at any time during the ten years preceding the date of the gift or his/her death. Additionally, for purposes of Netherlands gift tax, among others, a person not holding The Netherlands nationality will be deemed to be resident in The Netherlands if such person has been resident in The Netherlands at any time during the twelve months preceding the date of the gift. Applicable tax treaties may override deemed residency.

Value added tax (VAT)

No Netherlands VAT will be payable by the Holders of the Notes on (i) any payment in consideration for the issue of the Notes or (ii) the payment of interest or principal by the Issuer under the Notes.

Other taxes and duties

No Netherlands registration tax, stamp duty or any other similar documentary tax or duty, other than court fees, will be payable by the Holders of the Notes in respect of (i) the issue of the Notes or (ii) to the payment of interest or principal by the Issuer under the Notes.

Japan

The discussion set forth below is included for general information only and may not be applicable depending upon a Holder's particular situation. Holders are urged to consult their own tax advisors with respect to the particular consequences to them of holding and disposing of Notes in light of their own particular foreign and other tax laws and possible effects of changes in Japanese tax laws.

Except in circumstances where any interest on the Notes issued by DAG, MBAP, DIF, DCFI, MBF or DFNA is attributable to a business in Japan conducted by such Issuer in the manner provided for in the Special Taxation Measures Law of Japan, the payment of principal and interest of the Notes issued by such Issuer to a non-resident of Japan or a non-Japanese corporation are, under Japanese tax laws currently in effect, not subject to any Japanese income tax or corporate tax, unless the recipient has a permanent establishment in Japan. If any interest of the Notes issued by DAG, MBAP, DIF, DCFI, MBF or DFNA is attributable to a business in Japan conducted by such Issuer as aforementioned, the following consequences relating to the Notes issued by MBI are also applicable to the Notes issued by DAG, MBAP, DIF, DCFI, MBF or DFNA.

Where the Issuer is MBI, payment of interest on the Notes to a resident of Japan or a Japanese corporation (except for a designated financial institution which has complied with the requirements under the Special Taxation Measures Law) or to an individual non-resident of Japan or a non-Japanese corporation that is a person having a special relationship with the Issuer as described in Article 6, paragraph 4 of the Special Taxation Measures Law (a "**Specially-related Person of the Issuer**") will be subject to deduction of Japanese income tax at a rate of 15% (from, and including, January 1, 2013 to, and including, December 31, 2037, at a rate of 15.315%) of the amount specified in sub-paragraphs (a) and (b) below, as applicable:

- (a) if interest is paid to an individual resident of Japan or a Japanese corporation or to an individual non-resident of Japan or a non-Japanese corporation that is a Specially-related Person of the Issuer (except as provided in sub-paragraph (b) below), the amount of such interest; or
- (b) if interest is paid to a public corporation, a financial institution or a financial instruments firm (which has complied with the Japanese tax exemption requirements) through its payment handling agent in Japan as described in Article 3-3, paragraph 6 of the Special Taxation Measures Law, the amount of such interest less the amount prescribed in the cabinet order relating to Article 3-3, paragraph 6 of the Special Taxation Measures Law.

Notwithstanding sub-paragraph (b) above, interest paid on or after January 1, 2016 to a public corporation, a financial institution or a financial instruments firm (which has complied with the Japanese tax exemption requirements) through its payment handling agent in Japan will not be subject to Japanese income tax.

Where the Issuer is MBI, payment of interest on the Notes outside Japan by MBI or the Paying Agent to a beneficial owner that is not an individual resident of Japan or a Japanese corporation for Japanese tax purposes (a "**non-resident holder**") will not be subject to Japanese withholding tax, provided that the beneficial owner is not a Specially-related Person of the Issuer and complies with procedures for establishing its status as a non-resident holder in accordance with the requirements of Japanese law. This exemption does not apply to the Notes if the amount of interest payable in relation to the Notes is linked to certain indexes as prescribed under the cabinet order relating to the Special Taxation Measures Law (such as profits, sales, etc.) of the Issuer or the Specially-related Person of the Issuer as provided under the Special Taxation Measures Law.

Under current Japanese practice, MBI and the Paying Agent may determine their withholding obligations in respect of Notes issued by MBI held through a qualified clearing organization in reliance on certifications received from such an organization, and need not obtain certifications from the ultimate beneficial owners of such Notes. As part of the procedures under which such certifications are given, a beneficial owner may be required to establish that it is a non-resident holder to the person or entity through which it holds the Notes issued by MBI. A non-resident holder that holds Notes issued by MBI otherwise than through a qualified clearing organization may be required to deliver a duly completed claim for exemption from Japanese withholding tax, and to provide documentation concerning its identity and residence, to the Paying Agent in order to receive interest from the Paying Agent free of Japanese withholding tax. MBI and the Paying Agent may adopt modified or supplemental certification procedures to the extent necessary to comply with changes in, or as otherwise permitted under, Japanese law or administrative practice.

Gains derived from the sale outside Japan of Notes by a non-resident of Japan or a non-Japanese corporation are in general not subject to Japanese income or corporation taxes. Japanese inheritance and gift taxes at progressive rates may be payable by an individual, wherever resident, who has acquired Notes as legatee, heir or donee. No stamp, issue, registration or similar taxes or duties will, under present Japanese law, be payable by Holders in connection with the issue of the Notes.

Canada

*The following summary is based upon the current provisions of the Income Tax Act (Canada) (the "**Tax Act**"), the current provisions of the regulations promulgated thereunder (the "**Regulations**"), as at the date hereof and counsel's understanding of the current administrative practices of the Canada Revenue Agency (the "**CRA**"). This summary takes into account all specific proposals to amend the Tax Act and the Regulations that have been publicly announced by, or on behalf of, the Minister of Finance (Canada) prior to the date hereof (the "**Tax Proposals**"), but does not otherwise take into account or anticipate any changes in law, whether by judicial, governmental or legislative decision or action, or changes in administrative practices of the CRA. No assurances can be given that the Tax Proposals will be enacted as proposed, if at all. This summary does not take into account the tax legislation of any province or territory of Canada or any non-Canadian jurisdiction.*

The following summary is of a general nature only and is not intended to be, nor should it be construed to be, legal or tax advice to any particular investor. This summary is not exhaustive of all Canadian federal income tax considerations. Accordingly, investors should consult their own tax advisors with respect to their particular circumstances, including the application and effect of the income and other taxes of any country, province, territory, state or local tax authority.

Interest paid or credited by DCFI, or deemed to be paid or credited on a Note issued by DCFI (including accrued interest in certain cases involving the assignment or transfer of a Note to a resident or deemed resident of Canada) to a Holder who is a non-resident of Canada (for purposes of Canadian federal income tax laws) will not be subject to Canadian non-resident withholding tax where:

- (a) DCFI deals at arm's length (for the purposes of Canadian federal income tax laws) with the non-resident Holder at the time of such payment, and
- (b) no portion of the interest is contingent or dependent on the use of, or production from property in Canada, or is computed by reference to revenue, profit, cash flow, commodity price or any other similar criterion or by reference to dividends paid or payable to shareholders of any class of shares of the capital stock of DCFI or any other corporation.

Canadian non-resident withholding tax at the rate of 25%, or such lower rate as may be provided for under the terms of any applicable bilateral tax treaty, will apply where the above conditions are not satisfied.

In the event that a Note is redeemed, cancelled or repurchased by DCFI, or purchased by any resident or deemed resident of Canada from a non-resident Holder, or otherwise assigned or transferred by a non-resident Holder to a resident or deemed resident of Canada for an amount which exceeds, generally, the issue price thereof, the difference between the price for which such Note is redeemed, cancelled, repurchased, purchased or otherwise assigned or transferred and the issue price may, in certain circumstances, be deemed to be interest. Canadian non-resident withholding tax will not be payable in respect of this amount where interest on the Note is otherwise exempt from Canadian non-resident withholding tax (as described above), and in certain other prescribed circumstances.

If DCFI or any other Canadian corporation were to assume the obligations of another Issuer of Notes, payments in respect of interest on such Notes may be subject to Canadian non-resident withholding tax.

Under the existing federal laws of Canada there are no other taxes on income or capital gains payable in respect of a Note, or interest, discount, or premium thereon, by a person who is neither a resident nor deemed to be a resident of Canada at any time during which the Note is held, except where such amount may reasonably be attributed to a business carried on or deemed to be carried on by the person in Canada or may reasonably be attributed to an insurance business carried on by the person in Canada and elsewhere.

Turkey

Prospective purchasers of Notes are advised to consult their tax advisers as to the consequences under the tax laws of the countries of their respective citizenship, residence or domicile, of a purchase of Notes, including, but not limited to, the consequences of receipt of payments under the Notes and their disposal or redemption.

The following discussion is a summary of certain Turkish tax considerations relating to an investment by a person who is a non-resident of Turkey in Notes of a Turkish company issued abroad. The discussion is based upon current law and is for general information only. The discussion below is not intended to constitute a complete analysis of all tax consequences relating to the acquisition, ownership or disposition of the Notes that may be relevant to a decision to make an investment in the Notes. Furthermore, the discussion only relates to the beneficial interest of a person in the Notes where the Notes will not be held in connection with the conduct of a trade or business through a permanent establishment in Turkey. Each investor should consult its own tax advisers concerning the tax considerations applicable to its particular situation. This discussion is based upon laws and relevant interpretations thereof in effect as at the date of this Prospectus,

all of which are subject to change, possibly with a retroactive effect. In addition, it does not describe any tax consequences: (a) arising under the laws of any taxing jurisdiction other than Turkey or (b) applicable to a resident of Turkey or a permanent establishment in Turkey resulting either from the existence of a fixed place of business or appointment of a permanent representative.

For Turkish tax purposes, a legal entity is a resident of Turkey if its corporate domicile is in Turkey or its effective place of management is in Turkey. A resident legal entity is subject to Turkish taxes on its worldwide income, whereas a non-resident legal entity is only liable for Turkish taxes on its commercial income made through a permanent establishment or on income otherwise sourced in Turkey.

An individual is a resident of Turkey if such individual has established domicile in Turkey or stays in Turkey more than six months in a calendar year. On the other hand, foreign individuals who stay in Turkey for six months or more for a specific job or business or particular purposes that are specified in the Turkish Income Tax Law may not be treated as a resident of Turkey, depending on the characteristics of their stay. A resident individual is liable for Turkish taxes on his or her worldwide income, whereas a non-resident individual is only liable for Turkish taxes on income sourced in Turkey.

Income from capital investment is sourced in Turkey when the principal is invested in Turkey. Capital gain is considered sourced in Turkey when the activity or transaction generating such income is performed or accounted for in Turkey. The term "accounted for" means that a payment is made in Turkey, or if the payment is made abroad, it is recorded in the books in Turkey or apportioned from the profits of the payer or the person on whose behalf the payment is made in Turkey.

Any withholding tax levied on income derived by a non-resident person is the final tax for the non-resident person and no further declaration is required. Any other income of a non-resident person sourced in Turkey that has not been subject to withholding tax will be subject to taxation through declaration where exemptions are reserved.

Interest paid on notes (such as the Notes) issued abroad by Turkish corporates is subject to withholding tax. Through the Decree No. 2009/14592 dated 12 January 2009, which has been amended by Decree No. 2010/1182 dated 20 December 2010 and Decree No. 2011/1854 dated 26 April 2011 (together, the "**Tax Decrees**"), the withholding tax rates are set according to the original maturity of notes issued abroad as follows:

10% withholding tax for notes with an original maturity of less than one year,

7% withholding tax for notes with an original maturity of at least one year and less than three years,

3% withholding tax for notes with an original maturity of at least three years and less than five years, and

0% withholding tax for notes with an original maturity of five years and more.

In general, capital gains are not taxed through withholding tax and therefore any capital gain sourced in Turkey with respect to the Notes may be subject to declaration. However, pursuant to Provisional Article 67 of the Turkish Income Tax Law, as amended by the Law numbered 6111, special or separate tax returns will not be submitted for capital gains from the notes of a Turkish corporate issued abroad when the capital gain is derived by a non-resident. Therefore, no withholding tax is levied on non-resident persons in respect of capital gains from the Notes and no declaration is required.

A non-resident holder will not be liable for Turkish estate, inheritance or similar tax with respect to its investment in the Notes, nor will it be liable for any Turkish stamp issue, registration or similar tax or duty relating thereto.

Reduced Withholding Tax Rates

Under current Turkish laws and regulations, interest payments on notes issued abroad by a Turkish corporate to a non-resident holder will be subject to a withholding tax at a rate between 10% and 0% in Turkey, as detailed above.

If a double taxation treaty is in effect between Turkey and the country of the holder of the notes, which provides for the application of a lower withholding tax rate than the local rate to be applied by the corporation, then the lower rate may be applicable. For the application of withholding at a reduced rate (or in case of tax exemption) that benefits from the provisions of a double tax treaty concluded between Turkey and the country where the investor is a resident, an original copy of the certificate of tax residency signed by the competent authority referred to in Article 3 of the Treaty is required, together with a translated copy translated by a translation office, to verify that the investor is subject to taxation over its worldwide gains in the relevant country on the basis of resident taxpayer status, as a resident of such country to the related tax office directly or through the banks and intermediary institutions prior to the application of withholding. In the event the certificate of tax residency is not delivered prior to the application of withholding tax, then upon the subsequent delivery of the certificate of tax residency, a refund of the excess tax shall be granted pursuant to the provisions of the relevant double taxation treaty and the Turkish tax legislation.

United States

This discussion does not discuss all aspects of United States federal income taxation that may be relevant to non-U.S. Holders (as defined below) in light of their particular circumstances or to non-U.S. Holders subject to special rules under the United States federal income tax laws, such as financial institutions, real estate investment trusts, insurance companies, dealers in securities, persons holding Notes in connection with a hedging, "straddle", integrated or conversion transaction, persons who own an interest in a partnership or other pass-through entity, former citizens or long-term residents of the United States or tax-exempt organizations.

The discussion below only addresses persons that are neither U.S. Holders nor partnerships ("**Non-U.S. Holders**"). The U.S. federal income tax treatment of a partner in a partnership that holds Notes will depend on the status of the partner and the activities of the partnership. Investors that are partnerships should consult their tax adviser concerning the U.S. federal income tax consequences to their partners of the acquisition, ownership and disposition of Notes by the partnership. As used herein, the term "**U.S. Holder**" means a beneficial owner of Notes that is (i) a citizen or resident of the United States for U.S. federal income tax purposes, (ii) a corporation, or other entity treated as a corporation, created or organized under the laws of the United States or any political subdivision thereof, (iii) an estate the income of which is subject to U.S. federal income tax without regard to its source or (iv) a trust if a court within the United States is able to exercise primary supervision over the administration of the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust, or the trust has elected to be treated as a domestic trust for U.S. federal income tax purposes.

This summary is based on the Internal Revenue Code of 1986, as amended (the "**Code**"), existing administrative pronouncements and judicial decisions, Treasury regulations currently in effect, and interpretations of the foregoing, changes to any of which subsequent to the date of this Prospectus may affect the tax consequences described herein, possibly with retroactive effect. Persons considering the purchase of Notes are advised to consult their own tax advisors with regard to the application of the United States federal income tax laws to their particular situations, as well as any tax consequences arising under the laws of any state, local or foreign taxing jurisdiction.

Subject to the discussion in the subsection below entitled "*United States Backup Withholding and Information Reporting*", DFNA expects that payments on Notes issued by DFNA (the "**U.S. Notes**") to a Non-U.S. Holder generally will not be subject to U.S. federal withholding tax, provided that, in the case of payments treated as interest for U.S. federal income tax purposes with respect to U.S. Notes with a maturity at issue of more than 183 days, the following conditions are satisfied:

- the amount of the payment is not determined by reference to any receipts, sales or other cash flow, income or profits, change in value of any property of, or dividend or similar payment made by DFNA, Daimler North America Corporation, DAG or any person related thereto (other than, among other things, certain property that is traded on an exchange or interdealer market that satisfies the requirements necessary for the property to qualify as "actively traded property" or property held as a hedging transaction to manage interest rate or currency fluctuations with respect to a Note),
- the Non-U.S. Holder does not actually or constructively own 10% or more of either the membership interests of DFNA entitled to vote or the total combined voting power of all classes of stock of Daimler North America Corporation entitled to vote,
- the Non-U.S. Holder is not for U.S. federal income tax purposes a controlled foreign corporation related (directly or indirectly) to DFNA or Daimler North America Corporation through stock ownership,
- the Non-U.S. Holder is not a bank receiving interest on an extension of credit pursuant to a loan agreement entered into in the ordinary course of its business;
- the Non-U.S. Holder certifies that it is not a United States person on a properly completed Internal Revenue Service Form W-8BEN, W-8BEN-E or other such applicable form; and
- the Non-U.S. Holder provides any required information with respect to its direct and indirect U.S. owners as required pursuant to Sections 1471 through 1474 of the Code ("**FATCA**") or, if the Notes are held through, or such holder is, a "foreign financial institution" (as defined under FATCA), such foreign financial institution complies with its obligations under FATCA (either pursuant to an agreement with the U.S. government or in accordance with local law) or is otherwise exempt from FATCA.

Further, gains realized on the sale, exchange, retirement or other disposition of a U.S. Note by a Non-U.S. Holder will generally not be subject to U.S. federal income tax unless (i) such income is effectively connected with a trade or business conducted by the Non-U.S. Holder in the United States, (ii) the Non-U.S. Holder has or had a current or former relationship with the United States, including a relationship as a citizen or resident thereof or based on an individual's presence in the United States for 183 days or more in the taxable year, or (iii) in the case of payments made after December 31, 2016, the Non-U.S. Holder fails to provide any required information with respect to its direct and indirect U.S. owners as required pursuant to FATCA or, if the U.S. Notes are held through, or such holder is, a "foreign financial institution" (as defined under FATCA), such foreign financial institution fails to comply with its obligations under FATCA (either pursuant to an agreement with the U.S. government or in accordance with local law) or is not otherwise exempt from FATCA.

U.S. Backup Withholding and Information Reporting. Non-U.S. Holders of U.S. Notes generally will be required to comply with applicable certification procedures to establish that they are not U.S. Holders in order to avoid the application of information reporting requirements and backup withholding. Any amounts withheld under the backup withholding rules may be allowed as a credit against the holder's U.S. federal income tax liability, and may entitle the holder to a refund, provided that the required information is furnished to the IRS. Holders should consult their tax advisors regarding the application of information reporting and backup withholding to their particular situations, the availability of an exemption therefrom, and the procedure for obtaining an exemption, if available.

THE FOREGOING SUMMARY DOES NOT ADDRESS ALL ASPECTS OF UNITED STATES FEDERAL INCOME TAXATION THAT MAY BE RELEVANT TO AN INVESTOR. INVESTORS ARE ADVISED TO CONSULT THEIR OWN TAX ADVISORS FOR SPECIFIC ADVICE CONCERNING THE TAX CONSEQUENCES REGARDING THE PURCHASE, OWNERSHIP AND DISPOSITION OF NOTES.

U.S. Foreign Account Tax Compliance Act

Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 ("**FATCA**") impose a new reporting regime and potentially a 30% withholding tax with respect to certain payments to (i) any non-U.S. financial institution (a "foreign financial institution", or "**FFI**" (as defined by FATCA)) that does not become a "**Participating FFI**" by entering into an agreement with the U.S. Internal Revenue Service ("**IRS**") to provide the IRS with certain information in respect of its account holders and investors or is not otherwise exempt from or in deemed compliance with FATCA and (ii) any investor (unless otherwise exempt from FATCA) that does not provide information sufficient to determine whether the investor is a U.S. person or should otherwise be treated as holding a "United States account" of the Issuer (a "**Recalcitrant Holder**"). Each of DAG, MBAP, DIF, MBJ, DCFI and MBF (together, the "**Non-U.S. Issuers**") may be classified as FFIs.

The new withholding regime is now in effect for payments from sources within the United States and will apply to "**foreign passthru payments**" (a term not yet defined) no earlier than 1 January 2017. This withholding would potentially apply to payments in respect of (i) any Notes issued by a Non-U.S. Issuer ("**Non-U.S. Notes**") characterized as debt (or which are not otherwise characterized as equity and have a fixed term) for U.S. federal tax purposes that are issued after the "**grandfathering date**", which is the date that is six months after the date on which final U.S. Treasury regulations defining the term foreign passthru payment are filed with the Federal Register, or which are materially modified after the grandfathering date and (ii) any Non-U.S. Notes characterised as equity or which do not have a fixed term for U.S. federal tax purposes, whenever issued. If Non-U.S. Notes are issued on or before the grandfathering date, and additional Notes of the same series are issued after that date, the additional Notes may not be treated as grandfathered, which may have negative consequences for the existing Notes, including a negative impact on market price.

The United States and a number of other jurisdictions have entered into intergovernmental agreements to facilitate the implementation of FATCA (each, an "**IGA**"). Pursuant to FATCA and the "Model 1" and "Model 2" IGAs released by the United States, an FFI in an IGA signatory country could be treated as a "**Reporting FI**" not subject to withholding under FATCA on any payments it receives. Further, an FFI in an IGA jurisdiction generally would not be required to withhold under FATCA or an IGA (or any law implementing an IGA) (any such withholding being "**FATCA Withholding**") from payments it makes. Under each Model IGA, a Reporting FI would still be required to report certain information in respect of its account holders and investors to its home government or to the IRS. The United States has entered into agreements with Australia, Canada, Germany and the Netherlands based largely on the Model 1 IGA and an agreement with Japan based largely on the Model 2 IGA. The United States and Turkey have reached an agreement in substance on the terms of an IGA based largely on the Model 1 IGA. Until the United States and Turkey sign an IGA (together with the IGAs entered into by Australia, Canada, Germany, Japan and the Netherlands, the "**Relevant IGAs**"), Turkey will be treated as having a Model 1 IGA in effect provided that it remains on the IRS list of jurisdictions that have reached an agreement in substance on the terms of an IGA. The U.S. Treasury will review this list on a monthly basis to determine whether each jurisdiction will continue to be treated as having an IGA in effect.

If the Non-U.S. Issuers are treated as Reporting FIs pursuant to the Relevant IGAs they do not anticipate that they will be obliged to deduct any FATCA Withholding on payments they make. There can be no assurance, however, that the Non-U.S. Issuers will be treated as Reporting FIs, or that they would in the future not be required to deduct FATCA Withholding from payments they make. Accordingly, the Non-U.S. Issuers and financial institutions through which payments on the Non-U.S. Notes are made may be required to withhold FATCA Withholding if (i) any FFI through or to which payment on such Notes is made is not a Participating FFI, a Reporting FI, or otherwise exempt from or in deemed compliance with FATCA or (ii) an investor is a Recalcitrant Holder.

While the Non-U.S. Notes are in global form and held within Clearstream Banking, *société anonyme* or Euroclear Bank SA/NV (together, the "**ICSDs**") or Clearstream Bank AG, Frankfurt ("**CBF**"), it is expected that FATCA will not affect the amount of any payments made under, or in respect of, the Non-U.S. Notes by the Non-U.S. Issuers, any paying agent and the common depositary, given that each of the entities in the

payment chain between the Non-U.S. Issuers and the participants in the ICSDs or CBF is a major financial institution whose business is dependent on compliance with FATCA and that any alternative approach introduced under an IGA will be unlikely to affect the Non-U.S. Notes.

FATCA is particularly complex and its application is uncertain at this time. The above description is based in part on regulations, official guidance and model IGAs, all of which are subject to change or may be implemented in a materially different form. Prospective investors should consult their tax advisors on how these rules may apply to the Non-U.S. Issuers and to payments they may receive in connection with the Non-U.S. Notes.

Grand Duchy of Luxembourg

The following information is of a general nature only and is based on the laws presently in force in Luxembourg, though it is not intended to be, nor should it be construed to be, legal or tax advice. The information contained within this section is limited to Luxembourg withholding taxation issues and prospective investors should not apply any information set out below to other areas, including (but not limited to) the legality of transactions involving the Notes. Prospective investors in the Notes should furthermore consult their own professional advisers as to the effects of state, local or foreign laws, including Luxembourg tax law, to which they may be subject.

Please be aware that the residence concept used under the respective headings below applies for Luxembourg income tax assessment purposes only. Any reference in the present section to a withholding tax or a tax of a similar nature, or to any other concepts, refers to Luxembourg tax law and/or concepts only.

Withholding Tax

(i) Non-resident holders of Notes

Under Luxembourg general tax laws currently in force, there is no withholding tax on payments of principal, premium or interest made to non-resident holders of Notes, nor on accrued but unpaid interest in respect of the Notes, nor is any Luxembourg withholding tax payable upon redemption or repurchase of the Notes held by non-resident holders of Notes.

(ii) Resident holders of Notes

Under Luxembourg general tax laws currently in force, payments of interest and principal by the relevant Issuer in the context of the holding, disposal, redemption or repurchase of the Notes can be made free and clear of any withholding or deduction for or on account of any taxes of whatsoever nature imposed, levied, withheld, or assessed by the Grand-Duchy of Luxembourg, subject however to the application, as regards Luxembourg resident individuals for tax purposes and residual entities (within the meaning set out below), of the Luxembourg law of December 23, 2005, as amended, (the "**Relibi Law**") which has introduced a 10% withholding tax on payments of interest or similar income made or ascribed by a paying agent established in Luxembourg to an individual beneficial owner who is a resident of Luxembourg or to a residual entity (within the meaning of the laws of June 21, 2005 implementing the Council Directive 2003/48/EC of June 3, 2003 on taxation of savings income in the form of interest payments (the "**Savings Directive**") and ratifying the treaties entered into by Luxembourg and certain dependent and associated territories of EU Member States (the "**Territories**"), as amended) established in an EU Member State (other than Luxembourg) or one of the Territories and securing such payments for the benefit of such individual beneficial owner.

Pursuant to the Relibi Law, Luxembourg resident individuals can opt to self declare and pay a 10% tax on payments of interest and other similar income paid or ascribed by paying agents located in a Member State of the European Union other than Luxembourg, a Member State of the European Economic Area or in a state or territory which has concluded an agreement directly relating to the Savings Directive.

The 10% withholding tax as described above or the 10% tax are in full discharge of income tax when Luxembourg resident individuals are acting in the context of the management of their private wealth.

Responsibility for the withholding of tax in application of the above-mentioned Relibi Law is assumed by the Luxembourg paying agent.

European Union Savings Directive

Under Council Directive 2003/48/EC on the taxation of savings income (as amended) (the "**European Union Savings Directive**"), Member States are required to provide to the tax authorities of other Member States details of certain payments of interest or similar income paid or secured by a person established in a member state to or for the benefit of an individual resident in another Member State or certain limited types of entities established in another Member State.

On March 24, 2014, the Council of the European Union adopted a Council Directive (the "**Amending Directive**") amending and broadening the scope of the requirements described above. Member States are required to apply these new requirements from January 1, 2017. The changes will expand the range of payments covered by the European Union Savings Directive, in particular to include additional types of income payable on securities. The Amending Directive will also expand the circumstances in which payments that indirectly benefit an individual resident in a member state must be reported. This approach will apply to payments made to, or secured for, persons, entities or legal arrangements (including trusts) where certain conditions are satisfied, and may in some cases apply where the person, entity or arrangement is established or effectively managed outside of the European Union.

For a transitional period Austria is required (unless during that period it elects otherwise) to operate a withholding system in relation to such payments. The changes referred to above will broaden the types of payments subject to withholding in those member states which still operate a withholding system when they are implemented.

The end of the transitional period is dependent upon the conclusion of certain other agreements relating to information exchange with certain other countries. A number of non-EU countries and territories including Switzerland have adopted similar measures (a withholding system in the case of Switzerland).

However, the European Commission has proposed the repeal of the European Union Savings Directive from January 1, 2017 in the case of Austria and from January 1, 2016 in the case of all other Member States (subject to on-going requirements to fulfil administrative obligations such as the reporting and exchange of information relating to, and accounting for withholding taxes on, payments made before those dates). This is to prevent overlap between the European Union Savings Directive and a new automatic exchange of information regime to be implemented under Council Directive 2011/16/EU on Administrative Cooperation in the field of Taxation (as amended by Council Directive 2014/107/EU). The proposal also provides that, if it proceeds, Member States will not be required to apply the new requirements of the Amending Directive.

Investors who are in doubt as to their position should consult their professional advisers.

The Proposed Financial Transactions Tax (FTT)

On February 14, 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common financial transactions tax ("**FTT**") in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "**participating Member States**").

The Commission's Proposal has very broad scope and could, if introduced, apply to certain dealings in the Notes (including secondary market transactions) in certain circumstances. The issuance and subscription of Notes should, however, be exempt.

Under the Commission's Proposal the FTT could apply in certain circumstances to persons both within and outside of the participating Member States. Generally, it would apply to certain dealings in the Notes where at least one party is a financial institution, and at least one party is established in a participating Member State. A financial institution may be, or be deemed to be, "established" in a participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a participating Member State.

Joint statements issued by (most of the) participating Member States indicate an intention to implement the FTT by January 1, 2016 at the latest. However, the FTT proposal remains subject to negotiation between the participating Member States and the scope of any such tax is uncertain. Additional member states may decide to participate.

Investors are advised to seek their own professional advice in relation to the FTT.

SELLING RESTRICTIONS

Accordingly, each Dealer has further represented, warranted and undertaken and each further Dealer to be appointed under the Programme will be required to represent, warrant and undertake that neither it, nor its affiliates nor any persons acting on its or their behalf have engaged or will engage in any directed selling efforts with respect to the Notes, neither it nor they have offered or sold Notes to or for the benefit or account of any U.S. person, and it and they have complied with, and will comply with, the offering restrictions requirement of Regulation S under the Securities Act.

Each Dealer has agreed and each further Dealer to be appointed under the Programme will be required to agree that, at or prior to confirmation of any sale of Notes, it will have sent to each distributor, dealer or person receiving a selling concession, fee or other remuneration that purchases Notes from it during the distribution compliance period (within the meaning of Regulation S) a confirmation or notice to substantially the following effect:

"The Notes and Guarantee covered hereby have not been registered under the United States Securities Act of 1933, as amended (the "**Securities Act**"), and the Notes may not be offered or sold within the United States or to, or for the account or benefit of, U. S. persons by any person referred to in Rule 903(b)(2)(iii) of Regulation S under the Securities Act (i) as part of their distribution at any time or (ii) otherwise until 40 days after the later of the commencement of the offering and the closing date. Reg. § 1.163-5(c)(2)(i)(D) or any successor provision in substantially the same form (the "**TEFRA D Rules**"), as specified in the Final Terms.

Where the TEFRA C Rules are specified in the Final Terms as being applicable to any Tranche of Notes, Notes must be issued and delivered outside the United States and its possessions in connection with their original issuance. Each Dealer has represented, warranted and undertaken that it, in connection with the original issuance of Notes, has not offered, sold or delivered and will not offer, sell or deliver, directly or indirectly, Notes within the United States or its possessions in connection with their original issuance. Further, each Dealer has represented, warranted and undertaken and each further Dealer to be appointed under the Programme will be required to represent, warrant and undertake in connection with the original issuance of Notes, that it has not communicated, and will not communicate, directly or indirectly, with a prospective purchaser if either such Dealer or such purchaser is within the United States or its possessions and will not otherwise involve its U.S. office in the offer or sale of Notes. - (i) except to the extent permitted under the TEFRA D Rules, it has not offered or sold, and during the 40-day restricted period will not offer or sell, Notes to a person who is within the United States or its possessions or to a United States person;
- (ii) it has, and throughout the restricted period will have, in effect procedures reasonably designed to ensure that its employees or agents who are directly engaged in selling Notes are aware that such Notes may not be offered or sold during the restricted period to a person who is within the United States or its possessions or to a United States person, except as permitted by the TEFRA D Rules;
- (iii) if such Dealer is a United States person, it has represented that it is acquiring the Notes for purposes of resale, in connection with their original issuance and if such Dealer retains Notes for its own account, it will only do so in accordance with the requirements of U. S. Treas.Reg. § 1.163-5(c)(2)(i)(D)(6) or any successor provision in substantially the same form;
- (iv) it acknowledges that an offer or sale will be considered to be made in the United States or its possession if it has an address within the United States or its possessions for the offeree or purchaser of a Note subject to such offer or sale; and

with respect to each affiliate that acquires from such Dealer Notes for the purposes of offering or selling such Notes during the restricted period, such Dealer either (x) repeats and confirms the representations and

agreements contained in sub-clauses (i), (ii), (iii) and (iv) above on such affiliate's behalf or (y) agrees that it will obtain from such affiliate for the benefit of the purchaser of the Notes and the Issuer the representations and agreements contained in sub-clauses (i), (ii), (iii) and (iv) above. Terms used in this paragraph (e) have the meanings given to them by the U. S. Internal Revenue Code of 1986 and regulations promulgated thereunder, including the TEFRA D Rules.

- (a) *Approved prospectus*: if the final terms in relation to the Notes specify that an offer of those Notes may be made other than pursuant to Article 3(2) of the Prospectus Directive in that Relevant Member State (a "**Non-exempt Offer**"), following the date of publication of a prospectus in relation to such Notes which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, provided that any such prospectus has subsequently been completed by the final terms contemplating such Non-exempt Offer, in accordance with the Prospectus Directive, in the period beginning and ending on the dates specified in such prospectus or final terms, as applicable and the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer;
- (b) *Authorized institutions*: at any time to any legal entity which is a qualified investor as defined in the Prospectus Directive;
- (c) *Fewer than 150 offerees*: at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Directive), subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or

provided that no such offer of Notes referred to in (b) to (d) above shall require an Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive, or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

For the purposes of this provision, the expression an "**offer of Notes to the public**" in relation to any Notes in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State, and the expression "**Prospectus Directive**" means Directive 2003/71/EC (as amended by Directive 2010/73/EU) and includes any relevant implementing measure in each Relevant Member State.

Dealers Transacting with the Issuers

Certain of the Dealers and/or their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for, the Issuer and the Guarantor (if applicable) in the ordinary course of business. In addition, in the ordinary course of their business activities, these Dealers and/or their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or the Guarantor (if applicable). Certain of the Dealers and/or their affiliates that have a lending relationship with the Issuer or the Guarantor (if applicable) routinely hedge their credit exposure to the Issuer or the Guarantor (if applicable) consistent with their customary risk management policies. Typically, such Dealers and/or their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes. Any such short positions could adversely affect future trading prices of the Notes. The Dealers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

Issue Yield

The yield for Fixed Rate Notes will be set out in the relevant Final Terms and will be calculated pursuant to the ICMA method, which determines the effective interest rate of notes by taking into account accrued interest on a daily basis.
