However, there is no assurance that the Stabilising Manager (or persons acting on their behalf) will undertake stabilisation action. Any stabilisation action may begin on or after the date on which adequate public disclosure of the terms of the offer of the GBP Hundred-Year Notes is made and, if begun, may be ended at any time, but it must end no later than the earlier of 30 calendar days after the Issue Date and 60 calendar days after the date of the allotment of the GBP Hundred-Year Notes. RISK FACTORS

The following paragraphs describe some risk factors that are material to the GBP Hundred-Year Notes to be offered and/or admitted to trading in order to assess the market risk associated with these GBP Hundred-Year Notes. The Issuer believes that the factors described below represent the principal risks inherent in investing in the GBP Hundred-Year Notes, but they do not describe all the risks of an investment in the GBP Hundred-Year Notes and the Issuer does not represent that the statements below regarding the risks of holding the GBP Hundred-Year Notes are exhaustive. Prospective investors should consider all information provided in this Prospectus consult their own financial and legal advisers about risks associated with investment in the GBP Hundred-Year Notes and the suitability of investing in the GBP Hundred-Year Notes in light of their particular circumstances.

Terms defined herein shall have the same meaning as in the Conditions as defined on page 13 of this Prospectus.

The risk factors under which the GBP Hundred-Year Notes described herein are issued comprise:

- (i) the Specific Risk Factors below; and
- (ii) the general risk factors on pages 61 to 99 of the Base Prospectus which is incorporated by reference (the "**General Risk Factors**").

References in the General Risk Factors to the Final Terms shall be deemed to refer to this Prospectus.

The Specific Risk Factors set out below are in addition to the General Risk Factors relating to the GBP Hundred-Year Notes set out in the Base Prospectus, which are also relevant to an assessment of the risks relating to the GBP Hundred-Year Notes, such as those appearing under the following sub-headings in the Base Prospectus:

- Independent review and advice
- Potential conflicts of interest
- Legality of purchase
- Modification, waivers and substitution

Specific Risk Factors

The GBP Hundred-Year Notes may not be a suitable investment for all investors

Each potential investor must make its own determination of the suitability of any such investment, with particular reference to its own investment objectives and experience, and any other factors which may be relevant to it in connection with such investment, either alone or with the help of a financial adviser. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the GBP Hundred-Year Notes, the merits and risks of investing in the GBP Hundred-Year Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the GBP

Hundred-Year Notes and the impact the GBP Hundred-Year Notes will have on its overall investment portfolio;

- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the GBP Hundred-Year Notes;
- (iv) understand thoroughly the Conditions of the GBP Hundred-Year Notes and be familiar with the behaviour of financial markets and of any financial variable which might have an impact on the return on the GBP Hundred-Year Notes; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks; and

prospective purchasers should also consult their own tax advisers as to the tax consequences of the purchase, ownership and disposition of GBP Hundred-Year Notes.

The GBP Hundred-Year Notes will not mature until one hundred years after the Issue Date.

If the Issuer does not redeem the GBP Hundred-Year Notes prior to maturity, the GBP Hundred-Year Notes will not mature until 23 January 2114 (approximately one hundred years after the Issue Date).

Noteholders should consider the potential full lifetime of the GBP Hundred-Year Notes when making an investment decision.

No Prior Market

The GBP Hundred-Year Notes will be new securities for which there is currently no market.

If the GBP Hundred-Year Notes are traded after their initial issuance, they may trade at a discount to their initial offering price, depending upon prevailing interest rates, the market for similar securities, general economic conditions and the financial condition of the Issuer.

In addition, the GBP Hundred-Year Notes are designed for specific investment objectives or strategies and therefore may have a more limited secondary market and experience more price volatility than conventional debt securities.

Investors may not be able to sell GBP Hundred-Year Notes readily or at prices that will enable investors to realise their anticipated yield. No investor should purchase GBP Hundred-Year Notes unless the investor understands and is able to bear the risk that certain GBP Hundred-Year Notes may not be readily sellable, that the value of GBP Hundred-Year Notes may fluctuate over time and that such fluctuations may be significant.

Any decline in the credit ratings of the Issuer or the GBP Hundred-Year Notes may affect the market value of the GBP Hundred-Year Notes

The GBP Hundred-Year Notes have been assigned a rating by S&P, Moody's and Fitch. The rating granted by each of S&P, Moody's and Fitch or any other rating assigned to the GBP Hundred-Year Notes may not reflect the potential impact of all risks related to structure, market and other factors that may affect the value of the GBP Hundred-Year Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

In addition, each of S&P, Moody's and Fitch or any other rating agency may change its methodologies for rating securities with features similar to the GBP Hundred-Year Notes in the future. This may include the relationship between ratings assigned to an issuer's senior securities and ratings assigned to securities with features similar to the GBP Hundred-Year Notes, sometimes called "notching". If the rating agencies were to change their practices for rating such securities in the future and the ratings of the GBP Hundred-Year Notes were to be subsequently lowered, this may have a negative impact on the trading price of the GBP Hundred-Year Notes.

In addition, the Issuer's credit ratings may fluctuate depending on certain factors, including the credit rating of the Government of France, which currently owns 84.49% of the Issuer's share capital. As of the

date of this Prospectus, the Issuer is rated Aa3 (negative outlook) by Moody's. It is currently anticipated that Moody's will release its next report on the Government of France on 24 January 2014. Any negative action by Moody's on the Government of France's rating may have a negative impact on the Issuer's long-term rating, and any change in the credit rating of the Issuer for this or other reasons may affect the credit ratings of the GBP Hundred-Year Notes and their market price or liquidity.

Early redemption and mandatory redemption risk

The Issuer may also, at its option, redeem the GBP Hundred-Year Notes in whole but not in part, upon the occurrence of a Withholding Event, as further described in the schedule to the GBP Hundred-Year Notes Specific Terms and Conditions. In addition, the Issuer shall redeem the GBP Hundred-Year Notes in whole if the termination date of the Issuer's corporate life falls prior to the Maturity Date of the GBP Hundred-Year Notes, as further described in "*GBP Hundred-Year Notes Specific Terms and Conditions - Redemption*".

Such redemption options or mandatory redemption event will be exercised at 100 per cent. of the principal amount of the GBP Hundred-Year Notes together with interest accrued to the date of redemption (if any) thereon at such date.

The redemption of the GBP Hundred-Year Notes by the Issuer prior to the Maturity Date may affect the market value of the GBP Hundred-Year Notes. During any period when the Issuer may elect to redeem the GBP Hundred-Year Notes, the market value of the GBP Hundred-Year Notes generally will not rise substantially above the price at which they can be redeemed.

There can be no assurance that, at the relevant time, Noteholders will be able to reinvest the amounts received upon redemption at a rate that will provide the same return as their investment in the GBP Hundred-Year Notes. Potential investors should consider reinvestment risk in light of other investments available at that time.

Optional redemption of the GBP Hundred-Year Notes for tax reasons

There is a risk that, after the issue of the GBP Hundred-Year Notes, a Withholding Event may occur which would entitle the Issuer, without the consent or approval of the Noteholders, to redeem the GBP Hundred-Year Notes early as further described in "*Early Redemption Risk*" above and in "*Terms and Conditions of the Notes - Redemption*".

In such a case, an investor may not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the GBP Hundred-Year Notes being redeemed and may only be able to reinvest at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.

DOCUMENTS INCORPORATED BY REFERENCE

This Prospectus should be read and construed in conjunction with the documents and sections referred to in (a) and (b) below which shall be incorporated by reference in, and form part of, this Prospectus:

SCHEDULE TO THE GBP HUNDRED-YEAR NOTES SPECIFIC TERMS AND CONDITIONS

1. Redemption

1.1 Mandatory Early Redemption

- (i) If, as of the Corporation Life Determination Date (as defined below), the termination date of the Issuer's corporate life (as such date may be modified or extended by the extraordinary general shareholders' meeting in accordance with article 1844-6 of the French Code Civil, the "**Corporation Life Expiration Date**") falls prior to the Maturity Date of the GBP Hundred-Year Notes, the Issuer will be obligated to exercise an early redemption of the GBP Hundred-Year Notes in whole on the date (the "**Mandatory Early Redemption Date**") that is the Interest Payment Date falling immediately prior to the Corporation Life Expiration Date. The "**Corporation Life Determination Date**" shall be the date that is 90 calendar days prior to the Mandatory Early Redemption Date or, if such day is not a Business Day, on the next preceding Business Day. The redemption amount shall be 100% of the principal amount of the GBP Hundred-Year Notes being redeemed, plus accrued interest, if any, to (but excluding) the Mandatory Early Redemption Date.
- (ii) The notice period (which notice shall be irrevocable) to the Noteholders shall be not less than 30 nor more than 60 calendar days prior to the Mandatory Early Redemption Date, in accordance with Condition 15 (*Notices*).
- (iii) As of the date of this Prospectus, the duration of the Issuer is set at 99 years starting from 19 November 2004. As such, unless the Issuer's corporate life is modified or extended, the Corporation Life Expiration Date will be 19 November 2103 and the Mandatory Early Redemption Date will be 23 July 2103.

1.2 Redemption for Taxation Reasons

- (i) If, by reason of any change in French law or published regulations becoming effective after the Issue Date, the Issuer would on the occasion of the next payment of principal or interest due in respect of the GBP Hundred-Year Notes, not be able to make such payment without having to pay additional amounts as specified under Condition 8(b) (*Additional Amounts*) (a "**Tax Gross-Up Event**"), the Issuer may, at its option, at any time, subject to having given not more than 60 nor less than 30 calendar days' notice to the Noteholders (which notice shall be irrevocable), in accordance with Condition 15 (*Notices*), redeem all, but not some only, the GBP Hundred-Year Notes, at their Specified Denomination per GBP Hundred-Year Note together with any interest accrued to the date set for redemption provided that the due date for redemption of which notice hereunder may be given shall be no earlier than the latest practicable date on which the Issuer could make payment of principal and interest without withholding for French taxes.
- (ii) If the Issuer would on the next payment of principal or interest in respect of the GBP Hundred-Year Notes be prevented by French law from making payment to the Noteholders of the full amounts then due and payable, notwithstanding the undertaking to pay additional amounts contained in Condition 8(b) (*Additional Amounts*) (a "**Withholding Tax Event**", such event, together with a Tax Gross-Up Event, being a "**Withholding Event**"), then the Issuer shall forthwith give notice of such fact to the Fiscal Agent and the Issuer shall upon giving not less than seven calendar days' prior notice to the Noteholders in accordance with Condition 15 (*Notices*), redeem all, but not some only, of the GBP Hundred-Year Notes then outstanding, at their Specified Denomination per GBP Hundred-Year Notes together with any interest accrued to the date set for redemption on the latest practicable date on which the Issuer could make payment of the full amount payable in respect of the GBP Hundred-Year Notes, if that date is passed, as soon as practicable thereafter.

DESCRIPTION OF THE ISSUER

Please see pages 151 to 158 of the Base Prospectus, which is incorporated by reference, for a description of the Issuer.

RECENT EVENTS

FRANCE

Exclusive negotiations for Citelum acquisition

On 30 September 2013, the EDF Group, through its wholly-owned subsidiary EDEV (EDF Développement Environnement), made a firm offer and entered into exclusive negotiations with Dalkia France with a view to acquiring 100% of the capital in Citelum, one of the major players in the international public lighting and urban electrical equipment industry. This transaction is expected to help the EDF Group enhance the services it offers to local authorities and enable it to work together with them more effectively to safeguard their energy future. EDF could offer new responses to its local authority clients when it comes to public lighting for the design of eco-neighborhoods.

On 25 November 2013, Dalkia France and EDEV agreed to extend the exclusivity period granted to EDEV and the validity of EDEV's offer until March 31, 2014 due to the contemplated transaction between EDF and Veolia Environnement regarding their joint subsidiary Dalkia described below.

Agreement in discussion between EDF and Veolia Environnement for the acquisition of Dalkia's French activities

On 28 October 2013, EDF and Veolia Environnement announced that they had entered into advanced discussions for the conclusion of an agreement on their joint subsidiary Dalkia, one of the world's leading provider of energy services. The Boards of Directors of EDF and Veolia Environnement have met and approved the continuation of these negotiations which are currently ongoing.

The discussions underway envisage the acquisition by EDF of the entire activities of the Dalkia group in France, while Veolia Environnement would acquire the entire activities of Dalkia International. In connection with the transaction, Veolia Environnement would make a cash payment of €550 million to EDF to compensate for the difference in value between the stakes owned by the two shareholders in the various entities of the Dalkia group.

The transaction is expected to secure Dalkia's development both in France and internationally, while strengthening EDF's ambitions in the field of energy services. The contemplated transaction would also put an end to the litigation between EDF and Veolia Environnement which is currently pending before the Paris Commercial Court.

The transaction requires the prior consultation of the relevant employee representative bodies of EDF, Veolia Environnement and the Dalkia group and the approval of EDF and Veolia Environnement's Board of Directors. Once signed, it shall be subject to approval from the relevant antitrust authorities.

EDF's disposal of its entire stake in Veolia Environnement

On 26 November 2013, EDF announced that it had initiated the sale of a total of 22,024,918 Veolia Environnement shares, representing 4.01% of the share capital and 4.12% of the voting rights of Veolia Environnement as of 30 June 2013, by means of a private placement through an accelerated book building for institutional investors. The disposal was completed on 26 November 2013 at a selling price of €11.90 per share or a 2.3% discount to Veolia Environnement's closing price as of 26 November 2013, resulting in gross cash proceeds for EDF of approximately €262.1 million.

Publication of December 2013 nuclear output in France and in the UK

On 6 January 2014 EDF published the December 2013 nuclear output of both its French and UK nuclear fleet. In the UK, the December nuclear output amounted to 5.5 TWh which should allow the EDF Group to match for the full year 2013 the record output of 60 TWh for 2012. In France, nuclear production in December 2013 amounted to 40.4 TWh, up 0.5 TWh versus December 2012. This should translate into a nuclear output for 2013 of around 403.7 TWh, which is in line with 2012 as adjusted for the effect of the leap year, but is below the EDF Group's revised target of 405-410 TWh. In France, over the last quarter of 2013, further prolongations in planned outages slightly impacted availability. In addition, despite good availability of the fleet in December 2013, the milder than anticipated weather, especially in the second

half of December, combined with exceptionally strong wind output reduced the utilization factor of the fleet. This will not have any adverse impact on the EDF Group's ability to achieve its 2013 financial objectives.

UNITED KINGDOM

Agreement reached on the commercial terms for the planned Hinkley Point C nuclear power station

On 21 October 2013, EDF Group and the UK government agreed on the key commercial terms of the investment contract for the Hinkley Point C nuclear power station. The Contract for Difference (CfD), the strike price of which is set at £92.5/MWh, (or £89.5/MWh if Sizewell C goes ahead) will last for 35 years from the date of commissioning. The project is eligible for the UK Guarantees scheme, the UK government's infrastructure guarantee program, under terms and conditions to be agreed upon. Agreement in principle on the scope of the UK Guarantees scheme and on the key terms of the investment contract allows EDF Group to move ahead to secure partners for the project, based on an expected rate of return (IRR) of around 10% for the project. The share of equity is expected to be 45-50% for EDF, 10% for Areva, 30 to 40% for China General Nuclear Corporation (CGN) and China National Nuclear Corporation (CNNC). Discussions are also taking place with a shortlist of other interested parties who could take up to 15%. Finalization of these agreements and construction of the plant are subject to a final investment decision, provided certain key steps are completed, including agreement of the full investment contract, finalization of agreements with industrial partners and a clearance decision from the European Commission under State aid rules. On 22 October 2013, the UK Government formally notified to the European Commission the Contract for Difference mechanism and the guarantee which would be granted by the UK Government under State aid rules. On 18 December 2013, the European Commission decided to open an in-depth investigation to analyze whether the measures involve State aid and, in the affirmative, whether they are compatible with European State aid rules. Given the scale of review, a delay in EDF's final investment decision cannot be ruled out.

OTHER INTERNATIONAL

AREVA and EDF sign two series of agreements with companies and universities for the Saudi nuclear program

On 30 December 2013, EDF and AREVA signed two sets of agreements aimed at supporting the Saudi nuclear energy program. The two companies signed Memorandums of Understanding (MoUs) with five Saudi industrial partners: Zamil Steel, Bahra Cables, Riyadh Cables, Saudi Pumps, and Descon Olayan. These MoUs aim to develop the industrial and technical skills of local companies and reflect AREVA and EDF's desires to build an extended network of Saudi suppliers for future nuclear projects in the country. A second series of agreements signed with four Saudi universities (Kind Saud University, Dar Al Hekma College, Effat University, and Prince Mohammed bin Fahd University) are intended to contribute to the development of nuclear expertise in the country.

These agreements follow previous operations organized by EDF and AREVA through their joint office in Riyadh including the "Suppliers' Days" in March and October 2013, the visit to France by Saudi industrial companies in November 2013, the agreement signed with the local professional training institute in July 2013, the visits to French nuclear facilities organized for Saudi university faculty members in June 2013 and internship offers made to Saudi students since summer 2013.

EDF and GEHC sign an agreement for the creation of a Joint Venture in nuclear energy

On 30 December 2013, EDF signed an agreement in Riyadh, Saudi Arabia for the creation of a Joint Venture with Global Energy Holding Company (GEHC). The Joint Venture will aim to carry out feasibility studies in the context of the Saudi nuclear program, based on the French technology of the EPR.

Sale of the EDF Group's investment in SSE

On 27 November 2013, EDF and Energetický a průmyslový holding, a.s. (EPH) completed the transaction for the sale of EDF's minority stake of 49% in Stredoslovenská Energetika a.s. (SSE), a distribution and marketing company which operates in central Slovakia, serving about a third of the

country's area, to EPH. The completion of the transaction follows the receipt of both the approval by SSE's general shareholders meeting and the antitrust authorities' clearance. The transaction price received by the EDF Group for its 49% stake in SSE amounted to approximately 400 million euros.

Transmission and Electricity Distribution Tariffs

On 28 November 2012, the French Council of State (*Conseil d'Etat*), ruling on an appeal lodged by the SIPPEREC (*Syndicat Intercommunal de la Périphérie de Paris pour l'Electricité et les Réseaux de Communication*), issued a decision overturning the 5 June 2009 order setting the third distribution network tariffs (*tarifs d'utilisation des réseaux publics de distribution d'électricité* or TURPE 3) for a 4-year period starting on 1 August 2009, on the grounds that the CRE and the ministers used "an incorrect method in law" to determine the Weighted Average Cost of Capital (WACC) by failing to take into account, when calculating the WACC "*the specific accounts of concessions, which correspond to the contracting authorities' rights to recover the concession property free of charge at the end of the contract [...] as well as the provisions for the renewal of non-current assets*". The Council ordered the CRE and the ministers to take a new decision on distribution network use tariffs for the period 2009-2013 by 1 June 2013, at which time the retroactive annulment of the decision of 5 June 2009 was to have taken effect. According to such order, the decision took effect on 1 June 2013 and the CRE proposed in the meantime new distribution tariffs for the period from 1 June 2013 until 31 July 2013 (TURPE 3 bis), taking into account the decision issued by the French Council of State, due to the retroactive replacement of the cancelled prices. This proposal was approved by the Ministries of Economy and Energy and was published on 26 May 2013. The deliberation of 28 May 2013 containing the decision for the period from 1 August 2013 to 31 December 2013 (TURPE 3 ter), which resulted in a 2.1% increase from 1 August 2013 compared to the period from 1 June 2013 to 1 July 2013, was published on 30 July 2013.

Under application of the deliberation of the CRE of 3 April 2013, published in the Official Journal of the Republic of France on 30 June 2013, the new transmission network tariffs (TURPE 4 HTB) entered into force on 1 August 2013 for a period of approximately 4 years. The tariffs increased by 2.4% as of that date, and will subsequently be adjusted each year.

On 9 July 2013, in the context of the preparation of the fourth distribution network tariffs, the CRE launched a consultation on two different methodologies, including the normative method proposed by EDF Group. On 12 November 2013, the Ministries of Economy and Energy sent a letter to the CRE acknowledging that the regulator was not necessarily in a position to adopt the method for electricity distribution used by almost all of its European counterparts and which is used by CRE itself in relation to other regulated networks (gas and electricity transport), namely an economic approach to tariff-setting that factors in operators' capital costs on the basis of an asset base multiplied by a standard rate of return on capital invested. In order to secure a legal framework for determining tariffs for the use of public electricity distribution networks and enable the implementation of a commonly agreed standard economic regulation method, the Ministries unveiled their plan to present a bill to Parliament very shortly.

Notwithstanding this letter, the CRE transmitted on 13 November 2013 to the Ministries of Economy and Energy its deliberation on distribution network tariffs for the period from 1 January 2014. This decision was published on 20 December 2013 and it translates into a 3,6% tariff increase for distribution as of 1 January 2014. The fourth distribution network tariffs are designed to apply for about four years.

NOME law and ARENH price

Supplies of electricity to EDF's competitors under the ARENH scheme for regulated access to nuclear power supplies concern a volume of 64.3 TWh for 2013. The annual volume cannot exceed 100 TWh, and will be progressively increased from 1 January 2014 by the amounts sold to network operators to compensate for their technical losses, according to a timetable set by government decision.

The ARENH price was set at €42/MWh from 1 January 2012, and should, under the NOME Law, subsequently reflect the economic conditions of generation by the existing nuclear fleet. The decree stipulating the valuation method for costs making up the ARENH price should have been published no

later than 7 December 2013, but a press release from the government issued on 22 October 2013 announced that the decree will only be published by the end of March 2014.

Electricity sales tariffs

The French Council of State issued a decision on 22 October 2012 at the request of SIPPEREC, cancelling the ministerial decision of 13 August 2009 setting regulated electricity sales tariffs and requiring the ministers for energy and the economy to issue a new decision within three months covering the period from 15 August 2009 to 13 August 2010. This decision was retroactive in effect and was published on 15 March 2013. The adjustments made were primarily technical, and EDF's estimated costs were marginal at 7 million euros. The decree received a favorable opinion from the CRE in early February 2013.

On 24 April 2013 the French Council of State dismissed an appeal against the ministerial decision setting the level of tariffs for 2011. On 4 December 2013, the French Council of State dismissed an appeal against the ministerial decision setting the level of tariffs for 2012. Another appeal against the same decision has not been judged yet.

Increase in electricity tariffs announced by the French government

Following publication of the CRE report dated 4 June 2013 regarding EDF's generation and supply costs in France, the Government decided to spread the tariff rises necessary to cover EDF's costs as provided for in French law across several years. A ministerial order of 26 July 2013 increased electricity tariffs by 5% for "blue" tariffs in 2013, and pre-announced an additional 5% average increase for "blue" tariffs in 2014, which will be adjusted based on the actual costs during the relevant period.

"Vent de Colère" proceedings

In 2009, the association "Vent de Colère" brought an action for annulment before the French Council of State against the decision of 17 November 2008 setting the purchase tariffs for wind power. The association claims that this decision qualifies as State aid within the meaning of Article 107(1) TFEU and is illegal since it has not been notified to the European Commission prior to its entry into force. In May 2012, the French Council of State suspended judgment and submitted a prejudicial question to the Court of Justice of the European Union on the point of whether the purchase obligation financing system based on the CSPE should be considered as "intervention by the State or through State resources". On 19 December 2013, the Court of Justice judged that this financing mechanism does indeed qualify as "intervention by the State or through State resources". Following the Court's decision, the case will resume before the French Council of State, which will make a final ruling on the appeal lodged by "Vent de Colère".

Bugey 2 and 4

Following the third safety reexamination of reactors 2 and 4 of the Bugey site in order to ensure their operation during the next 10 years, the ASN issued decisions defining additional technical requirements in 2012 (reactor No. 2) and 2013 (reactor No. 4). These requirements apply in addition to other technical requirements, which also apply to reactors 2 and 4, issued by the ASN on June 26, 2012 resulting from the additional safety assessments following the Fukushima accident.

In December 2013, the Republic and Canton of Geneva introduced before the French Council of State two petitions aimed at the cancellation of such decisions.

LITIGATION

Solaire Direct

On 19 May 2008, Solaire Direct filed a complaint before the French competition authority (Autorité de la concurrence) alleging that EDF had abused its dominant position on the French electricity markets to enter the emerging global services market for shared photovoltaic electricity generation through its subsidiary EDF ENR, thereby hindering the entry of new competitors in that market. In a decision dated 17 December 2013, the French competition authority fined EDF an amount of 13.5 million euros. The

authority considered that EDF provided EDF ENR with means derived from its position as incumbent operator on the French electricity markets which favored its development and were not replicable by competitors (promotional and commercialization tools, image and brand, data base) and thereby abused its dominant position.

FINANCIAL INFORMATION

Dividend

EDF SA's Board of Directors met on 26 November 2013 under the Chairmanship of Henri Proglio, and decided to pay a cash interim dividend for the 2013 fiscal year amounting to €0.57 per share. This interim dividend had an ex-date of 12 December 2013 and a payment date of 17 December 2013.

Bond Issuances

EDF launched on 20 November 2013, the first Green Bond in euros by a large corporate issuer. With a maturity of 7.5 years, denominated in euros, a total amount of 1.4 billion euros and an annual coupon of 2.25%, this issue was twice oversubscribed. The bonds were issued on 27 November 2013.

EDF announced on 14 January 2014 a \$4.7 billion multi-tranche senior issue on the US bond market

- \$4.7 billion in 5 tranches: 3Y (floating and fixed), 5Y, 30Y and 100Y
- Largest 100-year bond from a European corporate issuer ever

EDF (A+ S&P / Aa3 Moody's / A+ Fitch) has successfully priced a \$4.7 billion senior bond issue in 5 tranches:

- \$750 million, at floating rate with a 3-year maturity
- \$1 billion, with a 3-year maturity and a fixed coupon of 1.15%
- \$1.25 billion, with a 5-year maturity and a fixed coupon of 2.15%
- \$1 billion, with a 30-year maturity and a fixed coupon of 4.875%
- \$700 million, with a 100-year maturity and a fixed coupon of 6.00%

Taking advantage of the excellent market conditions witnessed in early 2014, EDF has returned to the US bond market and priced a \$4.7 billion offering of senior notes in 5 tranches with an average coupon of 3.27%¹ and an average maturity of 23.7 years.

Thomas Piquemal, Group Chief Financial Officer says: "*The successful completion of these senior US dollar bond issues, including the largest 100-year bond from a European corporate issuer, shows investors' trust in EDF, its strategy and its enhanced financial profile achieved over the last four years.*"

EDF announced on 15 January 2014 the pricing of €4 billion multi-currency follow-on hybrid bonds

Following the announcement of a \$4.7 billion senior bonds offering, EDF (A+ S&P / Aa3 Moody's / A+ Fitch) has successfully raised a c.4.0 billion euros equivalent hybrid bond issuance in four tranches and three currencies, rolling out the second phase of its multi-annual hybrid funding program which is structured similarly to 2013 inaugural² issuances.

EDF priced the equivalent of c.4.0 billion euros in \$, € and £:

- \$1.5 billion at 5.625% coupon for the tranche with a 10-year first call date

¹ Excluding the 3-year floating

² In January 2013, EDF issued the equivalent of €6.1bn in euros, sterling and dollars. The structure of 15 January 2014 announced offerings is in line with the 2013 hybrids with 50 % equity credit by rating agencies and accounted for 100 % equity under IFRS. Hybrid capital securities are structured as perpetual instruments and are subordinated to all senior creditors.

- €1 billion at 4.125% coupon for the tranche with a 8-year first call date
- €1 billion at 5.00% coupon for the tranche with a 12-year first call date
- £750 million at 5.875% coupon for the tranche with a 15-year first call date

These follow-on issuances demonstrate that hybrids are a structural component of EDF's balance sheet, strengthening its capital structure through the investment cycle. These issuances contribute to align the Group's hybrid funding with its capital needs for future growth: at the end of 2013, EDF's assets under development or under construction represented around €12 billion of long term growth projects.

EDF announced on 17 January 2014 the completion of its series of bond issuances launched earlier with a 100-year bond in sterling

- Successful pricing of £1.35 billion, first ever century-bond in sterling
- Senior dollars and sterling offerings extend average debt maturity by 3.4 years with no impact on average coupon

EDF (A+ S&P / Aa3 Moody's / A+ Fitch) has successfully priced a 100-year £1.35 billion bond issuance in sterling, closing the series of issuances, which included the multi-currency hybrid bond and senior dollars bond offerings. This bond issuance, with a 100-year maturity, is the first ever century-bond in sterling. The coupon stands at 6%, which is in line with the 100-year senior bond in dollars.

With this transaction, the Group is going one step further in its active funding policy to align its balance sheet with its long lifetime industrial assets by lengthening the average maturity of its debt.

Taking into account all the transactions announced on the week of 13 January 2014, the average maturity of the Group's debt has been extended by 3.4 years compared to 30 June 2013 with no impact on the average coupon.

Extension of the maturity of EDF's 4 billion euros syndicated loan facility

On 16 December 2013, EDF signed an amendment agreement to its €4 billion five-year syndicated loan facility dated 22 November 2010 with 23 European and international banks. The amendment agreement extended the maturity of the facility by three years from November 2015 to November 2018 while reducing the spread from 35 to 20 bps per annum. The amendment also reinstated the two one-year extension options exercisable at the request of EDF and the discretion of the banks.

EDF Group's Sales for the Nine Months Ended 30 September 2013

EDF Group sales over the first nine months of 2013 amounted to €55.2 billion up 6.9% compared with the same period in 2012. This was mainly due to a scope effect from the takeover of Edison in May 2012. Organic growth stood at 2.9% as a result of good performance in France, which benefited from both a positive volume effect due to colder weather compared with the same period in 2012 and an increase in regulated tariffs. Growth was also driven by the United Kingdom where sales were lifted by higher achieved prices in the wholesale market and by the Other Activities segment where record commissioning from EDF Energies Nouvelles in 2012 has resulted in a sharp increase in output in 2013.

France

In France, sales for the first nine months of 2013 amounted to €29.1 billion reflecting organic growth of 3.1%. This growth was due to a positive volume effect of €625 million due to colder weather conditions than during the same period in 2012. The growth also reflected the increase in regulated tariffs for €500 million. Sales were also driven by electricity sales on the wholesale markets, as the EDF Group was a net seller of 4 TWh in the first nine months of the year, and by the increase in gas sales due to the cold weather. These factors contributed to offset the drop in sales due to the expiration of several long-term contracts.

At end-September, nuclear output amounted to 297.6 TWh, up 2.6 TWh (+0.9%) compared with the first nine months of 2012 despite more planned outages. However, the EDF Group's outage extensions were longer than planned notably during the third quarter. The action plan implemented by the EDF Group at the start of the year to manage outage durations has resulted in limited extensions as compared with 2012, but has not yet fully delivered the expected impact. As such, on the basis of output generated at end-September and given the outage program schedule until year's end, the EDF Group had set a nuclear output target of between 405 and 410 TWh for 2013.

Hydropower output stood at 33.7 TWh at end-September, which was an increase of 7.3 TWh (+27.7%) compared with the first nine months of 2012. This was achieved by good hydro conditions in the first half-year, and reservoirs were close to their historic averages at the end of the third quarter.

International and Other Activities

International and other activities continued to drive the EDF Group's performance, as sales increased by 11.5% and 2.7% on an organic basis for the first nine months of 2013 as compared to the same period in 2012. Total sales for this period were €26,064 million and accounted for 47% of the EDF Group's total sales.

In the United Kingdom, sales amounted to €7.0 billion, up 4.9% in organic terms. The depreciation of the pound sterling versus the euro during the period led to a negative foreign exchange effect of €341 million. Sales were underpinned by the increase in prices achieved on the wholesale markets compared with the first nine months of 2012. Nuclear output (-0.3 TWh in the first nine months of the year) was in line with the EDF Group's ambition to replicate the strong operational performance of 2012 of 60 TWh despite a higher number of planned outages. Electricity sales on the wholesale markets increased due to the EDF Group's commitment with the European Commission to sell between 5 and 10 TWh per year on the UK wholesale market over the period 2012-2015. These sales amounted to 6.9 TWh, which represents a 4.4 TWh increase compared with the first nine months of 2012 and partially offset lower structured sales.

In Italy, sales climbed 1.7% in organic terms to €9.5 billion. The scope effect linked to the takeover of Edison totaled €2.5 billion. Edison's contribution to sales was €9.2 billion, or organic growth of 2.5%. Sales in electricity activities were driven by a positive volume effect as sales on the wholesale markets increased amid a difficult environment where demand was down, offsetting a negative price effect. In hydrocarbon activities, sales to residential and professional clients increased in a context of a decline in demand because of lower consumption of thermoelectric plants. However, activity continues to be hit by the drop in the price of gas, which continued to weigh heavily on sales and margins.

The Other International segment recorded a slight organic sales increase of 1% to €5.6 billion. In Belgium, sales at EDF Luminus were up by 0.8% due to higher electricity and gas sales on the wholesale market as a result of their optimization activities, without a significant impact on margins. In Austria, sales of gas and electricity were down as market conditions deteriorated. In Poland, the 5.9% drop in organic sales resulted from lower prices, electricity volumes and lower prices and volumes of environmental certificates. In the rest of the world, organic sales were up 11.1%, led by the United States in particular, where sales were lifted by higher nuclear output.

Sales on the Other Activities segment rose to €3.9 billion, reflecting organic growth of 3%. EDF Énergies Nouvelles saw its organic sales grow significantly by 33.1% due to strong wind output growth (+2 TWh, or +39%) driven by the full-year impact of 2012 commissioning in the United States and Canada. At 30 September 2013, EDF Énergies Nouvelles had 6,349 MW gross installed capacity in addition to 1,493 MW in gross capacity under construction. EDF Trading's sales rose 5.5% in organic terms due to good results from its coal/freight trading business.

Financial Objectives

EDF Group is reiterating its financial objectives for 2013:

Group EBITDA: at least 3% in organic growth excluding Edison

Edison EBITDA: around €1 billion

Net financial debt/EBITDA: between 2x and 2.5x

Payout ratio: 55%-65% of net income excluding non-recurring items

The results of the Spark cost savings plan have exceeded the EDF Group's expectations, with around €800 million in savings already generated as of 30 September 2013 or 80% of the 2013 initial target of €1 billion, which has been revised upwards by 20% to €1.2 billion. As expected, the implementation of the plan was ramped up in the second half, particularly with regard to the optimization of investments, which accounted for a little more than half of the program to end-September. Savings were generated across all of the EDF Group's entities and businesses.

In this section, unless the context otherwise requires, "EDF Group", "we", "us" and "our" refer to EDF S.A. and its subsidiaries and shareholdings.
