

Jaguar Land Rover Automotive plc
\$500,000,000 4.500% Senior Notes due 2027

**Guaranteed on a senior unsecured basis by Jaguar Land Rover Limited
and Jaguar Land Rover Holdings Limited**

The 4.500% Senior Notes due 2027 were issued in the aggregate principal amount of \$500,000,000 (the "Notes"). The Notes will bear interest at the rate of 4.500% per annum, payable semi-annually in arrears on 1 April and 1 October of each year, beginning on 1 April 2018. The Notes will mature on 1 October 2027. Jaguar Land Rover Automotive plc (the "Issuer") may redeem the Notes, in whole or in part, at any time at a price equal to 100% of the principal amount thereof, plus accrued and unpaid interest to the redemption date, plus the "make-whole" premium set forth in this offering memorandum. In addition, the Issuer may redeem all of the Notes at a price equal to their principal amount plus accrued and unpaid interest, if any, upon the occurrence of certain changes in applicable tax law. There is no sinking fund for the Notes. In the event of a Change of Control Repurchase Event (as defined herein), the Issuer must make an offer to purchase the Notes at a purchase price equal to 101% of the principal amount thereof, plus accrued and unpaid interest to the date of purchase.

The Notes will be the Issuer's senior obligations and will rank equally in right of payment with all existing and future indebtedness of the Issuer that is not subordinated (and is not senior) in right of payment to the Notes and will be senior in right of payment to all existing and future indebtedness of the Issuer that is subordinated in right of payment to the Notes. The Notes will be fully and unconditionally guaranteed on a senior unsecured basis by Jaguar Land Rover Limited and Jaguar Land Rover Holdings Limited (the "Guarantors"). The guarantees of the Notes by each of the Guarantors (the "Note Guarantees") will rank equally in right of payment with all of the existing and future indebtedness of such Guarantor that is not subordinated in right of payment to the Note Guarantees, and senior in right of payment to all existing and future indebtedness of such Guarantor that is subordinated in right of payment to the Note Guarantees. The Notes and the Note Guarantees will also be effectively subordinated to all of the Issuer's and each of the Guarantors' existing and future secured debt to the extent of the value of the assets securing such debt and to all existing and future debt of all the Issuer's subsidiaries that do not guarantee the Notes.

Application has been made to admit the Notes to the Official List of the Luxembourg Stock Exchange and to trading on the Luxembourg Stock Exchange's Euro MTF market (the "Euro MTF Market"). The Euro MTF Market is not a regulated market pursuant to the provisions of Directive 2004/39/EC. This Offering Memorandum constitutes a prospectus for purposes of Part IV of the Luxembourg law on prospectuses for securities dated July 10, 2005, as amended.

Investing in the Notes involves risks. Please see "[Risk Factors](#)" beginning on page 21.

The Notes and the Note Guarantees have not been registered under the US Securities Act of 1933, as amended (the "US Securities Act"), or any state securities laws. Accordingly, the Notes and the Note Guarantees are being offered and sold only to qualified institutional buyers ("QIBs") in accordance with Rule 144A under the US Securities Act ("Rule 144A") and to persons outside the United States that are not, and are not acting for the account or benefit of, "U.S. persons" (as defined in Regulation S under the US Securities Act ("Regulation S")) in offshore transactions in accordance with Regulation S. Prospective purchasers that are QIBs are hereby notified that the seller of the Notes may be relying on the exemption from the registration requirements under the US Securities Act provided by Rule 144A.

Issue Price: 100.000% plus accrued interest, if any, from 10 October 2017

The Notes were issued in the form of global notes in registered form. Please see "Book-entry; Delivery and Form".

IMPORTANT INFORMATION

You should rely only on the information contained in this offering memorandum (this “Offering Memorandum”). None of the Issuer, the Guarantors or and (collectively, the “initial purchasers”) has authorised anyone to provide you with any information or represent anything about the Issuer, the Guarantors or the initial purchasers, the Issuer’s financial results or this offering that is not contained in this Offering Memorandum. If given or made, any such other information or representation should not be relied upon as having been authorised by the Issuer, the Guarantors or the initial purchasers. None of the Issuer, the Guarantors or the initial purchasers is making an offering of the Notes in any jurisdiction where this offering is not permitted. You should not assume that the information contained in this Offering Memorandum is accurate as at any date other than the date on the front of this Offering Memorandum.

In making an investment decision, prospective investors must rely on their own examination of the Issuer and the terms of this offering, including the merits and risks involved.

This Offering Memorandum has been prepared by the Issuer solely for use in connection with the proposed offering of the Notes described in this Offering Memorandum and for application for listing particulars to be approved by the Luxembourg Stock Exchange and for the Notes to be admitted to the Official List of the Luxembourg Stock Exchange and admitted to trading on its Euro MTF Market. The Offering Memorandum may only be used for the purpose for which it has been published. This Offering Memorandum does not constitute an offer to any other person or to the public generally to subscribe for or otherwise acquire Notes.

In addition, none of the Issuer, the Guarantors or the initial purchasers or any of our or their respective representatives is making any representation to you regarding the legality of an investment in the Notes, and you should not construe anything in this Offering Memorandum as legal, business or tax advice. You should consult your own advisers as to legal, tax, business, financial and related aspects of an investment in the Notes. You must comply with all laws applicable in any jurisdiction in which you buy, offer or sell the Notes or possess or distribute this Offering Memorandum, and you must obtain all applicable consents and approvals; none of the Issuer, the Guarantors or the initial purchasers shall have any responsibility for any of the foregoing legal requirements.

The Issuer is an indirect, wholly owned subsidiary of Tata Motors Limited (“Tata Motors”). Tata Motors does not assume any liability for or guarantee the Notes and investors in the Notes will not have any recourse against Tata Motors in the event of default by Jaguar Land Rover Automotive plc or any of the Guarantors of their respective obligations under the terms of the Notes and the Note Guarantees.

The initial purchasers make no representation or warranty, express or implied, as to the accuracy or completeness of the information contained in this Offering Memorandum. Nothing contained in this Offering Memorandum is, or shall be relied upon as, a promise or representation by the initial purchasers as to the past or future.

The Issuer and the Guarantors accept responsibility for the information contained in this Offering Memorandum. To the best of the knowledge and belief of the Issuer and the Guarantors, the information contained in this Offering Memorandum is in accordance with the facts and does not omit anything likely to affect the import of such information. However, the information set out under the headings “Exchange Rates”, “Summary”, “Operating and Financial Review and Prospects” and “Our Business” includes extracts from information and data, including industry and market data and estimates, released by publicly available sources in Europe and elsewhere. While we accept responsibility for the accurate extraction and summarisation of such information and data, we have not independently verified the accuracy of such information and data and we accept no further responsibility in respect thereof.

Unless the context indicates otherwise, when we refer to “we”, “us”, “our”, “Jaguar Land Rover”, “the Group” and “our Group” for the purposes of this Offering Memorandum, we are referring to the Issuer and its subsidiaries.

The information set out in relation to sections of this Offering Memorandum describing clearing arrangements, including the section entitled “Book-Entry; Delivery and Form”, is subject to any change in or reinterpretation of the rules, regulations and procedures of The Depository Trust Company (“DTC”) currently in effect. While the Issuer accepts responsibility for accurately summarising the information concerning DTC, it accepts no further responsibility in respect of such information. In addition, this Offering Memorandum contains summaries believed to be accurate with respect to certain documents, but reference is made to the actual documents for complete information. All such summaries are qualified in their

entirety by such reference. Copies of documents referred to herein will be made available to prospective investors upon request to us or the initial purchasers.

By receiving this Offering Memorandum, you acknowledge that you have had an opportunity to request from the Issuer for review, and that you have received, all additional information you deem necessary to verify the accuracy and completeness of the information contained in this Offering Memorandum. You also acknowledge that you have not relied on the initial purchasers in connection with your investigation of the accuracy of this information or your decision whether to invest in the Notes.

The Issuer is making this offering subject to the terms described in this Offering Memorandum and the purchase agreement relating to the Notes entered into between the Issuer and the initial purchasers (the “Purchase Agreement”).

None of the US Securities and Exchange Commission (the “SEC”), any state securities commission or any other regulatory authority has approved or disapproved of the Notes, nor have any of the foregoing authorities passed upon or endorsed the merits of this offering or the accuracy or adequacy of this Offering Memorandum. Any representation to the contrary is a criminal offence in the United States and could be a criminal offence in other countries.

The Notes are subject to restrictions on transferability and resale and may not be transferred or resold, except as permitted under the US Securities Act and the applicable state securities laws, pursuant to registration or exemption therefrom. As a prospective investor, you should be aware that you may be required to bear the financial risks of this investment for an indefinite period of time. Please refer to the sections in this Offering Memorandum entitled “Plan of Distribution” and “Notice to Investors”.

The distribution of this Offering Memorandum and the offering and sale of the Notes in certain jurisdictions may be restricted by law. Please see “Notice to US Investors”, “Notice to EEA Investors” and “Notice to UK Investors”.

The Notes were issued in the form of global notes. Please see “Book-Entry; Delivery and Form”.

NOTICE TO US INVESTORS

Each purchaser of the Notes will be deemed to have made the representations, warranties and acknowledgements that are described in this Offering Memorandum under “Notice to Investors”.

The Notes offered hereby have not been and will not be registered under the US Securities Act or with any securities regulatory authority of any state or other jurisdiction in the United States and may not be offered or sold in the United States, except to “qualified institutional buyers”, or QIBs, within the meaning of Rule 144A in reliance on an exemption from the registration requirements of the US Securities Act provided by Rule 144A. Prospective purchasers are hereby notified that the sellers of the Notes may be relying on the exemption from the registration requirements of Section 5 of the US Securities Act provided by Rule 144A. The Notes may be offered and sold to persons outside the United States that are not, and are not acting for the account or benefit of, “U.S. persons” (as defined in Regulation S) in reliance on Rule 903 or Rule 904 of Regulation S. For a description of certain further restrictions on resale or transfer of the Notes, please see “Notice to Investors”.

The Notes described in this Offering Memorandum have not been registered with, recommended by or approved by the SEC, any state securities commission in the United States or any other securities commission or regulatory authority, nor has the SEC, any state securities commission in the United States or any such securities commission or authority passed upon the accuracy or adequacy of this Offering Memorandum. Any representation to the contrary is a criminal offence.

THE NOTES MAY NOT BE OFFERED TO THE PUBLIC WITHIN ANY JURISDICTION. BY ACCEPTING DELIVERY OF THIS OFFERING MEMORANDUM, YOU AGREE NOT TO OFFER, SELL, RESELL, TRANSFER OR DELIVER, DIRECTLY OR INDIRECTLY, ANY NOTES TO THE PUBLIC.

NOTICE TO EEA INVESTORS

This Offering Memorandum has been prepared on the basis that any offer of Notes in any Member State of the European Economic Area which has implemented the Prospectus Directive (each, a “Relevant Member State”) will be made pursuant to an exemption under the Prospectus Directive from the requirement to publish a prospectus for offers of Notes. Accordingly, any person making or intending to make an offer in that Relevant Member State of Notes which are the subject

of the offering contemplated by this Offering Memorandum may only do so in circumstances in which no obligation arises for the Issuer or any of the initial purchasers to publish a prospectus pursuant to Article 3 of the Prospectus Directive in relation to such offer. Neither the Issuer nor the initial purchasers have authorised, nor do they authorise, the making of any offer of Notes in circumstances in which an obligation arises for the Issuer or the initial purchasers to publish a prospectus for such offer. The expression Prospectus Directive means Directive 2003/71/EC (as amended, including by Directive 2010/73/EU), and includes any relevant implementing measure in the Relevant Member State.

NOTICE TO UK INVESTORS

This Offering Memorandum has not been approved by an authorised person in the United Kingdom. This Offering Memorandum is for distribution only to persons who: (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the “Financial Promotion Order”); (ii) are persons falling within Article 49(2)(a) to (d) (high net worth companies, unincorporated associations, etc.) of the Financial Promotion Order; (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as “relevant persons”). This Offering Memorandum is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this Offering Memorandum relates is available only to relevant persons and will be engaged in only with relevant persons.

NOTICE TO CANADIAN INVESTORS

The Notes may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 *Prospectus Exemptions* or subsection 73.3(1) of the *Securities Act* (Ontario), and are permitted clients, as defined in National Instrument 31-103 *Registration Requirements, Exemptions and Ongoing Registrant Obligations*. Any resale of the Notes must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this offering memorandum (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser’s province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 of National Instrument 33-105 *Underwriting Conflicts* (“NI 33-105”), the initial purchasers are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

NOTICE REGARDING SERVICE OF PROCESS AND ENFORCEMENT OF JUDGMENTS

ALL OR SUBSTANTIALLY ALL OF THE DIRECTORS AND EXECUTIVE OFFICERS OF THE ISSUER ARE NON-RESIDENTS OF THE UNITED STATES. ALL OR A SUBSTANTIAL PORTION OF THE ASSETS OF SUCH NON-RESIDENT PERSONS AND A SUBSTANTIAL PORTION OF THE ASSETS OF THE ISSUER ARE LOCATED OUTSIDE THE UNITED STATES. AS A RESULT, IT MAY NOT BE POSSIBLE FOR INVESTORS TO EFFECT SERVICE OF PROCESS WITHIN THE UNITED STATES UPON SUCH PERSONS OR THE ISSUER, OR TO ENFORCE AGAINST THEM IN US COURTS JUDGMENTS OBTAINED IN SUCH COURTS PREDICATED UPON THE CIVIL LIABILITY PROVISIONS OF THE FEDERAL SECURITIES LAWS OF THE UNITED STATES. FURTHERMORE, THE ISSUER IS ADVISED THAT: (1) RECOGNITION AND ENFORCEMENT IN ENGLAND AND WALES OF JUDGMENTS IN CIVIL AND COMMERCIAL MATTERS FROM US FEDERAL OR STATE COURTS IS NOT AUTOMATIC BUT IS INSTEAD SUBJECT TO VARIOUS CONDITIONS BEING MET; AND (2) IT IS QUESTIONABLE WHETHER THE COURTS OF ENGLAND AND WALES WOULD ACCEPT JURISDICTION AND IMPOSE CIVIL LIABILITY IF THE ORIGINAL ACTION WAS COMMENCED IN ENGLAND AND WALES, INSTEAD OF THE UNITED STATES, AND PREDICATED SOLELY UPON US FEDERAL SECURITIES LAWS.

STABILISATION

In connection with the offering of the Notes, the Stabilising Manager (or persons acting on behalf of the Stabilising Manager) may over-allot Notes or effect transactions with a view to supporting the market price of the Notes at a

level higher than that which might otherwise prevail. However stabilisation action may not necessarily occur. Any stabilisation action may begin on or after the date on which adequate public disclosure of the terms of the offering of the Notes is made and, if begun, may cease at any time, but it must end no later than 30 days after the date on which the Issuer received the proceeds of the issue, or no later than 60 days after the date of the allotment of the Notes, whichever is the earlier. Any stabilisation action or over-allotment must be conducted by the Stabilising Manager (or persons acting on its behalf) in accordance with all applicable laws and rules.

DEFINED TERMS USED IN THIS OFFERING MEMORANDUM

The following terms used in this Offering Memorandum have the meanings assigned to them below.

Notes

“2011 Notes”	The 8.125% Senior Notes due 2021 issued 19 May 2011 and fully redeemed on 16 May 2016.
“2012 Notes”	The 8.250% Senior Notes due 2020 issued 27 March 2012 and fully redeemed on 15 March 2016.
“January 2013 Notes”	The existing \$500,000,000 5.625% Senior Notes due 2023 issued 28 January 2013.
“December 2013 Notes”	The existing \$700,000,000 4.125% Senior Notes due 2018 issued 17 December 2013.
“January 2014 Notes”	The existing £400,000,000 5.000% Senior Notes due 2022 issued 31 January 2014.
“October 2014 Notes”	The existing \$500,000,000 4.250% Senior Notes due 2019 issued 31 October 2014.
“February 2015 Notes”	The existing £400,000,000 3.875% Senior Notes due 2023 issued 24 February 2015.
“March 2015 Notes”	The existing \$500,000,000 3.500% Senior Notes due 2020 issued 6 March 2015.
“January 2017 Euro Notes”	The existing €650,000,000 2.200% Senior Notes due 2024 issued 17 January 2017.
“January 2017 Pound Notes”	The existing £300,000,000 2.750% Senior Notes due 2021 issued 24 January 2017.
“January 2017 Notes”	The January 2017 Euro Notes and the January 2017 Pound Notes.
“Existing Notes”	The January 2013 Notes, the December 2013 Notes, the January 2014 Notes, the October 2014 Notes, the February 2015 Notes, the March 2015 Notes, the January 2017 Euro Notes and the January 2017 Pound Notes.

Certain Other Terms

“Board” or “board of directors”	The board of directors of the Issuer.
“British pounds”, “GBP”, “pounds sterling”, “sterling”, or “£”	Pounds sterling, the currency of the United Kingdom of Great Britain and Northern Ireland.
“Chery”	Chery Automobile Company Ltd.
“China Joint Venture”	Chery Jaguar Land Rover Automotive Co., Ltd., our joint venture with Chery to develop, manufacture and sell certain Jaguar Land Rover vehicles and at least one own-branded vehicle in China.

“Chinese yuan”, “CNY” or “yuan”	Chinese yuan, the currency of the People’s Republic of China.
“EBIT”	Profit for the period before income tax expense, exceptional items, finance expense (net), finance income, gains/losses on unrealised commodity derivatives, foreign exchange gains/losses on unrealised derivatives as well as debt (not designated as hedges) and realised currency derivatives entered into to hedge certain foreign currency debt.
“EBITDA”	Profit for the period before income tax expense, exceptional items, finance expense (net), finance income, gains/losses on unrealised commodity derivatives, foreign exchange gains/losses on unrealised derivatives as well as debt (not designated as hedges) and realised currency derivatives entered into to hedge certain foreign currency debt, share of profit/loss from equity accounted investments and depreciation and amortisation.
“EMC”	The engine manufacturing centre in Wolverhampton.
“EUR”, “euro” or “€”	Euro, the currency of the member states of the European Union participating in the European Monetary Union.
“Fiscal 2015”	Year beginning 1 April 2014 and ended 31 March 2015.
“Fiscal 2016”	Year beginning 1 April 2015 and ended 31 March 2016.
“Fiscal 2017”	Year beginning 1 April 2016 and ended 31 March 2017.
“Fiscal 2018”	Year beginning 1 April 2017 and ending 31 March 2018.
“Fiscal year”	Year beginning 1 April and ending 31 March of the following year.
“Ford”	Ford Motor Company and its subsidiaries.
“Free cash flow”	Net cash generated from operating activities less net cash used in investing activities (excluding movements in short-term deposits) and after finance expenses and fees and payments of lease obligations. Free cash flow also includes foreign exchange gains/losses on short-term deposits and cash and cash equivalents.
“IAS 34”	International Accounting Standard (IAS 34) <i>Interim Financial Reporting</i> .
“IAS 36”	International Accounting Standard (IAS 36) <i>Impairment of Assets</i> .
“IAS 39”	International Accounting Standard (IAS 39) <i>Financial Instruments: Recognition and Measurement</i> .
“IFRS”	International Financial Reporting Standards and interpretations issued by the International Accounting Standards Board and adopted by the European Union.
“IFRS—IASB”	International Financial Reporting Standards and interpretations issued by the International Accounting Standards Board.
“Indenture”	The indenture governing the Notes offered hereby.

“Issuer”	Jaguar Land Rover Automotive plc, a public limited company incorporated under the laws of England and Wales.
“Jaguar Land Rover”, “Jaguar Land Rover Group”, “Group”, “we”, “us” and “our”	Jaguar Land Rover Automotive plc and its subsidiaries (including any of their predecessors).
“LIBOR”	London Interbank Offered Rate.
“MTM”	Mark-to-market.
“National sales companies” or “NSCs”	National sales companies for Jaguar Land Rover products, which are all wholly owned indirect subsidiaries of the Issuer.
“Net cash”	Cash and cash equivalents plus short-term deposits less total balance sheet borrowings.
“Net Income/(expense)”	Profit/(loss) after tax or profit/(loss) for the period.
“Overseas”	The marketing region including Australia, Brazil, India, Japan, Russia, South Korea, South Africa, New Zealand, Sub-Saharan Africa importers, Latin America importers, Asia Pacific importers, Middle East and North Africa importers as well as all other minor markets. The volumes from Hong Kong and Taiwan have been included in Overseas since the beginning of Fiscal 2017.
“Product and other investment”	Cash used in the purchase of property, plant and equipment, intangible assets, investments in subsidiaries, joint ventures, associates and other trading investments and expensed research and development costs.
“Retail volumes”	Aggregate number of finished vehicles sold by dealers (and in limited numbers by us directly) to end users. Although retail volumes do not directly impact our revenue, we consider retail volumes as the best indicator of consumer demand for our vehicles and the strength of our brands.
“Revolving Credit Facility”	The £1,885,000,000 unsecured syndicated revolving credit facility entered into in July 2015 and maturing in July 2022, as amended.
“Rs”	Indian rupees, the currency of the Republic of India.
“Russian rouble”	Russian roubles, the currency of Russian Federation.
“SEC”	United States Securities and Exchange Commission.
“US dollars”, “USD”, “US\$” or “\$”	US dollars, the currency of the United States of America.
“US GAAP”	Generally accepted accounting principles in the United States of America.
“Wholesale volumes”	Aggregate number of finished vehicles sold to (i) dealers in the United Kingdom or foreign markets in which we have established an NSC and (ii) importers in all other markets. Generally, we recognise revenue on the sale of finished vehicles and parts (net of discounts, sales incentives, customer bonuses and rebates granted) when products are delivered to dealers and, in connection with sales to importers, when products are delivered to a

carrier for export sales.

PRESENTATION OF FINANCIAL AND OTHER DATA

Issuer

Jaguar Land Rover Automotive plc (formerly Jaguar Land Rover PLC), which is the holding company of the Jaguar Land Rover business, was incorporated in England and Wales as a private limited company on 18 January 2008, and registered under the name TML Holdings Limited on 6 February 2008 and the name Jaguar Land Rover Limited on 9 June 2008. On 6 April 2011, it was re-registered in England and Wales as a public limited company. On 28 December 2012, its name was changed to Jaguar Land Rover Automotive plc. The Issuer is a direct, wholly owned subsidiary of TML Holdings Pte Limited (Singapore) (“TMLH”), itself wholly owned by Tata Motors, which is listed on the Bombay Stock Exchange, the National Stock Exchange of India and the New York Stock Exchange. Tata Sons Limited (“Tata Sons”), together with its subsidiaries, owned 33.99% of the voting rights capital in Tata Motors as at 30 June 2017. In this Offering Memorandum, we refer to, and present consolidated financial information for, the Issuer and its consolidated subsidiaries.

Financial Statements and Other Financial Information

This Offering Memorandum includes:

- the audited consolidated financial statements of Jaguar Land Rover Automotive plc and its subsidiaries as at and for the year ended 31 March 2017 (the “2017 Consolidated Financial Statements”);
- the audited consolidated financial statements of Jaguar Land Rover Automotive plc and its subsidiaries as at and for the year ended 31 March 2016 (the “2016 Consolidated Financial Statements”);
- the audited consolidated financial statements of Jaguar Land Rover Automotive plc and its subsidiaries as at and for the year ended 31 March 2015 (the “2015 Consolidated Financial Statements”); and
- the unaudited condensed consolidated interim financial statements of Jaguar Land Rover Automotive plc and its subsidiaries as at 30 June 2017 and for the three months ended 30 June 2017 and 2016 (the “Condensed Consolidated Interim Financial Statements” and, together with the 2017 Consolidated Financial Statements, the 2016 Consolidated Financial Statements and the 2015 Consolidated Financial Statements, the “Consolidated Financial Statements”).

We have derived the consolidated financial data for the fiscal years ended 31 March 2017, 2016 and 2015 and the interim consolidated financial data for the three months ended 30 June 2017 and 2016 from the Consolidated Financial Statements included elsewhere in this Offering Memorandum. The financial figures for the years ended 31 March 2016 and 2015 have been restated due to the change in accounting policy for presentation of foreign exchange gains and losses, as set out in Note 2 to the 2017 Consolidated Financial Statements. The financial figures for the three months ended 30 June 2016 have been restated due to the change in accounting policy for presentation of foreign exchange gains and losses, as set out in Note 1 to the Condensed Consolidated Interim Financial Statements.

This Offering Memorandum also includes the unaudited condensed consolidated financial information for the twelve months ended 30 June 2017 for Jaguar Land Rover Automotive plc and its subsidiaries, which has been derived by aggregating without adjustments the relevant results of the year ended 31 March 2017 and the three months ended 30 June 2017 and subtracting the three months ended 30 June 2016 to derive results for the twelve months ended 30 June 2017. The unaudited condensed consolidated financial information for the twelve months ended 30 June 2017 has been prepared solely for the purpose of this Offering Memorandum, is not prepared in the ordinary course of our financial reporting, and has not been audited or reviewed. The unaudited condensed consolidated financial information for the twelve months ended 30 June 2017 presented herein is not required by or presented in accordance with IFRS or any other generally accepted accounting principles.

The 2017 Consolidated Financial Statements, 2016 Consolidated Financial Statements and the 2015 Consolidated Financial Statements have been prepared in accordance with IFRS and the Condensed Consolidated Interim Financial Statements have been prepared in accordance with IAS 34. In making an investment decision, you must rely upon your own examination of the terms of the offering of the Notes and the financial information contained in this Offering Memorandum. You should also consult your own professional advisers for an understanding of the differences between IFRS and US GAAP and how those differences could affect the financial information contained in this Offering Memorandum. There are a number of differences between IFRS and US GAAP. We have not prepared financial statements in accordance with

US GAAP or reconciled our financial statements to US GAAP and are therefore unable to identify or quantify the differences that may impact our reported profits, financial position or cash flows were they to be reported under US GAAP.

We would not be able to capitalise product development costs if we were to prepare our financial statements in compliance with US GAAP. Under IFRS, research costs are charged to the income statement in the year in which they are incurred. Product development costs incurred on new vehicle platforms, engines, transmissions and new products must, however, be capitalised and recognised as intangible assets when (i) feasibility has been established, (ii) we have committed technical, financial and other resources to complete the development and (iii) it is probable that the relevant asset will generate probable future economic benefits. The costs capitalised include the cost of materials, direct labour and directly attributable overhead expenditure incurred up to the date the asset is available for use. Interest costs incurred in connection with the relevant development are capitalised up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings if no specific borrowings have been incurred for the asset. We amortise product development costs on a straight-line basis over the estimated useful life of the intangible assets. Capitalised development expenditure is measured at cost less accumulated amortisation and accumulated impairment loss.

The preparation of financial statements in conformity with IFRS requires us to use certain critical accounting estimates. It also requires our board of directors to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the Consolidated Financial Statements, are described in "Operating and Financial Review and Prospects—Critical Accounting Policies".

The Consolidated Financial Statements have been prepared based on the fiscal year and are presented in British pounds rounded to the nearest £1.0 million. The Consolidated Financial Statements have been prepared under the historical cost convention modified for certain items carried at fair value, as stated in the accounting policies set out in the Consolidated Financial Statements.

Internal Controls

Upon an evaluation of the effectiveness of the design and operation of our internal controls over financial reporting conducted as part of the corporate governance and public disclosure obligations of our parent, Tata Motors, we concluded that there was a material weakness, such that our internal controls over financial reporting were not effective as at 31 March 2015. A material weakness, under the applicable auditing standards established by the Public Company Accounting Oversight Board (PCAOB) in the United States, is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis.

The material weakness identified with respect to the year ended 31 March 2015 consisted of a deficiency of the design of the review controls relating to complex derivative instruments designated in hedge relationship during the year ended 31 March 2015. Such review controls were not sufficiently direct and precise, and, as a result, an inappropriate method for prospective hedge effectiveness testing was used at inception for these foreign exchange and commodities derivative instruments. Our management determined that these complex derivative instruments did not qualify for hedge accounting in accordance with IAS 39. As a result of the deficiency, changes in the fair value of these complex derivative instruments were initially recorded in the hedging reserve as part of other comprehensive income. Following identification of the deficiency, the amount has been appropriately recorded in our consolidated income statement for the year ended 31 March 2015, and not under other comprehensive income. Following the identification of the deficiency relating to complex derivatives designated in hedge transactions described above in the first quarter of Fiscal 2016, management designed and implemented a preventive control consisting of a review at inception of all complex derivative instruments designated in hedge relationships by technical accounting specialists. This control was subject to formal remediation testing. The specific remediation actions taken by management included the (i) design and implementation of a daily review by internal financial instrument specialists of all derivative instruments designated in a hedge relationship at inception or thereafter if a hedge relationship is re-designated to ensure that the designation, documentation and method of hedge effectiveness testing is appropriate before any changes relating to the value of such instrument are accounted and (ii) implementation of an additional weekly detective control to review appropriateness of hedge accounting for all complex derivative instruments by internal technical accounting specialists. Based upon the measures we have adopted to remedy this material weakness and the results of our tests of their effectiveness, we have concluded that this material weakness was remediated as at 31 March 2016.

Due to its inherent limitations, however, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls

may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Non-IFRS Financial Measures

In this Offering Memorandum, we have included references to certain non-IFRS measures, including EBITDA, EBIT, free cash flow, net cash and product and other investment. EBITDA, EBIT, free cash flow, net cash and product and other investment are not IFRS measures and should not be construed as alternatives to any IFRS measure such as revenue, gross profit, other income, net profit or cash flow generated from/(used in) operating activities. We define “EBITDA” as profit for the period before income tax expense, exceptional items, finance expense (net), finance income, gains/losses on unrealised commodity derivatives, foreign exchange gains/losses on unrealised derivatives as well as debt (not designated as hedges) and realised currency derivatives entered into to hedge certain foreign currency debt, share of profit/loss from equity accounted investments and depreciation and amortisation. We define “EBIT” as profit for the period before income tax expense, exceptional items, finance expense (net), finance income, gains/losses on unrealised commodity derivatives, foreign exchange gains/losses on unrealised derivatives as well as debt (not designated as hedges) and realised currency derivatives entered into to hedge certain foreign currency debt. We define “free cash flow” as net cash generated from operating activities less net cash used in investing activities (excluding movements in short-term deposits) and after finance expenses and fees and payments of lease obligations. Free cash flow also includes foreign exchange gains/losses on short-term deposits and cash and cash equivalents. We define “net cash” as cash and cash equivalents plus short-term deposits less total balance sheet borrowings. We define “product and other investment” as cash used in the purchase of property, plant and equipment, intangible assets, investments in subsidiaries, joint ventures, associates and other trading investments and expensed research and development costs. In this Offering Memorandum, we present EBITDA, EBIT, free cash flow, net cash, product and other investment and related ratios for Jaguar Land Rover Automotive plc and its consolidated subsidiaries. EBITDA, EBIT, free cash flow, net cash, product and other investment and related ratios should not be considered in isolation and are not measures of our financial performance or liquidity under IFRS and should not be considered as an alternative to profit or loss for the period or any other performance measures derived in accordance with IFRS or as an alternative to cash flow from operating, investing or financing activities or any other measure of our liquidity derived in accordance with IFRS. EBITDA, EBIT, free cash flow, net cash and product and other investment do not necessarily indicate whether cash flow will be sufficient or available for cash requirements and may not be indicative of our results of operations. In addition, EBITDA, EBIT, free cash flow, net cash and product and other investment, as we define them, may not be comparable to other similarly titled measures used by other companies. Please see “Summary Consolidated Financial and Other Data” for a quantitative reconciliation of EBITDA to profit for the period, free cash flow to net cash generated from/(used in) operating activities, net cash to cash and cash equivalents, and product and other investment to net cash used in investing activities, in each case the nearest comparable IFRS financial measure.

EBITDA as presented in this Offering Memorandum differs from the definition of “Consolidated EBITDA” that is contained in the Indenture. EBITDA and free cash flow have limitations as analytical tools, and you should not consider them in isolation. Some of these limitations in respect of EBITDA include the following: (i) EBITDA does not reflect our capital expenditures or capitalised product development costs, our future requirements for capital expenditures or our contractual commitments; (ii) EBITDA does not reflect changes in, or cash requirements for, our working capital needs; (iii) EBITDA does not reflect the interest expense, or the cash requirements necessary, to service interest or principal payments on our debt; (iv) although depreciation and amortisation are non-cash charges, the assets being depreciated and amortised will often need to be replaced in the future and EBITDA does not reflect any cash requirements that would be required for such replacements; and (v) EBITDA excludes the impact of exceptional items and one time reserves and charges.

This Offering Memorandum includes unaudited consolidated pro forma financial data which have been adjusted to reflect certain effects of the issuance of the Notes offered hereby and the use of proceeds therefrom, as described under “Use of Proceeds”. The unaudited consolidated pro forma financial data have been prepared for illustrative purposes only and do not purport to represent what our actual consolidated net debt or net interest expense would have been if the issuance of the Notes offered hereby had occurred (i) on 30 June 2017 for the purposes of the calculation of pro forma net cash/(debt) and (ii) on 1 July 2016 for the purposes of the calculation of pro forma net finance costs, nor do they purport to project our consolidated net cash/(debt) and net finance costs at any future date. The unaudited pro forma adjustments and the unaudited pro forma financial data set forth in this Offering Memorandum are based on available information and certain assumptions and estimates that we believe are reasonable and may differ materially from the actual adjusted amounts.

Certain data contained in this Offering Memorandum, including financial information, have been subject to rounding adjustments. Accordingly, in certain instances, the sum of the numbers in a column or a row in tables may not conform exactly to the total figure given for that column or row.

The financial information included in this Offering Memorandum is not intended to comply with reporting requirements of the SEC and will not be subject to review by the SEC.

INDUSTRY AND MARKET DATA

Throughout this Offering Memorandum, we have used industry and market data obtained from management estimates, independent industry and official publications, market research, internal surveys and estimates, and other publicly available information. Industry publications generally state that the information they contain has been obtained from sources believed to be reliable but that the accuracy and completeness of such information is not guaranteed. We believe that such data are useful in helping investors understand the industry in which we operate and our position within the industry. However, we may not have access to the facts and assumptions underlying the numerical data and other information extracted from publicly available sources and have not independently verified any data provided by third parties or industry or general publications. Neither we nor any of the initial purchasers make any representation as to the accuracy of such information. Similarly, while we believe that our internal surveys or estimates are reliable, they have not been verified by independent sources and we cannot assure you of their accuracy.

The total industry car volume data presented in this Offering Memorandum has been compiled using relevant data available at the time of publishing this Offering Memorandum, compiled from national automotive associations such as the Society of Motor Manufacturers and Traders in the UK and the ACEA in Europe, according to their segment definitions, which may differ from those used by us.

FORWARD-LOOKING STATEMENTS

This Offering Memorandum contains certain forward-looking statements within the meaning of the US federal securities laws. These forward-looking statements involve known and unknown risks, uncertainties and other factors which are in some cases beyond our control and may cause our actual results or performance to differ materially from those expressed or implied by such forward-looking statements, including, among other things:

- deterioration in economic, political and social conditions in the United Kingdom and Europe, North America, China and other markets in which we operate and sell our products could have a significant adverse impact on our sales and results of operations;
- the impact of the United Kingdom's contemplated exit from the European Union on our business, including potential changes in export volumes and customer behaviour, potential currency fluctuations, an uncertain regulatory climate and general macroeconomic instability;
- intensifying industry competition that could materially and adversely affect our sales and results of operations;
- the potential for new drive and other technologies being developed and the resulting effects on the automobile market;
- the electric vehicle market may not evolve as anticipated, including that this market may remain relatively small;
- new industry consolidation or alliances that allow our competitors to make strategic cost savings;
- delays or limited availability of key inputs and related cost increases as a result of accidents or natural disasters;
- new or changing laws, regulations and government policies, including those specifically regarding the automotive industry, such as industrial licensing, environmental regulations, safety regulations and the potential that we may not be able to comply with these regulations and requirements;
- import restrictions and duties, excise duties, sales taxes, value added taxes, product range restrictions, diesel and gasoline prices and road network enhancement projects;
- the implementation and success of competitive new products, designs and innovations, and changing consumer demand for the premium cars and all-terrain vehicles we sell;
- future customer demand for premium performance cars and all-terrain vehicles;
- the seasonal effect of a substantial decrease in our sales during certain quarters, which could have a material adverse impact on our financial condition;
- fluctuations in interest rates and the currency exchange rate of our revenues against those currencies in which we incur costs and our functional currency;
- the purchasing power of retail customers in the future and general consumer confidence for retail and corporate customers;
- the availability and cost of consumer finance to our customers and fluctuations in used car valuations;
- future over-dependence on certain key markets increasing the risk of negative impact following adverse changes in consumer demand in those markets;
- disruptions to our supply chains or shortages of essential raw materials that may adversely affect our production and results of operations;

- increases in input prices that may have a material adverse impact on our result of operations;
- cybersecurity and other information technology risks;
- environmental, health and safety and other compliance requirements that may affect our operating facilities and result in significant costs;
- the impact of climate change;
- the implementation of new projects, including overseas joint ventures or automotive manufacturing facilities, and growth strategies, including cost-reduction efforts and entry into new markets and any potential mergers and acquisitions in the future;
- under-performance of our distribution channels may adversely affect our sales and results of operations;
- our operations could expose us to economic, political and other risks, including unexpected changes in regulatory and legal regimes, governmental investigations, political instability, wars, terrorism, multinational conflicts, natural disasters, fuel shortages/prices, epidemics, labour strikes and other risks in the markets in which we operate and in emerging market countries in which we plan to expand;
- changes in requirements under long term supply arrangements committing us to purchase minimum or fixed quantities of certain parts, or to pay a minimum amount to the seller, which could have a material adverse impact on our financial condition or results of operations;
- disruptions to our manufacturing, design and engineering facilities and their operations;
- credit and liquidity risks and the terms on which we finance our working capital and capital and product development expenditures and investment requirements;
- potential product liability, warranties and recalls of the products we manufacture;
- the protection and preservation of our intellectual property;
- the risks associated with joint ventures with third parties;
- any future failure to implement and manage our strategy;
- any future requirement to impair the value of our intangible assets in our financial statements;
- potential labour unrest and the loss of one or more key personnel or the potential inability to attract and retain highly qualified employees;
- pension obligations, which may prove more costly than currently anticipated, and the market value of assets in our pension plans, which could decline;
- our insurance coverage may not be adequate to protect us against all potential losses;
- the use of lithium-ion battery cells in some of our vehicles;
- legal proceedings and governmental and supra-national investigations, as well as adverse publicity connected with such proceedings and investigations;
- increasing tax liabilities in the geographical markets where we operate;
- failures and weaknesses in our internal controls;
- new and changing corporate governance and public disclosure requirements;

- relations with our shareholder; and
- other factors beyond our control.

All statements other than statements of historical fact included in this Offering Memorandum, including, without limitation, statements regarding our future financial position, risks and uncertainties related to our business, strategy, capital expenditures, projected costs and our plans and objectives for future operations, if any, may be deemed to be forward-looking statements. These forward-looking statements are subject to a number of risks and uncertainties, including those identified above and under the “Risk Factors” section in this Offering Memorandum. Words such as “believe”, “expect”, “anticipate”, “project”, “may”, “intend”, “aim”, “will”, “should”, “could”, “estimate” and similar expressions or the negatives of these expressions are intended to identify forward-looking statements. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

The risks described in the “Risk Factors” section in this Offering Memorandum are not exhaustive. Other sections of this Offering Memorandum describe additional factors that could adversely affect our business, financial condition or results of operations. Moreover, we operate in a very competitive and rapidly changing environment. We may face new risks from time to time, and it is not possible for us to predict all such risks; nor can we assess the impact of all such risks on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, you should not place undue reliance on forward-looking statements as a prediction of actual results.

EXCHANGE RATES

Exchange Rate between British Pounds and the US Dollar

The table below sets out the period end, the average, high and low exchange rates as published by Bloomberg (London Composite Rate) expressed in US dollars per British pound, for the fiscal years indicated.

<u>Year ended 31 March</u>	<u>US dollars per British pound⁽¹⁾</u>			
	<u>Period end</u>	<u>Average⁽²⁾</u>	<u>High</u>	<u>Low</u>
2013	1.5195	1.5805	1.6276	1.4902
2014	1.6681	1.5899	1.6762	1.4858
2015	1.4843	1.6129	1.7165	1.4722
2016	1.4394	1.5078	1.5872	1.3876
2017	1.2547	1.3074	1.4810	1.2068

(1) Source: Bloomberg.

(2) The daily average Bloomberg (London Composite Rate) for British pounds during the applicable period.

For the three month period ended 30 June 2017, the period end, the average, high and low exchange rates as published by Bloomberg (London Composite Rate) expressed in US dollars per British pound were 1.3008, 1.2796, 1.3023 and 1.2385 respectively.

The table below sets out the period end, high and low exchange rates, expressed in US dollars per British pound, for the months indicated prior to the date of this Offering Memorandum.

<u>Month</u>	<u>US dollars per British pound⁽¹⁾</u>		
	<u>Period end</u>	<u>High</u>	<u>Low</u>
April 2017	1.2950	1.2950	1.2385
May 2017	1.2890	1.3023	1.2796
June 2017	1.3008	1.3008	1.2625
July 2017	1.3190	1.3190	1.2849
August 2017	1.2894	1.3238	1.2790
September 2017	1.3314	1.3582	1.2919
October 2017 (to 3 October)	1.3248	1.3273	1.3248

(1) Source: Bloomberg.

The US dollar per British pound exchange rate on 3 October 2017 was \$1.3248 = £1.00.

Our inclusion of the rates listed above is not meant to suggest that the British pound amounts actually represent such US dollar amounts or that such amounts could have been converted into US dollars at such rate or any other rate. For a discussion of the impact of the exchange rate fluctuations on our financial condition and results of operations, please see "Operating and Financial Review and Prospects". We did not use the rates listed above in the preparation of our Consolidated Financial Statements.

SUMMARY

The following summary highlights selected information from this Offering Memorandum and does not contain all of the information that you should consider before investing in the Notes. This Offering Memorandum contains specific terms of the Notes, as well as information about our business and detailed financial data. You should read this Offering Memorandum in its entirety, including the “Risk Factors” section and our Consolidated Financial Statements and the notes to those statements. In addition, certain statements include forward-looking information that involves risks and uncertainties. Please see “Forward-Looking Statements”.

Unless the context indicates otherwise, when we refer to “we”, “us”, “our”, “Jaguar Land Rover”, “the Group” and “our Group” for the purposes of this Offering Memorandum, we are referring to the Issuer and its subsidiaries.

Overview

We design, develop, manufacture and sell Jaguar premium sports saloons, sports cars and luxury performance SUVs and Land Rover premium all-terrain vehicles, as well as related parts, accessories and merchandise. We have a long tradition as a manufacturer of technologically advanced, premium passenger vehicles with internationally recognised brands, an exclusive product portfolio of award-winning vehicles, a global distribution network and strong research and development (“R&D”) capabilities, including the development of autonomous, connected and electrification technologies, as well as investing in innovative mobility solutions to overcome and address future travel and transport challenges. We plan to offer an electric drivetrain option on all of our new models by 2020. Our R&D operations currently consist of an engineering team of approximately 400 engineers, co-managed for Jaguar and Land Rover, sharing premium technologies, powertrains and vehicle architectures. Our vehicles are designed and developed by award-winning design teams, and we are committed to a continuing programme of new product design. Collectively, Jaguar and Land Rover’s product portfolio received 213 awards from leading international motoring writers, magazines and opinion leaders in Fiscal 2017, reflecting the strength of our model line-up and our design and engineering capabilities.

We operate a global sales and distribution network designed to achieve geographically diversified sales and facilitate growth in our key markets. Our four principal regional markets are Europe (excluding the United Kingdom and Russia), North America, the United Kingdom and China which, respectively, accounted for 24.4%, 20.7%, 16.8% and 24.4% of our retail volumes, including sales from our China Joint Venture and 26.5%, 25.0%, 21.9% and 11.6% of our wholesale volumes, excluding sales from our China Joint Venture in the three months ended 30 June 2017.

We operate three principal automotive manufacturing facilities, an engine manufacturing facility and two advanced design and engineering facilities in the United Kingdom and a manufacturing plant in Slovakia which is currently under construction, as well as a wholly owned manufacturing plant in Brazil. We have also established a manufacturing joint venture in China, which currently produces the Range Rover Evoque, Land Rover Discovery Sport and the long wheel base Jaguar XFL for sale in the local market. Globally, we employed a total of 40,857 employees, including agency personnel (but excluding China Joint Venture employees), as at 30 June 2017, of which 22,277 were employed in our manufacturing operations with the remaining 18,580 employed in other areas such as design, engineering and central corporate functions.

The following table presents our revenue, profit and EBITDA in Fiscal 2015, Fiscal 2016 and Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017.

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	(£ in millions)					
Revenue	22,106	22,286	24,339	5,355	5,599	24,583
Profit for the period	2,038	1,312	1,272	304	472	1,440
EBITDA.....	4,132	3,147	2,955	672	442	2,725

In Fiscal 2015, Fiscal 2016 and Fiscal 2017, we experienced solid vehicle sales and revenue growth, reflecting successful launches of new models, sustained appeal of existing products and geographic diversification, combined with a generally supportive global economic environment, notwithstanding geopolitical uncertainty and intensifying competition.

Our unit sales (on a retail basis and including sales through our China Joint Venture) for each of our brands for Fiscal 2015, Fiscal 2016, Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017 are set out in the table below:

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	Jaguar.....	76,930	94,449	172,848	31,806	41,266
Land Rover	385,279	427,122	431,161	100,947	96,197	426,411
Total.....	462,209	521,571	604,009	132,753	137,463	608,719
<i>Retail volumes from our China Joint Venture (included above).....</i>	<i>1,094</i>	<i>31,765</i>	<i>65,023</i>	<i>14,039</i>	<i>20,309</i>	<i>71,293</i>

Our unit sales (on a wholesale basis, excluding sales from our China Joint Venture) under each of our brands for Fiscal 2015, Fiscal 2016, Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017 are set out in the table below:

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	Jaguar.....	76,496	102,106	169,284	34,572	32,637
Land Rover	389,983	407,228	365,462	86,196	85,279	364,545
Total.....	466,479	509,334	534,746	120,768	117,916	531,894
<i>Wholesale volumes from our China Joint Venture (excluded above).....</i>	<i>4,044</i>	<i>34,751</i>	<i>66,060</i>	<i>13,588</i>	<i>20,560</i>	<i>73,032</i>

Wholesale volumes refer to the aggregate number of finished vehicles sold to dealers and importers. We recognise our revenue on the wholesale volumes we sell. Retail volumes refer to the aggregate number of finished vehicles sold by dealers to end users. We consider retail volumes the best indicator of consumer demand for our vehicles and the strength of our brand.

We are a wholly owned indirect subsidiary of Tata Motors, a member of the international conglomerate Tata Group. Tata Motors is the largest commercial vehicle manufacturer in terms of revenue in India and among the top six passenger vehicle manufacturers in terms of units sold in India during Fiscal 2017.

Our vehicles

Jaguar designs, develops and manufactures a range of premium sports cars, saloons and luxury performance SUVs recognised for their design, performance and quality and we are committed to a continuing programme of new product design and development. Our two UK based design and development centres are equipped with computer-aided design, manufacturing and engineering tools, and are configured for competitive product development cycle-time and efficient data management.

Jaguar's range of products comprises the F-TYPE two-seater sports car coupé and convertible, the F-PACE luxury performance SUV, the lightweight XF (including the long wheel base XFL for the Chinese market), the recently launched new XF Sportbrake, the XJ saloon and the XE sports saloon. The Jaguar E-PACE, our compact SUV is expected to go on general retail sale in certain markets in late 2017. In November 2016, we unveiled the Jaguar I-PACE Concept, our first all-electric vehicle at the 2016 Los Angeles Motor Show. The I-PACE is a five seater sports car powered by a 90kWh battery, providing an estimated range of 500km (NEDC cycle) and rapid charging in two hours, and twin-electric motors delivering all-wheel-drive performance, accelerating to 60 mph in around four seconds. We expect the I-PACE to go on sale in the second half of 2018.

Land Rover designs, develops and manufactures premium all-terrain vehicles that aim to differentiate themselves from the competition by their capability, design, durability, versatility and refinement. Land Rover's range of products comprises the Range Rover, Range Rover Sport, Range Rover Velar, Range Rover Evoque (including a convertible model),

Land Rover Discovery and the Land Rover Discovery Sport. The Land Rover Defender ceased production in January 2016. The all-new Land Rover Discovery went on sale in February 2017 and the Range Rover Velar went on sale in July 2017.

For a description of our vehicle models, please see “Our Business—Our Vehicles”. For retail and wholesale unit sales by vehicle model, please see “Our Business—Product Sales Performance—Sales Performance by Vehicle Model”. For the most recent awards that our vehicles have received, please see “—Our Competitive Strengths—Award-winning design capabilities and distinctive model line-ups”.

Product design, development and technology

Our vehicles are designed and developed by award-winning design teams, and we are committed to a continuing programme of new product design. Please see “—Our Competitive Strengths—Award-winning design capabilities and distinctive model line ups”. Our two design and development centres are equipped with computer-aided design, manufacturing and engineering tools, and are configured for competitive product development cycle-time and efficient data management.

We develop and manufacture technologically advanced vehicles, including the development of autonomous, connected and electrification technologies, as well as investing in innovative mobility solutions to overcome and address future travel and transport challenges and all our vehicles currently include level 2 features. Our R&D operations currently consist of a team of approximately 400 engineers, co-managed for Jaguar and Land Rover, sharing premium technologies, powertrains and vehicle architectures. Please see “Our Business—Product Design, Technology and Research and Development”.

Our Competitive Strengths

We believe that the solid vehicle sales and revenue growth achieved during recent years and our future success are based upon the following key competitive strengths:

Globally recognised brands built on a strong heritage

We believe that the strong heritage and global recognition of the Jaguar and Land Rover brands have helped us to achieve our solid operating performance in recent years and position us well to benefit from future growth opportunities. Founded in 1922, Jaguar has a long tradition of designing and manufacturing premium sports cars and saloons recognised for their design, engineering performance and a distinctive British style. The brand has a strong racing history, with Jaguar first winning the Le Mans race in 1951 and winning numerous racing titles since. Founded in 1948, Land Rover designs and manufactures vehicles known for their off-road capability, strength, durability and refinement. Land Rover’s brand identity is built around utility, reliability, refinement, luxury and, above all, its all-terrain capability. In Fiscal 2017 our brand Land Rover was included for the first time in Interbrand’s 100 most valuable brands.

Both our Jaguar and Land Rover brands are globally recognised as premium, class-leading and highly differentiated vehicles within their segments as evidenced by consumer demand, sales in approximately 121 and 131 markets, respectively, via independent franchises and, in our key markets, national sales companies as well as third-party importers. Please see “—Award-winning design capabilities and distinctive model line-ups” for further details on these awards.

Technical excellence with a strong focus on research and development

We develop and manufacture technologically advanced vehicles. For example, we are one of the industry leaders in aluminium body structures, which contribute to the manufacture of lighter vehicles with improved fuel and CO₂ efficiency and performance, while maintaining the body stiffness that customers in the premium segment demand. New vehicle models, such as the Range Rover Velar, are constructed with this lightweight aluminium vehicle architecture. We believe we are world leaders in aluminium recycling.

We believe we have industry-leading capabilities in all-terrain applications, such as Land Rover’s “terrain response system”, which is the all-terrain system that adjusts the performance of vital operating components of the vehicle to different driving and weather conditions. We also aim to be at the forefront of calibration and certification of emissions and fuel economy, with a number of emission-reducing technologies developed or under development, including stop-start technology as a standard feature, the 2.0-litre “in-house” Ingenium diesel and petrol engines and other engines to follow. In addition, we are developing improvements in aerodynamic drag-reducing technologies. We believe that we are also among the leading automobile manufacturers in the areas of powertrain application engineering and sound quality.

Our strategic priorities include autonomous, connected and electrification technologies, as well as investing in innovative mobility solutions to overcome and address future travel and transport challenges. Our autonomous strategy includes investing in driver assistance technologies to support increasing degrees of automation, and including autonomous features on our new models. Our connected strategy includes investing in technology and infrastructure to support higher levels of connectivity, as exemplified by our \$15 million investment in CloudCar Inc. Our electrification strategy is currently exemplified by the hybrid engines available on the Range Rover and Range Rover Sport, and will in the future expand to battery electric technologies (such as the I-PACE, on sale in 2018) and plug-in and mild hybrids starting in 2018. We plan to offer an electric drivetrain option on all of our new models by 2020. Furthermore, we are currently competing in the FIA Formula E championship, which enables us to create a test bed for our future electrification technology with our partner Panasonic. Our InMotion Ventures business unit, focuses on developing innovative mobility solutions to overcome and address future travel and transport challenges, and invests in future transport and mobility solutions, including the \$25 million investment in Lyft, Inc. (“Lyft”).

For further details on our product design and research and development initiatives, please see “Our Business—Product Design, Technology and Research and Development”.

Award-winning design capabilities and distinctive model line-ups

We believe that our business is supported by award-winning design capabilities and distinctive model line-ups. Our two award-winning design teams, led by designers Ian Callum (Jaguar), winner of the Minerva Medal for his outstanding contribution to automotive design, and Gerry McGovern (Land Rover), have a distinguished track record of designing contemporary and elegant cars, while retaining the distinctive brand identity of both Jaguar and Land Rover.

The strength of our design capabilities and distinctive model line-ups has been widely validated by industry experts. Jaguar and Land Rover have collectively received 213 awards from leading international magazines and opinion leaders in Fiscal 2017.

The following table sets out certain awards received in 2016 and 2017, but is not exhaustive:

Award	Model	Awarding Institution	Date
Best Large Premium SUV	Land Rover Discovery	Auto Express	June 2017
Most Popular SUV (Second Year Running)	Land Rover Discovery Sport	Honest John	May 2017
World Car of the Year	Jaguar F-PACE	World Car Awards	April 2017
Women’s World Car of the Year	Jaguar F-PACE	World Car Awards	April 2017
World Car Design of the Year	Jaguar F-PACE	World Car Awards	April 2017
Best Saloon Car—(Mid-Full size)	Jaguar XF	Golden Steering Wheel Awards	November 2016
Sport Auto Award	Jaguar F-TYPE	Auto Motor Sport	October 2016
Compact SUV of the Year 2016	Jaguar F-PACE	Auto Express Awards	July 2016
SUV of the Year	Range Rover Evoque	Off Road Award—Off Road	June 2016
Best vehicle in “Sports car/ Coupé/ Roadster/ Convertible” category	Jaguar F-TYPE	Top 5 AUTO Ceremony	May 2016
Autocar Star Award	Range Rover Sport	Autocar	May 2016
Best Executive Car	Jaguar XE	UK Car of the Year Awards	March 2016

Jaguar has a long tradition of producing innovative automobiles exemplified by design icons such as the Jaguar E-TYPE. Today Jaguar’s entire product range is unified under a single design and concept language, upon which we intend to further develop our exclusive product portfolio. We believe that our design and concept language has helped, and will continue to allow Jaguar appeal to a wide audience. We also believe that Land Rover offers one of the most universally recognised, distinctive and successful model line-ups within the automotive industry.

Our product development process is highly structured with the aim of allowing us to respond quickly to new market trends and to leverage market opportunities. We run an annual product development process with regular management reviews and specific product cycle milestones. We believe that this is a key factor in our operational efficiency and has helped us to achieve our recent and on-going success through regular improvements and upgrades to our model line-up.

We have continued to strengthen our line-up with new model innovations and launches, such as the forthcoming Jaguar I-PACE, all-new Jaguar E-PACE, the new Range Rover Velar, all-new Land Rover Discovery, the Jaguar F-PACE, the new Jaguar XF Sportbrake and the long wheel base Jaguar XFL (produced by our China Joint Venture for the Chinese Market). These new products, and others yet to be announced, are expected to support sales growth across wider vehicle segments. Please see “—Our Strategy—Grow the business through new products and market expansion to deliver sustainable returns”.

Global market presence through comprehensive and growing global sales and distribution and international manufacturing networks

We market and sell our vehicles through a global sales and distribution network designed to achieve geographically diversified sales and facilitate growth in key markets, including Europe (excluding the United Kingdom and Russia), North America, the United Kingdom, China and Overseas (including Brazil and Russia). Over the years, we have expanded our global sales and distribution network and achieved diversification of revenue beyond our historical core markets. Please see “Our Business—Sales and Distribution”.

Our success in established markets and strong brand recognition ensure that we are well positioned to capture sales growth in emerging markets. We believe the growth potential in emerging markets with growing affluent populations will counterbalance the expected lower rate of sales growth in more developed markets, and offers significant opportunities to further increase and diversify our sales volumes. Consequently, we are actively investing in our sales network outside of our major markets. We established a manufacturing joint venture in China with Chery Automobile Company Ltd. (“Chery”) which currently manufactures the Range Rover Evoque, Land Rover Discovery Sport and the long wheel base Jaguar XFL for the local market, to further support growth in China. Please see “Our Business—China Joint Venture”. In India, we opened an NSC to expand our presence in this key market. Currently, the Jaguar XJ, Jaguar XF, Jaguar XE, Range Rover Evoque and Land Rover Discovery Sport vehicles are manufactured for local sales at a facility operated by Tata Motors in Pune, India. In June 2016, the production of the Land Rover Discovery Sport and the Range Rover Evoque for local sales commenced at our manufacturing facility in Brazil. Please see “Our Business—Brazil Production Facility”. From time to time we establish presence in other markets according to our business needs.

Profitable growth and strong operating cash generation

We continue to profitably grow our business. Our revenue grew to £24,339 million and £5,559 million in Fiscal 2017 and the three months ended 30 June 2017 respectively, from £22,286 million and £5,355 million in Fiscal 2016 and the three months ended 30 June 2016, respectively, primarily as a result of higher sales volumes in both our Jaguar and Land Rover brands and the weaker British pound following the referendum on the United Kingdom’s membership in the European Union (“Brexit”). Further to our solid sales performance, we delivered EBITDA of £2,955 million in Fiscal 2017 and £442 million in the three months ended 30 June 2017, compared to £3,147 million in Fiscal 2016, and £672 million for the three months ended 30 June 2016. The year-on-year decrease in Fiscal 2017 EBITDA from Fiscal 2016 primarily reflected higher marketing, manufacturing and operating costs, partially offset by higher wholesales. The decrease in EBITDA in the three months ended 30 June 2017, as compared to the three months ended 30 June 2016, primarily reflects lower wholesale volumes, higher variable marketing expense and higher material and operating costs which more than offset favourable foreign exchange rates (weaker British pound). Please see “Operating and Financial Review and Prospects”.

Free cash flow was positive £141 million in Fiscal 2017 (positive £644 million in Fiscal 2016) driven by solid profits and positive working capital which funded total product and other investment spending of £3,438 million. In the three months ended 30 June 2017 free cash flow was negative £1,308 million (negative £661 million in the three months ended 30 June 2016), primarily reflecting lower profits offset by the pension past service credit, £995 million of total product and other investment spending as well as £733 million of negative working capital. The negative working capital movement was primarily driven by higher inventory and lower payables due to seasonality in sales and the launch of new models such as the all-new Land Rover Discovery and the Range Rover Velar. This is an increase from the negative working capital of £692 million in the three months ended 30 June 2016.

Experienced and highly qualified senior management team

We have a highly experienced and respected senior management team. Our senior management comprises senior automotive executives with extensive experience in the automotive industry. We believe that the experience, industry knowledge and leadership of our senior management team will help us implement our strategy described below and achieve further profitable growth.

Shareholder support

We benefit from strong and on-going support from our parent company Tata Motors, which is a member of the international conglomerate Tata Group. Tata Motors is the largest commercial vehicle manufacturer in terms of revenue in India and among the top six passenger vehicle manufacturers in terms of units sold in India during Fiscal 2017. It has also established a successful international presence as an automobile company through joint ventures and acquisitions such as the acquisition of the commercial vehicle business of Daewoo in 2004. On 2 June 2008, Tata Motors acquired the Jaguar Land Rover businesses from Ford, establishing its international presence in the premium market. Tata Motors group have manufacturing facilities and design and engineering centres in India, the United Kingdom, China, South Korea, Thailand, South Africa, Brazil and Indonesia.

We believe that we are of strategic importance to Tata Motors given that we represented approximately 78.7% of its net revenue for the three months ended 30 June 2017. Our Board includes three members who are also members of the board of directors of Tata Motors, namely Mr Natarajan Chandrasekaran, Professor Dr Ralf Speth and Mr Nasser Munjee. Tata Motors does not guarantee or assume any direct or indirect liability for the Notes.

Our Strategy

We have a multifaceted strategy to strengthen our position as a leading manufacturer of premium vehicles. Our success is tied to our commitment to high quality products, environmental innovation and putting the customer first and our strategic focus on capital expenditure, R&D and product design reflects this. Our strategy consists of the following key elements:

Grow the business through new products and market expansion to deliver sustainable returns

To mitigate the impact of high cyclicality in the automobile industry and provide a foundation from which to invest in new products, designs and technologies in line with our overall strategy, we have strengthened our operations and gained a significant presence across a selected range of products and a wide diversity of geographic markets.

New products

One key component of this strategy, which has delivered positive results in recent years, is our focus on improving the mix of our products (by developing vehicles designed to increase our market segment penetration or market visibility). We offer products in the premium performance car and all-terrain vehicle segments, and we intend to grow the business by diversifying our product range within these segments. For instance, the Jaguar XE enables us to offer a product in the “C segment” of vehicles and compete against other premium auto manufacturers in this high-volume sector. The Jaguar F-PACE luxury SUV expands the brand’s presence and facilitates our ability to compete in new segments and also forms the basis of a new range of future Jaguars, such as the Jaguar E-PACE, a compact SUV that aims to complement and build on the F-PACE’s success over the past year. The Range Rover Velar is positioned between the Range Rover Sport and Range Rover Evoque, and is our first cross-brand Land Rover, built on the same lightweight aluminium architecture as the F-PACE.

In Fiscal 2017 and since the start of Fiscal 2018 to date, we reinforced our brand range with Jaguar F-PACE, long wheel base Jaguar XFL, the XF Sportbrake, Range Rover Velar and the all-new Land Rover Discovery. The Jaguar E-PACE, Jaguar’s new compact performance SUV, is scheduled to go on general retail sale in certain markets in late 2017.

Market expansion

Our strategy involves expanding our global footprint into geographic locations where we see opportunities to grow. As a producer of distinctive, premium products, we believe we are well positioned to increase our revenues in emerging affluent countries with growing sales potential. We also aim to leverage our relationship with Tata Motors and the synergies we can achieve in the areas of research and product development, supply sourcing, manufacturing and assembly and other operations. There are two specific aspects to our strategy of geographic expansion:

- **Emerging markets:** We aim to increase our marketing and dealer network in emerging markets. Please see “—Our Competitive Strengths—Global market presence through comprehensive and growing global sales and distribution and international manufacturing networks”.
- **Selected markets:** We aim to establish new manufacturing facilities, assembly points and suppliers in selected markets. For example, we are expanding our manufacturing and assembly lines at our China Joint Venture, where we have produced Range Rover Evoque since the end of 2014, the Land Rover Discovery Sport since September 2015 and the long wheel base Jaguar XFL, the third vehicle produced at the China Joint Venture, which went on sale in September 2016. Please see “Our Business—China Joint Venture”. Our manufacturing facility in Brazil opened in June 2016, where we currently produce the Land Rover Discovery Sport and the Range Rover Evoque for sale in the local Brazilian market. Please see “Our Business—Brazil Production Facility”. In July 2015, we agreed a manufacturing partnership with Magna Steyr, an operating unit of Magna International Inc., to build the Jaguar E-PACE and Jaguar I-PACE in Graz, Austria. In December 2015, we concluded an agreement with the Government of the Slovak Republic for the development of a new manufacturing plant in the city of Nitra in western Slovakia, which will commence production in 2018, starting with the Land Rover Discovery. In addition, the Jaguar XJ, Jaguar XF, Jaguar XE, Range Rover Evoque and Land Rover Discovery Sport are currently manufactured locally at a facility operated by Tata Motors in Pune, India and continue to explore manufacturing operations in other markets.

We also explore opportunities to source materials in a more cost-effective manner as well as sharing components across platforms in order to gain economies of scale and reduce engineering costs per vehicle. We believe that our strategy to enhance global sourcing by establishing a core trading division and by continuing to develop suppliers from countries with a lower cost base such as India and China. We also aim to increase the natural hedging of our substantial foreign currency exposures by developing low cost suppliers in markets to which we currently have substantial exposure, which can act as a complementary source of competitive advantage.

Grow the business through capital investments

We continue to focus on profitably growing our strong, globally recognised brands. In order to meet customer aspirations and regulatory requirements, we continue to invest in the United Kingdom and internationally, to further develop technologies and products, compete in new and existing segments and expand our manufacturing capacity. In the near and medium term, we expect our capital spending to be greater than our long term capital spending target of 10-12% of revenue in order to realise the present opportunities we see for growth.

Based on our continuing strong performance and cash and liquidity position, we plan to continue to increase capital investment to develop new products in new and existing segments, invest in new powertrains and technologies to meet customer and regulatory requirements, and increase our manufacturing capacity in the United Kingdom and internationally (i.e. China, Austria and Slovakia).

We continue to target funding most of our capital spending out of operating cash flow, but it is possible free cash flow could be negative in the near and medium term as we execute our growth strategy. We monitor the economic environment and market demand as we plan our future capital spending. We expect that our strong balance sheet, including total cash and cash equivalents and financial deposits of £4.1 billion and our recently refinanced, five year undrawn committed credit facility of £1.9 billion as at 30 June 2017, resulting in total liquidity of £6.0 billion, as well as proven access to funding from capital markets and banks, will also support our investment plans as required.

In Fiscal 2017, total product and other investment was £3,438 million (with 41.5% for R&D and 58.5% for expenditure on tangible fixed assets such as facilities, tools and equipment as well as investment in the manufacturing plant in Slovakia and other manufacturing sites). We estimate our capital spending will likely be in the region of £4 billion—£4.35 billion in Fiscal 2018 as we target an EBIT margin of 8-10% in the medium term. Our capital spending programme is primarily focused on expanding our manufacturing capacity, new product launches, product development and technology

development including CO₂ emissions technology, autonomous, connected and electrification technologies and innovative mobility solutions to overcome and address future travel and transport challenges. The profitable growth in our sales, with a strong cash and liquidity position (as discussed under “Operating and Financial Review and Prospects—General Trends of Our Recent Performance”) has supported our capital spending strategy over recent years. Total cash at 31 March 2017 was £5,487 million (23% of revenue), comprising cash and cash equivalents of £2,878 million and £2,609 million of financial deposits, as compared to total cash of £4,651 million at the end of Fiscal 2016.

Continue to develop technologically advanced vehicles

Our strategy is to maintain and improve our competitive position by developing technologically advanced vehicles. Over the years, we have enhanced our technological strengths through extensive in-house R&D activities, particularly through our two advanced engineering and design centres, which centralise our capabilities in product design and engineering. We are committed to continue investing in new technologies, including developing sustainable technologies to improve fuel economy and reduce CO₂ emissions. More recently, we have started developing autonomous, connected and electrification technologies, as well as investing in innovative mobility solutions to overcome and address future travel and transport challenges. We consider technological leadership to be a significant factor in our continued success, and therefore intend to continue to devote significant resources to upgrading our technological capabilities.

In line with this objective, we make early stage investments in automotive technology companies, and are involved in a number of advanced research consortia that bring together leading manufacturers, suppliers and academic specialists in the United Kingdom, supported by funding from the government’s Technology Strategy Board. Please see “Our Business—Product Design, Technology and Research and Development”.

Focus on environmental performance

Our strategy is to invest in products and technologies that position our products ahead of expected stricter environmental regulations and ensure that we benefit from a shift in consumer awareness of the environmental impact of the vehicles they drive. We focus on maintaining strong environmental performance and we aim on improving local environmental standards. Our environmental vehicle strategy focuses on new propulsion technology, weight reduction and reducing parasitic losses through the driveline. We have developed diesel hybrid versions of the Range Rover and Range Rover Sport, without compromising the vehicles’ off-road capability or load space.

We are a global leader in the use of aluminium and other lightweight materials to reduce vehicle weight and improve fuel and CO₂ efficiency, and we believe we are ahead of many of our competitors in the implementation of aluminium construction. For example, the Jaguar XE is the only vehicle in its class to use an aluminium-intensive monocoque. We plan to continue to build on this expertise and extend the application of aluminium construction as we develop a range of new Jaguar and Land Rover products. The aluminium body architecture introduced on the Jaguar XE is used in the new Jaguar F-PACE and Range Rover Velar. The all-new Land Rover Discovery uses the same lightweight architecture as the Range Rover and Range Rover Sport.

We are also developing more efficient powertrains and other technologies. This includes smaller and more efficient Ingenium 2.0-litre diesel and petrol engines, stop-start and hybrid engines, used across many of our products. Our lighter vehicles such as the Range Rover and Range Rover Sport Diesel Hybrid, powered by downsized and more efficient engines and alternative powertrains have all contributed to the improvement of our carbon footprint.

Our current product line-up is the most efficient it has ever been and the environmental performance of our vehicles has been further improved through our new models. The all-new Land Rover Discovery uses lightweight aluminium construction which saves 480 kg compared to the old model, delivering enhanced efficiency and reduced CO₂ emissions. The new aluminium-intensive Jaguar XE is the most fuel-efficient Jaguar and the first Jaguar Land Rover vehicle to receive a UK VED Band A rating resulting in a £0/annum tax rate. The aluminium-intensive XF delivers improved fuel consumption CO₂ emission performance. Our in-house 2.0-litre Ingenium diesel and petrol engines provide significant CO₂ reductions versus the outgoing powertrains.

Recognising the need to use resources responsibly, produce less waste and reduce our carbon footprint, we are also taking measures to reduce emissions, waste and the use of natural resources in all of our operations. In the United Kingdom, we have a goal of zero waste and carbon neutral manufacturing operations by 2020, in other markets we aspire for similar targets but some of the locations do not have the capability to support our goals. In such situations we aim to improve the local market and capacity for zero waste and carbon neutral manufacturing operations.

Continue to improve vehicle quality

We recognise the importance of superior vehicle quality and have implemented programmes, both internally and at our suppliers' operations, focused on improving the quality of our products, enhancing customer satisfaction and reducing our future warranty costs. We undertake a variety of internal and external benchmarking exercises, such as competitor vehicle teardown, market testing and internal comparative analysis across our own vehicles, which help us to identify cost improvement opportunities for our components, systems and sub-systems. We have also established a procedure for ensuring quality control of outsourced components, and products purchased from approved sources undergo a supplier quality improvement process. Reliability and other quality targets are built into our new product introduction process.

Assurance of quality is further driven by the design team, which interacts with downstream functions like process-planning, manufacturing and supplier management to ensure quality in design processes and manufacturing. We believe our extensive sales and service network has also enabled us to provide quality and timely customer service. Through close coordination supported by our IT systems, we monitor quality performance in the field and implement corrections on an on-going basis to improve the performance of our products.

Recent Developments

On 3 March 2017, Mr Natarajan Chandrasekaran was appointed as our Chairman, following his appointment as Chairman of Tata Motors on 17 January 2017.

On 3 April 2017, we approved and communicated to our defined benefit schemes' members that the defined benefit schemes' rules were to be amended with effect from 6 April 2017 so that, among other changes, retirement benefits will be calculated on a career average basis rather than based upon a member's final salary at retirement. As a result of the remeasurement of the schemes' liabilities, a past service credit of £437 million has arisen and has been recognised in Fiscal 2018.

Effective 28 July 2017, we amended and extended our existing £1,870 million unsecured revolving credit facility (originally maturing in July 2020) by 2 years to mature in July 2022 and increased the facility size to £1,885 million. As of the date of this Offering Memorandum, no amounts are drawn under this facility.

On 21 September 2017 we announced that we had appointed KPMG LLP as our independent auditors, replacing Deloitte LLP who had served as our independent auditors since 2008. Our change of auditors follows Tata Motors' statutory rotation of auditors in accordance with Section 139(2) of the Indian Companies Act, which requires that all listed companies rotate their auditors after 10 or more consecutive years of service.

Trading Update

Since the three months ended 30 June 2017 we have reported retail volumes for the months ended 31 July 2017 and 31 August 2017 as follows:

	Month ended 31 July				Month ended 31 August			
	2016	2017	Year-on-year Change		2016	2017	Year-on-year Change	
	(units)		(%)		(units)		(%)	
Global retail volumes (including sales from the China Joint Venture)	44,486	46,074	1,588	3.6	36,926	38,519	1,593	4.3
Global wholesale volumes (excluding sales from the China Joint Venture)	44,061	42,260	(1,801)	(4.1)	37,394	37,394	0	0
Jaguar retail volumes:								
F-PACE	5,476	5,691	215	3.9	4,460	4,869	409	9.2
XE	3,472	2,697	(775)	(22.3)	2,792	1,970	(822)	(29.4)
XF	2,508	2,963	455	18.1	1,977	2,792	815	41.2
XJ	894	840	(54)	(6.0)	825	724	(101)	(12.2)

(1) Production of the Freelander and the Land Rover Defender has been discontinued.

(2) The volumes from our China Joint Venture are included. The volumes from Hong Kong and Taiwan have been included in our Overseas volumes since the beginning of Fiscal 2017.

Our retail sales results for the month ending 30 September 2017 will be reported in October 2017 and financial results for the six months ended 30 September 2017 are expected to be finalised and released in November 2017, together with Tata Motors' results for the same period. Please see "Operating and Financial Review and Prospects".

The Issuer

The Issuer is a public limited company, incorporated under the laws of England and Wales with company number 06477691, with its registered office at Abbey Road, Whitley, Coventry CV3 4LF, United Kingdom.

The Issuer has an issued share capital of £1,500,642,163 which is comprised of 1,500,642,163 fully paid shares of £1.00 each.

The telephone number of the Issuer is + 44 (0) 2476 303 080.

The Guarantors

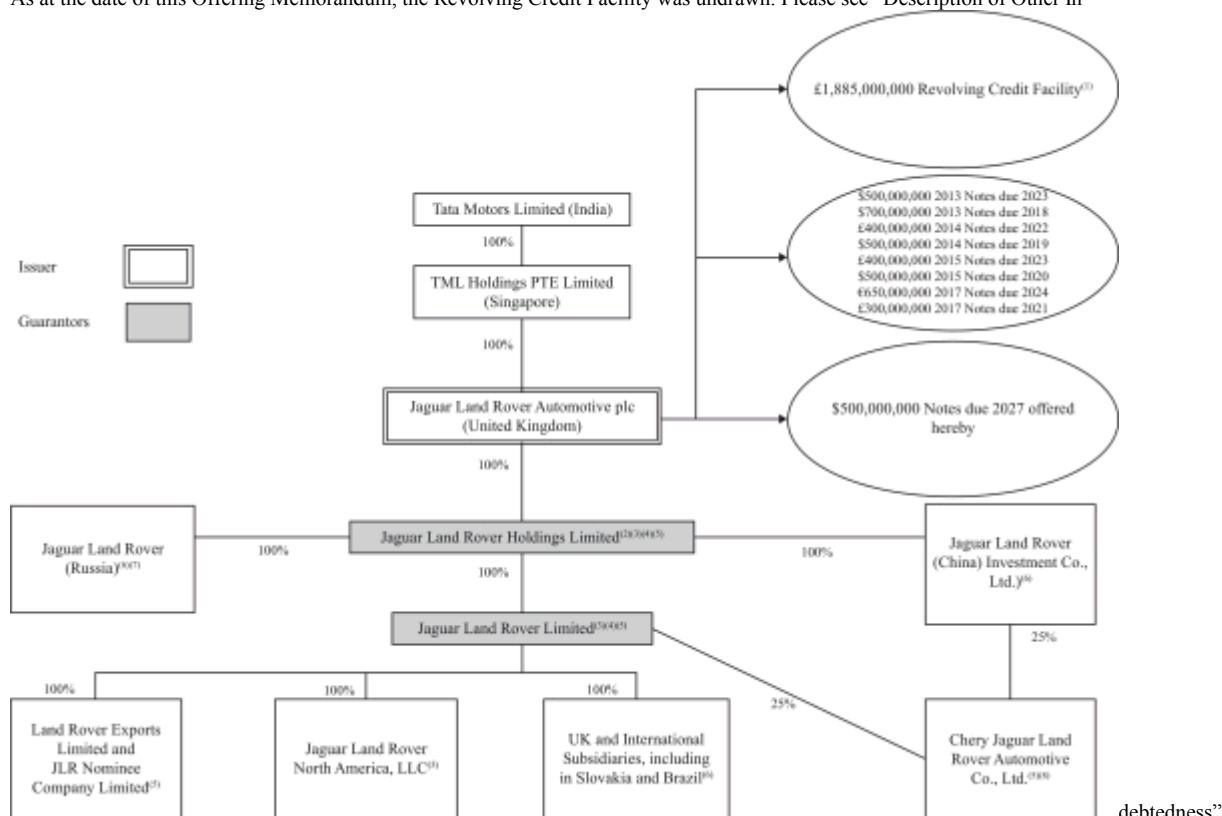

Jaguar Land Rover Limited is a private limited company, incorporated under the laws of England and Wales with company number 01672070, with its registered office at Abbey Road, Whitley, Coventry, CV3 4LF, United Kingdom. The telephone number of Jaguar Land Rover Limited is + 44 (0) 2476 303 080.

Jaguar Land Rover Holdings Limited is a private limited company, incorporated under the laws of England and Wales with company number 04019301, with its registered office at Abbey Road, Whitley, Coventry, CV3 4LF, United Kingdom. The telephone number of Jaguar Land Rover Holdings Limited is + 44 (0) 2476 303 080.

CORPORATE AND FINANCING STRUCTURE

The following diagram gives a simplified overview of the corporate and financing structure of the Issuer and its subsidiaries, after giving effect to the issuance of the Notes offered hereby and the use of proceeds therefrom. Please see “Use of Proceeds”. For a summary of the material financing arrangements identified in this diagram, please see “Description of Other Indebtedness” and “Description of the Notes”.

(1) As at the date of this Offering Memorandum, the Revolving Credit Facility was undrawn. Please see “Description of Other In

for a summary of our other financing facilities, including working capital and receivables facilities and other financing arrangements and “Operating and Financial Review and Prospects—Liquidity and Capital Resources” for a discussion of our capital structure.

- (2) In order to bring our legal structure in line with our operational structure, we transferred (i) in April 2012, the trade and assets of Land Rover Exports Limited to Jaguar Land Rover Exports Limited (now JLR Nominee Company Limited and previously Jaguar Cars Exports Limited), (ii) in January 2013, the trade and assets of the Land Rover business to Jaguar Land Rover Limited (previously Jaguar Cars Limited) and (iii) in April 2013, the trade and assets of Jaguar Land Rover Exports Limited to Jaguar Land Rover Limited. Jaguar Land Rover Holdings Limited (previously Land Rover) remains as a holding company, directly owning Jaguar Land Rover Limited and the China NSC and indirectly owning 50% of Chery Jaguar Land Rover Automotive Co., Ltd. and 100% of all other subsidiary companies. None of these reorganisations has impacted the indirect holdings of Jaguar Land Rover Automotive plc. The name of Jaguar Land Rover PLC was changed to Jaguar Land Rover Automotive plc in December 2012.
- (3) Following the Jaguar Land Rover internal group reorganisation effective on 1 January 2013, Jaguar Land Rover Limited is directly responsible for the UK defined benefit pension plans. Jaguar Land Rover Holdings Limited has also given guarantees to the pension trustee of Jaguar Land Rover Limited’s liabilities under the plans.
- (4) The Guarantors would have accounted for approximately 83.3% of the aggregated total assets, 89.6% of the aggregated net assets, 24.2% of revenue and 99.3% of EBITDA of Jaguar Land Rover Automotive plc and its consolidated subsidiaries as at and for the three months ended 30 June 2017, excluding intragroup assets and transactions. The Guarantors represent a higher percentage of EBITDA than revenue because those NSCs which are not Guarantors operate solely as distributors of our vehicles in the markets in which they operate.
- (5) As at 30 June 2017, after giving effect to the issuance of the Notes offered hereby and the use of proceeds therefrom, as described under “Use of Proceeds”, our non-guarantor subsidiaries would have had £3.6 million of debt and the January 2013 Note guarantees issued by Jaguar Land Rover North America, LLC, Land Rover Exports Limited and JLR Nominee Company Limited, none of which will guarantee the Notes. We estimate that Jaguar Land Rover North America, LLC, Land Rover Exports Limited and JLR Nominee Company Limited (none of which is guaranteeing the Notes) accounted for approximately 4.7% of the aggregated total assets, 22.9% of revenue and 1.0% of EBITDA of Jaguar Land Rover Automotive plc and its consolidated subsidiaries as at 30 June 2017. Both Land Rover Exports Limited and JLR Nominee Company Limited are currently dormant subsidiaries.

- (6) This corporate and financing structure chart has been condensed and is not intended to be a comprehensive presentation of our indirect subsidiaries. We have established subsidiaries in India (January 2015), Slovakia (November 2015), Singapore (April 2016) and Colombia (October 2016) and we have recently acquired a national sales company in Mexico.
- (7) Includes Jaguar Land Rover (Russia) and minority shareholdings in subsidiaries that are majority-owned by Jaguar Land Rover Limited.
- (8) As part of our joint venture with Chery, we have established a joint venture company in China called Chery Jaguar Land Rover Automotive Co., Ltd. As at 30 June 2017, we owned 50% of the share capital of Chery Jaguar Land Rover Automotive Co., Ltd. through our subsidiaries Jaguar Land Rover (China) Investment Co., Ltd.(25%) and Jaguar Land Rover Limited (25%). The remaining 50% is held by Chery. Please see “Our Business—China Joint Venture”.

THE OFFERING

The following summary contains basic information about the Notes and the Note Guarantees. It may not contain all of the information that is important to you. For a more complete understanding of the Notes and the Note Guarantees, please see the section of this Offering Memorandum entitled “Description of the Notes” and particularly those subsections to which we have referred you. Terms used in this summary and not otherwise defined have the meanings given to them in “Description of the Notes”.

Issuer	Jaguar Land Rover Automotive plc.
Notes Offered	\$500,000,000 aggregate principal amount of 4.500% senior unsecured notes due 2027.
Maturity	1 October 2027.
Issue Date	The Notes were issued on 10 October 2017.
Interest	4.500% per annum, payable semi-annually in arrears on each 1 April and 1 October and beginning on 1 April 2018. Interest on the Notes will accrue from their date of issue.
Guarantees	The Notes will be guaranteed on a senior unsecured basis by the Guarantors.
Ranking	<p>The Notes will be senior unsecured obligations of the Issuer and the Note Guarantees will be senior unsecured obligations of the Guarantors. The payment of the principal of premium, if any, and interest on the Notes and the obligations of the Guarantors under the Note Guarantees will:</p> <ul style="list-style-type: none">• rank equally in right of payment with all existing and future unsecured indebtedness of the Issuer and the Guarantors, as applicable, that is not, by its terms, expressly subordinated (and is not senior) in right of payment to the Notes, including the Existing Notes;• rank senior in right of payment to any and all of the existing and future indebtedness of the Issuer and the Guarantors, as applicable, that is, by its terms, expressly subordinated in right of payment to the Notes or such Guarantee as applicable; and• be effectively subordinated to any secured indebtedness of the Issuer and the Guarantors, as applicable, to the extent of the value of the collateral securing such indebtedness, and to the indebtedness of the subsidiaries of the Issuer that are not Guarantors.

Neither Tata Motors nor TMLH will guarantee the Notes.

Optional Redemption	<p>Upon not less than 10 nor more than 60 days’ written notice, the Issuer may redeem all or part of the Notes at a redemption price equal to the greater of:</p> <ul style="list-style-type: none">• 100% of the principal amount of the Notes to be redeemed; and• the sum of the present values of the remaining scheduled payments of principal and interest thereon (exclusive of interest accrued and unpaid to the date of redemption) from the
----------------------------	---

redemption date to the maturity date of the Notes discounted at a specified rate,

plus, in each case, accrued and unpaid interest, *provided* that for any such redemption on or after three months prior to the maturity date of the Notes, the redemption price for those Notes will equal 100% of the principal amount of the Notes to be redeemed, plus accrued and unpaid interest.

For a more detailed description, please see “Description of the Notes—Optional Redemption”.

Additional Amounts; Tax Redemption

All payments in respect of the Notes or the Note Guarantees made by the Issuer or any Guarantor will be made without withholding or deduction for any taxes or other governmental charges, except to the extent required by law. If withholding or deduction is required by law, subject to certain exceptions, the Issuer or relevant Guarantor will pay additional amounts so that the net amount each holder of the Notes receives is no less than the holder would have received in the absence of such withholding or deduction. Please see “Description of the Notes—Additional Amounts”.

If certain changes in the law of any relevant taxing jurisdiction become effective that would impose withholding taxes or other deductions on the payments on the Notes, and, as a result, the Issuer or the relevant Guarantor is required to pay additional amounts with respect to such withholding taxes, the Issuer may redeem the Notes in whole, but not in part, at any time, at a redemption price of 100% of the principal amount, plus accrued and unpaid interest, if any, to the date of redemption. Please see “Description of the Notes—Redemption for Changes in Withholding Taxes”.

Change of Control Repurchase Event

Upon the occurrence of a Change of Control Repurchase Event (as defined in “Description of the Notes”), each holder of the Notes may require the Issuer to repurchase such holder’s Notes, in whole or in part, at a purchase price equal to 101% of the principal amount thereof plus accrued but unpaid interest to the purchase date, as described under “Description of the Notes—Change of Control”.

Restrictive Covenants

The Indenture will contain covenants that restrict the ability of the Issuer, the Guarantors and the Issuer’s Subsidiaries (as defined in “Description of the Notes”) to:

- create liens;
- transfer or sell all or substantially all of its assets; and
- merge or consolidate.

For a more detailed description of these covenants, please see “Description of the Notes—Certain Covenants”. These covenants are subject to a number of important qualifications and exceptions.

Transfer Restrictions

We have not registered the Notes or the Note Guarantees under the US Securities Act. You may only offer or sell Notes in a transaction exempt from or not subject to the registration requirements of the US Securities Act. Please see “Notice to Investors”.

Use of Proceeds

We intend to use the net proceeds from the issue and sale of the Notes for

general corporate purposes, including to support our ongoing growth and capital spending plans. Please see “Use of Proceeds”.

Trustee, Paying Agent, Transfer Agent and Registrar Citibank, N.A., London Branch.

Listing Application has been made to list the Notes on the Official List of the Luxembourg Stock Exchange and to be admitted to trading on the Euro MTF Market thereof. The Euro MTF Market is not a regulated market pursuant to the provisions of Directive 2004/39/EC.

Governing Law The Notes and the Indenture will be governed by the laws of the State of New York.

Risk Factors Investing in the Notes involves risks. You should carefully consider the information under the title “Risk Factors” and the other information included in this Offering Memorandum before deciding whether to invest in the Notes.

SUMMARY CONSOLIDATED FINANCIAL AND OTHER DATA

The following table sets out Jaguar Land Rover's summary consolidated financial data and other data for the periods ended and as at the dates indicated below. For a discussion of the presentation of financial data, please see "Presentation of Financial and Other Data".

We have derived the summary consolidated financial data for the fiscal years ended 31 March 2017, 2016 and 2015 and the interim condensed consolidated income statement and statement of comprehensive income data and cash flow data for the three months ended 30 June 2017 and 2016 from the Consolidated Financial Statements included elsewhere in this Offering Memorandum. The balance sheet data as at 30 June 2016 have been derived for comparative purposes from the unaudited condensed consolidated interim financial statements as at and for the three months ended 30 June 2016, which are not included in this Offering Memorandum. Please see "Presentation of Financial and Other Data".

The 2017 Consolidated Financial Statements, the 2016 Consolidated Financial Statements and the 2015 Consolidated Financial Statements were prepared in accordance with IFRS and the Condensed Consolidated Interim Financial Statements were prepared in accordance with IAS 34. The summary financial data and other data should be read in conjunction with "Presentation of Financial and Other Data", "Selected Consolidated Financial and Other Data", "Operating and Financial Review and Prospects" and the financial statements and related notes thereto included elsewhere in this Offering Memorandum. Historical results are not necessarily indicative of future expected results. In addition, our results for the three months ended 30 June 2017 should not be regarded as indicative of our results expected for the fiscal year ending 31 March 2018. The financial figures for the years ended 31 March 2016 and 2015 have been restated due to the change in accounting policy for presentation of foreign exchange gains and losses, as set out in Note 2 to the 2017 Consolidated Financial Statements. The financial figures for the three months ended 30 June 2016 have been restated due to the change in accounting policy for presentation of foreign exchange gains and losses, as set out in Note 1 to the Condensed Consolidated Interim Financial Statements.

The unaudited condensed consolidated financial information for the twelve months ended 30 June 2017 set out below was derived by aggregating without adjustments the consolidated income statement for the twelve months ended 31 March 2017 and the consolidated income statement data for the three months ended 30 June 2017 and subtracting the consolidated income statement data for the three months ended 30 June 2016. The unaudited condensed consolidated financial information for the twelve months ended 30 June 2017 presented herein is not required by or presented in accordance with IFRS or any other generally accepted accounting principles. The financial information for the twelve months ended 30 June 2017 has been prepared for illustrative purposes only and is not necessarily representative of our results of operations for any future period or our financial condition at any future date.

In this Offering Memorandum, we have included references to certain non-IFRS measures, including EBITDA, EBIT, free cash flow, net cash and product and other investment. EBITDA, EBIT, free cash flow, net cash and product and other investment are not IFRS measures and should not be construed as an alternative to any IFRS measure such as revenue, gross profit, other income, net profit or net cash used generated from/(used in) operating activities. We believe that EBITDA, EBIT, free cash flow, net cash and product and other investment are useful indicators of our ability to incur and service our indebtedness and can assist certain investors, security analysts and other interested parties in evaluating us. You should exercise caution in comparing EBITDA, EBIT, free cash flow, net cash and product and other investment as reported by us to EBITDA, EBIT, free cash flow, net cash and product and other investment, or adjusted variations of EBITDA, of other companies. EBITDA as presented in this Offering Memorandum differs from the definition of "Consolidated EBITDA" that is contained in the Indenture. EBITDA, EBIT, free cash flow, net cash and product and other investments have limitations as analytical tools, and you should not consider them in isolation. Some of these limitations in respect of EBITDA include the following: (i) EBITDA does not reflect our capital expenditures or capitalised product development costs, our future requirements for capital expenditures or our contractual commitments; (ii) EBITDA does not reflect changes in, or cash requirements for, our working capital needs; (iii) EBITDA does not reflect the interest expense, or the cash requirements necessary, to service interest or principal payments on our debt; (iv) although depreciation and amortisation are non-cash charges, the assets being depreciated and amortised will often need to be replaced in the future and EBITDA does not reflect any cash requirements that would be required for such replacements; and (v) EBITDA excludes the impact of exceptional items and one time reserves and charges. Please see "Presentation of Financial and Other Data".

Please note that while we charge our research costs to the income statement in the year in which they are incurred, we capitalise product development costs relating to new vehicle platforms, engines, transmissions and new products and recognise them as intangible assets under certain conditions. Please see "Presentation of Financial and Other Data". There are a number of differences between IFRS and US GAAP. One difference is that we would not be able to capitalise such costs if

we were to prepare our financial statements in compliance with US GAAP. In addition, interpretations of IFRS may differ, which can result in different applications of the same standard and, therefore, different results.

* Restated due to the change in accounting policy for presentation of foreign exchange gains and losses.

- (1) Relates to charges booked and recoveries related to the explosion at the Port of Tianjin.
- (2) This amount reflects the capitalised cost recognised as an intangible asset at the end of the relevant period, net of the amounts charged to the income statement, which were £253 million, £318 million, £368 million, £85 million, £94 million and £377 million in the years ended 31 March 2015, 2016 and 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017, respectively.
- (3) Depreciation and amortisation include, among other things, the amortisation attributable to the capitalised cost of product development relating to new vehicle platforms, engines, transmissions and new products. The amount of amortisation attributable to capitalised product development costs for Fiscal 2015, Fiscal 2016, Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017 was £526 million, £696 million, £769 million, £191 million, £205 million and £783 million, respectively.
- (4) We have defined EBIT as profit for the period before income tax expense, exceptional items, finance expense (net), finance income, gains/losses on unrealised commodity derivatives, foreign exchange gains/losses on unrealised derivatives as well as debt (net designated as hedges) and realised currency derivatives entered into to hedge certain foreign currency debt. EBIT is presented because we believe that it is frequently used by securities analysts, investors and other interested parties in evaluating companies in the automotive industry. However, other companies may calculate EBIT in a manner that is different from ours. An EBIT reconciliation is included below.
- (5) We have defined EBITDA as profit for the period before income tax expense, exceptional items, finance expense (net), finance income, gains/losses on unrealised commodity derivatives, foreign exchange gains/losses on unrealised derivatives as well as debt (not designated as hedges) and realised currency derivatives entered into to hedge certain foreign currency debt, share of profit/loss from equity accounted investments and depreciation and amortisation. EBITDA is presented because we believe that it is frequently used by securities analysts, investors and other interested parties in evaluating companies in the automotive industry. However, other companies may calculate EBITDA in a manner that is different from ours. EBITDA is not a measure of financial performance under IFRS and should not be considered an alternative to cash flow generated from/ (used in) operating activities or as a measure of liquidity or an alternative to profit/(loss) on ordinary activities as indicators of operating performance or any other measures of performance derived in accordance with IFRS.

The reconciliation of EBIT and EBITDA to our profit for the period line item is:

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	(£ in millions)					
Profit for the period	2,038	1,312	1,272	304	472	1,440
Add back taxation	576	245	338	95	123	366
Add/ (less) back exceptional charge/(credit) ^(a)	—	157	(151)	(51)	(438)	(538)
Add back/(less) foreign exchange (gains)/loss—financing ^(b)	178	54	101	23	(19)	59
Add back/(less) foreign exchange (gains)/loss—derivatives ^(c)	166	(86)	11	(21)	(89)	(57)
Add back/ (less) unrealised commodity losses/(gains)—unrealised derivatives	30	59	(148)	(33)	8	(107)
Less finance income	(48)	(38)	(33)	(9)	(9)	(33)
Add back finance expense (net)	135	90	68	21	21	68
EBIT	3,075	1,793	1,458	329	69	1,198
Add back depreciation and amortisation	1,051	1,418	1,656	388	450	1,718
Add/ (less) back share of loss/(profit) from equity accounted investees	6	(64)	(159)	(45)	(77)	(191)
EBITDA	4,132	3,147	2,955	672	442	2,725

- (a) Relates to charges booked and eventual recoveries related to the explosion at the Port of Tianjin, as well as a pension past service credit due to retirement benefits being calculated on a career average basis rather than based upon a member's final salary at retirement doubtful debts and previously capitalised investment.

- (b) Relates to debt not designated as hedges.
- (c) Relates to foreign exchange gains/losses on unrealised derivatives and realised currency derivatives entered into to hedge certain foreign currency debt.
- (6) This amount reflects the capitalised cost of product development recognised as an intangible asset at the end of the relevant period.
- (7) We have defined net cash as cash and cash equivalents plus short-term deposits less total balance sheet borrowings.

The reconciliation is set out below:

	As at 31 March			As at
	2015	2016	2017	30 June
	(£ in millions)			
Cash and cash equivalents	3,208	3,399	2,878	1,637
Short-term deposits	1,055	1,252	2,609	2,471
Total borrowings (including secured and unsecured borrowings and factoring facilities)	(2,550)	(2,500)	(3,581)	(3,501)
Net cash	1,713	2,151	1,906	607

- (8) Free cash flow reflects net cash generated from operating activities less net cash used in investing activities (excluding movements in short-term deposits) and after finance expenses and fees and payments of lease obligations. Free cash flow also includes foreign exchange gains/losses on short-term deposits and cash and cash equivalents.

The reconciliation is set out below:

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015*	2016*	2017	2016*	2017	2017
	(£ in millions)					
Net cash generated from/(used in) operating activities.....	3,575	3,556	3,160	(98)	(360)	2,898
(Less) net cash used in investing activities.....	(2,641)	(2,966)	(4,317)	(629)	(766)	(4,454)
Finance expenses	(230)	(142)	(150)	(27)	(24)	(147)
Finance lease payments.....	(6)	(5)	(4)	(1)	(1)	(4)
(Less)/add back: Movements in short-term deposits.	(195)	186	1,300	23	(125)	1,152
Add back/(less): Foreign exchange gain/(loss) on short-term deposits.....	51	11	57	27	(13)	17
Add back/(less): Foreign exchange gain/(loss) on cash and cash equivalents	52	4	95	44	(19)	32
Free cash flow.....	606	644	141	(661)	(1,308)	(506)

* Restated due to change in accounting policy for presentation of foreign exchange gains and losses.

- (9) Product and other investment reflects cash used in the purchase of property, plant and equipment, intangible assets, investments in subsidiaries, joint ventures, associates and other trading investments and expensed research and development costs.

The reconciliation is set out below:

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	(£ in millions)					
Purchases of property, plant and equipment.....	1,564	1,422	1,584	264	478	1,798
Cash paid for intangible assets.....	1,206	1,384	1,473	343	403	1,533
Expensed R&D	253	318	368	85	94	377
Investments in equity accounted investees.....	124	—	12	—	—	12
Purchases of other investments	—	—	1	—	20	21
Acquisitions of subsidiaries	—	11	—	—	—	—
Product and other investment.....	3,147	3,135	3,438	692	995	3,741

Product and other investment can also be presented as cash outflows relating to tangible assets (net of proceeds from disposals of tangible assets), intangible assets, expensed R&D and investment in joint ventures.

- (10) *Pro forma* net cash/(debt) equals net cash/(debt), as adjusted to give *pro forma* effect to the issuance of the Notes offered hereby and the use of proceeds therefrom, as described under “Use of Proceeds”, including estimated debt issuance costs of £3.8 million.
- (11) *Pro forma* net finance costs reflects our net interest expense for the twelve months ended 30 June 2017 as if the Notes offered hereby had been issued on 1 July 2016.

RISK FACTORS

An investment in the Notes involves a high degree of risk. You should carefully consider the following risks, together with other information provided to you in this Offering Memorandum, in deciding whether to invest in the Notes. The occurrence of any of the events discussed below could materially adversely affect our business, financial condition or results of operations. If these events occur, the trading prices of the Notes could decline, we may not be able to pay all or part of the interest on or principal of the Notes, and you may lose all or part of your investment. Additional risks not currently known to us or that we now deem immaterial may also harm us and affect your investment.

This Offering Memorandum contains “forward-looking” statements that involve risks and uncertainties. Our actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include those discussed below and elsewhere in this Offering Memorandum. Please see “Forward-Looking Statements”.

Risks Associated with the Automotive Industry

Deterioration in global economic conditions could have a significant adverse impact on our sales and results of operations.

The automotive industry depends on general economic conditions around the world. Economic slowdowns in the past have significantly affected the automotive and related industries. The demand for automobiles is influenced by a variety of factors, including, among other things, the growth rate of the global economy, availability of credit, disposable income of consumers, interest rates, environmental policies, tax policies, safety regulations, freight rates and fuel prices.

We have significant operations in the United Kingdom, North America, continental Europe and China as well as sales operations in many other countries across the globe. The automotive market in the United States, United Kingdom and Europe experienced healthy growth in Fiscal 2016 and Fiscal 2017, despite persistent unemployment in Europe and volatility in the United Kingdom. If automotive demand softens because of lower or negative economic growth in key markets (notably China) or due to other factors, Jaguar Land Rover’s operations and financial condition could be materially and adversely affected as a result. The Brexit vote, the June 8, 2017 UK election results and the ongoing negotiations between the United Kingdom and the European Union to finalize terms of the United Kingdom’s exit from the European Union have created significant uncertainty with respect to the United Kingdom’s future relationship with the European Union, the economic and political future of the United Kingdom and the legal structure applicable to companies doing business in the United Kingdom. These political uncertainties have created, and are expected to create, adverse impacts for the United Kingdom economy. Additionally, global economic growth and stability may be impacted by political events, including the United States presidential administration’s approach to trade and other policy, as well as systemic macroeconomic events, such as deterioration in the European banking system. Deterioration in key economic factors, such as GDP growth rates, interest rates and inflation, as well as the reduced availability of financing for vehicles at competitive rates, may result in a decrease in demand for automobiles. A decrease in demand would, in turn, cause automobile prices and manufacturing capacity utilisation rates to fall. Such circumstances have in the past materially affected, and may in the future materially affect, our business, results of operations and financial condition.

The United Kingdom’s contemplated exit from the European Union may adversely impact our business, results of operations and financial condition.

In a non-binding referendum on the United Kingdom’s membership in the European Union in June 2016, a majority of the electorate voted for the United Kingdom’s withdrawal from the European Union. This will likely ultimately result in the exit of the United Kingdom from the European Union; and a process of negotiation will determine the future terms of the United Kingdom’s relationship with the European Union. While Article 50 of the Lisbon Treaty was invoked by the United Kingdom on 29 March 2017, substantial uncertainty remains regarding the outcome of the negotiations, as well as the scope and duration of a transitional period, if any, following the expiration of the Article 50 period on 29 March 2019. This uncertainty was exacerbated by the lack of a decisive majority following the United Kingdom general election in June 2017.

Depending on the terms of Brexit, the United Kingdom could lose its present rights or terms of access to the single EU market and EU customs area and to the global trade deals negotiated by the European Union on behalf of its members. New or modified trading arrangements between the United Kingdom and other countries may have a material adverse effect on the export volumes of our business. A decline in trade could also affect the attractiveness of the United Kingdom as a global investment centre and, as a result, could have a detrimental impact on the level of investment in UK companies,

including our business, and ultimately on UK economic growth. Customer behaviour may change as a result of global economic uncertainty, which may cause our customers to re-evaluate when and to the extent they are willing to spend on our products and services. The uncertainty concerning the terms of Brexit could also have a negative impact on the growth of the UK economy and cause greater volatility in the British pound against foreign currencies in which we conduct business, particularly the US dollar, the euro and the Chinese yuan.

The Brexit vote and the perceptions as to the impact of the withdrawal of the United Kingdom has created significant uncertainty regarding the future relationship between the United Kingdom and the European Union, including with respect to the laws and regulations that will apply as the United Kingdom determines which European Union-derived laws to replace or replicate. This uncertainty may adversely affect business activity and economic conditions in the United Kingdom and the Eurozone. In particular, changes in taxes, tariffs and other fiscal policies could have a significant impact on our business; 23% of our retail sales volume in Fiscal 2017 was to customers based in Europe (excluding the United Kingdom) and a substantial portion of our suppliers are situated there. The economic outlook could be further adversely affected by the risk of a greater push for independence by Scotland or Northern Ireland or the risk that the euro as the single currency of the European Union could cease to exist. Changes to UK border and immigration policy could likewise occur as a result of Brexit, affecting our business's ability to recruit and retain employees from outside the United Kingdom. Any of the foregoing factors and others that we cannot predict may have a material adverse effect on our business, results of operations and financial condition.

Intensifying competition could materially and adversely affect our sales and results of operations.

The global automotive industry, including the premium passenger car segment, is highly competitive and competition is likely to further intensify, including from new industry entrants, in the worldwide automotive industry. There is a strong trend among market participants in the premium automotive industry towards intensifying efforts to retain their competitive position in established markets while also developing a presence in other key markets. In light of the impending Brexit some of our EU-based competitors may gain a competitive advantage that would enable them to benefit from their access to the European Union single market post-Brexit. A range of factors affect the competitive environment, including, among others, quality and features of vehicles, innovation, development time, ability to control costs, pricing, reliability, safety, fuel economy, environmental impact and perception thereof, customer service and financing terms. There can be no assurance that we will be able to compete successfully in the global automotive industry.

We are exposed to the risks of new drive and other technologies being developed and the resulting effects on the automobile market.

Over the past few years, the global market for automobiles, particularly in established markets, has been characterised by increasing demand for more environmentally friendly vehicles and technologies. This is related, in particular, to the public debate on global warming and climate protection. We endeavour to take account of climate protection and the ever more-stringent laws and regulations that have been and are likely to be adopted. We are focusing on researching, developing and producing new drive technologies, such as hybrid engines and electric cars. We are also investing in development programmes to reduce fuel consumption through the use of lightweight materials, reducing parasitic losses through the driveline and improvements in aerodynamics. Recently, several jurisdictions, such as Norway, Germany, the United Kingdom, France, the Netherlands, India and China, have announced the intention to eliminate the sale of conventionally fuelled vehicles in their markets in the coming decades.

Diesel technologies have also become the focus of legislators in the United States and European Union as a result of emissions levels. This has led various carmakers to announce programs to retrofit diesel vehicles with software that will allow them to reduce emissions which may require us to undertake increased R&D spending. There is a risk that these R&D activities, including retrofit software upgrades, will not achieve their planned objectives or that competitors or joint ventures set up by competitors will develop better solutions and will be able to manufacture the resulting products more rapidly, in larger quantities, with a higher quality and/or at a lower cost. This could lead to increased demand for the products of such competitors and result in a loss of market share for us. There is also a risk that the money invested in researching and developing new technologies, including autonomous, connected and electrification technologies, or money invested in mobility solutions to overcome and address future travel and transport challenges, will, to a considerable extent, have been spent in vain, because the technologies developed or the products derived therefrom are unsuccessful in the market or because competitors have developed better or less expensive products. It is possible that we could then be compelled to make new investments in researching and developing other technologies to maintain our existing market share or to win back the market share lost to competitors.

In addition, climate change concerns and the promotion of new technologies encourages customers to look beyond standard factors (such as price, design, performance, brand image or comfort/features) to differentiation of the technology used in the vehicle or the manufacturer or provider of this technology. This could lead to shifts in demand and the value-added parameters in the automotive industry at the expense of our products.

The electric vehicle market may not evolve as anticipated.

In November 2016, we unveiled the Jaguar I-PACE Concept, our first all-electric vehicle at the 2016 Los Angeles Motor Show. We plan to continue developing electric vehicles as more car manufacturers are considering various opportunities to expand their electric vehicle product range. However, sales of electric vehicles are hard to predict as consumer demand may fail to shift in favour of electric vehicles and this market segment may remain small relative to the overall market for years to come. Consumers may remain reluctant to adopt electric vehicles due to the lack of fully developed charging infrastructure or long charging times. If it takes longer for the long-term value proposition of electric vehicles to fully materialize, this could have a material adverse effect on our financial condition or results of operations.

Our competitors may be able to benefit from the cost savings offered by industry consolidation or alliances.

Designing, manufacturing and selling vehicles is capital intensive and requires substantial investments in manufacturing, machinery, research and development, product design, engineering, technology and marketing in order to meet both consumer preferences and regulatory requirements. If our competitors consolidate or enter into other strategic agreements such as alliances, they may be able to take better advantage of economies of scale. We believe that competitors may be able to benefit from the cost savings offered by consolidation or alliances, which could adversely affect our competitiveness with respect to those competitors. Competitors could use consolidation or alliances as a means of enhancing their competitiveness (including through the acquisition of technology), which could also materially adversely affect our business.

Increases in the cost, or disruptions in the supply, of vehicle parts resulting from disasters and accidents could materially harm our business.

We rely on a global network of suppliers for the inputs and logistics supporting our products and services. We are exposed to disruptions in this supply chain resulting from natural disasters or man-made accidents. For example, on 12 August 2015, there was an explosion in the city port of Tianjin, one of three major ports in China through which we import our vehicles. Approximately 5,800 of our vehicles were stored at various locations in Tianjin at the time of the explosion and, as a result, we recognised an exceptional charge of £245 million in the three months ended 30 September 2015. Subsequently, by 30 June 2017, net insurance proceeds and other recoveries were received, resulting in a full recovery. Substantial increases in the costs or a significant delay or sustained interruption in the supply of key inputs sourced from areas affected by disasters or accidents could adversely affect our ability to maintain our current and expected levels of production, and therefore negatively affect our revenues and increase our operating expenses.

New or changing laws, regulations and government policies regarding improved fuel economy, reduced greenhouse gas and other emissions, and vehicle safety may have a significant effect on how we do business.

We are subject throughout the world to comprehensive and constantly changing laws, regulations and policies. Please see “Our Business—Significant Environmental, Health, Safety and Emissions Issues—Environmental, health and safety regulation applicable to our production facilities” for an overview of these laws, regulations and policies. We expect the number and extent of legal and regulatory requirements and the related costs of changes to our product line-up to increase significantly in the future. In Europe and the United States, for example, governmental regulation is primarily driven by concerns about the environment (including greenhouse gas emissions), fuel economy, energy security and vehicle safety. In particular, the increasingly stringent regulatory environment in our industry, particularly with respect to vehicle emissions regulations, is leading to heightened regulatory scrutiny and more investigations into vehicle manufacturers, including randomized testing. We are currently subject to, and may in the future be subject to, randomized testing and similar enquiries by regulatory authorities with a focus on emissions and environmental performance. In China, further regulations are being introduced by the Chinese government in the short-to-medium term future relating to greenhouse gas emissions and other environmental concerns. Requirements to optimise vehicles in line with these governmental actions could significantly affect our plans for global product development and may result in substantial costs, including civil penalties in cases of non-compliance. They may also result in limiting the types of vehicles we sell and where we sell them, which may affect our revenue.

To comply with current and future environmental norms, we may have to incur additional capital expenditure and R&D expenditure to upgrade products and manufacturing facilities, install new emissions controls or reduction technologies and purchase or otherwise obtain allowances to emit greenhouse gases, which would have an impact on our cost of production and the results of operations and may be difficult to pass through to our customers. If we are unable to develop commercially viable technologies within the time frames set by the new standards, we could face significant civil penalties or be forced to restrict product offerings drastically to remain in compliance. For example, in the United States, manufacturers are subject to substantial civil penalties if they fail to meet federal Corporate Average Fuel Economy (“CAFE”), standards. These penalties are calculated at \$5.50 for each tenth of a mile below the required fuel-efficiency level for each vehicle sold in a model year in the U.S. market. As with many European manufacturers, since 2010, we have paid total penalties of \$46 million for failing to meet these standards. We could incur a substantial increase in these penalties, including as a result of the currently suspended increases in CAFE civil penalties to adjust for inflation. Moreover, safety and environmental standards may at times impose conflicting imperatives, which pose engineering challenges and would, among other things, increase our costs. While we are pursuing the development and implementation of various technologies in order to meet the required standards in the various countries in which we sell our vehicles, the costs for compliance with these required standards could be significant to our operations and may materially and adversely affect our business, financial condition and results of operations.

In 2014, the antitrust regulator in China, the Bureau of Price Supervision and Anti-Monopoly of the National Development and Reform Commission (the “NDRC”), launched an investigation into the pricing practices of more than 1,000 Chinese and international companies in the automotive industry, including Jaguar Land Rover and many of our competitors. The NDRC has reportedly imposed fines on certain of our international competitors as a result of anti-competitive practices pertaining to vehicle and spare-part pricing. In response to this investigation, we established a process to review our pricing in China and announced reductions in the manufacturer’s suggested retail price for the 5.0-litre V8 models, which include the Range Rover, Range Rover Sport and F-TYPE and the price of certain of our spare parts. Further imposition of price reductions and other actions taken in relation to our products may significantly reduce our revenues and profits generated by operations in China and have a material adverse effect on our financial condition and results of operations. As a result, our attempts to offset the potential decline in revenue and profits by increasing operational efficiencies and leveraging economies of scale (for example, through local production in China) may fail or not be as successful as expected. Furthermore, any regulatory action taken or penalties imposed by regulatory authorities may have significant adverse financial and reputational consequences on our business and have a material adverse effect on our results of operations and financial condition.

Changes in tax, tariff or fiscal policies could adversely affect the demand for our products.

Imposition of any additional taxes and levies designed to limit the use of automobiles could adversely affect the demand for our vehicles and our results of operations. Changes in corporate and other taxation policies as well as changes in export and other incentives given by various governments or import or tariff policies could also adversely affect our results of operations. For instance, Brexit may result in material changes to the UK’s tax, tariff and fiscal policies. In addition, the United States presidential administration could seek to introduce changes to laws and policies governing international trade and impose additional tariffs and duties on foreign vehicle imports, as evidenced by the ongoing renegotiation of the North American Free Trade Act, which could have a material adverse effect on our sales in the United States. Furthermore, in recent years, the Brazilian government has implemented increased import duty on foreign vehicles, along with related exemptions provided certain criteria are met. We continue our discussions with the Brazilian government to manage the impact on our business and are seeking to reduce the impact of increased tariffs. Finally, the European Commission opened an investigation into whether certain tax and other incentives granted by the government of Slovakia in connection with the construction of our Slovakian manufacturing facility complied with European Union rules on state aid. Such government actions may be unpredictable and beyond our control, and any adverse changes in government policy could have a material adverse effect on our business prospects, results of operations and financial condition.

Risks Associated with Our Business

Our future success depends on our ability to satisfy changing customer demands by offering attractive and innovative products in a timely manner and maintaining such products’ competitiveness and quality.

Customer preferences, especially in many of the more mature markets, have trended towards smaller and more fuel-efficient and environmentally friendly vehicles. In many markets, these preferences are driven by customers’ environmental concerns, increases in fuel prices and government regulations, such as regulations regarding the level of CO₂ emissions, speed limits and higher taxes on sports utility vehicles or premium automobiles.

Such consumer preferences could materially affect our ability to sell premium passenger cars and large or medium-sized all-terrain vehicles at current or targeted volume levels, and could have a material adverse effect on our general business activity, net assets, financial position and results of operations.

Our operations may be significantly impacted if we fail to develop, or experience delays in developing, fuel-efficient vehicles that reflect changing customer preferences and meet the specific requirements of government regulations. Our competitors can gain significant advantages if they are able to offer vehicles that satisfy customer preference and government regulations earlier than we are. Potential delays in bringing new high-quality vehicles to market would adversely affect our business, financial condition, results of operations and cash flows.

Private and commercial users of transportation increasingly use modes of transportation other than the automobile, especially in connection with increasing urbanisation. The reasons for this include the rising costs related to automotive transport of people and goods, increasing traffic density in major cities and environmental awareness. In addition, the increased use of car sharing concepts and other innovative mobility initiatives facilitates access to other methods of transport, thereby reducing dependency on private automobiles. Furthermore, non-traditional market participants may disrupt the established business model of the industry by introducing new technologies, distribution models and methods of transportation.

A change in consumer preferences away from larger vehicles towards smaller vehicles or vehicles equipped with smaller engines or a reduced dependency on private automobiles would have a material adverse effect on our general business activity and on our net assets, financial position and results of operations.

There can be no assurance that our new models will meet our sales expectations, in which case we may be unable to realise the intended economic benefits of our investments, which would in turn materially affect our business, results of operations and financial condition. In addition, there is a risk that our quality standards can be maintained only by incurring substantial costs for monitoring and quality assurance. For our customers, one of the determining factors in purchasing our vehicles is the high quality of our products. A decrease in the quality of our vehicles (or if the public were to have the impression that such a decrease in quality had occurred) could damage our image and reputation as a premium automobile manufacturer and in turn materially affect our business, results of operations and financial condition.

In addition, product development cycles can be lengthy, and there is no assurance that new designs will lead to revenues from vehicle sales, or that we will be able to accurately forecast demand for our vehicles, potentially leading to inefficient use of our production capacity. Additionally, our high proportion of fixed costs, due to our significant investment in property, plant and equipment, further exacerbates the risks associated with incorrectly assessing demand for our vehicles.

We are more vulnerable to reduced demand for premium performance cars and all-terrain vehicles than automobile manufacturers with a more diversified product range.

We operate in the premium performance car and all-terrain vehicle segments, which are very specific segments of the premium passenger car market, and we have a more limited range of models than some of our competitors. Accordingly, our performance is linked to market conditions and consumer demand in those market segments in which we operate. Furthermore, some other premium performance vehicle manufacturers operate in a relatively broader spectrum of market segments, which makes them comparatively less vulnerable to reduced demand for any specific segment. Any downturn or reduction in the demand for premium passenger cars and all-terrain vehicles, or any reduced demand for our most popular models in the geographic markets in which we operate, could have a more pronounced effect on our performance and earnings than would have been the case if we had operated in a larger number of different market segments.

Our business is seasonal in nature and a substantial decrease in our sales during certain quarters could have a material adverse impact on our financial performance.

The sales volumes and prices for our vehicles are influenced by the cyclical and seasonality of demand for these products. We are affected by the biannual change in age-related registration plates of vehicles in the United Kingdom, when new vehicle registrations take effect in March and September, which in turn has an impact on the resale value of vehicles. This leads to an increase in sales during the period when the aforementioned change occurs. For instance, in the three months ended 30 June 2017 our wholesales decreased by 40,960 units as compared to the three months ended 31 March 2017 reflecting seasonal planning volumes, and in part explaining the 1.2% EBIT margin in the three months ended 30 June 2017. Markets in China tend to experience higher demand for vehicles around the Lunar New Year holiday in either January or February, the Chinese National Day holiday and the Golden Week holiday in October. Most other markets, such as the United States, are driven by introduction of new model year vehicles, which typically occurs in the autumn of each year.

Furthermore, Western European markets tend to be impacted by the summer and winter holidays. The resulting sales profile influences our operating and financial results on a quarter-to-quarter basis. Our summer and winter shutdowns also have a significant seasonal impact on our financial results, including working capital and cash flows. Sales in the automotive industry have been cyclical in the past and we expect this cyclicity to continue. The resulting profile of operating results differs between each reporting period.

Interest rate, currency and exchange rate fluctuations could adversely affect our results of operations.

Our operations are also subject to fluctuations in exchange rates with reference to countries in which we operate. We sell vehicles in the United Kingdom, North America, Europe, China, Russia and many other markets and therefore generate revenue in, and have significant exposure to movements of, the US dollar, euro, Chinese yuan, Russian rouble and other currencies relative to British pounds (our reporting currency). Accordingly, we are exposed to a strengthening British pound, since this would diminish the sterling value of our overseas sales. A significant proportion of our input materials and components and capital equipment are sourced overseas, in particular from Europe, and therefore we have costs in, and significant exposure to the movement of, the euro (specifically a strengthening of the euro) and certain other currencies relative to the British pound (our reporting currency) which may result in decreased profits to the extent these are not fully mitigated by non-British pound sales. The majority of our product development and manufacturing operations, as well as our global headquarters, are based in the United Kingdom, but we also have national sales companies which operate in the major markets in which we sell vehicles. As a result we have exposure to movements of the US dollar, euro, Chinese yuan, Russian rouble and other currencies relative to pounds sterling and foreign exchange volatility may affect our results of operations, profitability and financial position.

Moreover, we have foreign currency denominated debt outstanding and are sensitive to fluctuations in foreign currency exchange rates. We have experienced, and expect to continue to experience, foreign exchange losses and gains on obligations denominated in foreign currencies in respect of our borrowings and foreign currency assets and liabilities due to currency fluctuations.

We seek to manage our foreign exchange exposure through the use of financial hedging instruments, including foreign currency forward contracts and currency option contracts. Please see “Description of Other Indebtedness—Hedging Facilities”. We are, however, exposed to the risk that appropriate hedging lines for the type of risk exposures we are subject to may not be available at a reasonable cost, particularly during volatile rate movements, or at all. Moreover, there are risks associated with the use of such hedging instruments. Whilst mitigating to some degree our exposure to fluctuations in currency exchange rates, we potentially forgo benefits that might result from market fluctuations in currency exposures. The general weakening of the British pound following Brexit, in particular versus the euro, has resulted in movements in our foreign exchange hedging derivatives and euro-denominated cost-base, either of which could have had, and could continue to have, an impact on our results of operations. Please see “Operating and Financial Review and Prospects—General Trends of Our Recent Performance—Recent Macroeconomic Trends”. Hedging transactions can also result in substantial losses. Such losses could occur under various circumstances, including, without limitation, any circumstances in which a counterparty does not perform its obligations under the applicable hedging arrangement (despite having ISDA agreements in place with each of our hedging counterparties), currency fluctuations, the arrangement is imperfect or ineffective, or our internal hedging policies and procedures are not followed or do not work as planned. In addition, because our potential obligations under the financial hedging instruments are marked to market, we may experience quarterly and annual volatility in our operating results and cash flows attributable to our financial hedging activities.

The Group has both interest-bearing assets (including cash balances) and interest-bearing liabilities, certain of which bear interest at variable rates (whereas the Notes and Existing Notes bear interest at fixed rates). We are therefore exposed to changes in interest rates. While the directors revisit the appropriateness of these arrangements in light of changes to the size or nature of the Group’s operations, we may be adversely affected by the effect of changes in interest rates.

A decline in retail customers’ purchasing power or consumer confidence or in corporate customers’ financial condition and willingness to invest could significantly adversely affect our business.

Demand for vehicles for personal use generally depends on consumers’ net purchasing power, their confidence in future economic developments and changes in fashion and trends, while demand for vehicles for commercial use by corporate customers (including fleet customers) primarily depends on the customers’ financial condition, their willingness to invest (motivated by expected future business prospects) and available financing. A decrease in potential customers’ disposable income or their financial flexibility or an increase in the cost of financing will generally have a negative impact on demand for our products.

A weak macroeconomic environment, combined with restrictive lending and a low level of consumer sentiment generally, may reduce consumers' net purchasing power and lead existing and potential customers to refrain from purchasing a new vehicle, to defer a purchase further or to purchase a smaller model with fewer features at a lower price. A deteriorating macroeconomic environment may disproportionately reduce demand for luxury vehicles. It also leads to reluctance by corporate customers to invest in vehicles for commercial use and/or to lease vehicles, resulting in a postponement of fleet renewal contracts.

To stimulate demand, the automotive industry has offered customers and dealers price reductions on vehicles and services, which has led to increased price pressures and sharpened competition within the industry. As a provider of numerous high-volume models, our profitability and cash flows are significantly affected by the risk of rising competitive and price pressures.

Special sales incentives and increased price pressures in the new car business also influence price levels in the used car market, with a negative effect on vehicle resale values. This may have a negative impact on the profitability of the used car business in our dealer organisation.

Reductions in the availability of consumer financing and used car valuations or an increase in the cost of consumer financing could materially and adversely affect our sales and results of operations.

We have consumer finance arrangements in place with Lloyds Black Horse in the United Kingdom, FCA Bank S.p.A. in European markets and Chase Auto Finance in North America and have similar arrangements with local providers in a number of other key markets. Any reduction in the supply of available consumer financing for the purchase of new vehicles or an increase in the cost thereof would make it more difficult for some of our customers to purchase our vehicles, which could put us under commercial pressure to offer new (or expand existing) retail or dealer incentives to maintain demand for our vehicles, thereby materially and adversely affecting our sales and results of operations. For example, during the global financial crisis, several providers of customer finance reduced their supply of consumer financing for the purchase of new vehicles. Additionally, base interest rates in developed economies are at historic lows. An increase in interest rates due to tightening monetary policy or for any other reason would result in increased costs for consumers.

Furthermore, we offer residual value guarantees on the purchase of certain leases in some markets. The value of these guarantees is dependent on used car valuations in those markets at the end of the lease, which is subject to change. Consequently, we may be adversely affected by movements in used car valuations in these markets.

Our significant reliance on key markets increases the risk of negative impact of adverse change in customer demand in those countries.

We have a significant presence in the United Kingdom, Chinese, North American and continental European markets from which we derive the substantial majority of our revenues. Although demand remains relatively solid, a decline in demand for our vehicles in these major markets may in the future significantly impair our business, financial position and results of operations. In China, for example, the economy is experiencing a moderation of industry growth and increased pricing pressures due to macroeconomic volatility, softening consumer demand and increasing competition. Softening of the Chinese economy would be expected to impact our growth opportunities in that country, which is an important market for us. In addition, our strategy, which includes new product launches and expansion into growing markets may not be sufficient to mitigate a decrease in demand for our products in mature markets in the future, which could have a significant adverse impact on our financial performance.

Disruptions to our supply chains or shortages of essential raw materials may adversely affect our production and results of operations.

We rely on third parties for sourcing raw materials, parts and components used in the manufacture of our products. At the local level, we are exposed to reliance on smaller enterprises where the risk of insolvency is greater. Furthermore, for some parts and components, we are dependent on a single source. Our ability to procure supplies in a cost-effective and timely manner or at all is subject to various factors, some of which are not within our control. For instance, the outcome of the Brexit negotiations could lead to reduced access to the European Union single market and to the global trade deals negotiated by the European Union on behalf of its members, which could affect the imports of raw materials, parts and components and disrupt our supplies. Furthermore, there is the risk that manufacturing capacity does not meet, or exceeds, sales demand thereby compromising business performance and without any near term remedy given the time frames and investments required for any change.

While we manage our supply chain as part of our supplier management process, any significant problems with our supply chain or shortages of essential raw materials in the future could affect our results of operations in an adverse manner.

Adverse economic conditions and falling vehicle sales have had a significant financial impact on our suppliers in the past. Deterioration in automobile demand and lack of access to sufficient financial arrangements for our supply chain could impair the timely availability of components to us. In addition, if one or more of the other global automotive manufacturers were to become insolvent, this would have an adverse impact on the supply chains and may further adversely affect our results of operations.

We have also entered into supply agreements with Ford and certain other third parties for critical components and remain reliant upon Ford and the Ford-PSA joint venture for a portion of our engines. However, following the launch of the EMC in Wolverhampton, and the subsequent engine plant opened by our China Joint Venture, we now also manufacture our own “in-house” engines. We may not be able to manufacture certain types of engines or find a suitable replacement supplier in a timely manner in the event of any disruption in the supply of engines, or parts of engines, and other hardware or services provided to us by Ford or the Ford-PSA joint venture and such disruption could have a material adverse impact on our operations, business and/or financial condition.

Increases in input prices may have a material adverse impact on our result of operations.

In the three months ended 30 June 2017 and 2016, our material and other cost of sales (comprising raw materials, components and purchases of products for sale) constituted 64% and 61%, respectively, of our total revenues. Prices of commodities used in the manufacture of automobiles, including steel, aluminium, copper, zinc, rubber, lithium, platinum, palladium and rhodium, have experienced periods of increased volatility in recent years. Furthermore, prices of commodity items such as steel, non-ferrous metals, precious metals, rubber and petroleum products may rise significantly. Most of these inputs are priced in US dollars on international markets. While we continue to pursue cost reduction initiatives, an increase in the price of input materials could severely impact our profitability to the extent such increase cannot be absorbed by the market through price increases and/or could have a negative impact on demand. In addition, because of intense price competition and fixed costs base, we may not be able to adequately address changes in commodity prices even if they are foreseeable. Please see “Risk Factors—Risks Associated with the Automotive Industry—Deterioration in global economic conditions could have a significant adverse impact on our sales and results of operations”.

In addition, we are exposed to the risk of contraction in the supply, and a corresponding increase in the price of, rare and frequently highly sought-after raw materials, especially those used in vehicle electronics such as rare earths, which are predominantly produced in China. Rare earth metal prices and supply remain uncertain. China has, in the past, limited the export of rare earths from time to time. If we are unable to find substitutes for such raw materials or pass price increases on to customers by raising prices, or to safeguard the supply of scarce raw materials, our vehicle production, business and results from operations could be affected.

We are also exposed to supply chain risks relating to lithium-ion cells which are critical for our electric vehicle production. Any disruption in the supply of battery cells from such suppliers could disrupt production of our vehicles. The severity of this risk is likely to increase as we and other manufacturers increase electric vehicle production.

We presently manage the risks for some of these commodities through the use of fixed price supply contracts with tenors of up to 12 months and the use of financial derivatives pursuant to a defined hedging policy. However, our hedging transactions may not adequately protect us against these risks. In addition, if markets move adversely, we may incur financial losses on such hedging transactions, which could have a material adverse impact on our financial condition and results of operations.

We are exposed to various operational risks, including cybersecurity risks in connection with the use of information technology.

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. This includes, among other things, losses that are caused by a lack of controls within internal procedures, violation of internal policies by employees, disruption or malfunction of IT systems, computer networks and telecommunications systems, mechanical or equipment failures, human error, natural disasters, security breaches or malicious acts by third parties (including, for example, hackers). We are generally exposed to risks in the field of information technology, since unauthorised access to or misuse of data processed on our IT systems, human errors associated therewith or technological failures of any kind could disrupt our operations, including the manufacturing, design and engineering processes. In particular, as vehicles become more technologically advanced and connected to the internet, our vehicles may

become more susceptible to unauthorised access to their systems. Like any other business with complex manufacturing, research, procurement, sales and marketing and financing operations, we are exposed to a variety of operational risks and, if the protection measures put in place prove insufficient, our results of operations and financial condition can be materially adversely affected. In addition, we would likely experience negative press and reputational impacts.

Our production facilities are highly regulated and we may incur significant costs to comply with, or address liabilities under, environmental, health and safety laws and regulations applicable to them.

Our production facilities are subject to a wide range of environmental, health and safety requirements. These requirements address, among other things, air emissions, wastewater discharges, accidental releases into the environment, human exposure to hazardous materials, the storage, treatment, transportation and disposal of wastes and hazardous materials, the investigation and clean-up of contamination, process safety and the maintenance of safe conditions in the workplace. Many of our operations require permits and controls to monitor or reduce pollution. We have incurred, and will continue to incur, substantial on-going capital and operating expenditures to ensure compliance with current and future environmental, health and safety laws and regulations or their more stringent enforcement. Violations of these laws and regulations could result in the imposition of significant fines and penalties, the suspension, revocation or non-renewal of our permits, production delays or limitations, or the closure of our plants. Other environmental, health and safety laws and regulations could impose restrictions or onerous conditions on the availability or the use of raw materials we need for our manufacturing process. Violations of these laws and regulations may occur, among other ways, from errors in monitoring emissions of hazardous or toxic substances from our vehicles or production sites into the environment, such as our use of incorrect methodologies or defective or inappropriate measuring equipment, errors in manually capturing results, or other mistaken or unauthorised acts of our employees, suppliers or agents.

Our business and manufacturing processes result in the emission of greenhouse gases such as CO₂. We expect requirements to reduce greenhouse gases to become increasingly more stringent and costly to address over time. For example, the EU Emissions Trading Scheme (“EUETS”), a EU-wide system in which allowances to emit greenhouse gases are issued and traded, is now in Phase 3 (2013 to 2020) and applies to three manufacturing facilities in the United Kingdom, and will apply to our facility in Slovakia once complete. We have managed our EUETS allowances during previous phases of the EUETS scheme and use these remaining allowances from these earlier phases to meet our compliance requirements. The automotive sector has also been given recognition of being at risk of “carbon leakage” in accordance with the EUETS rules. This means that we will receive an increase in free allowances from 2015 and 2019. As a consequence of these actions, we currently project that we will reach the end of Phase 3 without the need to purchase EUETS carbon allowances. In the current draft Phase 4 legislation, to be in effect from 2021 to 2030, all organisations in the EUETS scheme will see free allowances diminish to zero by 2027, so we project that we will be required to purchase EUETS allowances in Phase 4 of the scheme, potentially at substantial cost. This forecast is subject to further evaluation of the UK vote to leave the European Union and its impact on the regulated carbon schemes. In any event, there will be a cost to purchase credits in Slovakia and that is currently being assessed.

We have a Climate Change Agreement (“CCA”) in the UK which covers our manufacturing energy use. This requires us to deliver a 15% reduction in energy use per vehicle by 2020 compared to the 2008 baseline. Our projections show that we are on track to achieve this target and consequently will not need to purchase carbon allowances under this scheme.

We are also registered as a participant in the CRC Scheme, which regulates emissions from electricity and gas use in our non-vehicle manufacturing activities in the United Kingdom. We purchased carbon allowances under this scheme for the first time in 2015 and in each year thereafter, most recently in September 2017 in respect of Fiscal 2017.

The Department of Energy and Climate Change consultation on potential changes to the energy taxation regime in the UK will see the removal of the CRC scheme from 2019. Her Majesty’s Treasury has advised that the changes need to be cost neutral and should not result in a decrease in the revenues raised from the schemes. Consequently, we believe we will see an increase in Climate Change Levy paid on the energy we consume in lieu of the removal of CRC.

Many of our sites have an extended history of industrial activity. We may be required to investigate and remediate contamination at those sites, as well as properties we formerly operated, regardless of whether we caused the contamination or the activity causing the contamination was legal at the time it occurred. For example, some of our buildings at our Solihull plant and other plants in the United Kingdom are undergoing an asbestos removal programme in connection with on-going refurbishment and rebuilding. In our overseas facilities prior to purchase we undertook studies that informed us of the presence of contamination or otherwise in the ground prior to development. In Slovakia, pesticides were found during one site investigation but were not found to be present when the site investigation was repeated. In Brazil, manufacturing site

Itatiaia West is listed by the state environmental regulator (INEA) as contaminated as it is adjacent to a facility where organic solvent contamination of the ground occurred. We have purchased the adjacent site and are currently progressing relevant permits for operation and developing plans for further remediation of the organic solvent contamination.

In connection with contaminated properties, as well as our operations generally, we also could be subject to claims by government authorities, individuals and other third parties seeking damages for alleged personal injury or property damage or damage to natural resources resulting from hazardous substance contamination or exposure caused by our operations, facilities or products. The discovery of previously unknown contamination, or the imposition of new obligations to investigate or remediate contamination at our facilities, could result in substantial unanticipated costs. We could be required to establish or substantially increase financial reserves for such obligations or liabilities and, if we fail to accurately predict the amount or timing of such costs, the related adverse impact on our business, financial condition or results of operations could be material.

Our business could be subject to the effects of climate change.

Our manufacturing operations and sales may be subject to potential physical impacts of climate change, including changes in weather patterns and an increased potential for extreme weather events, which could affect the manufacture and distribution of our products and the cost and availability of raw materials and components. It could also affect transportation preferences, the demand for our products and result in additional greenhouse gas regulation that could increase our operating costs.

Any inability to implement our growth strategy by entering new markets may adversely affect our results of operations.

Our growth strategy relies on the expansion of our operations in emerging markets and other parts of the world which feature higher growth potential than many of the more mature automotive markets in developed countries. The costs associated with entering and establishing ourselves in new markets, and expanding such operations may, however, be higher than expected, and we may face significant competition in those regions. In addition, our international business faces a range of risks and challenges, including language barriers, cultural differences, difficulties in staffing and managing overseas operations, inherent difficulties and delays in contract enforcement and the collection of receivables under the legal systems of foreign countries, the risk of non-tariff barriers, regulatory and legal requirements affecting our ability to enter new markets through joint ventures with local entities, difficulties in obtaining regulatory approvals, environmental permits and other similar types of governmental consents, difficulties in negotiating effective contracts, obtaining the necessary facility sites or marketing outlets or securing essential local financing, liquidity, trade financing or cash management facilities, export and import restrictions, multiple tax regimes (including regulations relating to transfer pricing and withholding and other taxes on remittances and other payments from subsidiaries), foreign investment restrictions (including restrictions on incentives offered by foreign governments for investment in their jurisdictions), foreign exchange controls and restrictions on repatriation of funds, other restrictions on foreign trade or investment sanctions, and the burdens of complying with a wide variety of foreign laws and regulations. If we are unable to manage risks related to our expansion and growth in other parts of the world and therefore fail to establish a strong presence in those higher growth markets, our business, results of operations and financial condition could be adversely affected or our investments could be lost.

Under-performance of our distribution channels may adversely affect our sales and results of operations.

Our products are sold and serviced through a network of authorised dealers and service centres across our domestic market, and a network of distributors and local dealers in international markets. We monitor the performance of our dealers and distributors and provide them with support to assist them to perform to our expectations. There can be no assurance, however, that our expectations will be met. Any under-performance by our dealers, distributors or service centres could adversely affect our sales and results of operations.

If dealers or importers encounter financial difficulties and our products and services cannot be sold or sold only in limited numbers, this would have a direct effect on the retail sales of such dealers and importers. Additionally, if we cannot replace the affected dealers or importers with other franchises, the financial difficulties experienced by such dealers or importers could have an indirect effect on our wholesales.

Consequently, we could be compelled to provide additional support for dealers and importers and, under certain circumstances, may even take over their obligations to customers, which would adversely affect our financial position and results of operations in the short term.

We may be adversely impacted by political instability, wars, terrorism, multinational conflicts, natural disasters, fuel shortages/prices, epidemics, labour strikes and other risks in the markets in which we operate.

Our products are exported to a number of geographical markets and we plan to expand our international operations further in the future. Consequently, we are subject to various risks associated with conducting our business both within and outside our domestic market and our operations may be subject to political instability, wars, terrorism, regional and/or multinational conflicts, natural disasters, fuel shortages/prices, epidemics and labour strikes. In addition, conducting business internationally, especially in emerging markets, exposes us to additional risks, including adverse changes in economic and government policies, unpredictable shifts in regulation, inconsistent application of existing laws and regulations, unclear regulatory and taxation systems and divergent commercial and employment practices and procedures. Any significant or prolonged disruptions or delays in our operations related to these risks could adversely impact our results of operations.

A change in requirements under long-term supply arrangements committing us to purchase minimum or fixed quantities of certain parts, or to pay a minimum amount to the seller, could have a material adverse impact on our financial condition or results of operations.

We have entered into a number of long-term supply contracts that require us to purchase a fixed quantity of parts to be used in the production of our vehicles (e.g., “take-or-pay” contracts). If our need for any of these parts were to lessen, we could still be required to purchase a specified quantity of the part or pay a minimum amount to the seller pursuant to the take-or-pay contract, which could have a substantial adverse effect on our financial condition or results of operations.

We have a limited number of manufacturing, design and engineering facilities and any disruption in the operations of those facilities could adversely affect our business, financial condition or results of operations.

We have four wholly owned manufacturing facilities and two design and engineering centres in the United Kingdom, a manufacturing plant under construction in Slovakia, a manufacturing plant in Brazil and a manufacturing facility in China, which we own together with our joint venture partner Chery, among other manufacturing locations, see “Our Business—Properties and Facilities”. We could experience disruption to our manufacturing, design and engineering capabilities for a variety of reasons, including, among others, extreme weather, fire, theft, system failures, natural catastrophes, mechanical or equipment failures and similar risks. We are particularly exposed to such disruptions due to the limited number of our facilities. Any significant disruptions could adversely affect our ability to design, manufacture and sell our products and, if any of those events were to occur, we cannot be certain that we would be able to shift our design, engineering and manufacturing operations to alternative sites in a timely manner or at all. Any such disruption could therefore materially affect our business, financial condition or results of operations.

We are exposed to liquidity risks.

Our main sources of liquidity are cash generated from operations, the Existing Notes, external debt in the form of factoring discount facilities and other revolving credit facilities and, if necessary, financial support from our parent company. However, adverse changes in the global economic and financial environment may result in lower consumer demand for vehicles, and prevailing conditions in credit markets may adversely affect both consumer demand and the cost and availability of finance for our business and operations. If the global economy goes into recession and consumer demand for our vehicles drops, as a result of higher oil prices, excessive public debt or for any other reasons, and the supply of external financing becomes limited, we may again face significant liquidity risks.

We are also subject to various types of restrictions or impediments on the ability of certain Group companies in certain countries to remit cash across the Group other than through dividends. These restrictions or impediments are caused by exchange controls, withholding taxes on dividends and distributions and other similar restrictions in the markets in which we operate. At 30 June 2017, we had cash and cash equivalents of £1,637 million (down from £2,878 million at 31 March 2017), short-term investments (bank deposits with a maturity of between three and twelve months) of £2,471 million (down from £2,609 million as at 31 March 2017) and undrawn committed facilities of £1,870 million (unchanged from 31 March 2017). The total amount of cash and cash equivalents includes £513 million held in subsidiaries of the Issuer outside the United Kingdom as at 30 June 2017. The cash in some of these jurisdictions is subject to certain restrictions on cash pooling, intercompany loan arrangements or interim dividends. However, annual dividends are generally permitted and we do not believe that these restrictions have, or are expected to have, any impact on our ability to meet our cash obligations.

We are subject to risks associated with product liability, warranty and recalls.

We are subject to risks and costs associated with product liability, warranties and recalls in connection with performance, compliance or safety-related issues affecting our vehicles. From time to time we may be subject to investigations by governmental authorities relating to safety-related and other compliance issues with our vehicles. In particular, as our vehicles become more technologically advanced, we are subject to risks related to their software and operation, including as part of our Advanced Driver Assistance Systems automation. We expend considerable resources in connection with product recalls and these resources typically include the cost of the part being replaced and the labour required to remove and replace the defective part. In addition, product recalls can cause our consumers to question the safety or reliability of our vehicles and harm our reputation. Any harm to the reputation of any one of our models can result in a substantial loss of customers. For example, in May 2016, an industry-wide passenger airbag safety recall was announced in the United States by the National Highway Traffic System Administration (“NHTSA”), in respect of airbags from Takata Corporation (“Takata”), a supplier of airbags. Certain airbags supplied by Takata were installed in our vehicles. We considered the cost associated with the recall to be an adjusting post-balance sheet event and we recognised an additional provision of £67.4 million for the estimated cost of repairs in our income statement for Fiscal 2016 and a provision of £61.2 million in Fiscal 2017. We expect to utilise such provision over the next one to three years. Additionally, in December 2016, NHTSA announced that it was conducting an investigation into reports of rollaways of parked vehicles in certain of our models, and in June 2017 announced an investigation into the brake fluid warning statement label on certain of our vehicles.

Furthermore, we may also be subject to class actions or other large-scale product liability or other lawsuits in various jurisdictions in which we have a significant presence. The use of shared components in vehicle production increases this risk because individual components are deployed in a number of different models across our brands. Any costs incurred or lost sales caused by product liability, warranties and recalls could materially adversely affect our business.

Our business relies on the protection and preservation of our intellectual property.

We own or otherwise have rights in respect of a number of patents and trademarks relating to the products we manufacture, which have been obtained over a period of years. In connection with the design and engineering of new vehicles and the enhancement of existing models, we seek to regularly develop new technical designs for use in our vehicles. We also use technical designs which are the intellectual property of third parties with such third parties’ consent. These patents and trademarks have been of value in the growth of our business and may continue to be of value in the future. Although we do not regard any of our businesses as being dependent upon any single patent or related group of patents, an inability to protect this intellectual property generally, or the illegal breach of some or a large group of our intellectual property rights, would have a materially adverse effect on our operations, business and/or financial condition. We may also be affected by restrictions on the use of intellectual property rights held by third parties and we may be held legally liable for the infringement of the intellectual property rights of others in our products. Moreover, intellectual property laws of some foreign countries may not protect our intellectual property rights to the same extent as United States or United Kingdom laws.

We may be adversely affected by risks associated with joint ventures with third parties.

We have pursued and may continue to pursue significant investments in certain strategic development projects with third parties. In particular, we have entered into a joint venture with Chery in China to develop, manufacture and sell certain Jaguar Land Rover vehicles and at least one own-branded vehicle in China. Please see “Our Business—China Joint Venture”. Joint venture projects, like our joint venture in China, may be developed pursuant to agreements over which we only have partial or joint control. Investments in projects over which we have partial or joint control are subject to the risk that the other shareholders of the joint venture, who may have different business or investment strategies than we do or with whom we may have a disagreement or dispute, may have the ability to block business, financial or management decisions, such as the decision to distribute dividends or appoint members of management, which may be crucial to the success of the project or our investment in the project, or otherwise implement initiatives which may be contrary to our interests. Moreover, our partners may be unable, or unwilling, to fulfil their obligations under the relevant joint venture agreements and shareholder agreements or may experience financial or other difficulties that may adversely impact our investment in a particular joint venture.

Operating a business as a joint venture often requires additional organisational formalities as well as time-consuming procedures for sharing information and making decisions. In joint ventures we are required to foster our relationships with our co-owners as well as to promote the overall success of the joint venture, and if there is a significant change in the relationship (for example, if a co-owner changes or relationships deteriorate), our success in the joint venture may be materially adversely affected.

If we are unable to effectively implement or manage our strategy, our operating results and financial condition could be materially and adversely affected.

As part of our strategy, we may open new manufacturing, research or engineering facilities, expand existing facilities, add additional product lines or expand our businesses into new geographical markets. There is a range of risks inherent in such a strategy that could adversely affect our ability to achieve these objectives, including, but not limited to, the following:

- the potential disruption of our business;
- the uncertainty that new product lines will generate anticipated sales;
- the uncertainty that a new business will achieve anticipated operating results;
- the diversion of resources and management's time;
- our cost reduction efforts, which may not be successful;
- the difficulty of managing the operations of a larger company; and
- the difficulty of competing for growth opportunities with companies having greater financial resources than we have.

The value of our intangible assets as reported in our consolidated financial statements may need to be impaired.

At least once a year, we review whether the value of intangible assets may be impaired based on the underlying cash-generating units. If there is objective evidence that the carrying amount is higher than the recoverable amount for the asset concerned, we incur an impairment loss. An impairment loss may be triggered, among other things, by an increase in interest rates. As a consequence, we may need to take an impairment loss as of a future balance sheet date.

In Fiscal 2016, following a review of all product development in progress, we identified a £28 million write-down, related to previously capitalised development costs, which has been recognised as an expense within 'Other expenses' in our Consolidated Financial Statements elsewhere in this Offering Memorandum (£nil in Fiscal 2017 and £nil in Fiscal 2015).

We may be adversely affected by labour unrest.

In general, we consider our labour relations with all of our employees, a substantial portion of whom are members of trade unions, to be good. However, in the future we may face labour unrest, at our own facilities or those of our suppliers, which may delay or disrupt our operations in the affected regions, including the sourcing of raw materials and parts, the manufacture, sales and distribution of vehicles and the provision of services. If work stoppages or lock-outs at our facilities or at the facilities of our major suppliers occur or continue for a long period of time, our business, financial condition and results of operations may be materially adversely affected. In addition, we engage in bi-annual negotiations in relation to wage agreements, covering approximately 20,000 of our unionised employees, the most recent of which resulted in a two-year wage agreement concluded in November 2016. There is a risk, however, that future negotiations could escalate into industrial action ranging from "work to rule" to a strike before a settlement is ultimately reached.

We could be adversely affected by the loss of one or more key personnel or by an inability to attract and retain highly qualified employees.

We believe that our growth and future success depend in large part on the skills of our executive and other senior officers, as well as our senior designers and engineers. The loss of the services of one or more of these employees could impair our ability to continue to implement our business strategy. Our executive and other senior officers and senior designers have extensive and long-standing ties within our primary lines of business and substantial experience with our operations, and have contributed significantly to our growth. If we lose the services of one or more of them, he or she may be difficult to replace and our business could be materially and adversely affected. Our success also depends, in part, on our continued ability to attract and retain experienced and qualified employees, particularly qualified engineers with expertise in automotive design and production. The competition for such employees is intense, and our inability to continue to attract,

retain and motivate employees could adversely affect our business and our plans to invest in the development of new designs and products.

Future pension obligations may prove more costly than currently anticipated and the market value of assets in our pension plans could decline.

We provide post-retirement and pension benefits to our employees, some of which are defined benefit plans. Our pension liabilities are generally funded and our pension plan assets are particularly significant. As part of our Strategic Business Review process, we closed the Jaguar Land Rover defined benefit pension plan to new joiners as at 19 April 2010. All new employees in our operations from 19 April 2010 have joined a new defined contribution pension plan.

Under the arrangements with the trustees of the defined benefit pension schemes, an actuarial valuation of the assets and liabilities of the schemes is undertaken every three years. The most recent valuation, as at 31 March 2017, indicated a shortfall in the assets of the schemes as at that date, versus the actuarially determined liabilities as at that date, of £1,461 million (compared to £887 million as at April 2015).

As part of the valuation process we agreed to a schedule of contributions with the trustee of the schemes which, together with the expected investment performance of the assets of the schemes, is expected to eliminate the deficit by 2025. As part of this schedule of contributions, we paid £69 million into the pension schemes in March 2016 as an advance payment towards deficit contributions due during Fiscal 2017. As at 30 June 2017 our UK defined benefit pension accounted deficit had decreased to £1,138 million, as compared to £1,461 million as at 31 March 2017. This decrease was primarily due to the fact that on 3 April 2017, we approved and communicated to our defined benefit schemes' members that the defined benefit schemes' rules were to be amended with effect from 6 April 2017 so that, among other changes, retirement benefits will be calculated on a career average basis rather than based upon a member's final salary at retirement. As a result of the remeasurement of the schemes' liabilities, a past service credit of £437 million has arisen and has been recognised in Fiscal 2018.

Lower return on pension fund assets, changes in market conditions, changes in interest rates, changes in inflation rates and adverse changes in other critical actuarial assumptions, may impact our pension liabilities or assets and consequently increase funding requirements, which will adversely affect our financial condition and results of operations.

Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject, which could have a material adverse effect on our business.

We believe that the insurance coverage that we maintain is reasonably adequate to cover normal risks associated with the operation of our business, such as coverage for people, property and assets, including construction and general, auto and product liability, in accordance with treasury policy. For example, on 12 August 2015, a series of explosions caused widespread damage at the Port of Tianjin in China, one of three major locations in China through which we import our vehicles. At the time of the explosion, approximately 5,800 vehicles were stored at various locations in Tianjin. Many of these vehicles were destroyed or damaged in the explosion and, as a result, we have recognised an exceptional charge of £245 million. Subsequently, by 30 June 2017, net insurance proceeds and other recoveries were received, resulting in a full recovery. In a similar future situation, there can be no assurance that any claim under our insurance policies will be honoured fully or timely, our insurance coverage will be sufficient in any respect or our insurance premiums will not increase substantially. Accordingly, to the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, or have to pay higher insurance premiums, our financial condition may be affected.

Some of our vehicles will make use of lithium-ion battery cells, which have been observed in some non-automotive applications to catch fire or vent smoke and flames, and such events have raised concerns, and future events may lead to additional concerns, about the batteries used in automotive applications.

The battery packs that we will use in our electric vehicles make use of lithium-ion cells. On rare occasions, lithium-ion cells can rapidly release the energy they contain by venting smoke and flames in a manner that can ignite nearby materials as well as other lithium-ion cells.

While we have designed the battery pack to passively contain any single cell's release of energy without spreading to neighboring cells, there can be no assurance that a field or testing failure of our vehicles will not occur, which could subject us to lawsuits, product recalls, or redesign efforts, all of which would be time consuming and expensive. Negative public perceptions regarding the suitability of lithium-ion cells for automotive applications, or any future incident involving lithium-ion cells such as a vehicle fire, even if such incident does not involve our vehicles, could seriously harm our business.

In addition, we will store a significant number of lithium-ion cells at our manufacturing facilities. Any mishandling of battery cells may cause disruption to the operation of our facilities. While we have implemented safety procedures related to the handling of the cells, there can be no assurance that a safety issue or fire related to the cells would not disrupt our operations. Such damage or injury could lead to adverse publicity and potentially a safety recall. Moreover, any failure of a competitor's electric vehicle may cause indirect adverse publicity for us and our products. Such adverse publicity could harm our business, prospects, financial condition and operating results.

We are subject to risks associated with legal proceedings and governmental and supra-national investigations, including potential adverse publicity as a result thereof.

We are and may be involved from time to time in civil, labour, administrative, regulatory or tax proceedings arising in the ordinary course of business due to our sales activities, R&D operations, or growing manufacturing footprint. It is not possible to predict the potential for, or the ultimate outcomes of, such proceedings, some of which may be unfavourable to us. In such cases, we may incur costs and any mitigating measures (including provisions taken on our balance sheet) adopted to protect against the impact of such costs may not be adequate or sufficient. In addition, adverse publicity surrounding legal proceedings, government investigations or allegations may also harm our reputation and brands.

In any of the geographical markets in which we operate, we could be subject to additional tax liabilities.

Evaluating and estimating our provision and accruals for our taxes requires significant judgement. As we conduct our business, the final tax determination may be uncertain. We operate in multiple geographical markets and our operations in each market are susceptible to additional tax assessments and audits. Our collaborations with business partners are similarly susceptible to such tax assessments. Authorities may engage in additional reviews, inquiries and audits that disrupt our operations or challenge our conclusions regarding tax matters. Any resulting tax assessment may be accompanied by a penalty (including revocation of a benefit or exemption from tax) or additional fee for failing to make the initial payment.

Our tax rates may be affected by earnings estimation errors, losses in jurisdictions that do not grant a related tax benefit, changes in currency rates, acquisitions, investments, or changes in laws, regulations, or practices. Additionally, government fiscal or political pressures may increase the likelihood of adverse or aggressive interpretations of tax laws or regulations or the imposition of arbitrary or onerous taxes, interest charges and penalties. Tax assessments may be levied even where we consider our practices to be in compliance with tax laws and regulations. Should we challenge such taxes or believe them to be without merit, we may nonetheless be required to pay them. These amounts may be materially different from our expected tax assessments and could additionally result in expropriation of assets, attachment of additional securities, liens, imposition of royalties or new taxes and requirements for local ownership or beneficitation.

Any failures or weaknesses in our internal controls could materially and adversely affect our financial condition and results of operations.

Upon an evaluation of the effectiveness of the design and operation of our internal controls over financial reporting, conducted as part of the corporate governance and public disclosure obligations of our parent, Tata Motors, we concluded that there was a material weakness, such that our internal controls over financial reporting were not effective as at 31 March 2015. We believe these weaknesses have been appropriately remediated as of Fiscal 2016. Please see "Presentation of Financial and Other Data". Although we have instituted remedial measures to address the material weakness identified and continually review and evaluate our internal control systems to allow management to report on the sufficiency of our internal control over financial reporting, we cannot assure you that we will not discover additional weaknesses in our internal control over financial reporting. Any such additional weaknesses or failure to adequately remediate any existing weakness could materially and adversely affect our financial condition and results of operations and/or our ability to accurately report our financial condition and results of operations in a timely and reliable manner.

Compliance with new and changing corporate governance and public disclosure requirements adds uncertainty to our compliance policies and increases our costs of compliance.

We are affected by the corporate governance and disclosure requirements of our parent, Tata Motors, which is listed on the Bombay Stock Exchange, the National Stock Exchange of India and the New York Stock Exchange (the "NYSE"). Changing laws, regulations and standards relating to accounting, corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002 and SEC regulations, Securities and Exchange Board of India regulations, the NYSE listing rules and Indian stock market listing regulations, have increased the compliance complexity for our parent company and, indirectly, for us. These new or changed laws, regulations and standards may lack specificity and are subject to varying interpretations. Their application in practice may evolve over time as new guidance is provided by regulatory and

governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs of compliance as a result of on-going revisions to such governance standards. We are committed to maintaining high standards of corporate governance and public disclosure. However, our efforts to comply with evolving laws, regulations and standards in this regard have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management resources and time. In addition, there can be no guarantee that we will always succeed in complying with all applicable laws, regulations and standards.

Tata Motors can exert considerable control over Jaguar Land Rover.

We are an indirect, wholly owned subsidiary of Tata Motors through TMLH. As a result of the above ownership structure, Tata Motors is able to significantly influence any matter requiring our shareholders' approval, including the election of our directors and approval of significant corporate transactions. Tata Motors may also engage in activities that may conflict with our interests or the interests of the holders of the Notes and, in such events, the holders of the Notes could be disadvantaged by these actions.

Risks Relating to Our Debt, the Notes and the Note Guarantees

The Notes will be structurally subordinated to the liabilities of non-guarantor subsidiaries.

Some, but not all, of our subsidiaries will guarantee the Notes. Our joint ventures and other equity accounted investees do not guarantee the Notes. Generally, holders of indebtedness and trade creditors of non-guarantor subsidiaries and equity accounted investees, including lenders under bank financing agreements, are entitled to payments of their claims from the assets of such subsidiaries before these assets are made available for distribution to any Guarantor or the Issuer, as direct or indirect shareholders.

Accordingly, in the event that any of the non-guarantor subsidiaries and equity accounted investees becomes insolvent, liquidates or otherwise reorganises:

- the creditors of the Guarantors and the Issuer (including the holders of the Notes) will have no right to proceed against such subsidiary's or equity accounted investee's assets; and
- creditors of such non-guarantor subsidiary or equity accounted investee, including trade creditors, will generally be entitled to payment in full from the sale or other disposal of the assets of such subsidiary or equity accounted investee before any Guarantor and the Issuer, as direct or indirect shareholder, will be entitled to receive any distributions from such subsidiary or equity accounted investee.

As at 30 June 2017, after giving effect to the issuance of the Notes offered hereby and the use of proceeds therefrom, as described under "Use of Proceeds", our non-guarantor subsidiaries would have had £3.6 million of debt and the January 2013 Note guarantees issued by Jaguar Land Rover North America, LLC, Land Rover Exports Limited and JLR Nominee Company Limited, each of which will not guarantee the Notes, which would have ranked structurally senior to the Notes and the Note Guarantees. Under the terms of the Notes, there is no restriction on the ability of our subsidiaries to incur additional indebtedness and no requirement that any of our non-guarantor subsidiaries become Guarantors. Consequently, the Notes may become structurally subordinated to substantial additional indebtedness in the future.

Claims by secured creditors will have priority with respect to their security over the claims of the holders of the Notes, to the extent of the value of the assets securing such indebtedness.

Claims by secured creditors will have priority with respect to the assets securing their indebtedness over the claims of holders of the Notes. As such, any claims of the holders of the Notes will be effectively subordinated to any secured indebtedness and other secured obligations of the Issuer and the Guarantors. Although all of our Existing Notes and our syndicated revolving credit facility are unsecured, we enter into short- and long-term finance leases in the ordinary course of our business and also have a \$295 million uncommitted multi-currency credit insured invoice discounting facility. As at 30 June 2017, the outstanding amount under short- and long-term finance leases was £6 million.

Additionally, as described under "Description of the Notes", the Indenture allows us to incur substantial amounts of additional secured indebtedness in certain circumstances that will be effectively senior to the Notes. In particular, the Indenture does not impose any restriction on us incurring indebtedness that is secured by assets other than our Principal Manufacturing Property and the Capital Stock of our Manufacturing Subsidiaries (in each case, as defined under "Description of the Notes"). In the event that any of the secured indebtedness of the Issuer or the relevant Guarantor becomes due or the

creditors thereunder proceed against the operating assets that secured such indebtedness, the assets remaining after repayment of that secured indebtedness may not be sufficient to repay all amounts owing in respect of the Notes or the relevant Note Guarantee. As a result, holders of Notes may receive less, rateably, than holders of secured indebtedness of the Issuer or the relevant Guarantor.

Our substantial indebtedness could adversely affect our financial health and ability to withstand adverse developments and could prevent us from fulfilling our indebtedness obligations.

Following the completion of the offering of the Notes, we will have a significant amount of indebtedness and substantial debt service obligations. As at 30 June 2017, on a *pro forma* basis after giving effect to the issuance of the Notes offered hereby and the use of proceeds therefrom, as described under “Use of Proceeds”, we would have had total *pro forma* outstanding indebtedness on a consolidated basis of £3,882 million.

Our substantial indebtedness could have important consequences. It will, among other things:

- require us to dedicate a substantial portion of our operating cash flows to making periodic principal and interest payments on our indebtedness, thereby limiting our ability to make investments or acquisitions or to take advantage of significant business opportunities, thus placing us at a competitive disadvantage compared to our competitors that have less debt;
- make it more difficult for us to satisfy our obligations with respect to our indebtedness;
- increase our vulnerability to general adverse economic and industry conditions;
- limit our ability to borrow additional funds or to sell or transfer assets in order to refinance existing indebtedness or fund future working capital, capital expenditures, any future acquisitions, research, development and technology process costs and other general business requirements; or
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate.

Any of the above listed factors could materially adversely affect our results of operations, financial condition and cash flows.

In addition, a small portion of our debt bears interest at variable rates that are linked to changing market interest rates. As a result, an increase in market interest rates would increase our interest expense and our debt service obligations, which would exacerbate the risks associated with our leveraged capital structure. Please see also “—Risks Associated with Our Business—Interest rate, currency and exchange rate fluctuations could adversely affect our results of operations”.

Despite our substantial indebtedness, we may still be able to incur significantly more debt, including secured debt; this could intensify the risks described above.

Despite our significant indebtedness, we, the Guarantors and our respective subsidiaries may incur additional indebtedness (secured and unsecured) in the future. We are not restricted under the covenants of the Notes from incurring additional debt, including secured debt, or from repurchasing the Notes, except as described under “Description of the Notes—Certain Covenants—Limitation on Liens”. If additional debt is added to our substantial debt levels, the related risks that we now face could intensify.

Corporate benefit and financial assistance laws and other limitations on the obligations under the Note Guarantees may adversely affect the validity and enforceability of the Note Guarantees.

The Note Guarantees provide the holders of the Notes with a right of recourse against the assets of the Guarantors. Each of the Note Guarantees and the amounts recoverable thereunder will be limited to the maximum amount that can be guaranteed by a particular Guarantor without rendering the Note Guarantees, as they relate to that Guarantor, voidable or otherwise ineffective under applicable law. Enforcement of a guarantee against a Guarantor will be subject to certain defences available to the Guarantor. These laws and defences may include those that relate to fraudulent conveyance, financial assistance, corporate benefit and regulations or defences affecting the rights of creditors generally. If one or more of these laws and defences are applicable, the Note Guarantees may be unenforceable.

We may not be able to repurchase the Notes upon a change of control repurchase event.

Upon the occurrence of a “Change of Control Repurchase Event” (as defined in the Indenture), you will have the right to require us to repurchase your Notes at a purchase price in cash equal to 101% of the principal amount of your Notes plus accrued and unpaid interest, if any. In the event that a Change of Control Repurchase Event occurs, we may not have sufficient financial resources to satisfy all of our obligations under the Notes and any other indebtedness with similar provisions. Our failure to repurchase any Notes when due would result in a default under the Indenture.

We may not be able to refinance our existing or future debt obligations or renew our credit facilities on acceptable terms or at all.

Following the issue of the Notes, our financial indebtedness and committed credit facilities will include different types of corporate debt and credit facilities, including corporate debt incurred by the Issuer (such as the Existing Notes and the Notes offered hereby) or the Guarantors, credit facilities available to the Issuer or its subsidiaries, debt incurred by our subsidiaries, and credit facilities, working capital facilities and other committed facilities or guarantees thereof available to our subsidiaries (please see “Description of Other Indebtedness”). In relation to our corporate debt that is repayable with a “bullet” payment on maturity (such as the Existing Notes and the Notes offered hereby), our ability to make such payments at maturity is uncertain and will depend upon our ability to generate sufficient cash from operations, obtain additional equity or debt financing or sell assets. This ability to obtain equity or debt financing on favourable terms or at all will depend on many factors outside our control, including the then prevailing conditions in the international credit and capital markets. Our ability to sell assets and use the proceeds for the refinancing of debt obligations coming due will also depend on many factors outside our control, including the existence of willing purchasers and asset values. At the time the refinancing of each of our existing debt obligations is due, we may not be able to refinance the repayment of our debt obligation on terms as favourable as the original obligations or liquidate assets at a price sufficient to repay the relevant debt or at all. In relation to the committed credit facilities, we are subject to the risk that we may not be able to renew such credit facilities on similar or better terms or at all. If we are unable to refinance our existing or future debt obligations or renew our existing or future credit facilities on acceptable terms or at all, this could have material adverse effects on our liquidity, financial condition and results of operations.

Restrictive covenants in our financing agreements, including the Indenture, may limit our operations and financial flexibility and adversely impact our future results and financial condition.

Some of our financing agreements and debt arrangements set limits on and/or require us to obtain consents before, among other things, pledging assets as security. In addition, certain financial covenants may limit our ability to borrow additional funds or to incur additional liens.

In the event that we breach these covenants, the outstanding amounts due under such financing agreements could become due and payable immediately. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such other financing agreements becoming due and payable immediately. Defaults under one or more of our financing agreements could have a material adverse effect on our results of operations and financial condition.

To service our indebtedness, we will require a significant amount of cash. Our ability to generate cash depends on many factors beyond our control. We might be forced to take other actions to satisfy our obligations under our indebtedness, which may not be successful.

Our ability to make payments on and to refinance our indebtedness, including the Existing Notes and the Notes, and to fund planned capital expenditures will depend on our ability to generate cash in the future. This, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. Based on our current level of operations, we believe our cash flow from operations, available cash, proceeds therefrom and available borrowings under our other financing facilities will be adequate to meet our future liquidity needs for at least the next 12 months. We cannot assure you, however, that our business will generate sufficient cash flow from operations or that future borrowings will be available to us in an amount sufficient to enable us to pay our indebtedness, including the Notes, or to fund our other liquidity needs.

In each of Fiscal 2016 and Fiscal 2017, we paid a dividend of £150 million to TMLH. A dividend of £150 million to TMLH has been declared for Fiscal 2018, of which £60 million was paid in June 2017 and £90 million was paid in September 2017. There are no outstanding loans owed or preference shares issued to TMLH as at 30 June 2017. We may pay dividends from time to time to our shareholder, subject to compliance with covenants in our financing agreements restricting

such payments (including covenants in the indentures governing the Existing Notes). In addition, some of these dividend restrictions may be suspended or terminated entirely if we achieve an investment grade status, thereby potentially allowing us to pay additional dividends. As at 30 June 2017, the estimated amount that would be available for dividend payments, other distributions to our shareholders and other restricted payments under the “build-up” basket under the relevant covenant restrictions under our Existing Notes is approximately £4.3 billion. Pursuant to the indentures applicable to the Existing Notes, we will not be subject to any limitation on the making of restricted payments (including payments of dividends) to the extent that we comply, on a *pro forma* basis, with a 2.0:1.0 consolidated leverage ratio. Furthermore, the Notes offered hereby do not contain such dividend restrictions.

The insolvency laws of England and Wales may not be as favourable to you as US bankruptcy laws or those of other jurisdictions with which you are familiar.

The Issuer and the Guarantors are incorporated in England and Wales. The insolvency laws of England and Wales may not be as favourable to your interests as the laws of the United States or other jurisdictions with which you are familiar. A brief description of certain aspects of insolvency law in England and Wales is set out under “—Insolvency laws may permit a court to set aside the Note Guarantee, and if that occurs, you may not receive any payments under the Note Guarantee” below.

Insolvency laws may permit a court to set aside the Note Guarantee, and if that occurs, you may not receive any payments under the Note Guarantee.

The Issuer and the Guarantors are companies incorporated under English law. As a general rule, insolvency proceedings with respect to an English company should be based on English insolvency laws. However, pursuant to the EC Regulation No. 1346/2000 on Insolvency Proceedings, where an English company conducts business in more than one Member State of the European Union (other than Denmark), the jurisdiction of the English courts may be limited if its “centre of main interests” is found to be in a Member State other than the United Kingdom. There are a number of factors that are taken into account to ascertain the centre of main interests, which should correspond to the place where the company conducts the administration of its interests on a regular basis and is therefore ascertainable by third parties. The point at which this issue falls to be determined is at the time that the relevant insolvency proceedings are opened. Similarly, the UK Cross Border Insolvency Regulations 2006, which implement the UNCITRAL Model law on cross-border insolvency in the United Kingdom, provide that a foreign (i.e., non-European) court may have jurisdiction where any English company has a centre of its main interests in such foreign jurisdiction, or where it has a place of operations in such foreign jurisdiction and carries out non-transitory economic activities with human means and assets or services.

Administration

The relevant English insolvency statutes empower English courts to make an administration order in respect of an English company in certain circumstances. An administrator can also be appointed out of court by the company, its directors or the holder of a qualifying floating charge; different procedures apply according to the identity of the appointer. During the administration, in general no proceedings or other legal process may be commenced or continued against the debtor, except with leave of the court or consent of the administrator. If one of the Guarantors were to enter into administration proceedings, it is possible that the guarantee granted by it may not be enforced while it was in administration.

There are circumstances under English insolvency law in which the granting by an English company of guarantees can be challenged. In most cases this will only arise if the company is placed into administration or liquidation within a specified period of the granting of the guarantee. Therefore, if during the specified period an administrator or liquidator is appointed to an English company, he or she may challenge the validity of the guarantee given by the company.

The following potential grounds for challenge may apply to the Note Guarantees:

Transaction at an undervalue

Under English insolvency law, a liquidator or administrator of an English company could apply to the court for an order to set aside the creation of a guarantee if such liquidator or administrator believed that the creation of such guarantee constituted a transaction at an undervalue. It will only be a transaction at an undervalue if at the time of the transaction or as a result of the transaction, the English company is insolvent (as defined in the UK Insolvency Act 1986, as amended). The transaction can be challenged if the English company enters into liquidation or administration within a period of two years from the date the English company grants the guarantee. A transaction might be subject to being set aside as a transaction at an undervalue if it involved a gift by a company, if a company received no consideration or if a company received

consideration of significantly less value, in money or money's worth, than the consideration given by such company. However, a court generally will not intervene if it is satisfied that the company entered into the transaction in good faith and for the purpose of carrying on its business, and that at the time it did so there were reasonable grounds for believing the transaction would benefit it. If the court determines that the transaction was a transaction at an undervalue the court can make such order as it thinks fit to restore the company to the position it would have been in had it not entered into the transaction. In any proceedings, it is for the administrator or liquidator to demonstrate that the English company was insolvent, unless a beneficiary of the transaction was a connected person (as defined in the UK Insolvency Act 1986, as amended), in which case the connected person must demonstrate the solvency of the English company in such proceedings.

Preference

Under English insolvency law, a liquidator or administrator of an English company could apply to the court for an order to set aside the creation of a guarantee if such liquidator or administrator believed that the creation of such guarantee constituted a preference. It will only be a preference if at the time of the transaction or as a result of the transaction, the English company is insolvent. The transaction can be challenged if the English company enters into liquidation or administration within a period of six months (if the beneficiary of the guarantee is not a connected person) or two years (if the beneficiary is a connected person) from the date the English company grants the guarantee. A transaction may constitute a preference if it has the effect of putting a creditor, guarantor or surety of the English company in a better position (in the event of the company going into insolvent liquidation) than such creditor, guarantor or surety would otherwise have been in had that transaction not been entered into. If the court determines that the transaction was a preference, the court can make such order as it thinks fit to restore the company to the position it would have been in had it not entered into the transaction. However, for the court to determine a preference, it must be shown that the English company was influenced by a desire to put that creditor, guarantor or surety in a better position. In any proceedings, it is for the administrator or liquidator to demonstrate that the English company was insolvent and that there was such influence, unless a beneficiary of the transaction was a connected person, in which case the connected person must demonstrate in such proceedings that there was no such influence.

Transaction defrauding creditors

Under English insolvency law, where it can be shown that a transaction was at an undervalue and was made for the purposes of putting assets beyond the reach of a person who is making, or may make, a claim against a company, or of otherwise prejudicing the interests of a person in relation to the claim, which that person is making or may make, the transaction may be set aside by the court as a transaction defrauding creditors. This provision may be used by any person who claims to be a "victim" of the transaction and is not therefore limited to liquidators or administrators. There is no statutory time limit in the English insolvency legislation within which the challenge must be made and the relevant company does not need to be insolvent at the time of the transaction.

It may be difficult for you to effect service of process against the directors of the Issuer and Guarantors outside the United States and enforce legal proceedings against us.

The Issuer and the Guarantors are incorporated under the laws of England and Wales. All of the directors and executive officers of the Issuer and the Guarantors reside outside the United States and a substantial part of their assets are located outside the United States. In addition, most of the assets of the Issuer and the Guarantors are located outside the United States. Although both the Issuer and the Guarantors will agree, in accordance with the terms of the Indenture, to accept service of process in the United States by agents designated for such purpose, it may not be possible for the holders of Notes: (i) to effect service of process in the United States upon the directors or officers of the Issuer or the Guarantors or (ii) to enforce against either the Issuer or the Guarantors, or their respective officers or directors, judgments obtained in US courts predicated upon the civil liability provisions of the federal or state securities laws of the United States. We have been advised by our legal advisers that there is also doubt as to the direct enforceability outside of the United States against any of these persons in an original action or in an action for the enforcement of judgments of US courts, of civil liabilities predicated solely upon US federal or state securities laws.

We have been advised by our legal advisers that a judgment in civil and commercial matters of a US federal or state court would not automatically be recognised or enforceable in England and Wales. To enforce any such US judgment in England and Wales, proceedings must first be initiated before a court of competent jurisdiction in England and Wales and recognition and enforcement of a US judgment by the courts of England and Wales in such an action is conditional upon (among other things) the US judgment being final and conclusive on the merits in the sense of being final and unalterable in the court that pronounced it and being for a debt for a definite sum of money. This is discussed in more detail in the section entitled "Service of Process and Enforcement of Judgments". Such counsel has expressed no opinion, however, as to whether

the enforcement would be in pounds sterling or as at which date, if any, the determination of the applicable exchange rate from US dollars to pounds sterling would be made.

There is no existing trading market for the Notes and we cannot assure you that an active trading market will develop, which could adversely impact your ability to sell your Notes.

The Notes are new securities for which there is currently no existing market. Although we have made an application to list the Notes on the Luxembourg Stock Exchange, we cannot assure you that the Notes will become or will remain listed. We cannot assure you as to the liquidity of any market that may develop for the Notes, the ability of holders of the Notes to sell them or the price at which the holders of the Notes may be able to sell them. The liquidity of any market for the Notes will depend on the number of holders of the Notes, prevailing interest rates, the market for similar securities and other factors, including general economic conditions and our own financial condition, performance and prospects, as well as recommendations by securities analysts. Historically, the market for debt securities, such as the Notes, has been subject to disruptions that have caused substantial price volatility. We cannot assure you that if a market for the Notes were to develop, such a market would not be subject to similar disruptions. We have been informed by the initial purchasers that they intend to make a market for the Notes after the offering of the Notes is completed. However, they are not obliged to do so and may cease their market-making activity at any time without notice. In addition, such market-making activity will be subject to limitations imposed by the US Securities Act and other applicable laws and regulations. As a result, we cannot assure you that an active trading market for the Notes will develop or, if one does develop, that it will be maintained.

Transfer of the Notes will be restricted.

We have not registered and do not intend to register the offer and sale or resale of the Notes under the US securities laws, including the US Securities Act, or the securities laws of any other jurisdiction. The Notes will not have the benefit of any registration rights agreement. You may not offer or sell the Notes, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of US securities laws and other applicable securities laws. You should read “Notice to Investors” for further information about these and other transfer restrictions. It is your obligation to ensure that any offer or sale of your Notes by you complies with applicable securities laws.

The Notes will initially be held in book-entry form and therefore you must rely on the procedures of DTC to exercise any rights or remedies.

Unless and until any Notes in definitive registered form (“definitive registered notes”) are issued in exchange for book-entry interests, owners of book-entry interests will not be considered owners or holders of Notes. DTC, or its nominees, will be the registered holder of the Global Notes (as such term is defined in “Book-Entry; Delivery and Form”). After payment to DTC, we will have no responsibility or liability for the payment of interest, principal or other amounts to the owners of book-entry interests. Accordingly, if you own a book-entry interest, you must rely on the procedures of DTC and if you are not a participant in DTC, on the procedures of the participant through which you own your interest, to exercise any rights and obligations of a holder under the Indenture. Please see “Book-Entry; Delivery and Form”.

Unlike the holders of the Notes themselves, owners of book-entry interests will not have the direct right to act upon our solicitations for consents, requests for waivers or other actions from holders of the Notes. Instead, if you own a book-entry interest, you will be permitted to act only to the extent you have received appropriate proxies to do so from DTC. There can be no assurance that procedures implemented for the granting of such proxies will be sufficient to enable you to vote on any request actions on a timely basis. Similarly, upon the occurrence of an event of default under the Indenture, unless and until definitive registered notes are issued in respect of all book-entry interests, if you own a book-entry interest, you will be restricted to acting through DTC. We cannot assure you that the procedures to be implemented through DTC will be adequate to ensure the timely exercise of rights under the Notes. Please see “Book-Entry; Delivery and Form”.

Investors in the Notes may have limited recourse against the independent auditors.

The consolidated financial statements as at and for the years ended 31 March 2017, 2016 and 2015 included in this Offering Memorandum have been audited by Deloitte LLP, independent auditors, as stated in the audit reports relating to the 2017 Consolidated Financial Statements, the 2016 Consolidated Financial Statements and the 2015 Consolidated Financial Statements.

The audit reports of Deloitte LLP with respect to the 2017 Consolidated Financial Statements, the 2016 Consolidated Financial Statements and the 2015 Consolidated Financial Statements, in accordance with guidance issued by The Institute of Chartered Accountants in England and Wales, include the following limitations:

“This report is made solely to the company’s members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company’s members those matters we are required to state to them in an auditor’s report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company’s members as a body, for our audit work, for this report, or for the opinions we have formed”.

The SEC would not permit such limiting language to be included in a registration statement or a prospectus used in connection with an offering of securities registered under the US Securities Act or in a report filed under the US Securities Exchange Act of 1934, as amended (the “Exchange Act”). If a US (or any other) court were to give effect to the language quoted above, the recourse that investors in the Notes may have against the independent accountants based on their reports or the Consolidated Financial Statements to which they relate could be limited.

USE OF PROCEEDS

We estimate that the net proceeds of the offering of the Notes (after payment of commissions and estimated expenses of the offering) will be £380.6 million. We intend to use the net proceeds from the issue and sale of the Notes for general corporate purposes, including to support our on-going growth and capital spending plans.

CAPITALISATION

The following table sets out the consolidated cash and cash equivalents, short-term investments and capitalisation of the Issuer, as at 30 June 2017, on an actual basis and as adjusted to give effect to the offering and issue of the Notes offered hereby and the use of proceeds therefrom as described in “Use of Proceeds”. As adjusted information below is illustrative only and does not purport to be indicative of the Issuer’s capitalisation following the completion of the offerings.

You should read this table together with the “Use of Proceeds”, “Selected Consolidated Financial and Other Data” and “Operating and Financial Review and Prospects” and our Consolidated Financial Statements and related notes included elsewhere in this Offering Memorandum.

- (1) The total amount of cash and cash equivalents includes £513 million of the cash and cash equivalents held in subsidiaries of the Issuer outside the United Kingdom. The cash in some of these jurisdictions, e.g. South Africa and Brazil, is subject to certain restrictions on cash pooling, intercompany loan arrangements or interim dividends. However, annual dividends are generally permitted and we do not believe that these restrictions have, or are expected to have, any impact on our ability to meet our cash obligations.
- (2) Refers to bank deposits with a maturity of between three and twelve months.
- (3) Consists of (i) overdraft facilities and (ii) finance leases.
- (4) Represents our factoring facilities entered into in the ordinary course of business.
- (5) Using the US dollar per British pound exchange rate on 30 June 2017 of \$1.3006 = £1.00.
- (6) Using the euro per British pound exchange rate on 30 June 2017 of €1.1398 = £1.00.
- (7) On the issue date of the Notes offered hereby, we will also have £1,885 million of undrawn credit facilities under the Revolving Credit Facility described under “Description of Other Indebtedness—Facility A £1,885 million Unsecured Syndicated Revolving Credit Facility”.

SELECTED CONSOLIDATED FINANCIAL AND OTHER DATA

The following table sets out Jaguar Land Rover's selected consolidated financial data and other data for the periods ended and as at the dates indicated below. For a discussion of the presentation of financial data, please see "Presentation of Financial and Other Data".

We have derived the selected consolidated financial data for the fiscal years ended 31 March 2017, 2016 and 2015 and the interim condensed consolidated income statement and statement of comprehensive income data and cash flow data for the three months ended 30 June 2017 and 2016 from the Consolidated Financial Statements included elsewhere in this Offering Memorandum. The balance sheet data as at 30 June 2016 have been derived for comparative purposes from the unaudited condensed consolidated interim financial statements as at and for the three months ended 30 June 2016, which are not included in this Offering Memorandum. Please see "Presentation of Financial and Other Data".

The 2017 Consolidated Financial Statements, the 2016 Consolidated Financial Statements and the 2015 Consolidated Financial Statements were prepared in accordance with IFRS and the Condensed Consolidated Interim Financial Statements were prepared in accordance with IAS 34. The selected financial data should be read in conjunction with "Presentation of Financial and Other Data", "Selected Consolidated Financial and Other Data", "Operating and Financial Review and Prospects" and the financial statements and related notes thereto included elsewhere in this Offering Memorandum. Historical results are not necessarily indicative of future expected results. In addition, our results for the three months ended 30 June 2017 should not be regarded as indicative of our results expected for the fiscal year ending 31 March 2018. The financial figures for the years ended 31 March 2016 and 2015 have been restated due to the change in accounting policy for presentation of foreign exchange gains and losses, as set out in Note 2 to the 2017 Consolidated Financial Statements. The financial figures for the three months ended 30 June 2016 have been restated due to the change in accounting policy for presentation of foreign exchange gains and losses, as set out in Note 1 to the Condensed Consolidated Interim Financial Statements.

The unaudited condensed consolidated financial information for the twelve months ended 30 June 2017 set out below was derived by aggregating without adjustments the consolidated income statement for the twelve months ended 31 March 2017 and the consolidated income statement data for the three months ended 30 June 2017 and subtracting the consolidated income statement data for the three months ended 30 June 2016. The unaudited condensed consolidated financial information for the twelve months ended 30 June 2017 presented herein is not required by or presented in accordance with IFRS or any other generally accepted accounting principles. The financial information for the twelve months ended 30 June 2017 has been prepared for illustrative purposes only and is not necessarily representative of our results of operations for any future period or our financial condition at any future date.

Please note that, while we charge our research costs to the income statement in the year in which they are incurred, we capitalise product development costs relating to new vehicle platforms, engines, transmissions and new products and recognise them as intangible assets under certain conditions. Please see "Presentation of Financial and Other Data". There are a number of differences between IFRS and US GAAP. One difference is that we would not be able to capitalise such costs if we were to prepare our financial statements in compliance with US GAAP. In addition, interpretations of IFRS may differ, which can result in different applications of the same standard and, therefore, different results.

* Restated due to the change in accounting policy for presentation of foreign exchange gains and losses.

- (1) Relates to charges booked and eventual recoveries related to the explosion at the Port of Tianjin.
- (2) This amount reflects the capitalised cost recognised as an intangible asset at the end of the relevant period, net of the amounts charged to the income statement, which were £253 million, £318 million, £368 million, £85 million, £94 million and £377 million in the years ended 31 March 2015, 2016 and 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017, respectively.
- (3) Depreciation and amortisation include, among other things, the amortisation attributable to the capitalised cost of product development relating to new vehicle platforms, engines, transmissions and new products. The amount of amortisation attributable to capitalised product development

costs for Fiscal 2015, Fiscal 2016, Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017 was £526 million, £696 million, £769 million, £191 million, £205 million and £783 million, respectively.

OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion should be read together with, and is qualified in its entirety by reference to, our Consolidated Financial Statements, including the related notes thereto, included in this Offering Memorandum beginning on page F-1. The following discussion should also be read in conjunction with “Presentation of Financial and Other Data” and “Selected Consolidated Financial and Other Data”. Except for the historical information contained herein, the discussions in this section contain forward-looking statements that reflect our plans, estimates and beliefs and involve risks and uncertainties. Our actual results could differ materially from those discussed in these forward-looking statements. Factors that could cause or contribute to these differences include, but are not limited to, those discussed below and elsewhere in this Offering Memorandum, particularly in “Risk Factors” and “Forward-Looking Statements”.

Overview

We design, develop, manufacture and sell Jaguar premium sports saloons, sports cars and luxury performance SUVs and Land Rover premium all-terrain vehicles, as well as related parts, accessories and merchandise. We have a long tradition as a manufacturer of technologically advanced, premium passenger vehicles with internationally recognised brands, an exclusive product portfolio of award-winning vehicles, a global distribution network and strong R&D capabilities, including the development of autonomous, connected and electrification technologies, as well as investing in innovative mobility solutions to overcome and address future travel and transport challenges. We plan to offer an electric drivetrain option on all of our new models by 2020. Our R&D operations currently consist of an engineering team of approximately 400 engineers, co-managed for Jaguar and Land Rover, sharing premium technologies, powertrains and vehicle architectures. Our vehicles are designed and developed by award-winning design teams, and we are committed to a continuing programme of new product design. Collectively, Jaguar and Land Rover’s product portfolio received 213 awards from leading international motoring writers, magazines and opinion leaders in Fiscal 2017, reflecting the strength of our model line-up and our design and engineering capabilities.

We operate a global sales and distribution network designed to achieve geographically diversified sales and facilitate growth in our key markets. Our four principal regional markets are Europe (excluding the United Kingdom and Russia), North America, the United Kingdom and China which, respectively, accounted for 24.4%, 20.7%, 16.8% and 24.4% of our retail volumes, including sales from our China Joint Venture and 26.5%, 25.0%, 21.9% and 11.6% of our wholesale volumes, excluding sales from our China Joint Venture in the three months ended 30 June 2017.

We operate three principal automotive manufacturing facilities, an engine manufacturing facility and two advanced design and engineering facilities in the United Kingdom and a manufacturing plant in Slovakia which is currently under construction, as well as a wholly owned manufacturing plant in Brazil. We have also established a manufacturing joint venture in China, which currently produces the Range Rover Evoque, Land Rover Discovery Sport and the long wheel base Jaguar XFL for sale in the local market. Globally, we employed a total of 40,857 employees, including agency personnel (but excluding China Joint Venture employees), as at 30 June 2017, of which 22,277 were employed in our manufacturing operations with the remaining 18,580 employed in other areas such as design, engineering and central corporate functions.

The following table presents our revenue, profit and EBITDA in Fiscal 2015, Fiscal 2016 and Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017.

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	(£ in millions)					
Revenue	22,106	22,286	24,339	5,355	5,599	24,583
Profit for the period	2,038	1,312	1,272	304	472	1,440
EBITDA.....	4,132	3,147	2,955	672	442	2,725

In Fiscal 2015, Fiscal 2016 and Fiscal 2017, we experienced solid vehicle sales and revenue growth, reflecting successful launches of new models, sustained appeal of existing products and geographic diversification, combined with a generally supportive global economic environment, notwithstanding geopolitical uncertainty and intensifying competition.

Our unit sales (on a retail basis and including sales through our China Joint Venture) for each of our brands for Fiscal 2015, Fiscal 2016, Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017 are set out in the table below:

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	Jaguar.....	76,930	94,449	172,848	31,806	41,266
Land Rover	385,279	427,122	431,161	100,947	96,197	426,411
Total.....	462,209	521,571	604,009	132,753	137,463	608,719
<i>Retail volumes from our China Joint Venture (included above).....</i>	<i>1,094</i>	<i>31,765</i>	<i>65,023</i>	<i>14,039</i>	<i>20,309</i>	<i>71,293</i>

Our unit sales (on a wholesale basis, excluding sales from our China Joint Venture) under each of our brands for Fiscal 2015, Fiscal 2016, Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017 are set out in the table below:

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	Jaguar.....	76,496	102,106	169,284	34,572	32,637
Land Rover	389,983	407,228	365,462	86,196	85,279	364,545
Total.....	466,479	509,334	534,746	120,768	117,916	531,894
<i>Wholesale volumes from our China Joint Venture (excluded above).....</i>	<i>4,044</i>	<i>34,751</i>	<i>66,060</i>	<i>13,588</i>	<i>20,560</i>	<i>73,032</i>

Wholesale volumes refer to the aggregate number of finished vehicles sold to dealers and importers. We recognise our revenue on the wholesale volumes we sell. Retail volumes refer to the aggregate number of finished vehicles sold by dealers to end users. We consider retail volumes the best indicator of consumer demand for our vehicles and the strength of our brand.

We are a wholly owned indirect subsidiary of Tata Motors, a member of the international conglomerate Tata Group. Tata Motors is the largest commercial vehicle manufacturer in terms of revenue in India and among the top six passenger vehicle manufacturers in terms of units sold in India during Fiscal 2017.

General Trends of Our Recent Performance

Revenues were £5,599 million for the three months ended 30 June 2017, as compared to £5,355 million for the three months ended 30 June 2016 and EBITDA was £442 million in the three months ended 30 June 2017, as compared to £672 million in the three months ended 30 June 2016. EBIT of £69 million in the three months ended 30 June 2017 compared to £329 million in the three months ended 30 June 2016. EBITDA was lower in the three months ended 30 June 2017 compared to the three months ended 30 June 2016 primarily due to lower wholesale volumes, higher variable marketing expense and higher material and other operating costs. Further EBIT was lower in the three months ended 30 June 2017 compared to the three months ended 30 June 2016 primarily due to higher depreciation and amortization, partially offset by higher profits from our China Joint Venture. Profit before tax was £595 million in the three months ended 30 June 2017, compared to £399 million in the three months ended 30 June 2016. The higher profit before tax in the three months ended 30 June 2017 primarily reflects the £437 million one-time pension revaluation credit and favourable revaluation of unrealised commodity hedges, partially offset by lower EBITDA, unfavourable revaluation of foreign currency debt and unrealised foreign currency and the non-reoccurrence of £51 million of Tianjin recoveries received in the three months ended 30 June 2016. Our profit after tax was £472 million in the three months ended 30 June 2017, up from £304 million in the same period in 2016.

Free cash flow was negative £1,308 million in the three months ended 30 June 2017 (negative £661 million in the three months ended 30 June 2016), primarily reflecting lower profits offset by the pension past service credit, £995 million of total product and other investment spending (up from £692 million in the three months ended 30 June 2016), as well as

£733 million of negative working capital movement (up from £640 million in the three months ended 30 June 2016). The negative working capital movement was primarily driven by higher inventory and lower payables due to seasonality in sales and the launch of new models such as the all-new Land Rover Discovery and the Range Rover Velar (working capital movements were negative £692 million in the three months ended 30 June 2016). Net cash used in operating activities in the three months ended 30 June 2017 was £360 million, compared to £98 million for the same period in 2016. After the negative free cash flow of £1,308 million, finance expenses and fees (net of capitalised interest) of £25 million (down from £28 million in the three months ended 30 June 2016), a £11 million reduction in debt (down from a reduction of £91 million in the three months ended 30 June 2016) and a £60 million dividend paid (out of £150 million declared) to Tata Motors during the three months ended 30 June 2017 (down from a dividend of £150 million declared and paid in the three months ended 30 June 2016), we had total cash of £4,108 million (up from £3,749 million as at 30 June 2016), comprising £1,637 million of cash and cash equivalents and £2,471 million of financial deposits. At 30 June 2017, we also had an undrawn committed revolving credit facility of £1,870 million. The remaining £90 million dividend due to Tata Motors was paid in September 2017.

Recent Retail Volumes

Total retail volumes in the three months ended 30 June 2017 were 137,463 units (including sales from our China Joint Venture), an increase of 3.5% compared to the three months ended 30 June 2016, with sales volumes up year-on-year in China by 30.3% and North America by 15.6%. By model, this year-on-year retail sales growth was primarily driven by continuing strong demand for the Jaguar F-PACE and Range Rover as well as the introduction of the Jaguar XFL in China. In the three months ended 30 June 2017 retail sales were flat in Europe, and down 14.3% in the United Kingdom, primarily due to the increase in vehicle excise duty in effect from 1 April 2017, which caused customers to pull ahead their purchases into March. By brand, Land Rover retailed 96,197 units in the three months ended 30 June 2017, down 4.7% compared to the three months ended 30 June 2016 primarily driven by the continuing sales ramp-up of the all-new Land Rover Discovery model, which was only launched in the United States and China in May 2017, partially offset by strong sales of the Range Rover. Jaguar retailed 41,266 units in the three months ended 30 June 2017, up 29.7% compared to the three months ended 30 June 2016 primarily driven by continued strong demand for F-PACE and the introduction of the Jaguar XFL in China.

Retail volumes in Europe (excluding the United Kingdom and Russia) were 33,536 units in the three months ended 30 June 2017, compared to 33,551 units during the same period in 2016, flat year-on-year as the introduction of the all-new Land Rover Discovery and new Range Rover Velar as well as continuing strong sales of the Jaguar F-PACE, Range Rover and Range Rover Sport were offset by softer sales of other models.

Retail volumes in North America were 28,393 units in the three months ended 30 June 2017, compared to 24,566 units in the same period in 2016, an increase of 15.6%, primarily reflecting the introduction of the Jaguar F-PACE and XE as well as continuing strong sales of Jaguar F-TYPE, Range Rover and Range Rover Evoque.

Retail volumes in the United Kingdom were 23,083 units in the three months ended 30 June 2017, compared to 26,919 units in the same period in 2016, a decrease of 14.3%, primarily driven by the increase in vehicle excise duty in effect from 1 April 2017, which caused customers to pull ahead their purchases into March. By model, strong sales of the Jaguar F-PACE and solid sales of the Land Rover Discovery Sport were more than offset by weaker sales of other models.

Retail volumes in China were 33,514 units in the three months ended 30 June 2017, compared to 25,726 units in the same period in 2016, an increase of 30.3%, with sales of every model higher year-on-year with the exception of the all-new Land Rover Discovery, as sales continue to ramp up following its launch in May 2017.

Retail volumes in Overseas markets were 18,937 units in the three months ended 30 June 2017, compared to 21,991 units in the same period in 2016, a decrease of 13.9%, as challenging economic conditions in certain Overseas markets, including Russia, Brazil and the Middle East continued. The introduction of the Jaguar F-PACE drove sales growth for Jaguar and sales of Range Rover were up year-on-year but these were more than offset by weaker sales of other Jaguar and Land Rover models.

Recent Macroeconomic Trends

Brexit has led to uncertainty with respect to the trading arrangements between the United Kingdom, the EU and other countries. While Article 50 of the Lisbon Treaty was invoked by the United Kingdom on 29 March 2017, substantial uncertainty remains regarding the outcome of the negotiations, as well as the scope and duration of a transitional period, if any, following the expiration of the Article 50 period on 29 March 2019. This uncertainty was exacerbated by the lack of a

decisive majority following the United Kingdom general election in June 2017. Depending on the terms of the withdrawal of the United Kingdom from the European Union, the new or modified trading agreements could affect export volumes and result in a decline in trade.

Furthermore, we are exposed to currency movements versus the British pound, our reporting currency. Revenue exposures are primarily sensitive to movements in the US dollar, Chinese yuan and emerging market currencies (notably the Russian rouble and Brazilian real) while our cost exposures are particularly sensitive to movements in the euro, since we source a significant proportion of our components from the Eurozone. The US dollar, Chinese yuan and in particular the euro were generally stronger against the British pound over the three months ended 30 June 2017, compared to the three months ended 30 June 2016. The strengthening of these exchange rates over the three months ended 30 June 2017 was generally more favourable for our underlying US dollar and Chinese yuan denominated net income exposures and less favourable for our euro-denominated net cost exposures. However, we have a well-established hedging programme in place that partially counteracts the volatility in the underlying currency exposure to the movements in the US dollar, euro, Chinese yuan and other currencies. Movements in our foreign exchange hedging derivatives are generally offset by favourable movements in the underlying foreign currency exposures as we generally hedge only a portion (and not all) of the underlying exposure.

We are also exposed to changes in commodity prices, notably aluminium, copper, platinum and palladium. Commodity prices were generally less favourable in the three months ended 30 June 2017 compared to the same period in 2016.

We have hedging policies in place in order to mitigate the impact of exchange rate and commodity price volatility on our results. These hedging policies permit the use of financial derivatives such as forward contracts and options to manage risks relating to exchange rates, as well as swaps and fixed-price supply contracts to manage risks relating to commodity price volatility.

Significant Factors Influencing Our Results of Operations

Our results of operations are dependent on a number of factors, which include mainly the following:

- *General economic conditions.* We, like the rest of the automotive industry, are substantially affected by general economic conditions. For the risks associated with our industry and markets, please see “Risk Factors—Risks Associated with the Automotive Industry—Deterioration in global economic conditions could have a significant adverse impact on our sales and results of operations”. In particular, we may be exposed to risks associated with Brexit, please see “Risk Factors— The United Kingdom’s contemplated exit from the European Union may adversely impact our business, results of operations and financial condition.” We have a dedicated Brexit scenario planning team to help us address likely impacts and respond accordingly. We anticipate that the impact of Brexit will revolve around, (i) the extent to which the British pound remains weaker, (ii) any incremental tariffs that might result following exit from the EU, and (iii) any impact on economic growth and consumer confidence in the United Kingdom and/or the EU.
- *Foreign currency rates.* Changes in foreign currency exchange rates may positively or negatively affect our results of operations through both transaction risk and translation risk. Transaction risk is the risk that the currency structure of our costs and liabilities will deviate from the currency structure of sales proceeds and assets. Translation risk is the risk that our financial results for a particular period will be affected by changes in the prevailing exchange rates at the end of the period, which may have a substantial impact on comparisons with prior periods. Please see “Risk Factors—Risks Associated with Our Business—Interest rate, currency and exchange rate fluctuations could adversely affect our results of operations” for further information on the risks associated with our foreign currency exposure.
- *Seasonality.* Our results of operations are also dependent on seasonal factors in the automotive market such as change in cash and cash equivalents due principally to seasonal effects on the working capital cycle. Please see “Our Business—Industry Dynamics—Seasonality” and “Risk Factors—Risks Associated with Our Business—Our business is seasonal in nature and a substantial decrease in our sales during certain quarters could have a material adverse impact on our financial performance”.
- *Our competitive position in the market.* Competition in the premium and SUV segments in which we operate has an effect on volumes and price realisation, which may have an impact on the profitability of our business. For a discussion regarding our competitive position in our markets, please see “Our Business— Industry Dynamics”.

- *Technological developments in the automotive industry.* The automotive industry is undergoing rapid technological change, particularly in the premium segment in which we operate. Such changes can affect both our volumes, for example if our competitors have, or are perceived to have, more advanced vehicles, and the required investment spending on R&D, in particular with respect to autonomous, connected and electrification technologies, as well as mobility solutions. Please see “Our Business—Product Design, Technology and Research and Development”.
- *Credit, liquidity and interest rates and availability of credit for vehicle purchases.* Our volumes are significantly dependent on the availability of vehicle financing arrangements by external providers of lease and consumer financing options and the costs thereof. We do not offer vehicle financing on our own account. Any reduction in the supply of available consumer finance, as occurred during the global financial crisis, would make it more difficult for some of our customers to purchase our vehicles. For further discussion of our independent financing arrangements through our finance partners, please see “Our Business—Financing Arrangements and Financial Services Provided”.
- *Environmental regulations.* There has been a greater emphasis on the emission and safety norms for the automobile industry by governments in the various countries in which we operate. Compliance with these norms has had, and will continue to have, a significant impact on the costs and product life cycles in the automotive industry. For further details with respect to these regulations, please see “Our Business—Significant Environmental, Health, Safety and Emissions Issues”. For a discussion regarding related risks, please see “Risk Factors—Risks Associated with the Automotive Industry—New or changing laws, regulations and government policies regarding increased fuel economy, reduced greenhouse gas and other air emissions, and vehicle safety may have a significant effect on how we do business”.
- *Amortisation of development costs capitalised.* We have and continue to capitalise our product development costs incurred on new vehicle platforms, engines, transmissions and new products. These capitalised costs reduce overall profits over time through amortisation, which has increased and which we expect will further increase over the next few years. Therefore, until fully amortised, capitalised costs have a continuing impact on our results of operations.
- *Political and regional factors.* Similarly to the rest of the automotive industry, we are affected by political and regional factors. For a discussion regarding these risks, please see “Risk Factors—Risks Associated with Our Business”. We may be adversely impacted by political instability, wars, terrorism, multinational conflicts, natural disasters, fuel shortages/prices, epidemics, labour strikes and other risks in the markets in which we operate” and “Risk Factors—Risks Associated with the Automotive Industry—Changes in tax, tariff or fiscal policies could adversely affect the demand for our products”.

Explanation of Income Statement Line Items

Our income statement includes the following items. For more information, please see “Operating and Financial Review and Prospects—Critical Accounting Policies” and the Consolidated Financial Statements elsewhere in this Offering Memorandum.

- *Revenue:* Revenue includes the fair value of the consideration received or receivable from the sale of finished vehicles and parts to dealers (in the United Kingdom and the foreign countries in which we have NSCs) and importers (in all other foreign countries). We recognise revenue on the sale of products, net of discounts, sales incentives, customer bonuses and rebates granted, when products are delivered to dealers or when delivered to a carrier for export sales, which is when title and risks and rewards of ownership pass to the customer. Sale of products includes export and other recurring and non-recurring incentives from governments at the national and state levels. Sale of products is presented net of excise duty where applicable and other indirect taxes. Consequently, the amount of revenue we recognise is driven by wholesale volumes (i.e., sales of finished vehicles to dealers and importers). We do, however, mainly monitor the level of retail volumes as the general metric of customer demand for our products with the aim of managing effectively the level of stock held by our dealers. Retail volumes do not directly affect our revenue. During Fiscal 2017, the Group reviewed the presentation of foreign exchange in the consolidated income statement following the continued increase in hedging activity, volatility in foreign exchange rates, and in anticipation of transition to IFRS 9. As a result, it is considered more appropriate to present realised foreign exchange relating to derivatives hedging revenue exposures as an adjustment to ‘Revenue’. The prior year comparatives have been represented on this basis. Realised foreign exchange gains of £78 million and £240 million have been adjusted to ‘Revenue’ for the year ended 31 March 2016 and 2015 respectively.

- Material and other cost of sales:* We have elected to present our income statement under IFRS by nature of expenditure rather than by function. Accordingly, we do not present costs of sales, selling and distribution and other functional cost categories on the face of the income statement. “Material and other cost of sales” are comprised of: (i) change in inventories of finished goods and works in progress; (ii) purchase of products for sale; and (iii) raw materials and consumables. “Material and other cost of sales” does not equal “cost of sales” that we would report if we were to adopt a functional presentation for our income statement because it does not include all relevant employee costs, depreciation and amortisation of assets used in the production process and relevant production overheads. During Fiscal 2017, the Group reviewed the presentation of foreign exchange in the consolidated income statement following the continued increase in hedging activity, volatility in foreign exchange rates, and in anticipation of transition to IFRS 9. As a result, it is considered more appropriate to present realised foreign exchange relating to derivatives hedging cost exposures to ‘Material and other cost of sales’. The prior year comparatives have been represented on this basis. Realised foreign exchange losses of £259 million and £162 million have been adjusted to ‘Material and other cost of sales’ for the year ended 31 March 2016 and 2015 respectively.

 - Changes in inventories of finished goods and work in progress reflects the difference between the inventory of vehicles and parts at the beginning of the relevant period and the inventory of vehicles and parts at the end of the relevant period. It represents the credit or charge required to reflect the manufacturing costs for finished vehicles and parts, or vehicles and parts on the production line, that were still in stock at the end of the relevant period. Inventories (other than those recognised as a result of the sale of vehicles subject to repurchase arrangements) are valued at the lower of cost and net realisable value. Cost of raw materials and consumables are ascertained on a first-in-first-out basis. Costs, including fixed and variable production overheads, are allocated to work-in-progress and finished goods determined on a full absorption cost basis. Net realisable value is the estimated selling price in the ordinary course of business less the estimated cost of completion and selling expenses. Inventories include vehicles sold to a third party subject to repurchase arrangements. The majority of these vehicles are leased by a third party back to our management. These vehicles are carried at cost and are amortised in changes in stocks and work in progress to their residual values (i.e., estimated second-hand sale value) over the term of the arrangement.
 - Purchase of products for sale represents the cost associated with the supply from third-party suppliers of parts and other accessories that we do not manufacture ourselves but fit into our finished vehicles.
 - Raw materials and consumables represents the cost of the raw materials and consumables that we purchase from third parties and use in our manufacturing operations, including aluminium, other metals, rubber and other raw materials and consumables. Raw materials and consumables also include import duties for raw materials and finished vehicles from the United Kingdom into the country of sale.
- Employee cost:* This line item represents the cost of wages and salaries, social security and pensions for all of our employees and agency workers, including employees of centralised functions and headquarters.
- Other expenses:* This line item comprises any operating expense not otherwise accounted for in another line item. These expenses principally include warranty and product liability costs and freight and other transportation costs, stores, spare parts and tools consumed, product development costs, repairs to building, plant and machinery, power and fuel, rent, rates and taxes, publicity and marketing expenses, insurance and other general costs.
- Net impact of commodity derivatives:* This line item represents the mark-to-market on commodity derivative instruments, which do not meet the hedge accounting criteria of IFRS. In Fiscal 2013 and subsequently, we entered into derivative transactions on certain key commodity inputs, such as aluminium.
- Development costs capitalised:* Development costs capitalised represents employee costs, store and other manufacturing supplies, and other works expenses incurred mainly towards product development projects. It also includes costs attributable to internally constructed capital items. Product development costs incurred on new vehicle platforms, engines, transmissions and new products are capitalised and recognised as intangible assets when (i) feasibility has been established, (ii) we have committed technical, financial and other

resources to complete the development and (iii) it is probable that the relevant asset will generate probable future economic benefits. The costs capitalised include the cost of materials, direct labour and directly attributable overhead expenditure incurred up to the date the asset is available for use. The application of the relevant accounting policy involves critical judgement and interpretations of IFRS may differ, which can result in different applications of the same standard and, therefore, different results. Interest cost incurred in connection with the relevant development is capitalised up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings if no specific borrowings have been incurred for the asset.

- *Other income:* This item represents any income not otherwise accounted for in another line item. It principally includes rebates from the Chinese government based on our activities there, income from the Land Rover experience and sales of second-hand Land Rover warranties in the United States. Rebates from China are accounted for when received as they are not considered virtually certain to be paid.
- *Depreciation and amortisation:* Depreciation and amortisation represent the depreciation of property, plant and equipment and the amortisation of intangible assets, including the amortisation of capitalised product development costs. Depreciation is provided on a straight-line basis over estimated useful lives of the assets. Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease. Depreciation is not recorded on capital work-in-progress until construction and installation are complete and the asset is ready for its intended use. Capital work-in-progress includes capital advances. Amortisation is provided on a straight-line basis over estimated useful lives of the intangible assets. The amortisation period for intangible assets with finite useful lives is reviewed at least at each year-end. Changes in expected useful lives are treated as changes in accounting estimates. In accordance with IFRS, we capitalise a significant percentage of our product development costs. Capitalised development expenditure is measured at cost less accumulated amortisation and accumulated impairment loss.
- *Foreign exchange (loss)/gain (net):* This item represents the net gain or loss attributable to the revaluation of non-GBP balance sheet items and the realised gain/(loss) on foreign exchange derivative contracts that are hedge accounted, as well as the time value of options and ineffective foreign exchange derivatives which are recognised directly in the income statement.
- *Finance income:* This item represents the income from short-term liquid financial assets, marketable securities and other financial instruments (including bank deposits).
- *Finance expense (net):* This item represents the net expense of our financial borrowings, including the Existing Notes, including fees and commitment fees paid to financial institutions in relation to committed financial facilities and similar credit lines, less interest capitalised.
- *Share of (loss)/profit from equity accounted investees:* The Consolidated Financial Statements include the Group's share of the income and expenses, other comprehensive income and equity movements of equity accounted investees, from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. When the Group's share of losses exceeds its interest in an equity accounted investee, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Group has an obligation or has made payments on behalf of the investee.
- *Exceptional items:* We have elected to disclose exceptional items separately in the consolidated income statement by virtue of their nature, size or frequency.

Results of Operations

The tables and discussions set out below provide an analysis of selected items from our consolidated statements of income for each of the periods described below.

Three months ended 30 June 2017 compared to three months ended 30 June 2016

The following table sets out the items from our consolidated statements of income for the periods indicated and the percentage change from period to period.

	Three months ended 30 June		Percentage change
	2016	2017	
	(£ in millions)		(% change)
Revenue	5,355	5,599	4.6%
Material and other cost of sales excluding exceptional item.....	(3,241)	(3,565)	10.0%
Exceptional Item	51	1	(98.0)%
Employee cost.....	(605)	(656)	8.4%
Pension past service credit	—	437	N/A
Other expenses	(1,137)	(1,278)	12.4%
Net impact of commodity derivatives	18	(7)	<(99)%
Development costs capitalised	322	355	10.2%
Other income.....	56	68	21.4%
Depreciation and amortisation	(388)	(450)	16.0%
Foreign exchange gain/(loss)	(65)	26	<(99)%
Finance income	9	9	—
Finance expense (net).....	(21)	(21)	—
Share of gain from equity accounted investees	45	77	71.1%

Income tax expense, excluding tax on exceptional item	(85)	(123)	44.7%
Tax on exceptional item	(10)	—	N/A
Profit for the period.....	304	472	55.3%

Revenue

Revenue increased by £244 million to £5,599 million in the three months ended 30 June 2017 from £5,355 million in the three months ended 30 June 2016, an increase of 4.6%, primarily driven by favourable foreign exchange impact due to the weaker British pound, net of the impact of hedging, offset by lower wholesales. Please see “Our Business—Product Sales Performance”.

Material and other cost of sales

Our material and other cost of sales (excluding the exceptional item for the recoveries related to the explosion at the Port of Tianjin) increased to £3,565 million in the three months ended 30 June 2017, up 10.0% from £3,241 million in the three months ended 30 June 2016. This increase is predominantly attributable to the stronger euro compared to the British pound, net of the impact of hedging. The exceptional item within “Material and other cost of sales” of £1 million for the three months ended 30 June 2017 relates to the recovery of import duties and taxes following the explosion at the port of Tianjin (China) in August 2015 which led to a reversal of the initial provision recorded in the three months ended 30 September 2015.

The exceptional item within “Material and other cost of sales” of £51 million for the quarter ended 30 June 2016 related to an interim payment of £50 million in relation to the vehicles involved in the Tianjin incident and £1 million due to achieving sales at a higher net realisable value than that estimated at 31 March 2016. Due to the size of the provision recorded, the charge together with the associated tax impact was disclosed as an exceptional item in Fiscal 2016.

As a percentage of revenue, material and other costs of sales before exceptional item accounted for 63.7% of our revenue in the three months ended 30 June 2017, which is up from 60.5% for the three months ended 30 June 2016, predominantly attributable to the stronger euro compared to the British pound, net of the impact of hedging.

Change in inventories of finished goods and work in progress: In the three months ended 30 June 2017, our inventory of finished goods and work in progress increased by £288 million. This increase in inventories at 30 June 2017 compared to 31 March 2017 was principally related to the launch of new products such as the all-new Land Rover Discovery and the new Range Rover Velar as well as seasonality in vehicle wholesales.

Purchase of products for sale: In the three months ended 30 June 2017, we spent £453 million on parts and accessories supplied by third parties and used in our finished vehicles and parts, compared to £345 million in the three months ended 30 June 2016, representing an increase of 31.3%, primarily driven by the increase in the number of our vehicles currently on the market.

Raw materials and consumables: We consume a number of raw materials in the manufacture of vehicles, including steel, aluminium, copper, precious metals and resins. The cost of raw materials and consumables in the three months ended 30 June 2017 was £3,399 million compared to £3,485 million in the three months ended 30 June 2016, a decrease of £86 million, or 2.5%. The decrease in the total cost of raw materials and consumables was primarily attributable to lower production and wholesale volumes, exchange rate movements and model mix. Raw materials and consumables as a percentage of revenue decreased to 60.7% for the three months ended 30 June 2017, as compared to 65.1% for the three months ended 30 June 2016, due to an increase in revenue resulting mainly from foreign exchange and an improvement in model and market mix.

Employee cost

Our employee cost increased by 8.4% to £656 million in the three months ended 30 June 2017 from £605 million in the three months ended 30 June 2016. The increase was primarily attributable to an increase in manufacturing headcount to accommodate higher future production volumes, and our product development headcount as we develop future products and technologies. As at 30 June 2017, we had 40,857 worldwide employees including agency personnel, compared to 39,386 as at 30 June 2016, an increase of 3.7%. Please see “Risk Factors—Risks Associated with Our Business—We may be adversely affected by labour unrest” and “Our business—Employees—Union wage settlements”.

On 3 April 2017, we approved and communicated to our defined benefit schemes’ members that the defined benefit schemes’ rules were to be amended with effect from 6 April 2017 so that, among other changes, retirement benefits will be calculated on a career average basis rather than based upon a member’s final salary at retirement. As a result of the remeasurement of the schemes’ liabilities, a past service credit of £437 million has arisen and has been recognised in the three months ended 30 June 2017.

Other expenses

Other expenses increased to £1,278 million in the three months ended 30 June 2017 from £1,137 million in the same period in 2016 primarily due to increases in publicity, marketing and distribution costs primarily driven by the launch of new models.

Net impact of commodity derivatives

In the three months ended 30 June 2017, we recorded a net loss on commodity derivatives of £7 million as a result of a general increase in commodity prices during the three months ended 30 June 2017. In the three months ended 30 June 2016, we recorded a net gain on commodity derivatives of £18 million as a result of a general increase in commodity prices during the three months ended 30 June 2016.

Development costs capitalised

We capitalise product development costs incurred on new vehicle platforms, engines, transmissions and new products in accordance with IFRS. The following table shows the R&D costs recognised in our income statement and the share of capitalised development costs and amortisation of capitalised development costs in the three months ended 30 June 2016 and 2017:

	Three months ended 30 June	
	2016	2017
	(£ in millions)	
Total R&D costs	407	449
Of which expenditure capitalised	322	355
Capitalisation ratio in %.....	79.1	79.1
Amortisation of expenditure capitalised	191	205
R&D costs charged in income statement	85	94
As % of revenues.....	1.6	1.7

The capitalisation ratio of development costs depends on the production cycle that individual models pass through in different periods.

Capitalised development costs increased to £355 million in the three months ended 30 June 2017 from £322 million in the three months ended 30 June 2016, due to an increase in total R&D costs primarily driven by new product and technology development.

Other income (net)

Our other income increased to £68 million in the three months ended 30 June 2017, compared to £56 million in the three months ended 30 June 2016. The increase is primarily attributable to higher royalties from our China Joint Venture as their production increased.

Depreciation and amortisation

Our depreciation and amortisation increased to £450 million in the three months ended 30 June 2017, compared to £388 million in the three months ended 30 June 2016. The majority of the increase relates the launch of the all-new Land Rover Discovery and the new Range Rover Velar.

Foreign exchange gain/(loss)

We recorded a foreign exchange gain of £26 million in the three months ended 30 June 2017, compared to the loss of £65 million in the three months ended 30 June 2016, primarily attributable to the weakening of the British pound (post Brexit) against major currencies, primarily the US dollar, euro and Chinese yuan. The foreign exchange impact on our results from operations in the three months ended 30 June 2017 compared to the three months ended 30 June 2016 reflects the following:

- Realised foreign exchange hedge losses not classified in revenue or in material and other cost of sales of £57 million compared to losses of £5 million in the three months ended 30 June 2016.
- Unfavourable revaluation of current assets and liabilities (primarily euro-denominated payables) of £25 million compared to unfavourable revaluation of £58 million as at 30 June 2016.
- Favourable revaluation of £19 million on undesignated foreign currency denominated debt compared to unfavourable revaluation of £23 million as at 30 June 2016.
- Favourable revaluation of £89 million on unrealised foreign exchange hedges compared to favourable revaluation of £21 million in the three months ended 30 June 2016.

Please see “Description of Other Indebtedness—Hedging Facilities”.

Finance income

Our finance income was flat at £9 million in the three months ended 30 June 2017 and 30 June 2016.

Finance expense (net of capitalised interest)

Our finance expense (net of capitalised interest) was flat at £21 million in the three months ended 30 June 2017 and 30 June 2016.

Share of (loss)/profit from equity accounted investees

Our share of profits from equity accounted investees of £77 million in the three months ended 30 June 2017 relates to our China Joint Venture, and has increased compared to a £45 million gain on the same joint venture during the three months ended 30 June 2016 due to increasing wholesales volumes. Please see “Our Business—China Joint Venture”.

Income tax expense

Income tax expense was £123 million in the three months ended 30 June 2017, compared to £95 million in the three months ended 30 June 2016. This increase was primarily attributable to higher profit before tax. The effective tax rate for the three months ended 30 June 2017 was 20.7% compared to 23.8% for the same period in 2016. The lower effective tax rate primarily reflects reductions in UK corporation tax.

Profit for the period

Our consolidated profit for the period of the three months ended 30 June 2017 was £472 million, compared to a consolidated profit for the period of £304 million in the three months ended 30 June 2016 as a result of the factors identified above.

Fiscal 2017 compared to Fiscal 2016

The following table sets out the items from our consolidated statements of income for the periods indicated and the percentage change from period to period.

	Fiscal year ended 31 March		Percentage change (% change)
	2016	2017	
	(£ in millions)		
Revenue	22,286	24,339	9.2%
Material and other cost of sales excluding exceptional item.....	(13,405)	(15,071)	12.4%
Exceptional Item	(157)	151	<(99)%
Employee cost.....	(2,321)	(2,490)	7.3%
Other expenses	(4,674)	(5,376)	15.0%
Net impact of commodity derivatives	(113)	106	<(99)%
Development costs capitalised	1,242	1,426	14.8%
Other income.....	241	273	13.3%
Depreciation and amortisation	(1,418)	(1,656)	16.8%
Foreign exchange (loss)	(136)	(216)	58.8%
Finance income	38	33	(13.2)%
Finance expense (net).....	(90)	(68)	(24.4)%
Share of profit from equity accounted investees	64	159	>99%
Profit before tax	1,557	1,610	3.4%
Income tax expense, excluding tax on exceptional item	(293)	(292)	(0.3)%
Tax on exceptional item	48	(46)	<(99)%
Profit for the year	1,312	1,272	(3.0)%

Revenue

Revenue increased by £2,053 million to £24,339 million in Fiscal 2017 from £22,286 million in Fiscal 2016, an increase of 9.2%. This increase primarily reflects higher wholesales volumes and a more favourable foreign exchange impact due to the weaker British pound following Brexit, net of the impact of hedging.

Material and other cost of sales

Our material and other cost of sales excluding exceptional item increased to £15,071 million in Fiscal 2017 from £13,405 million in Fiscal 2016. This increase is predominantly attributable to higher wholesale volumes. As a percentage of revenue, material and other cost of sales were flat at 61.9% of our revenue in Fiscal 2017, as compared to 60.1% in Fiscal 2016.

Change in inventories of finished goods and work in progress: In Fiscal 2017, we added £754 million to our inventory of finished goods and work in progress, compared to £257 million in Fiscal 2016. This increase of inventories at 31 March 2017 compared to 31 March 2016 was primarily the result of additional and higher value inventory held for sale at year end, primarily in the United States and United Kingdom, due to production schedules. Inventories of finished goods include £326 million, relating to vehicles sold to rental car companies, fleet customers and others with guaranteed repurchase arrangements. In Fiscal 2017, we recorded an inventory write-down expense of £16 million compared to a write-down expense of £230 million of which, £157 million related to vehicles destroyed and damaged in the explosion at the Port of Tianjin in Fiscal 2016. The write-down is included in material and other cost of sales.

Purchase of products for sale: In Fiscal 2017, we spent £1,144 million on parts and accessories supplied by third parties and used in our finished vehicles and parts, compared to £876 million in Fiscal 2016, representing an increase of 30.6%. This increase was primarily attributable to an increase in parts sales to service the increasing number of vehicles previously sold.

Raw materials and consumables: We consume a number of raw materials in the manufacture of vehicles, including steel, aluminium, copper, precious metals and resins. The cost of raw materials and consumables in Fiscal 2017 was £14,621 million, compared to £12,684 million in Fiscal 2016, representing an increase of £1,937 million, or 15.3%. The increase in the total cost of raw materials and consumables was primarily attributable to higher production and wholesale volumes. Raw materials and consumables as a percentage of revenue increased to 60.1% for Fiscal 2017, as compared to 56.9% for Fiscal 2016.

Employee cost

Our employee cost increased by 7.3% to £2,490 million in Fiscal 2017 from £2,321 million in Fiscal 2016. The increase was primarily attributable to an increase in manufacturing headcount, to accommodate higher future production volumes, and our product development headcount as we develop future products and technologies. Average employee headcount increased from 37,005 to 39,693, or 7.3%, from 31 March 2016 to 31 March 2017. In Fiscal 2017, the average number of employees on a non-agency basis and agency basis was 33,050 and 6,643 respectively, compared to 29,789 and 7,216 in Fiscal 2016.

Other expenses

Other expenses increased to £5,376 million in Fiscal 2017 from £4,674 million in Fiscal 2016, primarily reflecting an increase in warranty and distribution costs due to an increase in sales volumes as well as an increase in publicity costs and expensed R&D.

Net impact of commodity derivatives

In Fiscal 2017, we recorded a net gain on commodity derivatives of £106 million primarily due to generally increasing commodity prices during Fiscal 2017. In Fiscal 2016, we recorded a net loss on commodity derivatives of £113 million as commodity prices generally decreased during Fiscal 2016.

Development costs capitalised

We capitalise product development costs incurred on new vehicle platforms, engines, transmissions and new products in accordance with IFRS. The following table shows the R&D costs recognised in our income statement and the share of capitalised development costs and amortisation of capitalised development costs in Fiscal 2016 and Fiscal 2017:

	Fiscal year ended 31 March	
	2016	2017
	(£ in millions)	
Total R&D costs	1,560	1,794
Of which expenditure capitalised.....	1,242	1,426
Capitalisation ratio in %.....	79.6%	79.5%
Amortisation of expenditure capitalised	696	769
R&D costs charged in income statement	318	368
As % of revenues	1.4%	1.5%

The capitalisation ratio of development costs depends on the production cycle that individual models pass through in different periods.

Capitalised R&D expenditure increased to £1,426 million in Fiscal 2017 from £1,242 million in Fiscal 2016, representing an increase of 14.8%, reflects higher product development costs (included as employee costs and engineering costs in other expenses), associated with the development of current and future products.

Other income (net)

Our other income increased to £273 million in Fiscal 2017, compared to £241 million in Fiscal 2016. The increase is primarily attributable to higher royalties from our China Joint Venture as their production increased.

Depreciation and amortisation

Our depreciation and amortisation increased to £1,656 million in Fiscal 2017 from £1,418 million in Fiscal 2016. The increase primarily reflects the depreciation and amortisation of capitalised product development costs related to the launch of new products such as the all-new Land Rover Discovery and the new Range Rover Velar. For more information on our depreciation and amortisation charge, see Notes 17 and 18 to our 2017 Consolidated Financial Statements included elsewhere in this Offering Memorandum.

Foreign exchange (loss)

We registered a foreign exchange loss of £216 million in Fiscal 2017, as compared to a loss of £136 million in Fiscal 2016, primarily driven by higher losses on the re-valuation of unrealised hedges, foreign currency debt and current assets and liabilities (primarily euro-denominated payables) as a result of the weaker British pound following Brexit.

Finance income

Our finance income decreased to £33 million in Fiscal 2017, as compared to £38 million in Fiscal 2016. The decrease was due to lower interest earned on cash deposits.

Finance expense (net of capitalised interest)

Our finance expense (net of capitalised interest) decreased to £68 million in Fiscal 2017, as compared to £90 million in Fiscal 2016. This decrease was primarily attributable to a £23 million increase in the amount of capitalised interest.

Share of profit from equity accounted investees

Our share of gain from equity accounted investees of £159 million in Fiscal 2017 relates primarily to our China Joint Venture, and has increased compared to a gain of £64 million during Fiscal 2016, primarily due to increased production and wholesales of the locally produced Land Rover Discovery Sport and long wheel base Jaguar XFL by our China Joint Venture. Please see “Our Business—China Joint Venture”.

Income tax expense

We had an income tax expense of £338 million in Fiscal 2017, as compared to £245 million in Fiscal 2016, reflecting a higher effective tax rate of 21.0% in Fiscal 2017, compared to 15.7% in Fiscal 2016, reflecting the non-recurrence of favourable deferred tax credits in Fiscal 2016 (primarily £74 million related to UK Patent Box legislation).

Profit for the period

Our consolidated profit for Fiscal 2017 was £1,272 million, as compared to £1,312 million in Fiscal 2016, as a result of the factors identified above.

Fiscal 2016 compared to Fiscal 2015

The following table sets out the items from our consolidated statements of income for the periods indicated and the percentage change from period to period.

	Fiscal year ended 31 March		Percentage change (% change)
	2015	2016	
	(£ in millions)		
Revenue	22,106	22,286	0.8%
Material and other cost of sales excluding exceptional item.....	(13,347)	(13,405)	0.4%
Exceptional Item	—	(157)	<(99)%
Employee cost.....	(1,977)	(2,321)	17.4%
Other expenses.....	(4,109)	(4,674)	13.8%
Net impact of commodity derivatives	(38)	(113)	<(99)%
Development costs capitalised	1,158	1,242	7.3%
Other income.....	181	241	33.1%
Depreciation and amortisation	(1,051)	(1,418)	34.9%
Foreign exchange (loss)	(216)	(136)	(37.0)%
Finance income	48	38	(20.8)%
Finance expense (net).....	(135)	(90)	(33.3)%
Share of (loss)/profit from equity accounted investees	(6)	64	<(99)%
Profit before tax	2,614	1,557	(40.4)%
Income tax expense.....	(576)	(245)	(57.5)%
Profit for the year	2,038	1,312	(35.6)%

Revenue

Revenue increased by £180 million to £22,286 million in Fiscal 2016 from £22,106 million in Fiscal 2015, an increase of 0.8%. This increase is primarily attributable to higher wholesale volumes primarily driven by the success of the Jaguar XE and Land Rover Discovery Sport and higher sales in the United Kingdom, North America and Europe partially offset by lower volumes in China and favourable changes in foreign exchange, net of the impact of hedging.

Material and other cost of sales

Our material and other cost of sales before exceptional item, related to vehicles destroyed or damaged in the explosion at the Port of Tianjin in August 2015, increased to £13,405 million in Fiscal 2016 from £13,347 million in Fiscal 2015. This increase is predominantly attributable to higher losses on realised hedges (primarily euro-denominated hedges) due to the weakening euro as compared to the British pound in Fiscal 2016, net of the impact of hedging.

As a percentage of revenue, material and other cost of sales accounted for 60.1% of our revenue in Fiscal 2016, as compared to 60.4% in Fiscal 2015.

Change in inventories of finished goods and work in progress: In Fiscal 2016, we added £257 million to our inventory of finished goods and work in progress, compared to £236 million in Fiscal 2015, an increase of 8.9%. This increase of inventories at 31 March 2016 compared to 31 March 2015 was principally the result of accumulated inventory relating to the F-PACE launch. Inventories of finished goods include £250 million, relating to vehicles sold to rental car

companies, fleet customers and others with guaranteed repurchase arrangements. In Fiscal 2016, we recorded an inventory write-down expense of £230 million of which, £157 million related to vehicles destroyed and damaged in the explosion at the Port of Tianjin, as compared to a write-down expense of £40 million in Fiscal 2015 related to inventories. The write-down is included in material and other cost of sales.

Purchase of products for sale: In Fiscal 2016, we spent £876 million on parts and accessories supplied by third parties and used in our finished vehicles and parts, compared to £864 million in Fiscal 2015, representing an increase of 1.4%. This increase was partially attributable to increase in wholesale volumes.

Raw materials and consumables: We consume a number of raw materials in the manufacture of vehicles, including steel, aluminium, copper, precious metals and resins. The cost of raw materials and consumables in Fiscal 2016 was £12,786 million, compared to £12,719 million in Fiscal 2015, representing an increase of £67 million, or 0.5%. The increase in the total cost of raw materials and consumables was primarily attributable to increases in manufacturing volumes. Raw materials and consumables as a percentage of revenue decreased to 57.4% for Fiscal 2016, as compared to 57.5% for Fiscal 2015.

Employee cost

Our employee cost increased by 17.4% to £2,321 million in Fiscal 2016 from £1,977 million in Fiscal 2015. The increase was primarily attributable to an increase in manufacturing and engineering headcount to support the development of new models and technologies. Average employee headcount increased from 32,127 to 37,005, or 15.2%, from 31 March 2015 to 31 March 2016. In Fiscal 2016, the average number of employees on a non-agency basis and agency basis was 29,789 and 7,216 respectively, compared to 24,902 and 7,225 in Fiscal 2015.

Other expenses

Other expenses increased to £4,674 million in Fiscal 2016 from £4,109 million in Fiscal 2015, primarily reflecting an increase in distribution costs due to an increase in volumes and a rise in warranty costs resulting from higher wholesale volumes, as well as one-time reserves and charges of £166 million, including a US recall of potentially faulty passengers airbags supplied by Takata, doubtful debts and previously capitalised investment.

Net impact of commodity derivatives

In Fiscal 2016, we recorded a net loss on commodity derivatives of £113 million as commodity prices generally decreased during Fiscal 2016. In Fiscal 2015, we recorded a net loss on commodity derivatives of £38 million as commodity prices generally decreased during Fiscal 2015.

Development costs capitalised

We capitalise product development costs incurred on new vehicle platforms, engines, transmissions and new products in accordance with IFRS. The following table shows the R&D costs recognised in our income statement and the share of capitalised development costs and amortisation of capitalised development costs in Fiscal 2016 and Fiscal 2015:

	Fiscal year ended 31 March	
	2015	2016
	(£ in millions)	
Total R&D costs	1,411	1,560
Of which expenditure capitalised.....	1,158	1,242
Capitalisation ratio in %.....	82.1%	79.6%
Amortisation of expenditure capitalised	526	696
R&D costs charged in income statement	253	318
As % of revenues	1.1%	1.4%

The capitalisation ratio of development costs depends on the production cycle that individual models pass through in different periods.

The increase in capitalised R&D expenditure to £1,242 million in Fiscal 2016 from £1,158 million in Fiscal 2015, representing an increase of 7.3% reflects higher product development costs (included as employee costs and engineering costs in other expenses), associated with the development of the Jaguar F-PACE, new Jaguar XF model, Jaguar XE, AJ200 diesel and petrol engines and Land Rover Evoque Model Year 2016 and other current and future products.

Other income (net)

Our other income increased to £241 million in Fiscal 2016, compared to £181 million in Fiscal 2015, which is primarily attributable to increase in royalty income from our China Joint Venture.

Depreciation and amortisation

Our depreciation and amortisation increased to £1,418 million in Fiscal 2016 from £1,051 million in Fiscal 2015. The increase primarily reflects the depreciation and amortisation of capitalised product development costs related to the launch of new products such as the Jaguar XE, Land Rover Evoque Model Year 2016, Land Rover Discovery Sport and AJ200 engines. For more information on our depreciation and amortisation charge, see Note 2 to our 2016 Consolidated Financial Statements included elsewhere in this Offering Memorandum.

Foreign exchange profit/(loss)

We registered a foreign exchange loss of £136 million in Fiscal 2016, as compared to a loss of £216 million in Fiscal 2015, primarily driven by realised hedging losses as a result of the appreciation of the US dollar and Chinese yuan and a generally strengthening euro against the British Pound which led to unfavourable revaluation of current assets and liabilities, mainly euro-denominated payables.

Finance income

Our finance income decreased to £38 million in Fiscal 2016, as compared to £48 million in Fiscal 2015. The decrease was due to lower average yields on cash deposits in Fiscal 2016 compared to Fiscal 2015.

Finance expense (net of capitalised interest)

Our finance expense (net of capitalised interest) decreased to £90 million in Fiscal 2016, as compared to £135 million in Fiscal 2015. This decrease was primarily attributable to a lower redemption premium paid on repurchased bonds in Fiscal 2016 of £2 million compared to £77 million in Fiscal 2015, as well as the subsequent issue of new bonds at lower interest rates. This decrease was partially offset by lower capitalised interest in Fiscal 2016 of £74 million compared to £116 million in Fiscal 2015.

Share of (loss)/profit from equity accounted investees

Our share of gain from equity accounted investees of £64 million in Fiscal 2016 relates to our China Joint Venture, and has increased compared to a £6 million loss during Fiscal 2015, primarily due to increased production and wholesales of the locally manufactured Range Rover Evoque and the introduction of the locally manufactured Land Rover Discovery Sport, which went on sale in November 2015. Please see “Our Business—China Joint Venture”.

Income tax expense

We had an income tax expense of £245 million in Fiscal 2016, as compared to £576 million in Fiscal 2015, reflecting a lower effective tax rate of 15.7% of profit before tax in Fiscal 2016. This decrease in the tax charge was primarily attributable to lower profits in Fiscal 2016 as well as the reduction in future UK corporate tax rates, which gave a rise to £63 million reduction in deferred tax and a £74 million deferred tax credit available under UK Patent Box tax legislation.

Profit for the period

Our consolidated profit for Fiscal 2016 was £1,312 million, as compared to £2,038 million in Fiscal 2015, as a result of the factors identified above.

Liquidity and Capital Resources

Free cash flow was negative £1,308 million in the three months ended 30 June 2017, primarily reflecting lower profits offset by the pension past service credit, £995 million of total product and other investment spending, as well as £733 million of negative working capital movement. The negative working capital movement was primarily driven by higher inventory and lower payables due to seasonality in sales and the launch of new models such as the all-new Land Rover Discovery and the Range Rover Velar (working capital movements were negative £692 million in the three months ended 30 June 2016). Net cash used in operating activities in the three months ended 30 June 2017 was £360 million, compared to £98 million for the same period in 2016. After the negative free cash flow of £1,308 million, finance expenses and fees (net of capitalised interest) of £25 million (down from £28 million in the three months ended 30 June 2016), a £11 million reduction in debt (down from a reduction of £92 million in the three months ended 30 June 2016) and a £60 million dividend paid (out of £150 million declared) to Tata Motors during the three months ended 30 June 2017 (down from a dividend of £150 million declared and paid in the three months ended 30 June 2016), we had total cash of £4,108 million (up from £3,749 million as at 30 June 2016), comprising £1,637 million of cash and cash equivalents and £2,471 million of financial deposits. At 30 June 2017, we also had an undrawn committed revolving credit facility of £1,870 million. The remaining £90 million dividend due to Tata Motors was paid in September 2017. The total amount of cash and cash equivalents includes £513 million held in subsidiaries of the Issuer outside the United Kingdom. The cash in some of these jurisdictions, e.g. South Africa and Brazil, is subject to certain restrictions on cash pooling, intercompany loan arrangements or interim dividends. However annual dividends are generally permitted and we do not believe that these restrictions have, or are expected to have, any impact on our ability to meet our cash obligations.

On a *pro forma* basis, after giving effect to the issuance of the Notes offered hereby and the use of proceeds therefrom, as described under “Use of Proceeds”, as at 30 June 2017 we would have had, on a consolidated basis, cash and cash equivalents of £2,018 million, short-term investments (bank deposits with a maturity of between three and twelve months) of £2,471 million and total indebtedness (including short-term debt) of £3,882 million, with undrawn committed facilities of £1,870 million. We believe that we have sufficient resources available to meet our planned capital requirements. However, our sources of funding could be adversely affected by an economic slowdown or other macroeconomic factors, which are beyond our control. A decrease in the demand for our products and services could lead to an inability to obtain funds from external sources on acceptable terms or in a timely manner or at all.

Our borrowings

The following table shows details of our committed and uncommitted financing arrangements, as well as the amounts outstanding and undrawn, as at 30 June 2017.

Facility	Committed Amount (£ in millions)	Maturity	Amount outstanding as at 30 June 2017 (£ in millions)	Amount undrawn as at 30 June 2017 (£ in millions)
<i>Committed</i>				
\$500 million 5.625% Senior Notes due 2023	n/a	1 February 2023	384*	—
\$700 million 4.125% Senior Notes due 2018	n/a	15 December 2018	539*	—
£400 million 5.00% Senior Notes due 2022	n/a	15 February 2022	400	—

* Using an exchange rate on 30 June 2017 of \$1.3006 = £1.00.

** Using an exchange rate on 30 June 2017 of €1.1398 = £1.00.

*** Effective 28 July 2017, we amended and extended our existing £1,870 million unsecured revolving credit facility (originally maturing in July 2020) by 2 years to mature in July 2022 and increased the facility size to £1,885 million.

Please see “Capitalisation” for a presentation of our capitalisation after giving effect to the issuance of the Notes offered hereby and the use of proceeds therefrom, as described under “Use of Proceeds”.

Liquidity and cash flows

Our principal sources of cash are cash generated from operations (primarily wholesale volumes of finished vehicles and parts) and external financings, which include term financings and revolving credit financings as well as an uncommitted invoice discounting facility. We use our cash to purchase raw materials and consumables, for maintenance of our plants, equipment and facilities, for capital expenditure on product development, to service or refinance our debt, to meet general operating expenses and for other purposes in the ordinary course of business.

Until 31 December 2012, as Jaguar Land Rover Holdings Limited was the main group entity used for financing and borrowing purposes, we had a policy of aggregating and pooling cash balances within that entity on a daily basis. Following our internal legal reorganisation effective on 1 January 2013, we currently use Jaguar Land Rover Limited for these purposes. Certain of our subsidiaries and equity method affiliates have contractual and other limitations in respect of their ability to transfer funds to us in the form of cash dividends, loans or advances. We believe that these restrictions have not had, and are not expected to have, any material impact on our ability to meet our cash obligations.

Cash flow data

The Fiscal 2015, Fiscal 2016 and Fiscal 2017 tables below have been extracted from the 2017 Consolidated Financial Statements included elsewhere in this Offering Memorandum.

The following table sets out the items from our consolidated statements of cash flow for the fiscal years ended 31 March 2015, 2016 and 2017 and for the three months ended 30 June 2017 compared to the three months ended 30 June 2016.

	Fiscal year ended 31 March			Three months ended 30 June	
	2015	2016	2017	2016	2017
	(£ in millions)			(£ in millions)	
Net cash generated from/(used in) operating activities.....	3,575	3,556	3,160	(98)	(360)

Cash and cash equivalents at beginning of period	2,260	3,208	3,399	3,399	2,878
Cash and cash equivalents at end of period.....	3,208	3,399	2,878	2,447	1,637

Three months ended 30 June 2017 compared to three months ended 30 June 2016

Net cash used in operating activities was £360 million in the three months ended 30 June 2017 primarily reflecting lower profits and £733 million of negative working capital movements, primarily driven by higher inventory and lower payables due to seasonality in sales and the launch of new models such as the Land Rover Discovery and the Range Rover Velar, as compared to £692 million used in the three months ended 30 June 2016.

Net cash used in investing activities was £766 million in the three months ended 30 June 2017 (up from £629 million in the three months ended 30 June 2016), of which £881 million related to investment spending (up from £607 million in the three months ended 30 June 2016) excluding expensed R&D of £94 million and £9 million related to finance income (flat from £9 million in the three months ended 30 June 2016). Short-term deposits and investments decreased by £125 million in the three months ended 30 June 2017 compared to an increase of £23 million in the three months ended 30 June 2016. Of the £881 million investment spending mentioned above, the purchase of property, plant and equipment was £478 million in the three months ended 30 June 2017, up from £264 million in the three months ended 30 June 2016. The increase in investment spending related to purchase of property, plant and equipment was primarily due to

ongoing investment spending at our Slovakian manufacturing facility which is currently under construction, and related to new product launches such as the Range Rover Velar and the Jaguar E-PACE. The remainder of the £881 million of investment spending mentioned above was cash paid for intangible assets totalling £403 million in the three months ended 30 June 2017, up from £343 million in the three months ended 30 June 2016. Our investment spending primarily relates to capacity expansion of our production facilities, the introduction of new products, and the development of new technologies that enhance our product offerings.

Net cash used in financing activities in the three months ended 30 June 2017 was £96 million compared to the £269 million used in the three months ended 30 June 2016. Finance expenses and fees were £24 million in the three months ended 30 June 2017 compared to £27 million the three months ended 30 June 2016, while the utilisation of our short term financing facility decreased by £11 million in the three months ended 30 June 2017 compared to a decrease of £34 million in the three months ended 30 June 2016. The entire aggregate principal amount of the 2011 Notes then outstanding (\$84 million) was repurchased under the optional redemption terms of the 2011 Notes on 16 May 2016, and no comparable repayment of debt was made in the three months ended 30 June 2017.

Fiscal 2017 compared to Fiscal 2016

Net cash generated from operating activities was £3,160 million in Fiscal 2017 compared to £3,556 million in Fiscal 2016. Free cash flow was positive £141 million in Fiscal 2017 (positive £644 million in Fiscal 2016) driven by solid profits and positive working capital which funded total product and other investment spending of £3,438 million. Finance expenses and fees were negative £154 million in Fiscal 2017 as compared to negative £147 million in Fiscal 2016. In Fiscal 2017, positive working capital movements of £467 million (£547 million in Fiscal 2016) were primarily driven by a £325 million favourable movement in provisions (primarily related to warranty) and favourable movements of £263 million in other assets and liabilities. The remaining £121 million reduction in working capital reflects a £628 million increase in inventory and a £194 million unfavourable movement related to trade receivables, partially offset by a £701 million improvement in accounts payable. In Fiscal 2107, we had £845 million increase in debt (up from negative £106 million in the Fiscal 2016).

Net cash used in investing activities increased to £4,317 million in Fiscal 2017 (of which £3,056 million relates to investment spending), compared to £2,966 million in Fiscal 2016. In Fiscal 2017, £1,300 million of cash was invested in short-term deposits compared to a £186 million investment in Fiscal 2016. Of the £3,056 million investment spending mentioned above, the purchase of property, plant and equipment (net of disposals) accounted for £1,583 million in Fiscal 2017, compared to £1,422 million in Fiscal 2016. The increase in investment spending related to purchase of property, plant and equipment was primarily due to the expansion of our EMC in Wolverhampton, ongoing investment spending at our Slovakian manufacturing facility, and related to new product launches such as the Land Rover Discovery and the Range Rover Velar. The remainder of the £3,056 million investment spending mentioned above consisted of cash paid for intangible assets, which accounted for £1,473 million in Fiscal 2017, compared £1,384 million in Fiscal 2016. Our investment spending primarily relates to capacity expansion of our production facilities, the introduction of new products, and the development of new technologies that enhance our product offerings.

Net cash generated from financing activities in Fiscal 2017 was £541 million compared to net cash used in financing activities of £403 million in Fiscal 2016. Net cash generated from financing activities in Fiscal 2017 reflected £857 million of new bonds issued in January 2017 (no bonds were issued in Fiscal 2016) and higher utilization of a short term financing facility (£45 million) in Fiscal 2017 compared to lower utilization (£48 million) of a short term financing facility in Fiscal 2016. Finance expenses and fees were £150 million in Fiscal 2017, slightly higher than the £142 million in Fiscal 2016. In Fiscal 2017 a £2 million redemption premium was paid to fully repurchase the 2011 Notes.

Fiscal 2016 compared to Fiscal 2015

Net cash generated from operating activities was £3,556 million in Fiscal 2016 compared to £3,575 million in Fiscal 2015. Free cash flow was £644 million in Fiscal 2016 as EBITDA of £3,147 million as well as positive movements in working capital and other non-cash accruals of £413 million were sufficient to fund total product and other investment spending of £3,135 million. In Fiscal 2016, positive working capital was primarily driven by a £443 million favourable movement in accounts payable while an increase in inventories was largely offset by favourable movements in other liabilities, including pensions, warranty and other reserves.

Net cash used in investing activities increased to £2,966 million in Fiscal 2016 (of which £2,806 million relates to investment spending), compared to £2,641 million in Fiscal 2015. In Fiscal 2016, £186 million of cash was invested in short-term deposits compared to a net withdrawal of £195 million in Fiscal 2015. Of the £2,806 million investment spending

mentioned above, the purchase of property, plant and equipment (net of disposals) accounted for £1,422 million in Fiscal 2016, compared to £1,561 million in Fiscal 2015. The decrease in investment spending related to purchase of property, plant and equipment was due to a higher level of infrastructure improvements made at the manufacturing facilities in the United Kingdom, as compared to prior year. The remainder of the £2,806 million investment spending mentioned above consisted of cash paid for intangible assets, which accounted for £1,384 million in Fiscal 2016, compared £1,206 million in Fiscal 2015. Our investment spending primarily relates to capacity expansion of our production facilities, the introduction of new products, and the development of new technologies that enhance our product offerings.

In addition, on 16 April 2015, the Group acquired 100% of the share capital of Silkplan Limited, thereby obtaining control of Silkplan Limited for £11 million.

Net cash used in financing activities in Fiscal 2016 was £403 million compared to net cash used in financing activities of £38 million in Fiscal 2015. Net cash used in financing activities in Fiscal 2015 reflected net incremental long term borrowings of £379 million (following the issuance and repayment of long-term borrowings), compared to the repayment of £58 million in aggregate principal amount of the 2012 Notes then outstanding which we repurchased under the optional redemption terms of the 2012 Notes in Fiscal 2016. Finance expenses and fees were lower at £142 million in Fiscal 2016, compared to £230 million in Fiscal 2015, primarily driven by the £2 million redemption premium paid for repurchased bonds in Fiscal 2016 compared to a redemption premium of £77 million in Fiscal 2015.

Sources of financing and capital structure

We fund our short-term working capital requirements with cash generated from operations, overdraft facilities with banks, short-and medium-term borrowings from lending institutions and banks. The maturities of these short-and medium-term borrowings are generally matched to particular cash flow requirements. Following the issue of the Notes, our main long-term borrowings will be the Existing Notes. In addition to the Notes, the Existing Notes we will also maintain:

- a £1,885 million Unsecured Syndicated Revolving Credit Facility; and
- a US \$295 million Uncommitted Multi-currency Syndicated Credit Insured Invoice Discounting Facility.

We endeavour to continuously optimise our capital structure, including through opportunistic capital raisings and other liability management transactions from time to time.

Capital expenditure

Capital expenditure on property, plant and equipment in the three months ended 30 June 2017 was £526 million compared to £260 million in the three months ended 30 June 2016. In the three months ended 30 June 2017, £355 million was capitalised as intangible engineering assets (excluding the UK Research and Development Expenditure Credit) compared to £322 million in the three months ended 30 June 2016. There were no impairments, material disposals or changes in use of assets. We estimate our capital spending will likely be in the region of £4 billion - £4.35 billion in Fiscal 2018 as we target an EBIT margin of 8-10% in the medium term. Our capital spending programme is primarily focused on expanding our manufacturing capacity, new product launches, product development and technology development including CO₂ emissions technology. We continue to invest in new products, technologies and capacity to meet customer demand in the premium automotive and SUV segments, as well as meet regulatory requirements. Please see “Our Business—Our Strategy—Grow the business through future capital investments”.

Under our accounting policy, approximately 79% of R&D costs were capitalised for the three months ended 30 June 2017.

Acquisitions and Disposals

On 2 June 2008, Tata Motors acquired the Jaguar and Land Rover businesses from Ford. The consideration was £1,279 million, not including £150 million of cash acquired in the business. We have made no other material acquisitions or disposals since 2 June 2008.

Off-Balance Sheet Arrangements, Contingencies and Commitments

Off-balance sheet arrangements

We have no off-balance sheet financial arrangements.

Contingencies

In the normal course of our business, we face claims and assertions by various parties. We assess such claims and assertions and monitor the legal environment on an on-going basis, with the assistance of external legal counsel wherever necessary. We record a liability for any claims where a potential loss is probable and capable of being estimated and disclose such matters in our financial statements, if material. Where potential losses are considered possible, but not probable, we provide disclosure in our financial statements, if material, but we do not record a liability in our accounts unless the loss becomes probable.

There are various claims against us, the majority of which pertain to motor accident claims and consumer complaints. Some of the cases also relate to replacement of parts of vehicles and/or compensation for deficiency in the services by us or our dealers. We believe that none of these contingencies, either individually or in aggregate, would have a material adverse effect on our financial condition, results of operations or cash flow.

Commitments

We have entered into various contracts with suppliers and contractors for the acquisition of plant and machinery, equipment, various civil contracts of a capital nature and acquisition of intangible assets aggregating £1,401 million as at 30 June 2017.

Quantitative and Qualitative Disclosures about Market Risks

We are exposed to financial risks as a result of the environment in which we operate. The main exposures are to currency risk on overseas sales and costs and commodity price risk on raw materials. Our Board has approved a hedging policy covering these risks and has appointed a Financial Risk Committee to implement hedging at a tactical level. Where it is not possible to mitigate the impact of financial risks by switching supplier locations or using fixed price contracts, the policy allows for the use of forwards, purchased options, collars and commodity swaps to hedge the exposures.

Market risk

Market risk is the risk of any loss in future earnings, in realisable fair values or in future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in interest rates, foreign currency exchange rates, commodity prices, liquidity and other market changes. Future specific market movements cannot be normally predicted with reasonable accuracy.

Commodity price risk

Our production costs are sensitive to the price of commodities used in manufacturing some of our automobile components. We are exposed to fluctuations in raw material prices, primarily aluminium, copper, platinum and palladium, and have developed a hedging strategy to manage this risk through fixed-price contracts with suppliers and derivatives with banks. The revaluation of derivative hedge instruments is reported through the income statement.

Foreign currency exchange rate risk

The fluctuation in foreign currency exchange rates may potentially affect our consolidated income statement, equity and debt where any transaction references more than one currency or where assets/liabilities are denominated in a currency other than the functional currency of the respective consolidated entities.

Considering the countries and economic environment in which we operate, our operations are subject to currency risk on overseas sales and costs. The risks primarily relate to fluctuations in the US dollar, euro and Chinese yuan against the British pound. We use forward contracts and options primarily to hedge foreign exchange exposure. Further, any weakening of the British pound against major foreign currencies may have an adverse effect on our cost of borrowing and the cost of

imports reported, which consequently may increase the cost of financing our capital expenditures. This also may impact the earnings of our international businesses. We evaluate the impact of foreign exchange rate fluctuations by assessing our exposure to exchange rate risks.

The following table presents information relating to foreign currency exposure (other than risk arising from derivatives) as at 31 March 2017:

	US dollar	Chinese yuan	Euro	Others ⁽¹⁾	Total
	(£ in millions)				
Financial assets	727	742	483	312	2,264
Financial liabilities.....	(2,139) ⁽²⁾	(756)	(1,098) ⁽³⁾	(182)	(4,175)
Net exposure (liability)/asset	(1,412)	(14)	(615)	130	(1,911)

(1) "Others" includes currencies such as the Japanese yen, Russian rouble, Singapore dollar, Swiss franc, Brazilian real, Australian dollar, South African rand, Thai baht, Korean won etc.

(2) Includes primarily the March 2015 Notes, the October 2014 Notes, the December 2013 Notes and the January 2013 Notes.

(3) Includes primarily trade payables denominated in euro and the January 2017 Euro Notes.

For a sensitivity analysis of our foreign currency exposure, please see note 35(C) of our 2017 Consolidated Financial Statements.

Interest rate risk

We are subject to variable interest rates on some of our interest-bearing liabilities. Our interest rate exposure is mainly related to debt obligations.

As at 31 March 2017, net financial liabilities of £179 million (compared to £116 million as at 31 March 2016) was subject to a variable interest rate. An increase/decrease of 100 basis points in interest rates at the balance sheet date would result in an impact of £2 million (compared to £1 million as at 31 March 2016) in the consolidated income statement.

Credit risk

Credit risk is the risk of financial loss arising from counterparty failure to repay or service debt according to the contractual terms or obligations. Credit risk encompasses the direct risk of default, the risk of deterioration of creditworthiness and concentration risks. Financial instruments that are subject to concentrations of credit risk principally consist of investments classified as loans and receivables, trade receivables, loans and advances, derivative financial instruments and financial guarantees issued for equity-accounted entities.

The carrying amount of financial assets represents the maximum credit exposure. As at 31 March 2017, our maximum exposure to credit risk was £7,248 million, being the total of the carrying amount of cash balance with banks, short-term deposits with banks, trade receivables, finance receivables and financial assets.

Regarding trade receivables and other receivables, and other loans or receivables, there were no defaults other than those overdue under the normal course of business as at 30 June 2017.

The table below provides details regarding the financial assets that are not yet due, past due or past due and impaired, including estimated interest payments as at 31 March 2017:

	Gross	Impairment
	(£ in millions)	
Not yet due.....	1,185	—
Overdue <3 months.....	92	4
Overdue >3 <6 months	1	1
Overdue >6 months.....	57	55
Total.....	1,335	60

Derivative financial instruments and risk management

We enter into foreign currency forward contracts and options with a counterparty (who is generally a bank) in order to manage our exposure to fluctuations in foreign exchange rates and commodity swaps to manage our principal commodity exposures. Recently, the British pound has depreciated significantly, which has led to negative mark-to-market movements and affected our reserves. These financial exposures are managed in accordance with our risk management policies and procedures.

Our net liabilities have decreased by £1,176 million from £2,727 million as at 31 March 2017 to £1,551 million as at 30 June 2017. This increase in foreign exchange liabilities related to financial hedging instruments is principally a result of the weakening of the British pound against principal hedged currencies over the relevant period, notably the US dollar, euro and Chinese yuan following Brexit.

Specific transactional risks include liquidity and pricing risks, interest rate and exchange rates fluctuation risks, volatility risks, counterparty risks, commodity price risks, settlement risks and gearing risks.

Critical Accounting Policies

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised and future periods affected.

During Fiscal 2017, the Group reviewed the presentation of foreign exchange in the consolidated income statement following the continued increase in hedging activity, volatility in foreign exchange rates, and in anticipation of transition to IFRS 9. As a result, it is considered more appropriate to present realised foreign exchange relating to derivatives hedging revenue exposures as an adjustment to 'Revenue' and realised foreign exchange relating to derivatives hedging cost exposures to 'Material and other cost of sales'. The prior year comparatives have been represented on this basis. Realised foreign exchange gains of £78 million and £240 million have been adjusted to 'Revenue' for the year ended 31 March 2016 and 2015 respectively and realised foreign exchange losses of £259 million and £162 million have been adjusted to 'Material and other cost of sales' for the year ended 31 March 2016 and 2015 respectively.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the 2017 Consolidated Financial Statements are included in the following notes:

- (i) Note 3—Alternative Performance Measures
- (ii) Note 5—Revenue
- (iii) Note 14—Taxation
- (iv) Note 17—Property, plant and equipment
- (v) Note 18—Intangible assets
- (vi) Note 20—Deferred tax assets and liabilities
- (vii) Note 27—Provisions
- (viii) Note 32—Employee benefits
- (ix) Note 35—Financial instruments

Revenue recognition

Revenue comprises the amounts invoiced to customers outside the Group and is measured at the fair value of the consideration received or receivable, net of discounts, sales incentives, dealer bonuses and rebates granted, which can be identified at the point of sale. Revenue is presented net of excise duty, where applicable, and other indirect taxes.

Revenue is recognised when the risks and rewards of ownership have been transferred to the customer and the amount of revenue can be reliably measured with it being probable that future economic benefits will flow to the Group. The transfer of the significant risks and rewards are defined in the underlying agreements with the customer.

No sale is recognised where, following disposal of significant risks and rewards, the Group retains a significant financial interest. The Group's interest in these items is retained in inventory, with a creditor being recognised for the contracted buy back price. Income under such agreements, measured as the difference between the initial sale price and the buy back price, is recognised on a straight-line basis over the term of the agreement. The corresponding costs are recognised over the term of the agreement based on the difference between the item's cost, including estimated costs of resale, and the expected net realisable value. If a sale includes an agreement for subsequent servicing or maintenance, the fair value of that service is deferred and recognised as income over the relevant service period in proportion with the expected cost pattern of the agreement.

IFRS 15 Revenue from Contracts with Customers provides a new comprehensive framework for revenue recognition and establishes new principles and the disclosure requirements thereof. The Group considers the profit impact of IFRS 15 to be immaterial to the financial statements. The main financial impact on the Group of IFRS 15 will be the presentation of the consolidated income statement with changes in classification arising from the new definitions of agent and principal, as well as some reclassification from 'Other Income' to 'Revenue' and additional revenue reductions relating to payments to customers. The other significant impact of IFRS 15 on the financial statements will be the extensive disclosure requirements of the standard, whereby additional numerical and narrative information will be required as well as more disaggregation of revenue compared to the current disclosures.

IFRS 17 Insurance Contracts was published on 18 May 2017 and replaces IFRS 4, which currently permits a wide variety of practices in accounting for insurance contracts. For fixed-fee service contracts whose primary purpose is the provision of services, such as roadside assistance, entities have an accounting policy choice to account for them in accordance with either IFRS 17 or IFRS 15. As the standard applies to annual periods beginning on or after 1 January 2021, the Group has to complete its project on Revenue Recognition under IFRS 15 before being able to determine the impact of IFRS 17.

Provisions

A provision is recognised if, as a result of a past event, we have a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Income Taxes

Income tax expense comprises current and deferred taxes. Income tax expense is recognised in the consolidated income statement, except when related to items that are recognised outside of profit or loss (whether in other comprehensive income or directly in equity), or where related to the initial accounting for a business combination. In the case of a business combination, the tax effect is included in the accounting for the business combination.

Current income taxes are determined based on respective taxable income of each taxable entity and tax rules applicable for respective tax jurisdictions.

Deferred tax assets and liabilities are recognised for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilised business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity and for each taxable jurisdiction. Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilised.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, and on the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and we intend to settle our current tax assets and liabilities on a net basis.

Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation and accumulated impairment, if any.

Cost includes purchase price, non-recoverable taxes and duties, labour cost and direct overheads for self-constructed assets and other direct costs incurred up to the date the asset is ready for its intended use.

Interest cost incurred for constructed assets is capitalised up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

Depreciation is charged on a straight-line basis over the estimated useful lives of the assets. Estimated useful lives of the assets are as follows:

	Estimated useful life
	(years)
Buildings.....	20 to 40
Plant, equipment and leased assets	3 to 30
Vehicles	3 to 10
Computers.....	3 to 6
Fixtures and fittings	3 to 20

The depreciation for property, plant and equipment with finite useful lives is reviewed at least at each year end. Changes in expected useful lives are treated as changes in accounting estimates.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease. Freehold land is measured at cost and is not depreciated. Heritage assets are not depreciated as they are considered to have a residual value in excess of cost. Residual values are re-assessed on an annual basis.

Depreciation is not recorded on assets under construction until construction and installation are complete and the asset is ready for its intended use. Assets under construction include capital prepayments.

Intangible assets

Acquired Intangible Assets

Intangible assets purchased, including those acquired in a business combination, are measured at cost or fair value as at the date of acquisition where applicable less accumulated amortisation and accumulated impairment, if any. Intangible assets with indefinite lives are reviewed annually to determine whether indefinite-life assessment continues to be supportable. If not, the change in the useful-life assessment from indefinite to finite is made on a prospective basis.

For intangible assets with definite lives, amortisation is provided on a straight-line basis over estimated useful lives of the intangible assets as per the estimated amortisation periods below.

Internally generated intangible assets

	<u>Estimated amortisation period</u>
Software.....	2 to 8 years
Patents and technological know how.....	2 to 12 years
Customer related—Dealer network.....	20 years
Intellectual property rights and other intangibles.....	3 to Indefinite

The amortisation year for intangible assets with finite useful lives is reviewed at least at each year-end. Changes in expected useful lives are treated as changes in accounting estimates.

Capital work-in-progress includes capital advances. Customer-related intangibles acquired in a business combination consist of dealer networks. Intellectual property rights and other intangibles consist of brand names, which are considered to have indefinite lives due to the longevity of the brands.

Research costs are charged to the consolidated income statement in the year in which they are incurred.

Product development costs incurred on new vehicle platforms, engines, transmission and new products are recognised as intangible assets, when feasibility has been established, the Group has committed technical, financial and other resources to complete the development and it is probable that asset will generate probable future economic benefits.

The costs capitalised include the cost of materials, direct labour and directly attributable overhead expenditure incurred up to the date the asset is available for use.

Interest cost incurred is capitalised up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings if no specific borrowings have been incurred for the asset.

Product development cost is amortised over a period of between two and 10 years.

Capitalised development expenditure is measured at cost less accumulated amortisation and accumulated impairment loss, if any.

Amortisation is not recorded on product development in progress and is only recorded once development is complete.

Impairment

Property, plant and equipment and other intangible assets: At each balance sheet date, the Group assesses whether there is any indication that any property, plant and equipment and intangible assets with finite lives may be impaired. If any such impairment indicator exists, the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, or earlier, if there is an indication that the asset may be impaired.

The estimated recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the consolidated income statement.

An annual impairment review for heritage assets is performed and any impairment in the carrying value is recognised immediately in the consolidated income statement.

As at 30 June 2017, none of our property, plant and equipment and intangible assets were considered impaired.

Equity accounted investments: joint ventures and associates: The requirements of IAS 39 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in an associate or joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (the higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

Employee benefits

Pension schemes: We operate several defined benefit pension schemes; the UK defined benefit schemes were previously contracted out of the second state pension scheme until 5 April 2016. The assets of the plans are generally held in separate trustee administered funds. The plans provide for a monthly pension after retirement based on salary and service as set out in the rules of each scheme.

Contributions to the plans by us take into consideration the results of actuarial valuations. The plans with a surplus position at the balance sheet date have been limited to the maximum economic benefit available from unconditional rights to refund from the scheme or reduction in future contributions. Where the subsidiary group is considered to have a contractual obligation to fund the pension plan above the accounting value of the liabilities, an onerous obligation is recognised.

The UK defined benefit schemes were closed to new joiners in April 2010.

For defined benefit schemes, the cost of providing benefits is determined using the projected unit credit method, with actuarial revaluations being carried out at the end of each reporting period.

Defined benefit costs are split into three categories:

- Current service cost, past service cost, and gains and losses on curtailments and settlements;
- Net interest cost; and
- Remeasurement.

Remeasurement comprising actuarial gains and losses, the effect of the asset ceiling and the return on scheme assets (excluding interest) is recognised immediately in the consolidated balance sheet with a charge or credit to the consolidated statement of comprehensive income in the period in which they occur. Remeasurement recorded in the statement of comprehensive income is not recycled.

Past service cost, including curtailment gains and losses, is generally recognised in profit or loss in the period of scheme amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability.

We present these defined benefit costs within "Employee costs" in the consolidated income statement.

Separate defined contribution schemes are available to all our other employees. Costs in respect of these schemes are charged to the consolidated income statement as incurred.

Post-retirement Medicare scheme: Under this unfunded scheme, employees of some of our subsidiaries receive medical benefits subject to certain limits of amount, periods after retirement and types of benefits, depending on their grade and location at the time of retirement. Employees separated from us as part of an early separation scheme, on medical grounds or due to permanent disablement, are also covered under the scheme. The applicable subsidiaries (and therefore, the Group) account for the liability for the post-retirement medical scheme based on an annual actuarial valuation.

Actuarial gains and losses: Actuarial gains and losses relating to retirement benefit plans are recognised in the consolidated statement of comprehensive income in the year in which they arise. Actuarial gains and losses relating to long-term employee benefits are recognised in the consolidated income statement in the year in which they arise.

Measurement date: The measurement date of all retirement plans is 31 March.

Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified into categories: financial assets at fair value through profit or loss (which can either be held for trading or designated as fair value options); held-to-maturity investments; loans and receivables; and available-for-sale financial assets. Financial liabilities are classified into financial liabilities at fair value through profit or loss and other financial liabilities. No financial instruments have been designated as financial liabilities at fair value through profit or loss using the fair value option or have been classified as held-to-maturity. Where the Group provides convertible loan notes to third parties, these are designated as fair value through profit or loss using the fair value option.

Financial instruments are recognised on the balance sheet when we become a party to the contractual provisions of the instrument. Initially, a financial instrument is recognised at its fair value. Transaction costs directly attributable to the acquisition or issue of financial instruments are recognised in determining the carrying amount, if it is not classified as at fair value through profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

- *Financial assets and financial liabilities at fair value through profit or loss—held for trading:* Derivatives, including embedded derivatives separated from the host contract are classified into this category. Financial assets and liabilities are measured at fair value with changes in fair value recognised in the consolidated income statement, unless they are designated as hedging instruments, for which hedge accounting is applied.
- *Loans and receivables:* Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and which are not classified as financial assets at fair value through net income or financial assets available-for-sale. Subsequently, these are measured at amortised cost using the effective interest method less any impairment losses. These include cash and cash equivalents, trade receivables, finance receivables, other financial receivables and other financial assets.
- *Available-for-sale financial assets:* Available-for-sale financial assets are those non-derivative financial assets that are either designated as such upon initial recognition or are not classified in any of the other financial asset categories. Subsequently, these are measured at fair value and changes therein are recognised in other comprehensive income, net of applicable deferred income taxes, and accumulated in the investments revaluation reserve with the exception of interest calculated using the effective interest method and foreign exchange gains and losses on monetary assets, which are recognised directly in profit or loss. The Group does not hold any available-for-sale financial assets.

Investments in equity instruments classified as available-for-sale that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost.

Embedded derivatives relating to prepayment options on senior notes are not considered as closely related and are separately accounted unless the exercise price of these options is approximately equal, on each exercise date, to the amortised cost of the senior notes.

- *Other financial liabilities:* These are measured at amortised cost using the effective interest method.

The fair value of a financial instrument on initial recognition is normally the transaction price (fair value of the consideration given or received). Subsequent to initial recognition, measurement of financial assets and liabilities is determined based on classification. For financial assets and liabilities measured at fair value, we determine the fair value of financial instruments that are quoted in active markets using the quoted bid prices (financial assets held) or quoted ask prices (financial liabilities held) and using valuation techniques for other instruments. Valuation techniques include discounted cash flow method and other valuation models.

We derecognise a financial asset only when the contractual rights to the cash flows from the asset expires or we transfer the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If we neither transfer nor retain substantially all the risks and rewards of ownership and continue to control the transferred asset, we recognise our retained interest in the asset and an associated liability for amounts we may have to pay. If we retain substantially all the risks and rewards of ownership of a transferred financial asset, we continue to recognise the financial asset and also recognise a collateralised borrowing for the proceeds received.

Financial liabilities are derecognised when these are extinguished, that is when the obligation is discharged, cancelled or has expired. When a financial instrument is derecognised, the cumulative gain or loss in equity (if any) is transferred to the consolidated income statement.

We assess at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets, other than those measured at fair value through profit or loss, is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

We use foreign currency forward contracts, foreign currency options and borrowings denominated in foreign currency to hedge the risks associated with foreign currency fluctuations relating to highly probable forecast transactions. We designate these foreign currency forward contracts, foreign currency options and borrowing denominated in foreign currency in a cash flow hedging relationship by applying hedge accounting principles under IAS 39.

During Fiscal 2017, the Group reviewed the presentation of foreign exchange in the consolidated income statement following the continued increase in hedging activity, volatility in foreign exchange rates, and in anticipation of transition to IFRS 9. As a result, it is considered more appropriate to present realised foreign exchange relating to derivatives hedging revenue exposures as an adjustment to 'Revenue' and realised foreign exchange relating to derivatives hedging cost exposures to 'Material and other cost of sales'. The prior year comparatives have been represented on this basis. Realised foreign exchange gains of £78 million and £240 million have been adjusted to 'Revenue' for the year ended 31 March 2016 and 2015 respectively and realised foreign exchange losses of £259 million and £162 million have been adjusted to 'Material and other cost of sales' for the year ended 31 March 2016 and 2015 respectively. For options, the time value is not a designated component of the hedge, and therefore all changes in fair value related to the time value of the instrument are recognised immediately in the consolidated income statement.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, exercised or no longer qualifies for hedge accounting. For forecast transactions, any cumulative gain or loss on the hedging instrument recognised in other comprehensive income is retained there until the forecast transaction affects profit or loss.

If the forecast transaction is no longer expected to occur, the net cumulative gain or loss recognised in other comprehensive income is immediately transferred to the consolidated income statement.

IFRS 9: *Financial Instruments*, addresses the classification, measurement and recognition of financial assets and financial liabilities, introduces new rules for hedge accounting and a new impairment model for financial assets. IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through other comprehensive income and fair value through profit or loss. The basis of classification depends on the entity's business model and contractual cash flow characteristics of the financial asset. We have undertaken an assessment of classification and measurement and we do not expect a significant impact on the financial statements. The new impairment model requires the recognition of impairment provisions based on expected credit losses rather than only incurred credit losses as is the case under IAS 39. It applies to financial assets classified at amortised cost, contract assets under IFRS 15 Revenue from Contracts with customers, lease receivables, loan commitments and certain financial guarantee contracts. We have undertaken an assessment of the impairment model and we do not expect a significant impact on the financial statements. The new hedge accounting rules will align the accounting for hedging instruments more closely with our risk management practices. As a general rule, more hedge relationships might be eligible for hedge accounting, as the standard introduces a more principles-based approach. We have undertaken an assessment of their IAS 39 hedge relationships against the requirements of IFRS 9 and have concluded that our current hedge relationships will qualify as continuing hedges upon the adoption of IFRS 9. We have identified a change with respect to treatment of the cost of hedging, specifically the time value of the foreign exchange options and foreign currency basis included in the foreign exchange forwards. We are undertaking an assessment to determine the impact on the financial statements. We anticipate that the time value of foreign exchange options and the foreign currency basis included in the foreign exchange forwards will now be recorded in a separate component of the statement of comprehensive income. Foreign exchange gains/losses for non-financial items will now be recognised as an adjustment to that non-financial item (i.e. inventory) when recorded on the consolidated balance sheet. The new standard also introduces expanded disclosure requirements and changes in presentation. These are expected to change the nature and extent of our disclosures about our financial instruments particularly in the year of the adoption of the new standard.

OUR BUSINESS

Overview

We design, develop, manufacture and sell Jaguar premium sports saloons, sports cars and luxury performance SUVs and Land Rover premium all-terrain vehicles, as well as related parts, accessories and merchandise. We have a long tradition as a manufacturer of technologically advanced, premium passenger vehicles with internationally recognised brands, an exclusive product portfolio of award-winning vehicles, a global distribution network and strong R&D capabilities, including the development of autonomous, connected and electrification technologies, as well as investing in innovative mobility solutions to overcome and address future travel and transport challenges. We plan to offer an electric drivetrain option on all of our new models by 2020. Our R&D operations currently consist of an engineering team of approximately 400 engineers, co-managed for Jaguar and Land Rover, sharing premium technologies, powertrains and vehicle architectures. Our vehicles are designed and developed by award-winning design teams, and we are committed to a continuing programme of new product design. Collectively, Jaguar and Land Rover's product portfolio received 213 awards from leading international motoring writers, magazines and opinion leaders in Fiscal 2017, reflecting the strength of our model line-up and our design and engineering capabilities.

We operate a global sales and distribution network designed to achieve geographically diversified sales and facilitate growth in our key markets. Our four principal regional markets are Europe (excluding the United Kingdom and Russia), North America, the United Kingdom and China which, respectively, accounted for 24.4%, 20.7%, 16.8% and 24.4% of our retail volumes, including sales from our China Joint Venture and 26.5%, 25.0%, 21.9% and 11.6% of our wholesale volumes, excluding sales from our China Joint Venture in the three months ended 30 June 2017.

We operate three principal automotive manufacturing facilities, an engine manufacturing facility and two advanced design and engineering facilities in the United Kingdom and a manufacturing plant in Slovakia which is currently under construction, as well as a wholly owned manufacturing plant in Brazil. We have also established a manufacturing joint venture in China, which currently produces the Range Rover Evoque, Land Rover Discovery Sport and the long wheel base Jaguar XFL for sale in the local market. Globally, we employed a total of 40,857 employees, including agency personnel (but excluding China Joint Venture employees), as at 30 June 2017, of which 22,277 were employed in our manufacturing operations with the remaining 18,580 employed in other areas such as design, engineering and central corporate functions.

The following table presents our revenue, profit and EBITDA in Fiscal 2015, Fiscal 2016 and Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017.

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	(£ in millions)					
Revenue	22,106	22,286	24,339	5,355	5,599	24,583
Profit for the period	2,038	1,312	1,272	304	472	1,440
EBITDA.....	4,132	3,147	2,955	672	442	2,725

In Fiscal 2015, Fiscal 2016 and Fiscal 2017, we experienced solid vehicle sales and revenue growth, reflecting successful launches of new models, sustained appeal of existing products and geographic diversification, combined with a generally supportive global economic environment, notwithstanding geopolitical uncertainty and intensifying competition.

Our unit sales (on a retail basis and including sales through our China Joint Venture) for each of our brands for Fiscal 2015, Fiscal 2016, Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017 are set out in the table below:

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
Jaguar.....	76,930	94,449	172,848	31,806	41,266	182,308
Land Rover	385,279	427,122	431,161	100,947	96,197	426,411
Total	462,209	521,571	604,009	132,753	137,463	608,719

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	<i>Retail volumes from our China Joint Venture (included above)</i>	1,094	31,765	65,023	14,039	20,309

Our unit sales (on a wholesale basis, excluding sales from our China Joint Venture) under each of our brands for Fiscal 2015, Fiscal 2016, Fiscal 2017, the three months ended 30 June 2016 and 2017 and the twelve months ended 30 June 2017 are set out in the table below:

	Fiscal year ended 31 March			Three months ended 30 June		Twelve months ended 30 June
	2015	2016	2017	2016	2017	2017
	Jaguar.....	76,496	102,106	169,284	34,572	32,637
Land Rover	389,983	407,228	365,462	86,196	85,279	364,545
Total	466,479	509,334	534,746	120,768	117,916	531,894
<i>Wholesale volumes from our China Joint Venture (excluded above)</i>	4,044	34,751	66,060	13,588	20,560	73,032

Wholesale volumes refer to the aggregate number of finished vehicles sold to dealers and importers. We recognise our revenue on the wholesale volumes we sell. Retail volumes refer to the aggregate number of finished vehicles sold by dealers to end users. We consider retail volumes the best indicator of consumer demand for our vehicles and the strength of our brand.

We are a wholly owned indirect subsidiary of Tata Motors, a member of the international conglomerate Tata Group. Tata Motors is the largest commercial vehicle manufacturer in terms of revenue in India and among the top six passenger vehicle manufacturers in terms of units sold in India during Fiscal 2017.

Our vehicles

Jaguar designs, develops and manufactures a range of premium sports cars, saloons and luxury performance SUVs recognised for their design, performance and quality and we are committed to a continuing programme of new product design and development. Our two UK based design and development centres are equipped with computer-aided design, manufacturing and engineering tools, and are configured for competitive product development cycle-time and efficient data management.

Jaguar’s range of products comprises the F-TYPE two-seater sports car coupé and convertible, the F-PACE luxury performance SUV, the lightweight XF (including the long wheel base XFL for the Chinese market), the recently launched new XF Sportbrake, the XJ saloon and the XE sports saloon. The Jaguar E-PACE, our compact SUV is expected to go on general retail sale in certain markets in late 2017. In November 2016, we unveiled the Jaguar I-PACE Concept, our first all-electric vehicle at the 2016 Los Angeles Motor Show. The I-PACE is a five seater sports car powered by a 90kWh battery, providing an estimated range of 500km (NEDC cycle) and rapid charging in two hours, and twin-electric motors delivering all-wheel-drive performance, accelerating to 60 mph in around four seconds. We expect the I-PACE to go on sale in the second half of 2018.

Land Rover designs, develops and manufactures premium all-terrain vehicles that aim to differentiate themselves from the competition by their capability, design, durability, versatility and refinement. Land Rover’s range of products comprises the Range Rover, Range Rover Sport, Range Rover Velar, Range Rover Evoque (including a convertible model), Land Rover Discovery and the Land Rover Discovery Sport. The Land Rover Defender ceased production in January 2016. The all-new Land Rover Discovery went on sale in February 2017 and the Range Rover Velar went on sale in July 2017.

For a description of our vehicle models, please see “—Our Vehicles”. For retail and wholesale unit sales by vehicle model, please see “—Product Sales Performance—Sales Performance by Vehicle Model”. For the most recent awards that our vehicles have received, please see “—Our Competitive Strengths—Award-winning design capabilities and distinctive model line-ups”.

Product design, development and technology

Our vehicles are designed and developed by award-winning design teams, and we are committed to a continuing programme of new product design. Please see “—Our Competitive Strengths—Award-winning design capabilities and distinctive model line ups”. Our two design and development centres are equipped with computer-aided design, manufacturing and engineering tools, and are configured for competitive product development cycle-time and efficient data management.

We develop and manufacture technologically advanced vehicles, including the development of autonomous, connected and electrification technologies, as well as investing in innovative mobility solutions to overcome and address future travel and transport challenges and all our vehicles currently include level 2 features. Our R&D operations currently consist of a team of approximately 400 engineers, co-managed for Jaguar and Land Rover, sharing premium technologies, powertrains and vehicle architectures. Please see “—Product Design, Technology and Research and Development”.

Our Competitive Strengths

We believe that the solid vehicle sales and revenue growth achieved during recent years and our future success are based upon the following key competitive strengths:

Globally recognised brands built on a strong heritage

We believe that the strong heritage and global recognition of the Jaguar and Land Rover brands have helped us to achieve our solid operating performance in recent years and position us well to benefit from future growth opportunities. Founded in 1922, Jaguar has a long tradition of designing and manufacturing premium sports cars and saloons recognised for their design, engineering performance and a distinctive British style. The brand has a strong racing history, with Jaguar first winning the Le Mans race in 1951 and winning numerous racing titles since. Founded in 1948, Land Rover designs and manufactures vehicles known for their off-road capability, strength, durability and refinement. Land Rover’s brand identity is built around utility, reliability, refinement, luxury and, above all, its all-terrain capability. In Fiscal 2017 our brand Land Rover was included for the first time in Interbrand’s 100 most valuable brands.

Both our Jaguar and Land Rover brands are globally recognised as premium, class-leading and highly differentiated vehicles within their segments as evidenced by consumer demand, sales in approximately 121 and 131 markets, respectively, via independent franchises and, in our key markets, national sales companies as well as third-party importers. Please see “—Award-winning design capabilities and distinctive model line-ups” for further details on these awards.

Technical excellence with a strong focus on research and development

We develop and manufacture technologically advanced vehicles. For example, we are one of the industry leaders in aluminium body structures, which contribute to the manufacture of lighter vehicles with improved fuel and CO₂ efficiency and performance, while maintaining the body stiffness that customers in the premium segment demand. New vehicle models, such as the Range Rover Velar, are constructed with this lightweight aluminium vehicle architecture. We believe we are world leaders in aluminium recycling.

We believe we have industry-leading capabilities in all-terrain applications, such as Land Rover’s “terrain response system”, which is the all-terrain system that adjusts the performance of vital operating components of the vehicle to different driving and weather conditions. We also aim to be at the forefront of calibration and certification of emissions and fuel economy, with a number of emission-reducing technologies developed or under development, including stop-start technology as a standard feature, the 2.0-litre “in-house” Ingenium diesel and petrol engines and other engines to follow. In addition, we are developing improvements in aerodynamic drag-reducing technologies. We believe that we are also among the leading automobile manufacturers in the areas of powertrain application engineering and sound quality.

Our strategic priorities include autonomous, connected and electrification technologies, as well as investing in innovative mobility solutions to overcome and address future travel and transport challenges. Our autonomous strategy includes investing in driver assistance technologies to support increasing degrees of automation, and including autonomous features on our new models. Our connected strategy includes investing in technology and infrastructure to support higher levels of connectivity, as exemplified by our \$15 million investment in CloudCar Inc. Our electrification strategy is currently exemplified by the hybrid engines available on the Range Rover and Range Rover Sport, and will in the future expand to battery electric technologies (such as the I-PACE, on sale in 2018) and plug-in and mild hybrids starting in 2018. We plan to offer an electric drivetrain option on all of our new models by 2020. Furthermore, we are currently competing in the FIA

Formula E championship, which enables us to create a test bed for our future electrification technology with our partner Panasonic. Our InMotion Ventures business unit, focuses on developing innovative mobility solutions to overcome and address future travel and transport challenges, and invests in future transport and mobility solutions, including the \$25 million investment in Lyft.

For further details on our product design and research and development initiatives, please see “—Product Design, Technology and Research and Development”.

Award-winning design capabilities and distinctive model line-ups

We believe that our business is supported by award-winning design capabilities and distinctive model line-ups. Our two award-winning design teams, led by designers Ian Callum (Jaguar), winner of the Minerva Medal for his outstanding contribution to automotive design, and Gerry McGovern (Land Rover), have a distinguished track record of designing contemporary and elegant cars, while retaining the distinctive brand identity of both Jaguar and Land Rover.

The strength of our design capabilities and distinctive model line-ups has been widely validated by industry experts. Jaguar and Land Rover have collectively received 213 awards from leading international magazines and opinion leaders in Fiscal 2017.

The following table sets out certain awards received in 2016 and 2017, but is not exhaustive:

Award	Model	Awarding Institution	Date
Best Large Premium SUV	Land Rover Discovery	Auto Express	June 2017
Most Popular SUV (Second Year Running)	Land Rover Discovery Sport	Honest John	May 2017
World Car of the Year	Jaguar F-PACE	World Car Awards	April 2017
Women’s World Car of the Year	Jaguar F-PACE	World Car Awards	April 2017
World Car Design of the Year	Jaguar F-PACE	World Car Awards	April 2017
Best Saloon Car—(Mid-Full size)	Jaguar XF	Golden Steering Wheel Awards	November 2016
Sport Auto Award	Jaguar F-TYPE	Auto Motor Sport	October 2016
Compact SUV of the Year 2016	Jaguar F-PACE	Auto Express Awards	July 2016
SUV of the Year	Range Rover Evoque	Off Road Award—Off Road	June 2016
Best vehicle in “Sports car/ Coupé/ Roadster/ Convertible” category	Jaguar F-TYPE	Top 5 AUTO Ceremony	May 2016
Autocar Star Award	Range Rover Sport	Autocar	May 2016
Best Executive Car	Jaguar XE	UK Car of the Year Awards	March 2016
Saloon Car of the Year	Jaguar XF	Top Gear Magazine	March 2016
Best Large SUV	Jaguar F-PACE	Auto Illustrierte	February 2016
Best Premium SUV	Range Rover Evoque	Best Cars 2016—Motorpress	February 2016
Large SUV of the Year	Land Rover Discovery Sport	What Car?	January 2016
SME Company Car of the Year	Jaguar XE	SME Company Car of the Year Awards	January 2016
Best Buy Luxury	Range Rover	What Car?	January 2016

Jaguar has a long tradition of producing innovative automobiles exemplified by design icons such as the Jaguar E-TYPE. Today Jaguar’s entire product range is unified under a single design and concept language, upon which we intend to further develop our exclusive product portfolio. We believe that our design and concept language has helped, and will continue to allow Jaguar appeal to a wide audience. We also believe that Land Rover offers one of the most universally recognised, distinctive and successful model line-ups within the automotive industry.

Our product development process is highly structured with the aim of allowing us to respond quickly to new market trends and to leverage market opportunities. We run an annual product development process with regular management reviews and specific product cycle milestones. We believe that this is a key factor in our operational efficiency and has helped us to achieve our recent and on-going success through regular improvements and upgrades to our model line-up.

We have continued to strengthen our line-up with new model innovations and launches, such as the forthcoming Jaguar I-PACE, all-new Jaguar E-PACE, the new Range Rover Velar, all-new Land Rover Discovery, the Jaguar F-PACE,

the new Jaguar XF Sportbrake and the long wheel base Jaguar XFL (produced by our China Joint Venture for the Chinese Market). These new products, and others yet to be announced, are expected to support sales growth across wider vehicle segments. Please see “—Our Strategy—Grow the business through new products and market expansion to deliver sustainable returns”.

Global market presence through comprehensive and growing global sales and distribution and international manufacturing networks

We market and sell our vehicles through a global sales and distribution network designed to achieve geographically diversified sales and facilitate growth in key markets, including Europe (excluding the United Kingdom and Russia), North America, the United Kingdom, China and Overseas (including Brazil and Russia). Over the years, we have expanded our global sales and distribution network and achieved diversification of revenue beyond our historical core markets. Please see “—Sales and Distribution”.

Our success in established markets and strong brand recognition ensure that we are well positioned to capture sales growth in emerging markets. We believe the growth potential in emerging markets with growing affluent populations will counterbalance the expected lower rate of sales growth in more developed markets, and offers significant opportunities to further increase and diversify our sales volumes. Consequently, we are actively investing in our sales network outside of our major markets. We established a manufacturing joint venture in China with Chery which currently manufactures the Range Rover Evoque, Land Rover Discovery Sport and the long wheel base Jaguar XFL for the local market, to further support growth in China. Please see “—China Joint Venture”. In India, we opened an NSC to expand our presence in this key market. Currently, the Jaguar XJ, Jaguar XF, Jaguar XE, Range Rover Evoque and Land Rover Discovery Sport vehicles are manufactured for local sales at a facility operated by Tata Motors in Pune, India. In June 2016, the production of the Land Rover Discovery Sport and the Range Rover Evoque for local sales commenced at our manufacturing facility in Brazil. Please see “—Brazil Production Facility”. From time to time we establish presence in other markets according to our business needs.

Profitable growth and strong operating cash generation

We continue to profitably grow our business. Our revenue grew to £24,339 million and £5,559 million in Fiscal 2017 and the three months ended 30 June 2017 respectively, from £22,286 million and £5,355 million in Fiscal 2016 and the three months ended 30 June 2016, respectively, primarily as a result of higher sales volumes in both our Jaguar and Land Rover brands and the weaker British pound following Brexit. Further to our solid sales performance, we delivered EBITDA of £2,955 million in Fiscal 2017 and £442 million in the three months ended 30 June 2017, compared to £3,147 million in Fiscal 2016, and £672 million for the three months ended 30 June 2016. The year-on-year decrease in Fiscal 2017 EBITDA from Fiscal 2016 primarily reflected higher marketing, manufacturing and operating costs, partially offset by higher wholesales. The decrease in EBITDA in the three months ended 30 June 2017, as compared to the three months ended 30 June 2016, primarily reflects lower wholesale volumes, higher variable marketing expense and higher material and operating costs which more than offset favourable foreign exchange rates (weaker British pound). Please see “Operating and Financial Review and Prospects”.

Free cash flow was positive £141 million in Fiscal 2017 (positive £644 million in Fiscal 2016) driven by solid profits and positive working capital which funded total product and other investment spending of £3,438 million. In the three months ended 30 June 2017 free cash flow was negative £1,308 million (negative £661 million in the three months ended 30 June 2016), primarily reflecting lower profits offset by the pension past service credit, £995 million of total product and other investment spending as well as £733 million of negative working capital. The negative working capital movement was primarily driven by higher inventory and lower payables due to seasonality in sales and the launch of new models such as the all-new Land Rover Discovery and the Range Rover Velar. This is an increase from the negative working capital of £692 million in the three months ended 30 June 2016.

Experienced and highly qualified senior management team

We have a highly experienced and respected senior management team. Our senior management comprises senior automotive executives with extensive experience in the automotive industry. We believe that the experience, industry knowledge and leadership of our senior management team will help us implement our strategy described below and achieve further profitable growth.

Shareholder support

We benefit from strong and on-going support from our parent company Tata Motors, which is a member of the international conglomerate Tata Group. Tata Motors is the largest commercial vehicle manufacturer in terms of revenue in India and among the top six passenger vehicle manufacturers in terms of units sold in India during Fiscal 2017. It has also established a successful international presence as an automobile company through joint ventures and acquisitions such as the acquisition of the commercial vehicle business of Daewoo in 2004. On 2 June 2008, Tata Motors acquired the Jaguar Land Rover businesses from Ford, establishing its international presence in the premium market. Tata Motors group have manufacturing facilities and design and engineering centres in India, the United Kingdom, China, South Korea, Thailand, South Africa, Brazil and Indonesia.

We believe that we are of strategic importance to Tata Motors given that we represented approximately 78.7% of its net revenue for the three months ended 30 June 2017. Our Board includes three members who are also members of the board of directors of Tata Motors, namely Mr Natarajan Chandrasekaran, Professor Dr Ralf Speth and Mr Nasser Munjee. Tata Motors does not guarantee or assume any direct or indirect liability for the Notes.

Our Strategy

We have a multifaceted strategy to strengthen our position as a leading manufacturer of premium vehicles. Our success is tied to our commitment to high quality products, environmental innovation and putting the customer first and our strategic focus on capital expenditure, R&D and product design reflects this. Our strategy consists of the following key elements:

Grow the business through new products and market expansion to deliver sustainable returns

To mitigate the impact of high cyclical in the automobile industry and provide a foundation from which to invest in new products, designs and technologies in line with our overall strategy, we have strengthened our operations and gained a significant presence across a selected range of products and a wide diversity of geographic markets.

New products

One key component of this strategy, which has delivered positive results in recent years, is our focus on improving the mix of our products (by developing vehicles designed to increase our market segment penetration or market visibility). We offer products in the premium performance car and all-terrain vehicle segments, and we intend to grow the business by diversifying our product range within these segments. For instance, the Jaguar XE enables us to offer a product in the “C segment” of vehicles and compete against other premium auto manufacturers in this high-volume sector. The Jaguar F-PACE luxury SUV expands the brand’s presence and facilitates our ability to compete in new segments and also forms the basis of a new range of future Jaguars, such as the Jaguar E-PACE, a compact SUV that aims to complement and build on the F-PACE’s success over the past year. The Range Rover Velar is positioned between the Range Rover Sport and Range Rover Evoque, and is our first cross-brand Land Rover, built on the same lightweight aluminium architecture as the F-PACE.

In Fiscal 2017 and since the start of Fiscal 2018 to date, we reinforced our brand range with Jaguar F-PACE, long wheel base Jaguar XFL, the XF Sportbrake, Range Rover Velar and the all-new Land Rover Discovery. The Jaguar E-PACE, Jaguar’s new compact performance SUV, is scheduled to go on general retail sale in certain markets in late 2017.

Market expansion

Our strategy involves expanding our global footprint into geographic locations where we see opportunities to grow. As a producer of distinctive, premium products, we believe we are well positioned to increase our revenues in emerging affluent countries with growing sales potential. We also aim to leverage our relationship with Tata Motors and the synergies we can achieve in the areas of research and product development, supply sourcing, manufacturing and assembly and other operations. There are two specific aspects to our strategy of geographic expansion:

- ***Emerging markets:*** We aim to increase our marketing and dealer network in emerging markets. Please see “—Our Competitive Strengths—Global market presence through comprehensive and growing global sales and distribution and international manufacturing networks”.

- **Selected markets:** We aim to establish new manufacturing facilities, assembly points and suppliers in selected markets. For example, we are expanding our manufacturing and assembly lines at our China Joint Venture, where we have produced Range Rover Evoque since the end of 2014, the Land Rover Discovery Sport since September 2015 and the long wheel base Jaguar XFL, the third vehicle produced at the China Joint Venture, which went on sale in September 2016. Please see “—China Joint Venture”. Our manufacturing facility in Brazil opened in June 2016, where we currently produce the Land Rover Discovery Sport and the Range Rover Evoque for sale in the local Brazilian market. Please see “—Brazil Production Facility”. In July 2015, we agreed a manufacturing partnership with Magna Steyr, an operating unit of Magna International Inc., to build the Jaguar E-PACE and Jaguar I-PACE in Graz, Austria. In December 2015, we concluded an agreement with the Government of the Slovak Republic for the development of a new manufacturing plant in the city of Nitra in western Slovakia, which will commence production in 2018, starting with the Land Rover Discovery. In addition, the Jaguar XJ, Jaguar XF, Jaguar XE, Range Rover Evoque and Land Rover Discovery Sport are currently manufactured locally at a facility operated by Tata Motors in Pune, India and continue to explore manufacturing operations in other markets.

We also explore opportunities to source materials in a more cost-effective manner as well as sharing components across platforms in order to gain economies of scale and reduce engineering costs per vehicle. We believe that our strategy to enhance global sourcing by establishing a core trading division and by continuing to develop suppliers from countries with a lower cost base such as India and China. We also aim to increase the natural hedging of our substantial foreign currency exposures by developing low cost suppliers in markets to which we currently have substantial exposure, which can act as a complementary source of competitive advantage.

Grow the business through capital investments

We continue to focus on profitably growing our strong, globally recognised brands. In order to meet customer aspirations and regulatory requirements, we continue to invest in the United Kingdom and internationally, to further develop technologies and products, compete in new and existing segments and expand our manufacturing capacity. In the near and medium term, we expect our capital spending to be greater than our long term capital spending target of 10-12% of revenue in order to realise the present opportunities we see for growth.

Based on our continuing strong performance and cash and liquidity position, we plan to continue to increase capital investment to develop new products in new and existing segments, invest in new powertrains and technologies to meet customer and regulatory requirements, and increase our manufacturing capacity in the United Kingdom and internationally (i.e. China, Austria and Slovakia).

We continue to target funding most of our capital spending out of operating cash flow, but it is possible free cash flow could be negative in the near and medium term as we execute our growth strategy. We monitor the economic environment and market demand as we plan our future capital spending. We expect that our strong balance sheet, including total cash and cash equivalents and financial deposits of £4.1 billion and our recently refinanced, five year undrawn committed credit facility of £1.9 billion as at 30 June 2017, resulting in total liquidity of £6.0 billion, as well as proven access to funding from capital markets and banks, will also support our investment plans as required.

In Fiscal 2017, total product and other investment was £3,438 million (with 41.5% for R&D and 58.5% for expenditure on tangible fixed assets such as facilities, tools and equipment as well as investment in the manufacturing plant in Slovakia and other manufacturing sites). We estimate our capital spending will likely be in the region of £4 billion—£4.35 billion in Fiscal 2018 as we target an EBIT margin of 8-10% in the medium term. Our capital spending programme is primarily focused on expanding our manufacturing capacity, new product launches, product development and technology development including CO₂ emissions technology, autonomous, connected and electrification technologies and innovative mobility solutions to overcome and address future travel and transport challenges. The profitable growth in our sales, with a strong cash and liquidity position (as discussed under “Operating and Financial Review and Prospects—General Trends of Our Recent Performance”) has supported our capital spending strategy over recent years. Total cash at 31 March 2017 was £5,487 million (23% of revenue), comprising cash and cash equivalents of £2,878 million and £2,609 million of financial deposits, as compared to total cash of £4,651 million at the end of Fiscal 2016.

Continue to develop technologically advanced vehicles

Our strategy is to maintain and improve our competitive position by developing technologically advanced vehicles. Over the years, we have enhanced our technological strengths through extensive in-house R&D activities, particularly through our two advanced engineering and design centres, which centralise our capabilities in product design and

engineering. We are committed to continue investing in new technologies, including developing sustainable technologies to improve fuel economy and reduce CO₂ emissions. More recently, we have started developing autonomous, connected and electrification technologies, as well as investing in innovative mobility solutions to overcome and address future travel and transport challenges. We consider technological leadership to be a significant factor in our continued success, and therefore intend to continue to devote significant resources to upgrading our technological capabilities.

In line with this objective, we make early stage investments in automotive technology companies, and are involved in a number of advanced research consortia that bring together leading manufacturers, suppliers and academic specialists in the United Kingdom, supported by funding from the government's Technology Strategy Board. Please see "—Product Design, Technology and Research and Development".

Focus on environmental performance

Our strategy is to invest in products and technologies that position our products ahead of expected stricter environmental regulations and ensure that we benefit from a shift in consumer awareness of the environmental impact of the vehicles they drive. We focus on maintaining strong environmental performance and we aim on improving local environmental standards. Our environmental vehicle strategy focuses on new propulsion technology, weight reduction and reducing parasitic losses through the driveline. We have developed diesel hybrid versions of the Range Rover and Range Rover Sport, without compromising the vehicles' off-road capability or load space.

We are a global leader in the use of aluminium and other lightweight materials to reduce vehicle weight and improve fuel and CO₂ efficiency, and we believe we are ahead of many of our competitors in the implementation of aluminium construction. For example, the Jaguar XE is the only vehicle in its class to use an aluminium-intensive monocoque. We plan to continue to build on this expertise and extend the application of aluminium construction as we develop a range of new Jaguar and Land Rover products. The aluminium body architecture introduced on the Jaguar XE is used in the new Jaguar F-PACE and Range Rover Velar. The all-new Land Rover Discovery uses the same lightweight architecture as the Range Rover and Range Rover Sport.

We are also developing more efficient powertrains and other technologies. This includes smaller and more efficient Ingenium 2.0-litre diesel and petrol engines, stop-start and hybrid engines, used across many of our products. Our lighter vehicles such as the Range Rover and Range Rover Sport Diesel Hybrid, powered by downsized and more efficient engines and alternative powertrains have all contributed to the improvement of our carbon footprint.

Our current product line-up is the most efficient it has ever been and the environmental performance of our vehicles has been further improved through our new models. The all-new Land Rover Discovery uses lightweight aluminium construction which saves 480 kg compared to the old model, delivering enhanced efficiency and reduced CO₂ emissions. The new aluminium-intensive Jaguar XE is the most fuel-efficient Jaguar and the first Jaguar Land Rover vehicle to receive a UK VED Band A rating resulting in a £0/annum tax rate. The aluminium-intensive XF delivers improved fuel consumption CO₂ emission performance. Our in-house 2.0-litre Ingenium diesel and petrol engines provide significant CO₂ reductions versus the outgoing powertrains.

Recognising the need to use resources responsibly, produce less waste and reduce our carbon footprint, we are also taking measures to reduce emissions, waste and the use of natural resources in all of our operations. In the United Kingdom, we have a goal of zero waste and carbon neutral manufacturing operations by 2020, in other markets we aspire for similar targets but some of the locations do not have the capability to support our goals. In such situations we aim to improve the local market and capacity for zero waste and carbon neutral manufacturing operations.

Continue to improve vehicle quality

We recognise the importance of superior vehicle quality and have implemented programmes, both internally and at our suppliers' operations, focused on improving the quality of our products, enhancing customer satisfaction and reducing our future warranty costs. We undertake a variety of internal and external benchmarking exercises, such as competitor vehicle teardown, market testing and internal comparative analysis across our own vehicles, which help us to identify cost improvement opportunities for our components, systems and sub-systems. We have also established a procedure for ensuring quality control of outsourced components, and products purchased from approved sources undergo a supplier quality improvement process. Reliability and other quality targets are built into our new product introduction process.

Assurance of quality is further driven by the design team, which interacts with downstream functions like process-planning, manufacturing and supplier management to ensure quality in design processes and manufacturing. We believe our extensive sales and service network has also enabled us to provide quality and timely customer service. Through close coordination supported by our IT systems, we monitor quality performance in the field and implement corrections on an ongoing basis to improve the performance of our products.

History of Our Group

The following list of events in chronological order presents the key milestones in our Group's history.

- 1922 (Jaguar) Swallow Side Car Company founded
- 1948 (Land Rover) First Land Rover was produced in Solihull by the Rover Car Company
- 1961 (Jaguar) Launch of E-TYPE
- 1967 (Land Rover) Land Rover becomes part of Leyland Motors, later British Leyland
- 1968 (Jaguar) XJ Model debut
- 1970 (Land Rover) Range Rover introduced as the first genuinely multipurpose vehicle
- 1989 (Jaguar) Jaguar acquired by Ford
(Land Rover) Launch of Discovery
- 1997 (Land Rover) Freelander launched
- 1999 (Jaguar—Ford) Launch of S-TYPE
- 2000 (Land Rover) Land Rover acquired by Ford
- 2005 (Land Rover) Range Rover Sport launched
- 2006 (Jaguar) Launch of the all-aluminium XK
- 2008 Tata Motors acquired Jaguar Land Rover Limited and Land Rover from Ford Motor Company
(Jaguar) Launch of XF which was unveiled at the 2007 Frankfurt Motor Show
- 2011 (Land Rover) Launch of Range Rover Evoque
- 2012 (Jaguar) Launch of F-TYPE which was unveiled at the 2011 Frankfurt Motor Show
- 2014 (Land Rover) Launch of Discovery Sport
Opening of the new engine manufacturing facility in Wolverhampton
Opening of the China Joint Venture automotive manufacturing facility in China
- 2015 (Jaguar) Launch of XE which was unveiled at the 2014 Geneva Motor Show
- 2016 (Jaguar) Launch of F-PACE
Opening of the new manufacturing facility in Brazil
(Jaguar) I-PACE was unveiled at the 2016 Los Angeles Motor Show
- 2017 (Land Rover) Launch of all-new Discovery
(Land Rover) Launch of Range Rover Velar
(Jaguar) Launch of E-PACE

Our Vehicles

Jaguar designs, develops and manufactures a range of premium cars recognised for their design, performance and quality. Jaguar's range of products comprises the Jaguar F-TYPE two-seater sports car coupé and convertible (including all-wheel drive derivatives), the Jaguar F-PACE luxury performance SUV (which uses the same lightweight aluminium intensive architecture as the Jaguar XE and the Jaguar XF), the lightweight Jaguar XF and XF Sportbrake, the Jaguar XJ saloon and the Jaguar XE sports saloon. The Jaguar F-PACE went on sale in April 2016. The Jaguar E-PACE, our compact SUV will go on general retail sale certain markets in late 2017. On 14 November 2016, we unveiled the Jaguar I-PACE Concept, our first all-electric vehicle at the 2016 Los Angeles Motor Show. The Jaguar I-PACE is a five seater sports car powered by a 90kWh battery, providing an estimated range of 500km (NEDC cycle) and rapid charging in two hours, and twin-electric motors delivering all-wheel-drive performance, accelerating to 60 mph in around four seconds. We expect the Jaguar I-PACE will go on sale in the second half of 2018.

For retail and wholesale unit sales by vehicle model, please see “—Product Sales Performance—Sales Performance by Vehicle Model”. For the most recent awards that our Jaguar vehicles have received, please see “—Our Competitive Strengths—Award-winning design capabilities and distinctive model line-ups”.

- **Jaguar F-TYPE:** The Jaguar F-TYPE represents a return to the company's original designs and is available as two-seater sports car coupé and convertible. The Jaguar F-TYPE has an all-aluminium structure and combines enhanced technology with the power of Jaguar's latest 3.0-litre V6 and 5.0-litre V8 petrol engines. We began selling the Jaguar F-TYPE convertible and F-TYPE coupé in April 2013 and April 2014,

respectively, and all-wheel drive and manual transmission derivatives were introduced at the Los Angeles Motor Show in November 2014.

- **Jaguar XE:** In March 2014, Jaguar announced the name of its all-new mid-size premium sports sedan as the Jaguar XE which was formally launched in London in September 2014. The Jaguar XE went on general retail sale in May 2015 and later in North America in May 2016. The Jaguar XE was the first Jaguar Land Rover product to be built on the new aluminium-intensive architecture, powered by Jaguar's 3.0-litre V6 petrol and 2.0-litre four cylinder "in-house" diesel engines with a 2.0-litre GTDI petrol derivative also available.
- **Jaguar XJ:** The Jaguar XJ is our largest luxury saloon vehicle, powered by a range of supercharged and naturally aspirated 5.0-litre V8, 3.0-litre V6 and 2.0-litre GTDI petrol engines as well as a 3.0-litre TDV6 diesel engine. Using Jaguar's aerospace-inspired aluminium body architecture, the Jaguar XJ's lightweight aluminium body provides improved agility, fuel and CO₂ efficiency. In July 2017, our Special Vehicle Operations produced the Jaguar XJR 575, our most powerful Jaguar XJ ever produced with a supercharged 5.0-litre V8 engine.
- **Jaguar XF:** The Jaguar XF, launched in 2008, is a premium executive car that merges sports car styling with the sophistication of a luxury saloon. In 2009, a new engine line-up was introduced into the Jaguar XF and in 2011, a major restyling of the exterior was completed, whilst the Jaguar XF Sportbrake joined the model line-up in 2012. The current lightweight Jaguar XF, which utilises the same aluminium-intensive technology as the Jaguar XE, made its debut at the New York Motor Show in April 2015 and retail sales began in September 2015. The all-new Jaguar XF is powered by the same engine as the Jaguar XE as well as the 3.0-litre TDV6 diesel available in the Jaguar XJ. A long wheel base Jaguar XF (the XFL) was launched by our China Joint Venture in Fiscal 2017 and the new Jaguar XF Sportbrake was launched in Fiscal 2018.
- **Jaguar F-PACE:** The Jaguar F-PACE, launched in September 2015, went on general retail sale in April 2016. The Jaguar F-PACE is built on the same lightweight aluminium-intensive architecture as the Jaguar XE and the Jaguar XF and is powered by a range of petrol and diesel engines, including the 3.0-litre V6 380 PS supercharged petrol engine and the new 2.0-litre four cylinder 180 PS turbocharged diesel "in-house" engine, which can achieve 57.7 mpg and CO₂ emissions as low as 129g/km.
- **New Jaguar E-PACE:** The Jaguar E-PACE, revealed to the public in June 2017, will go on general retail sale certain markets in late 2017. The Jaguar E-PACE is a compact SUV that aims to complement and build on the Jaguar F-PACE's success over the past year. The Jaguar E-PACE is based on the same underlying architecture as the Land Rover Discovery Sport, and will be equipped with our full range of four cylinder Ingenium engines. The Jaguar E-PACE will be initially built vehicles in Graz, Austria by our manufacturing partnership with Magna Steyr. We also plan to produce the Jaguar E-PACE at our China Joint Venture for the Chinese market.
- **Forthcoming Jaguar I-PACE:** The Jaguar I-PACE, our first all-electric vehicle, was unveiled at the 2016 Los Angeles Motor Show and will go on sale in the second half of 2018. The Jaguar I-PACE is a five seater sports car powered by a 90kWh battery, providing an estimated range of 500km (NEDC cycle) and rapid charging in two hours, and twin electric motors delivering all-wheel drive performance, accelerating to 60 mph in around four seconds. The Jaguar I-PACE will be built in Graz, Austria by our manufacturing partnership with Magna Steyr.

Land Rover designs, develops and manufactures premium all-terrain vehicles that aim to differentiate themselves from the competition by their capability, design, durability, versatility and refinement. Land Rover's range of products comprises the Range Rover, Range Rover Sport, Range Rover Velar, Range Rover Evoque, Land Rover Discovery and the Land Rover Discovery Sport. Production of the Land Rover Defender was discontinued in January 2016.

For retail and wholesale unit sales by vehicle model, please see "—Product Sales Performance—Sales Performance by Vehicle Model". For the most recent awards that our Land Rover vehicles have received, please see "—Our Competitive Strengths—Award-winning design capabilities and distinctive model line-ups".

- **Range Rover:** The Range Rover is the flagship product under the Land Rover brand with a unique blend of British luxury, classic design, high-quality interiors and outstanding all-terrain ability. The aluminium-intensive Range Rover was launched in the third quarter of Fiscal 2013 and was the world's first SUV with a

lightweight aluminium body, resulting in enhanced performance and handling on all terrains, which also led to significant advances in environmental performance compared to previous models. A long wheel based version went on sale in March 2014 and the long wheel based hybrid Range Rover made its global debut at the Beijing Motor Show in April 2014, which is the first diesel SUV of its kind. The Range Rover is powered by a family of 3.0-litre V6 and 5.0-litre V8 petrol engines as well as a 3.0-litre V6 diesel engine, 4.4-litre V8 diesel, and a including a hybrid version, with a plug-in hybrid model to go on sale later this year.

- **Range Rover Sport:** The Range Rover Sport combines the performance of a sports tourer with the versatility of a Land Rover. In March 2013, soon after the Range Rover, we introduced the all-aluminium Range Rover Sport to the market. The Range Rover Sport is the fastest, most agile and responsive Land Rover to date due to the same all-aluminium architecture as the Range Rover. The Range Rover Sport is powered by the same engine family as the Range Rover, including a hybrid version, with a plug-in hybrid model to go on sale later this year.
- **New Range Rover Velar:** The Range Rover Velar launched in April 2017 and went on retail sale in the United Kingdom and Europe in July 2017, with worldwide sales underway in September 2017. Powered by our line-up of V6 and 4-cylinder Ingenium engines, the Range Rover Velar fills in Land Rover's product offering between the Range Rover Sport and Range Rover Evoque, and is our first cross-brand Land Rover, being built on the same lightweight aluminium intensive architecture as the Jaguar F-PACE.
- **Range Rover Evoque:** Launched in 2011, the Range Rover Evoque is the smallest and lightest Range Rover to date, available in 5-door and coupé body styles and, depending on the market, in both front-wheel drive and all-wheel drive configurations. Local production by our China Joint Venture of the Range Rover Evoque for the Chinese market started at the end of 2014 and the Range Rover Evoque went on sale in February 2015. The production of the Range Rover Evoque for the other markets is primarily conducted in our manufacturing plant in Halewood, UK, alongside the Land Rover Discovery Sport. The 2016 Model Year Range Rover Evoque premiered at the Geneva Motor Show in March 2015, benefitting from a refreshed exterior design and the introduction of our 2.0-litre "in-house" diesel engine. In addition, the Range Rover Evoque Convertible made its debut at the Los Angeles Motor Show in November 2015 and went on sale in June 2016.
- **Land Rover Discovery Sport:** The Land Rover Discovery Sport was digitally revealed at Spaceport America in New Mexico on 3 September 2014 and was shown at the Paris Motor Show in October 2014. It is the first member of the new Land Rover Discovery family featuring 5+2 seating in a footprint no larger than existing 5-seat premium SUVs and went on sale in February 2015. Local production by our China Joint Venture of the Land Rover Discovery Sport for the Chinese market started in September 2015 and went on sale in November 2015. The production of the Land Rover Discovery Sport for the other markets is primarily conducted in our manufacturing plant in Halewood, UK, alongside the Range Rover Evoque.
- **All-new Land Rover Discovery:** Production of the Land Rover Discovery 4 ceased in August 2016 and in September 2016 the all-new Land Rover Discovery was revealed to the public. The fifth-generation Land Rover Discovery benefits from Land Rover's light full-size SUV architecture also utilised on the Range Rover and Range Rover Sport, and retains 7 seat flexibility. The all-new Land Rover Discovery incorporates a range of new technological features, notably the world's first Intelligent Seat Fold technology, allowing customers to reconfigure the second and third-row seats with minimal effort using controls at the rear of the vehicle, the central touchscreen or remotely via a smartphone application as part of our InControl Touch Pro Services. The all-new Land Rover Discovery will be powered by a range of engines, including the 2.0-litre Ingenium four cylinder diesel, 3.0 litre TDV6 diesel and 3.0 litre V6 petrol with our Special Vehicle Operations' Land Rover Discovery SVX powered by a supercharged 5.0-litre V8 engine.

We plan to continue to build on recent successful product launches such as the fifth generation Land Rover Discovery, Range Rover Velar and Jaguar XF Sportbrake and focus on upcoming launches such as the Jaguar E-PACE, Jaguar I-PACE and other vehicles yet to be announced.

Product Sales Performance

Retail volumes in Fiscal 2017 (including sales through our China Joint Venture) were 604,009 units compared to 521,571 units in Fiscal 2016, an increase of 82,438 units, equivalent to an annual growth rate of 15.8%. The growth in Jaguar retail sales has come from demand for new products such as the Jaguar F-PACE, with total Jaguar sales of 172,848 units in

Fiscal 2017. This has been supported by growth of sales of the Jaguar XE and Jaguar XF. The increase in Land Rover retail volumes has been primarily driven by the Land Rover Discovery Sport sales of 126,152 units in Fiscal 2017, up 30,263 units or 31.6% from Fiscal 2016. In terms of geographical markets, we have experienced growth in retail volumes in our major markets in Fiscal 2017 with growth rates of 31.6% in China (up to 125,207), 24.0% in North America (up to 123,527), 16.2% in United Kingdom (up to 124,755) and 13.1% in Europe (up to 141,043). In Overseas our sales decreased by 5.5% to 89,477. Higher sales are primarily attributable to the launch of the Jaguar F-PACE and growth of the Land Rover Discovery Sport. Stronger sales in China and North America were also driven by the launch of the Jaguar XF (including the XFL) and the Jaguar XE, respectively.

In addition, we have continued to launch new models and derivatives during Fiscal 2017 and the three months ended 30 June 2017, such as the Jaguar F-PACE, Range Rover Velar and all-new Land Rover Discovery. This growth has continued into the three months ended 30 June 2017, with retail volumes up 3.5% compared to the same period in Fiscal 2017 as a result of the introduction of ramp up of the Jaguar F-PACE as well as continued strong sales of the Jaguar XF and Range Rover.

Sales Performance by Vehicle Model

We analyse our sales performance by vehicle model for each of the Jaguar and Land Rover brands, respectively. Retail volumes refer to the aggregate number of finished vehicles sold by dealers to end users. We consider retail volumes the best indicator of consumer demand for our vehicles and the strength of our brand. Wholesale volumes refer to the aggregate number of finished vehicles sold to dealers and importers. We recognise our revenue on the wholesale volumes we sell.

The table below presents Jaguar retail (including sales through our China Joint Venture) and wholesale (excluding sales through our China Joint Venture) unit sales by vehicle model for Fiscal 2016 and Fiscal 2017 and the three months ended 30 June 2016 and 2017:

	Retail Units				Wholesale Units ⁽²⁾			
	Fiscal year ended 31 March		Three months ended 30 June		Fiscal year ended 31 March		Three months ended 30 June	
	2016	2017	2016	2017	2016	2017	2016	2017
Jaguar								
F-PACE	13	67,955	9,467	17,648	1,722	76,147	13,406	17,763
F-TYPE	11,839	10,777	2,703	2,737	12,563	10,856	3,041	1,954
XJ	11,735	11,489	2,540	2,431	12,230	10,065	2,508	3,037
XF	34,182	37,157	7,886	9,592	36,197	25,557	6,855	3,524
XK ⁽¹⁾	228	1	1	—	147	7	1	—
XE	36,452	45,469	9,209	8,858	39,247	46,652	8,761	6,359
Total	94,449	172,848	31,806	41,266	102,106	169,284	34,572	32,637

(1) Production of the XK, except for certain special editions, ceased in July 2014, with retail sales phased out.

(2) The wholesale volumes from our China Joint Venture are excluded. For Fiscal 2017 and the three months ended 30 June 2017, Jaguar XF volumes produced by our China Joint Venture were 9,467 units and 5,086 units, respectively.

The table below presents Land Rover retail (including sales through our China Joint Venture) and wholesale (excluding sales through our China Joint Venture) unit sales by vehicle model sales for Fiscal 2016 and 2017 and the three months ended 30 June 2016 and 2017:

	Retail Units				Wholesale Units ⁽³⁾			
	Fiscal year ended 31 March		Three months ended 30 June		Fiscal year ended 31 March		Three months ended 30 June	
	2016	2017	2016	2017	2016	2017	2016 ⁽¹⁾	2017
Land Rover								
Range Rover	59,974	57,480	12,362	14,062	60,123	56,299	12,720	13,508
Range Rover Sport	86,915	89,746	20,583	19,903	90,267	87,494	20,093	18,954
Range Rover Evoque	110,533	114,373	25,763	24,813	91,683	97,444	21,936	21,159
Range Rover Velar ⁽¹⁾	—	—	—	112	—	—	—	1,752

	Retail Units				Wholesale Units ⁽³⁾			
	Fiscal year ended 31 March		Three months ended 30 June		Fiscal year ended 31 March		Three months ended 30 June	
	2016	2017	2016	2017	2016	2017	2016 ⁽¹⁾	2017
Defender ⁽²⁾	22,504	1,380	740	—	20,209	422	160	28
Discovery.....	51,072	42,023	12,387	9,272	53,741	37,587	12,393	11,732
Freelander ⁽²⁾	235	7	2	—	1,385	199	141	3
Discovery Sport.....	95,889	126,152	29,110	28,035	89,820	86,017	18,753	18,143
Total	427,122	431,161	100,947	96,197	407,228	365,462	86,196	85,279

(1) Range Rover Velar went on sale in July 2017.

(2) Production of the Freelander and the Land Rover Defender has been discontinued.

(3) Wholesale volumes exclude our China Joint Venture volumes (consisting of locally produced Range Rover Evoque and Land Rover Discovery Sport). Range Rover Evoque and Land Rover Discovery Sport volumes produced by our China Joint Venture for the year ended 31 March 2016 were 34,751 units and 56,593 units in the year ended 31 March 2017. For the three months ended 30 June 2016 and 2017 Range Rover Evoque and Land Rover Discovery Sport volumes produced by our China Joint Venture were 13,558 units and 15,474 units, respectively.

Sales Performance by Region

The following table provides an analysis of the Group's regional wholesale and retail volumes by region for the three months ended 30 June 2016 and the three months ended 30 June 2017:

	Retail					
	Jaguar Three months ended 30 June			Land Rover Three months ended 30 June		
	2016	2017	Change	2016	2017	Change
	(units)		(%)	(units)		(%)
Global	31,806	41,266	29.7%	100,947	96,197	(4.7)%
Regional:						
United Kingdom.....	7,898	7,229	(8.5)%	19,021	15,854	(16.7)%
North America.....	6,641	10,431	57.1%	17,925	17,962	0.2%
Europe (excluding the United Kingdom and Russia).....	9,370	8,569	(8.5)%	24,181	24,967	3.3%
China.....	3,532	10,327	>99%	22,194	23,187	4.5%

<i>China Joint Venture (excluded above)</i>	—	5,086	N/A	13,558	15,474	14.1%

The following is a discussion of industry-wide trends and our performance in our key markets. References to “passenger car sales” refer to sales of passenger cars on an industry-wide basis (including our and our competitors’ sales) in each relevant market. For more information about our use of market data, please see “Industry and Market Data”.

- **Europe (excluding the United Kingdom and Russia):** In the three months ended 30 June 2017, passenger car sales in Europe increased by 2.9%. Over the same period, our retail volumes in Europe (excluding the United Kingdom and Russia) were flat, at 33,536 units in the three months ended 30 June 2017 from 33,551 units in the three months ended 30 June 2016, with Jaguar down by 8.5% and Land Rover increasing by 3.3%. Our combined European wholesale volumes (excluding the United Kingdom and Russia) decreased by 11.9% to 31,281 units in the three months ended 30 June 2017 from 35,515 units in the three months ended 30 June 2016, with Jaguar down by 24.5% and Land Rover decreasing by 7.2%.
- **North America:** Passenger car sales in the United States has decreased by 2.9% in the three months ended 30 June 2017 compared to the three months ended 30 June 2016. Over the same period, our North American retail volumes increased by 15.6% to 28,393 units from 24,566 units in the three months ended 30 June 2016, with Jaguar up by 57.1% and Land Rover up by 0.2%. Our North American wholesale volumes decreased slightly by 0.8% to 29,438 units in the three months ended 30 June 2017 from 29,681 units in the three months ended 30 June 2016, with Jaguar down 14.9% whereas Land Rover was up by 5.2%.
- **United Kingdom:** Passenger car sales in the United Kingdom decreased by 10.3% in the three months ended 30 June 2017 compared to the three months ended 30 June 2016. Over the same period, our retail volumes in the United Kingdom decreased by 14.3% to 23,083 units from 26,919 units in the three months ended 30 June 2016, with Jaguar down by 8.5% and Land Rover down by 16.7%. Our wholesale volumes in the United Kingdom increased by 13.8% to 25,841 units in the three months ended 30 June 2017 from 22,711 units in the three months ended 30 June 2016, with Jaguar up by 28.7% and Land Rover up by 7.6%.
- **China:** In China, new passenger car sales decreased by 1.0% in the three months ended 30 June 2017, compared to the three months ended 30 June 2016. Our retail volumes (including sales from our China Joint Venture) increased by 30.3% over the same period to 33,514 units from 25,726 units in the three months ended 30 June 2016, with Jaguar up by more than 99% and Land Rover up by 4.5%. Our Chinese wholesale volumes (excluding sales from our China Joint Venture) increased by 7.6% to 13,700 units in the three months ended 30 June 2017 from 12,737 units in the three months ended 30 June 2016, with Jaguar up by 12.1% for the period and Land Rover up by 4.7%.
- **Overseas:** Passenger car sales in Overseas markets increased by 6.4% in the three months ended 30 June 2017, as compared to the corresponding period in 2016. Our retail volumes decreased by 13.9% to 18,937 units in the three months ended 30 June 2017 from 21,991 units in the three months ended 30 June 2016, with Jaguar up by 7.9% whereas Land Rover was down 19.3%. Our Overseas wholesale volumes decreased by 12.3% to 17,656 units in the three months ended 30 June 2017 from 20,124 units in the three months ended 30 June 2016, with Jaguar down 17.0% whereas Land Rover was down 10.9%.

Industry Dynamics

Factors Affecting Demand in our Industry

Both the general global automotive industry and the premium and luxury brand segment are affected by a variety of economic and political factors, which may be interrelated. Some of these factors are described below:

- **Global economic conditions:** Consumer demand for passenger automobiles is affected by global economic conditions, which in turn affect consumers’ disposable income, purchasing power and the availability of credit to consumers.
- **Fuel prices:** Increasing fuel prices generally reduce demand for larger and less fuel-efficient cars, while lower fuel prices generally support demand for larger vehicles and reduce the focus on fuel-efficiency.
- **Prices of vehicles:** Demand for vehicles is affected by the price at which manufacturers are able to market and sell their vehicles. Sale prices in turn depend upon a number of factors, including, among other things, the price of key inputs, such as raw materials and components, the cost of labour and competitive pressures.

- **Taxes and duties:** The level of taxes that are levied on the sale and ownership of vehicles is another key factor. Taxes are generally levied at the time of purchase of vehicles, at the time of import, in the case of import duties, or as on-going taxes on vehicle ownership, road tax duties and taxes on fuel. In general, higher taxes decrease consumer demand for vehicles.
- **Customer preferences:** Customer preferences and trends in the market change, which in turn affects demand for specific vehicle categories and specific offerings within each vehicle category.
- **Technology:** Technological differentiation among automotive manufacturers is a significant competitive factor as fuel prices, environmental concerns, the demand for innovative products and other customer preferences encourage technological advances in the automotive industry.

Compared to the broader passenger car market, the luxury car market is also driven by prestige, aesthetic considerations, appreciation of performance and quality, in addition to factors such as utility and cost of ownership, which are key considerations in the broader car market.

Competition

We operate in a globally competitive environment and face competition from established premium and other vehicle manufacturers that aspire to move into the premium performance car and premium SUV markets, some of which are much larger than we are. Jaguar vehicles compete primarily against other European brands such as Audi, BMW, Porsche and Mercedes-Benz. Land Rover and Range Rover vehicles compete largely against SUVs manufactured by Audi, BMW, Infiniti, Lexus, Mercedes-Benz, Porsche and Volkswagen. The Land Rover Defender competes with vehicles manufactured by Toyota, Nissan, Mitsubishi and Isuzu.

Seasonality

Our industry is affected by the biannual change in age-related registration plates of vehicles in the United Kingdom, where new age-related plate registrations take effect in March and September. This has an impact on the resale value of the vehicles because sales are clustered around the time of the year when the vehicle registration number change occurs. Seasonality in most other markets is driven by introduction of new model year vehicles and derivatives. Furthermore, Western European markets tend to be impacted by summer and winter holidays, and the Chinese market tends to be affected by the Lunar New Year holiday in either January or February, the PRC National Day holiday and the Golden Week holiday in October. The resulting sales profile influences operating results on a quarter-to-quarter basis.

Product Design, Technology and Research and Development

We develop and manufacture technologically advanced vehicles to meet the requirements of a globally competitive market. We devote significant resources in our R&D activities. Our R&D operations currently consist of a team of approximately 400 engineers, operating within a co-managed Jaguar and Land Rover engineering group, sharing premium technologies, powertrain designs and vehicle architecture. Our vehicles are designed and developed by award-winning design teams, and we are committed to a continuing programme of new product design. In recent years, we have unified the entire Jaguar range under a single design and concept language and have continued to enhance the design of Land Rover's range of all-terrain vehicles. All of our products are designed and engineered in the United Kingdom.

We have modern safety test facilities for testing and developing new products. These include a pedestrian safety testing facility, a pendulum impact test facility and a gravity-powered impact rig for occupant protection and vehicle structural development. We also have two full vehicle semi-anechoic chambers for developing reductions in vehicle-based noise and vibration levels and engine testing facilities for developing and certifying exhaust emissions to a wide range of international regulatory standards.

Our product design and development centres are equipped with computer-aided design, manufacture and engineering tools, with sophisticated hardware, software and other IT infrastructure to create a digital product development environment and virtual testing and validation, aiming to reduce the product development cycle time and data management. Rapid prototype development systems, testing cycle simulators, advanced emission test laboratories and styling studios are also a part of our product development infrastructure. We have aligned our end-to-end digital product development objectives and infrastructure with our business goals and have made significant investments to enhance the digital product development capabilities especially in the areas of product development through computer-aided design, computer aided manufacturing, computer-aided engineering, knowledge-based engineering and product data management.

In September 2013, we announced our investment in the National Automotive Innovation Campus at the University of Warwick in the United Kingdom, which is expected to open in 2018 and focus on advanced technology, innovation and research. The campus is expected to feature engineering workshops and laboratories, advanced powertrain facilities and advanced design, visualisation and rapid prototyping and help complement our existing product development centres. We work with Intel at the Open Software Technology Center in Portland, Oregon in the United States to develop next-generation in-vehicle technologies, helping us enhance our future vehicle infotainment systems and provide incubator space for budding automotive technology entrepreneurs.

Lightweighting and fuel economy

We are pursuing various initiatives, such as our Premium Lightweight Architecture (PLA), first applied to the Range Rover launched in September 2012, to enable our business to comply with existing and evolving emissions legislation in our sales markets, which we believe will be a key enabler of both reduction in CO₂ and further efficiencies in manufacturing and engineering. In recent years, we have made significant progress in reducing most of our development cycle times.

Our R&D activities are currently strongly concentrated on creating a sustainable fleet CO₂ emissions profile for 2020 and beyond. Although we are already a leader in the use of aluminium for weight reduction, we have active research projects and partnerships aimed at enhancing the use of carbon fibre and mixed material in order to create the lightweight, high performance vehicles of the future in a sustainable way.

Autonomous and connected technologies

Our future strategic R&D priorities include autonomous, connected and electrification technologies, as well as investing in innovative mobility solutions to overcome and address future travel and transport challenges. Our autonomous strategy includes investing in driver assistance technologies to support increasing degrees of automation, and including autonomous features on our new models. Our connected strategy includes investing in technology and infrastructure to support higher levels of connectivity, as exemplified by our \$15 million investment in CloudCar Inc., initiatives in vehicle electronics such as engine management systems, in-vehicle network architecture, telematics for communication and tracking and other emerging technological areas are also being pursued and which could possibly be deployed on our future range of vehicles. In April 2016, we demonstrated highly autonomous vehicle technologies to the EU Transport Ministers, such as “hands free” driving. Furthermore, our new connected and autonomous vehicle technologies are being developed through projects such as the United Kingdom’s first “connected corridor”, a 41 mile “living laboratory” where we concentrate on installing new roadside communications equipment in order to test vehicle-to-vehicle and vehicle-to-infrastructure systems. In addition, we are deploying intelligent navigation and information systems (including remotely controlled climate settings and security) and in-car Wi-Fi connectivity, which we plan to supplement with the expansion of the usability of remote function applications and the inclusion of wearable technology solutions such as smart-watch technology currently available with the F-PACE. Likewise, various new technologies and systems that would improve safety, performance and emissions of our product range are under implementation on our passenger cars and commercial vehicles.

Electrification technologies

Our electrification strategy is currently exemplified by the hybrid engines available on the Range Rover and Range Rover Sport, and will in the future expand to battery electric technologies (such as the I-PACE, on sale in 2018) and plug-in and mild hybrids starting in 2018. We plan to offer an electric drivetrain option on all of our new models by 2020. In order to increase overall vehicle efficiency, we also have active research programmes in the areas of aerodynamics, parasitic and hotel loads, insulation and energy harvesting in order to develop electric and plug-in hybrid technology for future products. We also have an on-going research programme to address the challenge of low-carbon energy storage by developing technology and competency in this area. Although this programme covers a number of technologies, it is primarily focused on creating high energy density lithium-ion batteries in order to create battery assemblies that are compatible with our vehicles and to gain an understanding of the chemistries and battery management processes that will make electric vehicles a viable choice in the medium to long term. Furthermore, we are currently competing in the FIA Formula E championship, which enables us to create a test bed for our future electrification technology with our partner Panasonic.

Because we believe that internal combustion also has a significant part to play, we also engage in powertrain research with the aim of improving the efficiency of base engine and transmission technology to improve fuel combustion. This research is supplemented by exploration into the area of low carbon sustainable fuels and the challenges of using this technology in modern, high power density engines.

Shared technologies

Our InMotion Ventures business unit, focuses on developing innovative mobility solutions to overcome and address future travel and transport challenges, and invests in future transport and mobility solutions, including the \$25 million investment in Lyft. With the aim of providing prompt service to the customer, we have commenced development of an enterprise-level vehicle diagnostics system for achieving speedy diagnostics of the complex electronics in modern vehicles. The initiative in telematics has also further spanned into fleet management and vehicle tracking systems using Global Navigation Satellite Systems, or GNSS.

Special Operations

In June 2014, we announced a Special Operations business unit, which comprises Special Vehicle Operations, Classic, Personalisation and Branded Goods divisions.

Our Special Vehicle Operations division focuses on the creation of iconic or “halo” vehicles that showcase the highest standards of performance, luxury and all-terrain capability, including the limited-edition Jaguar F-TYPE Project 7 and the Range Rover Sport SVR as well as specific vehicles for certain campaigns such as the three vehicles featuring in the James Bond movie “SPECTRE”. These vehicles have unique branding and are targeted towards our most discerning and devoted customers. Recently, they have produced the Range Rover SVAutobiography – the most powerful Range Rover ever built, the XJR 575 and Discovery SVX, each with a supercharged 5.0-litre V8 engine, and the F-TYPE SVR, packed with industry leading technology and premium quality interior materials.

We have also created a Classics division which announced the re-creation of six original Jaguar E-TYPE vehicles from 1963 and 1964 into new Jaguar Lightweight E-TYPE vehicles. In Fiscal 2017, our Classics division rebuilt the “lost nine” XKSS cars from the mid-1950s, each of which sold for in excess of £1 million. In September 2017 our Classics division unveiled the E-TYPE Zero concept, a fully electrified conversion of the original E-TYPE, with improved performance. The Classics division intends to deliver further high-end vehicle re-creations, maintenance and renovation. The Classics division is based at Browns Lane, the historical home of Jaguar car manufacturing. This division also provides Classic parts, servicing our growing Jaguar Land Rover Classic customer base globally.

To support our Special Operations activities, we invested approximately £20 million in a Special Vehicle Operations Technical Centre in Prologis Park, Ryton, near Coventry. Within this facility, our Personalisation division enables our customers to create their own bespoke specifications and has commenced operations from the third quarter of Fiscal 2016.

Our Branded Goods business unit is responsible for delivering merchandising and licensing arrangements with selected partners, for example, the existing clothing collaboration between Land Rover and Barbour.

Properties and Facilities

We operate three principal manufacturing facilities and an engine manufacturing centre (“EMC”) in the United Kingdom employing approximately 21,200 employees as at 30 June 2017. We believe that these facilities provide us with a flexible manufacturing footprint to support our present product plans.

- **Solihull:** At Solihull, we produce the all-new Land Rover Discovery, Range Rover and Range Rover Sport as well as the Jaguar F-PACE. The new Range Rover Velar is also produced at Solihull. At Solihull, we employed approximately 11,800 manufacturing employees as at 30 June 2017.
- **Castle Bromwich:** At Castle Bromwich, we produce the Jaguar XJ, XF, XE and F-TYPE and employed approximately 3,600 manufacturing employees as at 30 June 2017.
- **Halewood:** At Halewood, we produce the Range Rover Evoque as well as the Land Rover Discovery Sport and employed approximately 4,500 manufacturing employees as at 30 June 2017.
- **Wolverhampton:** At Wolverhampton, we produce advanced technology low-emission engines. This facility produces our range of “in-house” four cylinder diesel and petrol engines, and employed approximately 1,250 manufacturing employees as at 30 June 2017. We expect that this engine facility will reduce our dependence on third-party engine supply agreements and strengthen and expand our engine range to deliver high-performance, competitive engines with significant reductions in vehicle emissions. The EMC supplies our

manufacturing facilities in the UK with engines which power the Jaguar F-PACE, XE, XF, the Range Rover Sport, Range Rover Velar, Range Rover Evoque, the Land Rover Discovery and the Land Rover Discovery Sport. We currently produce the 2.0-litre four cylinder diesel and petrol engines of Ingenium family at the EMC, which are now available across a range of our vehicles. The common architecture of the Ingenium family has been designed to allow for flexible manufacturing between variants and configurations. We intend to double the size of the facility as part of a £450 million expansion programme over the next few years, bringing our total investment in the EMC to £1 billion.

In addition to our facilities in Solihull, Castle Bromwich and Halewood, we are pursuing investments in the following automotive manufacturing facilities:

- **United Kingdom:** At Prologis Park in Ryton, near Coventry, we have established a Special Vehicle Operations Technical Centre with an investment of approximately £20 million. The facility is Jaguar Land Rover's global centre of excellence for the creation of high-end luxury bespoke commissions and extreme performance vehicles by a team of 500 Jaguar Land Rover specialists. Vehicles such as the Jaguar F-TYPE Project 7 have been created by Special Operations and customer deliveries of limited edition models have begun.

As part of our Special Operations division, Jaguar's Classic workshop at Browns Lane in Coventry offers restoration and servicing of customers' classic cars and has built nine new Jaguar XKSSs, each assigned one of the chassis destroyed in a historic fire, originally allocated in the 1950s to the 25-car project.

- **China:** We also entered into a joint venture agreement in December 2011 with Chery for the establishment of a joint venture company in China to develop, manufacture and sell certain Jaguar Land Rover vehicles and at least one own-branded vehicle in China. Production of the Range Rover Evoque began at the end of 2014 and sales commenced in February 2015. Production of the Land Rover Discovery Sport started in September 2015 and sales commenced in November 2015. This was followed by the long wheel base Jaguar XF (the XFL) for which sales commenced in September 2016. The plant has a production capacity of 130,000 vehicles per year. Please see "—China Joint Venture".
- **Brazil:** In December 2013, we signed an agreement with the State of Rio de Janeiro in Brazil to invest approximately £240 million in a new production plant, with an annual capacity of 24,000 vehicles. The plant opened in June 2016 and the production of the Land Rover Discovery Sport and the Range Rover Evoque has now commenced. Please see "—Brazil Production Facility".
- **Austria:** In July 2015, we agreed to a manufacturing partnership with Magna Steyr, an operating unit of Magna International Inc., to build vehicles in Graz, Austria starting with the Jaguar E-PACE and continuing with the Jaguar I-PACE.
- **Slovakia:** In December 2015, we concluded an agreement with the Government of the Slovak Republic for the development of a new manufacturing plant in the city of Nitra in western Slovakia with an initial capacity of 150,000 vehicles which will manufacture a range of all new aluminium Jaguar Land Rover vehicles with the all-new Land Rover Discovery expected to be produced in late 2018. The manufacturing facility represents an investment of £1 billion with potential further investment of £500 million to increase the capacity of the facility to 300,000 vehicles per year over the next ten years.

In addition to our automotive manufacturing facilities, we have two product development, design and engineering facilities in the United Kingdom. The facility located at Whitley houses the design centre for Jaguar, the engineering centre for our powertrain, and other test facilities and our global headquarters, including our commercial and central staff functions. The facility located at Gaydon is the design centre for Land Rover and the vehicle engineering centre, and includes an extensive on-road test track and off-road testing capabilities. The two sites employed approximately 14,650 employees as at 30 June 2017.

In addition to our manufacturing, design/engineering and workshop facilities in the United Kingdom, we have property interests throughout the world (including in major cities) for limited manufacturing and repair services as well as sales offices for national or regional sales companies and facilities for dealer training and testing. We consider all of our principal manufacturing facilities and other significant properties to be in good condition and adequate to meet the needs of our operations. We believe that there are no material environmental issues that may affect our utilisation of these assets.

The following table sets out information with respect to our principal facilities and properties as at 30 June 2017.

Location	Owner/Leaseholder	Freehold/Leasehold	Principal Products or Functions
United Kingdom			
Solihull.....	Land Rover	Freehold	Automotive vehicles & components
Castle Bromwich	Jaguar Land Rover Limited	Freehold and leasehold	Automotive vehicles & components
Halewood.....	Jaguar Land Rover Limited	Freehold and leasehold	Automotive vehicles & components
Gaydon.....	Land Rover	Freehold	Product development
Whitley	Jaguar Land Rover Limited	Freehold	Headquarters and product development
Wolverhampton	Jaguar Land Rover Limited	Freehold	Automotive components (engines)
Outside United Kingdom			
Changshu, China.....	Chery Jaguar Land Rover Automotive Co., Ltd.	Freehold and leasehold ⁽¹⁾	Product development, automotive vehicles & components
Rio De Janeiro, Brazil.....	Jaguar Land Rover Brazil	Freehold	Automotive vehicles & components

(1) Chery Jaguar Land Rover Automotive Co., Ltd. owns the facility (including buildings and equipment) in freehold but leases the underlying land from the Chinese government.

China Joint Venture

In December 2011, we entered into a joint venture agreement with Chery for the establishment of a joint venture company in China. The purpose of our China Joint Venture is to develop, manufacture and sell certain Jaguar Land Rover vehicles and at least one own-branded vehicle in China. Local production of the Range Rover Evoque by our China Joint Venture began at the end of 2014 and local sales commenced in February 2015. Production of the Land Rover Discovery Sport started in September 2015, which went on sale in November 2015 followed by the long wheel base Jaguar XF (the XFL) which went on sale in September 2016. Production of the Jaguar E-PACE is planned to commence in 2018. A Chinese engine plant was opened in July 2017 to manufacture the Ingenium 2.0-litre petrol engine for installation in locally produced vehicles.

We have committed to invest CNY3.5 billion of equity capital in our China Joint Venture, representing 50% of the share capital and voting rights of our China Joint Venture, of which CNY2.9 billion has been contributed as at 30 June 2017. Investment to support phase two, which will add additional manufacturing capacity, will be supported by further capital injections from us and Chery. The term of the joint venture is 30 years (unless terminated or extended). The joint venture agreement contains representations and warranties, corporate governance provisions, non-compete clauses, termination provisions and other provisions that are arm's length in nature and customary in similar manufacturing joint ventures. The Chinese government approved the joint venture in October 2012, and we obtained a business license for the joint venture in November 2012.

Our China Joint Venture has invested a total of CNY10.9 billion, which is being funded at the outset through a combination of debt and equity, in connection with the joint venture, which includes a manufacturing plant in Changshu, an R&D centre and an engine production facility. We believe the joint venture combines our heritage and expertise with Chery's knowledge of, and expertise in, the local Chinese market.

Our China Joint Venture plant and the Chinese engine plant each have a production capacity of 130,000 vehicles per year.

Brazil Production Facility

In December 2013, we signed an agreement to invest approximately £240 million into a production facility in Rio de Janeiro in Brazil. The construction of the premium vehicle manufacturing facility began in December 2014 and the facility

was opened in June 2016. The new plant produces the Land Rover Discovery Sport and the Range Rover Evoque and has a capacity to build 24,000 vehicles annually for the Brazilian market.

Sales and Distribution

We distribute our vehicles in approximately 121 markets across the world for Jaguar and approximately 131 markets across the world for Land Rover. Sales locations for our vehicles are operated as independent franchises. We are represented in our key markets through NSCs as well as third-party importers. Jaguar and Land Rover have regional offices in certain select countries that manage customer relationships and vehicle supplies and provide marketing and sales support to their regional importer markets. The remaining importer markets are managed from the United Kingdom.

Our products are sold through a variety of sales channels: through our dealerships for retail sales; for sale to fleet customers, including daily rental car companies; commercial fleet customers; leasing companies; and governments. We do not depend on a single customer or small group of customers to the extent that the loss of such a customer or group of customers would have a material adverse effect on our business. Recently, we have begun using virtual reality technology to allow our customers around the world to see some new products before these become available locally.

As at 30 June 2017, our global sales and distribution network comprises 21 NSCs, 81 importers in 95 importer markets and 1,571 franchise sales dealers, of which 1,172 are joint Jaguar and Land Rover dealers.

Financing Arrangements and Financial Services Provided

We have entered into arrangements with third-party financial service providers to make vehicle financing available to our customers covering our largest markets by volume, including notably the United States, the United Kingdom, Europe and China. We do not offer vehicle financing on our own account but rather through a series of exclusive partnership arrangements with market-leading banks and finance companies in each market, including Black Horse (part of the Lloyds Banking Group) in the United Kingdom, FCA Bank S.p.A. (a joint venture between Fiat Auto and Credit Agricole) in Europe (excluding Russia), and Chase Auto Finance in the United States and have similar arrangements with local providers in a number of other key markets.

We typically sign a medium-term service level agreement with our strategic partners for the provision of retail finance, retail leasing and dealer wholesale financing. The financial services are supplied by our partners in accordance with a number of specifications involving, among others, product development, pricing, speed of delivery and profitability. These arrangements are managed in the United Kingdom by a team of our employees, which is responsible for ensuring on-going compliance with the standards and specifications agreed with our partners. For wholesale financing, we typically provide an interest-free period to cover an element of the dealer network-stocking period. We work closely with our finance partners to maximise funding lines available to dealers in support of our business objectives.

Because we do not offer vehicle financing on our own account, we have no balance sheet exposure to vehicle financing other than a limited number of residual value risk-sharing arrangements in North America and Germany. The finance partner funds the portfolio and, in most cases, assumes the credit and residual value risks that arise from the portfolio. Profit-sharing agreements are in place with each partner, and they are typically linked to the volume growth of new business and the return on equity generated from the portfolio.

Employees

We consider our human capital to be a critical factor to our success and we have drawn up a comprehensive human resource strategy that addresses key aspects of human resource development. In line with our human resources strategy, we have implemented various initiatives in order to build better organisational capability that we believe will enable us to sustain competitiveness in the global marketplace.

The following table sets out a breakdown of persons employed by us by type of contract.

	As at	
	31 March 2017	30 June 2017
Salaried	16,126	16,663
Hourly	17,574	17,419
Total permanent.....	33,700	34,082

	As at	
	31 March 2017	30 June 2017
Agency.....	6,565	6,775
Total.....	40,265	40,857

As at 30 June 2017, we employed 40,857 employees worldwide, including agency personnel. Of the 40,857 employees, approximately 3,217 were employed overseas. Hourly paid employees are hired as agency workers for the first 12 months and then move onto a fixed-term contract for a further 12 months, before being hired as permanent employees.

Training and Development

We are committed to building the competencies of our employees and improving their performance through training and development. We identify gaps in our employees' competencies and prepare employees for changes in competitive environments, as well as to meet organisational challenges.

The focus areas in training in the last year have centred on leadership, innovation management and internationalisation, as well other training programmes designed to drive a change in our employees' outlook as we develop as a global competitor. Developmental initiatives for our senior leadership were held through international programmes at various institutions.

Union Wage Settlements

We have generally enjoyed cordial relations with our employees at our factories and offices. Most of our manufacturing shop floor workers and approximately half of our salaried staff in the United Kingdom are members of a labour union. Trade unions are not recognised for management employees.

Employee wages are paid in accordance with wage agreements that have varying terms (typically two years) at different locations. Bi-annual negotiations in relation to these wage agreements, which cover approximately 20,000 of our unionised employees, were concluded in November 2016. Please see "Risk Factors—Risks Associated with Our Business—We may be adversely affected by labour unrest".

Intellectual Property

We create, own and maintain a wide array of intellectual property assets that we believe are among our most valuable assets throughout the world. Our intellectual property assets include patents and patent applications related to our innovations and products, trademarks related to our brands and products, copyrights in creative content, designs for aesthetic features of products and components, trade secrets and other intellectual property rights. We aggressively seek to protect our intellectual property around the world.

We own a number of patents registered, and have applied for new patents which are pending registration, in the United Kingdom and in other strategically important countries worldwide. We obtain new patents through our on-going research and development activities. We own registrations for a number of trademarks and have pending applications for registration in the United Kingdom and abroad. The registrations mainly include trademarks for our vehicles.

Additionally, perpetual royalty-free licences to use other essential intellectual properties have been licensed to us for use in Jaguar and Land Rover vehicles. Jaguar and Land Rover own registered designs to protect the design of certain vehicles in several countries. In relation to the EuCD platform, Ford owns the intellectual property but we are not obliged to pay any royalties or charges for its use in Land Rover vehicles manufactured by us.

Suppliers, Components and Raw Materials

The principal materials and components required by us for use in our vehicles are steel and aluminium in sheet (for in-house stamping) or externally pre-stamped form, aluminium castings and extrusions, iron/steel castings and forgings, and items such as alloy wheels, tyres, fuel injection systems, batteries, electrical wiring systems, electronic information systems and displays, leather-trimmed interior systems such as seats, cockpits, doors, plastic finishers and plastic functional parts, glass and consumables (paints, oils, thinner, welding consumables, chemicals, adhesives and sealants) and fuels. We also require certain highly functional components such as axles, engines and gear boxes for our vehicles, which are mainly

manufactured by strategic suppliers. We have long-term purchase agreements for critical components such as transmissions (ZF Friedrichshafen) and engines (Ford and Ford-PSA). The components and raw materials in our cars include steel, aluminium, copper, platinum and other commodities. We have established contracts with certain commodity suppliers (e.g., Novelis) to cover our own and our suppliers' requirements to mitigate the effect of high volatility. Special initiatives are also undertaken to reduce material consumption through value engineering and value analysis techniques.

We work with a range of strategic suppliers to meet our requirements for parts and components, and we endeavour to work closely with our suppliers to form short- and medium-term plans for our business. We have established quality control programmes to ensure that externally purchased raw materials and components are monitored and meet our quality standards. We also outsource many of the manufacturing processes and activities to various suppliers. Where this is the case, we provide training to the outside suppliers who design and manufacture the required tooling and fixtures. Such programmes include site engineers who regularly interface with suppliers and carry out visits to supplier sites to ensure that relevant quality standards are being met. Site engineers are also supported by persons in other functions, such as programme engineers who interface with new model teams as well as resident engineers located at our plants, who provide the link between the site engineers and the plants. We have in the past worked, and expect to continue to work, with our suppliers to optimise our procurements, including by sourcing certain raw materials and component requirements from low-cost countries.

Although we have commenced production of our own "in-house" four cylinder (2.0-litre) engines which were first installed in the Jaguar XE from 2015, at present we continue to source a significant number of our engines, including V6 and V8 engines, from Ford or the joint venture between Ford and PSA on an arm's-length basis. Supply agreements have been entered into with Ford as further set out below:

- Long-term agreements have been entered into with Ford for technology sharing and joint development providing technical support across a range of technologies focused mainly around powertrain engineering such that we may continue to operate according to our existing business plan. This includes the EuCD platform, a shared platform consisting of shared technologies, common parts and systems and owned by Ford, which is shared among Land Rover, Ford and Volvo Cars.
- Supply agreements, aligned to the business cycle plan and having end-stop dates to December 2020 at the latest, were entered into with Ford Motor Company for (i) the long-term supply of engines developed by Ford, (ii) engines developed by us but manufactured by Ford and (iii) engines developed by the Ford-PSA joint venture. Purchases under these agreements are generally denominated in euro and pounds sterling.

Insurance

We have global insurance coverage which we consider to be reasonably sufficient to cover normal risks associated with our operations and insurance risks (including property, business interruption, marine and product/general liability) and which we believe is in accordance with commercial industry standards.

We have also taken insurance coverage on directors' and officers' liability to minimise risks associated with international litigation.

Incentives

We benefit from time to time from funding from regional development banks and government support schemes and incentives.

Legal Proceedings

In the normal course of our business, we face claims and assertions by various parties. We assess such claims and assertions and monitor the legal environment on an on-going basis, with the assistance of external legal counsel wherever necessary. We record a liability for any claims where a potential loss is probable and capable of being estimated, and disclose such matters in our financial statements, if material. Where potential losses are considered possible, but not probable, we provide disclosure in our financial statements, if material, but we do not record a liability in our accounts unless the loss becomes probable.

On 24 May 2017 the European Commission opened an investigation into (i) whether the government of Slovakia's plan to grant €125 million to us for investing in our Slovakian manufacturing facility is in line with European Union rules on

state aid, (ii) possible aid in the form of exemption from a fee payable under Slovakian law at the removal of land from the “agricultural land fund” before land is transformed into industrial land, and (iii) possible aid in the form of transfer of the land for our Slovakian manufacturing facility at below market value. The European Commission has yet to publish a summary of its investigation. We believe that Slovakia has complied with the European Union state aid rules in all its interactions with us.

There are various claims against us, the majority of which pertain to motor accident claims and consumer complaints. Some of the cases also relate to replacement of parts of vehicles and/or compensation for deficiency in services provided by us or our dealers.

We are not aware of any governmental, legal or arbitration proceedings (including the claims described above and any threatened proceedings of which we are aware) which, either individually or in the aggregate, would have a material adverse effect on our financial condition, results of operations or cash flow.

Other Taxes and Dues

During the year ended 31 March 2015 our Brazilian subsidiary received a demand for 167 million Brazilian real (£40 million at 30 June 2017 exchange rates) in relation to additional indirect taxes (PIS and COFINS) claimed as being due on local vehicle and parts sales made in 2010. Recently, a final hearing has been held on this matter and has confirmed that we have no liability.

Significant Environmental, Health, Safety and Emissions Issues

Our business is subject to increasingly stringent laws and regulations governing environmental protection, health, safety (including vehicle safety) and vehicle emissions, and increasingly stringent enforcement of these laws and regulations. We monitor environmental requirements in respect of both our production facilities and our vehicles, and have plans to reduce the average CO₂ emissions of our vehicle fleet through the introduction of sustainable technologies, including modular lightweight vehicle architectures, smaller and more fuel-efficient SUVs and development of technologies that use hybrid and alternative fuels. While we have plans to reduce emissions, the risk remains that constantly evolving legislation in this area may impose requirements in excess of currently planned actions and consumers may demand further fuel-efficiency and reduction in emissions. Please see “Risk Factors—Risks Associated with the Automotive Industry—New or changing laws, regulations and government policies regarding improved fuel economy, reduced greenhouse gas and other emissions, and vehicle safety may have a significant effect on how we do business”.

Environmental, health and safety regulation applicable to our production facilities

As an automobile company, our production facilities are subject to extensive governmental regulations regarding, among other things, air emissions, wastewater discharges, accidental releases into the environment, human exposure to hazardous materials, the storage, treatment, transportation and disposal of hazardous materials and wastes, the clean-up of contamination and the maintenance of safe conditions. These regulations are likely to become more stringent and compliance costs may be significant. In addition, we have significant sales in the United States and Europe which have stringent regulations relating to vehicular emissions. The proposed tightening of vehicle emissions regulations by the European Union will require significant costs of compliance for us. While we are pursuing various technologies in order to meet the required standards in the various countries in which we operate, the costs of compliance with these required standards can be significant to our operations and may adversely impact our results of operations.

Greenhouse gas/CO₂/fuel economy legislation

Current legislation in Europe limits passenger car fleet average greenhouse gas emissions to 130 grams of CO₂ per kilometre for all new cars from 2015. Different targets apply to each manufacturer based on their respective fleets of vehicles and average weight. We have received a permitted derogation from the weight-based target requirement available to small volume and niche manufacturers. As a result, we are permitted to reduce our emissions by 25% from 2007 levels rather than meeting a specific CO₂ emissions target. Jaguar Land Rover had an overall 2015 target of an average of 178.0 grams of CO₂ per kilometre for our full fleet of vehicles registered in the EU that year, with Jaguar Land Rover and Tata Motors monitored as a single “pooled” entity for compliance with this target (for Jaguar Land Rover alone, this would be 179.8 g/km). Our fleet delivered 164 grams of CO₂ per kilometre, well below the mandated target.

The European Union has regulated target reductions for 95% of a manufacturer’s full fleet of new passenger cars registered in the EU in 2020 to average 95 grams of CO₂ per kilometre, rising to 100% in 2021. The new rule for 2020

contains an extension of the niche manufacturers' derogation and permits us to reduce our emissions by 45% from 2007 levels, which enables us to have an overall target of 130 grams of CO₂ per kilometre. With the rapid growth of our sales, there is a risk that we may exceed the 300,000 unit niche manufacturers' derogation volume threshold before 2020. All cycle plans are now structured to achieve the non-derogated CO₂ target.

In the United States, both CAFE standards and greenhouse gas emissions standards are imposed on manufacturers of passenger cars and light trucks. The NHTSA has set the federal CAFE standards for passenger cars and light trucks to meet an estimated combined average fuel economy level of 35.5 miles per US gallon for 2016 model year vehicles. Meanwhile, the United States Environmental Protection Agency, ("EPA"), and NHTSA issued a joint rule to reduce the average greenhouse gas emissions from passenger cars, light trucks and medium-duty passenger vehicles for model years 2012-16 to 250 grams of CO₂ per mile, approximately 6.63L/100km or 35.5 miles per US gallon if the requirements were met only through fuel economy standards. The United States federal government extended this programme to cars and light trucks for model years 2017 through 2025, targeting an estimated combined average emissions level of 243 grams of CO per mile in 2017 and 163 grams per mile in 2025, which is equivalent to 54.5 miles per gallon if achieved exclusively through fuel economy standards. In addition, many other markets either have or will shortly define similar greenhouse gas emissions standards, including Brazil, Canada, China, the European Free Trade Association, India, Japan, Mexico, Saudi Arabia, South Korea and Switzerland.

Although California is empowered to implement more stringent greenhouse gas emissions standards, it has, so far, elected to accept the existing U.S. federal standards for compliance with the state's own requirements. The California Air Resources Board enacted regulations that deem manufacturers of vehicles for model years 2012 through 2016 that were in compliance with the EPA greenhouse gas emissions regulations to also be in compliance with California's greenhouse gas emission regulations. In November 2012, the California Air Resources Board accepted the federal standard for vehicles with model years 2017-25 for *compliance with the state's own* greenhouse gas emission regulations.

However, California is moving forward with other stringent emission regulations for vehicles, including the Zero Emission Vehicle regulation, ("ZEV"), which requires manufacturers to increase their sales of zero emissions vehicles year-on-year, up to an industry average of 22% of vehicles sold in the state by 2025. The precise sales required in order to meet a manufacturer's obligation in any given model year depend on the size of the manufacturer and the level of technology sold (for example, transitional zero emission technologies, such as plug-in hybrids, can account for at least a proportion of a manufacturer's obligation, but these technologies earn compliance credits at a different rate from pure zero-emissions vehicles). Other compliance mechanisms are available under ZEV, such as banking and trading of credits generated through the sale of eligible vehicles.

We are fully committed to meeting these standards and technology deployment plans incorporated into cycle plans are directed at achieving these standards. These plans include the use of lightweight materials, including aluminium, which will contribute to overall lighter vehicles, thereby improving fuel-efficiency, reducing parasitic losses through the driveline and improvements in aerodynamics. The plans also include the development and installation of smaller and more efficient engines in our existing vehicles and other drivetrain efficiency improvements, including the use of eight-speed or nine-speed transmissions in some of our vehicles. We continue to introduce smaller vehicles such as the Jaguar XE, our most fuel-efficient Jaguar yet and to continue lightening new models as demonstrated with the aluminium construction of the all-new Land Rover Discovery. The technology deployment plans also include the research, development and deployment of hybrid-electric vehicles. These technology deployment plans require significant investment. Local excise tax initiatives are a key consideration in ensuring our products meet customer needs for environmental footprint and cost of ownership concerns as well as continued access to major city centres (such as London and Paris' Ultra Low Emission Zones and similar low emissions areas being contemplated in other major urban centres).

Non-greenhouse gas emissions legislation

The European Union has adopted Euro 6, the latest in a series of more stringent standards for emissions of other air pollutants from passenger and light commercial vehicles, such as nitrogen oxide, carbon monoxide, hydrocarbons and particulates. These standards will be tightened again by the Euro 6d Temp standard, which incorporates the introduction of Real Driving Emissions, ("RDE"), as a complement to laboratory testing to measure compliance. As a first step, manufacturers will be required to reduce the discrepancy between laboratory compliance values and RDE procedure values to a conformity factor of a maximum of 2.1 (110%) for new models by September 2017 for passenger cars and by September 2018 for light commercial vehicles. Following that, manufacturers will be required to reduce this discrepancy to a conformity factor of a maximum of 1.5 (50%) by January 2020 for new models of passenger cars and by January 2021 for new models of light commercial vehicles. We currently use urea selective catalytic reduction systems for the current Euro 6d Temp, which allows us to adjust the dosing to achieve lower NO_x emissions, giving us greater flexibility than other manufacturers who

adopted lean NO_x trap technology. For Euro 6d Final we plan to develop our powertrains, control systems and after treatment systems to deliver even lower real world NO_x emissions.

In September 2017 and 2018 there was a move to the new Worldwide harmonised Light vehicles Test Procedure, (“WLTP”), in Europe (other markets will follow) to address global concerns on more customer correlated fuel economy certified levels as well as air quality concerns. All programmes are being fully engineered to enable the adoption of these new requirements. We are also accelerating some of these initiatives to improve RDE ahead of the mandated timing.

In California, the Low-Emission Vehicle regulations and the recently adopted LEV3 regulations, as well as the state’s ZEV regulations, place ever-stricter limits on emissions of particulates, nitrogen oxides, hydrocarbons, organics and greenhouse gases from passenger cars and light trucks. These regulations require ever-increasing levels of technology in engine control systems, on-board diagnostics and after treatment systems affecting the base costs of our powertrains. California’s LEV3 and ZEV regulations cover model years 2015 to 2025. Additional stringency of evaporative emissions also requires more-advanced materials and joints solutions to eliminate fuel evaporative losses, all for much longer warranty periods (up to 150,000 miles in the United States).

In addition, in April 2014, the Tier 3 Motor Vehicle Emission and Fuel Standards issued by the EPA were finalised. With Tier 3, the EPA has established more stringent vehicle emissions standards broadly aligned to the CARB LEV3 standards for 2017 to 2025 model year vehicles. The EPA made minor amendments to these Tier 3 standards in January 2015.

While Europe and the United States lead the implementation of these emissions programmes, other nations and states typically follow on with adoption of similar regulations two to four years thereafter. For example, China’s Stage IV targets a national average fuel consumption of 5.0L/100km by 2021. In response to severe air quality issues in Beijing and other major Chinese cities, the Chinese government also intends to adopt more stringent emissions standards.

To comply with the current and future environmental norms, we may have to incur substantial capital expenditure and R&D expenditure to upgrade products and manufacturing facilities, which would have a material and adverse impact on our cost of production and results of operations.

Noise legislation

The European Commission adopted new rules, which apply to new homologations from July 2016, to reduce noise produced by cars, vans, buses, coaches and light and heavy trucks. Noise limit values would be lowered in two steps of each two A-weighted decibels for vehicles other than trucks, and one A-weighted decibel in the first step and two in the second step for trucks. Compliance would be achieved over a ten-year period from the introduction of the first phase.

Vehicle safety legislation

Our products are certified in all markets in which they are sold and compliance is achieved through vehicle certification in respective countries. Many countries use, and in many instances adopted into their own regulatory frameworks, the regulations and technical requirements provided through the United Nations Economic Commission for Europe (UN-ECE) series of vehicle regulations.

Vehicles sold in Europe are subject to vehicle safety regulations established by both the European Union and by individual Member States, if any. In 2009, the European Union enacted a new regulation to establish a simplified framework for vehicle safety, repealing more than 50 existing directives and replacing them with a single regulation aimed at incorporating relevant United Nations standards. Following the incorporation of the United Nations standards commenced in 2012, the European Commission requires new model cars to have electronic stability control systems and has introduced regulations relating to low-rolling resistance tyres, tyre pressure monitoring systems and requirements for heavy vehicles to have advanced emergency braking systems and lane departure warning systems. The new safety requirements came into force from November 2014 for all new vehicles sold in the EU market. The new mandatory measures include safety belt reminders, electric car safety requirements, easier child seat anchorages, tyre pressure monitoring systems and gear shift indicators.

NHTSA issues federal motor vehicle safety standards covering a wide range of vehicle components and systems such as airbags, seatbelts, brakes, windshields, tyres, steering columns, displays, lights, door locks, side impact protection and fuel systems. We are required to test new vehicles and equipment and assure their compliance with these standards before selling them in the United States. We are also required to recall vehicles found to have defects that present an unreasonable risk to safety or which do not conform to the required Federal Motor Vehicle Safety Standards, and to repair

them without charge to the owner. The financial cost and impact on consumer confidence of such recalls can be significant depending on the repair required and the number of vehicles affected. We have no investigations relating to alleged safety defects or potential compliance issues pending before NHTSA.

These standards add to the cost and complexity of designing and producing vehicles and equipment. In recent years, NHTSA has mandated, among other things:

- a system for collecting information relating to vehicle performance and customer complaints, as well as data from foreign recalls to assist in the early identification of potential vehicle defects as required by the Transportation Recall Enhancement, Accountability, and Documentation (TREAD) Act; and
- enhanced requirements for frontal and side impact, including a lateral pole impact.

In December 2016, NHTSA announced that it was conducting an investigation into reports of rollaways of parked vehicles in certain of our models. We are working with NHTSA to support their investigations regarding powered vehicle rollaway.

On 22 June 2017, we filed a noncompliance report after determining that approximately 126,127 Jaguar vehicles do not fully comply with United States Federal Motor Vehicle Safety Standard (FMVSS) No. 135, Light Vehicle Brake Systems, as the brake fluid warning statement label on the subject vehicles is not permanently affixed as required. Instead, we installed a label that fits over the neck of the brake fluid reservoir that can be removed when the brake fluid reservoir cap is removed. On 20 July 2017, we petitioned the NHTSA for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety for the following reasons, among others:

1. The installed label will not fall off or become displaced during normal vehicle use or operation.
2. The installed label is only able to be removed when the brake fluid reservoir cap is displaced which, based on routine maintenance schedules, is once every 3 years in service.
3. We have not received any customer complaints on this issue.
4. There have been no accidents or injuries as a result of this issue.
5. Vehicle production has been corrected to fully conform, with a new filler cap.

While vehicle safety regulations in Canada are similar to those in the United States, many other countries have requirements different from those in the United States. The differing requirements among various countries create complexity and increase costs such that the development and production of a common product that meets the country regulatory requirements of all countries is not possible. Global Technical Regulations, (“GTRs”), developed under the auspices of the United Nations, continue to have an increasing impact on automotive safety activities, as indicated by EU legislation. In 2008, GTRs on electronic stability control, head restraints and pedestrian protection were each adopted by the United Nations World Forum for the Harmonisation of Vehicle Regulations, and are now in different stages of national implementation. While global harmonisation is fundamentally supported by the automobile industry in order to reduce complexity, national implementation may still introduce subtle differences into the system.

BOARD OF DIRECTORS AND SENIOR MANAGEMENT

Board of Directors

The Issuer is a public limited company incorporated under the laws of England and Wales. The business address of the directors and senior management of the Issuer is Abbey Road, Whitley, Coventry CV3 4LF, United Kingdom.

The following table provides information with respect to members of our board of directors as at the date of this Offering Memorandum:

Name	Position	Date of Birth	Year appointed as Director, Chief Executive Officer or Secretary
Natarajan Chandrasekaran	Non-Executive Director and Chairman	2 June 1963	2017
Professor Dr Ralf D. Speth	Chief Executive Officer and Director	9 September 1955	2010
Nasser Mukhtar Munjee.....	Non-Executive Independent Director	18 November 1952	2012
Chandrasekaran Ramakrishnan.....	Non-Executive Director	27 June 1955	2013
Andrew M. Robb	Non-Executive Independent Director	2 September 1942	2009

Set out below is a short biography of each of the members of our board of directors.

Natarajan Chandrasekaran (Non-Executive Director and Chairman): Mr Chandrasekaran is Chairman of the Board of Tata Sons, the holding company, and promoter of more than 100 Tata operating companies, including Tata Motors, Tata Power and Tata Consultancy Services – of which he was Chief Executive from 2009 – 2017. He joined the Tata Sons Board in October 2016 and was appointed Chairman in January 2017.

Professor Dr Ralf D. Speth (Chief Executive Officer and Director): Professor Dr Ralf Speth has been Chief Executive Officer and Director at Jaguar Land Rover Automotive plc since February 2010. Prior to this he was Head of Global Operations at the international industrial gases and engineering company, the Linde Group. Professor Dr Speth started his career at BMW, leaving after 20 years to join the Ford Motor Company’s Premier Automotive Group. Dr Speth holds a Doctorate of Engineering from the University of Warwick.

Nasser Mukhtar Munjee (Non-Executive Independent Director): Mr Munjee was appointed to the board of directors of Tata Motors Limited with effect from 27 June 2008 and was appointed to the board of directors of Jaguar Land Rover on 2 February 2012. He is also on the Board of Tata Chemicals and is Chairman of Tata Motor Finance. He is Chairman of DCB Bank and is also on the Board of several international companies operating in India, including ABB and Cummins. He is Chairman of the Aga Khan Foundation (India) and is past president of the Bombay Chamber of Commerce and Industry. He had a long career with Housing Development Finance Corporation (HDFC) in India and continues on its Board. He established Infrastructure Development Finance Company in India and was its CEO for seven years. He holds a Bachelor’s degree and a Master’s degree from the London School of Economics.

Chandrasekaran Ramakrishnan (Non-Executive Director): Mr Ramakrishnan has been the Chief Financial Officer of Tata Motors Limited since 18 September 2007. On 1 July 2015, he was appointed Chief Financial Officer of the Tata Motors Group. He is responsible for Finance, Accounts, Taxation, Business Planning, Investor Relations, Treasury and IT. He has also served as a Vice President of the Chairman’s Office, and is currently on the Board of many Tata Motors Group companies in India and overseas. Mr Ramakrishnan holds a Bachelor’s degree in Commerce and is a qualified Chartered Accountant and Cost Accountant.

Andrew M. Robb (Non-Executive Independent Director): Mr Robb was a director of Pilkington Group plc until 2003, having held the position of Finance Director from 1989 to 2001. Prior to this, from 1983 he was Finance Director of the Peninsular and Oriental Steam Navigation Company. Mr Robb has served on a number of PLC boards as a non-executive director.

Senior Management Team

Wolfgang Stadler	Executive Director, Manufacturing	28 January 1958	2013

Set out below is a short biography of each of the members of our senior management team:

Professor Dr Ralf Speth (Chief Executive Officer and Director): Dr. Speth was appointed Chief Executive Officer in 2010. For biographical information, please see “—Board of Directors”.

Andrew Goss (Group Sales Operations Director): Mr Goss was appointed Group Sales Operations Director in 2013. Mr Goss is responsible for Jaguar Land Rover’s sales, network development, customer service and Chery Jaguar Land Rover Automotive Co. Ltd. operations at a Board level. Mr Goss joined Jaguar Land Rover from Porsche, where he was Chief Executive Officer of Porsche Cars, Great Britain. Previously, Mr Goss was Sales Director for Toyota, after holding positions at Citroën, Nissan and Austin Rover.

Kenneth Gregor (Chief Financial Officer): Mr Gregor was appointed Chief Financial Officer of Jaguar Land Rover in 2008, after previously serving as Group Financial Controller. Mr Gregor leads the financial management of the business to deliver shareholder value and the Group’s growth ambitions. Responsibilities include corporate finance, treasury, financial reporting, accounting, tax, internal control and business support. Mr Gregor joined the Company in 1997, having previously worked for HSBC Investment Banking in Mergers and Acquisitions.

Ian Harnett (Executive Director, HR and Global Purchasing): Mr Harnett was appointed Executive Director of Human Resources and Global Purchasing in 2015. Mr Harnett is responsible for human resources and global purchasing, and is also responsible for all Jaguar Land Rover property matters globally. Previously, he has worked for BMW, notably leading the Land Rover purchasing team out of BMW ownership following the acquisition in 2000.

Hanno Kirner (Executive Director, Corporate and Strategy): Mr Kirner was appointed Executive Director, Corporate & Strategy in 2016. Mr Kirner’s focus is on the development of corporate and product strategy, global financial services, IT, royal and diplomatic affairs and the Special Operations division. Mr Kirner joined us from Rolls Royce PLC where he was Chief Financial Officer for the Land & Sea Division. Previously he held a number of positions including Chief Financial Officer at Aston Martin, Director of Finance & IT at Rolls Royce Motor Cars and has also held a number of senior roles with BMW.

Gerd Mäuser (Chief Marketing Officer): Mr Mäuser was appointed Chief Marketing Officer in 2015. Mr Mäuser leads global marketing activity including brand positioning, current and future product planning, marketing communications comprising customer relationship management, and brand experience strategies. He brings more than 30 years of experience in marketing including global brand-management, complete marketing-mix activities and long-term corporate planning for sales and marketing. Previously, he held a number of positions in BMW and served as Director of Corporate Marketing at Porsche AG for 17 years.

Qing Pan (Executive Director, Jaguar Land Rover China): Mr Pan leads the development and expansion of the Jaguar Land Rover business in China, directing Chery Jaguar Land Rover Automotive Co. Ltd. operations and is responsible for the Integrated Marketing, Sales and Service and Corporate functions in the market.

Nick Rogers (Director of Group Engineering): Mr Rogers was appointed Group Engineering Director in 2015. Mr Rogers has more than 30 years’ automotive engineering and manufacturing experience. He has overseen the development

of current vehicle architectures and delivered products including the launch of the Range Rover and Range Rover Sport in 2012/2013, and was Chief Engineer for the launch of the Land Rover Discovery 3 and original Range Rover Sport in 2004/2005.

Wolfgang Stadler (Director of Manufacturing): Mr Stadler was appointed Director of Manufacturing in 2013. He is responsible for Jaguar Land Rover’s global manufacturing operations. Mr Stadler joined Jaguar Land Rover from BMW Group where he most recently held the position of Senior Vice President, BMW Plant Dingolfing.

Other long-term employee benefits	—	1	—	0.2
Compensation for loss of office.....	—	1	—	—
Total.....	19	20	5.1	3.1

Board Practices

The Board typically consists of one executive director and four non-executive directors of whom two are independent non-executive directors. As of the date of this Offering Memorandum, the Board currently consists of one executive director and four non-executive directors, of whom two are independent.

The roles of the Chairman and the Chief Executive Officer are distinct and separate with appropriate powers being delegated to the Chief Executive Officer to perform the day-to-day activities of the Group.

The Board, along with its committees, provides leadership and guidance to our management, particularly with respect to corporate governance, business strategies and growth plans, the identification of risks and their mitigation strategies, entry into new businesses, product launches, demand fulfilment and capital expenditure requirements, and the review of our plans and targets.

The Board has delegated powers to the committees of the Board through written/stated terms of reference and oversees the functioning operations of the Committees through various circulars and minutes. The Board also undertakes the Group’s subsidiaries’ oversight functions through review of their performance against their set targets, advises them on growth plans and, where necessary, gives strategic guidelines.

Committees

Audit Committee

The Audit Committee independently reviews the adequacy and effectiveness of risk management across the Group, together with the integrity of the financial statements, including a review of the significant financial reporting judgments contained in them. It is comprised of three directors, at least one of whom has recent and relevant experience.

The scope of the Audit Committee includes:

- Reviewing the annual and all interim financial statements prior to submission to the Board and the shareholders, with particular reference to:
 - critical accounting policies and practices and any changes to them, related party transactions and contingent liabilities;
 - audit, legal, tax and accounting updates;
 - unusual or exceptional transactions;
 - major accounting entries involving estimates based on the exercise of judgment, including provisions for impairment and other major items; and
 - the auditors' report and any qualifications or emphases therein, taking particular note of any audit differences or adjustments arising from the audit.
- Reviewing the effectiveness of financial reporting, internal control and risk management procedures within the Group (which extends to all associates and joint venture companies), such review considering compliance with the provisions of Section 404 of the Sarbanes-Oxley Act and other relevant regulations and disclosures from the Chief Executive Officer or Chief Financial Officer. Also, the review should pay particular reference to any material weaknesses or significant deficiencies in the design or operation of the Group's internal controls over financial reporting that are reasonably likely to adversely affect the Group's ability to record, process and report financial data and to receive reports from the external and internal auditors with respect to these matters.
- Assessing the reliability and integrity of the Group's accounting policies and financial reporting and disclosure practices and processes.

In relation to internal audits, the Audit Committee has responsibility to:

- review on a regular basis the adequacy of internal audit functions, including the internal audit charter, the structure of the internal audit department, approval of the audit plan and its execution, staffing and seniority of the official heading the department, reporting structure, budget, coverage and the frequency of internal audits;
- review the regular internal reports to management prepared by the internal audit department as well as management's response thereto;
- review the findings of any internal investigations by the internal auditors into matters where there is suspected fraud or irregularity or a failure of internal control systems of a material nature and report the matter to the Board;
- discuss with internal auditors any significant findings and follow-up thereon; and
- review internal audit reports relating to internal control weaknesses.

In relation to external auditors, the Audit Committee has responsibility to:

- oversee the appointment of the external auditors, approve their terms of engagement, including fees, and the nature and scope of their work, and consider when the external audit should be put out to tender;
- review their performance and independence every year and pre-approve any provision of non-audit services by the external auditors;

- review the significant audit issues identified by the external auditors and how they have been addressed in the financial statements;
- establish a clear hiring policy in respect of employees or former employees of the external auditors and monitor the implementation of that policy; and
- evaluate the external auditors by reviewing annually the firm's independence, its internal quality control procedures, any material issues raised by the most recent quality control or peer review of the firm, and the findings of any enquiry or investigation carried out by government or professional bodies with respect to one or more independent audits carried out by the firm within the last five years.

In relation to subsidiary company oversight, the Audit Committee has responsibilities to:

- oversee the operation and maintenance of procedures for receiving, processing and recording complaints regarding accounting, internal controls or auditing matters and for the confidential submission by employees of concerns regarding allegedly questionable or illegal practices. The Audit Committee shall ensure that these arrangements allow independent investigation of such matters and appropriate follow-up action;
- oversee controls designed to prevent fraud and review all reports of instances of fraud;
- satisfy itself that Group policy on ethics is followed and review any issues of conflict of interest, ethical conduct or compliance with law, including competition law, brought to its attention;
- oversee legal compliance in the Group; and
- conduct and supervise such investigations or enquiries as the Board may require.

Remuneration Committee

The Remuneration Committee is comprised of members appointed by our board of directors. The Remuneration Committee may, at the Group's expense, obtain outside legal or other independent professional advice and secure the attendance of outsiders with relevant experience and expertise if it considers this necessary.

The scope of the Remuneration Committee is to:

- review and approve any proposals regarding the remuneration (including base salary, bonus, long-term incentives, retention awards and pension arrangements) of all employees at leadership level 2 and above;
- review and approve all bonus plans and long-term incentive plans at leadership level 5 and above (including the structure of the plans, and whether, and at what level, the plans should pay out);
- review and approve changes to any defined benefit pension plans; and
- regularly review independent data regarding the competitive position of salaries and benefits and make recommendations, as appropriate.

Executive Committee

The Executive Committee is comprised of the Chief Executive Officer and his direct reports. The objective of the Executive Committee is to provide strategic management, to achieve business results and to ensure compliance and control using various assurance tools and functions such as an independent internal audit function, a risk and assurance committee and a legal compliance office.

The Executive Committee is responsible for the executive management of the business and the strategic direction of the Group. It is also responsible for risk management across the Group, the communication of policy requirements and the review and approval of the risk management policy and framework. The Executive Committee identifies strategic risk,

debates strategies and commits the allocation of key resources to manage key and emerging risk factors. Within this role, the Executive Committee defines, sponsors, supports, debates and challenges risk management activity across our Group.

Risk and Assurance Committee

The Risk and Assurance Committee is responsible for the on-going development and co-ordination of the system of risk management as well as the consolidation, challenge and reporting of all risk management information. It provides support and guidance on the application of risk management and controls assurance across the Group.

MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

Major Shareholders of the Issuer

As at 30 June 2017, the following organisation held direct and indirect interests in voting rights equal to or exceeding 3% of the ordinary share capital of the Issuer:

Name of shareholder of Issuer	Number of ordinary shares	%
TML Holdings PTE Limited (Singapore).....	1,500,642,163	100

Major Shareholders of TMLH

As at 30 June 2017, the following organisation held direct and indirect interests in voting rights equal to or exceeding 3% of the ordinary share capital of our holding company, TMLH:

Name of shareholder of TMLH	Number of ordinary shares	%
Tata Motors Limited (India)	2,511,659,418	100

Major Shareholders of Tata Motors

Tata Motors Limited is a widely held, listed company with approximately 530,822 shareholders of ordinary shares and 105,815 shareholders of 'A' ordinary shares of record, as at 30 June 2017. DESCRIPTION OF OTHER INDEBTEDNESS

The following is a summary of the material terms of the principal financing arrangements of the Issuer and Jaguar Land Rover Limited. This section does not mention any plans for new financing arrangements or amendments to existing financing arrangements which are currently being contemplated or which are under discussion with potential or existing financiers. The following summary does not purport to describe all of the terms and conditions of such financing arrangements, and therefore is qualified in its entirety by reference to the actual agreements. We recommend that you refer to the actual agreements for further details, copies of which are available from us upon request (subject to any confidentiality constraints). For the terms and conditions of the Notes, please see “Description of the Notes”.

January 2017 Pound Notes £300 million notes due 2021

On 24 January 2017, the Issuer issued the January 2017 Pound Notes, comprising £300 million 2.750% notes due 2021, in an offering that was not subject to the registration requirements of the US Securities Act. The January 2017 Pound Notes are governed by an indenture entered into by the Issuer, as issuer, Citibank, N.A., London Branch, as trustee for the holders, and Jaguar Land Rover Holdings Limited and Jaguar Land Rover Limited, as guarantors (the “January 2017 Pound Guarantors”).

The January 2017 Pound Notes are general unsecured, senior obligations of the Issuer and rank senior in right of payment to any and all of the existing and future indebtedness of the Issuer and the January 2017 Pound Guarantors that is expressly subordinated in right of payment to the January 2017 Pound Notes or such guarantee; rank equally in right of payment with all existing and future unsecured indebtedness of the Issuer and the January 2017 Pound Guarantors that is not expressly subordinated (and is not senior) in right of payment to the January 2017 Pound Notes, including the January 2013 Notes, the December 2013 Notes, the January 2014 Notes, the October 2014 Notes, the February 2015 Notes, March 2015 Notes and the January 2017 Euro Notes; and are effectively subordinated to any secured indebtedness of the Issuer and any secured indebtedness of the January 2017 Pound Guarantors, to the extent of the value of the collateral securing such indebtedness, and to the indebtedness of the subsidiaries of the Issuer that are not guarantors.

The Issuer may redeem the January 2017 Pound Notes at 100% of their principal amount plus accrued and unpaid interest, if any, and any other amounts payable thereon, to the date of redemption. A “make-whole” redemption premium is also payable if the January 2017 Pound Notes are redeemed before the date that is three months prior to their maturity date.

If an event treated as a change of control of the Issuer occurs, then each holder of the January 2017 Pound Notes has the right to require that the Issuer repurchase such holder’s January 2017 Pound Notes, at a purchase price in cash in an amount equal to 101% of the principal amount thereof, plus accrued and unpaid interest, if any, to the date of purchase.

The January 2017 Pound Notes are also subject to certain customary covenants and events of default.

January 2017 Euro Notes €650 million notes due 2024

On 17 January 2017, the Issuer issued the January 2017 Euro Notes, comprising €650 million 2.200% notes due 2024, in an offering that was not subject to the registration requirements of the US Securities Act. The January 2017 Euro Notes are governed by an indenture entered into by the Issuer, as issuer, Citibank, N.A., London Branch, as trustee for the holders, and Jaguar Land Rover Holdings Limited and Jaguar Land Rover Limited, as guarantors (the “January 2017 Euro Guarantors”).

The January 2017 Euro Notes are general unsecured, senior obligations of the Issuer and rank senior in right of payment to any and all of the existing and future indebtedness of the Issuer and the January 2017 Euro Guarantors that is expressly subordinated in right of payment to the January 2017 Euro Notes or such guarantee; rank equally in right of payment with all existing and future unsecured indebtedness of the Issuer and the January 2017 Euro Guarantors that is not expressly subordinated (and is not senior) in right of payment to the January 2017 Euro Notes, including the January 2013 Notes, the December 2013 Notes, the January 2014 Notes, the October 2014 Notes, the February 2015 Notes, the March 2015 Notes and the January 2017 Pound Notes; and are effectively subordinated to any secured indebtedness of the Issuer and any secured indebtedness of the January 2017 Euro Guarantors, to the extent of the value of the collateral securing such indebtedness, and to the indebtedness of the subsidiaries of the Issuer that are not guarantors.

The Issuer may redeem the January 2017 Euro Notes at 100% of their principal amount plus accrued and unpaid interest, if any, and any other amounts payable thereon, to the date of redemption. A “make-whole” redemption premium is also payable if the January 2017 Euro Notes are redeemed before the date that is three months prior to their maturity date.

If an event treated as a change of control of the Issuer occurs, then each holder of the January 2017 Euro Notes has the right to require that the Issuer repurchase such holder's January 2017 Euro Notes, at a purchase price in cash in an amount equal to 101% of the principal amount thereof, plus accrued and unpaid interest, if any, to the date of purchase.

The January 2017 Euro Notes are also subject to certain customary covenants and events of default.

March 2015 Notes \$500 million notes due 2020

In March 2015, the Issuer issued the March 2015 Notes, comprising \$500 million 3.500% notes due 2020, in an offering that was not subject to the registration requirements of the US Securities Act. The March 2015 Notes are governed by an indenture entered into by the Issuer, as issuer, Citibank, N.A., London Branch, as trustee for the holders, and Jaguar Land Rover Holdings Limited and Jaguar Land Rover Limited, as guarantors (the "March 2015 Guarantors").

The March 2015 Notes are general unsecured, senior obligations of the Issuer and rank senior in right of payment to any and all of the existing and future indebtedness of the Issuer and the March 2015 Guarantors that is expressly subordinated in right of payment to the March 2015 Notes or such guarantee; rank equally in right of payment with all existing and future unsecured indebtedness of the Issuer and the March 2015 Guarantors that is not expressly subordinated (and is not senior) in right of payment to the March 2015 Notes, including the January 2013 Notes, the December 2013 Notes, the January 2014 Notes, the October 2014 Notes, the February 2015 Notes, the January 2017 Euro Notes and the January 2017 Pound Notes; and are effectively subordinated to any secured indebtedness of the Issuer and any secured indebtedness of the March 2015 Guarantors, to the extent of the value of the collateral securing such indebtedness, and to the indebtedness of the subsidiaries of the Issuer that are not guarantors.

The Issuer may redeem the March 2015 Notes at 100% of their principal amount plus accrued and unpaid interest, if any, and any other amounts payable thereon, to the date of redemption. A "make-whole" redemption premium is also payable if the March 2015 Notes are redeemed before the date that is three months prior to their maturity date.

If an event treated as a change of control of the Issuer occurs, then each holder of the March 2015 Notes has the right to require that the Issuer repurchase such holder's March 2015 Notes, at a purchase price in cash in an amount equal to 101% of the principal amount thereof, plus accrued and unpaid interest, if any, to the date of purchase.

The March 2015 Notes are also subject to certain customary covenants and events of default.

February 2015 Notes £400 million notes due 2023

In February 2015, the Issuer issued the February 2015 Notes, comprising £400 million 3.875% notes due 2023, in an offering that was not subject to the registration requirements of the US Securities Act. The February 2015 Notes are governed by an indenture entered into by the Issuer, as issuer, Citibank, N.A., London Branch, as trustee for the holders, and Jaguar Land Rover Holdings Limited and Jaguar Land Rover Limited, as guarantors (the "February 2015 Guarantors").

The February 2015 Notes are general unsecured, senior obligations of the Issuer and rank senior in right of payment to any and all of the existing and future indebtedness of the Issuer and the February 2015 Guarantors that is expressly subordinated in right of payment to the February 2015 Notes or such guarantee; rank equally in right of payment with all existing and future unsecured indebtedness of the Issuer and the February 2015 Guarantors that is not expressly subordinated (and is not senior) in right of payment to the February 2015 Notes, including the January 2013 Notes, the December 2013 Notes, the January 2014 Notes, the October 2014 Notes, the March 2015 Notes, the January 2017 Euro Notes and the January 2017 Pound Note; and are effectively subordinated to any secured indebtedness of the Issuer and any secured indebtedness of the February 2015 Guarantors, to the extent of the value of the collateral securing such indebtedness, and to the indebtedness of the subsidiaries of the Issuer that are not guarantors.

The Issuer may redeem the February 2015 Notes at 100% of their principal amount plus accrued and unpaid interest, if any, and any other amounts payable thereon, to the date of redemption. A "make-whole" redemption premium is also payable if the February 2015 Notes are redeemed before the date that is three months prior to their maturity date.

If an event treated as a change of control of the Issuer occurs, then each holder of the February 2015 Notes has the right to require that the Issuer repurchase such holder's February 2015 Notes, at a purchase price in cash in an amount equal to 101% of the principal amount thereof, plus accrued and unpaid interest, if any, to the date of purchase.

The February 2015 Notes are also subject to certain customary covenants and events of default.

October 2014 Notes \$500 million notes due 2019

In October 2014, the Issuer issued the October 2014 Notes, comprising \$500 million 4.250% notes due 2019, in an offering that was not subject to the registration requirements of the US Securities Act. The October 2014 Notes are governed by an indenture entered into by the Issuer, as issuer, Citibank, N.A., London Branch, as trustee for the holders, and Jaguar Land Rover Holdings Limited and Jaguar Land Rover Limited, as guarantors (the “October 2014 Guarantors”).

The October 2014 Notes are general unsecured, senior obligations of the Issuer and rank senior in right of payment to any and all of the existing and future indebtedness of the Issuer and the October 2014 Guarantors that is expressly subordinated in right of payment to the October 2014 Notes or such guarantee; rank equally in right of payment with all existing and future unsecured indebtedness of the Issuer and the October 2014 Guarantors that is not expressly subordinated (and is not senior) in right of payment to the October 2014 Notes, including the January 2013 Notes, the December 2013 Notes, the January 2014 Notes, the February 2015 Notes, the March 2015 Notes, the January 2017 Euro Notes and the January 2017 Pound Note; and are effectively subordinated to any secured indebtedness of the Issuer and any secured indebtedness of the October 2014 Guarantors, to the extent of the value of the collateral securing such indebtedness, and to the indebtedness of the subsidiaries of the Issuer that are not guarantors.

The Issuer may redeem the October 2014 Notes at 100% of their principal amount plus accrued and unpaid interest, if any, and any other amounts payable thereon, to the date of redemption. A “make-whole” redemption premium is also payable if the October 2014 Notes are redeemed before the date that is three months prior to their maturity date.

If an event treated as a change of control of the Issuer occurs, then each holder of the October 2014 Notes has the right to require that the Issuer repurchase such holder’s October 2014 Notes, at a purchase price in cash in an amount equal to 101% of the principal amount thereof, plus accrued and unpaid interest, if any, to the date of purchase.

The October 2014 Notes are also subject to certain customary covenants and events of default.

January 2014 Notes £400 million notes due 2022

In January 2014, the Issuer issued the January 2014 Notes, comprising £400 million 5.000% notes due 2022, in an offering that was not subject to the registration requirements of the US Securities Act. The January 2014 Notes are governed by an indenture entered into by the Issuer, as issuer, Citibank, N.A., London Branch, as trustee for the holders, and Jaguar Land Rover Holdings Limited and Jaguar Land Rover Limited, as guarantors (the “January 2014 Guarantors”), as amended by a supplemental indenture dated 9 March 2017, following a consent solicitation which was conducted in order to substantially align the covenants under the January 2014 Notes with the covenants of the January 2017 Notes.

The January 2014 Notes are general unsecured, senior obligations of the Issuer and rank senior in right of payment to any and all of the existing and future indebtedness of the Issuer and the January 2014 Guarantors that is expressly subordinated in right of payment to the January 2014 Notes or such guarantee; rank equally in right of payment with all existing and future unsecured indebtedness of the Issuer and the January 2014 Guarantors that is not expressly subordinated (and is not senior) in right of payment to the January 2014 Notes, including the January 2013 Notes, the December 2013 Notes, the October 2014 Notes, the February 2015 Notes, the March 2015 Notes, the January 2017 Euro Notes and the January 2017 Pound Note; and are effectively subordinated to any secured indebtedness of the Issuer and any secured indebtedness of the January 2014 Guarantors, to the extent of the value of the collateral securing such indebtedness, and to the indebtedness of the subsidiaries of the Issuer that are not guarantors.

The Issuer may redeem the January 2014 Notes at 100% of their principal amount plus accrued and unpaid interest, if any, and any other amounts payable thereon, to the date of redemption, plus a redemption premium.

If an event treated as a change of control of the Issuer occurs, then each holder of the January 2014 Notes has the right to require that the Issuer repurchase such holder’s January 2014 Notes, at a purchase price in cash in an amount equal to 101% of the principal amount thereof, plus accrued and unpaid interest, if any, to the date of purchase.

The January 2014 Notes are also subject to certain customary covenants and events of default.

December 2013 Notes \$700 million notes due 2018

In December 2013, the Issuer issued the December 2013 Notes, comprising \$700 million 4.125% notes due 2018, in an offering that was not subject to the registration requirements of the US Securities Act. The December 2013 Notes are

governed by an indenture entered into by the Issuer, as issuer, Citibank, N.A., London Branch, as trustee for the holders, and Jaguar Land Rover Holdings Limited and Jaguar Land Rover Limited, as guarantors (the “December 2013 Guarantors”), as amended by a supplemental indenture dated 9 March 2017, following a consent solicitation which was conducted in order to substantially align the covenants under the December 2013 Notes with the covenants of the January 2017 Notes.

The December 2013 Notes are general unsecured, senior obligations of the Issuer and rank senior in right of payment to any and all of the existing and future indebtedness of the Issuer and the December 2013 Guarantors that is expressly subordinated in right of payment to the December 2013 Notes or such guarantee; rank equally in right of payment with all existing and future unsecured indebtedness of the Issuer and the December 2013 Guarantors that is not expressly subordinated (and is not senior) in right of payment to the December 2013 Notes, including the January 2013 Notes, the January 2014 Notes, the October 2014 Notes, the February 2015 Notes, the March 2015 Notes, the January 2017 Euro Notes and the January 2017 Pound Note; and are effectively subordinated to any secured indebtedness of the Issuer and any secured indebtedness of the December 2013 Guarantors, to the extent of the value of the collateral securing such indebtedness, and to the indebtedness of the subsidiaries of the Issuer that are not guarantors.

The Issuer may redeem the December 2013 Notes at 100% of their principal amount plus accrued and unpaid interest, if any, and any other amounts payable thereon, to the date of redemption, plus a redemption premium.

If an event treated as a change of control of the Issuer occurs, then each holder of the December 2013 Notes has the right to require that the Issuer repurchase such holder’s December 2013 Notes, at a purchase price in cash in an amount equal to 101% of the principal amount thereof, plus accrued and unpaid interest, if any, to the date of purchase.

The December 2013 Notes are also subject to certain customary covenants and events of default.

January 2013 Notes \$500 million notes due 2023

In January 2013, the Issuer issued the January 2013 Notes, comprising \$500 million 5.625% notes due 2023, in an offering that was not subject to the registration requirements of the US Securities Act. The January 2013 Notes are governed by an indenture entered into by the Issuer, as issuer, Citibank, N.A., London Branch, as trustee for the holders, and Jaguar Land Rover Limited, Jaguar Land Rover Holdings Limited, Jaguar Land Rover North America, LLC, Land Rover Exports Limited and JLR Nominee Company Limited, as guarantors (the “January 2013 Guarantors”), as amended by a supplemental indenture dated 9 March 2017, following a consent solicitation which was conducted in order to substantially align the covenants under the January 2013 Notes with the covenants of the January 2017 Notes.

The January 2013 Notes are general unsecured, senior obligations of the Issuer and rank senior in right of payment to any and all of the existing and future indebtedness of the Issuer and the January 2013 Guarantors that is expressly subordinated in right of payment to the January 2013 Notes or such guarantee; rank equally in right of payment with all existing and future unsecured indebtedness of the Issuer and the January 2013 Guarantors that is not expressly subordinated (and is not senior) in right of payment to the January 2013 Notes, including the December 2013 Notes, the January 2014 Notes, the October 2014 Notes, the February 2015 Notes, the March 2015 Notes, the January 2017 Euro Notes and the January 2017 Pound Note; and are effectively subordinated to any secured indebtedness of the Issuer and any secured indebtedness of the January 2013 Guarantors, to the extent of the value of the collateral securing such indebtedness, and to the indebtedness of the subsidiaries of the Issuer that are not guarantors.

At any time prior to 1 February 2018, the Issuer may redeem the January 2013 Notes at 100% of their principal amount plus accrued and unpaid interest, if any, plus a redemption premium. On or after 1 February 2018, the Issuer may redeem all or part of the January 2013 Notes initially at 102.813% of their principal amount plus accrued and unpaid interest, if any, with the premium declining after that date.

If an event treated as a change of control of the Issuer occurs, then each holder of the January 2013 Notes has the right to require that the Issuer repurchase such holder’s January 2013 Notes, at a purchase price in cash in an amount equal to 101% of the principal amount thereof, plus accrued and unpaid interest, if any, to the date of purchase.

The January 2013 Notes are also subject to certain customary covenants and events of default.

Facility A £1,885 million Unsecured Syndicated Revolving Credit Facility

General

The Issuer as borrower entered into a revolving facility agreement dated 29 July 2015 with a syndicate of lenders. The facility agreement was amended and extended effective 28 July 2017. Jaguar Land Rover Limited and Jaguar Land Rover Holdings Limited are party to the facility agreement as guarantors (together with the Issuer, the “obligors”). The facility is unsecured. The facility size is £1,885 million with an accordion option on the part of the Issuer to increase the facility to up to £2,500 million. The purpose of the facility is to provide for the borrower’s general corporate purposes. As at the date of this Offering Memorandum, the facility is undrawn.

Interest and fees

Interest: The per annum interest rate payable on any loan drawn under the revolving facility is sterling LIBOR (subject to a zero floor) plus an applicable margin. Where there is a continuing event of default or the borrower has no long-term, unsecured corporate credit rating, the margin is 1.65% per annum. Where the foregoing does not apply, the margin is dependent on the borrower’s long-term unsecured corporate credit rating assigned by Moody’s Investors Service Limited and S&P Global Ratings (or certain substituted ratings agencies) as follows:

Rating	Margin (% per annum)
BBB/Baa2 or higher	0.50
BBB–/Baa3	0.75
BB+/Ba1	1.00
BB/Ba2	1.25
BB–/Ba3 or lower	1.65

If different ratings are assigned to the borrower, the margin is the mean average of the ones set out above. As at the date of the amended and restated revolving credit facility agreement, the applicable margin was 1.00% per annum.

A market disruption clause appears in the facility agreement with the minimum participation threshold for affected lenders set at 40%. A utilisation fee is payable on any loan drawn under the facility of 0.10% (for any period where the facility is up to and including 33% utilised), 0.20% (for any period where the facility is over 33% and up to and including 66% utilised) and 0.40% (for any period where the facility is over 66% utilised).

Default interest: If any sum due by any obligor is not paid on its due date, default interest is payable on the unpaid sum at the per annum interest rate of 1% plus the interest rate that would have applied if the unpaid sum constituted a loan advanced under the relevant facility.

Fees: The following fees are payable to one or more of the finance parties: an annual agency fee to the facility agent; a commitment fee payable quarterly in arrears to the lenders equal to 35% of the margin in respect of the daily available commitment under the facility; a fee in an amount agreed at the time is payable on the amount of commitments increased pursuant to the accordion option referred to above. Any arrangement and other fees already paid and certain ongoing fees not deemed material are not covered in this summary.

Repayment and prepayment

Repayments: All principal, interest and other sums under the facility must be repaid in full five years after the date of the most recent amendment and restatement (being 28 July 2017). The facility is structured as a conventional revolving credit facility, with each loan (with accrued interest) having to be repaid (and paid) at the end of its interest period but where the principal may be repaid by the drawing of a new, rollover loan.

Mandatory prepayments: If it becomes unlawful for any lender to perform any of its obligations, that lender must inform the agent, upon which that lender’s commitment is cancelled and the borrower must repay at the end of the relevant interest periods (or earlier if required by that lender in certain circumstances) that lender’s participation in any outstanding loans under the facility. Upon a change of control, no lender is obliged to fund a utilisation (save for a rollover loan) and the borrower must, if a lender requires, within 10 business days of notice to that effect from the agent, repay that lender’s participation in all outstanding loans, together with interest and any other sums due and payable. “Change of control” means

(a) so long as a portion of the shares of the borrower is not listed on a securities exchange, Tata Motors Limited ceasing to beneficially own and control more than 50% of the shares with ordinary voting power in the borrower; (b) if a portion of the shares of the borrower is listed on a securities exchange, Tata Motors Limited ceasing to beneficially own and control more than 30% of the shares with ordinary voting power in the borrower; or (c) the sale, lease, exchange or other transfer of all or substantially all of the assets of the borrower and its subsidiaries (the “Group”) to a person who is not a Group member, or a group of related persons who are not Group members.

Voluntary cancellations and prepayments: The borrower may voluntarily cancel or prepay all or any part of the facility on three business days’ notice (subject to a minimum of £5.0 million). The borrower may also voluntarily cancel or prepay all of a lender’s commitment and participations in loans (or replace that lender) if a payment to that lender has to be grossed up under the tax gross up provisions or that lender claims indemnification from the borrower under the tax indemnity or the increased costs provisions, or that lender notifies the facility agent that the cost to it of funding its participation in a loan is in excess of LIBOR pursuant to the market disruption provisions.

Defaulting lenders: The borrower may cancel the commitments of a lender which defaults or is subject to insolvency or certain other events and/or replace that lender.

Redrawings: The facility is a conventional revolving credit facility which may, subject to the usual conditions precedent, be utilised at any time by the borrower up to one month before the facility terminates.

Representations

Each obligor makes various representations on the date of the facility agreement (and in the case of certain representations, at various regular points thereafter) including as to: its legal status; the binding nature of its obligations under the facility agreement and related documents (the “finance documents”); the finance documents not conflicting with applicable law or with the constitutional documents and other agreements of the obligors; the corporate power of the obligors to enter into the finance documents; all authorisations required in relation to the finance documents having been obtained; governing law and enforcement; the application of withholding tax to payments under the finance documents; no filing or stamp taxes; no event of default existing under the finance documents; no material default by it under other agreements; the correctness in all material respects of factual information contained in the information package; its original financial statements being a fair representation of its financial condition and no material adverse change having occurred since the date at which such financial statements were prepared; *pari passu* ranking of its obligations under the finance documents; no material proceedings started or threatened against it; and compliance by Group members with sanctions, anti-corruption laws and anti-money laundering laws.

Covenants

General and information covenants: There are various positive and negative undertakings with which the borrower must comply such as: obligations to indemnify the finance parties for tax with respect to the finance documents (subject to certain usual mitigations and exceptions and to provision for the return of the benefit of tax credits); payment of stamp duty; payment of increased regulatory costs of the finance parties (including attributable to Basel III or CRD IV, but excluding FATCA deductions required to be made by any party, Basel II and the UK, French, Dutch and German bank levies and certain other usual exceptions and further excluding claims in respect of Basel III or CRD IV where they were capable of being calculated at the date of the facility agreement, where the finance party does not recover similar items from borrowers under other similar facilities or where the demand is not made within six months of becoming aware of the claim); certain indemnities; payment of break costs; payment of enforcement costs; provision of annual audited Group accounts and the Group’s unaudited quarterly accounts; provision of each obligor’s annual audited accounts; provision of compliance certificates relating to certain financial and other covenants; provision of documents sent to creditors generally, details of material litigation, and such financial and business information as the finance parties may request; notification of defaults; obligations not to make a substantial change to the general nature of the business of the Group; and restrictions on the subsidiaries and assets of captive finance companies. There are various positive and negative undertakings with which each obligor must comply, such as: obligations to gross up for tax on payments under the finance documents (but not to gross up because of a FATCA deduction); certain indemnities; an obligation to obtain authorisations with respect to its performance of its payment obligations under, and the enforceability of, the finance documents; compliance with laws; restrictions on mergers (save for a permitted group reorganisation (as defined)). There are various positive and negative undertakings with which each obligor must comply (and with which the borrower must ensure that each Group member complies), such as: restrictions on granting security (negative pledge); restrictions on making certain restricted payments such as dividends, redemption of shares, certain loans and other restricted investments (as defined). There are various positive and negative undertakings with which each obligor must comply (and with which each obligor must ensure that each of its subsidiaries

complies), such as compliance with sanctions laws. There are various positive and negative undertakings with which the borrower must comply and with which it must ensure that each of its subsidiaries complies, such as compliance with anti-corruption laws and anti-money laundering laws.

Financial covenants: There are no financial covenants.

Miscellaneous: Conventional provisions covering the following elements are included: impaired agent; defaulting lender; replacement of defaulting lenders; disenfranchisement of defaulting lenders; replacement of non-consenting lenders (a “non consenting lender” is one which, in the case of a waiver or amendment requiring all lender approval, refuses approval in circumstances where at least 80% have given their approval to the waiver or amendment). Save for certain matters expressly reserved for unanimous lender consent, any decision as to the administration, amendment or waiver of the facility is decided by majority lenders (which is defined to be 66.7%).

Set off: No obligor is permitted to set off; if an event of default is continuing, each finance party is expressly permitted to set off any matured obligation owed to it by an obligor under a finance document against any matured obligation owed by that finance party to that obligor under a finance document.

Transferability: Any lender may assign or transfer any of its rights and/or obligations to another bank or financial institution or to a trust, fund or other entity which is regularly engaged in or established for the purpose of making, purchasing or investing in loans, securities or other financial assets. A transfer of part of lender’s commitment is subject to a minimum amount of £10.0 million. Unless it is to an affiliate of the transferring lender, an existing lender with a minimum BBB+ rating or an affiliate with a minimum BBB+ rating of an existing lender, or an event of default has occurred and is continuing, consent of the borrower is required not to be unreasonably withheld or delayed.

Events of default

The facility agreement sets out various events of default, the occurrence of which allows the lenders to cancel the facility, place the facility on demand or demand immediate repayment of the facility. Such events of default include (subject in certain cases to grace periods, thresholds and other qualifications): non payment by an obligor of sums due from it under the finance documents; breach of other obligations of the obligors under the finance documents; misrepresentation by an obligor in connection with the finance documents; cross default with respect to the financial debt of the Group; insolvency and insolvency proceedings relating to the borrower or any obligor or material subsidiary (defined as a subsidiary of the borrower having 10% or more of the net assets or revenues of the Group); the expropriation, attachment, sequestration, distress or execution of assets of the borrower or any obligor or material subsidiary and other creditors’ process against such assets; unlawfulness of the obligations of an obligor under the finance documents; repudiation by an obligor of a finance document; a guarantor ceases to be a subsidiary of the borrower (save as contemplated by a permitted group reorganisation as defined); material adverse effect on the validity, legality or enforceability of any obligation of any obligor under any finance document; final judgment which remains undischarged.

Security and guarantees

There is no security given to support the facility.

Jaguar Land Rover Limited and Jaguar Land Rover Holdings Limited are party to the facility agreement, each as an unlimited joint and several guarantor.

Governing law

The facility agreement and the other facility documents are governed by English law.

Facility B US\$295.0 million Uncommitted Multi-currency Syndicated Credit Insured Invoice Discounting Facility

Jaguar Land Rover Limited as seller is a party to a syndicated insured invoice discounting facility agreement originally dated 29 March 2012 (as amended and restated on 30 April 2015 and again on 31 May 2017) with a bank as agent and buyer (with capacity for further banks to accede as additional buyers) (the agent and the buyer together the “finance parties”).

Jaguar Land Rover Holdings Limited is party to the facility agreement as guarantor (together with Jaguar Land Rover Limited, the “obligors”).

The facility is uncommitted. The facility may be increased at the request of the seller via the introduction of new banks as buyers (subject, where any incoming bank is not one of a list of existing banks, to approval (at their discretion) of all the buyers) up to a maximum facility amount of US\$800.0 million. Eligible receivables may be generated from sales of ‘Land Rover’ and ‘Range Rover’ finished vehicles. The availability of the facility ends on 30 April 2019 and no further receivables may be presented by the seller to the buyers after that date. The facility is revolving, and as a sold receivable matures and is paid, an equivalent sum becomes available for re-utilisation by the seller under the facility. As at 30 June 2017, the face value of all outstanding receivables sold to the buyers under the facility was £159 million.

Rates, interest and fees

Discount rate: The discount rate is the per annum interest rate equal to the relevant currency’s LIBOR (with a zero floor) plus 1.25% (for receivables purchased on or before 30 April 2017) and 1.18% (for receivables purchased on or after 1 May 2017).

Default interest: If any sum due by the seller is not paid on its due date, default interest is payable at the per annum interest rate of the facility rate (based on a margin of 1.25%) plus 1%.

Fees: The following fees are payable to one or more of the finance parties under the facility: an annual agency fee to the agent; and a fee payable upon exercise of the accordion option. Any arrangement and other fees already paid are not covered in this summary.

Recourse

On payment by the buyers of the purchase price for a receivable (the purchase price being the net present value of the receivable using the relevant discount rate from the date of purchase to the date falling three days after the due date of the receivable), all rights relating to that receivable (including the benefit of any credit insurance) is assigned by way of sale to the agent by the seller. Unless a receivable defaults, no notice of assignment is given to the debtor.

If a sold receivable is not paid on its due date (a “defaulted receivable”) because of a commercial dispute (as defined) or which is not covered by the relevant credit insurance, the agent can compel the seller to repurchase the defaulted receivable within three business days. The repurchase price is the face value of the defaulted receivable plus interest at the discount rate up to the date of repurchase. In all other cases, the seller must pay immediately a sum to the agent equal to any uninsured portion of the defaulted receivable and on-going interest (at the discount rate) up until the date on which the relevant credit insurer pays or is obliged to pay the relevant claim. In any event the seller has the right to buy back any defaulted receivable on three business days’ notice to the agent.

Representations

Each obligor makes various representations on the date of the facility agreement and at various regular points thereafter, such as: status; binding obligations; non conflict with other obligations; power and authority; validity and admissibility of evidence; governing law and enforcement; deduction of tax; no filing or stamp taxes; no default; no misleading information; financial statements; *pari passu* ranking; no proceedings pending or threatened; sanctions, anti-corruption, bribery. There are various representations made by the seller in relation to each purchased receivable at the time it is presented for purchase by the seller: that the seller holds legal and beneficial title and the receivable is presented free from any restrictions on assignability, transfer or set off rights; it is free from any consent required in relation to assignment of that receivable; an invoice has been prepared for each receivable sold; it is an eligible receivable (as defined therein); the seller is capable of receiving the purchase price for that receivable at the time of sale; all corporate actions necessary in order to present the receivable have been taken; it has performed all of its obligations under the supply contracts under which the receivables arise; each receivable represents an unconditional, legal and valid and binding obligation of the debtor enforceable by the seller; and that the presented receivables are not subject to certain floating charges.

Covenants

There are various positive and negative covenants with which the seller must comply, including: provision of annual audited Group accounts; each obligor’s annual audited accounts and the Group’s unaudited half year and quarterly accounts; provision of documents sent to creditors generally, details of material litigation, and such financial and business

information as the finance parties may request; notification of default. There are various positive and negative covenants with which the obligors must comply, including: compliance with authorisations; compliance with laws; restriction on mergers; change of the business; maintaining insurances. There are various positive and negative covenants with which the obligors must comply (and ensure that their subsidiaries must comply), including: compliance with laws on sanctions, anti-corruption, bribery and money laundering. There are various positive and negative covenants with which the seller must comply in relation to the receivables, including: a wide indemnity for losses suffered by the buyer in certain circumstances (such as misrepresentation, non payment by the seller; noncompliance with insurance; non payment of taxes or an event of default occurs); pay increased costs; minimise losses on receivables; cooperate with and assist the buyer; no amendments to supply contracts and insurances; perfect rights; ensure receivables paid to accounts held with the buyer; pay taxes; comply with insurance policies and gross up for withholding tax.

Events of default

The facility agreement sets out various events of default the occurrence of which allows the banks to cancel the facility commitment and require the repayment of all accrued or outstanding amounts. Such events of default include (subject in certain cases to grace periods, thresholds and other qualifications): non payment; breach of other obligations; misrepresentation; cross acceleration; insolvency; insolvency proceedings; distress; unlawfulness of obligations or agreements; repudiation by any obligor or insurer of the facility agreement or insurance policy; change in ownership of obligors (save as a permitted group reorganisation (as defined)); crystallisation of any floating charges; appointment of an administrator pursuant to a floating charge; material adverse effect on validity, legality or enforceability of any facility documents; and a final judgment which can no longer be appealed is rendered against an obligor not covered by insurance and above a specified threshold.

Governing law

The facility agreement is governed by English law.

Hedging Facilities

As part of the management of currency and commodity price risks, we use a range of derivatives including currency forwards, currency options and commodity swaps to reduce cash flow volatility. These derivatives are transacted with banks that have allocated uncommitted credit lines to cover any potential mark to market value of these deals. As at 30 June 2017, we had credit lines agreed with the majority of our syndicate lenders. The carrying value of these derivatives (derivative financial assets less derivative financial liabilities and long-term derivatives) at 30 June 2017 was a net liability of £1,551 million.

DESCRIPTION OF THE NOTES

The Notes were issued under and are governed by an Indenture, dated on 10 October 2017 (the “Indenture”). The Indenture was entered into by Jaguar Land Rover Automotive plc (the “Issuer”), the Guarantors (as defined below) and Citibank, N.A., London Branch, as trustee (the “Trustee”), paying agent and registrar. Copies of the form of the Indenture are available upon request to the Issuer.

You will find the definitions of capitalised terms used in this description either in the body of this section or at the end of this section under “—Certain Definitions”.

Application has been made to list the Notes on the Luxembourg Stock Exchange and for the Notes to be admitted to trading on the Luxembourg Stock Exchange’s Euro MTF Market.

The Indenture will not be qualified under, or incorporate or include, or be subject to, any of the provisions of, the Trust Indenture Act of 1939, as amended including Section 316(b) of such Act. The terms of the Notes will include those stated in the Indenture.

General

The Notes

The Notes:

- are general unsecured, senior obligations of the Issuer;
- are being offered in an aggregate principal amount of \$500,000,000;
- mature on 1 October 2027 at their aggregate principal amount;
- will be issued in denominations of \$200,000 and integral multiples of \$1,000 in excess thereof;
- will be represented by one or more global notes in registered form without interest coupons attached. Please see “Book-Entry; Delivery and Form”;
- rank equally in right of payment to any existing and future senior unsecured Indebtedness of the Issuer; and
- will be repaid at par in U.S. dollars.

Additional Notes

The Issuer in a supplemental indenture relating to additional notes may issue additional notes (the “Additional Notes”) from time to time after this offering subject to the provisions of the Indenture described below under “—Certain Covenants”. The Notes offered hereby and, if issued, any Additional Notes subsequently issued under the Indenture will be treated as a single class for all purposes under the Indenture, including, without limitation, waivers, amendments, redemptions and offers to purchase (*provided* that, if any Additional Notes are not fungible with existing Notes of the same class for U.S. federal income tax purposes, such Additional Notes shall have a separate CUSIP, ISIN and common code, if any).

Interest

Interest on the Notes will:

- accrue at the rate of 4.500% per annum;
- accrue from the Issue Date or the most recent interest payment date;
- be payable in cash semi-annually in arrears, with the first interest payment covering the period from the Issue Date to 1 April 2018;

- be payable semi-annually on 1 April and 1 October of each year to the holders of record on 15 March and 15 September, as the case may be, immediately preceding the related interest payment dates; and
- be computed on the basis of a 360-day year comprised of twelve 30-day months.

The yield calculated at issuance of the Notes was 4.500%. Your yield will depend on the price at which you purchase the Notes.

If the due date for any payment (including, without limitation, payment of principal, interest or Additional Amounts or in relation to any redemption) in respect of any Note is not a Business Day, the holder thereof will not be entitled to payment of the amount due until the next succeeding Business Day, and will not be entitled to any further interest or other payment as a result of any such delay.

Guarantees

The obligations of the Issuer under the Notes, including the repurchase obligation of the Issuer resulting from a Change of Control Repurchase Event, will be unconditionally guaranteed, on a joint and several basis, by Jaguar Land Rover Limited and Jaguar Land Rover Holdings Limited (the “Guarantors”). These guarantees (the “Note Guarantees”) by the Guarantors will not exceed the maximum amount that can be guaranteed by the applicable Guarantor without rendering the Note Guarantee, as it relates to the Guarantor, voidable or unenforceable under applicable laws affecting the rights of creditors generally.

Under the Indenture, a Guarantor may consolidate with, merge with or into, or transfer all or substantially all of its assets to any other Person as described below under “—Certain Covenants—Consolidation, Merger and Sales of Assets.” However, if the other Person is not the Issuer or a Guarantor, such Guarantor’s obligations under its Note Guarantees must be expressly assumed by such other Person. Upon the sale or other disposition (including by way of consolidation or merger) of a Guarantor, or the sale or disposition of all or substantially all the assets of a Guarantor (in each case other than to the Issuer), such Guarantor will be released and relieved from all its obligations under its Note Guarantees.

The Note Guarantee of a Guarantor will be released:

- (1) in connection with any sale or other disposition of all or substantially all of the assets of that Guarantor (including by way of merger, consolidation, amalgamation or combination) to a Person that is not (either before or after giving effect to such transaction) the Issuer or a Subsidiary, if the sale or other disposition does not violate the covenants described under “—Certain Covenants—Consolidation, Merger and Sales of Assets”;
- (2) in connection with any sale or other disposition of Capital Stock of that Guarantor (or Capital Stock of any Parent Holdco of such Guarantor (other than the Issuer)) to a Person that is not (either before or after giving effect to such transaction) the Issuer or a Subsidiary, if the sale or other disposition does not violate the covenants described under “—Certain Covenants—Consolidation, Merger and Sales of Assets” and the Guarantor ceases to be a Subsidiary as a result of the sale or other disposition;
- (3) in connection with any sale or other disposition of all or substantially all of the assets of that Guarantor (including by way of merger, consolidation, amalgamation or combination) to another Guarantor, if the sale or other disposition does not violate the covenants described under “—Certain Covenants—Consolidation, Merger and Sales of Assets”;
- (4) upon legal defeasance, covenant defeasance or satisfaction and discharge of the Indenture as provided below under the captions “—Defeasance” and “—Satisfaction and Discharge”;
- (5) upon the full and final payment of the Notes and performance of all obligations of the Issuer and the Guarantors under the Indenture and the Notes; or
- (6) as described below under the caption “—Amendments and Waivers”.

Upon any occurrence giving rise to a release of a Note Guarantee, as specified above, the Trustee, subject to receipt of an Officer’s Certificate from the Issuer and/or Guarantor with respect to the occurrence of an event specified above, will execute any documents reasonably required by such Guarantor in order to evidence or effect such release,

discharge and termination in respect of such Note Guarantee. Neither the Issuer, the Trustee nor any Guarantor will be required to make a notation on the Notes to reflect any such release, discharge or termination.

Ranking

The Notes will be senior unsecured obligations of the Issuer and the Note Guarantees will be senior unsecured obligations of the Guarantors. The payment of the principal of, premium, if any, and interest on the Notes and the obligations of the Guarantors under the Note Guarantees will:

- rank *pari passu* in right of payment with all other Indebtedness of the Issuer and the Guarantors, as applicable, that is not by its terms expressly subordinated (and is not senior) in right of payment to other Indebtedness of the Issuer and the Guarantors, as applicable;
- rank senior in right of payment to all Indebtedness of the Issuer and the Guarantors, as applicable, that is, by its terms, expressly subordinated to the senior Indebtedness of the Issuer and the Guarantors, as applicable; and
- be effectively subordinated to the secured Indebtedness of the Issuer and the Guarantors, as applicable, to the extent of the value of the collateral securing such Indebtedness, and to the Indebtedness of the Subsidiaries that are not Guarantors of the Notes.

Form of Notes

The Notes will be represented initially by global notes in registered form. The Notes initially offered and sold in reliance on Rule 144A under the Securities Act (“Rule 144A”) will be represented by global Notes (the “Rule 144A Global Notes”); and the Notes initially offered and sold in reliance on Regulation S under the Securities Act (“Regulation S”) will be represented by additional global Notes (the “Regulation S Global Notes”). The combined principal amounts of the Rule 144A Global Notes and the Regulation S Global Notes (together, the “Global Notes”) will at all times represent the total outstanding principal amount of the Notes represented thereby.

The Global Notes will be deposited with a custodian for DTC and registered in the name of Cede & Co., as nominee for DTC, in each case for credit to an account of a direct or indirect participant in DTC (including Euroclear Bank SA/NV and Clearstream Banking, *société anonyme*). Ownership of interests in the Global Notes (the “Book-Entry Interests”) will be limited to persons that have accounts with DTC or persons that hold interests through any such participant. DTC will hold interests in the Global Notes on behalf of its participants through customers’ securities accounts. Except under the limited circumstances described in “Book-Entry; Delivery and Form”, Book-Entry Interests will not be held in definitive certificated form.

Paying Agent and Registrar

Citibank, N.A., London Branch, will initially act as paying agent (the “Paying Agent”) for the Notes. Citibank, N.A., London Branch, will initially act as registrar (the “Registrar”) for the Notes. The Issuer may change the Paying Agent or Registrar for the Notes, and the Issuer may act as Registrar for its Notes. For further information on payments on the Notes and transfers of the Notes, please see “Book-Entry; Delivery and Form”.

Optional Redemption

Upon not less than 10 nor more than 60 days’ written notice, the Issuer may redeem at any time, at its option, all or part of the Notes at a redemption price equal to the greater of:

- (1) 100% of the principal amount of the Notes to be redeemed; and
- (2) the sum of the present values of the remaining scheduled payments of principal and interest thereon (exclusive of interest accrued and unpaid to the date of redemption) from the redemption date to the maturity date of the Notes, in each case discounted to the redemption date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 50 basis points,

plus, in each case, accrued and unpaid interest thereon to, but excluding, the date of redemption; *provided* that, if the Issuer redeems any Notes on or after 1 July 2027 (three months prior to the maturity date of the Notes), the redemption price for those Notes will equal 100% of the principal amount of the Notes to be redeemed, plus accrued and unpaid interest to the redemption date.

For the avoidance of doubt, calculation of the redemption price shall not be a duty or obligation of the Trustee, the Registrar, any co-registrar, the Paying Agent or any additional paying agent.

If such optional redemption date is on or after an interest record date and on or before the related interest payment date, the accrued and unpaid interest, if any, will be paid to the Person in whose name the Note is registered at the close of business on such record date, and no additional interest will be payable to beneficial holders whose Notes will be subject to redemption by the Issuer.

In the case of any partial redemption, the Trustee will select the Notes for redemption in compliance with the requirements of the principal securities exchange, if any, on which the Notes are listed, as certified by the Issuer to the Trustee, or, if the Notes are not listed or the relevant national securities exchange does not have any applicable requirements, then on a *pro rata* basis, by lot or by such other method as the Trustee in its sole discretion will deem to be fair and appropriate, and in any case in relation to Notes in global form in accordance with the rules and procedures of each relevant clearing system, although no Note of \$200,000 in original principal amount or less will be redeemed in part. If any Note is to be redeemed in part only, the notice of redemption relating to that Note will state the portion of the principal amount thereof to be redeemed. A new Note in principal amount equal to the unredeemed portion thereof will be issued and delivered in the name of the holder thereof upon cancellation of the original Note.

Notice of any redemption will be mailed not less than 10 nor more than 60 days before the redemption date to each holder of Notes. Any such redemption and notice may, in the Issuer's discretion, be subject to the satisfaction of one or more conditions precedent. In addition, if such redemption or notice is subject to satisfaction of one or more conditions precedent, such redemption or notice shall state that in the Issuer's discretion, the redemption date may be delayed until such time as any or all such conditions shall be satisfied or waived by the Issuer in its sole discretion (*provided, however*, that, in any case, such redemption date shall be no more than 60 days from the date on which such notice is first given), or such redemption may not occur and such notice may be rescinded in the event that any or all such conditions shall not have been satisfied (or waived) by the redemption date or by the redemption date so delayed. In addition, the Issuer may provide in such notice that payment of the redemption price and performance of the Issuer's obligations with respect to such redemption may be performed by another Person. Unless the Issuer defaults in the payment of the redemption price, interest will cease to accrue on the Notes or the portion thereof called for redemption on the applicable redemption date.

In connection with any tender offer for the Notes, including a Change of Control Offer, if holders of not less than 90% in aggregate principal amount of the outstanding Notes validly tender and do not validly withdraw such Notes in such tender offer and the Issuer, or any third party making such a tender offer in lieu of the Issuer, purchases all of the Notes validly tendered and not validly withdrawn by such holders, the Issuer or (with the approval of the Issuer) such third-party will have the right upon not less than 10 nor more than 60 days' notice, given not more than 30 days following such tender offer expiration date, to redeem the Notes, as applicable, that remain outstanding in whole, but not in part, following such purchase at a price equal to the price offered to each other holder of the Notes, as applicable, in such tender offer (excluding any early tender or incentive fee), *plus*, to the extent not included in the tender offer payment, accrued and unpaid interest, if any, thereon, to, but not including, the redemption date.

Redemption for Changes in Withholding Taxes

The Issuer is entitled to redeem the Notes issued by it, at its option, in whole but not in part, upon not less than 10 nor more than 60 days' notice, at 100% of the principal amount of such Notes, plus accrued and unpaid interest (if any) to the date of redemption (subject to the right of holders of record on the relevant record date to receive interest due on the relevant interest payment date), if due to a Change in Tax Law (as defined below):

- (a) in the case of the Issuer or any Guarantor, as the case may be, the Issuer or Guarantor has, or would, on the next date on which any amount would be payable with respect to such Notes, become obligated to pay to the holder or beneficial owner of any Note any Additional Amounts (as defined below under “—Additional Amounts”); and
- (b) in the case of any Guarantor, (A) such Guarantor would be unable, for reasons outside its control, to procure payment by the Issuer or (B) the procuring of such payment by the Issuer would be subject to

withholding taxes imposed by a Relevant Taxing Jurisdiction (as defined below under “—Additional Amounts”);

provided, however, that the Issuer determines, in its reasonable judgment, that the obligation to pay such Additional Amounts cannot be avoided by the use of reasonable measures available to it, and *provided, further*, that at the time such notice is given, such obligation to pay Additional Amounts remains in effect.

For purposes hereof, a “Change in Tax Law” shall mean any change in or an amendment to the laws, treaties, regulations or rulings of any Relevant Taxing Jurisdiction, including any change in the application, administration or administrative or judicial interpretation of such laws, treaties, regulations or rulings; which change or amendment has not been publicly announced as formally proposed before and which becomes effective on or after the Issue Date (or, if the Relevant Taxing Jurisdiction became a Relevant Taxing Jurisdiction on a date after the Issue Date, such later date).

Notice of any such redemption shall be irrevocable. Prior to the publication or, where relevant, mailing of any notice of redemption described under the caption “—Redemption for Changes in Withholding Taxes”, the Issuer shall deliver to the Trustee an Officer’s Certificate stating that the Issuer is entitled to effect such redemption in accordance with the terms set forth in the Indenture and setting forth in reasonable detail a statement of the facts relating thereto (together with a written Opinion of Counsel to the effect that the Issuer or any Guarantor has become obligated to pay such Additional Amounts as a result of a Change in Tax Law). The Trustee will accept such Officer’s Certificate and Opinion of Counsel as sufficient evidence of the satisfaction of the conditions precedent described above, without further inquiry, in which event it will be conclusive and binding on the holders of the Notes.

The foregoing provisions shall apply *mutatis mutandis* to any successor Person, after such successor Person becomes a party to the Indenture, with respect to a Change in Tax Law occurring after the time such successor Person becomes a party to the Indenture.

Additional Amounts

All payments made under or with respect to the Notes under the Indenture or pursuant to any Note Guarantee shall be made free and clear of and without withholding or deduction for or on account of any present or future Taxes imposed or levied by or on behalf of (i) the United Kingdom or any political subdivision or governmental authority thereof or therein having the power to tax; (ii) any jurisdiction from or through which payment on the Notes or any Note Guarantee is made, or any political subdivision or governmental authority thereof or therein having the power to tax; or (iii) any other jurisdiction in which the Issuer or any Guarantor is incorporated or organized, engaged in business for tax purposes or resident for tax purposes, or any political subdivision or governmental authority thereof or therein having the power to tax (each a “Relevant Taxing Jurisdiction”), unless the Issuer or any Guarantor is required to withhold or deduct Taxes by law or by the interpretation or administration thereof by the relevant government authority or agency. If the Issuer or any Guarantor is so required to withhold or deduct any amount for or on account of Taxes imposed or levied by or on behalf of any Relevant Taxing Jurisdiction from any payment made under or with respect to the Notes or any Note Guarantee, such Issuer or such Guarantor, as the case may be, will pay such additional amounts (“Additional Amounts”) as may be necessary so that the net amount (including Additional Amounts) received by each holder after such withholding or deduction (including any withholding or deduction on such Additional Amounts) will not be less than the amount such holder would have received if such Taxes had not been withheld or deducted; *provided, however*, that no Additional Amounts will be payable with respect to payments made to any holder or beneficial owner for or on account of:

- (a) any Taxes that would not have been imposed, assessed, levied or collected but for the existence of a present or former business or personal connection between the holder or beneficial owner of the Notes or applicable Note Guarantee and the Relevant Taxing Jurisdiction imposing such Taxes (other than the mere receipt, ownership, holding or disposition of the Notes or any Note Guarantees, or the receipt of any payments or the exercise or enforcement of rights under any Note or any Note Guarantees);
- (b) any Taxes that would not have been imposed, assessed, levied or collected but for the fact that, where presentation is required, the applicable Note or Note Guarantee was presented for payment more than 30 days after the Relevant Date (as defined below) except to the extent that a holder would have been entitled to such Additional Amounts if it had presented the Note or Note Guarantee, as applicable, on any day during such 30-day period;
- (c) any Taxes that would not have been imposed, assessed, levied or collected had the holder or beneficial owner of the Notes or any Note Guarantee complied, on a timely basis, with a written request of the

Issuer or any Guarantor for any applicable information or certification that would have, if provided on a timely basis, permitted the payment to be made without withholding or deduction (or with a reduced rate of withholding or deduction);

- (d) any estate, inheritance, gift, sales, excise, transfer, personal property or similar Taxes;
- (e) any Taxes payable other than by deduction or withholding from payments under, or with respect to, the Notes or any Note Guarantee;
- (f) any withholding or deduction required to be made from a payment pursuant to Sections 1471-1474 of the U.S. Internal Revenue Code of 1986, as of the Issue Date (or any amended or successor version) (the "Code"), any current or future regulations or official interpretations thereof, any similar law or regulations adopted pursuant to an intergovernmental agreement between a non-U.S. jurisdiction and the United States with respect to the foregoing or any agreements entered into pursuant to Section 1471(b)(1) of the Code; or
- (g) any Taxes that are payable on account of any combination of (a) through (f) above.

In addition, Additional Amounts will not be paid in respect of any payment in respect of the Notes or any Note Guarantee to any holder or beneficial owner of the applicable Notes or Note Guarantee that is a fiduciary, a partnership, a limited liability company or any person other than the sole beneficial owner of such payment to the extent such payment would be required by the laws of a Relevant Taxing Jurisdiction to be included in the income for tax purposes of a beneficiary or settlor with respect to such fiduciary, a member of such partnership, an interest holder in such limited liability company or a beneficial owner that would not have been entitled to such Additional Amounts had such beneficiary, settlor, member, interest holder or beneficial owner been the holder of such Notes or Note Guarantee.

For purposes of the foregoing, the "Relevant Date" means, in respect of any payment, the date on which such payment first becomes due and payable, but if the full amount of the monies payable has not been received by the Paying Agent on or prior to such due date, the Relevant Date means the first date on which, the full amount of such monies having been so received and being available for payment to holders, notice to that effect has been duly given to the holders.

Wherever in the Indenture or the Notes or any Note Guarantee there are mentioned, in any context, (1) the payment of principal, (2) purchase prices in connection with a purchase of Notes under the Indenture or the Notes, (3) interest or (4) any other amount payable on or with respect to any of the Notes or any Note Guarantee, such reference shall be deemed to include payment of Additional Amounts as described under this heading to the extent that, in such context, Additional Amounts are, were or would be payable in respect thereof.

At least 30 days prior to each date on which payment of principal of or premium, if any, interest or other amounts on the Notes or any Note Guarantee is to be made (unless an obligation to pay Additional Amounts arises less than 45 days prior to that payment date, in which case it shall be promptly thereafter), if the Issuer or any Guarantor will be obligated to pay Additional Amounts with respect to any such payment, such Issuer will furnish to the Trustee and the Paying Agent, if other than the Trustee, an Officer's Certificate stating that such Additional Amounts will be payable and the amounts estimated to be so payable, and will set forth such other information necessary to enable the Trustee or the Paying Agent to pay such Additional Amounts to the holders on the payment date.

The Issuer or the relevant Guarantor will make all withholdings and deductions required by law and will remit the full amount deducted or withheld to the relevant tax authority in accordance with applicable law. The Issuer or the relevant Guarantor will use its reasonable efforts to obtain tax receipts from each tax authority evidencing the payment of any Taxes so deducted or withheld. The Issuer or the relevant Guarantor will furnish to the Trustee, within a reasonable time after the date the payment of any Taxes so deducted or withheld is made, certified copies of tax receipts evidencing payment by the Issuer or a Guarantor, as the case may be, or if, notwithstanding such entity's efforts to obtain receipts, receipts are not obtained, other evidence of payments (reasonably satisfactory to the Trustee) by such entity. If reasonably requested by the Trustee, the Issuer or the relevant Guarantor will provide to the Trustee such information as may be in the possession of the Issuer or the relevant Guarantor (and not otherwise in the possession of the Trustee) to enable the Trustee to determine the amount of withholding taxes attributable to any particular holder; *provided, however*, that in no event shall the Issuer or the relevant Guarantor be required to disclose any information that it reasonably deems to be confidential.

The foregoing obligations will survive any termination, defeasance or discharge of the Indenture. References in this section ("—Additional Amounts") to the Issuer or any Guarantor shall apply to any successor(s) thereto.

Change of Control

Each holder of the Notes, upon the occurrence of a Change of Control Repurchase Event, will have the right to require that the Issuer repurchase such holder's Notes (a "Change of Control Offer"), at a purchase price in cash equal to 101% of the principal amount thereof plus accrued and unpaid interest, if any, to the date of purchase (subject to the right of holders of record on the relevant record date to receive interest due on the relevant interest payment date).

Within 30 days following a Change of Control Repurchase Event, the Issuer will mail a notice to the holders of the Notes with a copy to the Trustee stating:

- (1) that a Change of Control Repurchase Event has occurred and that such holder has the right to require the Issuer to purchase such holder's Notes, at a purchase price in cash equal to 101% of the principal amount thereof plus accrued and unpaid interest, if any, to the date of purchase (subject to the right of holders of record on the relevant record date to receive interest on the relevant interest payment date);
- (2) a description of the transaction or transactions that constitute such Change of Control Repurchase Event;
- (3) the repurchase date (which shall be no earlier than 30 days nor later than 60 days from the date such notice is mailed);
- (4) that each Note will be subject to repurchase only in integral multiples of \$1,000 (*provided* that no Note of less than \$200,000 remains outstanding thereafter); and
- (5) the instructions determined by the Issuer, consistent with the covenant described hereunder, that a holder must follow in order to have its Notes purchased.

The Issuer will comply, to the extent applicable, with the requirements of Section 14(e) of the Exchange Act and any other securities laws or regulations in connection with the repurchase of Notes pursuant to this covenant. To the extent that the provisions of any securities laws or regulations or applicable listing requirements conflict with the provisions of this covenant, the Issuer will comply with the applicable securities laws and regulations and will not be deemed to have breached its obligations under this covenant by virtue thereof.

The Issuer will not be required to repurchase Notes pursuant to this Change of Control Repurchase Event feature to the extent (i) a third party makes the Change of Control Offer in the manner, at the times and otherwise in compliance with the requirements set forth in the Indenture applicable to a Change of Control Offer made by the Issuer and purchases all Notes validly tendered and not withdrawn under such Change of Control Offer and/or (ii) a notice of redemption has been given pursuant to the Indenture as described above under the caption "—Optional Redemption", unless and until there is a default in payment of the applicable redemption price. Notwithstanding anything to the contrary contained in the Indenture or the Notes, a Change of Control Offer may be made in advance of a Change of Control Repurchase Event, conditional upon the consummation of the relevant Change of Control, so long as a definitive agreement has been executed that contains terms and provisions that would otherwise result in a Change of Control upon completion of the transactions contemplated thereby.

The Change of Control Repurchase Event feature is a result of negotiations between the Issuer and the initial purchasers. We have no present intention to engage in a transaction involving a Change of Control Repurchase Event, although it is possible that we would decide to do so in the future. Subject to the limitations discussed below, we could, in the future, enter into certain transactions, including acquisitions, refinancings or other recapitalizations, that would not constitute a Change of Control Repurchase Event under the Indenture, but that could increase the amount of Indebtedness outstanding at such time or otherwise affect our capital structure or credit ratings. These restrictions can only be waived with the consent of the holders of a majority in principal amount of the Notes then outstanding under the Indenture. Except so long as the limitations contained in such covenants are effective, the Indenture will not contain any covenants or provisions that may afford holders of the Notes protection in the event of a highly leveraged transaction.

The Issuer's ability to repurchase Notes upon a Change of Control Repurchase Event may be limited by a number of factors. The occurrence of some of the events that constitute a Change of Control Repurchase Event could constitute a default under certain other Indebtedness of the Issuer or its Subsidiaries which, in the event of a Change of Control Repurchase Event, could make it difficult for the Issuer to repurchase the Notes. Our future Indebtedness may contain prohibitions on the occurrence of certain events that would constitute a Change of Control Repurchase Event or require such Indebtedness to be repurchased upon a Change of Control Repurchase Event. Moreover, the exercise by the holders of their

right to require the Issuer to repurchase Notes could cause a default under such Indebtedness, even if the Change of Control Repurchase Event itself does not, due to the financial effect of such repurchase on us. Finally, the Issuer's ability to pay cash to the holders of Notes following the occurrence of a Change of Control Repurchase Event may be limited by our then existing financial resources. We cannot assure you that sufficient funds will be available when necessary to make any required repurchases. The provisions under the Indenture relating to the Issuer's obligation to make an offer to repurchase Notes as a result of a Change of Control Repurchase Event may be waived or modified with the written consent of the holders of a majority in principal amount of the Notes issued under the Indenture.

Certain Covenants

Limitation on Liens

The Indenture provides that the Issuer may not, and may not permit any of its Subsidiaries to, directly or indirectly, create, incur or assume any Lien (other than Permitted Liens) upon any of its or its Subsidiaries' Principal Manufacturing Property or upon the Capital Stock of any Manufacturing Subsidiary, whether such Principal Manufacturing Property or such Capital Stock is owned on the date of the Indenture or acquired after that date, securing any Indebtedness, unless contemporaneously with (or prior to) the incurrence of such Lien, effective provision is made to secure the Indebtedness due under the Indenture and the Notes, equally and ratably with (or prior to in the case of Liens with respect to Subordinated Obligations) the Indebtedness secured by such Lien for so long as such Indebtedness is so secured. Any such Lien created in favor of the Notes will be automatically and unconditionally released and discharged upon the release and discharge of the initial Lien to which it relates.

Consolidation, Merger and Sales of Assets

- (a) The Indenture provides that the Issuer and the Guarantors may not consolidate or merge with or into (whether or not the Issuer or such Guarantor is the Surviving Person), or sell, assign, transfer, lease, convey or otherwise dispose of all or substantially all of its properties and assets in one or more related transactions, to another Person unless:
- (1) the Surviving Person is an entity organized and existing under the laws of Germany, the United Kingdom, or any other member state of the European Union, Luxembourg, Switzerland, the United States of America, or any State thereof or the District of Columbia, or the jurisdiction of formation of such Issuer or any Guarantor; or, if the Surviving Person is an entity organized and existing under the laws of any other jurisdiction, such Issuer delivers to the Trustee an Opinion of Counsel to the effect that the rights of the holders of the Notes, would not be affected adversely as a result of the law of the jurisdiction of organization of the Surviving Person, insofar as such law affects the ability of the Surviving Person to pay and perform its obligations and undertakings in connection with its Note Guarantee or the ability of the Surviving Person to obligate itself to pay and perform such obligations and undertakings or the ability of the holders to enforce such obligations and undertakings;
 - (2) the Surviving Person (if other than the Issuer or such Guarantor) shall expressly assume, (A) in a transaction or series of transactions involving the Issuer, by a supplemental indenture in a form satisfactory to the Trustee, all of the obligations of the Issuer under the Indenture (including the obligation to pay Additional Amounts), or (B) in a transaction or series of transactions not involving the Issuer, by a Guarantee Agreement, in a form satisfactory to the Trustee, all of the obligations of such Guarantor under its Note Guarantee (including the obligation to pay Additional Amounts);
 - (3) at the time of and immediately after such transaction, no Default or Event of Default shall have occurred and be continuing; and
 - (4) the Issuer or such Guarantor delivers to the Trustee an Officer's Certificate and an Opinion of Counsel, each stating that such consolidation, merger, transfer, assignment, sale, lease or other disposition and such supplemental indenture and Guarantee Agreement, if any, comply with the Indenture.

- (b) The foregoing limitations contained in paragraph (a) do not apply to (i) any consolidation or merger among Guarantors, among the Issuer and one or more Guarantors or by a Subsidiary that is not a Guarantor with the Issuer or one or more Guarantors (the Issuer or any such Guarantor, as applicable, being the surviving or succeeding entity) or (ii) the sale, assignment, transfer, lease or other disposal by the Issuer or any Subsidiary of all or substantially all of its properties and assets to the Issuer or a Guarantor.

Reports

For so long as any Notes are outstanding, the Issuer will provide the Trustee with:

- (1) its annual financial statements and related notes thereto for the most recent two fiscal years prepared in accordance with the Accounting Principles (or any other internationally generally acceptable accounting standards in the event the Issuer is required by applicable law to prepare its financial statements in accordance with such other standards or is permitted and elects to do so), together with an audit report thereon, and together with a discussion of the material business developments, results of operations and financial condition, including a description of Indebtedness, for such fiscal years prepared in a manner substantially consistent with the corresponding disclosures in this Offering Memorandum within 150 days of the end of each fiscal year;
- (2) quarterly financial information as of, and for the period from the beginning of each fiscal year to, the close of each quarterly period (other than the fourth quarter), together with comparable information for the corresponding period of the preceding fiscal year, and a summary “Operating and Financial Review and Prospects” section prepared in a manner substantially consistent with this Offering Memorandum, providing a brief discussion of the results of operations for the quarter within 90 days following the end of the fiscal quarter; and
- (3) promptly after the occurrence of any material acquisition, disposition or restructuring of the Issuer and the Subsidiaries, taken as a whole, or any changes of the Chief Executive Officer or Chief Financial Officer at the Issuer or change in auditors of the Issuer or any other material event that the Issuer announces publicly, a report containing a description of such event.

The Issuer will, contemporaneously or promptly thereafter, (a) file a press release with the appropriate internationally recognised wire services in connection with each report described above and (b) post such report on the Issuer’s website. Upon the posting of any such report on the Issuer’s website, such report shall be deemed to be provided to the Trustee and the holders of the Notes for purposes of the Indenture.

In addition, so long as the Notes remain outstanding and during any period when the Issuer is not subject to Section 13 or 15(d) of the Exchange Act other than by virtue of the exemption therefrom pursuant to Rule 12g3-2(b), the Issuer will furnish to any holder or beneficial owner of Notes initially offered and sold in the United States to “qualified institutional buyers” as defined in Rule 144A under the Securities Act pursuant to such rule and any prospective purchaser in the United States designated by such holder or beneficial owner, upon request, any information required to be delivered pursuant to Rule 144A(d)(4) under the Securities Act.

If and for so long as the equity securities of the Issuer or any Qualified Parent Holdco (other than Tata Motors Limited or any of its Parent Holdcos) are listed on the Main Market of the London Stock Exchange, the New York Stock Exchange, Euronext Amsterdam, the Frankfurt Stock Exchange, the Hong Kong Stock Exchange, the Singapore Exchange or any other “national securities exchange” (within the meaning of, and subject to, the Exchange Act and other reporting requirements of the U.S. Securities and Exchange Commission) in the United States or any other “regulated market” (within the meaning of, and subject to, the EU Transparency Directive) in the European Union or, in each case, any successor thereof (each, a “Recognized Stock Exchange”) and the Issuer or such Parent Holdco is subject to and complies with the admission and disclosure standards applicable to issuers of equity securities admitted to trading on such Recognized Stock Exchange, the Issuer will be deemed to have complied with the foregoing provisions of this covenant.

Events of Default

The Indenture provides that any one or more of the following described events, which has occurred and is continuing, constitutes an “Event of Default” with respect to the Notes issued under such Indenture:

- (1) failure for 30 days to pay interest on the Notes, including any Additional Amounts in respect thereof, when due; or
- (2) failure to pay principal of or premium, if any, on the Notes when due, whether at maturity, upon redemption, by declaration or otherwise; or
- (3) failure to observe or perform any other covenant contained in the Indenture for 60 days after notice is provided; or
- (4) default under any mortgage, indenture or instrument under which there may be issued or by which there may be secured or evidenced any Indebtedness for money borrowed by the Issuer or any of its Subsidiaries other than Indebtedness owed to the Issuer or a Subsidiary, whether such Indebtedness or Guarantee now exists or is Incurred after the Issue Date, if (A) such default results in the acceleration of such Indebtedness prior to its express maturity or will constitute a default in the payment of such Indebtedness at its final maturity (upon the expiration of any grace period provided in the terms of such Indebtedness) and (B) the principal amount of any such Indebtedness that has been accelerated or not paid at final maturity, when added to the aggregate principal amount of all other such Indebtedness, at such time, that has been accelerated or not paid at maturity, exceeds £250.0 million; *provided* that this clause (4) shall permanently cease to be applicable to the Issuer and its Subsidiaries (and no Default or Event of Default shall be deemed to occur thereunder) upon the Notes achieving Investment Grade Status and such clause will not be reinstated if the Notes cease to maintain Investment Grade Status; or
- (5) any Note Guarantee shall cease to be in full force and effect in accordance with its terms for any reason except pursuant to the terms of the Indenture governing the release of Note Guarantees or the satisfaction in full of all the obligations thereunder or shall be declared invalid or unenforceable other than as contemplated by its terms, or any Guarantor shall repudiate, deny or disaffirm any of its obligations thereunder; or
- (6) certain events in bankruptcy, insolvency or reorganization of the Issuer, the Guarantors or any of the Issuer’s Significant Subsidiaries.

Notwithstanding the foregoing, a Default under paragraph (3) of this section will not constitute an Event of Default under the Indenture unless the Trustee or holders of 25% in principal amount of the outstanding Notes under the Indenture declare such Default to the Issuer in writing and such Default is not cured within 60 days of such notice, and a Default under paragraph (4) of this section will not constitute an Event of Default under the Indenture unless the Trustee or holders of 25% in principal amount of the outstanding Notes under the Indenture declare such Default to the Issuer in writing and such Default is not cured within 30 days of such notice.

The Indenture will provide that (i) if a Default for a failure to report or failure to deliver a required certificate in connection with another default (the “Initial Default”) occurs, then at the time such Initial Default is cured, such Default for a failure to report or failure to deliver a required certificate in connection with another default that resulted solely because of that Initial Default will also be cured without any further action and (ii) any Default or Event of Default for the failure to comply with the time periods prescribed in the covenant entitled “—Certain Covenants—Reports” or otherwise to deliver any notice or certificate pursuant to any other provision of the Indenture shall be deemed to be cured upon the delivery of any such report required by such covenant or such notice or certificate, as applicable, even though such delivery is not within the prescribed period specified in the Indenture.

So long as any of the Notes are outstanding, the Issuer will deliver to the Trustee, within 30 days of becoming aware of any Default or Event of Default, an Officer’s Certificate specifying such Default or Event of Default and what action the Issuer is taking or proposes to take with respect thereto.

The Trustee or the holders of not less than 25% in aggregate outstanding principal amount of the Notes under the Indenture may declare the principal of and interest (including any Additional Amounts) on such Notes due and payable

immediately on the occurrence of an Event of Default (other than an Event of Default described in clause (6) above). If an Event of Default described in clause (6) above occurs and is continuing, the principal of, premium, if any, and accrued and unpaid interest on all the Notes will become and be immediately due and payable without any declaration or other act on the part of the Trustee or any holders of Notes. The holders of a majority in aggregate principal amount of the then outstanding Notes by written notice to the Trustee and the Issuer may on behalf of all of the holders rescind an acceleration and its consequences if the rescission would not conflict with any judgment or decree and if all existing Events of Default (except non-payment of principal, interest or premium that has become due solely because of the acceleration) have been cured or waived. For information as to waiver of defaults, please see “—Amendments and Waivers”.

Subject to the provisions of the Indenture relating to the duties of the Trustee, in case an Event of Default shall occur and be continuing, the Trustee will be under no obligation to exercise any of its rights or powers under the Indenture at the request or direction of any holders of Notes issued thereunder unless such holders shall have provided to the Trustee indemnity and/or security satisfactory to it. Subject to the provisions for the indemnification of the Trustee, the holders of a majority in aggregate principal amount of the Notes issued thereunder then outstanding will have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Trustee, or exercising any trust or power conferred on the Trustee.

No holder of any Note will have any right to institute any proceeding with respect to the Indenture or for any remedy thereunder, unless written notice of a continuing Event of Default shall have previously been given in accordance with the terms of the Indenture and reasonable indemnity shall have been offered to the Trustee to institute such proceeding as Trustee, the Trustee shall have failed to institute such proceeding within 60 days and the Trustee shall not have received from the holders of a majority in aggregate principal amount of the outstanding Notes under the Indenture a direction inconsistent with such request within such 60-day period. However, such limitations do not apply to a suit instituted by a holder of a Note for enforcement of payment of the principal of and premium, if any, or interest on such Note on or after the respective due dates expressed in such Note.

The holders of a majority in aggregate outstanding principal amount of the Notes may, on behalf of all of the holders of the Notes, waive any existing default, except a default in the payment of principal, premium, if any, or interest or a default in respect of a covenant or provision that cannot be modified or amended without consent of the holders of 90% of the principal amount of the Notes outstanding. The Issuer is required to file annually with the Trustee a certificate as to whether or not the Issuer is in compliance with all the conditions and covenants under the applicable Indenture.

Amendments and Waivers

Subject to certain exceptions, the Indenture may be amended with the consent of the holders of a majority in principal amount of the Notes then outstanding (including, without limitation, consents obtained in connection with a purchase of, or tender offer or exchange offer for, such Notes) and, subject to certain exceptions, any existing default or compliance with any provisions may be waived with the consent of the holders of a majority in principal amount of the Notes then outstanding (including, without limitation, consents obtained in connection with a purchase of, or tender offer or exchange offer for, such Notes). However, without the consent of holders of at least 90% of the aggregate principal amount of the Notes then outstanding, no amendment or waiver may:

- (1) reduce the percentage of principal amount of Notes whose holders must consent to an amendment;
- (2) reduce the stated rate of or extend the stated time for payment of interest on any Note;
- (3) reduce the principal of or extend the Stated Maturity of any Note;
- (4) reduce the premium payable upon the redemption of any such Note or change the time at which any Note may be redeemed as described above under “—Optional Redemption”;
- (5) make any Note payable in money other than that stated in the Note;
- (6) impair the right of any holder to institute suit for the enforcement of any payment on or with respect to such holder’s Notes;
- (7) change the obligation of the Issuer or any Guarantor to pay Additional Amounts;
- (8) release any Guarantor from their Note Guarantee; or

- (9) make any change in the preceding amendment and waiver provisions.

Without the consent of any holder, the Issuer and the Trustee may amend the Indenture to:

- (1) cure any ambiguity, omission, defect or inconsistency;
- (2) conform the text of the Indenture, the Note Guarantees or the Notes to any provision of this “Description of the Notes” to the extent that such provision in this “Description of the Notes” was intended to be a verbatim recitation of a provision of the Indenture, the Note Guarantees, or the Notes;
- (3) add Note Guarantees with respect to the Notes;
- (4) secure the Notes;
- (5) add to the covenants of such Issuer and the Guarantors for the benefit of the holders or surrender any right or power conferred upon the Issuer;
- (6) evidence and provide the acceptance and appointment of a successor trustee;
- (7) comply with the rules of any applicable securities depository;
- (8) issue Additional Notes in accordance with such Indenture; or
- (9) make any change that does not adversely affect the rights of any holder in any material respect.

The consent of the holders is not necessary under the Indenture to approve the particular form of any proposed amendment or waiver to or under the Indenture. It is sufficient if such consent approves the substance of the proposed amendment or waiver. After an amendment, supplement or waiver under the Indenture becomes effective, the Issuer is required to mail to the holders a notice briefly describing such amendment, supplement or waiver. However, the failure to give such notice to all the holders, or any defect in the notice, will not impair or affect the validity of the amendment, supplement or waiver.

Defeasance

The Issuer may, at the option of its Board of Directors evidenced by a resolution set forth in an Officer’s Certificate, at any time terminate all its obligations under the Notes issued by it and the Indenture (“legal defeasance”), except for certain obligations, including those respecting the defeasance trust and obligations to register the transfer or exchange of the Notes, to replace mutilated, destroyed, lost or stolen Notes and to maintain a registrar and paying agent in respect of the Notes.

The Issuer may, at the option of its Board of Directors evidenced by a resolution set forth in an Officer’s Certificate, at any time terminate its obligations under the covenants described under “—Certain Covenants” (other than “—Certain Covenants—Consolidation, Merger and Sales of Assets”), the operation of the cross-default upon a payment default, cross-acceleration provisions and the bankruptcy provisions with respect to Subsidiaries described under “—Events of Default” above (“covenant defeasance”).

The Issuer may exercise its legal defeasance option notwithstanding its prior exercise of its covenant defeasance option. If the Issuer exercises its legal defeasance option, payment of the Issuer’s Notes may not be accelerated because of an Event of Default with respect to such Notes. If the Issuer exercises its covenant defeasance option, payment of such Issuer’s Notes may not be accelerated because of an Event of Default specified in paragraphs (3) (as it relates to such covenants terminated by covenant defeasance), (4), (5) or (6) (as it relates to Subsidiaries) under “—Events of Default” above or because of the failure of the Issuer to comply with paragraph (4) under “—Certain Covenants—Consolidation, Merger and Sales of Assets” above.

In order to exercise either defeasance option, the Issuer must irrevocably deposit in trust (the “defeasance trust”) with the Trustee (or another entity designated by the Trustee for such purposes) for the benefit of the holders U.S. dollars or U.S. dollar-denominated Designated Government Obligations for the payment of principal, premium, if any, and interest on

the Notes of such Issuer to redemption or maturity, as the case may be, and must comply with certain other conditions, including delivery to the Trustee of:

- (a) an Opinion of Counsel (subject to customary exceptions and exclusions) to the effect that U.S. and non-U.S. holders of such Notes will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such deposit and defeasance and will be subject to U.S. federal income tax on the same amount and in the same manner and at the same times as would have been the case if such deposit and defeasance had not occurred. In the case of legal defeasance only, such Opinion of Counsel must be based on a ruling of the Internal Revenue Service or other change in applicable U.S. federal income tax law;
- (b) an Officer's Certificate and an Opinion of Counsel each stating that all conditions precedent relating to legal defeasance or covenant defeasance, as applicable, have been complied with; and
- (c) all other documents or other information that the Trustee may reasonably require in connection with the legal defeasance or the covenant defeasance, as applicable.

Satisfaction and Discharge

The Indenture will be discharged and will cease to be of further effect as to all the Notes issued thereunder, when:

- (1) either:
 - (a) all the Notes that have been authenticated, except lost, stolen or destroyed Notes that have been replaced or paid and Notes for whose payment money has been deposited in trust and thereafter repaid to the Issuer, have been delivered to the Trustee for cancellation; or
 - (b) all the Notes that have not been delivered to the Trustee for cancellation have become due and payable by reason of the mailing of a notice of redemption or otherwise or will become due and payable within one year and the Issuer or any Guarantor has irrevocably deposited or caused to be deposited with the Trustee (or another entity designated by the Trustee for such purposes) as trust funds in trust solely for the benefit of the holders, cash in U.S. dollars or U.S. dollar-denominated Designated Government Obligations, or a combination, in amounts as will be sufficient, without consideration of any reinvestment of interest, to pay and discharge the entire Indebtedness on the Notes not delivered to the Trustee for cancellation for principal, premium and Additional Amounts, if any, and accrued interest to the date of maturity or redemption;
- (2) the Issuer or any Guarantor has paid or caused to be paid all sums payable by it under the Indenture; and
- (3) the Issuer has delivered irrevocable instructions to the Trustee under the Indenture to apply the deposited money toward the payment of the Notes at maturity or on the redemption date, as the case may be.

In addition, the Issuer must deliver an Officer's Certificate and an Opinion of Counsel to the Trustee stating that all conditions precedent to satisfaction and discharge have been complied with; *provided* that any such counsel may rely on any Officer's Certificate as to matters of fact (including as to compliance with the foregoing clauses (1), (2) and (3)).

No Personal Liability of Directors, Officers, Employees and Stockholders

No member of the Board of Directors, director, officer, employee, incorporator or stockholder of the Issuer or the Guarantors, as such, shall have any liability for any obligations of the Issuer or any Guarantor under the Notes, the Indenture or the Note Guarantees or for any claim based on, in respect of, or by reason of, such obligations or their creation. Each holder by accepting a Note waives and releases all such liability and agrees not to enforce any claim in respect of the Notes, the Indenture or the Note Guarantees to the extent that it would give rise to such personal liability. The waiver and release are part of the consideration for issuance of the Notes and the Note Guarantees. Such waiver and release may not be effective to waive liabilities under the U.S. federal securities laws and it is the view of the U.S. Securities and Exchange Commission that such a waiver is against public policy.

Consent to Jurisdiction and Service of Process

The Indenture provides that the Issuer and each Guarantor irrevocably agree to accept notice and service of process in any suit, action or proceeding with respect to the Indentures and the Notes, as the case may be, brought in any U.S. federal or state court located in the Borough of Manhattan in the City of New York and that the Issuer and each Guarantor submits to the jurisdiction thereof.

Concerning the Trustee

Citibank, N.A., London Branch, is the Trustee under the Indenture and has been appointed by the Issuer as Registrar with regard to the Notes. Citibank, N.A., is a company incorporated with limited liability in the United States of America under the laws of the City and State of New York on 14 June 1812 and reorganised as a national banking association formed under the laws of the United States of America on 17 July 1865 with Charter number 1461 and having its principal business office at 399 Park Avenue, New York, NY 10043, USA and having in Great Britain a principal branch office situated at Canada Square, Canary Wharf, London E14 5LB with company number FC001835 and branch number BR001018. The Trustee authenticates each Global Note and, as Registrar, is responsible for the transfer and registration of Notes exchanged in accordance with the Indenture. Upon the occurrence of an Event of Default as defined under the Indenture, the Trustee must notify the holders of the Notes issued thereunder of such default and thereafter the Trustee may pursue various actions and remedies on behalf of the holders of such Notes as set out in the Indenture and approved by the holders of the Notes. In its capacity as Trustee, the Trustee may sue on its own behalf the holders of the Notes. The Trustee will not be liable for any action it takes or omits to take in good faith which it believes, acting in good faith, to be authorised under the Indenture. The Trustee is further entitled to require and rely in good faith on an Officer's Certificate, issuer order (as applicable) or Opinion of Counsel before taking action. The Trustee is indemnified by the Issuer under the Indenture for any and all loss, damage, claim proceedings, demands, costs, expenses or liability including taxes incurred by the Trustee without negligence or willful misconduct on its part in connection with the acceptance of administration of the trust under the Indenture. The Trustee may resign at any time by notifying the Issuer in writing. The Trustee may be removed by the holders of a majority in principal amount of the Notes as the case may be, by notifying the Issuer and the Trustee in writing, and such majority holders may appoint a successor trustee with the Issuer's consent. In addition, the Issuer may remove the Trustee upon certain bankruptcy and similar events relating to the Trustee or if the Trustee becomes incapable of acting with respect to its duties under the Indenture.

Validity of Claims

The time of validity for a payment of interest, principal, the redemption price or another amount payable under the Indenture is six years from the date on which such payment is due.

Governing Law

The Indenture and the Notes will be governed by, and construed in accordance with, the laws of the State of New York. The Note Guarantees will be governed by, and construed in accordance with, the laws of the State of New York, except that certain matters concerning the limitations thereof will be construed in accordance with the laws of the United Kingdom.

Certain Definitions

As used in the Indenture (except as specifically noted below):

“Accounting Principles” means IFRS or, upon adoption thereof by the Issuer and notice to the Trustee, any other accounting standards which are generally acceptable in the jurisdiction of organization of the Issuer, approved by the relevant regulatory or other accounting bodies in that jurisdiction and internationally generally acceptable and as in effect from time to time.

“Affiliate” of any specified Person means:

- (1) any other Person, directly or indirectly, controlling or controlled by; or
- (2) under direct or indirect common control with such specified Person.

For the purposes of this definition, “control” when used with respect to any Person means the power to direct the management and policies of such Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise; and the terms “controlling” and “controlled” have meanings correlative to the foregoing.

“Board of Directors” means, with respect to the Issuer or any Guarantor, as the case may be, the Board of Directors (or other body performing functions similar to any of those performed by a Board of Directors) or any committee thereof duly authorised to act on behalf of such Board of Directors (or other body).

“Business Day” means any day other than:

- (1) a Saturday or Sunday;
- (2) a day on which banking institutions in London, New York City or the jurisdiction of organization of the office of the Paying Agent (other than the Trustee) are authorised or required by law or executive order to remain closed; or
- (3) except for purposes of payment made on or in respect of the Notes by a Paying Agent other than the Trustee, a day on which the corporate trust office of the Trustee is closed for business.

“Capital Lease Obligations” means an obligation that is required to be classified and accounted for as a capital lease for financial reporting purposes in accordance with the Accounting Principles, as in effect as of the Issue Date, and the amount of Indebtedness represented by such obligation shall be the capitalized amount of such obligation determined in accordance with such Accounting Principles; and the Stated Maturity thereof shall be the date of the last payment of rent or any other amount due under such lease prior to the first date upon which such lease may be terminated by the lessee without payment of a penalty.

“Capital Stock” of any Person means any and all shares, interests, rights to purchase, warrants, options, participations or other equivalents of or interests in (however designated) equity of such Person, including any Preferred Stock, but excluding any debt securities convertible into such equity.

“Captive Finance Company” means a Subsidiary of the Issuer which is incorporated for the primary purpose of, and primarily engages in, providing wholesale and/or retail finance (including, for the avoidance of doubt, retail leasing) for the Issuer or any of its Subsidiaries, the dealers, distributors or customers of the Issuer or any of its Subsidiaries and other activities or services reasonably relating thereto or in connection therewith.

“Change of Control” means the occurrence of one or more of the following events:

- (1) the Issuer becomes aware that any person or group of related persons (as such terms are used in Section 13(d) and 14(d) of the Exchange Act as in effect on the Issue Date) other than Tata Motors Limited or any of its Affiliates has become the beneficial owner (as defined in Rules 13d-3 and 13d-5 of the Exchange Act as in effect on the Issue Date), directly or indirectly, of more than 50% of the total voting power of the Voting Stock of the Issuer; or
- (2) any sale, lease, exchange or other transfer (in one transaction or a series of related transactions) of all or substantially all of the assets of the Issuer to any person or group of related persons (as such terms are used in Section 13(d) and 14(d) of the Exchange Act as in effect on the Issue Date) other than to one or more Subsidiaries.

Notwithstanding the foregoing, (i) a person or group of related persons shall not be deemed to beneficially own securities subject to an equity or asset purchase agreement, merger agreement or similar agreement (or voting or option or similar agreement related thereto) until the consummation of the transactions contemplated by such agreement and (ii) the right to acquire Voting Stock (so long as such Person does not have the right to direct the voting of the Voting Stock subject to such right) or any veto power in connection with the acquisition or disposition of Voting Stock will not cause a party to be a beneficial owner.

“Change of Control Repurchase Event” means the occurrence of a Change of Control and a Rating Event.

“Commodities Agreement” means any agreement or arrangement designed to protect the relevant Person against fluctuations in commodities prices.

“Consolidated Tangible Assets” means, as of any date of determination, the total amount of all assets of the Issuer and its Subsidiaries, less the sum of the Issuer’s consolidated assets that are properly classified as intangible assets, in each case determined on a consolidated basis in accordance with the Accounting Principles and as of the end of the most recent fiscal quarter for which the Issuer’s financial statements are available.

“Currency Agreement” means any foreign currency exchange contract, currency swap agreement or other similar agreement or arrangement.

“Default” means any event that is, or after notice or passage of time or both would be, an Event of Default (as defined herein).

“Designated Government Obligations” means direct non-callable and non-redeemable obligations (in each case, with respect to the issuer thereof) of any member state of the European Union that is a member of the European Union as of the Issue Date or of the United States of America (including, in each case, any agency or instrumentality thereof), as the case may be, the payment of which is secured by the full faith and credit of the applicable member state or of the United States of America, as the case may be.

“DTC” means The Depository Trust Company or any successor thereof.

“Exchange Act” means the U.S. Securities Exchange Act of 1934, as amended.

“Fitch” means Fitch Ratings, Ltd. and its successors.

“Guarantee” means any obligation, contingent or otherwise, of any Person directly or indirectly guaranteeing any Indebtedness or other obligation of any Person and any obligation, direct or indirect, contingent or otherwise, of such Person:

- (1) to purchase or pay (or advance or supply funds for the purchase or payment of) such Indebtedness or other obligation of such Person (whether arising by virtue of partnership arrangements, or by agreements to keep- well, to purchase assets, goods, securities or services, to take-or-pay or to maintain financial statement conditions or otherwise); or
- (2) entered into for the purpose of assuring in any other manner the obligee of such Indebtedness or other obligation of the payment thereof or to protect such obligee against loss in respect thereof (in whole or in part);

provided, however, that the term “Guarantee” shall not include endorsements for collection or deposit in the ordinary course of business. The term “Guarantee” used as a verb has a corresponding meaning. The term “guarantor” shall mean any Person Guaranteeing any obligation.

“Guarantee Agreement” means, in the context of a consolidation, merger or sale of all or substantially all of the assets of a Guarantor, an agreement by which the Surviving Person from such a transaction expressly assumes all of the obligations of such Guarantor under its Note Guarantee.

“Hedging Obligations” of any Person means the obligations of such Person pursuant to any Interest Rate Agreement, Commodities Agreement or Currency Agreement.

“IFRS” means international financial reporting standards and interpretations issued by the International Accounting Standards Board and adopted by the European Union, as in effect from time to time.

“Incur” means issue, assume, guarantee, incur or otherwise become liable for; *provided, however*, that any Indebtedness or Capital Stock of a Person existing at the time such Person becomes a Subsidiary (whether by merger, consolidation, acquisition or otherwise) shall be deemed to be Incurred by such Subsidiary at the time it becomes a Subsidiary. The term “Incurrence” when used as a noun shall have a correlative meaning. The accretion of principal of a non-interest bearing or other discount security shall be deemed the Incurrence of Indebtedness. In connection with credit facilities, overdraft facilities, debt facilities and similar instruments or arrangements with banks, other institutions, funds or investors

that provide for commitments or similar obligations to make loans or other advances, “Incur” means entering into the contractual commitment or agreement or similar obligation to make such loan or advance.

“Indebtedness” means indebtedness for money borrowed accounted for as debt on the consolidated balance sheet of the Issuer, prepared in accordance with the Accounting Principles.

“Interest Rate Agreement” means any interest rate swap agreement, interest rate cap agreement or other similar financial agreement or arrangement.

“Investment Grade Rating” means: (1) a rating of BBB– or higher (or the equivalent at such time) by S&P; (2) a rating of Baa3 or higher (or the equivalent at such time) by Moody’s; (3) a rating of BBB– or higher (or the equivalent at such time) by Fitch; or (4) the equivalent rating category of any Rating Agencies substituted for S&P, Moody’s or Fitch.

“Investment Grade Status” means such time when the Notes have achieved an Investment Grade Rating from at least one Rating Agency.

“Issue Date” means 10 October 2017.

“Lien” means any mortgage, pledge, security interest, encumbrance, lien or charge of any kind (including any conditional sale or other title retention agreement or lease in the nature thereof).

“Manufacturing Subsidiary” means any Subsidiary (other than a Captive Finance Company) (A) substantially all the property of which is located within the United Kingdom and (B) which owns a Principal Manufacturing Property.

“Moody’s” means Moody’s Investors Service, Inc. and its successors.

“Note Guarantee” means the Guarantee by a Guarantor of the Issuer’s obligations under the Notes.

“Officer’s Certificate” means a certificate signed by one Responsible Officer of the Issuer or, if applicable, a Guarantor.

“Opinion of Counsel” means a written opinion from legal counsel who is reasonably acceptable to the Trustee. The counsel may be an employee of or counsel to the Issuer, a Guarantor or the Trustee.

“Parent Holdco” means any Person (other than a natural person) which legally and beneficially owns more than 50% of the Voting Stock and/or Capital Stock of another Person, either directly or through one or more Subsidiaries.

“Permitted Liens” means, with respect to any Person:

- (1) pledges or deposits by such Person under workmen’s compensation laws, unemployment insurance laws or similar legislation, or good-faith deposits in connection with bids, tenders, contracts (other than for the payment of Indebtedness) or leases to which such Person is a party, or deposits to secure public or statutory obligations of such Person or deposits or cash or Designated Government Obligations to secure surety or appeal bonds to which such Person is a party, or deposits as security for contested taxes or import or customs duties or for the payment of rent, in each case Incurred in the ordinary course of business;
- (2) Liens imposed by law, including carriers’, warehousemen’s and mechanics’ Liens, in each case for sums not yet due or being contested in good faith if a reserve or other appropriate provisions, if any, as are required by the Accounting Principles have been made in respect thereof;
- (3) Liens for taxes, assessments or other governmental charges not yet subject to penalties for non-payment or which are being contested in good faith provided appropriate reserves, if any, as are required by the Accounting Principles have been made in respect thereof;
- (4) Liens in favor of issuers of surety or performance bonds or letters of credit or bankers’ acceptances issued pursuant to the request of and for the account of such Person in the ordinary course of its business;

- (5) encumbrances, easements or reservations of, or rights of others for, licenses, rights of way, sewers, electric lines, telegraph and telephone lines and other similar purposes, or zoning or other restrictions as to the use of real properties or liens incidental to the conduct of the business of such Person or to the ownership of its properties which do not in the aggregate materially adversely affect the value of said properties or materially impair their use in the operation of the business of such Person;
- (6) Liens securing Hedging Obligations;
- (7) leases, subleases and licenses of real property which do not materially interfere with the ordinary conduct of the business of the Issuer or any Subsidiary and leases, subleases and licenses of other assets in the ordinary course of business;
- (8) Liens for the purpose of securing the payment (or the refinancing of the payment) of all or a part of the purchase or construction price of, or Capital Lease Obligations with respect to, assets or property acquired, constructed or improved in the ordinary course of business; *provided* that:
 - (a) the aggregate principal amount secured by such Liens does not exceed the cost of the assets or property so acquired, constructed or improved; and
 - (b) such Liens are created within 180 days of construction or acquisition of such assets or property (or, upon a refinancing, replace Liens created within such period) and do not encumber any other assets or property of the Issuer or any Subsidiary other than such assets or property and assets affixed or appurtenant thereto;
- (9) Liens arising solely by virtue of any statutory or common law provisions relating to banker's Liens, rights of set-off or similar rights and remedies as to deposit accounts or other funds maintained with a depository institution; *provided* that such deposit account is not intended by the Issuer or any Subsidiary to provide collateral to the depository institution;
- (10) Liens arising from United States Uniform Commercial Code financing statement filings (or similar filings in other applicable jurisdictions) regarding operating leases entered into by the Issuer or any Subsidiary in the ordinary course of business;
- (11) Liens existing on the Issue Date;
- (12) Liens on property or shares of stock of a Person at the time such Person becomes a Subsidiary; *provided, however*, that such Liens are not created, Incurred or assumed in connection with, or in contemplation of, such other Person becoming a Subsidiary of the Issuer or the Guarantors;
- (13) Liens on property at the time the Issuer or any Subsidiary acquired the property, including any acquisition by means of a merger or consolidation with or into the Issuer or any Subsidiary; *provided, however*, that such Liens are not created, Incurred or assumed in connection with, or in contemplation of, such acquisition;
- (14) Liens securing Indebtedness or other obligations of the Issuer to a Subsidiary or of a Subsidiary owing to another Subsidiary;
- (15) Liens securing the Notes and all other Indebtedness which by its terms must be secured if the Notes are secured;
- (16) Liens securing Indebtedness Incurred to refinance Indebtedness that was previously secured;
- (17) Liens arising by operation of law or by agreement to the same effect in the ordinary course of business;
- (18) Liens arising out of conditional sale, title retention, consignment or similar arrangements for the sale of assets entered into in the ordinary course of business;

- (19) judgment Liens not giving rise to an Event of Default so long as such Lien is adequately bonded and any appropriate legal proceedings that may have been duly initiated for the review of such judgment have not been finally terminated or the period within which such proceedings may be initiated has not expired;
- (20) other Liens securing Indebtedness of the Issuer and its Subsidiaries (and, without duplication, guarantees of such Indebtedness by the Issuer or any Subsidiary), *provided* that the aggregate principal amount of such Indebtedness of the Issuer and its Subsidiaries (other than Indebtedness secured by Liens described elsewhere in this definition of Permitted Liens), measured as of the date of the creation of such Lien and the date of Incurrence of any such Indebtedness and after giving pro forma effect to the creation of such Lien, shall not exceed the greater of £1,700.0 million or 15.0% of the Issuer's Consolidated Tangible Assets;
- (21) Liens in favor of the United Kingdom or any department, agency or instrumentality or political subdivision thereof, or in favour of any other country, or any political subdivision thereof, to secure partial, progress, advance or other payments pursuant to any contract or statute or to secure any Indebtedness Incurred or guaranteed and for the purpose of financing all or any part of the purchase price or the cost of construction or improvement of the property subject to the Liens (including, without limitation, Liens Incurred in connection with pollution control, industrial revenue or similar financing); and
- (22) any extension, renewal, refinancing or replacement (including successive extensions, renewals, refinancings or replacements), in whole or in part, of any Lien described in the foregoing clauses (1) through (21); *provided* that any such Lien is limited to all or part of the same property or assets (plus improvements, accessions, reasonable extensions, proceeds or dividends or distributions in respect thereof) that secured (or, under the written arrangements under which the original Lien arose, could secure) the Indebtedness being refinanced, extended, renewed or replaced.

“Person” means any individual, corporation, partnership, joint venture, association, joint-stock company, trust, unincorporated organization, government or any agency, instrumentality or political subdivision thereof, or any other entity.

“Preferred Stock,” as applied to the Capital Stock of any corporation, means Capital Stock of any class or classes (however designated) which is preferred as to the payment of dividends, or as to the distribution of assets upon any voluntary or involuntary liquidation or dissolution of such corporation, over shares of Capital Stock of any other class of such corporation.

“Principal Manufacturing Property” means any manufacturing plant or manufacturing facility (including land, buildings and plant and machinery) located within the United Kingdom owned by the Issuer or any of its Subsidiaries (other than a Captive Finance Company), excluding any such plants or facilities with an aggregate net book value not to exceed 1.0% of Consolidated Tangible Assets of the Issuer, determined as of the date of such exclusion.

“Qualified Parent Holdco” means any Parent Holdco of which all or substantially all the assets consist of the Issuer and its Subsidiaries.

“Rating Agency” means: (1) each of Moody's, S&P or Fitch; or (2) if any of Moody's, S&P or Fitch ceases or is unable or unwilling to rate the Notes or fails to make a rating of the Notes publicly available for reasons outside of the Issuer's control, a “nationally recognized statistical rating organization” within the meaning of Rule 15c3-1(c)(2)(vi)(F) under the Exchange Act selected by us as a replacement agency for any or all of Moody's, S&P or Fitch, as the case may be.

“Rating Event” means:

- (1) if on the date of the first public announcement of an event that constitutes a Change of Control the Notes are then rated by any two Rating Agencies as having an Investment Grade Rating, there is a decrease in the rating of the Notes by one of the Rating Agencies on or within 90 days of the date of the Change of Control (which period shall be extended for an additional 90 days if any Rating Agency has publicly announced that it is considering a possible downgrade of the Notes) which causes the Notes to no longer have an Investment Grade Rating from both Rating Agencies; or

- (2) if on the date of first public announcement of an event that constitutes a Change of Control the Notes are not then rated by any two Rating Agencies as having an Investment Grade Rating, there is a decrease in the rating of the Notes by at least one of the Rating Agencies on or within 90 days of the date of the Change of Control (which period shall be extended for an additional 90 days if any Rating Agency has publicly announced that it is considering a possible downgrade of the Notes) which decrease results in the rating on the Notes by such Rating Agency to be lower than the rating of the Notes issued by such Rating Agency immediately preceding the public announcement of the event that constitutes the relevant Change of Control.

“refinance” means, in respect of any Indebtedness, to refinance, extend, renew, refund, repay, prepay, redeem, defease or retire, or to issue other Indebtedness in exchange or replacement for, such Indebtedness. “refinanced” shall have a correlative meaning.

“Responsible Officer” means the chief executive officer, president, chief financial officer, senior vice president-finance, treasurer, assistant treasurer, managing director, management board member or director of a company.

“S&P” means Standard & Poor’s Financial Services LLC and its successors.

“Securities Act” means the U.S. Securities Act of 1933, as amended.

“Significant Subsidiary” means any Subsidiary of the Issuer that represents 10% or more of the net assets or revenue of the Issuer and its Subsidiaries in the aggregate, as determined by reference to the latest available audited consolidated financial statements of the Issuer and its Subsidiaries, after giving *pro forma* effect (as determined in good faith by a Responsible Officer of the Issuer) to any acquired assets since the date of such financial statements.

“Stated Maturity” means, with respect to any security, the date specified in such security as the fixed date on which the final payment of principal of such security is due and payable, including pursuant to any mandatory redemption provision (but excluding any provision providing for the repurchase of such security at the option of the holder thereof upon the happening of any contingency unless such contingency has occurred), or if any such date is not a Business Day, on the next succeeding Business Day.

“Subordinated Obligation” means any Indebtedness of the Issuer or a Guarantor (whether outstanding on the Issue Date or thereafter Incurred) that is subordinate or junior in right of payment to the Notes or such Guarantor’s Note Guarantee pursuant to a written agreement to that effect.

“Subsidiary” means, with respect to any Person, any corporation, limited liability company, association, partnership or other business entity of which more than 50% of the total voting power of shares of Voting Stock is at the time owned or controlled, directly or indirectly, by:

- (1) such Person;
- (2) such Person and one or more Subsidiaries of such Person; or
- (3) one or more Subsidiaries of such Person.

Unless otherwise provided, all references to Subsidiaries shall be to Subsidiaries of the Issuer and the Guarantors.

“Surviving Person” means, with respect to any Person involved in any merger, consolidation or other business combination or the sale, assignment, transfer, lease, conveyance or other disposition of all or substantially all of such Person’s assets, the Person formed by or surviving such transaction or the Person to which such disposition is made.

“Tax” means any tax, duty, levy, impost, assessment or other governmental charge, including penalties, interest and other liabilities related thereto, and, for the avoidance of doubt, including any withholding or deduction for or on account of Tax. “Taxes” has a meaning correlative to the foregoing.

“Treasury Rate” means, as of any redemption date, the weekly average rounded to the nearest 1/100th of a percentage point (for the most recently completed week for which such information is available as of the date that is three Business Days prior to the redemption date) of the yield to maturity of United States Treasury securities with a constant

maturity (as compiled and published in Federal Reserve Statistical Release H.15 with respect to each applicable day during such week or, if such Statistical Release is no longer published, any publicly available source of similar market data) most nearly equal to the period from the redemption date to 1 October 2027; *provided, however*, that if the period from the redemption date to 1 October 2027 is not equal to the constant maturity of a United States Treasury security for which such a yield is given, the Treasury Rate shall be obtained by linear interpolation (calculated to the nearest one-twelfth of a year) from the weekly average yields of United States Treasury securities for which such yields are given, except that if the period from the redemption date to 1 October 2027 is less than one year, the weekly average yield on actually traded United States Treasury securities (or other comparable benchmark) adjusted to a constant maturity of one year shall be used.

“United Kingdom” means the United Kingdom of Great Britain and Northern Ireland and any constituent country thereof as of the Issue Date.

“Voting Stock” of a Person means all classes of Capital Stock or other interests (including partnership interests) of such Person then outstanding and normally entitled (without regard to the occurrence of any contingency) to vote in the election of directors, managers or trustees thereof.

BOOK-ENTRY; DELIVERY AND FORM

General

The Notes will be represented by one or more global notes in registered form without interest coupons attached (the “Global Notes”). The Global Notes will be deposited with a custodian for DTC and registered in the name of Cede & Co., as nominee for DTC, in each case for credit to an account of a direct or indirect participant in DTC (including Euroclear Bank, SA/NV and Clearstream Banking, société anonyme).

Ownership of interests in the Global Notes (the “Book-Entry Interests”) will be limited to persons that have accounts with DTC, or persons that hold interests through such participants. DTC will hold interests in the Global Notes on behalf of their participants through customers’ securities accounts. Except under the limited circumstances described below, Book-Entry Interests will not be held in definitive certificated form.

Book-Entry Interests will be shown on, and transfers thereof will be done only through, records maintained in book-entry form by DTC and their participants. The laws of some jurisdictions, including certain states of the United States, may require that certain purchasers of securities take physical delivery of such securities in definitive certificated form. The foregoing limitations may impair the ability to own, transfer or pledge Book-Entry Interests. In addition, while the Notes are in global form, holders of Book-Entry Interests will not be considered the owners or “holders” of Notes for any purpose.

So long as the Notes are held in global form, DTC (or its nominee), will be considered the sole holders of the Global Notes for all purposes under the Indenture governing the Notes. In addition, participants must rely on the procedures of DTC, and indirect participants must rely on the procedures of DTC and the participants through which they own Book-Entry Interests, to transfer their interests or to exercise any rights of holders under the Indenture. In addition, interests held through Euroclear and Clearstream as participants in DTC may also be subject to the procedures and requirements of such systems. Neither we nor the Trustee will have any responsibility, or be liable, for any aspect of the records relating to the Book-Entry Interests.

Redemption of the Global Notes

In the event that any Global Note (or any portion thereof) is redeemed, DTC will redeem an equal amount of the Book-Entry Interests in such Global Note from the amount received by it in respect of the redemption of such Global Note. The redemption price payable in connection with the redemption of such Book-Entry Interests will be equal to the amount received by DTC, in connection with the redemption of such Global Note (or any portion thereof). We understand that, under the existing practices of DTC, if fewer than all of the Notes are to be redeemed at any time, DTC, will credit its participants’ accounts on a proportionate basis (with adjustments to prevent fractions), by lot or on such other basis as they deem fair and appropriate; provided, however, that no Book-Entry Interest of \$200,000 principal amount or less for the Notes may be redeemed in part.

Payments on Global Notes

We will make payments of any amounts owing in respect of the Global Notes (including principal, premium, if any, and interest) to DTC or its nominee, which will distribute such payments to participants in accordance with their customary procedures. We will make payments of all such amounts without deduction or withholding for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature, except as may be required by law and as described under “Description of the Notes—Additional Amounts”. If any such deduction or withholding is required to be made, then, to the extent described under “Description of the Notes—Additional Amounts” above, we will pay additional amounts as may be necessary in order that the net amounts received by any holder of the Global Notes or owner of Book-Entry Interests after such deduction or withholding will equal the net amounts that such holder or owner would have otherwise received in respect of such Global Note or Book-Entry Interest, as the case may be, absent such withholding or deduction. We expect that standing customer instructions and customary practices will govern payments by participants to owners of Book-Entry Interests held through such participants.

Under the terms of the Indenture, the Issuer and the Trustee will treat the registered holder of the Global Notes (e.g., DTC or its nominee) as the owner thereof for the purpose of receiving payments and for all other purposes. Consequently, none of the Issuer, the Trustee or any of their respective agents has or will have any responsibility or liability for any aspect of the records of DTC or any participant or indirect participant relating to, or payments made on account of, a Book-Entry Interest or for maintaining, supervising or reviewing the records of DTC or any participant or indirect participant relating to, or payments made on account of, a Book-Entry Interest.

Currency of Payment for the Global Notes

The principal of, premium, if any, and interest on, and all other amounts payable in respect of, the Global Notes will be paid to holders of interest in such Notes through DTC in US dollars.

Action by Owners of Book-Entry Interests

Transfers between participants in DTC will be effected in accordance with DTC rules and will be settled in immediately available funds. If a holder requires physical delivery of Definitive Registered Notes for any reason, including to sell Notes to persons in jurisdictions that require physical delivery of securities or to pledge such Notes, such holder must transfer its interests in the Global Notes in accordance with the normal procedures of DTC and in accordance with the procedures set out in the Indenture.

The Global Notes will have a legend to the effect set out under “Notice to Investors”. Book-Entry Interests in the Global Notes will be subject to the restrictions on transfers and certification requirements discussed under “Notice to Investors”.

Through and including the 40th day after the later of the commencement of the offering of the Notes and the closing of the offering (the “Distribution Compliance Period”), beneficial interests in a Regulation S Global Note may be transferred to a person who takes delivery in the form of an interest in the Rule 144A Global Note only if such transfer is made pursuant to Rule 144A and the transferor first delivers to the Trustee a certificate (in the form provided in the Indenture) to the effect that such transfer is being made to a person who the transferor reasonably believes is a “qualified institutional buyer” within the meaning of Rule 144A in a transaction meeting the requirements of Rule 144A or otherwise in accordance with the transfer restrictions described under “Notice to Investors” and in accordance with all applicable securities laws of the states of the United States and other jurisdictions.

After the expiration of the Distribution Compliance Period, beneficial interests in a Regulation S Global Note may be transferred to a person who takes delivery in the form of a beneficial interest in the Rule 144A Global Note without compliance with these certification requirements.

Beneficial interests in a Rule 144A Global Note may be transferred to a person who takes delivery in the form of a beneficial interest in the Regulation S Global Note only upon receipt by the Trustee of a written certification (in the form provided in the Indenture) from the transferor to the effect that such transfer is being made in accordance with Regulation S or Rule 144 under the US Securities Act (if available).

In connection with transfers involving an exchange of a Regulation S Book-Entry Interest for a Rule 144A Book-Entry Interest, appropriate adjustments will be made to reflect a decrease in the principal amount of the Regulation S Global Note and a corresponding increase in the principal amount of the Rule 144A Global Notes.

Any Book-Entry Interest in one of the Global Notes that is transferred to a person who takes delivery in the form of a Book-Entry Interest in any other Global Note will, upon transfer, cease to be a Book-Entry Interest in the first mentioned Global Note and become a Book-Entry Interest in such other Global Note, and accordingly will thereafter be subject to all transfer restrictions, if any, and other procedures applicable to Book-Entry Interests in such other Global Note for as long as it remains such a Book-Entry Interest.

Definitive Registered Notes

Under the terms of the Indenture, owners of the Book-Entry Interests will receive Definitive Registered Notes:

- if DTC notifies the Issuer that it is unwilling or unable to continue to act as depositary and a successor depositary is not appointed by us within 120 days; or
- if the owner of a Book-Entry Interest requests such an exchange in writing delivered through DTC following an event of default under the Indenture.

In the case of the issue of Definitive Registered Notes, the holder of a Definitive Registered Note may transfer such Note by surrendering it to the Registrar or Transfer Agent. In the event of a partial transfer or a partial redemption of a holding of Definitive Registered Notes represented by one Definitive Registered Note, a Definitive Registered Note will be issued to the transferee in respect of the part transferred and a new Definitive Registered Note in respect of the balance of the

holding not transferred or redeemed will be issued to the transferor or the holder, as applicable; provided that no Definitive Registered Note in a denomination less than \$200,000 will be issued. We will bear the cost of preparing, printing, packaging and delivering the Definitive Registered Notes.

We will not be required to register the transfer or exchange of Definitive Registered Notes for a period of 15 calendar days preceding (i) the record date for any payment of interest on the Notes, (ii) any date fixed for redemption of the Notes or (iii) the date fixed for selection of the Notes to be redeemed in part. Also, we are not required to register the transfer or exchange of any Notes selected for redemption or which the holder has tendered (and not withdrawn) for repurchase in connection with a change of control offer. In the event of the transfer of any Definitive Registered Note, the Trustee may require a holder, among other things, to furnish appropriate endorsements and transfer documents as described in the Indenture. We may require a holder to pay any taxes and fees required by law and permitted by the Indenture and the Notes.

If Definitive Registered Notes are issued and a holder thereof claims that such Definitive Registered Note has been lost, destroyed or wrongfully taken, or if such Definitive Registered Note is mutilated and is surrendered to the Registrar or at the office of the Transfer Agent, we will issue and the Trustee will authenticate a replacement Definitive Registered Note if the Trustee's and our requirements are met. The Issuer or the Trustee may require a holder requesting replacement of a Definitive Registered Note to furnish an indemnity bond sufficient in the judgement of both to protect themselves, the Trustee or the Paying Agent appointed pursuant to the Indenture from any loss which any of them may suffer if a Definitive Registered Note is replaced. The Issuer may charge for any expenses incurred by us in replacing a Definitive Registered Note.

In case any such mutilated, destroyed, lost or stolen Definitive Registered Note has become or is about to become due and payable, or is about to be redeemed or purchased by the Issuer pursuant to the provisions of the Indenture, the Issuer, in its discretion, may, instead of issuing a new Definitive Registered Note, pay, redeem or purchase such Definitive Registered Note, as the case may be.

Definitive Registered Notes may be transferred and exchanged only after the transferor first delivers to the Trustee a written certification (in the form provided in the Indenture) to the effect that such transfer will comply with the transfer restrictions applicable to such Notes. Please see "Notice to Investors".

So long as the Notes are listed on the Luxembourg Stock Exchange and the rules of such exchange so require, we will publish a notice of any issuance of Definitive Registered Notes in a newspaper having general circulation in Luxembourg (which we expect to be the *Luxemburger Wort*) or, to the extent and in the manner permitted by such rules, post on the official website of the Luxembourg Stock Exchange (www.bourse.lu).

Information Concerning DTC

DTC is:

- a limited purpose trust company organised under the New York Banking Law;
- a "banking organization" under the New York Banking Law;
- a member of the Federal Reserve System;
- a "clearing corporation" within the meaning of the New York Uniform Commercial Code; and
- a "clearing agency" registered under Section 17A of the Exchange Act.

DTC was created to hold securities for its participants and to facilitate the clearance and settlement of transactions among its participants. It does this through electronic book entry changes in the accounts of securities participants, eliminating the need for physical movement of securities certificates. DTC participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organisations such as the initial purchasers. Others, such as banks, brokers, dealers, trust companies and clearing corporations, that clear through or maintain a custodial relationship with a direct participant also have access to the DTC system and are known as indirect participants.

Because DTC can only act on behalf of participants, who in turn act on behalf of indirect participants and certain banks, the ability of an owner of a beneficial interest to pledge such interest to persons or entities that do not participate in the DTC system or otherwise take actions in respect of such interest may be limited by the lack of a definitive certificate for that

interest. The laws of some jurisdictions require that certain persons take physical delivery of securities in definitive form. Consequently, the ability to transfer beneficial interests to such persons may be limited. In addition, owners of beneficial interests through the DTC system will receive distributions attributable to the Global Notes only through DTC participants.

The address of DTC in New York is 55 Water Street, New York, New York 10041.

Global Clearance and Settlement under the Book-Entry System

The Notes represented by the Global Notes are expected to be listed on the Official List and admitted for trading on the Euro MTF Market of the Luxembourg Stock Exchange and any permitted secondary market trading activity in such Notes will, therefore, be required to be settled in immediately available funds. The Issuer expects that secondary trading in any certificated Notes will also be settled in immediately available funds.

Although DTC is expected to follow the foregoing procedures in order to facilitate transfers of interests in the Global Notes among participants of DTC, it is under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued or modified at any time. None of the Issuer, the Guarantors, the initial purchasers, the Trustee, the Registrar or any Paying Agent will have any responsibility for the performance by DTC or its participants or indirect participants of their respective obligations under the rules and procedures governing their operations.

TAXATION

Prospective purchasers of the Notes are advised to consult their own tax advisers as to the tax consequences, under the tax laws of the country of which they are resident, of a purchase of Notes including, without limitation, the consequences of receipt of interest and premium, if any, on any sale or redemption of, the Notes or any interest therein.

References in this discussion to Notes acquired, owned, held or disposed of by noteholders include, except where otherwise expressly stated, the Book- Entry Interests held by purchasers in the Notes in global form deposited with a custodian for, and registered in the name of Cede & Co., as nominee for DTC.

United Kingdom Taxation

The following is a general description of certain UK tax consequences relating to the Notes and is based on current UK tax law and HM Revenue & Customs (“HMRC”) published practice, both of which may be subject to change, possibly with retrospective effect. It does not purport to be a complete analysis of all UK tax considerations relating to the Notes, does not purport to constitute legal or tax advice, relates only to persons who are the absolute beneficial owners of Notes and who hold Notes as a capital investment, and does not deal with certain classes of persons (such as brokers or dealers in securities and persons connected with the Issuer) to whom special rules may apply. If you are subject to tax in any jurisdiction other than the United Kingdom or if you are in any doubt as to your tax position, you should consult an appropriate professional adviser.

Interest on the Notes

Payment of interest on the Notes

Interest on the Notes will be payable without withholding or deduction for or on account of UK income tax provided the Notes are and remain listed on a “recognised stock exchange” within the meaning of section 1005 of the Income Tax Act 2007 (the “ITA”). The Luxembourg Stock Exchange is a recognised stock exchange for these purposes. Securities such as the Notes will be treated as listed on the Luxembourg Stock Exchange if they are included in the Official List of the Luxembourg Stock Exchange and are listed and admitted to trading on the Euro MTF Market of the Luxembourg Stock Exchange.

Interest on the Notes may also be paid without withholding or deduction for or on account of UK income tax where the Issuer reasonably believes (and any person by or through whom interest on the Notes is paid reasonably believes) at the time the payment is made that (a) the person beneficially entitled to the interest is a UK resident company or a non UK resident company that carries on a trade in the United Kingdom through a permanent establishment and the payment is one that the non UK resident company is required to bring into account when calculating its profits subject to UK corporation tax or (b) the person to whom the payment is made is one of the further classes of bodies or persons, and meets any relevant conditions, set out in sections 935-937 of the ITA, *provided* that in either case HMRC has not given a direction, the effect of which is that the payment may not be made without that withholding or deduction.

In other cases, an amount must generally be withheld from payments of interest on the Notes on account of UK income tax at the basic rate (currently 20%), unless another relief or exemption applies (for instance, in connection with a direction by HMRC under an applicable double taxation treaty).

Holders of the Notes may wish to note that HMRC has power to obtain information (including, in certain cases, the name and address of the beneficial owner of the interest), including from any person in the United Kingdom who either pays certain amounts in respect of the Notes to, or receives certain amounts in respect of the Notes for the benefit of, an individual. Such information may, in certain circumstances, be exchanged by HMRC with the tax authorities of other jurisdictions.

Further UK tax issues

Interest on the Notes constitutes UK source income for tax purposes and, as such, may be subject to UK tax by way of assessment (including self-assessment) even where paid without withholding or deduction.

However, interest with a UK source received without withholding or deduction for or on account of UK income tax will not be chargeable to UK tax in the hands of a holder of Notes (other than certain trustees) who is not resident for tax purposes in the United Kingdom unless (a) that holder of Notes is a company which carries on a trade in the United Kingdom

through a permanent establishment in the United Kingdom or, if not such a company, carries on a trade, profession or vocation in the United Kingdom through a branch or agency, and (b) the interest is received in connection with, or the Notes are attributable to, that permanent establishment, branch or agency. There are exemptions for interest received by certain categories of agent (such as some brokers and investment managers). The provisions of an applicable double taxation treaty may also be relevant for such holders of Notes.

UK corporation tax payers

In general, holders of Notes which are within the charge to UK corporation tax will be charged to tax as income on all returns, profits or gains on, and fluctuations in value of, the Notes (whether attributable to currency fluctuations or otherwise) broadly in accordance with their statutory accounting treatment. Holders of the Notes will be required to determine whether the income is to be treated as trading or non-trading based on the activities that they undertake.

Other UK tax payers

Taxation of chargeable gains

A disposal of Notes by an individual holder of Notes who is resident in the United Kingdom or who carries on a trade, profession or vocation in the United Kingdom through a branch or agency to which the Notes are attributable may give rise to a chargeable gain or an allowable loss for the purposes of the UK taxation of chargeable gains. However, such a disposal would not give rise to a chargeable gain or allowable loss for the purposes of the UK taxation of chargeable gains if the Notes are deemed to be “deeply discounted securities” (please see “—Taxation of discount” below, which sets out certain other possible UK tax consequences of a disposal of a Note by a holder of Notes). In calculating any gain or loss on a disposal (including redemption) of a Note, sterling values are compared at acquisition and disposal. Accordingly, a taxable gain can arise even where the US dollar amount received on a disposal (including redemption) is the same as, or less than, the amount paid for the Note. Special rules may apply to individuals who have ceased to be resident in the United Kingdom and who dispose of their Notes before becoming once again resident in the United Kingdom.

Accrued income profits

On a disposal of Notes by a holder of Notes, any interest which has accrued since the last interest payment date may be chargeable to tax as income under the rules relating to accrued income profits as set out in Part 12 of the ITA if that holder of Notes is resident in the United Kingdom or carries on a trade in the United Kingdom through a branch or agency to which the Notes are attributable. Holders of Notes are advised to consult their own professional advisers for further information about the accrued income scheme in general.

Taxation of discount

Dependent on, among other things, the discount (if any) at which the Notes are issued, the Notes may be deemed to constitute “deeply discounted securities” for the purposes of Chapter 8 of Part 4 of the Income Tax (Trading and Other Income) Act 2005. If the Notes are deemed to constitute deeply discounted securities, individual holders of Notes who are resident for tax purposes in the United Kingdom or who carry on a trade, profession or vocation in the United Kingdom through a branch or agency to which the Notes are attributable generally will be liable to UK income tax on any gain made on the sale or other disposal (including redemption) of the Notes. Holders of Notes are advised to consult their own professional advisers if they require any advice or further information relating to “deeply discounted securities”.

Stamp Duty and Stamp Duty Reserve Tax (“SDRT”)

No UK stamp duty or SDRT is payable on issue of, or on a transfer of, or agreement to transfer, Notes.

United States Federal Income Taxation

General

The following summary describes certain US federal income tax consequences that may be relevant with respect to the acquisition, ownership and disposition of Notes by US Holders (as defined below) who purchase Notes in this offering at their “issue price” (i.e. the first price at which a substantial amount of Notes is sold for money to investors (not including bond houses, brokers or similar persons or organisations acting in the capacity of underwriters, placement agents or

wholesalers)). This summary only addresses US federal income tax considerations of US Holders that will hold the Notes as capital assets. It does not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to purchase the Notes. In particular, this summary does not address tax considerations applicable to US Holders that may be subject to special tax rules including, without limitation, the following: (i) financial institutions; (ii) insurance companies; (iii) dealers or traders in securities; (iv) traders in securities or commodities that elect mark-to-market treatment; (v) tax-exempt entities; (vi) persons who will hold Notes as part of a “hedging” or “conversion” transaction or as a position in a “straddle” or as part of a “synthetic security” or other integrated transaction for US federal income tax purposes; (vii) persons who have a “functional currency” other than the US dollar; (viii) regulated investment companies and real estate investment trusts; and (ix) persons who have ceased to be US citizens or lawful permanent residents of the United States. Further, this summary does not address the Medicare tax on net investment income, alternative minimum tax consequences or US federal estate and gift tax consequences.

This summary is based on the Internal Revenue Code of 1986, as amended (the “Code”) and US Treasury regulations and judicial and administrative interpretations thereof, as of the date of this Offering Memorandum. All of the foregoing is subject to change, which change could apply retroactively and could affect the tax consequences described below.

For purposes of this summary, a “US Holder” is a beneficial owner of a Note that is, for US federal income tax purposes: (i) an individual who is a citizen or resident of the United States; (ii) a corporation, or other entity treated as a corporation, created or organised in or under the laws of the United States, any state thereof, or the District of Columbia; (iii) an estate, the income of which is subject to US federal income taxation regardless of its source; or (iv) a trust if (1) a court within the United States is able to exercise primary supervision over the administration of the trust and one or more US persons have the authority to control all substantial decisions of the trust or (2) the trust was in existence on 20 August 1996 and has properly elected to continue to be treated as a US person.

If any entity or arrangement treated as a partnership or other pass-through entity for US federal income tax purposes holds Notes, the tax treatment of a partner in the partnership or owner of the other pass-through entity will generally depend upon the status of the partner or owner and the activities of the entity or arrangement. A holder that is a partner in a partnership or owner of another pass-through entity that is considering holding Notes should consult its own tax adviser.

Each prospective investor should consult its own tax adviser with respect to the US federal (including income, estate and gift), state, local and foreign tax consequences of acquiring, owning and disposing of Notes. US Holders should also review the discussion under “—United Kingdom Taxation” for the United Kingdom tax consequences to a US Holder of the ownership of Notes.

Payments of stated interest

Stated interest paid on a Note will be taxable to a US Holder as ordinary interest income at the time it is received or accrued, depending on the US Holder’s method of accounting for US federal income tax purposes. Interest received by a US Holder will be treated as foreign source income.

Disposition of a Note

Upon the sale, exchange, redemption, retirement or other taxable disposition of a Note, a US Holder generally will recognise taxable gain or loss equal to the difference between the amount realised on such disposition (except to the extent any amount realised is attributable to accrued but unpaid stated interest, which is taxable as described under “—Payments of stated interest”) and the US Holder’s adjusted tax basis in the Note. A US Holder’s adjusted tax basis generally will be the cost at which a US Holder acquires the Note.

Any gain or loss realised by a US Holder on the disposition of a Note generally will be US source capital gain or loss and will be treated as long-term capital gain or loss if the Note has been held for more than one year at the time of the disposition of the Note. For certain non-corporate holders (including individuals), any such long-term capital gain is currently subject to US federal income tax at preferential rates. The deductibility of capital losses is subject to limitations.

Information with respect to foreign financial assets

Owners of “specified foreign financial assets” with an aggregate value in excess of US\$50,000 (and in some circumstances, a higher threshold) may be required to file an information report with respect to such assets with their US federal income tax returns. “Specified foreign financial assets” generally include any financial accounts maintained by

foreign financial institutions, as well as any of the following, but only if they are held for investment and not held in accounts maintained by financial institutions: (i) stocks and securities issued by non-US persons; (ii) financial instruments and contracts that have non-US issuers or counterparties; and (iii) interests in foreign entities. The Notes may be subject to these rules. Persons required to file US tax returns are urged to consult their tax advisers regarding the application of these reporting requirements to their ownership of the Notes.

Backup withholding and information reporting

Backup withholding and information reporting requirements may apply to certain payments to US Holders of interest on the Notes and to the proceeds of a sale, exchange or other disposition (including a retirement or redemption) of a Note. Backup withholding (currently at a rate of 28%) may be required if the US Holder fails (i) to furnish the US Holder's taxpayer identification number, (ii) to certify that such US Holder is not subject to backup withholding or (iii) to otherwise comply with the applicable requirements of the backup withholding rules. Certain US Holders (including, among others, corporations) are not currently subject to the backup withholding and information reporting requirements. Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules from a payment to a US Holder generally may be claimed as a credit against such US Holder's US federal income tax liability and any excess may result in a refund, *provided* that the required information is timely furnished to the IRS.

PLAN OF DISTRIBUTION

Subject to the terms and conditions stated in the Purchase Agreement, dated as at 4 October 2017, the initial purchasers have severally agreed to purchase, and we have agreed to sell to the initial purchasers, the principal amount of the Notes.

The Purchase Agreement provides that the obligation of the initial purchasers to purchase the Notes is subject to approval of legal matters by counsel and to other conditions.

The initial purchasers expect that delivery of the Notes will be made against payment therefore on the Settlement Date, which will be the third business day following the pricing date of the offering (this settlement cycle being referred to as “T+3”). As of 5 September, 2017, under Rule 15c6-1 under the Exchange Act, trade in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade Notes on the pricing date will be required, by virtue of the fact that the Notes initially will settle on a delayed basis, to agree to a delayed settlement cycle at the time of any such trade to prevent a failed settlement and should consult their own advisors.

The Notes and the Note Guarantees have not been and will not be registered under the US Securities Act or qualified for sale under the securities laws of any state or jurisdiction outside the United States and may not be offered to, or for the account or benefit of, persons in the United States except in transactions exempt from the registration requirements of the US Securities Act. Please see “Notice to Investors”.

We have been advised that the initial purchasers propose to resell the Notes at the offering price set out on the cover page of this Offering Memorandum within the United States to qualified institutional buyers (as defined in Rule 144A) in reliance on Rule 144A and to non-US persons outside the United States in offshore transactions in reliance on Regulation S. After the initial offering, the offering price and other selling terms of the Notes may from time to time be varied by the initial purchasers without notice. To the extent certain of the initial purchasers are not US-registered broker-dealers and they intend to effect any sales of the Notes in the United States, they will do so through one or more US-registered broker-dealers permitted by the regulations of the Financial Industry Regulatory Authority, Inc.

In addition, until 40 days after the commencement of this offering, an offer or sale of Notes within the United States by a dealer that is not participating in this offering may violate the registration requirements of the US Securities Act if that offer or sale is made otherwise than in accordance with Rule 144A.

In relation to each Relevant Member State, each initial purchaser has represented and agreed that with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State it has not made and will not make an offer of Notes which are the subject of the offering contemplated by this Offering Memorandum to the public in that Relevant Member State other than:

- (a) to any legal entity which is a qualified investor as defined in the Prospectus Directive;
- (b) to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Directive), subject to obtaining the prior consent of the relevant initial purchaser nominated by the Issuer for any such offer; or
- (c) in any other circumstances falling within Article 3(2) of the Prospectus Directive,

provided that no such offer of Notes shall result in a requirement for the publication by the Issuer, the Guarantors or the initial purchasers of a prospectus pursuant to Article 3 of the Prospectus Directive.

For the purposes of this provision, the expression an “offer to the public” in relation to any Notes in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and any Notes to be offered so as to enable an investor to decide to purchase any Notes, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State, the expression “Prospectus Directive” means Directive 2003/71/EC as amended (including by Directive 2010/73/EU), and includes any relevant implementing measure in the Relevant Member State.

Each initial purchaser has represented and agreed that:

- (a) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of the Notes in circumstances in which Section 21(1) of the FSMA does not apply to the Issuer or the Guarantors; and
- (b) it has complied and will comply with all applicable provisions of the FSMA with regard to anything done by it in relation to the Notes in, from or otherwise involving the United Kingdom.

Buyers of the Notes sold by the initial purchasers may be required to pay stamp taxes and other charges in accordance with the laws and practice of the country of purchase in addition to the initial offering price set out on the cover of this Offering Memorandum.

The Notes will constitute a new class of securities with no established trading market. Application has been made to admit the Notes to the Official List of the Luxembourg Stock Exchange and be admitted to trading on the Euro MTF Market. However, we cannot assure you that the prices at which the Notes will sell in the market after this offering will not be lower than the initial offering price or that an active trading market for the Notes will develop and continue after this offering.

The initial purchasers have advised us that they currently intend to make a market in the Notes. However, they are not obliged to do so, and they may discontinue any market-making activities with respect to the Notes at any time without notice. In addition, market-making activity will be subject to the limits imposed by the Exchange Act, and may be limited. Accordingly, we cannot assure you that a liquid market will develop for the Notes, that you will be able to sell your Notes at a particular time or that the prices that you receive when you sell will be favourable.

In connection with the offering of the Notes, the Stabilising Manager (or persons acting on behalf of the Stabilising Manager) may conduct over-allotment, syndicate-covering transactions and stabilising transactions. However, stabilisation action may not necessarily occur. Over-allotment involves sales of Notes in excess of the principal amount of Notes to be purchased by the initial purchasers in this offering, which creates a short position for the initial purchasers. Covering transactions involve purchases of the Notes in the open market after the distribution has been completed in order to cover short positions. Stabilising transactions consist of certain bids or purchases of Notes made for the purpose of preventing or retarding a decline in the market price of the Notes while the offering is in progress. Any of these activities may have the effect of preventing or retarding a decline in the market price of the Notes. They may also cause the price of the Notes to be higher than the price that otherwise would exist in the open market in the absence of these transactions. Any stabilisation action may begin on or after the date on which adequate public disclosure of the terms of the offer of Notes is made and, if begun, may cease at any time, but it must end no later than 30 days after the date on which the Issuer receives the proceeds of the issue, or no later than 60 days after the date of the allotment of the relevant Notes, whichever is the earlier. Please see “Stabilisation”.

In connection with this offering, the initial purchasers are not acting for anyone other than us and will not be responsible to anyone other than us for providing the protections afforded to their clients nor for providing advice in relation to this offering.

We have agreed to indemnify the initial purchasers against certain liabilities, including liabilities under the US Securities Act.

Certain of the initial purchasers or their affiliates are lenders to the Issuer and/or act or may act from time to time as coordinator, arranger or assume other roles under an unsecured term facility and certain other facilities detailed in “Description of Other Indebtedness”. The initial purchasers and their respective affiliates also perform, and may in the future perform, various financial advisory, investment banking and commercial banking services from time to time for us and our subsidiaries, joint ventures and associates. In addition, in the ordinary course of their business activities, the initial purchasers and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or Issuer’s affiliates. Certain of the initial purchasers or their respective affiliates that have a lending relationship with the Issuer routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, such initial purchasers and their respective affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes

offered hereby. Any such short positions could adversely affect future trading prices of the Notes offered hereby. The initial purchasers and their respective affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

NOTICE TO INVESTORS

You are advised to consult legal counsel prior to making any offer, resale, pledge or other transfer of any of the Notes offered hereby.

The Notes and the Note Guarantees have not been registered under the US Securities Act or any state securities laws and, unless so registered, they may not be offered or sold except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the US Securities Act and applicable state securities laws. Accordingly, the Notes offered hereby are being offered and sold only to “qualified institutional buyers” (as defined in Rule 144A under the US Securities Act) in reliance on Rule 144A under the US Securities Act and to persons outside the United States that are not, and are not acting for the account or benefit of, “U.S. persons” in offshore transactions (as defined in Regulation S under the US Securities Act) in reliance on Regulation S under the US Securities Act.

Each purchaser of Notes, by its acceptance thereof, will be deemed to have acknowledged, represented to and agreed with us and the initial purchasers as follows:

- (1) It understands and acknowledges that the Notes and the Note Guarantees have not been registered under the US Securities Act or any applicable state securities law, are being offered for resale in transactions not requiring registration under the US Securities Act or any state securities law, including sales pursuant to Rule 144A under the US Securities Act, and may not be offered, sold or otherwise transferred in the United States or to, or for the account or benefit of, any “U.S. person” except in compliance with the registration requirements of the US Securities Act or any applicable state securities law, pursuant to an exemption therefrom or in any transaction not subject thereto and in each case in compliance with the conditions for transfer set out in paragraph (5) below.
- (2) It is not an “affiliate” (as defined in Rule 144 under the US Securities Act) of the Issuer or acting on the Issuer’s behalf and it is either:
 - (i) a QIB and is aware that any sale of Notes to it will be made in reliance on Rule 144A and the acquisition of Notes will be for its own account or for the account of another QIB; or
 - (ii) a person that is not, and is not acting for the account or benefit of, a “U.S. person” purchasing the Notes outside the United States in an offshore transaction in accordance with Regulation S under the US Securities Act.
- (3) It acknowledges that neither we nor the initial purchasers, nor any person representing us or the initial purchasers, have made any representation to it with respect to the offering or sale of any Notes, other than the information contained in this Offering Memorandum, which Offering Memorandum has been delivered to it and upon which it is relying in making its investment decision with respect to the Notes. It has had access to such financial and other information concerning us and the Notes as it has deemed necessary in connection with its decision to purchase any of the Notes.
- (4) It is purchasing the Notes for its own account, or for one or more investor accounts for which it is acting as a fiduciary or agent, in each case for investment, and not with a view to, or for offer or sale in connection with, any distribution thereof in violation of the US Securities Act or any state securities laws, subject to any requirement of law that the disposal of its property or the property of such investor account or accounts be at all times within its or their control and subject to its or their ability to resell such Notes pursuant to Rule 144A, Regulation S or any other exemption from registration available under the US Securities Act.
- (5) Each holder of Notes issued in reliance on Regulation S (“Regulation S Notes”) agrees on its own behalf and on behalf of any investor account for which it is purchasing the Notes, and each subsequent holder of the Notes by its acceptance thereof will be deemed to agree, to offer, sell or otherwise transfer such Notes during the Distribution Compliance Period, only (i) to the Issuer, (ii) pursuant to a registration statement that has been declared effective under the US Securities Act, (iii) for so long as the Notes are eligible pursuant to Rule 144A under the US Securities Act, to a person it reasonably believes is a QIB that purchases for its own account or for the account of a QIB to whom notice is given that the transfer is being made in reliance on Rule 144A under the US Securities Act, (iv) pursuant to offers and sales to persons that are not, and are not acting for the account or benefit of,

“U.S. persons” and that occur outside the United States in compliance with Regulation S under the US Securities Act, (v) to an institutional accredited investor (within the meaning of Rule 501(a)(1), (2), (3) or (7) under the US Securities Act) that is not a qualified institutional buyer and that is purchasing for its own account or for the account of another institutional accredited investor, in each case in a minimum principal amount of Notes of US\$250,000, or (vi) pursuant to any other available exemption from the registration requirements of the US Securities Act, subject in each of the foregoing cases to any requirement of law that the disposal of its property or the property of such investor account or accounts be at all times within its or their control and in compliance with any applicable state securities laws, and any applicable local laws and regulations, and further subject to the Issuer’s and the Trustee’s rights prior to any such offer, sale or transfer pursuant to clause (iv), (v) or (vi) to require the delivery of an opinion of counsel, certification and/or other information satisfactory to each of them.

- (6) Each holder of Notes issued in reliance on Rule 144A (“Rule 144A Notes”) agrees on its own behalf and on behalf of any investor account for which it is purchasing the Notes, and each subsequent holder of the Notes by its acceptance thereof will be deemed to agree, to offer, sell or otherwise transfer such Notes prior to the date (the “Resale Restriction Termination Date”) that is one year after the later of the date of the Issue Date and the last date on which the Issuer or any of its affiliates was the owner of such Notes (or any predecessor thereto) only (i) to the Issuer, (ii) pursuant to a registration statement that has been declared effective under the US Securities Act, (iii) for so long as the Notes are eligible pursuant to Rule 144A under the US Securities Act, to a person it reasonably believes is a QIB that purchases for its own account or for the account of a QIB to whom notice is given that the transfer is being made in reliance on Rule 144A under the US Securities Act, (iv) pursuant to offers and sales to non-US persons that occur outside the United States in compliance with Regulation S under the US Securities Act, (v) to an institutional accredited investor (within the meaning of Rule 501(a)(1), (2), (3) or (7) under the US Securities Act) that is not a qualified institutional buyer and that is purchasing for its own account or for the account of another institutional accredited investor, in each case in a minimum principal amount of Notes of US\$250,000, or (vi) pursuant to any other available exemption from the registration requirements of the US Securities Act, subject in each of the foregoing cases to any requirement of law that the disposal of its property or the property of such investor account or accounts be at all times within its or their control and in compliance with any applicable state securities laws, and any applicable local laws and regulations, and further subject to the Issuer’s and the Trustee’s rights prior to any such offer, sale or transfer pursuant to clause (iv), (v) or (vi) to require the delivery of an opinion of counsel, certification and/or other information satisfactory to each of them.
- (7) Each purchaser acknowledges that each Note will contain a legend substantially to the following effect:

THIS SECURITY HAS NOT BEEN REGISTERED UNDER THE U.S. SECURITIES ACT, OR THE SECURITIES LAWS OF ANY STATE OR OTHER JURISDICTION. NEITHER THIS SECURITY NOR ANY INTEREST OR PARTICIPATION HEREIN MAY BE REOFFERED, SOLD, ASSIGNED, TRANSFERRED, PLEDGED, ENCUMBERED OR OTHERWISE DISPOSED OF IN THE ABSENCE OF SUCH REGISTRATION OR UNLESS SUCH TRANSACTION IS EXEMPT FROM, OR NOT SUBJECT TO, THE REGISTRATION REQUIREMENTS OF THE U.S. SECURITIES ACT. THE HOLDER OF THIS SECURITY, BY ITS ACCEPTANCE HEREOF, AGREES ON ITS OWN BEHALF AND ON BEHALF OF ANY INVESTOR FOR WHICH IT HAS PURCHASED SECURITIES TO OFFER, SELL OR OTHERWISE TRANSFER SUCH SECURITY, [in the case of a Rule 144A Note: PRIOR TO THE RESALE RESTRICTION TERMINATION DATE, WHICH IS ONE YEAR AFTER THE LATER OF THE ORIGINAL ISSUE DATE HEREOF AND THE LAST DATE ON WHICH THE ISSUER OR ANY AFFILIATE OF THE ISSUER WAS THE OWNER OF THIS SECURITY (OR ANY PREDECESSOR OF THIS SECURITY)] [in the case of a Regulation S Note: DURING THE DISTRIBUTION COMPLIANCE PERIOD, WHICH IS THE 40-DAY PERIOD COMMENCING ON THE LATER OF THE DATE OF COMMENCEMENT OF THE DISTRIBUTION OF THE NOTES AND THE DATE OF THE ORIGINAL ISSUE OF THE NOTES] ONLY (A) TO THE ISSUER, (B) PURSUANT TO A REGISTRATION STATEMENT WHICH HAS BEEN DECLARED EFFECTIVE UNDER THE U.S. SECURITIES ACT, (C) FOR SO LONG AS THE SECURITIES ARE ELIGIBLE FOR RESALE PURSUANT TO RULE 144A, TO A PERSON IT REASONABLY BELIEVES IS A “QUALIFIED INSTITUTIONAL BUYER” AS

DEFINED IN RULE 144A THAT PURCHASES FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF A QUALIFIED INSTITUTIONAL BUYER TO WHOM NOTICE IS GIVEN THAT THE TRANSFER IS BEING MADE IN RELIANCE ON RULE 144A, (D) PURSUANT TO OFFERS AND SALES TO PERSONS THAT ARE NOT, AND ARE NOT ACTING FOR THE ACCOUNT OR BENEFIT OF, "U.S. PERSONS" AND THAT OCCUR OUTSIDE THE UNITED STATES IN COMPLIANCE WITH REGULATIONS UNDER THE U.S. SECURITIES ACT, (E) TO AN INSTITUTIONAL "ACCREDITED INVESTOR" WITHIN THE MEANING OF RULE 501(A)(1), (2), (3) OR (7) UNDER THE U.S. SECURITIES ACT THAT IS AN INSTITUTIONAL ACCREDITED INVESTOR ACQUIRING THE SECURITY FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF SUCH AN INSTITUTIONAL ACCREDITED INVESTOR, IN EACH CASE IN A MINIMUM PRINCIPAL AMOUNT OF THE SECURITIES OF U.S.\$250,000, FOR INVESTMENT PURPOSES AND NOT WITH A VIEW TO OR FOR OFFER OR SALE IN CONNECTION WITH ANY DISTRIBUTION IN VIOLATION OF THE U.S. SECURITIES ACT, OR (F) PURSUANT TO ANY OTHER AVAILABLE EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE U.S. SECURITIES ACT, SUBJECT IN EACH OF THE FOREGOING CASES TO ANY REQUIREMENT OF LAW THAT THE DISPOSAL OF ITS PROPERTY OR THE PROPERTY OF SUCH INVESTOR ACCOUNT OR ACCOUNTS BE AT ALL TIMES WITHIN ITS OR THEIR CONTROL AND IN COMPLIANCE WITH ANY APPLICABLE STATE SECURITIES LAWS, AND ANY APPLICABLE LOCAL LAWS AND REGULATIONS AND FURTHER SUBJECT TO THE ISSUER'S AND THE TRUSTEE'S RIGHTS PRIOR TO ANY SUCH OFFER, SALE OR TRANSFER PURSUANT TO CLAUSES (D), (E) OR (F) TO REQUIRE THE DELIVERY OF AN OPINION OF COUNSEL, CERTIFICATION AND/OR OTHER INFORMATION SATISFACTORY TO EACH OF THEM.

- (8) It agrees that it will give to each person to whom it transfers the Notes notice of any restrictions on transfer of such Notes.
- (9) It acknowledges that until 40 days after the commencement of the offering, any offer or sale of the Notes within the United States by a dealer (whether or not participating in the offering) may violate the registration requirements of the US Securities Act if such offer or sale is made otherwise than in accordance with Rule 144A under the US Securities Act.
- (10) It acknowledges that the Transfer Agent will not be required to accept for registration of transfer any Notes except upon presentation of evidence satisfactory to us and the Trustee that the restrictions set out therein have been complied with.

It acknowledges that we, the initial purchasers and others will rely upon the truth and accuracy of the foregoing acknowledgements, representations, warranties and agreements and agrees that if any of the acknowledgements, representations, warranties and agreements deemed to have been made by its purchase of the Notes are no longer accurate, it shall promptly notify the initial purchasers. If it is acquiring any Notes as a fiduciary or agent for one or more investor accounts, it represents that it has sole investment discretion with respect to each such investor account and that it has full power to make the foregoing acknowledgements, representations and agreements on behalf of each such investor account.

LEGAL MATTERS

Certain legal matters with respect to the Notes and the Note Guarantees are being passed upon for us and the Guarantors by Shearman & Sterling (London) LLP, US counsel to the Issuer and the Guarantors, and by Hogan Lovells International LLP, English counsel to the Issuer and the Guarantors. Certain legal matters with respect to the offering of the Notes and the Note Guarantees will be passed upon for the initial purchasers by Sullivan & Cromwell LLP, US and English counsel to the initial purchasers.

INDEPENDENT AUDITORS

For the historical periods stated below and covered by the financial statements in this Offering Memorandum, our independent auditors were Deloitte LLP.

The consolidated financial statements of Jaguar Land Rover Automotive plc and its subsidiaries as at and for the year ended 31 March 2017, included in this Offering Memorandum, have been audited by Deloitte LLP, independent auditors, as stated in their report appearing herein.

The consolidated financial statements of Jaguar Land Rover Automotive plc and its subsidiaries as at and for the year ended 31 March 2016 included in this Offering Memorandum have been audited by Deloitte LLP, independent auditors, as stated in their report appearing herein.

The consolidated financial statements of Jaguar Land Rover Automotive plc and its subsidiaries as at and for the year ended 31 March 2015, included in this Offering Memorandum, have been audited by Deloitte LLP, independent auditors, as stated in their report appearing herein.

Deloitte LLP's reports, include the following limitations: "This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed".

SERVICE OF PROCESS AND ENFORCEMENT OF JUDGMENTS

The Issuer and the Guarantors are incorporated in England and Wales. All of the directors and executive officers of the Issuer and the Guarantors reside outside the United States and a substantial part of their assets are located outside the United States. In addition, most of the assets of the Issuer and the Guarantors are located outside the United States. As a result, it may not be possible for investors to effect service of process within the United States upon the Issuer and the Guarantors or any of their directors and executive officers, or to enforce against them judgments of US courts predicated upon civil liability provisions of the US federal or state securities laws.

If a judgment is obtained in a US court against the Issuer or the Guarantors, or any of their directors or executive officers, investors will need to enforce such judgment in jurisdictions where the relevant defendant has assets. Even though the enforceability of US court judgments outside the United States is described below for England and Wales, you should consult with your own advisers in any pertinent jurisdictions as needed to enforce a judgment in those countries or elsewhere outside the United States.

The following summary with respect to the enforceability of certain US court judgments in England and Wales is based upon advice provided to us by US and English legal advisers. The United States and England and Wales currently do not have a treaty providing for the reciprocal recognition and enforcement of judgments (as opposed to arbitration awards) in civil and commercial matters. Consequently, a final judgment for payment rendered by any federal or state court in the United States based on civil liability, whether or not predicated solely upon US federal securities laws, would not automatically be recognised or enforceable in England and Wales. In order to enforce any such US judgment in England and Wales, proceedings must first be initiated before a court of competent jurisdiction in England and Wales. In such an action, the courts of England and Wales would not generally reinvestigate the merits of the original matter decided by the US court (subject to what is said below) and it would usually be possible to obtain summary judgment on such a claim (assuming that there is no good defence to it). Recognition and enforcement of a US judgment by the courts of England and Wales in such an action is conditional upon (among other things) the following:

- the US court having had jurisdiction over the original proceedings according to English conflicts of laws principles in England and Wales;
- the US judgment being final and conclusive on the merits in the sense of being final and unalterable in the court which pronounced it and being for a debt for a definite sum of money;
- the US judgment not contravening public policy in England and Wales;
- the US judgment not being for a sum payable in respect of tax, or other charges of a like nature in respect of a penalty or fine;
- the US judgment not having been arrived at by doubling, trebling or otherwise multiplying a sum assessed as compensation for the loss or damages sustained and not being otherwise in breach of Section 5 of the Protection of Trading Interests Act 1980;
- the US judgment not having been obtained by fraud or in breach of principles of natural justice in England and Wales;

- the US judgment is not given in proceedings brought in breach of an agreement for settlement of disputes;
- there not having been a prior inconsistent decision of the courts of England and Wales or a non-US court between the same parties; and
- the enforcement proceedings in England and Wales being commenced within six years from the date of the US judgment.

Subject to the foregoing, investors may be able to enforce in England and Wales judgments in civil and commercial matters that have been obtained from US federal or state courts. However, we cannot assure you that those judgments will be recognised or enforceable in England and Wales. In addition, it is questionable whether the courts of England and Wales would accept jurisdiction and impose civil liability if the original action was commenced in England and Wales, instead of the United States, and predicated solely upon US federal securities laws.

WHERE YOU CAN FIND MORE INFORMATION

Each purchaser of the Notes from the initial purchasers will be furnished with a copy of this Offering Memorandum and any related amendments or supplements to this Offering Memorandum. Each person receiving this Offering Memorandum acknowledges that:

- such person has been afforded an opportunity to request from us and to review, and has received, all additional information considered by it to be necessary to verify the accuracy and completeness of the information herein (subject to confidentiality constraints);
- such person has not relied on the initial purchasers or any person affiliated with the initial purchasers in connection with its investigation of the accuracy of such information or its investment decision; and
- except as provided above, no person has been authorised to give any information or to make any representation concerning the Notes offered hereby other than those contained herein and, if given or made, such other information or representation should not be relied upon as having been authorised by us or the initial purchasers.

This Offering Memorandum contains summaries, believed to be accurate in all material respects, of certain terms of certain agreements, but reference is made to the actual agreements (copies of which will be made available upon request to us, subject to confidentiality constraints) for complete information with respect thereto, and all such summaries are qualified in their entirety by this reference. While any Notes remain outstanding, we will make available, upon request, to any holder and any prospective purchaser of Notes the information required pursuant to Rule 144A(d)(4) under the US Securities Act during any period in which we are not subject to Section 13 or 15(d) of the Exchange Act or exempt from reporting pursuant to Rule 12g3-2(b) under the Exchange Act. Requests for such information and requests for the agreements summarised in this Offering Memorandum should be directed to Jaguar Land Rover Automotive plc, Abbey Road, Whitley, Coventry CV3 4LF, United Kingdom. Our website can be found at www.jaguarlandrover.com. Information contained on our website is not incorporated by reference into this Offering Memorandum and is not part of this Offering Memorandum.

LISTING AND GENERAL INFORMATION

1. The Issuer was incorporated in England and Wales on 18 January 2008. The service address of the directors of the Issuer is Abbey Road, Whitley, Coventry CV3 4LF, United Kingdom. The name of Jaguar Land Rover PLC was changed to Jaguar Land Rover Automotive plc on 28 December 2012. Jaguar Land Rover Limited is a limited liability company, incorporated under the laws of England and Wales on 14 December 1982. The service address of the directors of Jaguar Land Rover Limited is Abbey Road, Whitley, Coventry, CV3 4LF, United Kingdom. Jaguar Land Rover Holdings Limited (previously Land Rover) is a private limited company, incorporated under the laws of England and Wales on 16 June 2000. The service address of the directors of Jaguar Land Rover Holdings Limited is Abbey Road, Whitley, Coventry, CV3 4LF, United Kingdom.
2. For so long as the Notes are listed on the Official List of the Luxembourg Stock Exchange and are admitted to trading on the Euro MTF Market and the rules and regulations of the Luxembourg Stock Exchange require, copies of the following documents may be inspected and obtained at the specified office of the Luxembourg listing agent during normal business hours:
 - the organisational documents of the Issuer and the Guarantors;
 - this Offering Memorandum;
 - the Consolidated Financial Statements; and
 - the Indenture (which includes the form of the Notes and the Note Guarantees).
3. So long as any Notes are listed on the Official List of the Luxembourg Stock Exchange and admitted for trading on the Euro MTF Market and the rules of the Luxembourg Stock Exchange so require, the Issuer will submit to the Luxembourg Stock Exchange notices, where appropriate, of general meetings to be held to deliberate on a planned amendment to the articles of association affecting the rights of the holders of the Notes and will publish promptly on the website of the Luxembourg Stock Exchange (www.bourse.lu) or in a leading newspaper having general circulation in Luxembourg (which is expected to be the *Luxemburger Wort*) or, if such publication is not practicable in a leading newspaper, in a leading English daily newspaper having general circulation in Europe all redemption and repayment notices together with a list of the numbers of the Notes drawn for redemption, and a full list of the Notes drawn but not presented for repayment, as well as the nominal amount of the Notes still outstanding.
4. The Issuer and the Guarantors accept responsibility for the information contained in this Offering Memorandum. To the best of their knowledge, except as otherwise noted, the information contained in this Offering Memorandum is in accordance with the facts and does not omit anything likely to affect the import of this Offering Memorandum.
5. Save as discussed in “Plan of Distribution”, so far as the Issuer is aware, no person involved in the issue has an interest material to the offering of the Notes.
6. Except as disclosed herein, there has been no material adverse change in our consolidated financial position or the financial position of each of the Guarantors since 30 June 2017, the date of the most recent unaudited financial statements included herein.
7. For so long as any Notes are outstanding, the Issuer will prepare interim financial statements for each of the first three quarters of each fiscal year.
8. Neither we nor any of our subsidiaries is a party to any litigation, administrative proceeding or arbitration that, in our judgement, is material in the context of the issue of the Notes, and, so far as we are aware, no such litigation, administrative proceeding or arbitration is pending or threatened, except as disclosed herein.
9. We have appointed Citibank, N.A., London Branch as our Paying Agent and Transfer Agent. We reserve the right to vary such appointment.

10. The statute of limitations applicable to payment of interest and repayment of principal under New York law is six years.
11. The Notes sold pursuant to Rule 144A have been accepted for through the book entry facilities of DTC under CUSIP 47010BAF1 and the ISIN US47010BAF13, respectively. The Notes sold pursuant to Regulation S have been accepted for clearance through the book entry facilities of DTC under CUSIP G5002FAM8 and the ISIN USG5002FAM89, respectively. The Common Code for the Notes sold pursuant to Rule 144A is 166227488, and for the Notes sold pursuant to Regulation S is 166227569.
12. The issue of the Notes was authorised by resolutions of the board of directors of the Issuer dated 11 May 2017, and the Note Guarantees were authorised by the boards of directors of Jaguar Land Rover Limited at a meeting held on 15 September 2017 and Jaguar Land Rover Holdings Limited at a meeting held on 15 September 2017.

GLOSSARY OF SELECTED TERMS

The following terms used in this Offering Memorandum have the meanings assigned to them below:

“C segment”	The third smallest car segment in the European market.
“CCA”	Climate Change Agreements are voluntary agreements made by UK industry and the Environment Agency to reduce energy use and carbon CO ₂ emissions.
“CO ₂ ”	Carbon dioxide.
“Convertible”	A type of vehicle characterised by rear glass that does not articulate with the rear trunk, no fixed roof and two or more seats.
“Corporate Average Fuel Economy” or “CAFÉ”	Regulations in the United States to improve the average fuel economy of automobiles sold in the United States. Fuel economy standards under these regulations are written and enforced by NHTSA.
“Coupé”	A type of vehicle characterised by a typical silhouette with two elongated doors and rear glass that does not articulate with the trunk, but only with the glass frame.
“CRC Scheme”	Carbon Reduction Commitment Energy Efficiency Scheme is a mandatory reporting and pricing scheme to improve energy efficiency in large public and private organisations in the UK.
“Driveline”	The parts of the powertrain excluding the engine and the transmission.
“EU Emissions Trading Scheme”	The largest multinational market-based emissions trading scheme, used to control pollution by providing economic incentives for achieving reductions in the emission of environmental pollutants.
“Euro 6”	Part of a number of regulations introduced by the European Union stipulating common requirements for emissions from automobiles and their replacement parts. Euro 6 requires all vehicles equipped with diesel engines to substantially reduce their emissions of nitrogen oxides. Effective from September 2014.
“Evaporative emissions”	Emissions that are generally composed of gasoline vapours that have escaped from storage tanks, fuel lines and fuel systems of vehicles.
“GTDI”	Gasoline Turbocharged Direct Injection.
“Hybrid”	A vehicle that uses two or more distinct power sources for propulsion.
“Infotainment”	Information-based media content or programming that also includes entertainment content.
“Lisbon Treaty”	Treaty of Lisbon amending the Treaty on European Union and the Treaty establishing the European Community, signed at Lisbon, 13 December 2007. Effective from 1 December 2009.
“mph”	Miles per hour.

“Naturally aspirated engine”	An engine that depends solely on atmospheric pressure to draw in air for internal combustion.
“NEDC”	The New European Driving Cycle, which is a driving cycle designed to assess the emission levels of car engines.
“Parasitic losses”	Non-engine energy losses, such as energy losses due to wind resistance, drivetrain friction, brake drag, ancillary systems losses and tyre rolling resistance.
“Powertrain”	A system of mechanical parts, which first produces energy and then converts the energy to movement. In the case of an automobile, the powertrain would comprise the automobile’s engine, transmission, driveshaft, a mechanical component that transmits torque and rotation, and tyres.
“Premium cars”	Vehicles categorised as either premium or luxury based on price class.
“Real-world Driving Emissions monitoring”	The process of measuring exhaust emissions on random cycles on the public roads rather than laboratory conditions.
“Supercharged engine”	An engine that uses a supercharger, a device powered directly by the engine that compresses air flowing into the engine, to draw in more air for internal combustion. As a supercharger causes more air to enter the engine for combustion, a supercharged engine generally produces more power than the same engine without the charging.
“SUVs”	Sport Utility Vehicles; a type of vehicle characterised by a formal Z box silhouette with a wheel base to overall height ratio greater than 60% and off-road style elements.
“TDV6”	Turbo Diesel V6 engine (currently 3.0L displacement).
“TDV8”	Turbo Diesel V8 engine (currently 4.4L displacement).
“Turbocharged engine”	An engine that depends on a turbocharger, a device powered by the flow of exhaust from the engine that compresses air flowing into the engine, to draw in more air for internal combustion. As a turbocharger causes more air to enter the engine for combustion, a turbocharged engine generally produces more power than the same engine without the charging.
“Tyre rolling resistance”	The resistance that occurs when the tyre rolls at steady straight line velocity on a flat surface. The more rolling resistance a tyre has, the more power is required from the engine to move the vehicle.
“V6”	An engine with six cylinders arranged in pairs, driving a common crank, and forming a “V” shape when viewed end on.
“V8”	An engine with eight cylinders arranged in pairs, driving a common crank, and forming a “V” shape when viewed end on.

“VED Band A”

Vehicle Excise Duty Band A is a CO₂ based band which provides vehicles tax exemption for vehicles where CO₂ emissions are below 100g/km.

Jaguar Land Rover Automotive plc
Annual Report 2016/17

DIRECTORS' REPORT

The directors present their report and the audited consolidated financial statements of the Group for the year ended 31 March 2017. Jaguar Land Rover Automotive plc is a public limited company incorporated under the laws of England and Wales. The business address of the directors and senior management of the Group is Abbey Road, Whitley, Coventry, CV3 4LF, England, United Kingdom.

Future developments

Future developments impacting the Group are disclosed in the Strategic report on pages 10 to 59.

Dividends

The directors proposed a dividend of £150 million (£0.10 per ordinary share) in May 2017. £60 million of the dividend was paid in June 2017 (for each of the years ended 31 March 2016 and 2015, £150 million was paid in June 2016 and June 2015 respectively).

Directors

Biographies of the directors currently serving on the JLR plc Board are set out on pages 64 to 65.

Directors' indemnities

The Group has made qualifying third- party indemnity provisions for the benefit of its directors during the year; these remain in force at the date of this report.

Material interests in shares

Jaguar Land Rover Automotive plc is a wholly owned subsidiary of Tata Motors Limited, held through TML Holdings Pte. Ltd. (Singapore).

Share capital

Share capital remains unchanged. See note 29 to the consolidated financial statements for further details.

Corporate Governance Statement

The Corporate Governance Statement is set out on pages 62 to 73 and is incorporated by reference into this report.

Branches

The Group has 11 branches that exist and operate outside of the UK, based in Singapore, China and the United Arab Emirates.

Research and development

The Group is committed to an ongoing programme of expenditure on research and development activities as disclosed in note 11 to the consolidated financial statements on page 98.

Financial instruments

The disclosures required in relation to the use of financial instruments by the Group and Company, together with details of the Group's and Company's treasury policy and management, are set out in note 35 to the consolidated financial statements on pages 124 to 131 and in note 53 on pages 144 to 148 of the parent company financial statements.

Employee information

The average number of employees within the Group is disclosed in note 7 to the consolidated financial statements on page 96.

Apart from determining that an individual has the ability to carry out a particular role, the Group does not discriminate in any way. It endeavours to retain employees if they become disabled, making reasonable adjustments to their role and, if necessary, looking for redeployment opportunities within the Group. The Group also ensures that training, career development and promotion opportunities are available to all employees irrespective of gender, race, age or disability.

Employee involvement

Details of how the Group involves its employees are contained in the Strategic report on pages 10 to 59, which are incorporated by reference into this report.

Political involvement and contributions

The Group respects an employee's right to use their own time and resources to participate as individual citizens in political and governmental activities of their choice. The Group itself operates under legal limitations on its ability to engage in political activities and, even where there are no legal restrictions, the Group does not typically make contributions to political candidates or political parties, or permit campaigning on its property by political candidates (including those who work for the Group) or persons working on their behalf. There have not been any political donations in any of the periods covered by these financial statements.

Going concern

The Group's business activities, together with the factors likely to affect its future development, performance and position, are set out in the Strategic report. The financial position of the Group is described on pages 56 to 59. In addition, note 35 to the consolidated financial statements includes the Group's objectives, policies and processes for managing its exposures to interest rate risk, foreign currency risk, credit risk and liquidity risk.

Details of the Group's financial instruments and hedging activities are also provided in note 35 to the consolidated financial statements.

The JLR plc Board has a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future. Accordingly, the financial statements set out on pages 78 to 148 have been prepared on the going concern basis.

Events after the balance sheet date

Full details of significant events since the balance sheet date are disclosed in note 42 to the Group's consolidated financial statements.

Code of Conduct

Directors and employees are required to comply with the Jaguar Land Rover Code of Conduct, which is intended to help them put the Group's ethical principles into practice. The Code of Conduct clarifies the basic principles and standards they are required to follow and the behaviour expected of them. The Code of Conduct can be found at www.jaguarlandrover.com.

Employees, contract staff, third parties with whom the Group has a business relationship (such as dealers, suppliers and agents), and any member of the public may raise ethical and compliance concerns to the Group's global helpline or via group.compliance@jaguarlandrover.com.

Slavery and human trafficking statement

Pursuant to section 54 of the Modern Slavery Act 2015, the Group has published a slavery and human trafficking statement for the year ended 31 March 2017. The statement sets out the steps that the Group has taken to address the risk of

slavery and human trafficking occurring within its own operations and its supply chains. This statement can be found on the corporate website at www.jaguarlandrover.com.

Statement of directors' responsibilities in respect of the directors' report and the financial statements

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and of the profit or loss of the Group for that period.

In preparing these financial statements, International Accounting Standard 1 requires that directors:

- Properly select and apply accounting policies;
- Present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- Provide additional disclosures when compliance with the specific requirements in IFRS is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the Group's financial position and financial performance; and
- Make an assessment of the Group's ability to continue as a going concern.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Group's transactions and disclose with reasonable accuracy at any time the financial position of the Group and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Group's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The directors confirm that, to the best of their knowledge, the financial statements, prepared in accordance with IFRS as adopted by the European Union, give a true and fair view of the assets, liabilities, financial position and profit or loss of the Group and the undertakings included in the consolidation taken as a whole.

Statement of disclosure of information to auditors

In the case of each of the persons who are directors at the time when the report is approved under section 418 of the Companies Act, 2006, the following applies: so far as the directors are aware, there is no relevant audit information of which the Group's auditor is unaware; and the directors have taken necessary actions in order to make themselves aware of any relevant audit information and to establish that the Group's auditor is aware of that information.

Auditor

At the completion of its audit tenure, Deloitte LLP will stand down as auditor. A formal selection process has commenced to identify a successor auditor and a resolution to appoint will be proposed at the 2017 Tata Motors Limited Annual General Meeting.

Acknowledgement

The directors wish to convey their appreciation to all employees for their continued commitment, effort and contribution in supporting the delivery of the Group's record performance. The directors would also like to extend their thanks to all other key stakeholders for the continued support of the Group and their confidence in its management.

The Annual Report on pages 10 to 148 was approved by the JLR plc Board and authorised for issue on 24 July 2017 and signed on its behalf by:

A handwritten signature in black ink, appearing to read 'R. Speth', written in a cursive style.

Professor Dr Ralf D. Speth
Chief Executive Officer
Jaguar Land Rover
Automotive plc

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF JAGUAR LAND ROVER AUTOMOTIVE PLC

We have audited the financial statements of Jaguar Land Rover Automotive Plc for the year ended 31 March 2017 which comprise the Consolidated Income Statement, the Consolidated Statement of Comprehensive Income, the Consolidated and Parent Company Balance Sheets, the Consolidated and Parent Company Statements of Changes in Equity, the Consolidated and Parent Company Cash Flow Statements and the related notes 1 to 56. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRS) as adopted by the European Union and, as regards the Parent Company financial statements, as applied in accordance with the provisions of the Companies Act 2006.

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Respective responsibilities of directors and auditor

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the Group's and the parent company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Opinion on financial statements

In our opinion:

- the financial statements give a true and fair view of the state of the Group's and of the parent company's affairs as at 31 March 2017 and of the Group's profit for the year then ended;
- the Group financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union;
- the parent company financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union and as applied in accordance with the provisions of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

Opinion on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic Report and the Governance Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and

- the Strategic Report and the Governance Report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Strategic Report and the Governance Report.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Cash and cash equivalents at end of year	21	2,878	3,399	3,208

* Comparatives have been restated for the amendment in the current year to disclose separately 'Effect of foreign exchange on cash and cash equivalents' as a separate line item after 'Cash and cash equivalents at beginning of year'. The line items of 'cash flows from operating activities before changes in assets and liabilities' in note 39 and 'cash generated from operations', 'Net cash generated from operating activities', and 'Net increase in cash and cash equivalents' in the consolidated cash flow statement were previously reported as £3,179 million, £3,726 million, £3,560 million and £191 million for the year ended 31 March 2016, and £4,093 million, £4,016 million, £3,627 million and £948 million for the year ended 31 March 2015. An adjustment of £4 million and £52 million was recorded to those line items for the years ended 31 March 2016 and 2015 respectively, to reflect the removal of the foreign exchange gain on cash and cash equivalents from those line items to present this amount separately as described above. The line items of 'Cash flows from operating activities before changes in assets and liabilities', 'Cash generated from operations', 'Net cash generated from operating activities', and 'Net increase in cash and cash equivalents' were therefore restated as £3,175 million, £3,722 million, £3,556 million and £187 million for the year ended 31 March 2016, and £4,041 million, £3,964 million, £3,575 million and £896 million for the year ended 31 March 2015. There is no impact on cash and cash equivalents as previously reported for the years ended 31 March 2016 or 31 March 2015.

Jaguar Land Rover Automotive PLC
Annual report and financial statements
Year ended 31 March 2017

NOTES TO THE FINANCIAL STATEMENTS

1 BACKGROUND AND OPERATIONS

Jaguar Land Rover Automotive plc ('the Company') and its subsidiaries are collectively referred to as 'the Group' or 'JLR'. The Company is a public limited company incorporated and domiciled in the United Kingdom. The address of its registered office is Abbey Road, Whitley, Coventry, CV3 4LF, England, United Kingdom.

The Company is a subsidiary of Tata Motors Limited, India and acts as an intermediate holding company for the Jaguar Land Rover business. The principal activity during the year was the design, development, manufacture and marketing of high-performance luxury saloons, specialist sports cars and four-wheel-drive off-road vehicles.

These consolidated financial statements have been prepared in Pound Sterling (GBP) and rounded to the nearest million GBP (£ million) unless otherwise stated. Results for the year ended and as at 31 March 2015 have been disclosed solely for the information of the users.

2 ACCOUNTING POLICIES

STATEMENT OF COMPLIANCE

These consolidated and parent company financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and IFRS Interpretation Committee (IFRS IC) interpretations as adopted by the European Union (EU) and the requirements of the United Kingdom Companies Act 2006 applicable to companies reporting under IFRS.

The Company has taken advantage of section 408 of the Companies Act 2006 and, therefore, the separate financial statements of the Company do not include the income statement or the statement of comprehensive income of the Company on a stand-alone basis.

BASIS OF PREPARATION

The consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments which are measured at fair value. Historical cost is generally based on the fair value of the consideration given in exchange for the assets. The principal accounting policies adopted are set out below.

CHANGE IN PRESENTATION OF FOREIGN EXCHANGE GAINS AND LOSSES

During Fiscal 2016/17, the Group reviewed the presentation of foreign exchange in the consolidated income statement following the continued increase in hedging activity, volatility in foreign exchange rates, and in anticipation of transition to IFRS 9.

As a result, it is considered more appropriate to present realised foreign exchange relating to derivatives hedging revenue exposures as an adjustment to 'Revenue' and realised foreign exchange relating to derivatives hedging cost exposures to 'Material and other cost of sales'. The prior year comparatives have been represented on this basis. Realised foreign exchange gains of £78 million and £240 million have been adjusted to 'Revenue' for the year ended March 2016 and 2015 respectively. Realised foreign exchange losses of £259 million and £162 million have been adjusted to 'Material and other cost of sales' for the year ended March 2016 and 2015 respectively.

There is no impact upon the reported profit after taxation or reported equity in either of the financial years.

GOING CONCERN

The directors have considered the financial position of the Group at 31 March 2017 (net assets of £6,581 million (2016: £7,614 million, 2015: £6,040 million)) and the projected cash flows and financial performance of the Group for at

least 12 months from the date of approval of these financial statements as well as planned cost and cash improvement actions, and believe that the plan for sustained profitability remains on course.

The directors have taken actions to ensure that appropriate long-term cash resources are in place at the date of signing the accounts to fund Group operations. The directors have reviewed the financial covenants linked to the borrowings in place and believe these will not be breached at any point and that all debt repayments will be met.

Therefore, the directors consider, after making appropriate enquiries and taking into consideration the risks and uncertainties facing the Group, that the Group has adequate resources to continue in operation as a going concern for the foreseeable future and is able to meet its financial covenants linked to the borrowings in place. Accordingly, the directors continue to adopt the going concern basis in preparing these consolidated and parent company financial statements.

BASIS OF CONSOLIDATION

Subsidiaries

The consolidated financial statements include Jaguar Land Rover Automotive plc and its subsidiaries. Subsidiaries are entities controlled by the Company. Control exists when the Company has power over the investee, is exposed or has rights to variable return from its involvement with the investee, and has the ability to use its power to affect its returns. In assessing control, potential voting rights that currently are exercisable are taken into account, as well as other contractual arrangements that may influence control. All subsidiaries of the Group given in note 43 to the parent company financial statements are included in the consolidated financial statements.

Intercompany transactions and balances including unrealised profits are eliminated in full on consolidation.

Joint ventures and associates (equity accounted investments)

Joint ventures are those entities over whose activities the Group has joint control, established by contractual agreement and requiring unanimous consent for decisions about the relevant activities of the entity, being those activities that significantly affect the Group's returns. Associates are those entities in which the Group has significant influence, but not control or joint control. Significant influence is the power to participate in the financial and operating policy decisions of the investee and is presumed to exist when the Group holds between 20 and 50 per cent of the voting power of the investee.

Joint ventures and associates are accounted for using the equity method and are recognised initially at cost. The Group's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Group's share of the income and expenses, other comprehensive income, and equity movements of equity accounted investments, from the date that joint control or significant influence commences until the date that joint control or significant influence ceases. When the Group's share of losses exceeds its interest in an equity accounted investment, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Group has an obligation or has made payments on behalf of the investee.

When the Group transacts with a joint venture or associate of the Group, profits and losses are eliminated to the extent of the Group's interest in its joint venture or associate.

Dividends received are recognised when the right to receive payment is established.

USE OF ESTIMATES AND JUDGEMENTS

The preparation of financial statements in conformity with IFRS requires the use of judgements, estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Those that are significant to the Group are discussed separately below.

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the consolidated financial statements:

Revenue from multiple element arrangements: Where a contractual arrangement consists of two or more separate elements that have value to a customer on a standalone basis, revenue is recognised for each element as if it were an individual contract. The total contract consideration is allocated between the separate elements. Sales of bundled offers generally involve service plans and data connectivity contracts with the vehicle. For offers that cannot be separated into identifiable components, revenues are recognised in full over the life of the contract. The Group makes judgements on what components can be separated and the appropriate margin used to defer that component (cost plus basis). Refer to note 5.

Assessment of cash-generating units: The Group has determined that there is one cash-generating unit. This is on the basis that there are no smaller groups of assets that can be identified with certainty which generate specific cash flows that are independent of the inflows generated by other assets or groups of assets. Refer to note 18.

Alternative performance measures (APMs): Management exercises judgement in determining the adjustments to apply to IFRS measurements in order to derive APMs that provide additional useful information on the underlying trends. Refer to note 3.

Estimates and assumptions: The areas where assumptions and estimates are significant to the financial statements are as described below. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Impairment of intangible and tangible fixed assets: The Group tests annually whether indefinite lived intangible fixed assets have suffered any impairment. The recoverable amount of the cash-generating unit is based on the higher of value in use and the fair value less cost of disposal. Value in use is calculated from cash flow projections generally over five years using data from the Group's latest internal forecasts, and extrapolated beyond five years using estimated long-term growth rates. Key estimates and sensitivities for impairment are disclosed in note 18.

Uncertain tax provisions: Tax provisions are recognised for uncertain tax positions where a risk of an additional tax liability has been identified and it is probable that the Group will be required to settle that tax. Measurement is dependent on management's expectations of the outcome of decisions by tax authorities in the various tax jurisdictions in which the Group operates. This is assessed on a case by case basis using in-house experts, professional firms and previous experience. Refer to note 14.

Product warranties: The Group provides product warranties on all new vehicle sales. Provisions are generally recognised when vehicles are sold or when new warranty programs are initiated. Based on historical warranty claim experience, assumptions have to be made on the type and extent of future warranty claims and customer goodwill, as well as on possible recall campaigns. These assessments are based on experience of the frequency and extent of vehicle faults and defects in the past. In addition, the estimates also include assumptions on the amounts of potential repair costs per vehicle and the effects of possible time or mileage limits. The provisions are regularly adjusted to reflect new information. Refer to note 27.

Retirement benefit obligation: The present value of the post-employment benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost/ (income) for pensions include the discount rate, inflation and mortality assumptions. Any changes in these assumptions will impact upon the carrying amount of post-employment benefit obligations. Key assumptions and sensitivities for post-employment benefit obligations are disclosed in note 32.

REVENUE RECOGNITION

Revenue comprises the amounts invoiced to customers outside the Group and is measured at the fair value of the consideration received or receivable, net of discounts, sales incentives, dealer bonuses and rebates granted, which can be identified at the point of sale. Revenue is presented net of excise duty, where applicable, and other indirect taxes.

Revenue is recognised when the risks and rewards of ownership have been transferred to the customer and the amount of revenue can be reliably measured with it being probable that future economic benefits will flow to the Group. The transfer of the significant risks and rewards are defined in the underlying agreements with the customer.

No sale is recognised where, following disposal of significant risks and rewards, the Group retains a significant financial interest. The Group's interest in these items is retained in inventory, with a creditor being recognised for the contracted buyback price. Income under such agreements, measured as the difference between the initial sale price and the buyback price, is recognised on a straight-line basis over the term of the agreement. The corresponding costs are recognised over the term of the agreement based on the difference between the item's cost, including estimated costs of resale, and the expected net realisable value.

If a sale includes an agreement for subsequent servicing or maintenance, the fair value of that service is deferred and recognised as income over the relevant service period in proportion with the expected cost pattern of the agreement.

COST RECOGNITION

Costs and expenses are recognised when incurred and are classified according to their nature.

Expenditures are capitalised, where appropriate, in accordance with the policy for internally generated intangible assets and represent employee costs, stores and other manufacturing supplies, and other expenses incurred for product development undertaken by the Group.

GOVERNMENT GRANTS AND INCENTIVES

Government grants are recognised when there is reasonable assurance that the Group will comply with the relevant conditions and the grant will be received.

Government grants are recognised in the consolidated income statement, either on a systematic basis when the Group recognises, as expenses, the related costs that the grants are intended to compensate or, immediately, if the costs have already been incurred.

Government grants related to assets are deducted from the cost of the asset and amortised over the useful life of the asset. Government grants related to income are presented as an offset against the related expenditure, and government grants that are awarded as incentives with no ongoing performance obligations to the Group are recognised as other income in the period in which the grant is received.

Sales tax incentives received from governments are recognised in the consolidated income statement at the reduced tax rate, and revenue is reported net of these sales tax incentives.

FOREIGN CURRENCY

The Company has a functional currency of GBP. The presentation currency of the consolidated financial statements is GBP.

The functional currency of the UK and non-UK selling operations is GBP, being the primary economic environment that influences these operations. This is on the basis that management control is in the UK, GBP is the currency that primarily determines sales prices and is the main currency for the retention of operating income. The functional currency of Chery Jaguar Land Rover Automotive Co. Ltd., the Group's principal joint venture, is Chinese Yuan (CNY). The functional currency of Jaguar Land Rover Slovakia s.r.o is Euro.

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Foreign currency denominated monetary assets and liabilities are remeasured into the functional currency at the exchange rate

prevailing on the balance sheet date. Exchange differences are recognised in the consolidated income statement as 'Foreign exchange loss'.

For the purposes of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations (non-GBP functional currency) are translated at exchange rates prevailing on the balance sheet date. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity.

INCOME TAXES

Income tax expense comprises current and deferred taxes. Income tax expense is recognised in the consolidated income statement, except when related to items that are recognised outside of profit or loss (whether in other comprehensive income or directly in equity), or where related to the initial accounting for a business combination. In the case of a business combination, the tax effect is included in the accounting for the business combination.

Current income taxes are determined based on respective taxable income of each taxable entity and tax rules applicable for respective tax jurisdictions.

Deferred tax assets and liabilities are recognised for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilised business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity and for each taxable jurisdiction. Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilised.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, and on the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

EXCEPTIONAL ITEM

Exceptional items by virtue of their nature, size or frequency are disclosed separately on the face of the consolidated income statement where this enhances understanding of the Group's performance.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment is stated at cost of acquisition or construction less accumulated depreciation and accumulated impairment, if any.

Cost includes purchase price, non-recoverable taxes and duties, labour cost and direct overheads for self-constructed assets and other direct costs incurred up to the date the asset is ready for its intended use.

Interest cost incurred for constructed assets is capitalised up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

Depreciation is charged on a straight-line basis over the estimated useful lives of the assets. Estimated useful lives of the assets are as follows:

Class of property, plant and equipment	Estimated useful life (years)
Buildings.....	20 to 40
Plant, equipment and leased assets	3 to 30
Vehicles	3 to 10
Computers.....	3 to 6
Fixtures and fittings	3 to 20

The depreciation for property, plant and equipment with finite useful lives is reviewed at least at each year end. Changes in expected useful lives are treated as changes in accounting estimates.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease. Freehold land is measured at cost and is not depreciated. Heritage assets are not depreciated as they are considered to have a residual value in excess of cost. Residual values are reassessed on an annual basis.

Depreciation is not recorded on assets under construction until construction and installation are complete and the asset is ready for its intended use. Assets under construction include capital prepayments.

INTANGIBLE ASSETS

Acquired intangible assets

Intangible assets purchased, including those acquired in business combinations, are measured at acquisition cost, which is the fair value on the date of acquisition, where applicable, less accumulated amortisation and accumulated impairment, if any. Intangible assets with indefinite lives are reviewed annually to determine whether an indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

For intangible assets with finite lives, amortisation is charged on a straight-line basis over the estimated useful lives of the acquired intangible assets as per the estimated amortisation periods below:

Class of intangible asset	Estimated amortisation period (years)
Software.....	2 to 8
Patents and technological know-how.....	2 to 12
Customer-related—dealer network.....	20
Intellectual property rights and other intangibles.....	3 to indefinite

The amortisation for intangible assets with finite useful lives is reviewed at least at each year end. Changes in expected useful lives are treated as changes in accounting estimates.

Capital work-in-progress includes capital advances. Customer-related intangibles acquired in a business combination consist of dealer networks. Intellectual property rights and other intangibles mainly consist of brand names, which are considered to have indefinite lives due to the longevity of the brands.

Internally generated intangible assets

Research costs are charged to the consolidated income statement in the year in which they are incurred.

Product development costs incurred on new vehicle platforms, engines, transmission and new products are recognised as intangible assets—when feasibility has been established, the Group has committed technical, financial and other resources to complete the development and it is probable that the asset will generate future economic benefits.

The costs capitalised include the cost of materials, direct labour and directly attributable overhead expenditure incurred up to the date the asset is available for use.

Interest cost incurred is capitalised up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

Product development cost is amortised over a period of between two and ten years.

Capitalised development expenditure is measured at cost less accumulated amortisation and accumulated impairment loss, if any.

Amortisation is not recorded on product development in progress until development is complete.

IMPAIRMENT

Property, plant and equipment and intangible assets

At each balance sheet date, the Group assesses whether there is any indication that any property, plant and equipment and intangible assets may be impaired. If any such impairment indicator exists, the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, or earlier if there is an indication that the asset may be impaired.

The estimated recoverable amount is the higher of value in use and fair value less costs of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the consolidated income statement.

An annual impairment review for heritage assets is performed and any impairment in the carrying value is recognised immediately in the consolidated income statement.

Equity accounted investments: joint ventures and associates

The requirements of IAS 39 *Financial Instruments: Recognition and Measurement* are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in a joint venture or an associate. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 *Impairment of Assets* as a single asset by comparing its recoverable amount (the higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise cash on hand, demand deposits and highly liquid investments with an original maturity of up to three months that are readily convertible into known amounts of cash and that are subject to an insignificant risk of changes in value.

INVENTORIES

Inventories are valued at the lower of cost and net realisable value. Cost of raw materials and consumables are ascertained on a first-in, first-out basis. Costs, including fixed and variable production overheads, are allocated to work-in-progress and finished goods, determined on a full absorption cost basis. Net realisable value is the estimated selling price in the ordinary course of business less estimated cost of completion and selling expenses.

Inventories include vehicles sold subject to repurchase arrangements. These vehicles are carried at cost to the Group and are amortised in changes in stocks and work-in-progress to their residual values (i.e. estimated second-hand sale value) over the term of the arrangement.

PROVISIONS

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are held for product warranty, legal and product liabilities, residual risks and environmental risks as detailed in note 27 to the consolidated financial statements.

LONG-TERM INCENTIVE PLAN (LTIP)

The Group operates a share-based payment LTIP arrangement for certain employees. The scheme provides a cash payment to the employee based on a specific number of phantom shares at grant date and the share price of Tata Motors Limited at the vesting date, subject to profitability and employment conditions. These are accounted for as cash-settled arrangements, whereby a liability is recognised at fair value at the date of grant, using a Black-Scholes model. At each balance sheet date, until the liability is settled, the fair value of the liability is remeasured, with any changes in fair value recognised in the consolidated income statement.

LEASES

At the inception of a lease, the lease arrangement is classified as either a finance lease or an operating lease, based on the terms and substance of the lease arrangement.

Assets taken on finance lease

A finance lease is recognised as an asset and a liability at the commencement of the lease, at the lower of the fair value of the asset and the present value of the minimum lease payments. Initial direct costs, if any, are also capitalised and, subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each year during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Assets taken on operating lease

Leases other than finance leases are operating leases, and the leased assets are not recognised on the consolidated balance sheet. Payments made under operating leases are recognised in the consolidated income statement on a straight-line basis over the term of the lease in 'Other expenses'.

EMPLOYEE BENEFITS

Pension schemes

The Group operates several defined benefit pension schemes; the UK defined benefit schemes were previously contracted out of the second state pension scheme until 5 April 2016. The assets of the plans are generally held in separate trustee-administered funds. The plans provide for a monthly pension after retirement based on salary and service as set out in the rules of each scheme.

Contributions to the plans by the Group take into consideration the results of actuarial valuations. The plans with a surplus position at the balance sheet date have been limited to the maximum economic benefit available from unconditional rights to refund from the scheme or reduction in future contributions. Where the subsidiary group is considered to have a contractual obligation to fund the pension plan above the accounting value of the liabilities, an onerous obligation is recognised.

The UK defined benefit schemes were closed to new joiners in April 2010.

For defined benefit schemes, the cost of providing benefits is determined using the projected unit credit method, with actuarial revaluations being carried out at the end of each reporting period.

Defined benefit costs are split into three categories:

- Current service cost, past service cost, and gains and losses on curtailments and settlements;
- Net interest cost; and
- Remeasurement.

Remeasurement comprising actuarial gains and losses, the effect of the asset ceiling and the return on scheme assets (excluding interest) is recognised immediately in the consolidated balance sheet with a charge or credit to the consolidated statement of comprehensive income in the period in which they occur. Remeasurement recorded in the statement of comprehensive income is not recycled.

Past service cost, including curtailment gains and losses, is generally recognised in profit or loss in the period of scheme amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability.

The Group presents these defined benefit costs within 'Employee costs' in the consolidated income statement (see note 7).

Separate defined contribution schemes are available to all other employees of Jaguar Land Rover. Costs in respect of these schemes are charged to the consolidated income statement as incurred.

Post-retirement Medicare scheme

Under this unfunded scheme, employees of some subsidiaries receive medical benefits subject to certain limits of amount, periods after retirement and types of benefits, depending on their grade and location at the time of retirement. Employees separated from the Group as part of an Early Separation Scheme, on medical grounds or due to permanent disablement, are also covered under the scheme. The applicable subsidiaries (and therefore, the Group) account for the liability for the post-retirement medical scheme based on an annual actuarial valuation.

Actuarial gains and losses

Actuarial gains and losses relating to retirement benefit plans are recognised in the consolidated statement of comprehensive income in the year in which they arise. Actuarial gains and losses relating to long-term employee benefits are recognised in the consolidated income statement in the year in which they arise.

Measurement date

The measurement date of all retirement plans is 31 March.

FINANCIAL INSTRUMENTS

Classification, initial recognition and measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified into categories: financial assets at fair value through profit or loss (which can either be held for trading or designated as fair value options); held-to-maturity investments; loans and receivables; and available-for-sale financial assets. Financial liabilities are classified into financial liabilities at fair value through profit or loss or classified as other financial liabilities. No financial instruments have been classified as held-to-maturity. Where the Group provides convertible loan notes to third parties, these are designated as fair value through profit or loss using the fair value option.

Financial instruments are recognised on the balance sheet when the Group becomes a party to the contractual provisions of the instrument.

Initially, a financial instrument is recognised at its fair value. Transaction costs directly attributable to the acquisition or issue of financial instruments are recognised in determining the carrying amount, if it is not classified as at fair value through profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

Financial assets and financial liabilities at fair value through profit or loss—held for trading: Derivatives, including embedded derivatives separated from the host contract, are classified into this category. Financial assets and liabilities are measured at fair value with changes in fair value recognised in the consolidated income statement with the exception of those derivatives that are designated as cash flow hedging instruments and for which hedge accounting is applied.

Loans and receivables: Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and that are not classified as financial assets at fair value through profit or loss or financial assets available-for-sale. Subsequently, these are measured at amortised cost using the effective interest method less any impairment losses, if any. These include cash and cash equivalents, trade receivables, finance receivables and other financial assets.

Available-for-sale financial assets: Available-for-sale financial assets are those non-derivative financial assets that are either designated as such upon initial recognition or are not classified in any of the other financial assets categories. Subsequently, these are measured at fair value and changes therein are recognised in other comprehensive income, net of applicable deferred income taxes, and accumulated in the investments revaluation reserve with the exception of impairment losses, interest calculated using the effective interest method and foreign exchange gains and losses on monetary assets, which are recognised directly in profit or loss. The Group does not hold any available-for-sale financial assets.

Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost.

Embedded derivatives relating to prepayment options on senior notes are not considered as closely related and are separately accounted unless the exercise price of these options is approximately equal on each exercise date to either the amortised cost of the senior notes or the present value of the lost interest for the remaining term of the senior notes.

Equity instruments

An equity instrument is any contract that evidences residual interests in the assets of the Group after deducting all of its liabilities. Equity instruments issued by the Group are recorded at the proceeds received, net of direct issue costs.

Other financial liabilities

These are measured at amortised cost using the effective interest method.

Determination of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Subsequent to initial recognition, the Group determines the fair value of financial instruments that are quoted in active markets using the quoted bid prices (financial assets held) or quoted ask prices (financial liabilities held) and using valuation techniques for other instruments. Valuation techniques include discounted cash flow method and other valuation models.

Derecognition of financial assets and financial liabilities

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expires or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities are derecognised when they are extinguished, that is when the obligation is discharged, cancelled or has expired.

When a financial instrument is derecognised, the cumulative gain or loss in equity (if any) is transferred to the consolidated income statement.

Impairment of financial assets

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset, other than those at fair value through profit or loss, or a group of financial assets is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

Loans and receivables: Objective evidence of impairment includes default in payments with respect to amounts receivable from customers, significant financial difficulty of the customer or bankruptcy. Impairment loss in respect of loans and receivables is calculated as the difference between their carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Such impairment loss is recognised in the consolidated income statement. If the amount of an impairment loss decreases in a subsequent year, and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. The reversal is recognised in the consolidated income statement.

Equity investments: A significant or prolonged decline in the fair value of the security below its cost is also evidence that the assets are impaired. If any such evidence exists, the cumulative loss (measured as the difference between the acquisition cost and the current fair value), less any impairment loss on that financial asset previously recognised in profit or loss is removed from equity and recognised in profit and loss. Impairment losses recognised in the consolidated income statement on equity instruments are not reversed through the consolidated income statement.

Hedge accounting

The Group uses foreign currency forward contracts, foreign currency options and borrowings denominated in foreign currency to hedge its risks associated with foreign currency fluctuations relating to highly probable forecast transactions. The Group designates these foreign currency forward contracts, foreign currency options and borrowing denominated in foreign currency in a cash flow hedging relationship by applying hedge accounting principles under IAS 39.

These are stated at fair value on the consolidated balance sheet at each reporting date. Changes in the fair value of these forward contracts, options and borrowings that are designated and effective as hedges of future cash flows are recognised in other comprehensive income (net of tax), and any ineffective portion is recognised immediately in the consolidated income statement. Amounts accumulated in other comprehensive income are reclassified to the consolidated income statement in the periods in which the forecasted transactions affect profit or loss.

For options, the time value is not a designated component of the hedge, and therefore all changes in fair value related to the time value of the instrument are recognised immediately in the consolidated income statement.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, exercised or no longer qualifies for hedge accounting. For forecast transactions, any cumulative gain or loss on the hedging instrument recognised in other comprehensive income is retained there until the forecast transaction affects profit or loss.

If the forecast transaction is no longer expected to occur, the net cumulative gain or loss recognised in other comprehensive income is immediately transferred to the consolidated income statement.

NEW ACCOUNTING PRONOUNCEMENTS

The following IFRS pronouncements have been issued by the IASB and have not yet been adopted:

IAS 7 has been amended to require additional disclosure to help users evaluate changes in borrowings. The amendment is effective for annual periods beginning on or after 1 January 2017 and earlier application is permitted subject to EU endorsement. The Group expects to include a net debt reconciliation within its disclosures following the adoption of this amendment.

IFRS 7 additional disclosure requirements are being assessed and disclosure will be given when IFRS 9 is adopted by the Group.

IFRS 9 *Financial Instruments* addresses the classification, measurement and recognition of financial assets and financial liabilities, introduces new rules for hedge accounting and a new impairment model for financial assets. IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through other comprehensive income and fair value through profit or loss. The basis of classification depends on the entity's business model and contractual cash flow characteristics of the financial asset. The Group has undertaken an assessment of classification and measurement and the Group does not expect a significant impact on the financial statements. The new impairment model requires the recognition of impairment provisions based on expected credit losses rather than only incurred credit losses as is the case under IAS 39. It applies to financial assets classified at amortised cost, contract assets under IFRS 15 *Revenue from Contracts with Customers*, lease receivables, loan commitments and certain financial guarantee contracts. The Group has undertaken an assessment of the impairment model and the Group does not expect a significant impact on the financial statements. The new hedge accounting rules will align the accounting for hedging instruments more closely with the Group's risk management practices. As a general rule, more hedge relationships might be eligible for hedge accounting, as the standard introduces a more principles-based approach. The Group has undertaken an assessment of their IAS 39 hedge relationships against the requirements of IFRS 9 and have concluded that the Group's current hedge relationships will qualify as continuing hedges upon the adoption of IFRS 9. The Group has identified a change with respect to treatment of the cost of hedging, specifically the time value of the foreign exchange options and foreign currency basis included in the foreign exchange forwards. The Group is undertaking an assessment to determine the impact on the financial statements. The Group anticipates that the time value of foreign exchange options and the foreign currency basis included in the foreign exchange forwards will now be recorded in a separate component of the statement of comprehensive income. Foreign exchange gains/losses for non-financial items will now be recognised as an adjustment to that non-financial item (i.e. inventory) when recorded on the consolidated balance sheet. The new standard also introduces expanded disclosure requirements and changes in presentation. These are expected to change the nature and extent of the Group's disclosures about its financial instruments particularly in the year of the adoption of the new standard.

IFRS 15 *Revenue from Contracts with Customers* provides a new comprehensive framework for revenue recognition and establishes new principles and the disclosure requirements thereof. The new standard specifies a uniform, five-step model for revenue recognition, which is to be applied to all contracts with customers. The new disclosure requirements aim to create a more transparent view of how a company generates its revenue and aims to provide more consistent and standardised information to users of financial statements about the nature, timing and amount arising from an entity's contracts with customers. Under IFRS 15, revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 *Revenue* and IAS 11 *Construction Contracts* and related interpretations (such as IFRIC 13 *Customer Loyalty Programmes*). The Group does not intend to early adopt IFRS 15 and therefore will adopt for Fiscal 2018/19, commencing 1 April 2018. The Group considers the profit impact of IFRS 15 to be immaterial to the financial statements. The main financial impact on the Group of IFRS 15 will be the presentation of the consolidated income statement with changes in classification arising from the new definitions of agent and principal, as well as some reclassification from 'Other Income' to 'Revenue' and additional revenue reductions relating to payments to customers.

The other significant impact of IFRS 15 on the financial statements will be the extensive disclosure requirements of the standard, whereby additional numerical and narrative information will be required as well as more disaggregation of revenue compared to the current disclosures.

IFRS 16 specifies how to recognise, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognise assets and liabilities for all leases unless the lease term is 12 months or less, or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. The standard replaces IAS 17 *Leases* and related interpretations (IFRIC 4, SIC-15, SIC-27). The standard is effective for annual periods beginning on or after 1 January 2019 and earlier application is permitted subject to EU endorsement and the adoption of IFRS 15. The Group has commenced an impact assessment project that has resulted in the identification of additional lease arrangements that existed in previous years. Consequently, the operating lease commitment note for 31 March 2017 reflects these additional arrangements identified (see note 36).

IFRS 17 *Insurance Contracts* was published on 18 May 2017 and replaces IFRS 4, which currently permits a wide variety of practices in accounting for insurance contracts. For fixed-fee service contracts whose primary purpose is the provision of services, such as roadside assistance, entities have an accounting policy choice to account for them in

accordance with either IFRS 17 or IFRS 15. As the standard applies to annual periods beginning on or after 1 January 2021, the Group has to complete its project on IFRS 15 before being able to determine the impact of IFRS 17.

The Group does not consider that any other standards, amendments or interpretations issued by the IASB, but not yet applicable, will have a significant impact on the consolidated financial statements.

3 ALTERNATIVE PERFORMANCE MEASURES

Many companies use alternative performance measures (APMs) to provide helpful additional information for users of their financial statements, telling a clearer story of how the business has performed over the period. Alternative performance measures are used by the Board of Management to monitor and manage the performance of the Group. These measures exclude certain items that are included in comparable statutory measures.

The alternative performance measures used within this Annual Report are defined below.

Alternative performance measure	Definition
EBIT	Profit before income tax expense, finance expense (net of capitalised interest), finance income, foreign exchange gains/losses on financing and unrealised derivatives, gains/losses on unrealised commodity derivatives, and exceptional items.
EBITDA.....	Profit before income tax expense, finance expense (net of capitalised interest), finance income, depreciation and amortisation, foreign exchange gains/losses on financing and unrealised derivatives, gains/losses on unrealised commodity derivatives, share of profit/loss from equity accounted investments and exceptional items.
Free cash flow before financing.....	Net cash generated from operating activities less net cash used in investing activities excluding investments in short- term deposits and including foreign exchange gains/losses on short-term deposits and cash and cash equivalents.
Total product and other investment	Cash used in the purchase of property, plant and equipment, intangible assets, investments in subsidiaries, joint ventures and associates, and expensed research and development costs.

The Group uses EBITDA as an alternative performance measure to review and measure the underlying profitability of the Group on an ongoing basis as it recognises that increased capital expenditure year on year will lead to an increase in depreciation and amortisation expense recognised within the consolidated income statement.

Free cash flow before financing is considered by the Group to be a key measure in assessing and understanding the total operating performance of the Group and to identify underlying trends.

Total product and other investment is considered by the Group to be a key measure in assessing cash invested in the development of future new models and infrastructure supporting the growth of the Group.

Reconciliations between these alternative performance measures and statutory reported measures are shown below.

EBIT AND EBITDA

Year ended 31 March	Note	2017 £m	2016 £m	2015 £m
EBITDA.....		2,955	3,147	4,132
Depreciation and amortisation	13	(1,656)	(1,418)	(1,051)
Share of profit/(loss) of equity accounted investments.....	15	159	64	(6)
EBIT.....		1,458	1,793	3,075
Foreign exchange (loss)/gain on derivatives.....	13	(11)	86	(166)
Unrealised gain/(loss) on commodities.....	13	148	(59)	(30)
Foreign exchange loss on loans	13	(101)	(54)	(178)
Finance income	12	33	38	48

<u>Year ended 31 March</u>	<u>Note</u>	<u>2017</u>	<u>2016</u>	<u>2015</u>
		<u>£m</u>	<u>£m</u>	<u>£m</u>
Finance expense (net)	12	(68)	(90)	(135)
Exceptional item		151	(157)	—
Profit before tax		1,610	1,557	2,614

The Group's objective is to disclose alternative performance measures on a consistent basis. However, during 2017 it was considered appropriate to disclose an additional alternative performance measure, EBIT. This measure is consistent with other automotive companies as an indicator of operating performance.

FREE CASH FLOW BEFORE FINANCING

<u>Year ended 31 March</u>	<u>Note</u>	<u>2017</u>	<u>2016</u>	<u>2015</u>
		<u>£m</u>	<u>£m</u>	<u>£m</u>
Net cash generated from operating activities		3,160	3,556	3,575

Purchases of other investments		1	—	—
Acquisition of subsidiary		—	11	—
Total product and other investment		3,438	3,135	3,147

4 EXCEPTIONAL ITEM

The exceptional item of £151 million for the year ended 31 March 2017 relates to recoveries associated with the £157 million exceptional charge recognised in the prior year for stored vehicles damaged in the explosion at the port of Tianjin (China) in August 2015. These recoveries include amounts received for insurance, taxes and saleable vehicles.

In addition to the exceptional item of £151 million, a further £35 million of insurance and vehicle recoveries were recognised in the year ended 31 March 2017 related to additional costs of £35 million incurred in the year ended 31 March 2017 that were associated with Tianjin, including lost and discounted vehicle revenue.

The exceptional item of £157 million for the year ended 31 March 2016 related to the full financial year impact of the explosion at the port of Tianjin. A provision of £245 million against the carrying value of inventory (finished goods) was recorded in the second quarter ended 30 September 2015, based on the Group's assessment of the physical condition of the vehicles involved. Subsequent to that, insurance proceeds of £55 million were received, together with the conclusion of further assessments of the condition of the remaining vehicles, which led to a reversal of £33 million of the initial provision.

The original £157 million exceptional item was recorded as a provision against vehicle inventory involved in the explosion less recoveries as at 31 March 2016.

5 REVENUE

Year ended 31 March	2017	2016* restated	2015* restated
	£m	£m	£m
Sale of goods	25,659	22,208	21,866
Realised revenue hedges	(1,320)	78	240
Total revenues	24,339	22,286	22,106

* Comparatives have been restated due to the change in accounting policy for presentation of foreign exchange gains and losses as set out in note 2.

6 MATERIAL AND OTHER COST OF SALES

Year ended 31 March	2017	2016* restated	2015* restated
	£m	£m	£m
Changes in inventories of finished goods and work-in-progress	(754)	(257)	(236)

Raw materials and consumables used	14,621	12,684	12,557
Realised purchase hedges	(91)	259	162
Total material and other cost of sales	14,920	13,562	13,347

* Comparatives have been restated due to the change in accounting policy for presentation of foreign exchange gains and losses as set out in note 2.

7 EMPLOYEE NUMBERS AND COSTS

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Wages and salaries	1,915	1,738	1,500
Social security costs and benefits	294	274	240
Pension costs	281	309	237
Total employee costs	2,490	2,321	1,977

Average employee numbers for the year ended 31 March 2017	Non-agency	Agency	Total
Manufacturing	18,988	2,770	21,758
Research and development	6,632	2,803	9,435
Other	7,430	1,070	8,500
Total employee numbers	33,050	6,643	39,693

Average employee numbers for the year ended 31 March 2016	Non-agency	Agency	Total
Manufacturing	17,235	3,140	20,375
Research and development	6,060	3,115	9,175
Other	6,494	961	7,455
Total employee numbers	29,789	7,216	37,005

Average employee numbers for the year ended 31 March 2015	Non-agency	Agency	Total
Manufacturing	14,504	3,688	18,192
Research and development	5,185	2,716	7,901
Other	5,213	821	6,034
Total employee numbers	24,902	7,225	32,127

8 DIRECTORS' EMOLUMENTS

Year ended 31 March	2017	2016	2015
	£	£	£
Directors' emoluments.....	3,957,673	3,613,282	2,925,327
Amounts receivable under long-term incentive scheme	537,445	197,782	—
Post-employment benefits.....	873,214	786,351	1,475,732
	4,368,332	4,597,415	4,401,059

The aggregate of emoluments received in the year and amounts accrued under the long-term incentive plan (LTIP) of the highest paid director was £4,393,459 (2016: £3,709,433, 2015: £2,824,297), together with a cash allowance in lieu of pension benefits of £873,214 (2016: £786,351, 2015: £1,475,732). During the year, £537,445 of LTIP awards (2016: £197,782, 2015: no LTIP awards) have accrued, which will become payable in future periods.

There were no directors who were members of a defined benefit pension scheme or a defined contribution scheme during the years ended 31 March 2017, 2016 and 2015.

No directors received any LTIP cash payments during the years ended 31 March 2017, 2016 and 2015.

9 LONG-TERM INCENTIVE PLAN (LTIP)

During the year ended 31 March 2017, the Group announced a new LTIP that provides a cash payment to certain employees based on the Group's performance against long-term business metrics related to performance and strategic priorities (over a period of three years). This new LTIP benefit scheme has been accounted for in accordance with IAS 19 *Employee Benefits*. During the year ended 31 March 2016, the Group issued the final share-based payment LTIP arrangement based on the share price of Tata Motors Limited. The scheme provides a cash payment to the employee based on a specific number of phantom shares at the grant date and the share price of Tata Motors Limited at the vesting date. The cash payment is dependent upon continued employment for the duration of the three-year vesting period.

Year ended 31 March	2017	2016	2015
	number	number	number
Outstanding at the beginning of the year	6,032,857	5,637,242	5,353,559
Granted during the year	974	2,317,710	2,315,618
Vested in the year	(1,665,663)	(1,690,151)	(1,654,917)
Forfeited in the year	(252,947)	(231,944)	(377,018)
Outstanding at the end of the year	4,115,221	6,032,857	5,637,242

The weighted average share price of the 1,665,663 phantom stock awards vested in the year was £4.75 (2016: £5.84, 2015: £5.89).

The weighted average remaining contractual life of the outstanding share-based payment awards is 0.8 years (2016: 1.4 years, 2015: 1.3 years).

The amount charged in the year in relation to the share-based payment LTIP was £8 million (2016: £3 million, 2015: £16 million).

The fair value of the balance sheet liability in respect of phantom stock awards outstanding at the year end was £16 million (2016: £16 million, 2015: £23 million).

The fair value of the awards was calculated using a Black-Scholes model at the grant date. The fair value is updated at each reporting date as the awards are accounted for as cash-settled under IFRS 2 *Share-based Payment*. The inputs into the model are based on Tata Motors Limited historical data and the risk-free rate is calculated on government bond rates. The significant inputs used are:

As at 31 March	2017	2016	2015
Risk-free rate	0.18%	0.51%	0.49%
Dividend yield	0.04%	0.00%	0.39%
Weighted average fair value per phantom share	£ 4.69	£ 4.12	£ 6.14

10 OTHER EXPENSES

Year ended 31 March	Note	2017	2016	2015
		£m	£m	£m
Stores, spare parts and tools		197	150	123
Freight cost		925	858	673
Works, operations and other costs		2,321	2,065	1,808
Repairs		44	42	37
Power and fuel		71	61	57
Rent, rates and other taxes		64	50	57
Insurance		34	26	20
Impairment of tangible assets	17	12	—	—
Write-down of intangible assets	18	—	28	—
Product warranty	27	823	583	543
Publicity		885	811	791
Total other expenses		5,376	4,674	4,109

11 RESEARCH AND DEVELOPMENT

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Total research and development costs incurred	1,794	1,560	1,411
Research and development expensed	(368)	(318)	(253)
Development costs capitalised	1,426	1,242	1,158
Interest capitalised	89	73	114
Research and development grants capitalised	(89)	(88)	(69)
Total internally developed intangible additions	1,426	1,227	1,203

During the year ended 31 March 2014, legislation was enacted to allow UK companies to elect for the Research and Development Expenditure Credit (RDEC) on qualifying expenditure incurred since 1 April 2013, instead of the previous super-deduction rules. In the year ended 31 March 2017, as a result of this election, £87 million (2016: £66 million, 2015: £66 million) of the RDEC—the proportion relating to capitalised product development expenditure and other intangible assets—has been offset against the cost of the respective assets. The remaining £38 million (2016: £38 million, 2015: £30 million) of the RDEC has been recognised as ‘Other income’.

12 FINANCE INCOME AND EXPENSE

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Finance income	33	38	48
Total finance income	33	38	48
Total interest expense on financial liabilities measured at amortised cost	(146)	(143)	(234)
Unwind of discount on provisions	(19)	(21)	(17)
Interest capitalised	97	74	116
Total finance expense (net)	(68)	(90)	(135)

The capitalisation rate used to calculate borrowing costs eligible for capitalisation was 4.3 per cent (2016: 4.6 per cent, 2015: 5.8 per cent).

During the year ended 31 March 2017, the Group repaid one tranche of debt (see note 25) and as a result a redemption premium of £2 million was incurred.

During the year ended 31 March 2016, the Group repaid one tranche of debt (see note 25) and as a result a redemption premium of £2 million was incurred.

During the year ended 31 March 2015, the Group repaid two tranches of debt (see note 25) and as a result a redemption premium of £77 million was incurred.

13 PROFIT BEFORE TAX

Expense/(income) in profit before tax includes the following:

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Foreign exchange loss on loans	101	54	178
Foreign exchange loss/(gain) on derivatives.....	11	(86)	166
Unrealised (gain)/loss on commodities.....	(148)	59	30
Depreciation of property, plant and equipment	787	634	461
Amortisation of intangible assets (excluding internally generated development costs)	100	88	64
Amortisation of internally generated development costs.....	769	696	526
Operating lease rentals in respect of plant, property and equipment	75	57	48
Loss on disposal of property, plant, equipment and software.....	15	13	7
Auditor remuneration (see below)	5	6	4

During the year ended 31 March 2017, £64 million (2016: £101 million, 2015: £132 million) was received by a foreign subsidiary as an indirect tax incentive that requires the subsidiary to meet certain criteria relating to vehicle efficiency and investment in engineering and research and development. The incentive is provided as a partial offset to the higher sales taxes payable following implementation of new legislation in the year ended 31 March 2014. During the year ended 31 March 2017, £64 million (2016: £101 million, 2015: £132 million) has been recognised in revenue and £nil (2016, 2015: £nil) has been deferred to offset against capital expenditure, when incurred.

During the year ended 31 March 2017, £4 million (2016: £62 million, 2015: £54 million) was received by a foreign subsidiary as an incentive for continuing trading in that country for the foreseeable future. As the receipt has no ongoing financial or operating conditions attached, the amount has been recognised as ‘Other Income’.

The following table sets out the auditor remuneration for the year (rounded to the nearest £0.1 million):

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Fees payable to the Company’s auditor and its associates for the audit of the parent company and consolidated financial statements	0.1	0.1	0.1
Fees payable to the Company’s auditor and its associates for other services: Audit of the Company’s subsidiaries	4.2	3.5	3.3
Total audit fees	4.3	3.6	3.4
Audit-related assurance services	—	1.8	0.3
Other assurance services	1.0	0.1	0.7
Total non-audit fees	1.0	1.9	1.0
Total audit and related fees.....	5.3	5.5	4.4

Fees payable to Deloitte LLP and its associates for non-audit services to the Group are not required to be disclosed separately as these fees are disclosed on a consolidated basis.

14 TAXATION

JAGUAR LAND ROVER'S APPROACH TO TAX

Introduction

JLR's business has grown significantly in recent years and continues to do so. Our operations are large and complex and, as a result, we operate through multiple companies, with activities, employees and assets located in numerous countries around the world. This, in turn, naturally drives an inherent level of complexity in our tax affairs.

In relation to tax matters, just as for any other area of our business, JLR always strives to be a good, responsible corporate citizen and we are committed to complying with all applicable tax laws, both in letter and in spirit. We aim to be fair, honest, transparent and ethical in our conduct and for everything we do to stand the test of public scrutiny.

Jaguar Land Rover's key tax principles

In 2013, the JLR plc Board formally adopted six key principles in relation to JLR's approach to taxation matters and the conduct of our tax affairs. These principles continue to apply today; they apply equally to all companies within the Group, across all areas of our business activity and in all our territories of operation.

JLR will conduct its tax affairs in a way that:

1. Is compliant with all legal and regulatory obligations and which adheres to the principles set out in the JLR Code of Conduct and Tata Code of Conduct;
2. Is aligned with the Group's overall business strategy and growth objectives;
3. Proactively seeks to enhance shareholder value and optimise tax cost on a sustainable basis;
4. Is governed, managed and controlled within an appropriate risk management framework;
5. Is appropriately resourced and seeks to maximise operating efficiencies through the suitable use of automation and technology-based solutions; and
6. Maintains good, open, honest and professional working relationships with tax authorities globally and seeks to take a leading role in relation to matters of governmental tax policy relevant to JLR.

Each principle is commented on further below:

1. Tax compliance

This is considered the most fundamental and important of our six principles. JLR will always seek to comply with all applicable tax laws, both in terms of the letter and the spirit of the law, and to satisfy its global tax compliance obligations in a timely and accurate manner.

In addition, we adhere to the JLR Code of Conduct and the Tata Code of Conduct, which set out the high, ethical standards of business behaviour expected from all companies and employees within our Group.

2. Business alignment

JLR always aligns its tax affairs with the genuine business activities being undertaken by the organisation. We do not engage in any form of tax avoidance or artificial tax structuring and we do not operate or use any offshore tax havens. All JLR Group subsidiaries are located in countries where the business has significant physical and economic operations (i.e. employees, offices and revenue generating activity).

3. Enhancing shareholder value

As a commercial organisation, JLR will always seek to effectively manage its tax liabilities, just as for any other business cost. In so doing, we always adhere to relevant tax laws and, in relation to transactions within the Group, we always seek to ensure that these are conducted on an arm's length basis in accordance with Organisation for Economic Co-operation and Development (OECD) principles.

Where governments or fiscal authorities have introduced particular tax reliefs, credits, incentives or exemptions to encourage specific types of economic activity (for example, investment in research and development), we will always seek to ensure that JLR claims the appropriate level of benefit for which it qualifies.

4. Governance and risk management

Tax risks arising within the Group are identified, assessed and managed by the central Tax function on an ongoing basis. A detailed tax update is taken to the JLR plc Board on an annual basis and tax risks are reported quarterly to the Financial Risk and Assurance Committee, chaired by the Chief Financial Officer. The JLR Tax Director also meets with the Chief Financial Officer on a biweekly basis to provide updates on all tax matters affecting the Group.

JLR actively seek to minimise risk in relation to tax matters. We do this through a variety of processes and controls including, for example, tax risk assessments and health-check exercises for subsidiaries, online monitoring of compliance processes and an active Advance Pricing Agreement programme.

5. Tax resource

Responsibility for the day-to-day management of JLR's tax affairs rests with our central Tax function, led by the JLR Tax Director. The function comprises an appropriate blend of tax professionals with the necessary qualifications, training, skills and experience required to effectively undertake their roles. The Tax function also advises the JLR plc Board in relation to setting Group tax strategy and policy.

In addition to the central Tax function, the business also has dedicated tax professionals embedded within the finance teams in key non-UK subsidiaries.

Where appropriate, we look to implement technology-based solutions to streamline processes, drive efficiency and manage risk.

6. Relationships with governments and authorities

In our dealings with tax authorities globally, including HMRC in the UK, we always look to maintain good, open, honest and professional working relationships, to engage proactively in relation to tax matters and to resolve any areas of dispute or differences of opinion as quickly as possible in order to reduce uncertainty and manage risk.

We also actively engage in dialogue with governments, either directly or through appropriate representative bodies, in relation to matters of tax policy which affect our business.

Amounts recognised in the consolidated income statement

Included within 'Over provided in prior years' for the year ended 31 March 2017 is £21 million credit relating to revisions of prior year estimates of tax positions in various jurisdictions, principally the UK, to bring them into line with the latest estimates and currently filed tax positions. This is offset by £11 million relating to uncertain tax positions arising in relation to normal ongoing assessments of tax positions globally.

Included within 'Over provided in prior years' for the year ended 31 March 2016 is £45 million credit relating to enhanced deductions under the UK Patent Box regime in respect of Fiscal 2013/14 and 2014/15.

Included within 'Over provided in prior years' for the year ended 31 March 2015 is a reversal of £62 million credit relating to withholding tax released as a result of changes in tax rates and laws expected to apply to the future repatriation of intercompany dividends.

The UK Finance Act 2015 was enacted during the year ended 31 March 2016, which included provisions for a reduction in the UK corporation tax rate from 20 per cent to 19 per cent with effect from 1 April 2017.

The UK Finance Act 2016 was enacted during the year ended 31 March 2017, which included provisions for a further reduction in the UK corporation tax rate to 17 per cent with effect from 1 April 2020.

Accordingly, UK deferred tax has been provided at a blended rate of 18.4 per cent on assets (2016: 19 per cent, 2015: 20 per cent) and 17.6 per cent on liabilities (2016: 18.6 per cent, 2015: 20 per cent), recognising the applicable tax rate at the point when the timing difference is expected to reverse.

15 INVESTMENTS

Investments consist of the following:

As at 31 March	2017	2016	2015
	£m	£m	£m
Equity accounted investments	474	339	280
Other investments	1	—	—
Total investments	475	339	280

The Group has the following investments as at 31 March 2017:

Name of investment	Proportion of voting rights	Principal place of business and country of incorporation	Principal activity	Registered office address
Equity accounted investments				
Chery Jaguar Land Rover Automotive Co. Ltd.	50.0% China		Manufacture and assembly of vehicles	Room 1102, Binjiang, International Plaza, No 88 Tonggang Road, Changshu Economic and Technical Development Zone, Suzhou City, Jiangsu Province, China
Spark44 (JV) Limited	50.0% England & Wales		Provision of advertising services	Abbey Road, Whitley, Coventry, CV3 4LF, England
Jaguar Cars Finance Limited	49.9% England & Wales		Non-trading	280 Bishopsgate, London, EC2M 4RB, England
Synaptiv Limited	33.3% England & Wales		Business and domestic software development	84 Kirkland Avenue, Ilford, Essex, England, IG5 0TN
CloudCar Inc.	42.6% USA		Automotive software development	711 Centerville Road, Suite 400, Wilmington, County of New Castle, Delaware 19808, USA
Trading investments				
Jaguar Land Rover Schweiz AG	10.0% Switzerland		Sale of automotive vehicles and parts	Badenerstrasse 600, 8048 Zurich Switzerland

Except for Spark44 (JV) Limited and CloudCar Inc., the proportion of voting rights disclosed in the table above is the same as the Group's interest in the ordinary share capital of each undertaking.

Chery Jaguar Land Rover Automotive Co. Ltd. is a limited liability company whose legal form confirms separation between the parties to the joint arrangement. There is no contractual arrangement or any other facts or circumstances that indicate that the parties to the joint control of the arrangement have rights to the assets or obligations for the liabilities relating to the arrangement. Accordingly, Chery Jaguar Land Rover Automotive Co. Ltd. is classified as a joint venture.

During the year ended 31 March 2015, the Group increased its investment in Chery Jaguar Land Rover Automotive Co. Ltd. by £124 million to £195 million. No further increases to the investment were made during the years ended 31 March 2017 or 31 March 2016.

During the year ended 31 March 2017, a dividend of £68 million was received from Chery Jaguar Land Rover Automotive Co. Ltd. (2016, 2015: no dividend).

The following table sets out the summarised financial information of the Group's individually material joint venture, Chery Jaguar Land Rover Automotive Co. Ltd.:

As at 31 March	2017	2016	2015
	£m	£m	£m
Current assets.....	940	698	520

Income tax (expense)/credit.....	(103)	(44)	6

Spark44 (JV) Limited's total ordinary share capital is divided into A and B ordinary shares, with each class having 50 per cent voting rights and interest in returns (of which the Group holds 100 per cent of the B shares). The Group has an interest in 58 per cent of the allotted ordinary share capital, but only 50 per cent of the voting rights and interest in returns, since a number of A ordinary shares are held in trust. Therefore, Spark44 (JV) Limited is considered a joint venture.

The Group has no additional rights or influence over Jaguar Cars Finance Limited other than the voting rights attached to the ordinary share capital.

During the year ended 31 March 2017, the Group purchased 32 per cent of the ordinary share capital of CloudCar Inc. for £12 million. However, the Group has 43 per cent of the voting rights since a number of ordinary shares are in the form of options either available for issue or assigned to the employees of CloudCar Inc.

During the year ended 31 March 2017, the Group purchased 33 per cent of the ordinary share capital of Synaptiv Limited for £0.2 million.

No dividend was received in the year ended 31 March 2017 (2016, 2015: no dividend) from any of the individually immaterial equity accounted investments.

The following table sets out the summarised financial information, in aggregate, for the share of investments in equity accounted joint ventures that are not individually material:

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Group's share of profit for the year.....	3	2	1
Group's share of other comprehensive income.....	—	—	—
Group's share of total comprehensive income.....	3	2	1
Carrying amount of the Group's interest.....	8	5	3

The following table sets out the summarised financial information, in aggregate, for the share of investments in equity accounted associates that are not individually material:

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Group's share of total comprehensive income.....	—	—	—
Investment in equity accounted associates.....	12	—	—
Carrying amount of the Group's interest	12	—	—

The following reconciles the carrying amount of the Group's interests in equity accounted investments:

As at 31 March	2017	2016	2015
	£m	£m	£m
Net assets of material joint venture	924	682	565
Share of net assets of:			
Material joint venture.....	462	341	282
Individually immaterial joint ventures	8	5	3
Individually immaterial associates	12	—	—
Other	(8)	(7)	(5)
Carrying amount of the Group's interests in equity accounted investments	474	339	280

As at 31 March 2017, an adjustment of £8 million (2016: £7 million, 2015: £5 million) has been made to derecognise profit that has not yet been realised on goods sold by the Group to Chery Jaguar Land Rover Automotive Co. Ltd.

The following reconciles the Group's share of total comprehensive income of equity accounted investments:

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Profit/(loss) of material joint venture.....	312	124	(13)
Share of profit/(loss) of:			
Material joint venture.....	156	62	(7)
Individually immaterial joint ventures	3	2	1
Share of profit/(loss) of equity accounted investments	159	64	(6)
Currency translation differences	33	(3)	21
Total comprehensive income related to equity accounted investments.....	192	61	15

The Group's share of capital commitments of its joint ventures at 31 March 2017 is £171 million (2016: £102 million, 2015: £19 million), and commitments relating to the Group's interests in its joint ventures are disclosed in note 33. The contingent liabilities of its joint ventures at 31 March 2017 is £3 million (2016, 2015: £nil).

The information above reflects the amounts presented in the financial statements of the equity accounted investments adjusted for differences in accounting policies between the Group and its equity accounted investments. All joint ventures are accounted for using the equity method and are private companies and there are no quoted market prices available for their shares.

The Group has no additional rights or influence over Jaguar Land Rover Schweiz AG other than the voting rights attached to the ordinary share capital. During the year ended 31 March 2017, a dividend of £0.3 million (2016: £0.5 million, 2015: £nil) was received from Jaguar Land Rover Schweiz AG.

During the year ended 31 March 2017, the Group invested £0.1 million in Splitting Fares Inc., £0.1 million in Sheprd Inc., £0.1 million in Gokid Corp. and £0.4 million in Parkt Inc.

16 OTHER FINANCIAL ASSETS

As at 31 March	2017	2016	2015
	£m	£m	£m

At 31 March 2017	394	20	34	633	2,156	2,930	6,167

Following a review of all product development in progress, £nil of costs were identified as being written-down and recognised as an expense within 'Other expenses' in the year ended 31 March 2017 (2016: £28 million, 2015: £nil).

IMPAIRMENT TESTING

The directors are of the view that the operations of the Group represent a single cash-generating unit. The intellectual property rights are considered to have an indefinite useful life on the basis of the expected longevity of the brand names.

For the periods presented, the recoverable amount of the cash-generating unit has been calculated with reference to its value in use. The key assumptions of this calculation are shown below:

As at 31 March	2017	2016	2015
Period on which management approved forecasts are based	5 years	5 years	5 years
Growth rate applied beyond approved forecast period	1.9%	2.1%	2.2%
Pre-tax discount rate	10.9%	11.2%	11.2%

The growth rates used in the value in use calculation reflect those inherent within the Group's business plan as approved by the JLR plc Board, which is primarily a function of the Group's cycle plan assumptions, past performance and management's expectation of future market developments through to 2021/22. The cash flows are then extrapolated into perpetuity assuming a growth rate of 1.9 per cent (2016: 2.1 per cent, 2015: 2.2 per cent).

No reasonably possible change in any of the key assumptions would cause the recoverable amount to be less than the carrying value of the assets of the cash-generating unit.

20 DEFERRED TAX ASSETS AND LIABILITIES

Significant components of deferred tax asset and liability for the year ended 31 March 2017 are as follows:

	Opening balance	Recognised in profit or loss	Recognised in other comprehensive income	Foreign exchange	Closing balance
	£m	£m	£m	£m	£m
Deferred tax assets					
Property, plant and equipment	21	(9)	—	—	12
Provisions, allowances for doubtful receivables	224	(26)	—	24	222
Derivative financial instruments	240	(22)	329	—	547
Retirement benefits	110	(1)	143	—	252
Unrealised profit in inventory	127	65	—	—	192
Tax loss	175	34	—	—	209
Other	50	22	—	—	72
Total deferred tax asset	947	63	472	24	1,506
Deferred tax liabilities					
Intangible assets	946	49	—	—	995
Overseas unremitted earnings	31	29*	—	—	60
Total deferred tax liability	977	78	—	—	1,055
Presented as deferred tax asset**	354				511
Presented as deferred tax liability**	(384)				(60)

* Included within £29 million is a reversal of £18 million relating to withholding tax incurred on intercompany dividends paid in the year.

** For balance sheet presentation purposes, deferred tax assets and deferred tax liabilities are offset to the extent that they relate to the same taxation authority and are expected to be settled on a net basis.

At 31 March 2017, deferred tax assets of £511 million (2016: £354 million, 2015: £372 million) have been recognised in relation to deductible temporary differences, including unused tax losses, on the basis that it is probable that future taxable profits will be available against which those deductible temporary differences can be utilised.

At 31 March 2017, the Group had unused tax losses and other temporary differences amounting to £104 million (2016: £76 million, 2015: £nil) for which no deferred tax asset arises. As at 31 March 2017, £3 million (2016: £6 million, 2015: £nil) of those tax losses are subject to expiry in future periods, with £1 million due to expire in each of the fiscal years 2018 to 2020. The remaining balance is not expected to expire.

All deferred tax assets and deferred tax liabilities at 31 March 2017, 2016 and 2015 are presented as non-current.

Significant components of deferred tax asset and liability for the year ended 31 March 2016 are as follows:

	Opening balance	Recognised in profit or loss	Recognised in other comprehensive income	Foreign exchange	Closing balance
	£m	£m	£m	£m	£m
Deferred tax assets					
Property, plant and equipment	8	13	—	—	21

Overseas unremitted earnings	59	(28)*	—	—	31
Total deferred tax liability	911	66	—	—	977
Presented as deferred tax asset**	372				354
Presented as deferred tax liability**	(199)				(384)

* Included within £28 million is a reversal of £39 million relating to withholding tax incurred on intercompany dividends paid in the year.

** For balance sheet presentation purposes, deferred tax assets and deferred tax liabilities are offset to the extent that they relate to the same taxation authority and are expected to be settled on a net basis.

At 31 March 2016, the Group had temporary differences relating to undistributed profits of equity accounted investees amounting to £37 million for which no deferred tax liability has been recognised as it was not expected to reverse in the foreseeable future.

Significant components of deferred tax asset and liability for the year ended 31 March 2015 are as follows:

	Opening balance	Recognised in profit or loss	Recognised in other comprehensive income	Foreign exchange	Closing balance
	£m	£m	£m	£m	£m
Deferred tax assets

Total deferred tax liability	989	55	(133)	—	911
Presented as deferred tax asset**	284				372
Presented as deferred tax liability**	(346)				(199)

* Included within £82 million is a reversal of £59 million relating to withholding tax incurred on intercompany dividends paid in the year, and £62 million relating to withholding tax released as a result of changes in tax rates and laws expected to apply to future repatriation of intercompany dividends.

** For balance sheet presentation purposes, deferred tax assets and deferred tax liabilities are offset to the extent that they relate to the same taxation authority and are expected to be settled on a net basis.

21 CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of the following:

As at 31 March	2017	2016	2015
	£m	£m	£m
Cash and cash equivalents	2,878	3,399	3,208

Included within the cash and cash equivalents balance of £2,878 million (2016: £3,399 million, 2015: £3,208 million) are amounts of £nil (2016: £12 million, 2015: £nil) which are not considered to be available for use by the Group at the balance sheet date. The balance at 31 March 2016 comprised £7 million relating to amounts held by solicitors to settle a capital commitment and £5 million relating to amounts that are required by local legislation to be held for use on specific marketing activities.

22 ALLOWANCES FOR TRADE AND OTHER RECEIVABLES

23 INVENTORIES

As at 31 March	2017	2016	2015
	£m	£m	£m
Raw materials and consumables	117	92	80
Work-in-progress	330	379	298
Finished goods	3,017	2,214	2,038
Total inventories	3,464	2,685	2,416

Inventories of finished goods include £326 million (2016: £250 million, 2015: £187 million), relating to vehicles sold to rental car companies, fleet customers and others with guaranteed repurchase arrangements.

Cost of inventories (including cost of purchased products) recognised as an expense during the year amounted to £17,615 million (2016: £15,437 million, 2015: £15,041 million).

During the year, the Group recorded an inventory write-down expense of £16 million (2016: £230 million, 2015: £40 million), excluding a reversal of a write-down recorded in a previous period in relation to the Tianjin incident of £94 million (2016, 2015: £nil). The write-down excluding this reversal is included in 'Material and other cost of sales'.

24 ACCOUNTS PAYABLE

EURO MTF LISTED DEBT

The bonds are listed on the Luxembourg Stock Exchange multilateral trading facility (EURO MTF) market.

Details of the tranches of the bonds outstanding at 31 March 2017 are as follows:

- \$500 million Senior Notes due 2023 at a coupon of 5.625 per cent per annum—issued January 2013
- \$700 million Senior Notes due 2018 at a coupon of 4.125 per cent per annum—issued December 2013
- £400 million Senior Notes due 2022 at a coupon of 5.000 per cent per annum—issued January 2014
- \$500 million Senior Notes due 2019 at a coupon of 4.250 per cent per annum—issued October 2014
- £400 million Senior Notes due 2023 at a coupon of 3.875 per cent per annum—issued February 2015
- \$500 million Senior Notes due 2020 at a coupon of 3.500 per cent per annum—issued March 2015
- €650 million Senior Notes due 2024 at a coupon of 2.200 per cent per annum—issued January 2017
- £300 million Senior Notes due 2021 at a coupon of 2.750 per cent per annum—issued January 2017

Details of the tranches of the bond repaid in the year ended 31 March 2017 are as follows:

- \$84 million Senior Notes due 2021 at a coupon of 8.125 per cent per annum—issued May 2011

Details of the tranches of the bond repaid in the year ended 31 March 2016 are as follows:

- £58 million Senior Notes due 2020 at a coupon of 8.250 per cent per annum—issued March 2012

Details of the tranches of the bond repaid in the year ended 31 March 2015 are as follows:

- \$326 million Senior Notes due 2021 at a coupon of 8.125 per cent per annum—issued May 2011
- £442 million Senior Notes due 2020 at a coupon of 8.250 per cent per annum—issued March 2012

The contractual cash flows of interest bearing debt (excluding finance leases) are set out below, including estimated interest payments, and assumes the debt will be repaid at the maturity date.

As at 31 March	2017	2016	2015

PRODUCT WARRANTY PROVISION

The Group offers warranty cover in respect of manufacturing defects, which become apparent one to five years after purchase, dependent on the market in which the purchase occurred and the vehicle purchased. The estimated liability for product warranty is recognised when products are sold or when new warranty programmes are initiated. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future warranty claims, customer goodwill and recall complaints. The discount on the warranty

provision is calculated using a risk-free discount rate as the risks specific to the liability, such as inflation, are included in the base calculation. The timing of outflows will vary as and when a warranty claim will arise, being typically up to five years.

LEGAL AND PRODUCT LIABILITY PROVISION

A legal and product liability provision is maintained in respect of compliance with regulations and known litigations that impact the Group. The provision primarily relates to motor accident claims, consumer complaints, dealer terminations, employment cases, personal injury claims and compliance with regulations. The timing of outflows will vary as and when claims are received and settled, which is not known with certainty.

RESIDUAL RISK PROVISION

In certain markets, the Group is responsible for the residual risk arising on vehicles sold by dealers on leasing arrangements. The provision is based on the latest available market expectations of future residual value trends. The timing of the outflows will be at the end of the lease arrangements, being typically up to three years.

ENVIRONMENTAL RISK PROVISION

This provision relates to various environmental remediation costs such as asbestos removal and land clean-up. The timing of when these costs will be incurred is not known with certainty.

* Comparative information for the years ended 31 March 2016 and 31 March 2015 has been restated; however, there was no impact upon the closing hedge reserve as reported.

31 DIVIDENDS

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Dividend proposed for the previous year paid during the year of £0.10 (2016, 2015: £0.10) per ordinary share	150	150	150
Amounts recognised as distributions to equity holders during the year	150	150	150
Proposed dividend for the year of £0.10 (2016, 2015: £0.10) per ordinary share	150	150	150

In May 2017, the Company proposed an ordinary dividend of £150 million to its immediate parent TML Holdings Pte. Ltd. (Singapore). £60 million of this amount was paid in June 2017.

32 EMPLOYEE BENEFITS

The Group operates defined benefit pension schemes for qualifying employees of certain of its subsidiaries. The UK defined benefit schemes are administered by a trustee that is legally separated from the Group. The trustee of the pension schemes is required by law to act in the interest of the fund and of all relevant stakeholders in the schemes, and is responsible for the investment policy with regard to the assets of the schemes and all other governance matters. The board of the trustee must be composed of representatives of the Group and scheme participants in accordance with each scheme's regulations.

Under the schemes, the employees are entitled to post-retirement benefits based on their length of service and salary.

Through its defined benefit pension schemes, the Group is exposed to a number of risks, the most significant of which are detailed below.

ASSET VOLATILITY

The schemes' liabilities are calculated using a discount rate set with reference to corporate bond yields; if the schemes' assets underperform against these corporate bonds, this will create or increase a deficit. The defined benefit schemes hold a significant proportion of equity type assets, which are expected to outperform corporate bonds in the long term although introduce volatility and risk in the short term.

The UK schemes hold a substantial level of index-linked gilts and other inflation and interest rate hedging instruments in order to reduce the volatility of assets compared to the liability value, although these will lead to asset value volatility.

As the schemes mature, the Group intends to reduce the level of investment risk by investing more in assets that better match the liabilities.

However, the Group believes that due to the long-term nature of the schemes' liabilities and the strength of the supporting group, a level of continuing equity type investments is currently an appropriate element of the Group's long-term strategy to manage the schemes efficiently.

CHANGES IN BOND YIELDS

A decrease in corporate bond yields will increase the schemes' liabilities, although this is expected to be partially offset by an increase in the value of the schemes' assets, specifically the bond holdings and interest rate hedging instruments.

INFLATION RISK

Some of the Group's pension obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect the schemes against high inflation). As noted above, schemes hold a significant proportion of assets in index-linked gilts, together with other inflation hedging instruments and also assets that are more closely correlated with inflation. However, an increase in inflation will also create or increase the deficit to some degree.

LIFE EXPECTANCY

The majority of the schemes' obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the schemes' liabilities. This is particularly significant in the UK defined benefit schemes, where inflationary increases result in higher sensitivity to changes in life expectancy.

The following tables set out the disclosures pertaining to the retirement benefit amounts recognised in the consolidated financial statements prepared in accordance with IAS 19:

CHANGE IN PRESENT VALUE OF DEFINED BENEFIT OBLIGATION

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Defined benefit obligation at beginning of year	7,668	7,883	6,053
Current service cost	198	224	168
Interest expense	275	263	274
Actuarial (gains)/losses arising from:			
Changes in demographic assumptions	(76)	(36)	(20)
Changes in financial assumptions	2,335	(569)	1,454

Change in onerous obligation, excluding amounts included in interest expense ..	2	(2)	—
Remeasurement (loss)/gain on defined benefit obligation	(895)	489	(355)

Amounts recognised in the consolidated balance sheet consist of:

<u>As at 31 March</u>	<u>2017</u>	<u>2016</u>	<u>2015</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>
Present value of unfunded defined benefit obligations	(2)	(1)	(1)
Present value of funded defined benefit obligations	(9,967)	(7,667)	(7,882)
Fair value of schemes' assets	8,508	7,103	6,997
Restriction of pension asset recognised (as per IFRIC 14) and onerous obligations	—	(2)	(1)
Net retirement benefit obligation	(1,461)	(567)	(887)
Presented as non-current liability	(1,461)	(567)	(887)

The most recent actuarial valuations of the schemes' assets and the present value of the defined benefit liability for accounting purposes were carried out at 31 March 2017 by a qualified independent actuary. The present value of the defined benefit liability, and the related current service cost and past service cost, were measured using the projected unit credit method.

The principal assumptions used in accounting for the pension schemes are set out below:

<u>Year ended 31 March</u>	<u>2017</u>	<u>2016</u>	<u>2015</u>
	<u>%</u>	<u>%</u>	<u>%</u>
Discount rate	2.6	3.6	3.4
Expected rate of increase in compensation level of covered employees	3.7	3.5	3.6
Inflation increase	3.2	3.0	3.1

For the valuation at 31 March 2017 and 31 March 2016, the mortality assumptions used are the SAPS base table, in particular S2NxA tables and the Light table for members of the Jaguar Executive Pension Plan. A scaling factor of 120 per cent for males and 110 per cent for females has been used for the Jaguar Pension Plan, 115 per cent for males and 105 per cent for females for the Land Rover Pension Scheme, and 95 per cent for males and 85 per cent for females for the Jaguar Executive Pension Plan.

For the valuation at 31 March 2015, the mortality assumptions used are the SAPS base table, in particular S1NxA tables and the Light table for members of the Jaguar Executive Pension Plan. A scaling factor of 115 per cent has been used for the Jaguar Pension Plan, 110 per cent for the Land Rover Pension Scheme, and 105 per cent for males and 90 per cent for females for the Jaguar Executive Pension Plan.

There is an allowance for future improvements in line with the CMI (2014) projections and an allowance for long-term improvements of 1.25 per cent per annum (2016, 2015: CMI (2014) projections with 1.25 per cent per annum improvements).

The assumed life expectations on retirement at age 65 are:

<u>As at 31 March</u>	<u>2017</u>	<u>2016</u>	<u>2015</u>
	<u>years</u>	<u>years</u>	<u>years</u>
Retiring today:			
Males	21.5	21.5	21.4
Females	24.5	24.4	23.9

As at 31 March	2017	2016	2015
	years	years	years
Retiring in 20 years:			
Males.....	23.3	23.2	23.1
Females.....	26.3	26.2	25.8

The Group noted that on 27 March 2017, a new mortality projection model (CMI (2016)) was released that potentially indicated a small reduction in longevity of, on average, 0.5 years compared to current assumptions. The Group considered adopting the new mortality tables and noted that there was uncertainty about the appropriate level of initial mortality improvements, both for the general population and when applying the model to other populations. On this basis, following discussion with and recommendation by the Group's pension advisor, it is considered that the CMI (2014) mortality tables represent the Group's best estimate of the future longevity of its defined benefit schemes' members both during and after employment as at 31 March 2017.

The sensitivity analysis below is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the pension liability recognised within the consolidated balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous periods.

Assumption	Change in assumption	Impact on scheme liabilities	Impact on service cost
Discount rate.....	Increase/decrease by 0.25%	Decrease/increase by c.£550 million	Decrease/increase by c.£10 million
Inflation rate.....	Increase/decrease by 0.25%	Decrease/increase by c.£490 million	Decrease/increase by c.£10 million
Mortality.....	Increase/decrease by 1 year	Decrease/increase by c.£290 million	Decrease/increase by c.£10 million

The fair value of scheme assets is represented by the following major categories:

* Quoted prices for identical assets or liabilities in active markets.

As at 31 March 2017, the schemes held Gilt Repos, the net value of these transactions is included in the value of Interest rate and inflation derivatives. The value of the funding obligation for the Repo transactions is £843 million at 31 March 2017 (2016: £373 million, 2015: £nil).

The split of Level 1 assets is 66 per cent (2016: 63 per cent, 2015: 59 per cent), Level 2 assets 27 per cent (2016: 31 per cent, 2015: 37 per cent) and Level 3 assets 7 per cent (2016: 6 per cent, 2015: 4 per cent). Private market holdings are classified as Level 3 instruments. Included in the value for Interest rate and inflation derivatives are Repo transactions, as noted above.

Jaguar Land Rover contributes towards the UK defined benefit schemes. Following the 5 April 2015 valuations, it is intended to eliminate the pension scheme funding deficits over the 10 years following the valuation date. As at 31 March 2017, there is no additional liability; however, following the changes to the defined benefit schemes' rules in April 2017, an additional obligation may arise in the future. The current agreed contribution rate for defined benefit accrual is 31 per cent of

pensionable salaries in the UK. Deficit contribution levels remain in line with prior expectation for 2016–2018 and then increase to £58 million per annum to March 2025.

The average duration of the benefit obligations at 31 March 2017 is 21.6 years (2016: 20.5 years, 2015: 23.5 years).

On 3 April 2017, Jaguar Land Rover approved and communicated to its defined benefit schemes' members that the defined benefit schemes' rules were to be amended with effect from 6 April 2017 so that, among other changes, retirement benefits will be calculated on a career average basis rather than based upon a member's final salary at retirement. As a result of the remeasurement of the schemes' liabilities, a past service credit of £437 million has arisen and has been recognised in Fiscal 2017/18.

Excluding this past service credit but allowing for the new benefit structure from 6 April 2017, the expected net periodic pension cost for the year ended 31 March 2018 is £249 million. The Group expects to pay £302 million to its defined benefit schemes, in total, for the year ended 31 March 2018.

DEFINED CONTRIBUTION SCHEMES

The Group's contribution to defined contribution schemes for the year ended 31 March 2017 was £57 million (2016: £47 million, 2015: £33 million).

33 COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Group faces claims and assertions by various parties. The Group assesses such claims and assertions and monitors the legal environment on an ongoing basis, with the assistance of external legal counsel wherever necessary. The Group records a liability for any claims where a potential loss is probable and capable of being estimated and discloses such matters in its financial statements, if material. For potential losses that are considered possible, but not probable, the Group provides disclosure in the consolidated financial statements but does not record a liability unless the loss becomes probable. Such potential losses may be of an uncertain timing and/or amount.

The following is a description of claims and contingencies where a potential loss is possible, but not probable. Management believes that none of the contingencies described below, either individually or in aggregate, would have a material adverse effect on the Group's financial condition, results of operations or cash flows.

LITIGATION AND PRODUCT RELATED MATTERS

The Group is involved in legal proceedings, both as plaintiff and as defendant. There are claims and potential claims as at 31 March 2017 of £7 million (2016: £6 million, 2015: £11 million) against the Group which management has not recognised, as settlement is not considered probable. These claims and potential claims pertain to motor accident claims, consumer complaints, employment and dealership arrangements, replacement of parts of vehicles and/or compensation for deficiency in the services by the Group or its dealers.

The Group has provided for the estimated cost of repair following the passenger safety airbag issue in the United States, China, Canada, Korea, Australia and Japan. The Group recognises that there is a potential risk of further recalls in the future; however, the Group is unable at this point in time to reliably estimate the amount and timing of any potential future costs associated with this warranty issue.

OTHER TAXES AND DUTIES

During the year ended 31 March 2015, the Group's Brazilian subsidiary received a demand for 167 million Brazilian Real (£43 million at 31 March 2017 exchange rate) in relation to additional indirect taxes (PIS and COFINS) claimed as being due on local vehicle and parts sales made in 2010. The matter is currently being contested before the Brazilian appellate authorities. Professional legal opinions obtained in Brazil fully support that the basis of the tax authority's assertion is incorrect and, as a result, the likelihood of any settlement ultimately having to be made is considered remote. Accordingly, no provision has been recognised in the financial statements and the matter is disclosed here purely for the purposes of completeness.

The Group has no other significant tax matters in dispute as at 31 March 2017, 2016 or 2015 where a potential loss was considered possible.

COMMITMENTS

The Group has entered into various contracts with vendors and contractors for the acquisition of plant and equipment and various civil contracts of capital nature aggregating to £2,047 million (2016: £797 million, 2015: £814 million) and £31 million (2016: £12 million, 2015: £nil) relating to the acquisition of intangible assets.

Commitments and contingencies also includes other contingent liabilities of £82 million (2016: £28 million, 2015: £2 million). These mainly related to government body investigations with regards legislation and regulation compliance, support provided to the dealer network, termination clauses and supply chain arrangements. The timing of any outflow will vary as and when claims are received and settled, which is not known with certainty.

The remaining financial commitments, in particular the purchase commitments and guarantees, are of a magnitude typical for the industry.

Inventory of £nil (2016, 2015: £nil) and trade receivables with a carrying amount of £179 million (2016: £116 million, 2015: £156 million) and property, plant and equipment with a carrying amount of £nil (2016, 2015: £nil) and restricted cash with a carrying amount of £nil (2016, 2015: £nil) are pledged as collateral/security against the borrowings and commitments. Commitments related to leases are set out in note 36.

Stipulated within the joint venture agreement for Chery Jaguar Land Rover Automotive Co. Ltd. is a commitment for the Group to contribute a total of CNY 3,500 million of capital, of which CNY 2,875 million has been contributed as at 31 March 2017. The outstanding commitment of CNY 625 million translates to £73 million at 31 March 2017 exchange rate.

34 CAPITAL MANAGEMENT

The Group's objectives when managing capital are to ensure the going concern operation of all subsidiary companies within the Group and to maintain an efficient capital structure to support ongoing and future operations of the Group and to meet shareholder expectations.

The Group issues debt, primarily in the form of bonds, to meet anticipated funding requirements and maintain sufficient liquidity. The Group also maintains certain undrawn committed credit facilities to provide additional liquidity. These borrowings, together with cash generated from operations, are loaned internally or contributed as equity to certain subsidiaries as required. Surplus cash in subsidiaries is pooled (where practicable) and invested to satisfy security, liquidity and yield requirements.

The capital structure and funding requirements are regularly monitored by the JLR plc Board to ensure sufficient liquidity is maintained by the Group. All debt issuance and capital distributions are approved by the JLR plc Board. In addition, covenants (such as Adjusted EBITDA to interest ratios) related to the Group's financing arrangements are regularly monitored and compliance is certified annually.

The following table summarises the capital of the Group:

As at 31 March	2017	2016	2015
	£m	£m	£m
Short-term debt	181	121	160
Long-term debt	3,400	2,379	2,390
Total debt*	3,581	2,500	2,550
Equity	6,581	7,614	6,040
Total capital	10,162	10,114	8,590

* Total debt includes finance lease obligations of £7 million (2016: £11 million, 2015: £13 million).

35 FINANCIAL INSTRUMENTS

This section gives an overview of the significance of financial instruments for the Group and provides additional information on balance sheet items that contain financial instruments.

The details of significant accounting policies, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument, are disclosed in note 2.

(A) FINANCIAL ASSETS AND LIABILITIES

The following table shows the carrying amounts and fair value of each category of financial assets and liabilities as at 31 March 2017:

Financial assets

	Loans and receivables	Derivatives and financial instruments in cash flow hedging relationship	Fair value through profit and loss	Total carrying value	Total fair value
	£m	£m	£m	£m	£m
Cash and cash equivalents	2,878	—	—	2,878	2,878

Other financial liabilities—non-current.....	10	789	43	842	842
Total financial liabilities.....	8,223	1,458	71	9,752	9,830

OFFSETTING

Certain financial assets and financial liabilities are subject to offsetting where there is currently a legally enforceable right to set off recognised amounts and the Group intends to either settle on a net basis or to realise the asset and settle the liability simultaneously.

Derivative financial assets and financial liabilities are subject to master netting arrangements whereby in the case of insolvency, derivative financial assets and financial liabilities can be settled on a net basis.

The following table discloses the amounts that have been offset in arriving at the consolidated balance sheet presentation and the amounts that are available for offset only under certain conditions as at 31 March 2017:

	Gross amount recognised	Gross amount of recognised set-off in the balance sheet	Net amount presented in the balance sheet	Gross amount not offset in the balance sheet	Cash collateral (received)/pledged	Net amount after offsetting
	£m	£m	£m	£m	£m	£m
Financial assets						
Derivative financial assets ...	424	—	424	(419)	—	5

Fair value hierarchy

Financial instruments held at fair value are required to be measured by reference to the following levels:

- Quoted prices in an active market (Level 1): this level of hierarchy includes financial instruments that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Valuation techniques with observable inputs (Level 2): this level of hierarchy includes financial assets and liabilities measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Valuation techniques with significant unobservable inputs (Level 3): this level of hierarchy includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

There has been no change in the valuation techniques adopted or any transfers between fair value levels in either current or prior financial periods as presented.

The financial instruments that are measured subsequent to initial recognition at fair value are classified as Level 2 fair value measurements, as defined by IFRS 13, being those derived from inputs other than quoted prices that are observable. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. Fair value of forward derivative financial assets and liabilities are estimated by discounting expected future contractual cash flows using prevailing market interest rate curves from Reuters. Commodity swap contracts are similarly fair valued by discounting expected future contractual cash flows. Option contracts on foreign currency are entered into on a zero cost collar basis and fair value estimates are calculated from standard Black-Scholes options pricing methodology, using prevailing market interest rates and volatilities.

Additionally, a credit valuation adjustment/debit value adjustment is taken on derivative financial assets and liabilities and is calculated by discounting the fair value gain or loss on the financial derivative using credit default swap (CDS) prices quoted for the counterparty or Jaguar Land Rover respectively. CDS prices are obtained from Reuters.

The long-term unsecured listed bonds are held at amortised cost. Their fair value for disclosure purposes is determined using Level 1 valuation techniques, based on the closing price as at 31 March 2017 on the Luxembourg Stock Exchange multilateral trading facility (EURO MTF) market.

Fair values of cash and cash equivalents, short-term deposits, trade receivables and payables, short-term borrowings and other financial assets and liabilities (current and non-current excluding derivatives) are assumed to approximate to cost due to the short-term maturing of the instruments and as the impact of discounting is not significant.

Management uses its best judgement in estimating the fair value of its financial instruments. However, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented above are not necessarily indicative of all the amounts that the Group could have realised in a sales transaction as of the respective dates. The estimated fair value amounts as at 31 March 2017, 2016 and 2015 have been measured as at the respective dates. As such, the fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each year end.

(B) FINANCIAL RISK MANAGEMENT

The Group is exposed to foreign currency exchange rate, commodity price, interest rate, liquidity and credit risks. The management of foreign currency exchange rate risk is discussed in the Strategic report. The Group has a risk management framework in place, which monitors all of these risks as discussed below. This framework is approved by the JLR plc Board.

(C) FOREIGN CURRENCY EXCHANGE RATE RISK

The fluctuation in foreign currency exchange rates may have a potential impact on the consolidated income statement, the consolidated statement of comprehensive income, the consolidated balance sheet, the consolidated statement of

changes in equity and the consolidated cash flow statement, where any transaction references more than one currency or where assets/ liabilities are denominated in a currency other than the functional currency of the respective consolidated entities.

Considering the countries and economic environment in which the Group operates, its operations are subject to risks arising from fluctuations in exchange rates in those countries. The risks primarily relate to fluctuations in US Dollar, Chinese Yuan and Euro against the functional currency of the Company and its subsidiaries (considered to be GBP and Euro).

Hedge accounting exposures

The Group uses foreign currency contracts to hedge its risk associated with foreign currency fluctuations relating to highly probable forecast transactions. The fair value of such contracts designated in the hedge relationship as at 31 March 2017 was a net liability of £2,558 million (2016: £1,118 million, 2015: £1,263 million).

Cash flow hedges are expected to be recognised in profit or loss during the years ending 31 March 2018 to 31 March 2022. The Group also has a number of foreign currency options that are entered into as an economic hedge of the financial risks of the Group. The time value of options is excluded from the hedge relationship and thus the change in time value is recognised immediately in the consolidated income statement.

Changes in the fair value of foreign currency contracts, to the extent determined to be an effective hedge, are recognised in the consolidated statement of comprehensive income, and the ineffective portion of the fair value change is recognised in the consolidated income statement. Accordingly, the fair value change of net loss of £2,887 million (2016: loss of £126 million (restated), 2015: loss of £1,734 million (restated)) was recognised in other comprehensive income. Cash flow hedges reclassified to the consolidated income statement were a loss of £1,271 million (2016: loss of £181 million (restated), 2015: gain of £78 million (restated)). The loss due to hedge ineffectiveness where forecast transactions are no longer expected to occur was £40 million (2016: £2 million, 2015: £5 million), which has been recognised in 'Foreign exchange loss' in the consolidated income statement. The loss on derivative contracts not eligible for hedging was £18 million (2016: gain of £88 million, 2015: loss of £161 million), which has been recognised in 'Foreign exchange loss' in the consolidated income statement.

The total loss reported in other comprehensive income for cash flow hedges was £1,766 million (2016: gain of £55 million, 2015: loss of £1,812 million).

A 10 per cent depreciation/appreciation in Sterling against the foreign currency underlying such foreign currency contracts (excluding US Dollar bonds designated in a cash flow hedging relationship) would have resulted in an approximate additional (loss)/gain of (£1,684) million/£1,609 million (2016: (£1,824) million/£1,690 million, 2015: £(1,382) million/£1,251 million) in equity and a gain/(loss) of £116 million/(£30) million (2016: £60 million/£54 million, 2015: £165 million/(£91) million) in the consolidated income statement.

In addition to using foreign currency derivative contracts to economically hedge future revenue in US Dollars, the Group issues bonds denominated in US Dollars to give a degree of natural hedging of future sales revenues. During the year, the Group designated US Dollar bonds, with a principal amount of \$1.2 billion in a cash flow hedge relationship against forecast US Dollar revenue between the periods 2018 to 2020. As a result, a loss of £150 million has been recognised within other comprehensive income.

Balance sheet exposures

The Group is also exposed to fluctuations in exchange rates, which impact the valuation of foreign currency denominated assets and liabilities of its National Sales Companies and also foreign currency denominated balances on the Group's balance sheet at each reporting period end.

The following table sets forth information relating to foreign currency exposure as at 31 March 2017:

	US Dollar	Chinese Yuan	Euro	Others*	Total
	£ms	£m	£m	£m	£m
Financial assets	1,122	490	1,135	405	3,152
Financial liabilities.....	(2,893)	(415)	(2,598)	(356)	(6,262)
Net exposure (liability)/asset	(1,771)	75	(1,463)	49	(3,110)

A 10 per cent appreciation/depreciation of the US Dollar would result in an additional loss/gain of £93 million in equity and a loss/ gain of £84 million in the consolidated income statement. A 10 per cent appreciation/depreciation of the Chinese Yuan would result in an increase/decrease in the Group's net profit before tax and total equity by approximately £8 million, and a 10 per cent appreciation/depreciation of the Euro would result in an decrease/increase in the Group's net profit before tax and total equity by approximately £146 million respectively for the year ended 31 March 2017.

The following table sets forth information relating to foreign currency exposure as at 31 March 2016:

	US Dollar	Chinese Yuan	Euro	Others*	Total
	£m	£m	£m	£m	£m
Financial assets	664	666	621	384	2,335
Financial liabilities.....	(2,367)	(571)	(1,670)	(326)	(4,934)
Net exposure (liability)/asset	(1,703)	95	(1,049)	58	(2,599)

A 10 per cent appreciation/depreciation of the US Dollar and Euro would result in an decrease/increase in the Group's net profit before tax and total equity by approximately £170 million and £105 million respectively for the year ended 31 March 2016. A 10 per cent appreciation/depreciation of the Chinese Yuan would result in an increase/decrease in the Group's net profit before tax and total equity by approximately £10 million.

The following table sets forth information relating to foreign currency exposure as at 31 March 2015:

	US Dollar	Chinese Yuan	Euro	Others*	Total
	£m	£m	£m	£m	£m
Financial assets	727	742	483	312	2,264
Financial liabilities.....	(2,139)	(756)	(1,098)	(182)	(4,175)
Net exposure (liability)/asset	(1,412)	(14)	(615)	130	(1,911)

A 10 per cent appreciation/depreciation of the US Dollar, Chinese Yuan and Euro would result in a decrease/increase in the Group's net profit before tax and total equity by approximately £141 million, £1 million and £62 million respectively for the year ended 31 March 2015.

* Others include Japanese Yen, Russian Rouble, Singapore Dollar, Swiss Franc, Australian Dollar, South African Rand, Thai Baht, Korean Won etc.

(D) COMMODITY PRICE RISK

The Group is exposed to commodity price risk arising from the purchase of certain raw materials such as aluminium, copper, platinum and palladium. This risk is mitigated through the use of derivative contracts and fixed price contracts with suppliers. The derivative contracts do not qualify for hedge accounting as the commodity exposure does not meet the hedge accounting requirements of IAS 39.

The total fair value gain on commodities of £106 million (2016: loss of £113 million, 2015: loss of £38 million) has been recognised in 'Other income' in the consolidated income statement. The losses reported do not reflect the purchasing benefits received by the Group (which are included within 'Material and other cost of sales').

A 10 per cent appreciation/depreciation of all commodity prices underlying such contracts would have resulted in a gain/loss of £57 million (2016, 2015: £52 million).

(E) INTEREST RATE RISK

Interest rate risk is the risk that changes in market interest rates will lead to changes in interest income and expense for the Group.

In addition to issuing long-term fixed-rate bonds, the Group has other facilities in place which are primarily used to finance working capital that are subject to variable interest rates. When undertaking a new debt issuance, the JLR plc Board will consider the fixed/floating interest rate mix of the Group, the outlook for future interest rates and the appetite for certainty of funding costs.

The risk estimates provided assume a parallel shift of 100 basis points interest rate across all yield curves. This calculation also assumes that the change occurs at the balance sheet date and has been calculated based on risk exposures outstanding as at that date. The year-end balances are not necessarily representative of the average debt outstanding during the year.

As at 31 March 2017, net financial liabilities of £179 million (2016: £116 million, 2015: £156 million) were subject to the variable interest rate. An increase/decrease of 100 basis points in interest rates at the balance sheet date would result in an impact of £2 million (2016: £1 million, 2015: £2 million) in the consolidated income statement and £nil (2016, 2015: £nil) in equity.

(F) LIQUIDITY RISK

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due.

The Group's policy on liquidity risk is to maintain sufficient liquidity in the form of cash and undrawn borrowing facilities to meet the Group's operating requirements with an appropriate level of headroom.

The following are the undiscounted contractual maturities of financial liabilities, including estimated interest payments:

<u>As at 31 March 2017</u>	<u>Carrying amount</u>	<u>Contractual cash flows</u>	<u>1 year or less</u>	<u>1 to <2 years</u>	<u>2 to <5 years</u>	<u>5 years and over</u>

(G) CREDIT RISK

The majority of the Group's credit risk pertains to the risk of financial loss arising from counterparty default on cash investments.

All Group cash is invested according to strict credit criteria and actively monitored by Group Treasury in conjunction with the current market valuation of derivative contracts. To support this, the JLR plc Board has implemented an investment policy that places limits on the maximum cash investment that can be made with any single counterparty depending on their published external credit rating.

To a lesser extent the Group has an exposure to counterparties on trade receivables. The Group will seek to mitigate credit risk on sales to third parties through the use of payment at the point of delivery, credit insurance and letters of credit from banks that meet internal rating criteria.

None of the financial instruments of the Group result in material concentrations of credit risks.

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure.

Financial assets

None of the Group's cash equivalents, including term deposits with banks, are past due or impaired. Regarding other financial assets that are neither past due nor impaired, there were no indications as at 31 March 2017 (2016, 2015: no indications) that defaults in payment obligations will occur.

The Group has reviewed trade and other receivables not yet due and not impaired and no material issues have been identified. Trade and other receivables past due and impaired are set out below:

As at 31 March	2017 Gross	2017 Impairment	2016 Gross	2016 Impairment	2015 Gross	2015 Impairment
	£m	£m	£m	£m	£m	£m
Not yet due.....	1,185	—	967	—	1,070	—
Overdue <3 months.....	92	4	145	31	56	—
Overdue 3–6 months.....	1	1	22	22	4	2
Overdue >6 months.....	57	55	12	7	12	9
Total	1,335	60	1,146	60	1,142	11

Included within trade receivables is £179 million (2016: £116 million, 2015: £156 million) of receivables that are part of a debt factoring arrangement. These assets do not qualify for derecognition due to the recourse arrangements in place. The related liability of £179 million (2016: £116 million, 2015: £156 million) is in short-term borrowings. Both the asset and associated liability are stated at fair value.

36 LEASES

LEASES AS LESSEE

The future minimum non-cancellable finance lease rentals are payable as follows:

As at 31 March	2017	2016	2015
	£m	£m	£m
Less than one year	2	5	4
Between one and five years	4	5	9
More than five years	5	4	—
Total lease payments	11	14	13
Less future finance charges.....	(4)	(3)	—
Present value of lease obligations	7	11	13

The above leases relate to amounts payable under the minimum lease payments on plant and equipment. The carrying value of these assets as at 31 March 2017 was £7 million (2016: £11 million, 2015: £13 million). The Group leased certain of its manufacturing equipment under finance leases that mature between 2017 and 2030. The Group will take ownership of all assets held under finance lease at the end of the lease term.

The future minimum non-cancellable operating lease rentals are payable as follows:

As at 31 March	2017	2016	2015
	£m	£m	£m
Less than one year	75	49	47
Between one and five years	209	72	60
More than five years	164	33	26
Total lease payments	448	154	133

The Group leases a number of buildings, plant and equipment and IT hardware and software under operating leases, certain of which have a renewal and/or purchase option in the normal course of business.

LEASES AS LESSOR

The future minimum lease receipts under non-cancellable operating leases are as follows:

As at 31 March	2017	2016	2015
	£m	£m	£m
Less than one year	—	2	2
Between one and five years	1	1	—
More than five years	10	10	—
Total lease receipts	11	13	2

The above leases relate to amounts receivable in respect of land and buildings and fleet car sales. The average lease life is 48 years.

37 ACQUISITION OF SUBSIDIARY

On 16 April 2015, the Group acquired 100 per cent of the share capital of Silkplan Limited, obtaining control of Silkplan Limited (prior to the entity being struck off). The amounts recognised in respect of the assets acquired are set out in the table below:

	£m
Recognised amounts of assets acquired	
Property, plant and equipment	11
Total identifiable assets	11
Total consideration	11
Satisfied by:	
Cash	11
Total consideration transferred and cash outflow arising on acquisition.....	11

No goodwill arose on the acquisition. Silkplan Limited contributed £nil revenue and £nil to the Group's profit for the period between the date of acquisition and 31 March 2016.

38 SEGMENT REPORTING

Operating segments are defined as components of the Group about which separate financial information is available that is evaluated regularly by the chief operating decision-maker, or decision-making group, in deciding how to allocate resources and in assessing performance.

The Group operates in the automotive segment. The automotive segment includes all activities relating to design, development, manufacture and marketing of vehicles including financing thereof, as well as sale of related parts and accessories from which the Group derives its revenues. The Group has only one operating segment, so no separate segment report is given.

The geographic spread of sales by customer location and non-current assets is as disclosed below:

	UK	US	China	Rest of Europe	Rest of world	Total
	£m	£m	£m	£m	£m	£m
31 March 2017						
Revenue	5,557	4,638	4,684	5,273	4,187	24,339
Non-current assets	11,714	10	11	158	159	12,052
31 March 2016						
Revenue (restated)*	4,529	4,300	4,839	4,109	4,509	22,286
Non-current assets	10,475	18	16	26	137	10,672
31 March 2015						
Revenue (restated)*	3,564	3,262	7,573	3,200	4,507	22,106
Non-current assets	9,357	16	11	10	32	9,426

* Comparatives have been restated due to the change in accounting policy for presentation of foreign exchange gains and losses as set out in note 2.

In the table above, non-current assets includes property, plant and equipment and intangible assets.

39 NOTES TO THE CONSOLIDATED CASH FLOW STATEMENT

(A) RECONCILIATION OF PROFIT BEFORE TAX TO CASH GENERATED FROM OPERATIONS

Year ended 31 March	Note	2017	2016*	2015*
		£m	Restated £m	Restated £m
Profit for the year		1,272	1,312	2,038
Adjustments for:				
Depreciation and amortisation		1,656	1,418	1,051
Impairment of tangible assets	10	12	—	—
Write-down of intangible assets	10	—	28	—
Loss on disposal of assets	13	15	13	7
Foreign exchange loss on loans	13	101	54	178
Income tax expense.....	14	338	245	576
Finance expense (net)	12	68	90	135
Finance income	12	(33)	(38)	(48)
Foreign exchange loss/(gain) on derivatives.....	13	11	(86)	166
Foreign exchange gain on short-term deposits		(57)	(11)	(51)
Foreign exchange gain on other restricted deposits		(7)	—	—
Foreign exchange gain on cash and cash equivalents		(95)	(4)	(52)
Unrealised (gain)/loss on commodities.....	13	(148)	59	30
Share of (profit)/loss of equity accounted investments.....	15	(159)	(64)	6
Exceptional item		(151)	157	—
Other non-cash adjustments		1	2	5
Cash flows from operating activities before changes in assets and liabilities.....		2,824	3,175	4,041
Trade receivables		(194)	34	(281)
Other financial assets		21	(12)	(4)
Other current assets.....		(34)	30	26
Inventories		(628)	(451)	(242)
Other non-current assets		(25)	(18)	(15)
Accounts payable.....		701	443	418
Other current liabilities		63	52	(21)
Other financial liabilities		80	71	13
Other non-current liabilities and retirement benefit obligation....		158	255	(102)
Provisions		325	143	131
Cash generated from operations.....		3,291	3,722	3,964

* Comparatives have been restated for the amendment in the current year to disclose separately 'Effect of foreign exchange on cash and cash equivalents' as a separate line item after 'Cash and cash equivalents at beginning of year'. The line items of 'Cash flows from operating activities before changes in assets and liabilities' in note 39 and 'Cash generated from operations', 'Net cash generated from operating activities', and 'Net increase in cash and cash equivalents' in the consolidated cash flow statement were previously reported as £3,179 million, £3,726 million, £3,560 million and £191 million for the year ended 31 March 2016, and £4,093 million, £4,016 million, £3,627 million and £948 million for the year ended 31 March 2015. An adjustment of £4 million and £52 million was recorded to those line items for the years ended 31 March 2016 and 2015 respectively to reflect the removal of the foreign exchange gain on cash and cash equivalents from those line items to present this amount separately as described above. The line items of 'Cash flows from operating activities before changes in assets and liabilities', 'Cash generated from operations', 'Net cash generated from operating activities', and 'Net increase in cash and cash equivalents' were therefore restated as £3,175 million, £3,722 million, £3,556 million and £187 million for the year ended 31 March 2016, and £4,041 million, £3,964 million, £3,575 million and £896 million for the year ended 31 March 2015. There is no impact on cash and cash equivalents as previously reported for the years ended 31 March 2016 or 31 March 2015.

(B) CASH FLOWS FROM/(USED IN) INVESTING ACTIVITIES

Purchases of property, plant and equipment and cash paid for intangible assets are presented net of £nil (2016: £33 million, 2015: £14 million) of capital government grants received.

40 RELATED PARTY TRANSACTIONS

The Group's related parties principally consist of Tata Sons Limited, subsidiaries and joint ventures of Tata Sons Limited, which includes Tata Motors Limited (the ultimate parent company), subsidiaries, joint ventures and associates of Tata Motors Limited. The Group routinely enters into transactions with its related parties in the ordinary course of business, including transactions for the sale and purchase of products with its joint ventures and associates. Transactions and balances with the Group's own subsidiaries are eliminated on consolidation.

The following table summarises related party transactions and balances not eliminated in the consolidated financial statements. All related party transactions are conducted under normal terms of business. The amounts outstanding are unsecured and will be settled in cash.

For the year ended	With joint ventures of the Group	With associates of the Group	With Tata Sons Limited and its subsidiaries and joint ventures	With immediate or ultimate parent and its subsidiaries, joint ventures and associates
	£m	£m	£m	£m
31 March 2017				
Sale of products	568	—	3	49
Purchase of goods	2	—	—	85
Services received	124	4	172	108
Services rendered	88	—	—	2
Trade and other receivables	70	—	2	34
Accounts payable	3	—	47	27
31 March 2016				
Sale of products	315	—	2	48
Purchase of goods	—	—	—	118
Purchase of property, plant and equipment	—	—	6	—
Services received	85	—	146	103
Services rendered	64	—	—	2
Trade and other receivables	71	—	1	28
Accounts payable	2	—	7	36
31 March 2015				
Sale of products	149	—	—	65
Purchase of goods	—	—	—	51
Services received	46	—	141	105
Services rendered	23	—	—	3

Compensation of key management personnel

Year ended 31 March	2017	2016	2015
	£m	£m	£m
Short-term benefits	14	16	17
Post-employment benefits	1	1	2
Share-based payments	3	2	7
Other long-term employee benefits	1	—	—
Compensation for loss of office	1	—	1
Total compensation of key management personnel	20	19	27

In addition to the compensation noted above, a loan of £0.7 million was granted to a member of key management personnel in the year ended 31 March 2014. This loan is for a term of eight years and is interest bearing at the HMRC official rate.

Refer to note 32 for information on transactions with post-employment benefit plans.

41 ULTIMATE PARENT COMPANY AND PARENT COMPANY OF LARGER GROUP

The immediate parent undertaking is TML Holdings Pte. Ltd. (Singapore) and the ultimate parent undertaking and controlling party is Tata Motors Limited, India, which is the parent of the smallest and largest group to consolidate these financial statements.

Copies of the Tata Motors Limited, India consolidated financial statements can be obtained from the Group Secretary, Tata Motors Limited, Bombay House, 24, Homi Mody Street, Mumbai-400001, India.

42 SUBSEQUENT EVENTS

On 3 April 2017, Jaguar Land Rover approved and communicated to its defined benefit pension schemes' members that the defined benefit schemes' rules were to be amended with effect from 6 April 2017 so that, among other changes, retirement benefits will be calculated on a career average basis rather than based upon a member's final salary at retirement. As a result of the remeasurement of the schemes' liabilities, a past service credit of £437 million has arisen and has been recognised in Fiscal 2017/18.

The \$350 million committed invoice discounting facility was renegotiated to a \$295 million uncommitted invoice discounting facility effective 31 May 2017 which expires in April 2019.

In May 2017, the Company proposed an ordinary dividend of £150 million to its immediate parent TML Holdings Pte. Ltd. (Singapore). £60 million of this amount was paid in June 2017.

Jaguar Land Rover Automotive PLC
Annual report and financial statements
Year ended 31 March 2016

DIRECTORS' REPORT

The Directors present their report and the audited consolidated financial statements of the Group for the year ended 31 March 2016. Jaguar Land Rover Automotive plc ('Jaguar Land Rover') is a public limited company incorporated under the laws of England and Wales. The business address of the directors and senior management of Jaguar Land Rover is Abbey Road, Whitley, Coventry, CV3 4LF, United Kingdom.

FUTURE DEVELOPMENTS

Future developments impacting the Group are disclosed in the Strategic report on pages 22 to 59.

DIVIDENDS

The directors proposed a dividend of £150 million (£0.10 per ordinary share) in May 2016 which was paid in June 2016 (note, for each of the years ended 31 March 2015 and 2014, £150 million was paid in June 2015 and June 2014 respectively).

DIRECTORS

Biographies of the directors currently serving on the Board are set out on page 63.

DIRECTORS' INDEMNITIES

The Group has made qualifying third- party indemnity provisions for the benefit of its directors, which were made during the year end and remain in force at the date of this report.

MATERIAL INTERESTS IN SHARES

Jaguar Land Rover Automotive plc and its subsidiaries, is a wholly-owned subsidiary of Tata Motors Limited, held through TML Holdings Pte. Ltd. (Singapore).

SHARE CAPITAL

Share capital remains unchanged. See note 28 to the consolidated financial statements for further details.

CORPORATE GOVERNANCE STATEMENT

The Corporate Governance statement is set out on pages 62 to 69 and is incorporated by reference into this report.

BRANCHES

The Group has 12 branches which exist and operate outside of the UK, namely in Singapore, China and the United Arab Emirates.

RESEARCH AND DEVELOPMENT

The Group is committed to an ongoing programme of expenditure on research and development activities as disclosed in note 10 on page 91 to the consolidated financial statements.

FINANCIAL INSTRUMENTS

The disclosures required in relation to the use of financial instruments by the Group, together with details of the Group's treasury policy and management, are set out in note 34 on page 114 to the consolidated financial statements.

EMPLOYEE INFORMATION

The average number of employees within the Group is disclosed in note 6 to the consolidated financial statements on page 89.

Apart from ensuring that an individual has the ability to carry out a particular role, the Group does not discriminate in any way. It endeavours to retain employees if they become disabled, making reasonable adjustments to their role and, if necessary, looking for redeployment opportunities within the Group. The Group also ensures that training, career development and promotion opportunities are available to all employees irrespective of gender, race, age or disability.

EMPLOYEE INVOLVEMENT

Details of how the Group involves its employees are contained in the Strategic report on pages 22 to 59, which are incorporated by reference into this report.

CHARITABLE DONATIONS

The Group and those that work for it are involved in many charitable activities across the globe. It is the Group's strong belief that it should play an active role in the communities, both local and worldwide that the Group operates in. Given the number of charities and the need to assess the impact of any donations and potential tax consequences, the Group can only make contributions to a limited number of charitable causes that have been formally approved. As a result, no one is authorised to make any charitable contributions on behalf of the Group without the necessary approval.

POLITICAL INVOLVEMENT AND CONTRIBUTIONS

The Group respects an employee's right to use their own time and resources to participate as individual citizens in political and governmental activities of their choice. The Group itself operates under legal limitations on its ability to engage in political activities, and even where there are no legal restrictions, the Group does not typically make contributions to political candidates or political parties or permit campaigning on its property by political candidates (including those who work for Jaguar Land Rover) or persons working on their behalf. There have not been any political donations in any of the periods covered by these financial statements.

GOING CONCERN

The Group's business activities, together with the factors likely to affect its future development, performance and position, are set out in the Strategic Report. The financial position of the Group is described on pages 75 to 78. In addition, note 34 to the consolidated financial statements includes the Group's objectives, policies and processes for managing its exposures to interest rate risk, foreign currency risk, credit risk and liquidity risk.

Details of the Group's financial instruments and hedging activities are also provided in note 34 to the consolidated financial statements.

The Board has a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future. Accordingly, the financial statements set out on pages 75 to IBC have been prepared on the going concern basis.

EVENTS AFTER THE BALANCE SHEET DATE

Full details of significant events since the balance sheet date are disclosed in note 41 to the consolidated financial statements.

CODE OF CONDUCT AND ETHICS

Directors and employees are required to comply with the Group's Code of Conduct, which is intended to help them put the Group's ethical principles into practice. The Code clarifies the basic principles and standards they are expected to follow and the behaviour expected of them. The Code of Conduct can be found at www.jaguarlandrover.com/gl/en/.

Employees, contract staff, third parties with whom the Group has a business relationship with (such as dealers, suppliers and agents), and any member of the public may raise ethical and compliance concerns to the Group's Global Helpline or via legalcom@jaguarlandrover.com.

SLAVERY AND HUMAN TRAFFICKING STATEMENT

Pursuant to Section 54 of the Modern Slavery Act 2015, Jaguar Land Rover has published a Slavery and Human Trafficking Statement for the year ended 31 March 2016. The Statement sets out the steps that Jaguar Land Rover has taken to address the risk of slavery and human trafficking occurring within its own operations and its supply chains. This Statement can be found on the Jaguar Land Rover Corporate website at www.jaguarlandrover.com/gl/en/.

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE DIRECTORS' REPORT AND THE FINANCIAL STATEMENTS

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and of the profit or loss of the Group for that period.

In preparing these financial statements, International Accounting Standard 1 requires that directors:

- Properly select and apply accounting policies;
- Present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- Provide additional disclosures when compliance with the specific requirements in IFRS is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the Group's financial position and financial performance; and
- Make an assessment of the Group's ability to continue as a going concern.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Group's transactions and disclose with reasonable accuracy at any time the financial position of the Group and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Group's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

STATEMENT OF DISCLOSURE OF INFORMATION TO AUDITORS

In the case of each of the persons who are directors at the time when the report is approved under section 418 of the Companies Act, 2006 the following applies: so far as the directors are aware, there is no relevant audit information of which the Group's auditors are unaware; and the directors have taken necessary actions in order to make themselves aware of any relevant audit information and to establish that the Group's auditors are aware of that information.

AUDITOR

Deloitte LLP has indicated its willingness to continue as auditor and its re-appointment has been approved by the Audit Committee. A resolution to re-appoint them will be proposed at the 2016 Annual General Meeting.

DIRECTORS' RESPONSIBILITY STATEMENT

The directors confirm to the best of their knowledge the financial statements, prepared in accordance with International Financial Reporting Standards as approved by the EU, give a true and fair view of the assets, liabilities, financial position and profit or loss of the Group and the undertakings included in the consolidation taken as a whole.

ACKNOWLEDGEMENT

The directors wish to convey their appreciation to all employees for their continued commitment, effort and contribution in supporting the delivery of the Group's record performance. The directors would also like to extend thanks to all other key stakeholders for the continued support of the Group and their confidence in its management.

By order of the Board,

Dr. Ralf Speth
Chief Executive Officer
Jaguar Land Rover Automotive plc
18 July 2016

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF JAGUAR LAND ROVER AUTOMOTIVE PLC

We have audited the financial statements of Jaguar Land Rover Automotive plc for the year ended 31 March 2016 which comprise of the Consolidated Income Statement, the Consolidated Statement of Comprehensive Income, the Consolidated and Parent Company Balance Sheets, the Consolidated and Parent Company Cash Flow Statements, the Consolidated and Parent Company Statements of Changes in Equity and the related notes 1 to 56. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union and, as regards the parent Company financial statements, as applied in accordance with the provisions of the Companies Act 2006.

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

RESPECTIVE RESPONSIBILITIES OF DIRECTORS AND AUDITOR

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

SCOPE OF THE AUDIT OF THE FINANCIAL STATEMENTS

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the Group's and the parent Company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the Annual Report to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

OPINION ON FINANCIAL STATEMENTS

In our opinion:

- The financial statements give a true and fair view of the state of the Group's and of the parent Company's affairs as at 31 March 2016 and of the Group's profit for the year then ended;
- The consolidated financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union;
- The parent Company financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union and as applied in accordance with the provisions of the Companies Act 2006; and
- The financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

SEPARATE OPINION IN RELATION TO IFRSS AS ISSUED BY THE IASB

As explained in note 2 to the consolidated financial statements, the Group in addition to applying IFRSs as adopted by the European Union, has also applied IFRSs as issued by the International Accounting Standards Board (IASB).

In our opinion the consolidated financial statements comply with IFRSs as issued by the IASB.

OPINION ON OTHER MATTER PRESCRIBED BY THE COMPANIES ACT 2006

In our opinion the information given in the Strategic report and the Governance report for the financial year for which the financial statements are prepared is consistent with the financial statements.

MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- Adequate accounting records have not been kept by the parent Company, or returns adequate for our audit have not been received from branches not visited by us; or
- The parent Company financial statements are not in agreement with the accounting records and returns; or
- Certain disclosures of directors' remuneration specified by law are not made; or
- We have not received all the information and explanations we require for our audit.

Jaguar Land Rover Automotive PLC
Annual report and financial statements
Year ended 31 March 2016

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 BACKGROUND AND OPERATIONS

Jaguar Land Rover Automotive PLC ('the Company') and its subsidiaries, (collectively referred to as 'the Group' or 'JLR'), designs, manufactures and sells a wide range of automotive vehicles. The Company is a public limited company incorporated and domiciled in the UK. The address of its registered office is Abbey Road, Whitley, Coventry, CV3 4LF, United Kingdom.

The Company is a subsidiary of Tata Motors Limited, India and acts as an intermediate holding company for the Jaguar Land Rover business. The principal activity during the year was the design, development, manufacture and marketing of high- performance luxury saloons, specialist sports cars and four-wheel-drive off-road vehicles.

These consolidated financial statements have been prepared in Pound Sterling ('GBP') and rounded to the nearest million GBP (£ million) unless otherwise stated. Results for the year ended and as at 31 March 2014 have been disclosed solely for the information of the users.

2 ACCOUNTING POLICIES

STATEMENT OF COMPLIANCE

These consolidated and parent Company financial statements have been prepared in accordance with International Financial Reporting Standards (referred to as 'IFRS') and IFRS Interpretation Committee ('IFRS IC') interpretations as adopted by the European Union ('EU') and the requirements of the United Kingdom Companies Act 2006 applicable to companies reporting under IFRS. In addition, these consolidated financial statements also comply with IFRS as adopted by the International Accounting Standards Board ('IASB') as no differences exist between IFRS as adopted by the EU applied by the Group and IFRS issued by the IASB.

The Company has taken advantage of section 408 of the Companies Act 2006 and, therefore, the separate financial statements of the Company do not include the income statement or the statement of comprehensive income of the Company on a stand-alone basis.

BASIS OF PREPARATION

The consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments which are measured at fair value. Historical cost is generally based on the fair value of the consideration given in exchange for the assets. The principal accounting policies adopted are set out below.

GOING CONCERN

The directors have considered the financial position of the Group at 31 March 2016 (net assets of £7,614 million (2015: £6,040 million, 2014: £5,864 million)) and the projected cash flows and financial performance of the Group for at least 12 months from the date of approval of these financial statements as well as planned cost and cash improvement actions, and believe that the plan for sustained profitability remains on course.

The directors have taken actions to ensure that appropriate long-term cash resources are in place at the date of signing the accounts to fund Group operations. The directors have reviewed the financial covenants linked to the borrowings in place and believe these will not be breached at any point and that all debt repayments will be met.

Therefore, the directors consider, after making appropriate enquiries and taking into consideration the risks and uncertainties facing the Group, that the Group has adequate resources to continue in operation as a going concern for the foreseeable future and is able to meet its financial covenants linked to the borrowings in place. Accordingly the directors continue to adopt the going concern basis in preparing these consolidated financial statements.

BASIS OF CONSOLIDATION

SUBSIDIARIES

The consolidated financial statements include Jaguar Land Rover Automotive plc and its subsidiaries. Subsidiaries are entities controlled by the Company. Control exists when the Company has power over the investee, is exposed or has rights to variable return from its involvement with the investee and has the ability to use its power to affect its returns. In assessing control, potential voting rights that currently are exercisable are taken into account. All subsidiaries of the Group given in note 42 to the parent Company financial statements are included in the consolidated financial statements.

Intercompany transactions and balances including unrealised profits are eliminated in full on consolidation.

ASSOCIATES AND JOINT VENTURES (EQUITY ACCOUNTED INVESTMENTS)

Associates are those entities in which the Group has significant influence, but not control or joint control. Significant influence is the power to participate in the financial and operating policy decisions of the investee and is presumed to exist when the Group holds between 20 and 50 per cent of the voting power of another entity. Joint ventures are those entities over whose activities the Group has joint control, established by contractual agreement and requiring unanimous consent for decisions about the relevant activities of the entity, being those activities that significantly affect the entity's returns.

Associates and joint ventures are accounted for using the equity method and are recognised initially at cost. The Group's investments include goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Group's share of the income and expenses, other comprehensive income and equity movements of equity accounted investments, from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. When the Group's share of losses exceeds its interest in an equity accounted investment, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Group has an obligation or has made payments on behalf of the investee.

When the Group transacts with an associate or joint venture of the Group, profits and losses are eliminated to the extent of the Group's interest in its associate or joint venture.

USE OF ESTIMATES AND JUDGEMENTS

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are as follows:

- (i) Note 16—Property, plant and equipment—the Group applies judgement in determining the estimate useful life of assets.
- (ii) Note 17—Intangible assets—management applies significant judgement in establishing the applicable criteria for capitalisation of appropriate product development costs and impairment of indefinite life intangible assets. The key judgements in the impairment assessment include the determination of cash-generating units, value of cash flows and appropriateness of discount rates.
- (iii) Note 19—Deferred tax—management applies judgement in establishing the timing of the recognition of deferred tax assets relating to historic losses, assessing the recoverability of those assets and estimating taxes ultimately payable on remittance of overseas earnings.
- (iv) Note 26—Provision for product warranty—it is necessary for the Group to assess the provision for anticipated lifetime warranty and campaign costs. The valuation of warranty and campaign provisions requires a significant amount of judgement and the requirement to form appropriate assumptions around expected future costs.
- (v) Note 31—Retirement benefit obligation—it is necessary for actuarial assumptions to be made, including discount and mortality rates and the long-term rate of return upon scheme assets. The Group

engages a qualified actuary to assist with determining the assumptions to be made when evaluating these liabilities.

- (vi) Note 34—Financial instruments—the Group enters into complex financial instruments and therefore appropriate accounting for these requires judgement around the valuations.

REVENUE RECOGNITION

Revenue comprises the amounts invoiced to customers outside the Group and is measured at fair value of the consideration received or receivable, net of discounts, sales incentives, customer bonuses and rebates granted, which can be identified at the point of sale. Revenue is presented net of excise duty where applicable and other indirect taxes.

Revenue is recognised when the significant risks and rewards of ownership have been transferred to the customer and the amount of revenue can be reliably measured with it being probable that future economic benefits will flow to the Group. The transfer of the significant risks and rewards is defined in the underlying agreements with the customer.

No sale is recognised where, following disposal of significant risks and rewards, the Group retains a significant financial interest. The Group's interest in these items is retained in inventory, with a creditor being recognised for the contracted buy-back price. Income under such agreements, measured as the difference between the initial sale price and the buyback price, is recognised on a straight-line basis over the term of the agreement. The corresponding costs are recognised over the term of the agreement based on the difference between the item's cost, including estimated costs of resale, and the expected net realisable value.

If a sale includes an agreement for subsequent servicing or maintenance, the fair value of that service is deferred and recognised as income over the relevant service period in proportion with the expected cost pattern of the agreement.

COST RECOGNITION

Costs and expenses are recognised when incurred and are classified according to their nature.

Expenditures are capitalised where appropriate in accordance with the policy for internally generated intangible assets and represent employee costs, stores and other manufacturing supplies, and other expenses incurred for product development undertaken by the Group.

GOVERNMENT GRANTS AND INCENTIVES

Government grants are recognised when there is reasonable assurance that the Group will comply with the relevant conditions and the grant will be received.

Government grants are recognised in the consolidated income statement on a systematic basis when the Group recognises, as expenses, the related costs that the grants are intended to compensate.

Government grants related to assets are deducted from the cost of the asset and amortised over the useful life of the asset. Government grants related to income are presented as an offset against the related expenditure and Government grants which are awarded as incentives with no ongoing performance obligations to the Group are recognised as other income in the period the grant is received.

Sales tax incentives received from governments are recognised in the consolidated income statement at the reduced tax rate and revenue is reported net of these sales tax incentives.

FOREIGN CURRENCY

The Company has a functional currency of GBP. The presentation currency of the consolidated financial statements is GBP.

The functional currency of the UK and non-UK selling operations is GBP being the primary economic environment that influences these operations. This is on the basis that management control is in the UK and that GBP is the currency that primarily determines sales prices and is the main currency for the retention of operating income. The functional

currency of the Chery Jaguar Land Rover Automotive Co. Ltd., the Group's principal joint venture, is Chinese Yuan ('CNY'). The functional currency of Jaguar Land Rover Slovakia s.r.o is Euro.

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Foreign currency denominated monetary assets and liabilities are remeasured into the functional currency at the exchange rate prevailing on the balance sheet date. Exchange differences are recognised in the consolidated income statement as 'Foreign exchange (loss)/gain'.

For the purposes of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations (non-GBP functional currency) are translated at exchange rates prevailing on the balance sheet date. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity.

INCOME TAXES

Income tax expense comprises current and deferred taxes. Income tax expense is recognised in the consolidated income statement, except when related to items that are recognised outside of profit or loss (whether in other comprehensive income or directly in equity, whereby tax is also recognised outside of profit or loss), or where related to the initial accounting for a business combination. In the case of a business combination the tax effect is included in the accounting for the business combination.

Current income taxes are determined based on respective taxable income of each taxable entity and tax rules applicable for respective tax jurisdictions.

Deferred tax assets and liabilities are recognised for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilised business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity and for each taxable jurisdiction. Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilised.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

EXCEPTIONAL ITEMS

Exceptional items by virtue of their nature, size or frequency are disclosed separately on the face of the consolidated income statement where this enhances understanding of the Group's performance.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment is stated at cost of acquisition or construction less accumulated depreciation and accumulated impairment, if any.

Cost includes purchase price, non-recoverable taxes and duties, labour cost and direct overheads for self-constructed assets and other direct costs incurred up to the date the asset is ready for its intended use.

Interest cost incurred for constructed assets is capitalised up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

Depreciation is provided on a straight-line basis over the estimated useful lives of the assets. Estimated useful lives of the assets are as follows:

Class of property, plant and equipment	Estimated useful life (years)
Buildings.....	20 to 40
Plant and equipment	3 to 30
Computers.....	3 to 6
Vehicles	3 to 10
Furniture and fixtures	3 to 20

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease. Freehold land is measured at cost and is not depreciated. Heritage assets are not depreciated as they are considered to have a residual value in excess of cost. Residual values are re-assessed on an annual basis.

Depreciation is not recorded on assets under construction until construction and installation is complete and the asset is ready for its intended use. Assets under construction include capital prepayments.

INTANGIBLE ASSETS

ACQUIRED INTANGIBLE ASSETS

Intangible assets purchased, including those acquired in business combinations, are measured at acquisition cost which is the fair value on the date of acquisition, where applicable, less accumulated amortisation and accumulated impairment, if any. Intangible assets with indefinite lives are reviewed annually to determine whether an indefinite-life assessment continues to be supportable. If not, the change in the useful-life assessment from indefinite to finite is made on a prospective basis.

For intangible assets with definite lives, amortisation is provided on a straight-line basis over the estimated useful lives of the acquired intangible assets as per the estimated amortisation periods below:

Class of intangible asset	Estimated amortisation period (years)
Patents and technological know-how.....	2 to 12
Customer-related—dealer network.....	20
Software.....	2 to 8
Intellectual property rights and other intangibles.....	Indefinite life

The amortisation for intangible assets with finite useful lives is reviewed at least at each year-end. Changes in expected useful lives are treated as changes in accounting estimates.

Capital-work-in-progress includes capital advances.

Customer-related intangibles acquired in a business combination consist of dealer networks.

Intellectual property rights and other intangibles consist of brand names, which are considered to have indefinite lives due to the longevity of the brands.

INTERNALLY GENERATED INTANGIBLE ASSETS

Research costs are charged to the consolidated income statement in the year in which they are incurred.

Product development costs incurred on new vehicle platforms, engines, transmission and new products are recognised as intangible assets, when feasibility has been established, the Group has committed technical, financial and other resources to complete the development and it is probable that the asset will generate future economic benefits.

The costs capitalised include the cost of materials, direct labour and directly attributable overhead expenditure incurred up to the date the asset is available for use.

Interest cost incurred is capitalised up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings if no specific borrowings have been incurred for the asset.

Product development cost is amortised over a period of between two and ten years.

Capitalised development expenditure is measured at cost less accumulated amortisation and accumulated impairment loss.

Amortisation is not recorded on product development in progress until development is complete.

IMPAIRMENT

PROPERTY, PLANT AND EQUIPMENT AND OTHER INTANGIBLE ASSETS

At each balance sheet date, the Group assesses whether there is any indication that any property, plant and equipment and intangible assets may be impaired. If any such impairment indicator exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, or earlier, if there is an indication that the asset may be impaired.

The estimated recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the consolidated income statement.

An annual impairment review for heritage assets is performed and any impairment in the carrying value is recognised immediately in the consolidated income statement.

EQUITY ACCOUNTED INVESTMENTS: JOINT VENTURES AND ASSOCIATES

The requirements of IAS 39 Financial Instruments: Recognition and Measurement are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in an associate or joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 Impairment of Assets as a single asset by comparing its recoverable amount (the higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise cash on hand, demand deposits and highly liquid investments with an original maturity of up to three months that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

INVENTORIES

Inventories are valued at the lower of cost and net realisable value. Cost of raw materials and consumables are ascertained on a first-in, first-out basis. Costs, including fixed and variable production overheads, are allocated to work-in-

progress and finished goods determined on a full absorption cost basis. Net realisable value is the estimated selling price in the ordinary course of business less estimated cost of completion and selling expenses.

Inventories include vehicles sold subject to repurchase arrangements. These vehicles are carried at cost to the Group and are amortised in changes in stocks and work-in-progress to their residual values (i.e. estimated second-hand sale value) over the term of the arrangement.

PROVISIONS

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are held for product warranties, legal and product liabilities, residual risks and environmental risks as detailed in note 26 to the consolidated financial statements.

LONG-TERM INCENTIVE PLAN ('LTIP')

The Group operates a LTIP arrangement for certain employees. The scheme provides a cash payment to the employee based on a specific number of phantom shares at grant date and the share price of Tata Motors Limited at the vesting date, subject to profitability and employment conditions. These are accounted for as cash-settled arrangements, whereby a liability is recognised at fair value at the date of grant, using a Black-Scholes model. At each balance sheet date until the liability is settled, the fair value of the liability is remeasured, with any changes in fair value recognised in the consolidated income statement.

LEASES

At the inception of a lease, the lease arrangement is classified as either a finance lease or an operating lease, based on the terms and substance of the lease arrangement.

ASSETS TAKEN ON FINANCE LEASE

A finance lease is recognised as an asset and a liability at the commencement of the lease, at the lower of the fair value of the asset and the present value of the minimum lease payments. Initial direct costs, if any, are also capitalised and, subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each year during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

ASSETS TAKEN ON OPERATING LEASE

Leases other than finance leases are operating leases, and the leased assets are not recognised on the Group's balance sheet. Payments made under operating leases are recognised in the consolidated income statement on a straight-line basis over the term of the lease in 'Other expenses'.

EMPLOYEE BENEFITS

PENSION PLANS

The Group operates several defined benefit pension plans, which were previously contracted out of the second state pension scheme until 5 April 2016. The assets of the plans are held in separate trustee administered funds. The plans provide for monthly pension after retirement based on salary and service as set out in the rules of each plan.

Contributions to the plans by the Group take into consideration the results of actuarial valuations. The plans with a surplus position at the balance sheet date have been limited to the maximum economic benefit available from unconditional rights to refund from the scheme or reduction in future contributions. Where the subsidiary group is considered to have a contractual obligation to fund the pension plan above the accounting value of the liabilities, an onerous obligation is recognised.

The UK defined benefit schemes were closed to new joiners in April 2010.

For defined benefit retirement benefit schemes, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each reporting period.

Remeasurement comprising actuarial gains and losses, the effect of the asset ceiling and the return on scheme assets (excluding interest) are recognised immediately in the balance sheet with a charge or credit to the consolidated statement of comprehensive income in the period in which they occur. Remeasurement recorded in the statement of comprehensive income is not recycled.

Past service cost, including curtailment gains and losses, is generally recognised in profit or loss in the period of scheme amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability.

Defined benefit costs are split into three categories:

- Current service cost, past service cost and gains and losses on curtailments and settlements;
- Net interest cost; and
- Remeasurement.

The Group presents these defined benefit costs within 'Employee costs' in the consolidated income statement (see note 6).

A separate defined contribution plan is available to new employees of Jaguar Land Rover. Costs in respect of this plan are charged to the consolidated income statement as incurred.

POST-RETIREMENT MEDICARE SCHEME

Under this unfunded scheme, employees of some subsidiaries receive medical benefits subject to certain limits of amount, periods after retirement and types of benefits, depending on their grade and location at the time of retirement. Employees separated from the Group as part of an Early Separation Scheme, on medical grounds or due to permanent disablement are also covered under the scheme. The applicable subsidiaries account for the liability for the post-retirement medical scheme based on an annual actuarial valuation.

ACTUARIAL GAINS AND LOSSES

Actuarial gains and losses relating to retirement benefit plans are recognised in other comprehensive income in the year in which they arise. Actuarial gains and losses relating to long-term employee benefits are recognised in the consolidated income statement in the year in which they arise.

MEASUREMENT DATE

The measurement date of all retirement plans is 31 March.

FINANCIAL INSTRUMENTS

CLASSIFICATION, INITIAL RECOGNITION AND MEASUREMENT

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified into categories: financial assets at fair value through profit or loss (which can either be held for trading or designated as fair value options), held-to-maturity investments, loans and receivables and available-for-sale financial assets. Financial liabilities are classified into financial liabilities at fair value through profit or loss and other financial liabilities. No financial instruments have been designated as fair value through profit or loss using the fair value option or have been classified as held-to-maturity.

Financial instruments are recognised on the balance sheet when the Group becomes a party to the contractual provisions of the instrument.

Initially, a financial instrument is recognised at its fair value. Transaction costs directly attributable to the acquisition or issue of financial instruments are recognised in determining the carrying amount, if it is not classified as at fair value through profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

Financial assets and financial liabilities at fair value through profit or loss—held for trading: Derivatives, including embedded derivatives separated from the host contract, are classified into this category. Financial assets and liabilities are measured at fair value with changes in fair value recognised in the consolidated income statement with the exception of those derivatives which are designated as cash flow hedging instruments and for which hedge accounting is applied.

Loans and receivables: Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and which are not classified as financial assets at fair value through profit or loss or financial assets available-for-sale. Subsequently, these are measured at amortised cost using the effective interest method less any impairment losses. These include cash and cash equivalents, trade receivables, finance receivables and other financial assets.

Available-for-sale financial assets: Available-for-sale financial assets are those non-derivative financial assets that are either designated as such upon initial recognition or are not classified in any of the other financial assets categories. Subsequently, these are measured at fair value and changes therein are recognised in other comprehensive income, net of applicable deferred income taxes, and accumulated in the investments revaluation reserve with the exception of impairment losses, interest calculated using the effective interest method and foreign exchange gains and losses on monetary assets, which are recognised directly in profit or loss. The Group does not hold any available-for-sale financial assets.

Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured, are measured at cost.

Embedded derivatives relating to prepayment options on Senior Notes are not considered as closely related and are separately accounted unless the exercise price of these options is approximately equal on each exercise date to the amortised cost of the Senior Notes.

EQUITY INSTRUMENTS

An equity instrument is any contract that evidences residual interests in the assets of the Group after deducting all of its liabilities. Equity instruments issued by the Group are recorded at the proceeds received, net of direct issue costs.

OTHER FINANCIAL LIABILITIES

These are measured at amortised cost using the effective interest method.

DETERMINATION OF FAIR VALUE

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Subsequent to initial recognition, the Group determines the fair value of financial instruments that are quoted in active markets using the quoted bid prices (financial assets held) or quoted ask prices (financial liabilities held) and using valuation techniques for other instruments. Valuation techniques include discounted cash flow method and other valuation models.

DERECOGNITION OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expires or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities are derecognised when they are extinguished, that is when the obligation is discharged, cancelled or has expired.

When a financial instrument is derecognised, the cumulative gain or loss in equity (if any) is transferred to the consolidated income statement.

IMPAIRMENT OF FINANCIAL ASSETS

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset, other than those at fair value through profit or loss, or a group of financial assets is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

Loans and receivables: Objective evidence of impairment includes default in payments with respect to amounts receivable from customers, significant financial difficulty of the customer or bankruptcy. Impairment loss in respect of loans and receivables is calculated as the difference between their carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Such impairment loss is recognised in the consolidated income statement. If the amount of an impairment loss decreases in a subsequent year, and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. The reversal is recognised in the consolidated income statement.

Equity investments: A significant or prolonged decline in the fair value of the security below its cost is also evidence that the assets are impaired. If any such evidence exists the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss is removed from equity and recognised in profit and loss. Impairment losses recognised in the consolidated income statement on equity instruments are not reversed through the consolidated income statement.

HEDGE ACCOUNTING

The Group uses foreign currency forward contracts and options to hedge its risks associated with foreign currency fluctuations relating to highly probable forecast transactions. The Group designates these forward contracts and options in a cash flow hedging relationships by applying hedge accounting principles under IAS 39.

These forward contracts and options are stated at fair value on the consolidated balance sheet at each reporting date. Changes in the fair value of these forward contracts and options that are designated and effective as hedges of future cash flows are recognised in other comprehensive income (net of tax), and any ineffective portion is recognised immediately in the consolidated income statement. Amounts accumulated in other comprehensive income are reclassified to the consolidated income statement in the periods in which the forecasted transactions affect profit or loss.

For options, the time value is not a designated component of the hedge, and therefore all changes in fair value related to the time value of the instrument are recognised immediately in the consolidated income statement.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, exercised, or no longer qualifies for hedge accounting. For forecast transactions, any cumulative gain or loss on the hedging instrument recognised in other comprehensive income is retained there until the forecast transaction affects profit or loss.

If the forecast transaction is no longer expected to occur, the net cumulative gain or loss recognised in other comprehensive income is immediately transferred to the consolidated income statement.

NEW ACCOUNTING PRONOUNCEMENTS

IN THE CURRENT YEAR, THE GROUP ADOPTED THE FOLLOWING STANDARDS, REVISIONS AND AMENDMENTS TO STANDARDS AND INTERPRETATIONS:

IAS 19 Employee Benefits was amended in November 2013 to clarify the requirements that relate to how contributions from employees or third parties that are linked to service should be attributed to periods of service. In addition, it permits a practical expedient if the amount of the contributions is independent of the number of years of service, in that contributions, can, but are not required, to be recognised as a reduction in the service cost in the period in which the related service is rendered. The amendment did not have a material impact on the consolidated financial statements.

THE FOLLOWING PRONOUNCEMENTS, ISSUED BY THE IASB AND ENDORSED BY THE EU, ARE NOT YET EFFECTIVE AND HAVE NOT YET BEEN ADOPTED BY THE GROUP. THE GROUP IS EVALUATING THE IMPACT OF THESE PRONOUNCEMENTS ON THE CONSOLIDATED FINANCIAL STATEMENTS:

IAS 16 Property, Plant and Equipment has been amended to prohibit entities from using a revenue based depreciation method for items of property, plant and equipment. IAS 38 introduces a rebuttable presumption that revenue is not an appropriate basis for amortising intangible assets. The amendment is effective for annual periods beginning on or after 1 January 2016, with early adoption permitted. These amendments do not have any impact on the consolidated financial statements.

IFRS 11 Joint Arrangements addresses how a joint operator should account for the interest in a joint operation in which the activity of the joint operation constitutes a business. The amendment is effective for annual periods beginning on or after 1 January 2016, with early adoption permitted. The amendment does not have any impact on the consolidated financial statements.

IAS 16 Property, Plant and Equipment has been amended to include ‘bearer plants’ whilst the produce growing on bearer plants remains within the scope of IAS 41. The amendment is effective for annual periods beginning on or after 1 January 2016, with early adoption permitted. The amendment does not have any impact on the consolidated financial statements.

IAS 1 Presentation of Financial Statements has been amended to support preparers in exercising their judgement in presenting their financial reports. This includes clarification that all information should have materiality considerations applied and additional examples on expected presentation of the financial statements. The amendment does not have any impact on the consolidated financial statements based upon the current disclosures given.

IAS 27 Separate Financial Statements has been amended to permit investments in subsidiaries, joint ventures and associates to be optionally accounted for using the equity method in separate financial statements. The amendment is effective for annual periods beginning on or after 1 January 2016 with early adoption permitted. This amendment does not have any impact on the consolidated financial statements.

In addition, as part of the IASB’s Annual Improvements, a number of minor amendments have been made to standards in the 2012–2014 cycles. These amendments are effective for annual periods beginning on or after 1 July 2016, with early application permitted. These amendments do not have a material impact on the consolidated financial statements.

THE FOLLOWING PRONOUNCEMENTS, ISSUED BY THE IASB, HAVE NOT YET BEEN ENDORSED BY THE EU, ARE NOT YET EFFECTIVE AND HAVE NOT YET BEEN ADOPTED BY THE GROUP. THE GROUP IS EVALUATING THE IMPACT OF THESE PRONOUNCEMENTS ON THE CONSOLIDATED FINANCIAL STATEMENTS:

IFRS 10 and IAS 28 have been amended to clarify the treatment of the transfer of assets or sale of equity from an investor to its associate or joint venture. The mandatory effective date for these amendments has been deferred indefinitely by the IASB. These amendments are not expected to have a material impact on the consolidated financial statements.

IFRS 14 permits an entity which is a first-time adopter of International Financial Reporting Standards to continue to account, with some limited changes, for ‘regulatory deferral account balances’ in accordance with its previous GAAP, both on initial adoption of IFRS and in subsequent financial statements. This standard is effective for annual periods beginning on or after January 2016 subject to EU endorsement. The amendment does not have any impact the consolidated financial statements.

IFRS 15 Revenue from Contracts with Customers deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity’s contracts with customers. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 Revenue and IAS 11 Construction Contracts and related interpretations. The standard is effective for annual periods beginning on or after 1 January 2018 and earlier application is permitted subject to EU endorsement. The Group is assessing the impact of IFRS 15 and expects it to have a significant impact on the consolidated financial statements.

IFRS 9 Financial Instruments addresses the classification, measurement and recognition of financial assets and financial liabilities. The complete version of IFRS 9 was issued in July 2014. It replaces the guidance in IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through other comprehensive income and fair value through profit or loss. The basis of classification depends on the entity's business model and contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in other comprehensive income. There is now a new expected credit losses model that replaces the incurred loss model used in IAS 39. For financial liabilities there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. IFRS 9 relaxes the requirements for hedge effectiveness by replacing the bright line hedge effectiveness tests. It requires an economic relationship between the hedged item and the hedging instrument and for the 'hedged ratio' to be the same as the one management actually use for the risk management process. Contemporaneous documentation is still required but is different to that currently prepared under IAS 39. The standard is effective for annual periods beginning on or after 1 January 2018 and earlier application is permitted subject to EU endorsement. The Group is assessing the impact of IFRS 9 and expects it to have a significant impact on the consolidated financial statements.

The amendments to IFRS 10 Consolidated Financial Statements, IFRS 12 Disclosure of Interests in Other Entities and IAS 28 Investments in Associates and Joint Ventures (2011) relate to investment entities. The amendment is effective for annual periods beginning on or after 1 January 2016 and earlier application is permitted subject to EU endorsement. JLR, its subsidiaries and its parent do not meet the definition of an 'investment entity' and therefore the amendment is not applicable.

IFRS 16 specifies how an IFRS reporter will recognise, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognise assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. The standard is effective for annual periods beginning on or after 1 January 2019 and earlier application is permitted subject to EU endorsement and the adoption of IFRS 15. The Group is assessing the impact of IFRS 16 and expects it to have a significant impact on the consolidated financial statements.

IAS 12 Income taxes has been amended to clarify the treatment of deferred tax on debt held at fair value and clarify details on recognition of deferred tax assets. The amendment is effective for annual periods beginning on or after 1 January 2017, with early adoption permitted. These amendments do not have any impact on the consolidated financial statements.

IAS 7 has been amended to require additional disclosure to help users evaluate changes in borrowings. The amendment is effective for annual periods beginning on or after 1 January 2017 and earlier application is permitted subject to EU endorsement. The Group expects to include a net debt reconciliation within its disclosures following the adoption of this standard.

3 EXCEPTIONAL ITEM

The exceptional item of £157 million for the year ended 31 March 2016 relates to the full financial year impact of the explosion at the port of Tianjin (China) in August 2015. A provision of £245 million against the carrying value of inventory (finished goods) was recorded in the second quarter ended 30 September 2015, based on the Group's assessment of the physical condition of the vehicles involved. Subsequent to that, insurance proceeds of £55 million have been received, together with the conclusion of further assessments of the condition of the remaining vehicles, which had led to a reversal of £33 million of the initial provision.

The process for finalising ongoing insurance claims may take some months to conclude, so further insurance and other potential recoveries will only be recognised in future periods when received or confirmed as receivable.

Due to the size of the provision recorded, the charge together with the associated tax impact has been disclosed as an exceptional item. Any future recoveries will similarly be recognised as a reversal of that charge through exceptional items.

4 REVENUE

<u>Year ended 31 March</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>
Sale of goods	22,208	21,866	19,386
Total revenues	22,208	21,866	19,386

5 MATERIAL AND OTHER COST OF SALES

<u>Year ended 31 March</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>
Changes in inventories of finished goods and work-in-progress	(257)	(236)	(356)
Purchase of products for sale	876	864	715
Raw materials and consumables	12,684	12,557	11,545
Total material and other cost of sales	13,303	13,185	11,904

6 EMPLOYEE NUMBERS AND COSTS

<u>Year ended 31 March</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>
Wages and salaries	1,738	1,500	1,230
Social security costs and benefits	274	240	192
Pension costs	309	237	232
Total employee costs	2,321	1,977	1,654

<u>Average employee numbers year ended 31 March 2016</u>	<u>Non-agency</u>	<u>Agency</u>	<u>Total</u>
Manufacturing	17,235	3,140	20,375
Research and development	6,060	3,115	9,175
Other	6,494	961	7,455
Total employee numbers	29,789	7,216	37,005

<u>Average employee numbers year ended 31 March 2015</u>	<u>Non-agency</u>	<u>Agency</u>	<u>Total</u>

Research and development	5,185	2,716	7,901
Other	5,213	821	6,034
Total employee numbers	24,902	7,225	32,127

<u>Average employee numbers year ended 31 March 2014</u>	<u>Non-agency</u>	<u>Agency</u>	<u>Total</u>
Manufacturing	13,890	1,670	15,560
Research and development	4,307	1,916	6,223
Other	4,914	1,256	6,170
Total employee numbers	23,111	4,842	27,953

7 DIRECTORS' EMOLUMENTS

<u>Year ended 31 March</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
	<u>£</u>	<u>£</u>	<u>£</u>
Directors' emoluments	4,597,415	4,401,059	3,059,210

The aggregate of emoluments and amounts receivable under the long-term incentive plan ('LTIP') of the highest paid director was £3,709,433 (2015: £2,824,297, 2014: £2,433,578). In addition, for the highest paid director, pension benefits of £786,351 (2015: £1,475,732, 2014: £524,000) have accrued in the year. During the year, the highest paid director received £197,782 of LTIP awards (2015: no LTIP awards, 2014: no LTIP awards).

No directors received any LTIP cash payments during the years ended 31 March 2016, 2015 and 2014.

8 LONG-TERM INCENTIVE PLAN ('LTIP')

The Group operates a LTIP arrangement for certain employees. The scheme provides a cash payment to the employee based on a specific number of phantom shares at grant date and the share price of Tata Motors Limited at the vesting date. The cash payment is dependent upon continued employment for the duration of the three year vesting period. The cash payment has no exercise price and therefore the weighted average exercise price in all cases is £nil.

Year ended 31 March	2016	2015	2014
Outstanding at the beginning of the year	5,637,242	5,353,559	4,217,801
Granted during the year	2,317,710	2,315,618	1,956,741
Vested in the year	(1,690,151)	(1,654,917)	(778,599)
Forfeited in the year	(231,944)	(377,018)	(42,384)
Outstanding at the end of the year	6,032,857	5,637,242	5,353,559

The weighted average share price of the 1,690,151 phantom stock awards vested in the year was £5.84 (2015: £5.89, 2014: £4.45).

The weighted average remaining contractual life of the outstanding awards is 1.4 years (2015: 1.3 years, 2014: 1.3 years).

The amount charged in the year in relation to the long-term incentive plan was £3 million (2015: £16 million, 2014: £11 million).

The fair value of the balance sheet liability in respect of phantom stock awards outstanding at the year-end was £16 million (2015: £23 million, 2014: £17 million).

The fair value of the awards was calculated using a Black-Scholes model at the grant date. The fair value is updated at each reporting date as the awards are accounted for as cash-settled under IFRS 2 Share-based Payment. The inputs into the model are based on the Tata Motors Limited historic data and the risk-free rate is calculated on government bond rates. The inputs used are:

As at 31 March	2016	2015	2014
Risk-free rate (%)	0.51	0.49	0.91
Dividend yield (%)	0.00	0.39	0.49
Weighted average fair value per phantom share	£ 4.12	£ 6.14	£ 4.95

9 OTHER EXPENSES

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Stores, spare parts and tools	150	123	114
Freight cost	858	673	610
Works, operations and other costs	2,065	1,808	1,538
Repairs	42	37	17
Power and fuel	61	57	62
Rent, rates and other taxes	50	57	41
Insurance	26	20	19
Write-down of intangible assets	28	—	—
Warranty	583	543	541
Publicity	811	791	775
Total other expenses	4,674	4,109	3,717

Included within warranty expenses for the year ended 31 March 2016 is a charge of £67 million (2015, 2014: £nil) for a passenger airbag campaign (see note 41).

10 RESEARCH AND DEVELOPMENT

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Total research and development costs incurred	1,560	1,411	1,266
Research and development expensed.....	(318)	(253)	(236)
Development costs capitalised.....	1,242	1,158	1,030
Interest capitalised	73	114	102
Research and development expenditure credit.....	(88)	(69)	(45)
Total internally developed intangible additions.....	1,227	1,203	1,087

During the year ended 31 March 2014 legislation was enacted to allow UK companies to elect for the Research and Development Expenditure Credit (RDEC) on qualifying expenditure incurred since 1 April 2013, instead of the previous super- deduction rules. In the year ended 31 March 2016, as a result of this election, £66 million (2015: £66 million, 2014: £45 million) of the RDEC, the proportion relating to capitalised product development expenditure, has been offset against the cost of the respective assets. The remaining £38 million (2015: £30 million, 2014: £18 million) of the RDEC has been recognised as other income.

11 FINANCE INCOME AND EXPENSE

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Finance income	38	48	38
Total finance income.....	38	48	38
Total interest expense on financial liabilities measured at amortised cost.....	(143)	(234)	(257)
Unwind of discount on provisions	(21)	(17)	6
Interest capitalised	74	116	113
Total interest expense.....	(90)	(135)	(138)
Embedded derivative value.....	—	—	(47)
Total finance expense (net).....	(90)	(135)	(185)

The capitalisation rate used to calculate borrowing costs eligible for capitalisation was 4.6 per cent (2015: 5.8 per cent, 2014: 7.2 per cent).

During the year ended 31 March 2016, the Group repaid one tranche of debt (see note 24) and as a result a redemption premium of £2 million was incurred.

During the year ended 31 March 2015, the Group repaid two tranches of debt (see note 24) and as a result a redemption premium of £77 million was incurred.

During the year ended 31 March 2014, the Group repaid two tranches of debt (see note 24) and as a result a redemption premium of £56 million was incurred and the fair value of the embedded derivatives was expensed in full.

12 PROFIT BEFORE TAX

Expense/(income) included in profit before tax for the year are the following:

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Foreign exchange loss/(gain) on loans.....	54	178	(87)
Foreign exchange (gain)/loss on derivatives.....	(86)	166	(57)
Unrealised loss on commodities	59	30	7
Depreciation of property, plant and equipment	634	461	386
Amortisation of intangible assets (excluding internally generated development costs)	88	64	44
Amortisation of internally generated development costs.....	696	526	445
Operating lease rentals in respect of plant, property and equipment	57	48	42
Loss on disposal of property, plant, equipment and software.....	13	7	4
Auditor remuneration (see below)	5	4	4

During the year ended 31 March 2016, £101 million (2015: £132 million, 2014: £91 million) was received by a foreign subsidiary as an indirect tax incentive that requires the subsidiary to meet certain criteria relating to vehicle efficiency and investment in engineering and research and development. The incentive is provided as a partial offset to the higher sales taxes payable following implementation of new legislation in the year ended 31 March 2014. During the year ended 31 March 2016, £101 million (2015: £132 million, 2014: £88 million) has been recognised in revenue and £nil (2015: £nil, 2014: £3 million) has been deferred to offset against capital expenditure, when incurred.

During the year ended 31 March 2016, £62 million (2015: £54 million, 2014: £71 million) was received by a foreign subsidiary as an incentive for continuing trading in that country for the foreseeable future. As the receipt has no ongoing financial or operating conditions attached, the amount has been recognised as ‘Other Income’.

The following table sets out the auditor remuneration for the year (rounded to the nearest £0.1 million):

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Fees payable to the Company’s auditor and its associates for the audit of the parent Company and consolidated financial statements.....	0.1	0.1	0.1
Fees payable to the Company’s auditor and its associates for other services: —audit of the Company’s subsidiaries	3.5	3.3	2.9
Total audit fees.....	3.6	3.4	3.0
Audit related assurance services	1.8	0.3	0.3
Other assurance services.....	0.1	0.7	0.5
Total non-audit fees.....	1.9	1.0	0.8
Total audit and related fees.....	5.5	4.4	3.8

Fees payable to Deloitte LLP and their associates for non-audit services to the Group are not required to be disclosed separately as these fees are disclosed on a consolidated basis.

13 TAXATION

RECOGNISED IN THE CONSOLIDATED INCOME STATEMENT

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Current tax expense			
Current year	180	350	348
Adjustments for prior years	(7)	15	9
Current tax expense.....	173	365	357
Deferred tax expense/(credit)			
Origination and reversal of temporary differences	163	294	330

RECONCILIATION OF EFFECTIVE TAX RATE

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Profit for the year	1,312	2,038	1,879
Total income tax expense	245	576	622
Profit before tax	1,557	2,614	2,501
Income tax expense using the tax rates applicable to individual entities of 20.9% (2015: 22.7%, 2014: 23.6%)	325	593	590
Impact of UK Patent Box claims	(29)	—	—
Non-deductible expenses	35	28	15
Unrecognised tax assets	12	—	—
Differences between current and deferred tax rates applicable.....	—	(18)	—
Changes in tax rates	(62)	—	(54)
Overseas unremitted earnings	13	40	71
Share of (profit)/loss of equity accounted investments.....	(13)	1	2
Over provided in prior years	(36)	(68)	(2)
Total income tax expense	245	576	622

Included within 'Over provided in prior years' for the year ended 31 March 2016 is £45 million relating to enhanced deductions under the UK Patent Box regime in respect of Fiscal 2014 and 2015.

Included within the line 'Over provided in prior years' for March 2015 is a reversal of £62 million relating to withholding tax released as a result of changes in tax rates and laws expected to apply to the future repatriation of intercompany dividends.

The UK Finance Act 2015 was enacted during the year ended 31 March 2016 which included provisions for a reduction in the UK corporation tax rate from 20 per cent to 19 per cent with effect from 1 April 2017 and to 18 per cent with effect from 1 April 2020. Accordingly, UK deferred tax has been provided at a blended rate of 18.1 per cent (2015: 20 per cent, 2014: 20 per cent) in recognising the applicable tax rate at the point when the timing difference is expected to reverse.

A further change to the UK corporation tax rate was announced in the Chancellor's Budget during the year ended 31 March 2016. The announcement included a reduction in the UK corporation tax rate to 17 per cent from 1 April 2020. As the change to 17 per cent had not been substantively enacted at the balance sheet date, its effects are not included in these financial statements.

14 INVESTMENTS

Investments consist of the following:

As at 31 March	2016	2015	2014
	£m	£m	£m
Equity accounted investments	339	280	145

The Group has the following investments at 31 March 2016:

Name of investment	Proportion of voting rights	Principal place of business and country of incorporation	Principal activity
Equity accounted investments			
Chery Jaguar Land Rover Automotive Co. Ltd.	50.0%	China	Manufacture and assembly of vehicles
Spark44 (JV) Limited	50.0%	England & Wales	Provision of advertising services
Jaguar Cars Finance Limited ...	49.9%	England & Wales	Non-trading
Trading investments			
Jaguar Land Rover Schweiz AG	10.0%	Switzerland	Sale of automotive vehicles and parts

Except for Spark44 (JV) Limited, the proportion of voting rights disclosed in the table above is the same as the interest in the ordinary share capital.

Chery Jaguar Land Rover Automotive Co. Ltd. is a limited liability company, whose legal form confirms separation between the parties to the joint arrangement. There is no contractual arrangement or any other facts or circumstances that indicate that the parties to the joint control of the arrangement have rights to the assets or obligations for the liabilities relating to the arrangement. Accordingly, Chery Jaguar Land Rover Automotive Co. Ltd. is classified as a joint venture.

During the year ended 31 March 2013, the Group invested a 50 percent stake in Chery Jaguar Land Rover Auto Sales Co. Ltd. (change of name from Suzhou Chery Jaguar Land Rover Trading Co. Ltd.) for £1 million and a 50 per cent stake in Chery Jaguar Land Rover Automotive Co. Ltd. for £70 million. During the year ended 31 March 2014, Chery Jaguar Land Rover Auto Sales Co. Ltd., previously a direct joint venture of the Group, was acquired in full by Chery Jaguar Land Rover Automotive Co. Ltd. Therefore, the results shown of Chery Jaguar Land Rover Automotive Co. Ltd. are the consolidated results for that entity, which includes the results of Chery Jaguar Land Rover Auto Sales Co. Ltd.

During the year ended 31 March 2015, the Group increased its investment in Chery Jaguar Land Rover Automotive Co. Ltd. by £124 million (2014: £92 million). No further increases to the investment were made during the year ended 31 March 2016.

The following table sets out the summarised financial information of the Group's individually material joint venture, Chery Jaguar Land Rover Automotive Co. Ltd.:

As at 31 March	2016	2015	2014
	£m	£m	£m
Current assets.....	698	520	170
Current liabilities	(614)	(347)	(67)
Non-current assets	814	585	236
Non-current liabilities.....	(216)	(193)	(65)
Equity attributable to shareholders	682	565	274
Revenue.....	1,106	158	—
Profit/(loss) for the year	124	(13)	(16)
Total comprehensive income/(expense).....	124	(13)	(16)

Included within the summarised financial information above are the following amounts:

<u>As at 31 March</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>
Cash and cash equivalents	450	295	122
Other current assets.....	248	225	48
Current financial liabilities (excluding trade and other payables and provisions)	(35)	(56)	—
Non-current financial liabilities (excluding trade and other payables and provisions).....	(216)	(193)	(65)
Depreciation and amortisation	(58)	(16)	(1)
Interest income.....	8	8	2
Interest expense	(10)	(3)	(1)
Income tax (expense)/credit.....	(44)	6	13

Spark44 (JV) Limited's total ordinary share capital is divided into A and B ordinary shares with each class having 50 per cent voting rights and interest in returns (of which the Group holds 100 per cent of the B shares). As a number of the A ordinary shares are held in trust, the Group has an interest in 58 per cent of the allotted ordinary share capital, but only 50 per cent of the voting rights and interest in returns. Therefore, Spark44 (JV) Limited is considered a joint venture.

The Group has no additional rights or influence over Jaguar Cars Finance Limited other than the voting rights attached to the ordinary share capital.

The following table sets out the summarised financial information in aggregate for the share of investments in equity accounted investments that are not individually material:

<u>As at 31 March</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>
Group's share of profit for the year	2	1	1
Group's share of other comprehensive income.....	—	—	—
Group's share of total comprehensive income	2	1	1
Carrying amount of the Group's interest	5	3	2

The following reconciles the carrying amount of the Group's interests in equity accounted investments:

<u>As at 31 March</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>
Net assets of material joint venture	682	565	274
Share of net assets of:			
Material joint venture.....	341	282	137
Individually immaterial joint ventures	5	3	2
Foreign exchange differences	—	—	6
Other	(7)	(5)	—
Carrying amount of the Group's interests in equity accounted investments	339	280	145

As at 31 March 2016, an adjustment of £7 million (2015: £5 million, 2014: £nil) has been made to derecognise profit that has not yet been realised on goods sold by the Group to Chery Jaguar Land Rover Automotive Co. Ltd.

The following reconciles the Group's share of total comprehensive income of equity accounted investments:

<u>As at 31 March</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>
Profit/(loss) of material joint venture.....	124	(13)	(16)
Share of profit/(loss) of:			
Material joint venture.....	62	(7)	(8)
Individually immaterial joint ventures	2	1	1
Share of profit/(loss) of equity accounted investments	64	(6)	(7)
Currency translation differences	(3)	21	—

As at 31 March	2016	2015	2014
	£m	£m	£m
Share of total comprehensive income/(expense) of equity accounted investments.....	61	15	(7)

The Group's share of capital commitments of its joint ventures at 31 March 2016 is £102 million (2015: £19 million, 2014: £116 million), purchase commitments of its joint ventures at 31 March 2016 is £36 million (2015, 2014: £nil) and commitments relating to the Group's interests in its joint ventures are disclosed in note 32. There are no contingent liabilities relating to the Group's interests in its joint ventures.

The information above reflects the amounts presented in the financial statements of the equity accounted investments adjusted for differences in accounting policies between the Group and its equity accounted investments. All joint ventures are accounted for using the equity method and are private companies and there are no quoted market prices available for their shares.

The Group has no additional rights or influence over Jaguar Land Rover Schweiz AG other than the voting rights attached to the ordinary share capital. During the year ended 31 March 2016 a dividend of £0.5 million (2015, 2014: £nil) was received from Jaguar Land Rover Schweiz AG. No dividend was received in the year ended 31 March 2016 (2015, 2014: no dividend) from any other trading investments or equity accounted investments. Trading investments are held at cost of £0.3 million (2015: £0.3 million, 2014: £0.3 million).

15 OTHER FINANCIAL ASSETS

As at 31 March	2016	2015	2014
	£m	£m	£m
Non-current			
Restricted cash held as security	21	18	25
Derivative financial instruments	154	22	436

Following a review of all product development in progress, £28 million of costs were identified as written down and these have been recognised as an expense within 'Other expenses' in the year ended 31 March 2016 (2015, 2014: £nil).

IMPAIRMENT TESTING

The directors are of the view that the operations of the Group represent a single cash-generating unit. The intellectual property rights are deemed to have an indefinite useful life on the basis of the expected longevity of the brand names.

For the periods presented, the recoverable amount of the cash-generating unit has been calculated with reference to its value in use. The key assumptions of this calculation are shown below:

<u>As at 31 March</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
Period on which management approved forecasts are based	5 years	5 years	5 years
Growth rate applied beyond approved forecast period	2.1%	2.2%	0%
Pre-tax discount rate	11.2%	11.2%	10.9%

The growth rates used in the value in use calculation reflect those inherent within the Board's latest business plan which is primarily a function of the Group's cycle plan assumptions, past performance and management's expectation of future market developments, through to 2021/22. The cash flows are then extrapolated into perpetuity assuming a growth rate of 2.1 per cent (2015: 2.2 per cent, 2014: nil per cent).

No reasonably possible change in any of the key assumptions would cause the recoverable amount to be less than the carrying value of the assets of the cash-generating unit.

18 OTHER ASSETS

<u>As at 31 March</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>

Overseas unremitted earnings.....	59	(28)*	—	—	31
Total deferred tax liability.....	911	66	—	—	977
Presented as deferred tax asset**.....	372				354
Presented as deferred tax liability**.....	(199)				(384)

* Included within £28 million is a reversal of £39 million relating to withholding tax incurred on intercompany dividends paid in the year.

** For balance sheet presentation purposes, deferred tax assets and deferred tax liabilities are offset to the extent they relate to the same taxation authority and are expected to be settled on a net basis.

At 31 March 2016 the Group had unused tax losses and other temporary differences amounting to £76 million (2015: £nil, 2014: £nil) for which no deferred tax asset has been recognised based upon the forecast profitability of the companies in which the deferred tax assets arise. As at 31 March 2016 £6 million (2015: £nil, 2014: £nil) of those tax losses expire after eight years and the remaining balance is not expected to expire.

At 31 March 2016 the Group had temporary differences relating to undistributed profits of equity accounted investees amounting to £37 million (2015: £nil, 2014: £nil) for which no deferred tax liability has been recognised as it is not expected to reverse in the foreseeable future.

All deferred tax assets and deferred tax liabilities at 31 March 2016, 31 March 2015 and 31 March 2014 are presented as non-current.

Significant components of deferred tax asset and liability for the year ended 31 March 2015 are as follows:

	Opening balance	Recognised in profit or loss	Recognised in other comprehensive income	Foreign exchange	Closing balance
	£m	£m	£m	£m	£m
Deferred tax assets

Derivative financial instruments.....	133	—	(133)	—	—
Overseas unremitted earnings.....	141	(82)*	—	—	59
Total deferred tax liability.....	989	55	(133)	—	911
Presented as deferred tax asset**.....	284				372
Presented as deferred tax liability**.....	(346)				(199)

* Included within £82 million is a reversal of £59 million relating to withholding tax incurred on intercompany dividends paid in the year, and £62 million relating to withholding tax released as a result of changes in tax rates and laws expected to apply to future repatriation of intercompany dividends.

** For balance sheet presentation purposes, deferred tax assets and deferred tax liabilities are offset to the extent they relate to the same taxation authority and are expected to be settled on a net basis.

Significant components of deferred tax asset and liability for the year ended 31 March 2014 are as follows:

	Opening balance	Recognised in profit or loss	Recognised in other comprehensive income	Foreign exchange	Closing balance
	£m	£m	£m	£m	£m
Deferred tax assets					
Property, plant & equipment.....	145	(71)	—	—	74
Provisions, allowances for doubtful receivables.....	182	29	—	(21)	190
Derivative financial instruments.....	61	—	(61)	—	—
Retirement benefits.....	164	(25)	(4)	—	135
Unrealised profit in inventory.....	76	62	—	—	138
Tax loss.....	556	(181)	—	—	375
Other.....	2	13	—	—	15
Total deferred tax asset.....	1,186	(173)	(65)	(21)	927
Deferred tax liabilities					
Property, plant & equipment.....	2	—	—	—	2
Intangible assets.....	676	37	—	—	713
Derivative financial instruments.....	—	—	133	—	133
Overseas unremitted earnings.....	86	55*	—	—	141
Total deferred tax liability.....	764	92	133	—	989
Presented as deferred tax asset**.....	508				284
Presented as deferred tax liability**.....	(86)				(346)

* Included within £55 million is a reversal of £5 million relating to withholding tax incurred on intercompany dividends paid in the year.

** For balance sheet presentation purposes, deferred tax assets and deferred tax liabilities are offset to the extent they relate to the same taxation authority and are expected to be settled on a net basis.

20 CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of the following:

As at 31 March	2016	2015	2014
	£m	£m	£m
Cash and cash equivalents.....	3,399	3,208	2,260

Included within the cash and cash equivalents balance of £3,399 million (2015: £3,208 million, 2014: £2,260 million) are amounts of £12 million (2015: £nil, 2014: £nil) which are not considered to be available for use by the Group at the balance sheet date. £7 million (2015: £nil, 2014: £nil) relates to amounts held by solicitors to settle a capital commitment and £5 million (2015: £nil, 2014: £nil) relates to amounts that are required by local legislation to be held for use on specific marketing activities.

21 ALLOWANCES FOR TRADE AND OTHER RECEIVABLES

Changes in the allowances for trade and other receivables are as follows:

Year ended 31 March	2016	2015	2014
	£m	£m	£m
At beginning of year.....	11	8	10
Change in allowance during the year.....	49	3	(1)
Written off.....	—	—	(1)
At end of year.....	60	11	8

22 INVENTORIES

As at 31 March	2016	2015	2014
	£m	£m	£m
Raw materials and consumables	92	80	75
Work-in-progress	379	298	211
Finished goods	2,214	2,038	1,888
Total inventories	2,685	2,416	2,174

Inventories of finished goods include £250 million (2015: £187 million, 2014: £174 million), relating to vehicles sold to rental car companies, fleet customers and others with guaranteed repurchase arrangements.

Cost of inventories (including cost of purchased products) recognised as an expense during the year amounted to £15,437 million (2015: £15,041 million, 2014: £13,421 million).

During the year, the Group recorded an inventory write-down expense of £230 million (2015: £40 million, 2014: £24 million). The write-down is included in material and other cost of sales. No previous write-downs have been reversed in any period.

23 ACCOUNTS PAYABLE

As at 31 March	2016	2015	2014
	£m	£m	£m
Trade payables	3,899	3,483	3,154
Liabilities to employees	153	185	148
Liabilities for expenses	1,357	1,298	1,244
Capital creditors	349	484	241
Total accounts payable	5,758	5,450	4,787

24 INTEREST BEARING LOANS AND BORROWINGS

As at 31 March	2016	2015	2014
	£m	£m	£m
Short-term borrowings			
Bank loans	116	156	167
Short-term borrowings	116	156	167
Long-term borrowings			
EURO MTF listed debt	2,373	2,381	1,843
Long-term borrowings	2,373	2,381	1,843
Finance lease obligations (see note 35)	11	13	18
Total debt	2,500	2,550	2,028

EURO MTF LISTED DEBT

The bonds are listed on the EURO MTF market, which is a listed market regulated by the Luxembourg Stock Exchange.

Details of the tranches of the bonds outstanding at 31 March 2016 are as follows:

- \$84 million Senior Notes due 2021 at a coupon of 8.125 per cent per annum—issued May 2011;
- \$500 million Senior Notes due 2023 at a coupon of 5.625 per cent per annum—issued January 2013;

- \$700 million Senior Notes due 2018 at a coupon of 4.125 per cent per annum—issued December 2013;
- £400 million Senior Notes due 2022 at a coupon of 5.000 per cent per annum—issued January 2014;
- \$500 million Senior Notes due 2019 at a coupon of 4.250 per cent per annum—issued October 2014;
- £400 million Senior Notes due 2023 at a coupon of 3.875 per cent per annum—issued February 2015;
- \$500 million Senior Notes due 2020 at a coupon of 3.500 per cent per annum—issued March 2015.

In May 2016, the Group repaid early the remaining \$84 million Senior Notes due 2021 for a redemption premium of £2 million.

Details of the tranches of the bonds repaid in the year ended 31 March 2016 are as follows:

- £58 million Senior Notes due 2020 at a coupon of 8.250 per cent per annum—issued March 2012.

Details of the tranches of the bonds repaid in the year ended 31 March 2015 are as follows:

- \$326 million Senior Notes due 2021 at a coupon of 8.125 per cent per annum—issued May 2011;
- £442 million Senior Notes due 2020 at a coupon of 8.250 per cent per annum—issued March 2012.

Details of the tranches of the bonds repaid in the year ended 31 March 2014 are as follows:

- £500 million Senior Notes due 2018 at a coupon of 8.125 per cent per annum—issued May 2011;
- \$410 million Senior Notes due 2018 at a coupon of 7.75 per cent per annum—issued May 2011.

The contractual cash flows of interest bearing debt and borrowings (excluding finance leases) as of March 2016 are set out below, including estimated interest payments and assumes the debt will be repaid at the maturity date.

As at 31 March	2016	2015	2014
	£m	£m	£m
Due in			
1 year or less	233	279	296
2nd and 3rd years	717	240	254
4th and 5th years	857	1,403	666
More than 5 years	1,292	1,336	1,666
Total contractual cash flows	3,099	3,258	2,882

UNDRAWN FACILITIES

As at 31 March 2016, the Group has a fully undrawn revolving credit facility of £1,870 million. This facility is available in full until 2020. As at 31 March 2015 and 2014 the Group had a fully undrawn revolving credit facility of £1,485 million and £1,290 million respectively in a facility split into three and five year tranches available until 2016 and 2018.

Closing balance	1,129	99	19	31	1,278

PRODUCT WARRANTY PROVISION

The Group offers warranty cover in respect of manufacturing defects, which become apparent up to five years after purchase, dependent on the market in which the purchase occurred. The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future incidences based on actions on product failures. The discount on the warranty provision is calculated using a risk-free discount rate as the risks specific to the liability, such as inflation, are included in the base calculation. The timing of outflows will vary as and when a warranty claim will arise, being typically up to five years.

LEGAL AND PRODUCT LIABILITY PROVISION

A legal and product liability provision is maintained in respect of compliance with regulations and known litigations which impact the Group. The provision primarily relates to motor accident claims, consumer complaints, dealer terminations, employment cases, personal injury claims and compliance with regulations.

RESIDUAL RISK PROVISION

In certain markets, the Group is responsible for the residual risk arising on vehicles sold by dealers on leasing arrangements. The provision is based on the latest available market expectations of future residual value trends. The timing of the outflows will be at the end of the lease arrangements—being typically up to three years.

ENVIRONMENTAL RISK PROVISION

This provision relates to various environmental remediation costs such as asbestos removal and land clean up. The timing of when these costs will be incurred is not known with certainty.

27 OTHER LIABILITIES

As at 31 March	2016	2015	2014
	£m	£m	£m

30 DIVIDENDS

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Dividend proposed for the previous year paid during the year of £0.10 (2015: £0.10, 2014: £0.10) per ordinary share.....	150	150	150
Amounts recognised as distributions to equity holders during the year	150	150	150
Proposed dividend for the year of £0.10 (2015: £0.10, 2014: £0.10) per ordinary share.....	150	150	150

In May 2016, the Company proposed an ordinary dividend of £150 million to its immediate parent TML Holdings Pte. Ltd. (Singapore). This amount was paid in full in June 2016.

31 EMPLOYEE BENEFITS

The Group operates defined benefit schemes for qualifying employees of certain of its subsidiaries. The UK defined benefit schemes are administered by a trustee that is legally separated from the Company. The trustee of the pension schemes is required by law to act in the interest of the fund and of all relevant stakeholders in the schemes, is responsible for the investment policy with regard to the assets of the schemes and all other governance matters. The board of the trustee must be composed of representatives of the Company and scheme participants in accordance with each scheme's regulations.

Under the schemes, the employees are entitled to post-retirement benefits based on their length of service and salary.

Through its defined benefit pension schemes the Group is exposed to a number of risks, the most significant of which are detailed below:

ASSET VOLATILITY

The scheme liabilities are calculated using a discount rate set with reference to corporate bond yields; if scheme assets under perform these corporate bonds, this will create or increase a deficit. The defined benefit schemes hold a significant proportion of equity type assets, which are expected to outperform corporate bonds in the long term although introducing volatility and risk in the short term.

As the schemes mature, the Group intends to reduce the level of investment risk by investing more in assets that better match the liabilities.

However, the Group believes that due to the long-term nature of the scheme liabilities and the strength of the supporting group, a level of continuing equity type investments is an appropriate element of the Group's long-term strategy to manage the schemes efficiently.

CHANGES IN BOND YIELDS

A decrease in corporate bond yields will increase scheme liabilities, although this is expected to be partially offset by an increase in the value of the schemes' bond holdings and interest rate hedging instruments.

INFLATION RISK

Some of the Group pension obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect the scheme against extreme inflation). The schemes hold a significant proportion of assets in index linked gilts, together with other inflation hedging instruments and also assets which are more loosely correlated with inflation. However, an increase in inflation will also increase the deficit to some degree.

LIFE EXPECTANCY

The majority of the scheme's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the scheme's liabilities. This is particularly significant in the UK defined benefit schemes, where inflationary increases result in higher sensitivity to changes in life expectancy.

The following tables set out the disclosures pertaining to the retirement benefit amounts recognised in the financial statements:

CHANGE IN PRESENT VALUE OF DEFINED BENEFIT OBLIGATION

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Defined benefit obligation at beginning of year	7,883	6,053	6,021
Current service cost	224	168	176
Interest expense	263	274	262

Components of defined benefit cost recognised in the consolidated income statement	262	205	215

Amounts recognised in the consolidated statement of comprehensive income consists of:

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Actuarial gains/(losses) arising from:			
Changes in demographic assumptions	36	20	39
Changes in financial assumptions	569	(1,454)	243
Experience adjustments.....	(63)	(101)	(8)
Remeasurement (loss)/gain on the return of scheme assets, excluding amounts included in interest income	(52)	1,178	(407)
Change in restriction of pension asset recognised (as per IFRIC 14)	1	2	(2)
Change in onerous obligation, excluding amounts included in interest expense	(2)	—	—
Remeasurement gain/(loss) on defined benefit obligation	489	(355)	(135)

Amounts recognised in the consolidated balance sheet consist of:

As at 31 March	2016	2015	2014
	£m	£m	£m
Present value of unfunded defined benefit obligations	(1)	(1)	(1)
Present value of funded defined benefit obligations	(7,667)	(7,882)	(6,052)
Fair value of scheme assets.....	7,103	6,997	5,382
Restriction of pension asset recognised (as per IFRIC 14) and onerous obligations	(2)	(1)	(3)
Net retirement benefit obligation	(567)	(887)	(674)
Presented as non-current liability.....	(567)	(887)	(674)

The most recent actuarial valuations of scheme assets and the present value of the defined benefit liability for accounting purposes were carried out at 31 March 2016 by a qualified independent actuary. The present value of the defined

benefit liability, and the related current service cost and past service cost, were measured using the projected unit credit method.

The principal assumptions used in accounting for the pension schemes are set out below:

Year ended 31 March	2016	2015	2014
	%	%	%
Discount rate	3.6	3.4	4.6
Expected rate of increase in compensation level of covered employees.....	3.5	3.6	3.9
Inflation increase	3.0	3.1	3.4

For the valuation at 31 March 2016, the mortality assumptions used are the SAPS base table, in particular S2NxA tables and the Light table for members of the Jaguar Executive Pension Plan. A scaling factor of 120 per cent for males and 110 per cent for females has been used for the Jaguar Pension Plan, 115 per cent for males and 105 per cent for females for the Land Rover Pension Scheme, and 95 per cent for males and 85 per cent for females for Jaguar Executive Pension Plan.

For the valuation at 31 March 2015 and 2014, the mortality assumptions used are the SAPS base table, in particular S1NxA tables and the Light table for members of the Jaguar Executive Pension Plan. A scaling factor of 115 per cent has been used for the Jaguar Pension Plan, 110 per cent for the Land Rover Pension Scheme, and 105 per cent for males and 90 per cent for females for Jaguar Executive Pension Plan.

There is an allowance for future improvements in line with the CMI (2014) projections (2015: CMI (2014) projections, 2014: CMI (2013) projections) and an allowance for long-term improvements of 1.25 per cent per annum.

The assumed life expectations on retirement at age 65 are:

As at 31 March	2016 years	2015 years	2014 years
Retiring today:			
Males	21.5	21.4	20.0
Females.....	24.4	23.9	24.5
Retiring in 20 years:			
Males	23.2	23.1	23.8
Females.....	26.2	25.8	26.4

The sensitivity analyses below are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the pension liability recognised within the statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous periods.

Assumption	Change in assumption	Impact on scheme liabilities	Impact on service cost
Discount rate.....	Increase/decrease by 0.25%	Decrease/increase by £419 million	Decrease/increase by £13 million
Inflation rate	Increase/decrease by 0.25%	Increase/decrease by £373 million	Increase/decrease by £13 million
Mortality.....	Increase/decrease by 1 year	Increase/decrease by £207 million	Increase/decrease by £5 million

The fair value of scheme assets is represented by the following major categories:

* Quoted prices for identical assets or liabilities in active markets.

As at 31 March 2016 the schemes held Gilt Repos, the net value of these transactions is included in the value of Interest Rate and Inflation derivatives. The value of the funding obligation for the Repo transactions is £373 million at 31 March 2016. The schemes did not have any Gilt Repos at 31 March 2015 or 31 March 2014.

The split of level 1 assets is 63 per cent (2015: 59 per cent, 2014: 79 per cent), level 2 assets 31 per cent (2015: 37 per cent, 2014: 20 per cent) and level 3 assets 6 per cent (2015: 4 per cent, 2014: 1 per cent).

JLR has agreed updated contributions towards the UK defined benefit schemes following the 5 April 2015 valuation. It is intended to eliminate the pension scheme funding deficits over the 10 years following the valuation date. The

current agreed contribution rate for defined benefit accrual is 31% of pensionable salaries in the UK. Deficit contribution levels remain in line with prior expectation for 2016-18 and then increase to £58 million per annum to March 2025.

The average duration of the benefit obligation at 31 March 2016 is 20.5 years (2015: 23.5 years, 2014: 22.5 years). The expected net periodic pension cost for the year ended 31 March 2017 is £224 million. In addition to advanced contributions of £69 million paid in March 2016 the group expects to pay £219 million to its defined benefit schemes in the year ended 31 March 2017.

DEFINED CONTRIBUTION FUND

The Group's contribution to defined contribution plans for the year ended 31 March 2016 was £47 million (2015: £33 million, 2014: £23 million).

32 COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Group faces claims and assertions by various parties. The Group assesses such claims and assertions and monitors the legal environment on an ongoing basis, with the assistance of external legal counsel wherever necessary. The Group records a liability for any claims where a potential loss is probable and capable of being estimated and discloses such matters in its financial statements, if material. For potential losses that are considered possible, but not probable, the Group provides disclosure in the financial statements but does not record a liability in its accounts unless the loss becomes probable. Such potential losses may be of an uncertain timing and/or amount.

The following is a description of claims and contingencies where a potential loss is possible, but not probable. Management believes that none of the contingencies described below, either individually or in aggregate, would have a material adverse effect on the Group's financial condition, results of operations or cash flows.

LITIGATION AND PRODUCT RELATED MATTERS

The Group is involved in legal proceedings, both as plaintiff and as defendant. There are claims and potential claims as at 31 March 2016 of £6 million (2015: £11 million, 2014: £27 million) against the Group which management has not recognised as they are not considered probable. These claims and potential claims pertain to motor accident claims, consumer complaints, employment and dealership arrangements, replacement of parts of vehicles and/or compensation for deficiency in the services by the Group or its dealers.

As disclosed in note 41 (Subsequent events), the Group has provided for the estimated costs of repair following the passenger safety airbag issue in the United States. The Group recognises that there is a potential risk of further recalls in other countries in the future, however, the Group are unable at this point in time to reliably estimate the amount and timings of any potential future costs associated with this warranty issue.

OTHER TAXES AND DUES

During the year ended 31 March 2015 the Group's Brazilian subsidiary has received a demand for 167 million Brazilian Real (£32 million at 31 March 2016 exchange rates) in relation to additional indirect taxes (PIS and COFINS) claimed as being due on local vehicle and parts sales made in 2010. The matter is currently being contested before the Brazilian appellate authorities. Professional legal opinions obtained in Brazil fully support that the basis of the tax authority's assertion is incorrect and, as a result, the likelihood of any settlement ultimately having to be made is considered remote. Accordingly no provision has been recognised in the financial statements and the matter is disclosed here purely for the purposes of completeness.

The Group had no other significant tax matters in dispute as at 31 March 2016, 2015 or 2014 where a potential loss was considered possible.

COMMITMENTS

The Group has entered into various contracts with vendors and contractors for the acquisition of plant and machinery, equipment and various civil contracts of capital nature aggregating to £797 million (2015: £814 million, 2014: £940 million) and £12 million (2015: £nil, 2014: £nil) relating to the acquisition of intangible assets.

The Group has entered into various contracts with vendors and contractors which include obligations aggregating to £1,836 million (2015: £642 million, 2014: £717 million) to purchase minimum or fixed quantities of material and other procurement commitments.

Commitments and contingencies also includes other contingent liabilities of £28 million (2015: £2 million, 2014: £nil).

Inventory of £nil (2015: £nil, 2014: £nil) and trade receivables with a carrying amount of £116 million (2015: £156 million, 2014: £167 million) and property, plant and equipment with a carrying amount of £nil (2015: £nil, 2014: £nil) and restricted cash with a carrying amount of £nil (2015: £nil, 2014: £nil) are pledged as collateral/security against the borrowings and commitments.

There are guarantees provided in the ordinary course of business of £nil (2015: £nil, 2014: £nil).

Commitments related to leases are set out in note 35.

Stipulated within the joint venture agreement for Chery Jaguar Land Rover Automotive Co. Ltd. is a commitment for the Group to contribute a total of CNY 3,500 million of capital, of which CNY 2,875 million has been contributed as at 31 March 2016.

The outstanding commitment of CNY 625 million translates to £67 million at 31 March 2016 exchange rate.

33 CAPITAL MANAGEMENT

The Group's objectives when managing capital are to ensure the going concern operation of its entities and to maintain an efficient capital structure to reduce the cost of capital, support the corporate strategy and to meet shareholder expectations.

The Group's policy is to borrow primarily through capital market debt issues to meet anticipated funding requirements and maintain sufficient liquidity. The Group also maintains certain undrawn committed credit facilities to provide additional liquidity. These borrowings, together with cash generated from operations, are loaned internally or contributed as equity to certain subsidiaries as required. Surplus cash in subsidiaries is pooled (where practicable) and invested to satisfy security, liquidity and yield requirements.

The capital structure is governed according to Group policies approved by the Board and is monitored by various metrics such as interest cover, as per the debt covenants.

Funding requirements are reviewed periodically with any debt issuances and capital distributions approved by the Board.

The following table summarises the capital of the Group:

As at 31 March	2016	2015	2014
	£m	£m	£m
Short-term debt	121	160	172
Long-term debt	2,379	2,390	1,856
Total debt*	2,500	2,550	2,028
Equity.....	7,614	6,040	5,864
Total capital	10,114	8,590	7,892

* Total debt includes finance lease obligations of £11 million (2015: £13 million, 2014: £18 million).

34 FINANCIAL INSTRUMENTS

This section gives an overview of the significance of financial instruments for the Group and provides additional information on balance sheet items that contain financial instruments.

The details of significant accounting policies, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in note 2 to the consolidated financial statements.

(A) FINANCIAL ASSETS AND LIABILITIES

The following table shows the carrying amounts and fair value of each category of financial assets and liabilities as at 31 March 2016:

FINANCIAL ASSETS

	Loans and receivables	Derivatives in cash flow hedging relationship	Fair value through profit and loss	Total carrying value	Total fair value

OFFSETTING

Certain financial assets and financial liabilities are subject to offsetting where there is currently a legally enforceable right to set off recognised amounts and the Group intends to either settle on a net basis, or to realise the asset and settle the liability simultaneously.

Derivative financial assets and financial liabilities are subject to master netting arrangements whereby in the case of insolvency, derivative financial assets and financial liabilities can be settled on a net basis.

The following table discloses the amounts that have been offset in arriving at the balance sheet presentation and the amounts that are available for offset only under certain conditions as at 31 March 2016:

	Gross amount recognised	Gross amount of recognised set off in the balance sheet	Net amount presented in the balance sheet	Gross amount not offset in the balance sheet	Cash collateral (received)/ pledged	Net amount after offsetting
	£m	£m	£m	£m	£m	£m
Financial assets

FAIR VALUE HIERARCHY

Financial instruments held at fair value are required to be measured by reference to the following levels.

- Quoted prices in an active market (Level 1): This level of hierarchy includes financial instruments that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Valuation techniques with observable inputs (Level 2): This level of hierarchy includes financial assets and liabilities measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);
- Valuation techniques with significant unobservable inputs (Level 3): This level of hierarchy includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

There has been no change in the valuation techniques adopted or any transfers between fair value levels.

The financial instruments that are measured subsequent to initial recognition at fair value are classified as Level 2 fair value measurements, as defined by IFRS 13, being those derived from inputs other than quoted prices that are observable. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. Fair value of forward derivative financial assets and liabilities are estimated by discounting expected future contractual cash flows using prevailing market interest rate curves from Reuters. Commodity swap contracts are similarly fair valued by discounting expected future contractual cash flows. Option contracts on foreign currency are entered into on a zero cost collar basis and fair value estimates are calculated from standard Black-Scholes options pricing methodology, using prevailing market interest rates and volatilities.

Additionally, a Credit Valuation Adjustment (CVA)/Debit Value Adjustment (DVA) is taken on derivative financial assets and liabilities and is calculated by discounting the fair value gain or loss on the financial derivative using credit default swap (CDS) prices quoted for the counterparty or Jaguar Land Rover respectively. CDS prices are obtained from Bloomberg.

The long-term unsecured listed bonds are held at amortised cost. Their fair value for disclosure purposes is determined using Level 1 valuation techniques, based on the closing price at 31 March 2016 on the EURO MTF market.

Fair values of cash and cash equivalents, short-term deposits, trade receivables and payables, short-term borrowings and other financial assets and liabilities (current and non-current excluding derivatives) are assumed to approximate to cost due to the short-term maturity of the instruments and as the impact of discounting is not significant.

Management uses its best judgement in estimating the fair value of its financial instruments. However, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented above are not necessarily indicative of all the amounts that the Group could have realised in a sales transaction as of respective dates. The estimated fair value amounts as of 31 March 2016, 31 March 2015 and 31 March 2014 have been measured as of the respective dates. As such, the fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each year-end.

(B) FINANCIAL RISK MANAGEMENT

As discussed in the Strategic report under the section Our Risks, the Group is exposed to foreign currency exchange rate, commodity price, interest rate, liquidity and credit risks. The Group has a risk management framework in place which monitors all of these risks.

(C) FOREIGN CURRENCY EXCHANGE RATE RISK

The fluctuation in foreign currency exchange rates may have a potential impact on the consolidated income statement, the consolidated statement of comprehensive income, the consolidated balance sheet, the consolidated statement of changes in equity and the consolidated cash flow statement where any transaction references more than one currency or

where assets/liabilities are denominated in a currency other than the functional currency of the respective consolidated entities.

Considering the countries and economic environment in which the Group operates, its operations are subject to risks arising from fluctuations in exchange rates in those countries. The risks primarily relate to fluctuations in US Dollar, Chinese Yuan and Euro against the functional currency of the Company and its subsidiaries.

i) HEDGE ACCOUNTING EXPOSURES

The Group uses foreign currency contracts to hedge its risk associated with foreign currency fluctuations relating to highly probable forecast transactions. The fair value of such contracts designated in the hedge relationship as of 31 March 2016 was a net liability of £1,118 million (2015: net liability of £1,263 million, 2014: net asset of £673 million).

Cash flow hedges are expected to be recognised in profit or loss during the years ending 31 March 2017 to 2021. The Group also has a number of foreign currency options which are entered into as an economic hedge of the financial risks of the Group. The time value of options is excluded from the hedge relationship and thus the change in time value is recognised immediately in the consolidated income statement.

Changes in the fair value of foreign currency contracts, to the extent determined to be an effective hedge, are recognised in the statement of other comprehensive income and the ineffective portion of the fair value change is recognised in the income statement. Accordingly, the fair value change of net loss of £169 million (2015: loss of £1,768 million, 2014: gain of £1,041 million) was recognised in other comprehensive income. The loss due to hedge ineffectiveness where forecast transactions are no longer expected to occur was £2 million (2015: loss of £5 million, 2014: gain of £5 million) which has been recognised in 'Foreign exchange (loss)/gain' in the consolidated income statement. The gain on derivative contracts not eligible for hedging was £88 million (2015: loss of £161 million, 2014: gain of £57 million) which has been recognised in 'Foreign exchange (loss)/gain' in the consolidated income statement.

A 10 per cent depreciation/appreciation of the foreign currency underlying such contracts would have resulted in an approximate additional (loss)/gain of (£1,824) million/£1,690 million (2015: £1,251 million/(£1,382) million, 2014: £734 million/(£893) million) in equity and a gain/(loss) of £60 million/£54 million (2015: £165 million/(£91) million, 2014: £51 million/(£31) million) in the consolidated income statement.

In addition to using derivative contracts to economically hedge future purchases in US Dollars, the Group issues bonds denominated in US Dollars to give a degree of natural hedging of future sales revenues.

ii) BALANCE SHEET EXPOSURES

The Group is also exposed to fluctuations in exchange rates which impact the valuation of foreign currency denominated assets and liabilities of its national sales companies and also foreign currency denominated balances on all Group's balance sheet at each reporting period end.

The following table sets forth information relating to foreign currency exposure as of 31 March 2016:

As at 31 March 2016	US Dollar	Chinese Yuan	Euro	Others*	Total
	£m	£m	£m	£m	£m
Financial assets	664	666	621	384	2,335
Financial liabilities.....	(2,367)	(571)	(1,670)	(326)	(4,934)
Net exposure asset/(liability)	(1,703)	95	(1,049)	58	(2,599)

A 10 per cent appreciation/depreciation of the US Dollar, Chinese Yuan and Euro would result in an increase/decrease in the Group's net profit before tax and total equity by approximately £170 million, £10 million and £105 million respectively for the year ended 31 March 2016.

The following table sets forth information relating to foreign currency exposure as of 31 March 2015:

<u>As at 31 March 2015</u>	<u>US Dollar</u>	<u>Chinese Yuan</u>	<u>Euro</u>	<u>Others*</u>	<u>Total</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>	<u>£m</u>	<u>£m</u>
Financial assets	727	742	483	312	2,264
Financial liabilities.....	(2,139)	(756)	(1,098)	(182)	(4,175)
Net exposure asset/(liability)	(1,412)	(14)	(615)	130	(1,911)

A 10 per cent appreciation/depreciation of the US Dollar, Chinese Yuan and Euro would result in an increase/decrease in the Group's net profit before tax and total equity by approximately £141 million, £1 million and £62 million respectively for the year ended 31 March 2015.

The following table sets forth information relating to foreign currency exposure as of 31 March 2014:

<u>As at 31 March 2014</u>	<u>US Dollar</u>	<u>Chinese Yuan</u>	<u>Euro</u>	<u>Others*</u>	<u>Total</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>	<u>£m</u>	<u>£m</u>
Financial assets	463	840	296	335	1,934
Financial liabilities.....	(1,594)	(715)	(1,322)	(285)	(3,916)
Net exposure asset/(liability)	(1,131)	125	(1,026)	50	(1,982)

A 10 per cent appreciation/depreciation of the US Dollar, Chinese Yuan and Euro would result in an increase/decrease in the Group's net profit before tax and total equity by approximately £113 million, £13 million and £103 million respectively for the year ended 31 March 2014.

* Others include Japanese Yen, Russian Rouble, Singapore Dollar, Swiss Franc, Australian Dollar, South African Rand, Thai Baht, Korean Won etc.

(D) COMMODITY PRICE RISK

The Group is exposed to commodity price risk arising from the purchase of certain raw materials such as aluminium, copper, platinum and palladium. This risk is mitigated through the use of derivative contracts and fixed price contracts with suppliers. The derivative contracts do not qualify for hedge accounting as the commodity exposure does not meet the hedge accounting requirements of IAS 39.

The total fair value loss on commodities of £113 million (2015: loss of £38 million, 2014: loss of £18 million) has been recognised in other income in the consolidated income statement. The losses reported do not reflect the purchasing benefits received by the Group which are included within material and other cost of sales.

A 10 per cent appreciation/depreciation of all commodity prices underlying such contracts would have resulted in a gain/(loss) of £52 million (2015: £52 million, 2014: £36 million).

(E) INTEREST RATE RISK

Interest rate risk is the risk that changes in market interest rates will lead to changes in interest income and expense for the Group.

In addition to issuing long-term fixed-rate bonds, the Group has other facilities in place which are primarily used to finance working capital that are subject to variable interest rates. When undertaking a new debt issuance the Board will consider the fixed/floating interest rate mix of the Group, the outlook for future interest rates and the appetite for certainty of funding costs.

The risk estimates provided assume a parallel shift of 100 basis points interest rate across all yield curves. This calculation also assumes that the change occurs at the balance sheet date and has been calculated based on risk exposures outstanding as at that date. The year-end balances are not necessarily representative of the average debt outstanding during the year.

As of 31 March 2016 net financial liabilities of £116 million (2015: £156 million, 2014: £167 million) were subject to the variable interest rate. An increase/decrease of 100 basis points in interest rates at the balance sheet date would result in an impact of £1 million (2015: £2 million, 2014: £2 million) in the consolidated income statement and £nil (2015, 2014: £nil) in equity.

(F) LIQUIDITY RISK

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due.

The Group's policy on liquidity risk is to maintain sufficient liquidity in the form of cash and undrawn borrowing facilities to meet the Group's operating requirements with an appropriate level of headroom.

The following are the undiscounted contractual maturities of financial liabilities, including estimated interest payments:

As at 31 March 2016	Carrying amount	Contractual cash flows	1 year or less	1 to <2 years	2 to <5 years	5 years and over

(G) CREDIT RISK

The majority of the Group's credit risk pertains to the risk of financial loss arising from counterparty default on cash investments.

All Group cash is invested according to strict credit criteria and actively monitored by Group Treasury in conjunction with the current market valuation of derivative contracts. To support this, the Board has implemented an investment policy which places limits on the maximum cash investment that can be made with any single counterparty depending on their published external credit rating.

To a lesser extent the Group has an exposure to counterparties on trade receivables. The Group will seek to mitigate credit risk on sales to third parties through the use of payment at the point of delivery, credit insurance and letters of credit from banks which meet internal rating criteria.

None of the financial instruments of the Group result in material concentrations of credit risks.

EXPOSURE TO CREDIT RISK

The carrying amount of financial assets represents the maximum credit exposure.

FINANCIAL ASSETS

None of the Group's cash equivalents, including term deposits with banks, are past due or impaired. Regarding other financial assets that are neither past due nor impaired, there were no indications as at 31 March 2016 (2015, 2014: no indications) that defaults in payment obligations will occur.

Trade and other receivables past due and impaired are set out below:

As at 31 March	2016 Gross	2016 Impairment	2015 Gross	2015 Impairment	2014 Gross	2014 Impairment
	£m	£m	£m	£m	£m	£m
Not yet due.....	967	—	1,070	—	795	2
Overdue < 3 months.....	145	31	56	—	52	—
Overdue >3<6 months	22	22	4	2	4	—
Overdue >6 months.....	12	7	12	9	10	6
Total	1,146	60	1,142	11	861	8

Included within trade receivables is £116 million (2015: £156 million, 2014: £167 million) of receivables which are part of a debt factoring arrangement. These assets do not qualify for derecognition due to the recourse arrangements in place. The related liability of £116 million (2015: £156 million, 2014: £167 million) is in short-term borrowings. Both the asset and associated liability are stated at fair value.

35 LEASES

LEASES AS LESSEE

Non-cancellable finance lease rentals are payable as follows:

As at 31 March	2016	2015	2014
	£m	£m	£m
Less than one year	5	4	5
Between one and five years	5	9	13
More than five years	4	—	—
Total lease payments.....	14	13	18
Less future finance charges.....	(3)	—	—
Present value of lease obligations	11	13	18

The above leases relate to amounts payable under the minimum lease payments on plant and machinery. The Group leased certain of its manufacturing equipment under finance lease that mature between 2016 and 2030. The Group has options to purchase certain equipment for a nominal amount at the end of lease term.

Non-cancellable operating lease rentals are payable as follows:

As at 31 March	2016	2015	2014
	£m	£m	£m
Less than one year	49	47	26
Between one and five years	72	60	39
More than five years	33	26	18
Total lease payments	154	133	83

The Group leases a number of properties, plant and machinery, IT hardware and software under operating leases.

LEASES AS LESSOR

The future minimum lease receipts under non-cancellable operating leases are as follows:

As at 31 March	2016	2015	2014
	£m	£m	£m
Less than one year	2	2	4
Between one and five years	1	—	—
More than five years	10	—	—
Total lease receipts	13	2	4

The above leases relate to amounts receivable in respect of land and buildings and fleet car sales. The average lease life is less than one year.

36 ACQUISITION OF SUBSIDIARY

On 16 April 2015, the Group acquired 100 per cent of the share capital of Silkplan Limited, obtaining control of Silkplan Limited. The amounts recognised in respect of the assets acquired are set out in the table below.

	£m
Recognised amounts of assets acquired	
Property, plant and equipment	11
Total identifiable assets	11
Total consideration	11
Satisfied by:	
Cash	11
Total consideration transferred and cash outflow arising on acquisition	11

No goodwill arose on the acquisition. The Company contributed £nil revenue and £nil to the Group's profit for the period between the date of acquisition and the balance sheet date.

37 SEGMENT REPORTING

Operating segments are defined as components of the Group about which separate financial information is available that is evaluated regularly by the chief operating decision-maker, or decision-making group, in deciding how to allocate resources and in assessing performance.

The Group operates in the automotive segment. The automotive segment includes all activities relating to development, design, manufacture, assembly and sale of vehicles including financing thereof, as well as sale of related parts and accessories from which the Group derives its revenues. The Group has only one operating segment, so no separate segment report is given.

The geographic spread of sales and non-current assets is as disclosed below:

	<u>UK</u>	<u>US</u>	<u>China</u>	<u>Rest of Europe</u>	<u>Rest of World</u>	<u>Total</u>
	£m	£m	£m	£m	£m	£m
31 March 2016						
Revenue	4,529	4,344	4,930	4,109	4,296	22,208
Non-current assets	10,475	18	16	26	137	10,672
31 March 2015						
Revenue	3,564	3,112	7,595	3,200	4,395	21,866
Non-current assets	9,357	16	11	10	32	9,426
31 March 2014						
Revenue	2,989	2,683	6,687	2,978	4,049	19,386
Non-current assets	7,376	13	8	10	17	7,424

In the table above, non-current assets comprise of property, plant and equipment and intangible assets.

38 NOTES TO THE CONSOLIDATED CASH FLOW STATEMENT

(A) RECONCILIATION OF PROFIT BEFORE TAX TO CASH GENERATED FROM OPERATIONS

Provisions	143	131	180
Cash generated from operations	<u>3,726</u>	<u>4,016</u>	<u>3,824</u>

* Comparatives have been revised for the amendment made in the current year to separately disclose 'Unrealised loss on commodities', which has resulted in a reclassification of amounts from 'Other financial assets' and 'Other financial liabilities'. There is no impact on 'Cash generated from operations' as previously reported for the year ended 31 March 2015 or 31 March 2014.

(B) CASH FLOWS FROM/(USED IN) INVESTING ACTIVITIES

Purchases of property, plant and equipment and cash paid for intangible assets are presented net of £33 million (2015: £14 million, 2014: £7 million) of capital government grants received.

39 RELATED PARTY TRANSACTIONS

The Group's related parties principally consist of Tata Sons Limited, subsidiaries, associates and joint ventures of Tata Sons Limited which includes Tata Motors Limited (the ultimate parent Company), subsidiaries, associates and joint ventures of Tata Motors Limited. The Group routinely enters into transactions with these related parties in the ordinary course of business including transactions for the sale and purchase of products with its associates and joint ventures. Transactions and balances with the Group's own subsidiaries are eliminated on consolidation.

The following table summarises related party transactions and balances not eliminated in the consolidated financial statements. All related party transactions are conducted under normal terms of business. The amounts outstanding are unsecured and will be settled in cash.

	With joint ventures of the Group	With Tata Sons Limited and its subsidiaries and joint ventures	With immediate or ultimate parent and its subsidiaries, joint ventures and associates

* The 2015 and 2014 comparative balances for transactions with joint ventures have been restated, in order to fully reflect the transactions between all of the Group's joint venture interests.

COMPENSATION OF KEY MANAGEMENT PERSONNEL

Year ended 31 March	2016	2015	2014
	£m	£m	£m
Short-term benefits	16	17	18
Post-employment benefits.....	1	2	1
Share-based payments.....	2	7	3
Compensation for loss of office.....	—	1	—
Total compensation of key management personnel	19	27	22

In addition to the compensation noted above, a loan of £0.7 million was granted to a member of key management personnel in the year ended 31 March 2014. This loan is for a term of eight years and is interest bearing at the HMRC official rate.

Refer to note 31 for information on transactions with post-employment benefit plans.

40 ULTIMATE PARENT COMPANY AND PARENT COMPANY OF LARGER GROUP

The immediate parent undertaking is TML Holdings Pte. Ltd. (Singapore) and ultimate parent undertaking and controlling party is Tata Motors Limited, India which is the parent of the smallest and largest group to consolidate these financial statements.

Copies of the Tata Motors Limited, India consolidated financial statements can be obtained from the Group Secretary, Tata Motors Limited, Bombay House, 24, Homi Mody Street, Mumbai – 400001, India.

41 SUBSEQUENT EVENTS

In May 2016, the Company proposed an ordinary dividend of £150 million to its immediate parent TML Holdings Pte. Ltd. (Singapore). This amount was paid in full in June 2016.

In May 2016, the Group repaid early the remaining \$84 million Senior Notes due 2021 for a redemption premium of £2 million (see note 24).

In May 2016, a passenger airbag safety recall was announced in the United States by the National Highway Traffic System Administration (NHTSA) in respect of airbags from a supplier (Takata). Certain front-passenger airbags from Takata are installed in vehicles sold by the Group. The Group has considered this to be an adjusting Post Balance Sheet event and has recognised an additional provision of £67 million for the estimated cost of repairs in the Consolidated Income Statement for the year ended 31 March 2016. The provision is expected to be utilised between one to four years.

JAGUAR LAND ROVER AUTOMOTIVE PLC
Annual Report 2014-15

STATUTORY DISCLOSURES
DIRECTORS' REPORT

The directors present their report and the audited consolidated financial statements of the Company for the year ended 31 March 2015. Jaguar Land Rover Automotive plc ("Jaguar Land Rover") is a public limited company incorporated under the laws of England and Wales. The business address of the directors and senior management of Jaguar Land Rover is Abbey Road, Whitley, Coventry, CV3 4LF, United Kingdom.

FUTURE DEVELOPMENTS

Future developments impacting the Company are disclosed in the Strategic report on pages 66 to 81.

Dividends

The directors recommend a dividend of £150 million (£0.10 per ordinary share) which was paid in June 2015 (note, for each of the years ended 31 March 2014 and 2013, £150 million was paid in June 2014 and June 2013 respectively).

DIRECTORS

Biographies of the directors currently serving on the Board are set out on pages 84 and 85.

DIRECTORS' INDEMNITIES

The Company has made qualifying third-party indemnity provisions for the benefit of its Directors, which were made during the year end and remain in force at the date of this report.

CORPORATE GOVERNANCE STATEMENT

The Corporate Governance statement is set out on pages 88 and 91 and is incorporated by reference into this report.

CHARITABLE DONATIONS

The Company and those that work for it are involved in many charitable activities across the globe. It is the Company's strong belief that it should play an active role in the communities, both local and worldwide that the Company operates in. Given the number of charities and the need to assess the impact of any donations and potential tax consequences, the Company can only make contributions to a limited number of charitable causes that have been formally approved. As a result, no one is authorised to make any charitable contributions on behalf of the Company without the necessary approval.

POLITICAL INVOLVEMENT AND CONTRIBUTIONS

The Company respects an employee's right to use their own time and resources to participate as individual citizens in political and governmental activities of their choice. The Company itself operates under legal limitations on its ability to engage in political activities, and even where there are no legal restrictions, the Company does not typically make contributions to political candidates or political parties or permit campaigning on its property by political candidates (including those who work for Jaguar Land Rover) or persons working on their behalf. There have not been any political donations in any of the periods covered by these financial statements.

EMPLOYEE INFORMATION

The average number of employees within the Group is disclosed in note 5 to the consolidated financial statements on page 110.

Apart from ensuring that an individual has the ability to carry out a particular role, the Company does not discriminate in any way. It endeavours to retain employees if they become disabled, making reasonable adjustments to their

role and, if necessary, looking for redeployment opportunities within the Company. The Company also ensure that training, career development and promotion opportunities are available to all employees irrespective of gender, race, age or disability.

RESEARCH AND DEVELOPMENT

The Company is committed to an ongoing programme of expenditure on research and development activities as disclosed in note 9 on page 112 to the consolidated financial statements.

GOING CONCERN

The Company's business activities, together with the factors likely to affect its future development, performance and position are set out in the Strategic report. The financial position of the Company is described on pages 97 to 100. In addition, note 33 to the consolidated financial statements includes the Company's objectives, policies and processes for managing its exposures to interest rate risk, foreign currency risk, credit risk and liquidity risk. Details of the Company's financial instruments and hedging activities are also provided in note 33 to the consolidated financial statements.

The Board has a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. Accordingly, the financial statements set out on pages 96 to 155 have been prepared on the going concern basis.

FINANCIAL INSTRUMENTS

The disclosures required in relation to the use of financial instruments by the Company together with details of the Company's treasury policy and management are set out in note 33 to the consolidated financial statements.

AUDITORS

Deloitte LLP have indicated their willingness to continue as auditors and their re-appointment has been approved by the Audit Committee.

EVENTS AFTER THE BALANCE SHEET DATE

Full details of significant events since the balance sheet date are disclosed in note 38 to the consolidated financial statements.

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE DIRECTORS' REPORT AND THE FINANCIAL STATEMENTS

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements, International Accounting Standard 1 requires that directors:

- Properly select and apply accounting policies;
- Present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- Provide additional disclosures when compliance with the specific requirements in IFRS are insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance; and
- Make an assessment of the Company's ability to continue as a going concern.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

STATEMENT OF DISCLOSURE OF INFORMATION TO AUDITORS

In the case of each of the persons who are directors at the time when the report is approved under section 418 of the Companies Act, 2006 the following applies: so far as the directors are aware, there is no relevant audit information of which the Group's auditors are unaware; and the directors have taken necessary actions in order to make themselves aware of any relevant audit information and to establish that the Group's auditors are aware of that information.

ACKNOWLEDGEMENT

The directors wish to convey their appreciation to all employees for their continued commitment, effort and contribution in supporting the delivery of the Group's record performance. The directors would also like to extend thanks to all other key stakeholders for the continued support of the Company and their confidence in its management.

DIRECTORS' RESPONSIBILITY STATEMENT

The directors confirm to the best of our knowledge the financial statements, prepared in accordance with International Financial Reporting Standards as approved by the EU, give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company and the undertakings included in the consolidation taken as a whole.

By order of the Board,

Dr Ralf Speth,

Director
Jaguar Land Rover Automotive plc

28 July 2015

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF JAGUAR LAND ROVER AUTOMOTIVE PLC

We have audited the financial statements of Jaguar Land Rover Automotive plc for the year ended 31 March 2015 which comprise of the Consolidated Income Statement, the Consolidated Statement of Comprehensive Income, the Consolidated and Parent Company Balance Sheets, the Consolidated and Parent Company Cash Flow Statements, the Consolidated and Parent Company Statements of Changes in Equity and the related notes 1 to 53. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union and, as regards the parent Company financial statements, as applied in accordance with the provisions of the Companies Act 2006.

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

RESPECTIVE RESPONSIBILITIES OF DIRECTORS AND AUDITOR

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

SCOPE OF THE AUDIT OF THE FINANCIAL STATEMENTS

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the Group's and the parent Company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the Annual Report to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

OPINION ON FINANCIAL STATEMENTS

In our opinion:

- The financial statements give a true and fair view of the state of the Group's and of the parent Company's affairs as at 31 March 2015 and of the Group's profit for the year then ended;
- The Group financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union;
- The parent Company financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union and as applied in accordance with the provisions of the Companies Act 2006; and
- The financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

SEPARATE OPINION IN RELATION TO IFRSs AS ISSUED BY THE IASB

As explained in note 2 to the Group financial statements, the Group in addition to applying IFRSs as adopted by the European Union, has also applied IFRSs as issued by the International Accounting Standards Board (IASB).

In our opinion the Group financial statements comply with IFRSs as issued by the IASB.

OPINION ON OTHER MATTER PRESCRIBED BY THE COMPANIES ACT 2006

In our opinion the information given in the Strategic report and the Governance report for the financial year for which the financial statements are prepared is consistent with the financial statements.

MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- Adequate accounting records have not been kept by the parent Company, or returns adequate for our audit have not been received from branches not visited by us; or
- The parent Company financial statements are not in agreement with the accounting records and returns; or
- Certain disclosures of directors' remuneration specified by law are not made; or
- We have not received all the information and explanations we require for our audit.

Richard Knights

JAGUAR LAND ROVER AUTOMOTIVE PLC
Annual Report 2014-15

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 BACKGROUND AND OPERATIONS

Jaguar Land Rover Automotive PLC (“the Company”) and its subsidiaries, (collectively referred to as “the Group” or “JLR”), designs, manufactures and sells a wide range of automotive vehicles. The Company is a public limited company incorporated and domiciled in the UK. The address of its registered office is Abbey Road, Whitley, Coventry, CV3 4LF, United Kingdom.

The Company is a subsidiary of Tata Motors Limited, India (“TATA Motors”) and acts as an intermediate holding company for the Jaguar Land Rover business. The principal activity during the year was the design, development, manufacture and marketing of high-performance luxury saloons, specialist sports cars and four-wheel-drive off-road vehicles.

These consolidated financial statements have been prepared in Pound Sterling (“GBP”) and rounded to the nearest million GBP (£ million) unless otherwise stated. Results for the year ended and as at 31 March 2013 have been disclosed solely for the information of the users.

2 ACCOUNTING POLICIES

Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (referred to as “IFRS”) and IFRS Interpretation Committee (“IFRS IC”) interpretations as adopted by the European Union (“EU”) and the requirements of the United Kingdom Companies Act 2006 applicable to companies reporting under IFRS. In addition these consolidated financial statements also comply with IFRS as adopted by the International Accounting Standards Board (“IASB”) as no differences exist between IFRS as adopted by the EU applied by the Group and IFRS issued by the IASB.

The Company has taken advantage of s.408 of the Companies Act 2006 and therefore the separate financial statements of the Company do not include the income statement or the statement of comprehensive income of the Company on a stand-alone basis.

Basis of preparation

The consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments which are measured at fair value. Historical cost is generally based on the fair value of the consideration given in exchange for the assets. The principal accounting policies adopted are set out below.

Going concern

The directors have considered the financial position of the Group at 31 March 2015 (net assets of £6,040 million (2014: £5,864 million, 2013: £3,539 million)) and the projected cash flows and financial performance of the Group for at least 12 months from the date of approval of these financial statements as well as planned cost and cash improvement actions, and believe that the plan for sustained profitability remains on course.

The directors have taken actions to ensure that appropriate long-term cash resources are in place at the date of signing the accounts to fund Group operations. The directors have reviewed the financial covenants linked to the borrowings in place and believe these will not be breached at any point and that all debt repayments will be met.

Therefore the directors consider, after making appropriate enquiries and taking into consideration the risks and uncertainties facing the Group, that the Group has adequate resources to continue in operation as a going concern for the foreseeable future and is able to meet its financial covenants linked to the borrowings in place. Accordingly the directors continue to adopt the going concern basis in preparing these consolidated financial statements.

Basis of consolidation

Subsidiaries

The consolidated financial statements include Jaguar Land Rover Automotive plc and its subsidiaries. Subsidiaries are entities controlled by the Company. Control exists when the Company has power over the investee, is exposed or has rights to variable return from its involvement with the investee and has the ability to use its power to affect its returns. In assessing control, potential voting rights that currently are exercisable are taken into account. All subsidiaries of the Group given in note 39 are included in the consolidated financial statements.

Inter-company transactions and balances including unrealised profits are eliminated in full on consolidation.

Associates and joint ventures (equity accounted investees)

Associates are those entities in which the Group has significant influence, but not control or joint control. Significant influence is the power to participate in the financial and operating policy decisions of the investee and is presumed to exist when the Group holds between 20 and 50 percent of the voting power of another entity. Joint ventures are those entities over whose activities the Group has joint control, established by contractual agreement and requiring unanimous consent for decisions about the relevant activities of the entity, being those activities that significantly affect the entity's returns.

Associates and joint ventures are accounted for using the equity method and are recognised initially at cost. The Group's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Group's share of the income and expenses, other comprehensive income and equity movements of equity accounted investees, from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. When the Group's share of losses exceeds its interest in an equity accounted investee, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Group has an obligation or has made payments on behalf of the investee.

When the Group transacts with an associate or joint venture of the Group, profits and losses are eliminated to the extent of the Group's interest in its associate or joint venture.

Use of estimates and judgements

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are as follows:

- (i) Note 15—Property, plant and equipment—the Group applies judgement in determining the estimate useful life of assets.
- (ii) Note 16—Intangible assets—management applies significant judgement in establishing the applicable criteria for capitalisation of appropriate product development costs and impairment of indefinite life intangible assets. The key judgements in the impairment assessment include the determination of Cash Generating Units, value of cash flows and appropriateness of discount rates.
- (iii) Note 18—Deferred tax—management applies judgement in establishing the timing of the recognition of deferred tax assets relating to historic losses and assessing its recoverability and estimating taxes ultimately payable on remittance of overseas earnings.
- (iv) Note 25—Provision for product warranty—it is necessary for the Group to assess the provision for anticipated lifetime warranty and campaign costs. The valuation of warranty and campaign provisions requires a significant amount of judgement and the requirement to form appropriate assumptions around expected future costs.

- (v) Note 30—Retirement benefit obligation—it is necessary for actuarial assumptions to be made, including discount and mortality rates and the long-term rate of return upon scheme assets. The Group engages a qualified actuary to assist with determining the assumptions to be made when evaluating these liabilities.
- (vi) Note 33—Financial instruments—the Group enters into complex financial instruments and therefore appropriate accounting for these requires judgement around the valuations. Embedded derivatives relating to prepayment options on senior notes are not considered as closely related and are separately accounted unless the exercise price of these options is approximately equal on each exercise date to the amortised cost of the senior notes.

Revenue recognition

Revenue comprises the amounts invoiced to customers outside the Group and is measured at fair value of the consideration received or receivable, net of discounts, sales incentives, customer bonuses and rebates granted, which can be identified at the point of sale. Revenue is presented net of excise duty where applicable and other indirect taxes.

Revenue is recognised when the risks and rewards of ownership have been transferred to the customer and the amount of revenue can be reliably measured with it being probable that future economic benefits will flow to the Group. The transfer of the significant risks and rewards are defined in the underlying agreements with the customer.

No sale is recognised where, following disposal of significant risks and rewards, the Group retains a significant financial interest. The Group's interest in these items is retained in inventory, with a creditor being recognised for the contracted buy-back price. Income under such agreements, measured as the difference between the initial sale price and the buyback price, is recognised on a straight-line basis over the term of the agreement. The corresponding costs are recognised over the term of the agreement based on the difference between the item's cost, including estimated costs of resale, and the expected net realisable value.

If a sale includes an agreement for subsequent servicing or maintenance, the fair value of that service is deferred and recognised as income over the relevant service period in proportion with the expected cost pattern of the agreement.

Cost recognition

Costs and expenses are recognised when incurred and are classified according to their nature.

Expenditures are capitalised where appropriate in accordance with the policy for internally generated intangible assets and represent employee costs, stores and other manufacturing supplies, and other expenses incurred for product development undertaken by the Group.

Government grants and incentives

Government grants are recognised when there is reasonable assurance that the Group will comply with the relevant conditions and the grant will be received.

Government grants are recognised in the consolidated income statement on a systematic basis when the Group recognises, as expenses, the related costs that the grants are intended to compensate.

Government grants related to assets are deducted from the cost of the asset and amortised over the useful life of the asset. Government grants related to income are presented as an offset against the related expenditure and Government grants which are awarded as incentives with no ongoing performance obligations to the Group are recognised as other income in the period the grant is received.

Sales tax incentives received from governments are recognised in the income statement at the reduced tax rate and revenue is reported net of these sales tax incentives.

Foreign currency

The Company has a functional currency of GBP. The presentation currency of the consolidated financial statements is GBP.

The functional currency of the UK and non-UK selling operations is GBP being the primary economic environment that influences these operations. This is on the basis that management control is in the UK and that GBP is the currency that primarily determines sales prices and is the main currency for the retention of operating income. The functional currency of the Chery Jaguar Land Rover Automotive Company Ltd., the Group's principal joint venture, is Chinese Yuan ("CNY").

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Foreign currency denominated monetary assets and liabilities are remeasured into the functional currency at the exchange rate prevailing on the balance sheet date. Exchange differences are recognised in the consolidated income statement as Foreign exchange gain/(loss).

Income taxes

Income tax expense comprises current and deferred taxes. Income tax expense is recognised in the consolidated income statement, except when related to items that are recognised outside of profit or loss (whether in other comprehensive income or directly in equity, whereby tax is also recognised outside of profit or loss), or where related to the initial accounting for a business combination. In the case of a business combination the tax effect is included in the accounting for the business combination.

Current income taxes are determined based on respective taxable income of each taxable entity and tax rules applicable for respective tax jurisdictions.

Deferred tax assets and liabilities are recognised for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilised business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity and for each taxable jurisdiction. Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilised.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

Property, plant and equipment

Property, plant and equipment is stated at cost of acquisition or construction less accumulated depreciation and accumulated impairment, if any.

Freehold land is measured at cost and is not depreciated. Heritage assets are not depreciated as they are considered to have a residual value in excess of cost. Residual values are re-assessed on an annual basis. Annual impairment reviews for land and heritage assets are performed and any impairment in the carrying value is recognised immediately in the income statement.

Cost includes purchase price, non-recoverable taxes and duties, labour cost and direct overheads for self-constructed assets and other direct costs incurred up to the date the asset is ready for its intended use.

Interest cost incurred for constructed assets is capitalised up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

Depreciation is provided on a straight-line basis over the estimated useful lives of the assets. Estimated useful lives of the assets are as follows:

Class of property, plant and equipment	Estimated useful life (years)
Buildings.....	20 to 40
Plant and equipment	3 to 30
Computers.....	3 to 6
Vehicles	3 to 10
Furniture and fixtures	3 to 20

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

Depreciation is not recorded on assets under construction until construction and installation is complete and the asset is ready for its intended use. Assets under construction include capital prepayments.

Intangible assets

Acquired intangible assets

Intangible assets purchased, including those acquired in business combinations, are measured at acquisition cost which is the fair value on the date of acquisition, where applicable, less accumulated amortisation and accumulated impairment, if any. Intangible assets with indefinite lives are reviewed annually to determine whether indefinite-life assessment continues to be supportable. If not, the change in the useful-life assessment from indefinite to finite is made on a prospective basis.

For intangible assets with definite lives, amortisation is provided on a straight-line basis over the estimated useful lives of the acquired intangible assets as per the estimated amortisation periods below:

Class of intangible asset	Estimated amortisation period (years)
Patents and technological know-how.....	2 to 12
Customer-related—dealer network.....	20
Software.....	2 to 8
Intellectual property rights and other intangibles.....	Indefinite life

The amortisation for intangible assets with finite useful lives is reviewed at least at each year end. Changes in expected useful lives are treated as changes in accounting estimates.

Capital-work-in-progress includes capital advances.

Customer-related intangibles acquired in a business combination consist of dealer networks.

Intellectual property rights and other intangibles consist of brand names, which are considered to have indefinite lives due to the longevity of the brands.

Internally generated intangible assets

Research costs are charged to the consolidated income statement in the year in which they are incurred.

Product development costs incurred on new vehicle platforms, engines, transmission and new products are recognised as intangible assets, when feasibility has been established, the Group has committed technical, financial and other resources to complete the development and it is probable that the asset will generate probable future economic benefits.

The costs capitalised include the cost of materials, direct labour and directly attributable overhead expenditure incurred up to the date the asset is available for use.

Interest cost incurred is capitalised up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings if no specific borrowings have been incurred for the asset.

Product development cost is amortised over a period of between two and 10 years.

Capitalised development expenditure is measured at cost less accumulated amortisation and accumulated impairment loss.

Impairment

Property, plant and equipment and other intangible assets

At each balance sheet date, the Group assesses whether there is any indication that any property, plant and equipment and intangible assets may be impaired. If any such impairment indicator exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, or earlier, if there is an indication that the asset may be impaired.

The estimated recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the consolidated income statement.

Equity accounted investees: joint ventures and associates

The requirements of IAS 39 Financial Instruments: Recognition and Measurement are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in an associate or joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 Impairment of Assets as a single asset by comparing its recoverable amount (the higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and highly liquid investments with an original maturity of up to three months that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

Inventories

Inventories are valued at the lower of cost and net realisable value. Cost of raw materials and consumables are ascertained on a first-in first-out basis. Costs, including fixed and variable production overheads, are allocated to work-in-progress and finished goods determined on a full absorption cost basis. Net realisable value is the estimated selling price in the ordinary course of business less estimated cost of completion and selling expenses.

Inventories include vehicles sold subject to repurchase arrangements. These vehicles are carried at cost to the Group and are amortised in changes in stocks and work in progress to their residual values (i.e. estimated second-hand sale value) over the term of the arrangement.

Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a risk-free rate that reflects current market assessments of the time value of money and the risks specific to the liability. Provisions are held for product warranties, legal and product liabilities, residual risks and environmental risks as detailed in note 25 to the consolidated financial statements.

Product warranty

The Group offers warranty cover in respect of manufacturing defects, which become apparent within one to five years after purchase, dependent on the market in which the purchase occurred. The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future incidences based on actions on product failures. The discount on the warranty provision is calculated using a risk-free discount rate as the risks specific to the liability, such as inflation, are included in the base calculation. The timing of outflows will vary as and when a warranty claim will arise, being typically up to five years.

Long-Term Incentive Plan (LTIP)

The Group operates an LTIP arrangement for certain employees. The scheme provides a cash payment to the employee based on a specific number of phantom shares at grant date and the share price of Tata Motors Limited at the vesting date, subject to profitability and employment conditions. These are accounted for as cash settled arrangements, whereby a liability is recognised at fair value at the date of grant, using a Black Scholes model. At each balance sheet date until the liability is settled, the fair value of the liability is remeasured, with any changes in fair value recognised in the income statement.

Leases

At the inception of a lease, the lease arrangement is classified as either a finance lease or an operating lease, based on the terms and substance of the lease arrangement.

Assets taken on finance lease

A finance lease is recognised as an asset and a liability at the commencement of the lease, at the lower of the fair value of the asset and the present value of the minimum lease payments. Initial direct costs, if any, are also capitalised and, subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each year during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Assets taken on operating lease

Leases other than finance leases are operating leases, and the leased assets are not recognised on the Group's balance sheet. Payments made under operating leases are recognised in the consolidated income statement on a straight-line basis over the term of the lease in Other expenses.

Employee benefits

Pension plans

The Group operates several defined benefit pension plans, which are contracted out of the second state pension scheme. The assets of the plans are held in separate trustee administered funds. The plans provide for monthly pension after retirement as per salary drawn and service year as set out in the rules of each plan.

Contributions to the plans by the Group take into consideration the results of actuarial valuations. The plans with a surplus position at the balance sheet date have been limited to the maximum economic benefit available from unconditional rights to refund from the scheme or reduction in future contributions. Where the subsidiary group is considered to have a

contractual obligation to fund the pension plan above the accounting value of the liabilities, an onerous obligation is recognised.

The UK defined benefit schemes were closed to new joiners in April 2010.

A separate defined contribution plan is available to new employees of Jaguar Land Rover. Costs in respect of this plan are charged to the income statement as incurred.

For defined benefit retirement benefit schemes, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each reporting period.

Remeasurement comprising actuarial gains and losses, the effect of the asset ceiling and the return on scheme assets (excluding interest) are recognised immediately in the balance sheet with a charge or credit to the statement of comprehensive income in the period in which they occur. Remeasurement recorded in the statement of comprehensive income is not recycled.

Past service cost, including curtailment gains and losses, is generally recognised in profit or loss in the period of scheme amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability.

Defined benefit costs are split into three categories:

- Current service cost, past-service cost and gains and losses on curtailments and settlements;
- Net interest cost; and
- Remeasurement.

The Group presents these defined benefit costs within Employee costs in the consolidated income statement (see note 5).

Post-retirement Medicare scheme

Under this unfunded scheme, employees of some subsidiaries receive medical benefits subject to certain limits of amount, periods after retirement and types of benefits, depending on their grade and location at the time of retirement. Employees separated from the Group as part of an Early Separation Scheme, on medical grounds or due to permanent disablement are also covered under the scheme. The applicable subsidiaries account for the liability for the post-retirement medical scheme based on an annual actuarial valuation.

Actuarial gains and losses

Actuarial gains and losses relating to retirement benefit plans are recognised in other comprehensive income in the year in which they arise. Actuarial gains and losses relating to long-term employee benefits are recognised in the consolidated income statement in the year in which they arise.

Measurement date

The measurement date of all retirement plans is 31 March.

Financial instruments

Classification, initial recognition and measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified into categories: financial assets at fair value through profit or loss (which can either be held for trading or designated as fair value options), held-to-maturity investments, loans and receivables and available-for-sale financial assets. Financial liabilities are classified into financial liabilities at fair value

through profit or loss and other financial liabilities. No financial instruments have been designated as fair value through profit or loss using the fair value option or have been classified as held to maturity.

Financial instruments are recognised on the balance sheet when the Group becomes a party to the contractual provisions of the instrument.

Initially, a financial instrument is recognised at its fair value. Transaction costs directly attributable to the acquisition or issue of financial instruments are recognised in determining the carrying amount, if it is not classified as at fair value through profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

Financial assets and financial liabilities at fair value through profit or loss—held for trading: Derivatives, including embedded derivatives separated from the host contract, are classified into this category. Financial assets and liabilities are measured at fair value with changes in fair value recognised in the consolidated income statement with the exception of those derivatives which are designated as cash flow hedging instruments and for which hedge accounting is applied.

Loans and receivables: Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and which are not classified as financial assets at fair value through profit or loss or financial assets available-for-sale. Subsequently, these are measured at amortised cost using the effective interest method less any impairment losses. These include cash and cash equivalents, trade receivables, finance receivables and other financial assets.

Available-for-sale financial assets: Available-for-sale financial assets are those non-derivative financial assets that are either designated as such upon initial recognition or are not classified in any of the other financial assets categories. Subsequently, these are measured at fair value and changes therein are recognised in other comprehensive income, net of applicable deferred income taxes, and accumulated in the investments revaluation reserve with the exception of impairment losses, interest calculated using the effective interest method and foreign exchange gains and losses on monetary assets, which are recognised directly in profit or loss. The Group does not hold any available-for-sale financial assets.

Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured, are measured at cost.

Equity instruments

An equity instrument is any contract that evidences residual interests in the assets of the Group after deducting all of its liabilities. Equity instruments issued by the Group are recorded at the proceeds received, net of direct issue costs.

Other financial liabilities

These are measured at amortised cost using the effective interest method.

Determination of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Subsequent to initial recognition, the Group determines the fair value of financial instruments that are quoted in active markets using the quoted bid prices (financial assets held) or quoted ask prices (financial liabilities held) and using valuation techniques for other instruments. Valuation techniques include discounted cash flow method and other valuation models.

Derecognition of financial assets and financial liabilities

The Group de-recognises a financial asset only when the contractual rights to the cash flows from the asset expires or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to

pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities are de-recognised when they are extinguished, that is when the obligation is discharged, cancelled or has expired.

When a financial instrument is de-recognised, the cumulative gain or loss in equity is transferred to the consolidated income statement.

Impairment of financial assets

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset, other than those at fair value through profit or loss, or a group of financial assets is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

Loans and receivables: Objective evidence of impairment includes default in payments with respect to amounts receivable from customers. Impairment loss in respect of loans and receivables is calculated as the difference between their carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Such impairment loss is recognised in the consolidated income statement. If the amount of an impairment loss decreases in a subsequent year, and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. The reversal is recognised in the consolidated income statement.

Equity investments: A significant or prolonged decline in the fair value of the security below its cost is also evidence that the assets are impaired. If any such evidence exists the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss is removed from equity and recognised in profit and loss. Impairment losses recognised in the consolidated income statement on equity instruments are not reversed through the consolidated income statement.

Hedge accounting

The Group uses foreign currency forward contracts and options to hedge its risks associated with foreign currency fluctuations relating to highly probable forecast transactions. The Group designates these forward contracts and options in a cash flow hedging relationships by applying the hedge accounting principles.

These forward contracts and options are stated at fair value on the consolidated balance sheet at each reporting date. Changes in the fair value of these forward contracts and options that are designated and effective as hedges of future cash flows are recognised in other comprehensive income (net of tax), and any ineffective portion is recognised immediately in the consolidated income statement. Amounts accumulated in other comprehensive income are reclassified to the consolidated income statement in the periods in which the forecasted transactions affect profit or loss.

For options, the time value is not a designated component of the hedge, and therefore all changes in fair value related to the time value of the instrument are recognised immediately in the consolidated income statement.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. For forecast transactions, any cumulative gain or loss on the hedging instrument recognised in other comprehensive income is retained there until the forecast transaction affects profit or loss.

If the forecast transaction is no longer expected to occur, the net cumulative gain or loss recognised in other comprehensive income is immediately transferred to the consolidated income statement.

New accounting pronouncements

In the current year, the Group adopted/early adopted the following standards, revisions and amendments to standards and interpretations:

Amendments were made to IAS 27 Separate Financial Statements, IFRS 10 Consolidated Financial Statements and IFRS 12 Disclosure of Interests in Other Entities in October 2012 to provide “investment entities” an exemption from the consolidation of particular subsidiaries and instead require that an investment entity measure the investment in each eligible

subsidiary at fair value through profit or loss in accordance with IFRS 9 Financial Instruments or IAS 39 Financial Instruments: Recognition and Measurement. The amendment did not have a significant impact on the Group financial statements.

IAS 32 Financial Instruments: Presentation was amended in December 2011 to clarify certain aspects because of diversity in the application of the requirements of offsetting. The amendments focused on four main areas: the meaning of “currently has a legally enforceable right of set-off”; the application of simultaneous realisation and settlement; the offsetting of collateral amounts; and the unit of account for applying the offsetting requirements. The amendment did not have a significant impact on the Group financial statements.

IAS 39 Financial instruments: Recognition and measurement was amended in June 2013 and considers legislative changes to “over-the counter” derivatives and the establishment of central counterparties. Under IAS 39, novation of derivatives to central counterparties would result in the discontinuance of hedge accounting. The amendment provides relief from discontinued hedge accounting when novation of a hedging instrument meets specific criteria. The Group has applied the amendment and there has been no significant impact on the Group financial statements.

IFRIC 21 Levies was issued in May 2013 to provide guidance on when to recognise a liability for a levy imposed by a government, both for levies that are accounted for in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets and those where the timing and amount of the levy is certain. The Interpretation identifies the obligating event for the recognition of a liability as the activity that triggers the payment of the levy in accordance with the relevant legislation. The Group is not currently subjected to material levies.

In addition, as part of the IASB’s Annual Improvements, a number of minor amendments have been made to standards in the 2010-2012 and 2011-2013 cycle. These amendments are effective for annual periods commencing on or after 1 July 2014, with early application permitted. These amendments did not have a significant impact on the Group financial statements.

The following pronouncements, issued by the IASB and endorsed by the EU, are not yet effective and have not yet been adopted by the Group. The Group is evaluating the impact of these pronouncements on the consolidated financial statements:

IAS 19 Employee Benefits was amended in November 2013 to clarify the requirements that relate to how contributions from employees or third parties that are linked to service should be attributed to periods of service. In addition, it permits a practical expedient if the amount of the contributions is independent of the number of years of service, in that contributions, can, but are not required, to be recognised as a reduction in the service cost in the period in which the related service is rendered. The amendment is effective for annual periods beginning on or after 1 July 2014, with early adoption permitted.

The following pronouncements, issued by the IASB, have not yet been endorsed by the EU, are not yet effective and have not yet been adopted by the Group. The Group is evaluating the impact of these pronouncements on the consolidated financial statements:

IAS 16 Property, Plant and Equipment has been amended to prohibit entities from using a revenue based depreciation method for items of property, plant and equipment. IAS 38 introduces a rebuttable presumption that revenue is not an appropriate basis for amortising intangible assets. The amendment is effective for annual periods beginning on or after 1 January 2016, with early adoption permitted.

IFRS 11 Joint Arrangements addresses how a joint operator should account for the interest in a joint operation in which the activity of the joint operation constitutes a business. The amendment is effective for annual periods beginning on or after 1 January 2016, with early adoption permitted.

IFRS 9 Financial Instruments addresses the classification, measurement and recognition of financial assets and financial liabilities. The complete version of IFRS 9 was issued in July 2014. It replaces the guidance in IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through other comprehensive income and fair value through profit or loss. The basis of classification depends on the entity’s business model and contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in other comprehensive income not recycling. There is now a new expected credit losses model that replaces the incurred loss model

used in IAS 39. For financial liabilities there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. IFRS 9 relaxes the requirements for hedge effectiveness by replacing the bright line hedge effectiveness tests. It requires an economic relationship between the hedged item and the hedging instrument and for the “hedged ratio” to be the same as the one management actually use for the risk management process. Contemporaneous document is still required but is different to that currently prepared under IAS 39. The standard is effective for accounting periods beginning on or after 1 January 2018. Early adoption is permitted subject to EU endorsement.

IFRS 15 Revenue from Contracts with Customers deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity’s contracts with customers. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 Revenue and IAS 11 Construction Contracts and related interpretations. The standard is effective for annual periods beginning on or after 1 January 2017 and earlier application is permitted subject to EU endorsement. The Group is assessing the impact of IFRS 15.

In addition, as part of the IASB’s Annual Improvements, a number of minor amendments have been made to standards in the 2012–2014 cycles. These amendments are effective for annual periods beginning on or after 1 July 2014, with early application permitted.

3 REVENUE

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Sale of goods	21,866	19,386	15,784

6 DIRECTORS' EMOLUMENTS

<u>Year ended 31 March</u>	<u>2015</u>	<u>2014</u>	<u>2013</u>
	<u>£m</u>	<u>£m</u>	<u>£m</u>
Directors' emoluments.....	4,401,059	3,059,210	2,097,405

The aggregate of emoluments and amounts receivable under the Long-Term Incentive Plan (LTIP) of the highest paid director was £2,824,297 (2014: £2,433,578, 2013: £1,905,298). In addition, for the highest paid director, pension benefits of £1,475,732 (2014: £524,000, 2013: £836,000) have accrued in the year. During the year, the highest paid director did not receive any LTIP awards.

No directors received any LTIP cash payments during the years ended 31 March 2013, 2014 and 2015.

7 LONG-TERM INCENTIVE PLAN (LTIP)

The Group operates a LTIP arrangement for certain employees. The scheme provides a cash payment to the employee based on a specific number of phantom shares at grant date and the share price of Tata Motors Limited at the vesting date. The cash payment is dependent on the achievement of internal profitability targets over the three-year vesting period and continued employment at the end of the vesting period. The cash payment has no exercise price and therefore the weighted average exercise price in all cases is £nil.

<u>Year ended 31 March</u>	<u>2015</u>	<u>2014</u>	<u>2013</u>
Outstanding at the beginning of the year	5,353,559	4,217,801	2,934,435
Granted during the year	2,315,618	1,956,741	1,935,130
Vested in the year	(1,654,917)	(778,599)	(491,029)
Forfeited in the year	(377,018)	(42,384)	(160,735)
Outstanding at the end of the year	5,637,242	5,353,559	4,217,801

The weighted average share price of the 1,654,917 phantom stock awards vesting in the year was £5.89 (2014: £4.45, 2013: £4.18).

The weighted average remaining contractual life of the outstanding awards is 1.3 years (2014: 1.3 years, 2013: 1.5 years).

The amount charged in the year in relation to the Long-Term Incentive Plan was £16 million (2014: £11 million, 2013: £5 million). The fair value of the balance sheet liability in respect of phantom stock awards outstanding at the year end was £23 million (2014: £17 million, 2013: £10 million).

The fair value of the awards was calculated using a Black Scholes model at the grant date. The fair value is updated at each reporting date as the awards are accounted for as cash settled under IFRS 2 Share-based Payment. The inputs into the model are based on the Tata Motors Limited historic data and the risk-free rate is calculated on government bond rates. The inputs used are:

As at 31 March	2015	2014	2013
Risk-free rate (%)	0.49	0.91	0.26
Dividend yield (%)	0.39	0.49	1.57
Weighted average fair value per phantom share	£ 6.14	£ 4.95	£ 3.74

8 OTHER EXPENSES

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Stores, spare parts and tools.....	123	114	81
Freight cost	673	610	437
Works, operations and other costs	1,808	1,538	1,303
Repairs	37	17	11
Power and fuel	57	62	57
Rent, rates and other taxes	57	41	33

Total Other expenses	4,109	3,717	3,075

9 RESEARCH AND DEVELOPMENT

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Total research and development costs incurred.....	1,411	1,266	1,058
Research and development expensed.....	(253)	(236)	(198)
Development costs capitalised.....	1,158	1,030	860
Interest capitalised	114	102	110
Research and development expenditure credit.....	(69)	(45)	—
Total internally developed intangible additions.....	1,203	1,087	970

During the year ended 31 March 2014 legislation was enacted to allow UK companies to elect for the Research and Development Expenditure Credit (RDEC) on qualifying expenditure incurred since 1 April 2013, instead of the previous super- deduction rules. In the year ended 31 March 2015, as a result of this election, £66 million (2014: £45 million) of the RDEC, the proportion relating to capitalised product development expenditure, has been offset against the cost of the respective assets. The remaining £30 million (2014: £18 million) of the RDEC has been recognised as other income.

10 FINANCE INCOME AND EXPENSE

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Finance income.....	48	38	34
Total finance income.....	48	38	34
Total interest expense on financial liabilities measured at amortised cost.....	(234)	(257)	(176)
Unwind of discount on provisions	(17)	6	1
Interest capitalised	116	113	110
Total interest expense.....	(135)	(138)	(65)
Embedded derivative value.....	—	(47)	47

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Total finance expense (net)	(135)	(185)	(18)

The capitalisation rate used to calculate borrowing costs eligible for capitalisation was 5.8 percent (2014: 7.2 percent, 2013: 8.0 percent).

During the year ended 31 March 2015, the Group tendered two tranches of debt (see note 23) and as a result a redemption premium of £77 million was incurred.

During the year ended 31 March 2014, the Group repaid two tranches of debt (see note 23) and as a result a redemption premium of £56 million was incurred and the fair value of the embedded derivatives was expensed in full.

11 PROFIT BEFORE TAX

Expense/(income) included in profit before tax for the year are the following:

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Foreign exchange loss/(gain) on loans.....	178	(87)	37
Foreign exchange loss/(gain) on derivatives.....	166	(57)	11
Unrealised loss/(gain) on commodities.....	30	7	(1)
Depreciation of property, plant and equipment	461	386	274
Amortisation of intangible assets.....			
(excluding internally generated development costs).....	64	44	52
Amortisation of internally generated development costs.....	526	445	296
Operating lease rentals in respect of plant, property and equipment	48	42	26
Loss on disposal of property, plant, equipment and software.....	7	4	2
Auditor remuneration (see below)	4	4	3

During the year ended 31 March 2015, £132 million (2014: £91 million) was received by a foreign subsidiary as an indirect tax incentive that requires the subsidiary to meet certain criteria relating to vehicle efficiency and investment in engineering and research and development. The incentive is provided as a partial offset to the higher sales taxes payable following implementation of new legislation in the year ended 31 March 2014. £132 million (2014: £88 million) has been recognised in revenue and £nil (2014: £3 million) has been deferred to offset against capital expenditure, when incurred.

The following table sets out the auditor remuneration for the year (rounded to the nearest £0.1 million):

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Fees payable to the Company's auditor for the audit of the Company's annual accounts	0.1	0.1	0.1
Fees payable to the Company's auditor and their associates for other services to the Group—audit of the Company's subsidiaries	3.3	2.9	2.7
Total audit fees	3.4	3.0	2.8
Audit related assurance services	0.3	0.3	0.2
Other assurance services	0.7	0.5	0.3
Total non-audit fees	1.0	0.8	0.5
Total audit and related fees	4.4	3.8	3.3

Fees payable to Deloitte LLP and their associates for non-audit services to the Group are not required to be disclosed separately as these fees are disclosed on a consolidated basis.

12 TAXATION

Recognised in the income statement

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Current tax expense			
Current year	350	348	306
Adjustments for prior years	15	9	(20)
Current tax expense.....	365	357	286
Deferred tax expense/(credit)			
Origination and reversal of temporary differences	294	330	138
Adjustments for prior years	(83)	(11)	28
Rate change.....	—	(54)	8
Deferred tax expense	211	265	174
Total income tax expense	576	622	460

Prior year adjustments relate to differences between prior year estimates of tax position and current revised estimates or submission of tax computations.

Recognised in the statement of comprehensive income

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Deferred tax credit on actuarial gains on retirement benefits	(71)	(31)	(80)
Deferred tax (credit)/expense on change in fair value of cash flow hedges.....	(363)	214	(53)
Deferred tax expense on rate change	—	15	7
	(434)	198	(126)
Total tax expense.....	142	820	334

Reconciliation of effective tax rate

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Profit for the year	2,038	1,879	1,214
Total income tax expense	576	622	460
Profit before tax	2,614	2,501	1,674
Income tax expense using the tax rates applicable to individual entities of 22.7% (2014: 23.6%, 2013: 24.2%)	593	590	405
Enhanced deductions for research and development	—	—	(33)
Non-deductible expenses	28	15	11
Differences between current and deferred tax rates applicable.....	(18)	—	—
Changes in tax rate.....	—	(54)	8
Overseas unremitted earnings	40	71	57
Share of loss from joint ventures	1	2	3
(Over)/under provided in prior years	(68)	(2)	9
Total income tax expense	576	622	460

Included within the line (Over)/under provided in prior years for March 2015 is a reversal of £62 million relating to withholding tax released as a result of changes in tax rates and laws expected to apply to the future repatriation of inter-company dividends.

The UK Finance Act 2013 was enacted during the year ended 31 March 2014 which included provisions for a reduction in the UK corporation tax rate from 23 percent to 21 percent with effect from 1 April 2014 and to 20 percent with effect from 1 April 2015. Accordingly, UK deferred tax has been provided at 20 percent (2014: 20 percent, 2013: 23 percent), as the majority of the temporary differences are expected to reverse at that rate.

13 INVESTMENTS

Investments consist of the following:

As at 31 March	2015	2014	2013
	£m	£m	£m
Equity accounted investees	280	145	60

The Group has the following investments at 31 March 2015:

Name of investment	Proportion of voting rights	Principal place of business and country of incorporation	Principal activity
Trading investments			
Jaguar Land Rover Schweiz AG	10.0%	Switzerland	Sale of automotive vehicles and parts
Equity accounted investments			
Jaguar Cars Finance Limited	49.9%	England & Wales	Non-trading
Spark44 (JV) Limited	50.0%	England & Wales	Provision of advertising services
Chery Jaguar Land Rover Automotive Company Ltd.	50.0%	China	Manufacture and assembly of vehicles

Except for Spark44 (JV) Limited, the proportion of voting rights disclosed in the table above is the same as the interest in the ordinary share capital. The Group has an interest in 55.2 percent of the total ordinary share capital of Spark44 (JV) Limited, however this share capital is divided into A and B ordinary shares (the Group holds 100 percent of the B shares), with each class of share having the same voting rights and interest in returns and therefore Spark44 (JV) Limited is considered a joint venture.

Chery Jaguar Land Rover Automotive Company Ltd. is a limited liability company, whose legal form confirms separation between the parties to the joint arrangement. There is no contractual arrangement or any other facts or circumstances that indicate that the parties to the joint venture have rights to the assets and obligations for the liabilities of the joint arrangement. Accordingly, Chery Jaguar Land Rover Automotive Company Ltd. is classified as a joint venture.

During the year ended 31 March 2013, the Company invested a 50 percent stake in Suzhou Chery Jaguar Land Rover Trading Co. Limited for £1 million and a 50 percent stake in Chery Jaguar Land Rover Automotive Company Ltd. for £70 million. During the year ended 31 March 2014, Suzhou Chery Jaguar Land Rover Trading Co. Limited, previously a direct joint venture of the Group, was acquired in full by Chery Jaguar Land Rover Automotive Company Ltd. Therefore, the results shown of Chery Jaguar Land Rover Automotive Company Ltd. are the consolidated results for that entity, which includes the results of Suzhou Chery Jaguar Land Rover Trading Co. Limited. In the year ended 31 March 2015, the Group has increased its investment in Chery Jaguar Land Rover Automotive Company Ltd. by £124 million (2014: £92 million).

No dividend was received in the year (2014, 2013: no dividend) from any of the trading investments or equity accounted investments. Trading investments are held at cost of £270,000 (2014: £270,000, 2013: £270,000). All joint ventures are accounted for using the equity method and are private companies and there are no quoted market prices available for their shares.

The following table sets out the summarised financial information in aggregate for the share of investments in equity accounted investees that are not individually material:

As at 31 March	2015	2014	2013
	£m	£m	£m
Group's share of profit/(loss) for the year	1	1	(2)
Group's share of other comprehensive income	—	—	—
Group's share of total comprehensive income/(expense)	1	1	(2)

As at 31 March	2015	2014	2013
	£m	£m	£m
Carrying amount of the Group's interest	3	2	(1)

The following table sets out the summarised financial information of the Group's individually material joint venture, Chery Jaguar Land Rover Automotive Company Ltd.

As at 31 March	2015	2014	2013
	£m	£m	£m
Current assets.....	520	170	136

Impairment testing

The directors are of the view that the operations of the Group represent a single cash generating unit. The intellectual property rights are deemed to have an indefinite useful life on the basis of the expected longevity of the brand names.

The recoverable amount of the cash generating unit has been calculated with reference to its value in use. The key assumptions of this calculation are shown below:

As at 31 March	2015	2014	2013
Period on which management approved forecasts are based	5 years	5 years	5 years
Growth rate applied beyond approved forecast period	2.2%	0%	0%
Pre-tax discount rate	11.2%	10.9%	10.2%

The growth rates used in the value in use calculation reflect those inherent within the Board's business plan which is primarily a function of the Group's cycle plan assumptions, past performance and management's expectation of future market developments, approved by the Board through to 2019/20. The cash flows are then extrapolated into perpetuity assuming a growth rate of 2.2 percent (2014: nil percent, 2013: nil percent).

No reasonably possible change in any of the key assumptions would cause the recoverable amount calculated above to be less than the carrying value of the assets of the cash generating unit.

* Included within £21 million is a reversal of £39 million relating to withholding tax incurred on inter-company dividends paid in the year.

** For balance sheet presentation purposes, deferred tax assets and deferred tax liabilities are offset to the extent they relate to the same taxation authority and are expected to be settled on a net basis.

The Group continued to recognise all deferred tax assets at 31 March 2013 in view of the continued profitability of the companies in which the deferred tax assets arise.

All deferred tax assets and deferred tax liabilities at 31 March 2013 are non-current.

19 CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of the following:

As at 31 March	2015	2014	2013
	£m	£m	£m
Cash and cash equivalents	3,208	2,260	2,072

At 31 March 2015 and 31 March 2014 all cash held by the Group can be utilised across the Group's manufacturing and sales operations. The restrictions on cash reported in the year ended 31 March 2013 of £524 million related to amounts held in China which could not be utilised by other Group companies due to the exchange controls in place. In the year ended 31 March 2014, these exchange controls were relaxed by the Chinese authorities to allow the lending of surplus cash held in China if certain criteria are met.

20 ALLOWANCES FOR TRADE AND OTHER RECEIVABLES

Changes in the allowances for trade and other receivables are as follows:

Year ended 31 March	2015	2014	2013
	£m	£m	£m
At beginning of year	8	10	13
Change in allowance during the year	3	(1)	(1)
Written off	—	(1)	(2)
At end of year	11	8	10

21 INVENTORIES

As at 31 March	2015	2014	2013
	£m	£m	£m
Raw materials and consumables	80	75	52
Work in progress.....	298	211	197
Finished goods.....	2,038	1,888	1,546
Total inventories	2,416	2,174	1,795

Inventories of finished goods include £187 million (2014: £174 million, 2013: £171 million), relating to vehicles sold to rental car companies, fleet customers and others with guaranteed repurchase arrangements.

Cost of inventories (including cost of purchased products) recognised as an expense during the year amounted to £15,041 million (2014: £13,421 million, 2013: £11,151 million).

During the year, the Group recorded inventory write-down expense of £40 million (2014: £24 million, 2013: £33 million). The write-down is included in material and other cost of sales. No previous write-downs have been reversed in any period.

22 ACCOUNTS PAYABLE

As at 31 March	2015	2014	2013
	£m	£m	£m
Trade payables	3,483	3,154	2,628

EURO MTF listed debt

The bonds are listed on the EURO MTF market, which is a listed market regulated by the Luxembourg Stock Exchange. Details of the tranches of the bonds outstanding at 31 March 2015 are as follows:

- \$84 million Senior Notes due 2021 at a coupon of 8.125 percent per annum—issued May 2011;
- £58 million Senior Notes due 2020 at a coupon of 8.250 percent per annum—issued March 2012;
- \$500 million Senior Notes due 2023 at a coupon of 5.625 percent per annum—issued January 2013;
- \$700 million Senior Notes due 2018 at a coupon of 4.125 percent per annum—issued December 2013;
- £400 million Senior Notes due 2022 at a coupon of 5.000 percent per annum—issued January 2014;
- \$500 million Senior Notes due 2019 at a coupon of 4.250 percent per annum—issued October 2014;
- £400 million Senior Notes due 2023 at a coupon of 3.875 percent per annum—issued February 2015;
- \$500 million Senior Notes due 2020 at a coupon of 3.500 percent per annum—issued March 2015.

The bond funds raised during the year were used to repay both long-term and short-term debt and provide additional cash facilities for the Group.

Details of the tranches of the bonds repaid in the year ended 31 March 2015 are as follows:

- \$326 million Senior Notes due 2021 at a coupon of 8.125 percent per annum—issued May 2011;
- £442 million Senior Notes due 2020 at a coupon of 8.250 percent per annum—issued March 2012.

Details of the tranches of the bonds repaid in the year ended 31 March 2014 are as follows:

- £500 million Senior Notes due 2018 at a coupon of 8.125 percent per annum—issued May 2011;
- \$410 million Senior Notes due 2018 at a coupon of 7.75 percent per annum—issued May 2011.

The contractual cash flows of interest bearing debt and borrowings as of 31 March 2015 are set out below, including estimated interest payments and assumes the debt will be repaid at the maturity date.

As at 31 March	2015	2014	2013
	£m	£m	£m

PRODUCT WARRANTY PROVISION

The Group offers warranty cover in respect of manufacturing defects, which become apparent within one to five years after purchase, dependent on the market in which the purchase occurred. The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future incidences based on actions on product failures. The discount on the warranty provision is calculated using a risk-free discount rate as the risks specific to the liability, such as inflation, are included in the base calculation. The timing of outflows will vary as and when a warranty claim will arise, being typically up to five years.

LEGAL AND PRODUCT LIABILITY PROVISION

A legal and product liability provision is maintained in respect of known litigation which impacts the Group, but for which the amount and timing are uncertain. The provision primarily relates to motor accident claims, consumer complaints, dealer terminations, employment cases and personal injury claims.

RESIDUAL RISK PROVISION

In certain markets, the Group is responsible for the residual risk arising on vehicles sold by dealers on a leasing arrangement. The provision is based on the latest available market expectations of future residual value trends that may change over time. The timing of the outflows will be at the end of the lease arrangements—being typically up to three years.

ENVIRONMENTAL RISK PROVISION

This provision relates to various environmental remediation costs such as asbestos removal and land clean up. The timing of when these costs will be incurred is not known with certainty.

26 OTHER LIABILITIES

29 DIVIDENDS

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Dividend proposed for the previous year paid during the year of £0.10 (2014: £0.10, 2013: £nil) per ordinary share	150	150	—
Dividend for the year paid during the year of £nil (2014: £nil, 2013: £0.10) per ordinary share	—	—	150
Amounts recognised as distributions to equity holders during the year	150	150	150
Proposed dividend for the year of £0.10 (2014: £0.10, 2013: £0.10) per ordinary share..	150	150	150

The proposed dividend for the year ended 31 March 2015 was paid in full in June 2015. Preference shares of £157 million were repaid in the year ended 31 March 2013, along with preference share dividends of £14 million.

30 EMPLOYEE BENEFITS

The Group operates defined benefit schemes for qualifying employees of certain of its subsidiaries. The defined benefit schemes are administered by a separate fund that is legally separated from the Company. The trustee of the pension schemes is required by law to act in the interest of the fund and of all relevant stakeholders in the scheme, is responsible for the investment policy with regard to the assets of the schemes and all other governance matters. The board of the trustee must be composed of representatives of the Company and scheme participants in accordance with each scheme's regulations.

Under the schemes, the employees are entitled to post-retirement benefits based on their length of service and salary. Through its defined benefit pension schemes the Group is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility

The scheme liabilities are calculated using a discount rate set with references to corporate bond yields; if scheme assets under perform these corporate bonds, this will create or increase a deficit. The defined benefit schemes hold a significant proportion of equity type assets, which are expected to outperform corporate bonds in the long term although introducing volatility and risk in the short term.

As the schemes mature, the Group intends to reduce the level of investment risk by investing more in assets that better match the liabilities.

However, the Group believes that due to the long-term nature of the scheme liabilities and the strength of the supporting group, a level of continuing equity type investments is an appropriate element of the Group's long-term strategy to manage the schemes efficiently.

Changes in bond yields

A decrease in corporate bond yields will increase scheme liabilities, although this is expected to be partially offset by an increase in the value of the schemes' bond holdings and interest rate hedging instruments.

Inflation risk

Some of the Group pension obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect the scheme against extreme

inflation). The schemes hold a significant proportion of assets in index linked gilts, together with other inflation hedging instruments and also assets which are more loosely correlated with inflation. However an increase in inflation will also increase the deficit to some degree.

Life expectancy

The majority of the scheme's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the scheme's liabilities. This is particularly significant in the UK defined benefit schemes, where inflationary increases result in higher sensitivity to changes in life expectancy.

The following tables set out the disclosures pertaining to the retirement benefit amounts recognised in the financial statements:

Change in present value of defined benefit obligation

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Defined benefit obligation at beginning of year	6,053	6,021	4,916

Change in onerous obligation, excluding amounts included in interest expense	—	—	94
Remeasurement loss on defined benefit obligation	(355)	(135)	(346)

Amounts recognised in the consolidated balance sheet consist of:

As at 31 March	2015	2014	2013
	£m	£m	£m
Present value of unfunded defined benefit obligations	(1)	(1)	(1)
Present value of funded defined benefit obligations	(7,882)	(6,052)	(6,020)
Fair value of scheme assets.....	6,997	5,382	5,365
Restriction of pension asset recognised (as per IFRIC 14)	(1)	(3)	(1)
Net retirement benefit obligation	(887)	(674)	(657)
Presented as non-current liability.....	(887)	(674)	(657)

The most recent actuarial valuations of scheme assets and the present value of the defined benefit liability for accounting purposes were carried out at 31 March 2015 by a qualified independent actuary. The present value of the defined benefit liability, and the related current service cost and past service cost, were measured using the projected unit credit method.

The principal assumptions used in accounting for the pension schemes are set out below:

Year ended 31 March	2015	2014	2013
	%	%	%
Discount rate	3.4	4.6	4.4
Expected rate of increase in compensation level of covered employees.....	3.6	3.9	3.9
Inflation increase	3.1	3.4	3.4

For the valuation at 31 March 2015, 2014 and 2013, the mortality assumptions used are the SAPS base table, in particular S1NxA tables and the Light table for members of the Jaguar Executive Pension Plan. A scaling factor of 115 percent has been used for the Jaguar Pension Plan, 110 percent for the Land Rover Pension Scheme, and 105 percent for males and 90 percent for females for Jaguar Executive Pension Plan. There is an allowance for future improvements in line with the CMI (2014) projections (2014: CMI (2013) projections, 2013: CMI (2012) projections) and an allowance for long-term improvements of 1.25 percent per annum.

The assumed life expectations on retirement at age 65 are:

As at 31 March	2015	2014	2013
	years	years	years
Retiring today:			
Males.....	21.4	20.0	22.2
Females.....	23.9	24.5	24.6
Retiring in 20 years:			
Males.....	23.1	23.8	23.9
Females.....	25.8	26.4	26.6

The below sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the pension liability recognised within the statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous periods.

Assumption	Change in assumption	Impact on scheme liabilities	Impact on service cost
Discount rate.....	Increase/decrease by 0.25%	Decrease/increase by £482 million	Decrease/increase by £17 million
Inflation rate	Increase/decrease by 0.25%	Increase/decrease by £432 million	Increase/decrease by £16 million
Mortality.....	Increase/decrease by 1 year	Increase/decrease by £212 million	Increase/decrease by £6 million

The fair value of scheme assets is represented by the following major categories:

* Quoted prices for identical assets or liabilities in active markets.

The split of level 1 assets is 59 percent (2014: 79 percent, 2013: 82 percent), level 2 assets 37 percent (2014: 20 percent, 2013: 17 percent) and level 3 assets 4 percent (2014: 1 percent, 2013: 1 percent).

The Group has agreed that it will aim to eliminate the pension scheme funding deficits over the next seven years. Funding levels are monitored on an annual basis and the current agreed contribution rate is 22.3 percent of pensionable salaries in the UK. The next triennial valuation is due to be completed by 5 June 2016 and will reflect the position as at 5 April 2015. The Group considers that the contribution rates set at the last valuation date are sufficient to eliminate the deficit over the agreed period and that regular contributions, which are based on service costs, will not increase significantly.

The average duration of the benefit obligation at 31 March 2015 is 23.5 years (2014: 22.5 years, 2013: 22.5 years).

The expected net periodic pension cost for the year ended 31 March 2016 is £260 million. The Group expects to contribute £9 million to its schemes in the year ended 31 March 2016.

Defined contribution fund

The Group's contribution to defined contribution plans for the year ended 31 March 2015 was £33 million (2014: £23 million, 2013: £12 million).

31 COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Group faces claims and assertions by various parties. The Group assesses such claims and assertions and monitors the legal environment on an ongoing basis, with the assistance of external legal counsel wherever necessary. The Group records a liability for any claims where a potential loss is probable and capable of being estimated and discloses such matters in its financial statements, if material. For potential losses that are considered possible, but not probable, the Group provides disclosure in the financial statements but does not record a liability in its accounts unless the loss becomes probable. Such potential losses may be of an uncertain timing and/or amount.

The following is a description of claims and assertions where a potential loss is possible, but not probable. Management believes that none of the contingencies described below, either individually or in aggregate, would have a material adverse effect on the Group's financial condition, results of operations or cash flows.

LITIGATION

The Group is involved in legal proceedings, both as plaintiff and as defendant, and there are claims as at 31 March 2015 of £11 million (2014: £27 million, 2013: £16 million) against the Group which management has not recognised as they are not considered probable. The majority of these claims pertain to motor accident claims and consumer complaints. Some of the cases also relate to the replacement of parts of vehicles and/or compensation for deficiency in the services by the Group or its dealers.

OTHER TAXES AND DUES

The Group had no significant tax matters in dispute at 31 March 2015 (31 March 2014: £nil, 31 March 2013: £nil) where a potential loss was considered possible.

During the year the Group's Brazilian subsidiary has received a demand for £35 million in relation to additional indirect taxes (PIS and COFINS) claimed as being due on local vehicle and parts sales made in 2010. The matter is currently being contested before the Brazilian appellate authorities. Professional legal opinions obtained in Brazil fully support that the basis of the tax authority's assertion is incorrect and, as a result, the likelihood of any settlement ultimately having to be made is considered remote.

COMMITMENTS

The Group has entered into various contracts with vendors and contractors for the acquisition of plant and machinery, equipment and various civil contracts of capital nature aggregating to £814 million (2014: £940 million, 2013: £288 million).

The Group has entered into various contracts with vendors and contractors which include obligations aggregating to £642 million (2014: £717 million, 2013: £887 million) to purchase minimum or fixed quantities of material and other procurement commitments.

Commitments related to leases are set out in note 34.

Inventory of £nil (2014: £nil, 2013: £nil) and trade receivables with a carrying amount of £156 million (2014: £167 million, 2013: £242 million) and property, plant and equipment with a carrying amount of £nil (2014: £nil, 2013: £nil) and restricted cash with a carrying amount of £nil (2014: £nil, 2013: £110 million) are pledged as collateral/security against the borrowings and commitments.

There are guarantees provided in the ordinary course of business of £nil.

Stipulated within the joint venture agreement for Chery Jaguar Land Rover Automotive Company Ltd. is a commitment for the Group to contribute a total of CNY 3,500 million of capital, of which CNY 2,875 million has been

contributed as at 31 March 2015. The outstanding commitment of CNY 625 million translates to £57 million at year-end exchange rates.

32 CAPITAL MANAGEMENT

The Group's objectives when managing capital are to ensure the going concern operation of its entities and to maintain an efficient capital structure to reduce the cost of capital, support the corporate strategy and to meet shareholder expectations.

The Group's policy is to borrow primarily through capital market debt issues to meet anticipated funding requirements and maintain sufficient liquidity. The Group also maintains certain undrawn committed credit facilities to provide additional liquidity. These borrowings, together with cash generated from operations, are loaned internally or contributed as equity to certain subsidiaries as required. Surplus cash in subsidiaries is pooled (where practicable) and invested to satisfy security, liquidity and yield requirements.

The capital structure is governed according to Group policies approved by the Board and is monitored by various metrics such as debt to Adjusted EBITDA and Adjusted EBITDA to interest ratios, as per the debt covenants and rating agency guidance. Funding requirements are reviewed periodically with any debt issuances and capital distributions approved by the Board.

The following table summarises the capital of the Group:

As at 31 March	2015	2014	2013
	£m	£m	£m
Short-term debt	160	172	333
Long-term debt	2,390	1,856	1,857
Total debt*	2,550	2,028	2,190
Equity.....	6,040	5,864	3,539
Total capital	8,590	7,892	5,729

* Total debt includes finance lease obligations of £13 million (2014: £18 million, 2013: £23 million).

33 FINANCIAL INSTRUMENTS

This section gives an overview of the significance of financial instruments for the Group and provides additional information on balance sheet items that contain financial instruments.

The details of significant accounting policies, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in note 2 to the consolidated financial statements.

(A) FINANCIAL ASSETS AND LIABILITIES

The following table shows the carrying amounts and fair value of each category of financial assets and liabilities as at 31 March 2015:

Financial assets

	Loans and receivables	Derivatives in cash flow hedging relationship	Fair value through profit and loss	Total carrying value	Total fair value
	£m	£m	£m	£m	£m

Offsetting

Certain financial assets and financial liabilities are subject to offsetting where there is currently a legally enforceable right to set off recognised amounts and the Group intends to either settle on a net basis, or to realise the asset and settle the liability simultaneously.

Derivative financial assets and financial liabilities are subject to master netting arrangements whereby in the case of insolvency, derivative financial assets and financial liabilities can be settled on a net basis.

The following table discloses the amounts that have been offset in arriving at the balance sheet presentation and the amounts that are available for offset only under certain conditions as at 31 March 2015:

	Gross amount recognised	Gross amount of recognised set off in the balance sheet	Net amount presented in the balance sheet	Gross amount not offset in the balance sheet	Cash collateral (received)/ pledged	Net amount after offsetting
	£m	£m	£m	£m	£m	£m

Fair value hierarchy

Financial instruments held at fair value are required to be measured by reference to the following levels.

- Quoted prices in an active market (Level 1): This level of hierarchy includes financial instruments that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Valuation techniques with observable inputs (Level 2): This level of hierarchy includes financial assets and liabilities measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);
- Valuation techniques with significant unobservable inputs (Level 3): This level of hierarchy includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

There has been no change in the valuation techniques adopted or any transfers between fair value levels.

The financial instruments that are measured subsequent to initial recognition at fair value are classified as Level 2 fair value measurements, as defined by IFRS 13, being those derived from inputs other than quoted prices that are observable. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. Fair value of forward derivative financial assets and liabilities are estimated by discounting expected future contractual cash flows using prevailing market interest rate curves from Reuters. Commodity swap contracts are similarly fair valued by discounting expected future contractual cash flows. Option contracts on foreign currency are entered

into on a zero cost collar basis and fair value estimates are calculated from standard Black Scholes options pricing methodology, using prevailing market interest rates and volatilities.

Additionally, a Credit Valuation Adjustment (CVA) is taken on derivative financial assets and liabilities and is calculated by discounting the fair value gain or loss on the financial derivative using credit default swap (CDS) prices quoted for the counterparty or Jaguar Land Rover respectively. CDS prices are obtained from Bloomberg.

The long-term unsecured listed bonds are held at amortised cost. Its fair value for disclosure purposes is determined using Level 1 valuation techniques, based on the closing price at 31 March 2015 on the EURO MTF market.

Fair values of cash and cash equivalents, short-term deposits, trade receivables and payables, short-term borrowings and other financial assets and liabilities (current and non-current excluding derivatives) are assumed to approximate to cost due to the short-term maturing of the instruments and as the impact of discounting is not significant.

At 31 March 2015, the fair value of prepayment options of £nil (2014: £nil, 2013: £47 million) related to the GBP 500 million and USD 410 million senior notes due 2018 which were bifurcated but were repaid early in the year ended 31 March 2014. The fair value represents the difference in the traded market price of the bonds and the expected price the bonds would trade at if they did not contain any prepayment features. The expected price is based on market inputs including credit spreads and interest rates.

Management uses its best judgement in estimating the fair value of its financial instruments. However, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented above are not necessarily indicative of all the amounts that the Group could have realised in a sales transaction as of respective dates. The estimated fair value amounts as of 31 March 2015, 31 March 2014 and 31 March 2013 have been measured as of the respective dates. As such, the fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each year end.

(B) FINANCIAL RISK MANAGEMENT

As discussed in the Management report under the section Business Risks and Mitigating factors, the Group is exposed to foreign currency exchange rate, commodity price, interest rate, liquidity and credit risks. The Group has a risk management framework in place which monitors all of these risks.

(C) FOREIGN CURRENCY EXCHANGE RATE RISK

The fluctuation in foreign currency exchange rates may have potential impact on the consolidated income statement, the consolidated statement of comprehensive income, the consolidated balance sheet, the consolidated cash flow statement and the consolidated statement of changes in equity, where any transaction references more than one currency or where assets/ liabilities are denominated in a currency other than the functional currency of the respective consolidated entities.

Considering the countries and economic environment in which the Group operates, its operations are subject to risks arising from fluctuations in exchange rates in those countries. The risks primarily relate to fluctuations in US Dollar, Chinese Yuan and Euro against the functional currency of the Company and its subsidiaries.

The Group uses foreign currency contracts to hedge its risk associated with foreign currency fluctuations relating to highly probable forecast transactions. The fair value of such contracts as of 31 March 2015 was a net liability of £1,263 million (2014: net asset of £673 million, 2013: net liability of £254 million).

Cash flow hedges are expected to be recognised in profit or loss during the years ending 31 March 2016 to 2020. The Group also has a number of foreign currency options which are entered into as an economic hedge of the financial risks of the Group. The time value of options is excluded from the hedge relationship and thus the change in time value is recognised immediately in the income statement.

Changes in the fair value of foreign currency contracts to the extent determined to be an effective hedge are recognised in the statement of other comprehensive income and the ineffective portion of the fair value change is recognised in the income statement. Accordingly, the fair value change of net loss of £1,768 million (2014: gain of £1,041 million, 2013: loss of £288 million) was recognised in other comprehensive income. The loss due to hedge ineffectiveness where forecast transactions are no longer expected to occur was £5 million (2014: gain of £5 million, 2013: loss of £1 million) which has

been recognised in foreign exchange gain/(loss) in the consolidated income statement. The loss on derivative contracts not eligible for hedging was £161 million (2014: gain of £57 million, 2013: loss of £11 million) which has been recognised in foreign exchange (loss)/gain in the consolidated income statement.

A 10 percent depreciation/appreciation of the foreign currency underlying such contracts would have resulted in an approximate additional gain/(loss) of £1,251 million/(£1,382) million (2014: £734 million/(£893) million, 2013: £612 million/ (£831) million) in equity and a gain/(loss) of £165 million/(£91) million (2014: £51 million/(£31) million, 2013: £35 million/£28 million) in the consolidated income statement.

In addition to using derivative contracts to economically hedge future purchases in US Dollars, the Group issues bonds denominated in US Dollars to give a degree of natural hedging of future sales revenues.

The following table sets forth information relating to foreign currency exposure as of 31 March 2015:

As at 31 March 2015	US Dollar	Chinese Yuan	Euro	*Others	Total
	£m	£m	£m	£m	£m
Financial assets	727	742	483	312	2,264
Financial liabilities.....	(2,139)	(756)	(1,098)	(182)	(4,175)
Net exposure asset/(liability)	(1,412)	(14)	(615)	130	(1,911)

A 10 percent appreciation/depreciation of the US Dollar, Chinese Yuan and Euro would result in an increase/decrease in the Group's net profit before tax and total equity by approximately £141 million, £1 million and £62 million respectively for the year ended 31 March 2015.

The following table sets forth information relating to foreign currency exposure as of 31 March 2014:

As at 31 March 2014	US Dollar	Chinese Yuan	Euro	*Others	Total
	£m	£m	£m	£m	£m
Financial assets	463	840	296	335	1,934
Financial liabilities.....	(1,594)	(715)	(1,322)	(285)	(3,915)
Net exposure asset/(liability)	(1,131)	125	(1,026)	50	(1,981)

A 10 percent appreciation/depreciation of the US Dollar, Chinese Yuan and Euro would result in an increase/decrease in the Group's net profit before tax and total equity by approximately £113 million, £13 million and £103 million respectively for the year ended 31 March 2014.

The following table sets forth information relating to foreign currency exposure as of 31 March 2013:

As at 31 March 2013	US Dollar	Chinese Yuan	Euro	*Others	Total
	£m	£m	£m	£m	£m
Financial assets	332	667	259	393	1,651
Financial liabilities.....	(1,266)	(659)	(1,113)	(328)	(3,366)
Net exposure asset/(liability)	(934)	8	(854)	65	(1,715)

* Others include Japanese Yen, Russian Rouble, Singapore Dollar, Swiss Franc, Australian Dollar, South African Rand, Thai Baht, Korean Won etc.

A 10 percent appreciation/depreciation of the US Dollar, Chinese Yuan and Euro would result in an increase/decrease in the Group's net profit before tax and total equity by approximately £93 million, £1 million and £85 million respectively for the year ended 31 March 2013.

(D) COMMODITY PRICE RISK

The Group is exposed to commodity price risk arising from the purchase of certain raw materials. This risk is mitigated through the use of derivative contracts and fixed price contracts with suppliers. The derivative contracts do not qualify for hedge accounting as the commodity exposure does not meet the hedge accounting requirements of IAS39.

The total loss on commodities of £38 million (2014: loss of £18 million, 2013: loss of £10 million) has been recognised in other income in the consolidated income statement.

A 10 percent depreciation/appreciation of all commodity prices underlying such contracts would have resulted in a gain/(loss) of £52 million (2014: £36 million, 2013: £17 million).

(E) INTEREST RATE RISK

Interest rate risk is the risk that changes in market interest rates will lead to changes in interest income and expense for the Group.

In addition to issuing long-term fixed-rate bonds, the Group has other facilities in place which are primarily used to finance working capital that are subject to variable interest rates. When undertaking a new debt issuance the Board will consider the fixed/floating interest rate mix of the Group, the outlook for future interest rates and the appetite for certainty of funding costs.

The risk estimates provided assume a parallel shift of 100 basis points interest rate across all yield curves. This calculation also assumes that the change occurs at the balance sheet date and has been calculated based on risk exposures outstanding as at that date. The year-end balances are not necessarily representative of the average debt outstanding during the year.

As of 31 March 2015 net financial liabilities of £156 million (2014: £167 million, 2013: £220 million) were subject to the variable interest rate. Increase/decrease of 100 basis points in interest rates at the balance sheet date would result in an impact of £2 million (2014: £2 million, 2013: £2 million) in the consolidated income statement.

The Group is also exposed to interest rate risk with regard to the reported fair value of the prepayment options.

At 31 March 2015, had interest rates been 25 basis points higher/lower with all other variables constant, consolidated profit for the year would be £nil lower/£nil higher (2014: £nil lower/£nil higher, 2013: £9 million lower/£9 million higher), mainly as a result of higher/lower finance expense.

(F) LIQUIDITY RISK

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due.

The Group's policy on liquidity risk is to maintain sufficient liquidity in the form of cash and undrawn borrowing facilities to meet the Group's operating requirements with an appropriate level of headroom.

The following are the undiscounted contractual maturities of financial liabilities, including estimated interest payments:

As at 31 March 2015	Carrying amount	Contractual cash flows	1 year or less	1 to <2 years	2 to <5 years	5 years and over
	£m	£m	£m	£m	£m	£m

Total contractual maturities	7,054	8,111	5,144	276	537	2,154

(G) CREDIT RISK

The majority of the Group's credit risk pertains to the risk of financial loss arising from counterparty default on cash investments.

All Group cash is invested according to strict credit criteria and actively monitored by Group Treasury in conjunction with the current market valuation of derivative contracts. To support this, the Board has implemented an investment policy which places limits on the maximum cash investment that can be made with any single counterparty depending on their published external credit rating.

To a lesser extent the Group has an exposure to counterparties on trade receivables. The Group will seek to mitigate credit risk on sales to third parties through the use of payment at the point of delivery, credit insurance and letters of credit from banks which meet internal rating criteria.

None of the financial instruments of the Group result in material concentrations of credit risks.

EXPOSURE TO CREDIT RISK

The carrying amount of financial assets represents the maximum credit exposure.

FINANCIAL ASSETS

None of the Group's cash equivalents, including term deposits with banks, are past due or impaired. Regarding other financial assets that are neither past due nor impaired, there were no indications as at 31 March 2015 (2014, 2013: no indications) that defaults in payment obligations will occur.

Trade and other receivables past due and impaired are set out below:

As at 31 March	2015	2015	2014	2014	2013	2013
	Gross	Impairment	Gross	Impairment	Gross	Impairment
	£m	£m	£m	£m	£m	£m
Not yet due.....	1,070	—	795	2	837	—
Overdue < 3 months.....	56	—	52	—	95	1
Overdue >3<6 months.....	4	2	4	—	19	2
Overdue >6 months.....	12	9	10	6	11	7
Total.....	1,142	11	861	8	962	10

Included within trade receivables is £156 million (2014: £167 million, 2013: £242 million) of receivables which are part of a debt factoring arrangement. These assets do not qualify for derecognition due to the recourse arrangements in place. The related liability of £156 million (2014: £167 million, 2013: £242 million) is in short-term borrowings. Both the asset and associated liability are stated at fair value.

34 LEASES

LEASES AS LESSEE

Non-cancellable finance lease rentals are payable as follows:

As at 31 March	2015	2014	2013
	£m	£m	£m
Less than one year.....	4	5	5
Between one and five years.....	9	13	16
More than five years.....	—	—	2
Total lease payments.....	13	18	23

The above leases relate to amounts payable under the minimum lease payments on plant and machinery. The Group leased certain of its manufacturing equipment under finance lease. The average lease term is eight years. The Group has options to purchase certain equipment for a nominal amount at the end of lease term.

Non-cancellable operating lease rentals are payable as follows:

As at 31 March	2015	2014	2013
	£m	£m	£m
Less than one year.....	47	26	8
Between one and five years.....	60	39	16
More than five years.....	26	18	10
Total lease payments.....	133	83	34

The Group leases a number of properties and plant and machinery under operating leases.

LEASES AS LESSOR

The future minimum lease receipts under non-cancellable operating leases are as follows:

As at 31 March	2015	2014	2013
	£m	£m	£m
Less than one year.....	2	4	4
Between one and five years.....	—	—	—
More than five years.....	—	—	—
Total lease receipts.....	2	4	4

The above leases relate to amounts receivable in respect of land and buildings and fleet car sales. The average lease life is less than one year.

35 SEGMENT REPORTING

Operating segments are defined as components of the Group about which separate financial information is available that is evaluated regularly by the chief operating decision-maker, or decision-making group, in deciding how to allocate resources and in assessing performance.

The Group operates in the automotive segment. The automotive segment includes all activities relating to development, design, manufacture, assembly and sale of vehicles including financing thereof, as well as sale of related parts and accessories from which the Group derives its revenues. The Group has only one operating segment, so no separate segment report is given.

The geographic spread of sales and non-current assets is as disclosed below:

	<u>UK</u>	<u>US</u>	<u>China</u>	<u>Rest of Europe</u>	<u>Rest of World</u>	<u>Total</u>
	£m	£m	£m	£m	£m	£m
31 March 2015						
Revenue	3,564	3,112	7,595	3,200	4,395	21,866
Non-current assets	9,357	16	11	10	32	9,426
31 March 2014						
Revenue	2,989	2,683	6,687	2,978	4,049	19,386
Non-current assets	7,376	13	8	10	17	7,424
31 March 2013						
Revenue	2,606	2,137	5,161	2,514	3,366	15,784
Non-current assets	5,814	14	4	10	15	5,857

In the table above, non-current assets excludes equity accounted investees, financial assets, pension assets and deferred tax assets.

36 RELATED PARTY TRANSACTIONS

The Group's related parties principally consist of Tata Sons Limited, subsidiaries, associates and joint ventures of Tata Sons Limited which includes Tata Motors Limited (the ultimate parent Company), subsidiaries, associates and joint ventures of Tata Motors Limited. The Group routinely enters into transactions with these related parties in the ordinary course of business including transactions for sale and purchase of products with its associates and joint ventures. Transactions and balances with the Group's own subsidiaries are eliminated on consolidation.

The following table summarises related party transactions and balances not eliminated in the consolidated financial statements.

	<u>With joint ventures of the Group</u>	<u>With Tata Sons Limited and its subsidiaries and joint ventures</u>	<u>With immediate or ultimate parent and its subsidiaries and joint ventures</u>
	£m	£m	£m
31 March 2015

Compensation of key management personnel

Year ended 31 March	2015	2014	2013
	£m	£m	£m
Short-term benefits.....	24	21	12
Post-employment benefits.....	2	1	—
Compensation for loss of office.....	1	—	—
Total compensation of key management personnel.....	27	22	12

In addition to the compensation noted above, a loan of £0.7 million was granted to a member of key management personnel in the year ended 31 March 2014. This loan is for a term of eight years and is interest bearing at the HMRC official rate.

Refer to note 30 for information on transactions with post-employment benefit plans.

37 ULTIMATE PARENT COMPANY AND PARENT COMPANY OF LARGER GROUP

The immediate parent undertaking is TML Holdings Pte. Ltd. (Singapore) and ultimate parent undertaking and controlling party is Tata Motors Limited, India which is the parent of the smallest and largest group to consolidate these financial statements.

Copies of the Tata Motors Limited, India consolidated financial statements can be obtained from the Group Secretary, Tata Motors Limited, Bombay House, 24, Homi Mody Street, Mumbai—400001, India.

38 SUBSEQUENT EVENTS

In May 2015, the Company proposed an ordinary dividend of £150 million to its immediate parent TML Holdings Pte. Ltd. (Singapore). This amount was paid in full in June 2015.

Condensed Consolidated Income Statement

Net cash used in financing activities		(96)	(269)
Net decrease in cash and cash equivalents		(1,222)	(996)
Cash and cash equivalents at beginning of period		2,878	3,399
Effect of foreign exchange on cash and cash equivalents		(19)	44
Cash and cash equivalents at end of period		1,637	2,447

* Comparatives have been restated for the amendment to disclose separately 'Effect of foreign exchange on cash and cash equivalents' as a separate line item after 'Cash and cash equivalents at beginning of period'. The line items of 'Cash flows generated from operating activities before changes in assets and liabilities' in note 21 and 'Cash used in operations', 'Net cash used in operating activities', and 'Net decrease in cash and cash equivalents' in the consolidated cash flow statement were previously reported as £645 million, £(5) million (previously reported as Cash generated from operations), £54 million and £952 million for the period ended 30 June 2016. An adjustment of £44 million was recorded to those line items for the period ended 30 June 2016, to reflect the removal of the foreign exchange gain on cash and cash equivalents from those line items to present this amount separately as described above. The line items of 'Cash flows generated from operating activities before changes in assets and liabilities', 'Cash used in operations', 'Net cash used in operating activities', and 'Net decrease in cash and cash equivalents' were therefore restated as £601 million, £39 million, £98 million and £996 million for the period ended 30 June 2016. There is no impact on cash and cash equivalents as previously reported for the period ended 30 June 2016.

Notes (forming part of the condensed consolidated interim financial statements)

1 Accounting policies

Basis of preparation

The information for the three month period ended 30 June 2017 is unaudited and does not constitute statutory accounts as defined in Section 435 of the Companies Act 2006. The condensed consolidated interim financial statements of

Jaguar Land Rover Automotive plc have been prepared in accordance with International Accounting Standard 34, 'Interim Financial Reporting' under International Financial Reporting Standards ('IFRS') as adopted by the European Union ('EU').

The condensed consolidated interim financial statements have been prepared on a historical cost basis except for certain financial instruments held at fair value as highlighted in note 15.

The condensed consolidated interim financial statements should be read in conjunction with the annual consolidated financial statements for the year ended 31 March 2017, which were prepared in accordance with IFRS as adopted by the EU.

The condensed consolidated interim financial statements have been prepared on the going concern basis as set out within the directors' report of the Group's annual report for the year ended 31 March 2017.

The accounting policies applied are consistent with those of the annual consolidated financial statements for the year ended 31 March 2017, as described in those financial statements.

Change in presentation of foreign exchange gains and losses

During the quarter ended 31 March 2017, the Group reviewed the presentation of foreign exchange in the consolidated income statement following the continued increase in hedging activity, volatility in foreign exchange rates, and in anticipation of transition to IFRS 9.

As a result, it was considered more appropriate to present realised foreign exchange relating to derivatives hedging revenue exposures as an adjustment to "Revenue" and realised foreign exchange relating to derivatives hedging cost exposures as an adjustment to 'Material and other cost of sales'. The prior period comparatives have been represented on this basis. Realised foreign exchange losses of £106 million and £14 million have been adjusted to 'Revenue' and 'Material and other cost of sales' respectively for the period ended 30 June 2016.

There is no impact upon the reported profit after taxation or reported equity for the period ended 30 June 2016.

2 Exceptional item

The exceptional item within 'Material and other cost of sales' of £1 million for the quarter ended 30 June 2017 relates to the recovery of import duties and taxes following the explosion at the port of Tianjin (China) in August 2015 which led to a reversal of the initial provision recorded in the quarter ended 30 September 2015.

The exceptional item within "Material and other cost of sales" of £51 million for the quarter ended 30 June 2016 related to an interim payment of £50 million in relation to the vehicles involved in the Tianjin incident and £1 million due to achieving sales at a higher net realisable value than that estimated at 31 March 2016.

Due to the size of the provision recorded, the charge together with the associated tax impact was disclosed as an exceptional item in the year ended 31 March 2016.

3 Research and development

(£ millions)	Three months ended	
	30 June 2017	30 June 2016
	(unaudited)	(unaudited)

9 Taxation

Recognised in the income statement

The income tax for the three month period ended 30 June 2017 and 30 June 2016 is charged at the estimated effective tax rate expected to apply for the applicable financial year ends.

10 Capital expenditure

Capital expenditure in the three month period was £526 million (three month period to 30 June 2016: £260 million) on property, plant and equipment and £371 million (three month period to 30 June 2016: £345 million) was capitalised as intangible assets (excluding research and development expenditure credits). There were no impairments, material disposals or changes in use of assets.

11 Other financial liabilities

Closing balance	1,360	155	34	31	7	1,587

Product warranty provision

The Group offers warranty cover in respect of manufacturing defects, which become apparent one to five years after purchase, dependent on the market in which the purchase occurred and the vehicle purchased. The estimated liability for product warranty is recognised when products are sold or when new warranty programmes are initiated. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future warranty claims, customer goodwill and recall complaints. The discount on the warranty provision is calculated using a risk-free discount rate as the risks specific to the liability, such as inflation, are included in the base calculation. The timing of outflows will vary as and when a warranty claim will arise, being typically up to five years.

Legal and product liability provision

A legal and product liability provision is maintained in respect of compliance with regulations and known litigations that impact the Group. The provision primarily relates to motor accident claims, consumer complaints, dealer terminations, employment cases, personal injury claims and compliance with regulations. The timing of outflows will vary as and when claims are received and settled, which is not known with certainty.

Residual risk provision

In certain markets, the Group is responsible for the residual risk arising on vehicles sold by dealers on leasing arrangements. The provision is based on the latest available market expectations of future residual value trends. The timing of the outflows will be at the end of the lease arrangements, being typically up to three years.

Environmental liability provision

This provision relates to various environmental remediation costs such as asbestos removal and land clean-up. The timing of when these costs will be incurred is not known with certainty.

13 Other current liabilities

As at (£ millions)	30 June 2017	31 March 2017

Total debt	3,501	3,581

15 Financial Instruments

The condensed consolidated interim financial statements have been prepared on a historical cost basis except for certain financial instruments held at fair value. These financial instruments are classified as level 2 fair value measurements, as defined by IFRS 13, being those derived from inputs other than quoted prices which are observable. There have been no changes in the valuation techniques used or transfers between fair value levels from those set out in note 35 to the annual consolidated financial statements for the year ended 31 March 2017.

The following tables show the carrying amounts and fair value of each category of financial assets and liabilities.

As at (£ millions)	30 June 2017		31 March 2017	
	Carrying value	Fair value	Carrying value	Fair value

17 Dividends

During the three months ended 30 June 2017, an ordinary share dividend of £150 million was declared. £60 million of this amount was paid in June 2017 (three months to 30 June 2016: £150 million proposed and paid).

18 Employee benefits

The Group has pension arrangements providing employees with defined benefits related to pay and service as set out in the rules of each scheme. The following table sets out the disclosure pertaining to employee benefits of Jaguar Land Rover Limited and overseas subsidiaries which operate defined benefit pension schemes.

(£ millions)	Three months ended 30 June 2017 (unaudited)	Year ended 31 March 2017 (audited)
Change in defined benefit obligation		
Defined benefit obligation at beginning of the period	9,969	7,668
Current service cost	55	198
Past service credit	(437)	—
Interest expense	60	275
Actuarial (gains)/losses arising from:		
—Changes in demographic assumptions	—	(76)
—Changes in financial assumptions	(66)	2,335
—Experience adjustments	—	(213)
Exchange differences on foreign schemes	(1)	5

Interest income	55	258

(£ millions)	Three months ended 30 June 2017 (unaudited)	Year ended 31 March 2017 (audited)
Remeasurement (loss)/gain on the return of plan assets, excluding amounts included in interest income	(185)	1,149
Administrative expenses	(2)	(9)
Exchange differences on foreign schemes	(1)	3
Employer contributions	67	227
Member contributions	—	2
Benefits paid	(101)	(225)
Fair value of scheme assets at end of period.....	8,341	8,508
Amount recognised in the consolidated balance sheet consist of		
Present value of defined benefit obligations	(9,479)	(9,969)
Fair value of scheme assets	8,341	8,508
Net liability	(1,138)	(1,461)
Non-current liabilities	(1,138)	(1,461)

The range of assumptions used in accounting for the pension plans in both periods is set out below:

	Three months ended 30 June 2017 (unaudited)	Year ended 31 March 2017 (audited)
Discount rate	2.6%	2.6%
Expected rate of increase in compensation level of covered employees.....	2.3%	3.7%
Inflation rate	3.2%	3.2%

For the valuations at 30 June 2017 and 31 March 2017, the mortality assumptions used are the SAPS base table, in particular S2NxA tables and the Light table for members of the Jaguar Executive Pension Plan. A scaling factor of 120% for males and 110% for females has been used for the Jaguar Pension Plan, 115% for males and 105% for females for the Land Rover Pension Scheme, and 95% for males and 85% for females for the Jaguar Executive Pension Plan. There is an allowance for future improvements in line with the CMI (2014) projections with an allowance for long-term improvements of 1.25% per annum.

The Group noted that on 27 March 2017, a new mortality projection model (CMI (2016)) was released that potentially indicated a small reduction in longevity of, on average, 0.5 years compared to current assumptions. The Group considered adopting the new mortality tables and noted that there was uncertainty about the appropriate level of initial mortality improvements, both for the general population and when applying the model to other populations. On this basis, following discussion with and recommendation by the Group's pension advisor, it is considered that the CMI (2014) mortality tables represent the Group's best estimate of the future longevity of its defined benefit schemes' members both during and after employment as at 30 June 2017.

On 3 April 2017, the Group approved and communicated to its defined benefit schemes' members that the defined benefit schemes' rules were to be amended with effect from 6 April 2017 so that, among other changes, retirement benefits will be calculated on a career average basis rather than based upon a member's final salary at retirement. As a result of the remeasurement of the schemes' liabilities, a past service credit of £437 million has arisen and was recognised in the three month period ended 30 June 2017.

19 Commitments and contingencies

In the normal course of business, the Group faces claims and assertions by various parties. The Group assesses such claims and assertions and monitors the legal environment on an ongoing basis, with the assistance of external legal counsel wherever necessary. The Group records a liability for any claims where a potential loss is probable and capable of being estimated and discloses such matters in its financial statements, if material. For potential losses that are considered possible, but not probable, the Group provides disclosure in the consolidated financial statements but does not record a liability unless the loss becomes probable. Such potential losses may be of an uncertain timing and/or amount.

The following is a description of claims and contingencies where a potential loss is possible, but not probable. Management believes that none of the contingencies described below, either individually or in aggregate, would have a material adverse effect on the Group's financial condition, results of operations or cash flows.

Litigation and product related matters

The Group is involved in legal proceedings, both as plaintiff and as defendant. There are claims and potential claims of £15 million (31 March 2017: £7 million) against the Group which management has not recognised, as settlement is not considered probable. These claims and potential claims pertain to motor accident claims, consumer complaints, employment and dealership arrangements, replacement of parts of vehicles and/or compensation for deficiency in the services by the Group or its dealers. The Group has provided for the estimated cost of repair following the passenger safety airbag issue in the United States, China, Canada, Korea, Australia and Japan. The Group recognises that there is a potential risk of further recalls in the future; however, the Group is unable at this point in time to reliably estimate the amount and timing of any potential future costs associated with this warranty issue.

Other taxes and duties

During the year ended 31 March 2015, the Group's Brazilian subsidiary received a demand for 167 million Brazilian Real (£40 million at 30 June 2017 exchange rate) in relation to additional indirect taxes (PIS and COFINS) claimed as being due on local vehicle and parts sales made in 2010. The matter has been successfully contested before the Brazilian appellate authorities but the position is not yet considered final due to a theoretical opportunity for the tax authorities to decide to lodge a further appeal in the period following the most recent favourable judgement. Professional legal opinions obtained in Brazil also fully support that the basis of the tax authority's original assertion was incorrect and, as a result, the likelihood of any settlement ultimately having to be made is considered remote. Accordingly, no provision has been recognised in the financial statements and the matter is disclosed here purely for the purposes of completeness.

Commitments

The Group has entered into various contracts with vendors and contractors for the acquisition of plant and equipment and various civil contracts of capital nature aggregating to £1,401 million (31 March 2017: £2,047 million) and £9 million (31 March 2017: £31 million) relating to the acquisition of intangible assets.

Commitments and contingencies also includes other contingent liabilities of £127 million (31 March 2017: £82 million). The timing of any outflow will vary as and when claims are received and settled, which is not known with certainty.

The remaining financial commitments, in particular the purchase commitments and guarantees, are of a magnitude typical for the industry.

Inventory of £nil (31 March 2017: £nil) and trade receivables with a carrying amount of £159 million (31 March 2017: £179 million) and property, plant and equipment with a carrying amount of £nil (31 March 2017: £nil) and restricted cash with a carrying amount of £nil (31 March 2017: £nil) are pledged as collateral/security against the borrowings and commitments. Stipulated within the joint venture agreement for Chery Jaguar Land Rover Automotive Co. Ltd. is a commitment for the Group to contribute a total of CNY 3,500 million of capital, of which CNY 2,875 million has been contributed as at 30 June 2017. The outstanding commitment of CNY 625 million translates to £72 million at 30 June 2017 exchange rate.

The Group's share of capital commitments of its joint ventures at 30 June 2017 is £192 million (31 March 2017: £171 million) and contingent liabilities of its joint ventures at 30 June 2017 is £4 million (31 March 2017: £3 million).

20 Capital Management

The Group's objectives when managing capital are to ensure the going concern operation of all subsidiary companies within the Group and to maintain an efficient capital structure to support ongoing and future operations of the Group and to meet shareholder expectations.

The Group issues debt, primarily in the form of bonds, to meet anticipated funding requirements and maintain sufficient liquidity. The Group also maintains certain undrawn committed credit facilities to provide additional liquidity. These borrowings, together with cash generated from operations, are loaned internally or contributed as equity to certain

subsidiaries as required. Surplus cash in subsidiaries is pooled (where practicable) and invested to satisfy security, liquidity and yield requirements.

The capital structure and funding requirements are regularly monitored by the JLR plc Board to ensure sufficient liquidity is maintained by the Group. All debt issuance and capital distributions are approved by the JLR plc Board. In addition, covenants (such as Adjusted EBITDA to interest ratios) related to the Group's financing arrangements are regularly monitored and compliance is certified annually

The following table summarises the capital of the Group:

As at (£ millions)	30 June 2017	31 March 2017
	(unaudited)	(audited)
Short-term debt	160	181
Long-term debt	3,341	3,400
Total debt*	3,501	3,581
Equity	7,729	6,581
Total capital (debt and equity)	11,230	10,162

* Total debt includes finance lease obligations of £6 million (31 March 2017: £7 million).

21 Notes to the consolidated cash flow statement

Reconciliation of profit for the period to cash used in operations

(£ millions)	Three months ended	
	30 June 2017	30 June 2016
	(unaudited)	(unaudited)
		*Restated
Cash flows generated from/(used in) operating activities		
Profit for the period	472	304
Adjustments for:		
Depreciation and amortisation	450	388
Loss on sale of assets	3	3
Foreign exchange (gain)/loss on loans	(19)	23
Income tax expense	123	95
Finance expense (net)	21	21
Finance income	(9)	(9)
Foreign exchange gain on derivatives	(89)	(21)
Foreign exchange loss/(gain) on short term deposits	13	(27)
Foreign exchange gain on other restricted deposits	—	(5)
Foreign exchange loss/(gain) on cash and cash equivalents	19	(44)
Unrealised loss/(gain) on commodities	8	(33)
Share of profit from equity accounted investments	(77)	(45)
Pension past service credit	(437)	—
Exceptional items	(1)	(51)
Other non-cash adjustments	—	2
Cash flows generated from operating activities before changes in assets and liabilities	477	601
Trade receivables	96	(54)
Other financial assets	5	17
Other current assets	43	(32)
Inventories	(296)	(647)
Other non-current assets	(9)	(12)
Accounts payable	(488)	(21)
Other current liabilities	(67)	(11)

(£ millions)	Three months ended	
	30 June 2017 (unaudited)	30 June 2016 (unaudited) *Restated
Other financial liabilities	16	49
Other non-current liabilities and retirement benefit obligations	17	58
Provisions	(50)	13
Cash used in operations.....	(256)	(39)

* Comparatives have been restated for the amendment to disclose separately 'Effect of foreign exchange on cash and cash equivalents' as a separate line item after 'Cash and cash equivalents at beginning of period'. The line items of 'Cash flows generated from operating activities before changes in assets and liabilities' in note 21 and 'Cash used in operations', 'Net cash used in operating activities', and 'Net decrease in cash and cash equivalents' in the consolidated cash flow statement were previously reported as £645 million, £(5) million, £54 million and £952 million for the period ended 30 June 2016. An adjustment of £44 million was recorded to those line items for the period ended 30 June 2016, to reflect the removal of the foreign exchange gain on cash and cash equivalents from those line items to present this amount separately as described above. The line items of 'Cash flows generated from operating activities before changes in assets and liabilities', 'Cash used in operations', 'Net cash used in operating activities', and 'Net decrease in cash and cash equivalents' were therefore restated as £601 million, £39 million, £98 million and £996 million for the period ended 30 June 2016. There is no impact on cash and cash equivalents as previously reported for the period ended 30 June 2016.

22 Related party transactions

The Group's related parties principally consist of Tata Sons Limited, subsidiaries and joint ventures of Tata Sons Limited which includes Tata Motors Limited (the ultimate parent company), subsidiaries, joint ventures and associates of Tata Motors Limited. The Group routinely enters into transactions with these related parties in the ordinary course of business including transactions for the sale and purchase of products and services with its joint ventures and associates. Transactions and balances with the Group's own subsidiaries are eliminated on consolidation.

The following table summarises related party transactions and balances not eliminated in the consolidated condensed interim financial statements. All related party transactions are conducted under normal terms of business. The amounts outstanding are unsecured and will be settled in cash.

Three months ended 30 June (£ millions)	2017 (unaudited)			2016* (unaudited)		
	With joint ventures of the Group	With Tata Sons Limited and its subsidiaries and joint ventures	With immediate or ultimate parent and its subsidiaries, joint ventures and associates	With joint ventures of the Group	With Tata Sons Limited and its subsidiaries and joint ventures	With immediate or ultimate parent and its subsidiaries, joint ventures and associates
Sale of products	162	1	15	140	—	10
