IMPORTANT NOTICE

IMPORTANT: You must read the following disclaimer before continuing. The following disclaimer applies to the attached exchange offer memorandum (the "**Exchange Offer Memorandum**") following this page, and you are therefore advised to read this carefully before reading, accessing or making any other use of the Exchange Offer Memorandum. In accessing the Exchange Offer Memorandum, you agree to be bound by the following terms and conditions, including any modifications to them from time to time, any time you receive any information from Banco Santander, S.A., BNP Paribas, Crédit Agricole Corporate and Investment Bank, Deutsche Bank Aktiengesellschaft, Goldman Sachs International, J.P. Morgan SE, MUFG Securities (Europe) N.V., Société Générale and UniCredit Bank GmbH (the "**Dealer Managers**"), TIM S.p.A. ("**TIM**," or "**TIM Guarantor**"), Telecom Italia Finance ("**TIF**" or the "**Issuer**"), Optics Bidco S.p.A. ("**Optics**") and Kroll Issuer Services Limited (the "**Exchange and Information Agent**") as a result of such access. Capitalized terms used but not otherwise defined in this disclaimer shall have the meaning given to them in this Exchange Offer Memorandum.

NOTHING IN THIS ELECTRONIC TRANSMISSION CONSTITUTES AN OFFER OF SECURITIES FOR SALE IN THE UNITED STATES OR ANY OTHER JURISDICTION WHERE IT IS UNLAWFUL TO DO SO. THE EUR NEW NOTES AND EUR OPTICS NOTES (EACH AS DEFINED BELOW) HAVE NOT BEEN, AND WILL NOT BE, REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE "**U.S. SECURITIES ACT**"), OR THE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES OR OTHER JURISDICTION, AND THE NOTES MAY NOT BE OFFERED OR SOLD, DIRECTLY OR INDIRECTLY, WITHIN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, U.S. PERSONS (AS DEFINED IN REGULATION S UNDER THE U.S. SECURITIES ACT) ("**REGULATION S**") EXCEPT PURSUANT TO AN EXEMPTION FROM, OR IN A TRANSACTION NOT SUBJECT TO, THE REGISTRATION REQUIREMENTS OF THE U.S. SECURITIES ACT AND APPLICABLE STATE OR LOCAL SECURITIES LAWS.

THE ATTACHED EXCHANGE OFFER MEMORANDUM MAY NOT BE FORWARDED OR DISTRIBUTED TO ANY OTHER PERSON AND MAY NOT BE REPRODUCED IN ANY MANNER WHATSOEVER AND, IN PARTICULAR, MAY NOT BE FORWARDED TO ANY U.S. PERSON OR U.S. ADDRESS. ANY FORWARDING, DISTRIBUTION OR REPRODUCTION OF THE EXCHANGE OFFER MEMORANDUM OR THIS TRANSMISSION IN WHOLE OR IN PART IS UNAUTHORIZED. FAILURE TO COMPLY WITH THIS DIRECTIVE MAY RESULT IN A VIOLATION OF THE U.S. SECURITIES ACT OR THE APPLICABLE LAWS OF OTHER JURISDICTIONS. IF YOU HAVE GAINED ACCESS TO THIS TRANSMISSION CONTRARY TO ANY OF THE FOREGOING RESTRICTIONS, YOU ARE NOT AUTHORIZED AND WILL NOT BE ABLE TO PURCHASE ANY OF THE NOTES DESCRIBED IN THE EXCHANGE OFFER MEMORANDUM.

THIS EXCHANGE OFFER MEMORANDUM IS NOT A PROSPECTUS FOR THE PURPOSES OF REGULATION (EU) 2017/1129 (AS AMENDED, THE "**EU PROSPECTUS REGULATION**") OR REGULATION (EU) 2017/1129 AS IT FORMS PART OF THE UK DOMESTIC LAW BY VIRTUE OF THE EUROPEAN UNION (WITHDRAWAL) ACT 2018 (THE "**UK PROSPECTUS REGULATION**") OR ANY IMPLEMENTING LEGISLATION OR RULES RELATING THERETO.

Confirmation of your Representation: In order to be eligible to view the attached Exchange Offer Memorandum or participate in the EUR TIF Exchange Offer (as defined below), you must be able to participate lawfully in the invitation by the Issuer to holders of its €1,050,000,000 7.750 % Guaranteed Notes due January 24, 2033 (the "**EUR TIF Original Notes**") to offer their EUR TIF Original Notes for exchange by the Issuer (the "**EUR TIF Exchange Offer**") on the terms and subject to the conditions set out in this Exchange Offer Memorandum, including the offer and distribution restrictions set out in this Exchange Offer Memorandum. This Exchange Offer Memorandum was sent at your request and by accessing this Exchange Offer Memorandum you shall be deemed (in addition to the above) to have represented to the Issuer, TIM Guarantor, Optics, the Dealer Managers and the Exchange and Information Agent that:

(i) you are a holder or a beneficial owner of the EUR TIF Original Notes;

(ii) you are not a "U.S. person" as defined in Regulation S under the U.S. Securities Act;

(iii) you are otherwise a person to whom it is lawful to send the Exchange Offer Memorandum or to make an invitation pursuant to the EUR TIF Exchange Offer under applicable laws;

(iv) you are a “Qualified Investor” within the meaning of Article 2(e) of the Prospectus Regulation (as defined below), if resident in a Member State of the EEA and not an EEA retail investor;

(v) you are a “Qualified Investor” within the meaning of Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018, if resident in the United Kingdom and not a UK retail investor;

(vi) you are not, nor are acting on behalf of, a Sanctions Restricted Person (as defined in this Exchange Offer Memorandum), provided that this representation shall only apply if and to the extent that it would not result in a violation or breach of, or conflict with, (a) Council Regulation (EC) No 2271/96 of November 22, 1996 (or any law or regulation implementing such Regulation in any member state of the European Union, including Section 7 of the German Foreign Trade Ordinance (*Außenwirtschaftsverordnung*)); (b) any similar blocking or anti-boycott law of the United Kingdom (including, without limitation, Council Regulation (EC) No 2271/96 as it forms a part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018); and

(vii) you consent to delivery of the Exchange Offer Memorandum by electronic transmission to you.

The Exchange Offer Memorandum has been sent to you in an electronic form. You are reminded that documents transmitted via this medium may be altered or changed during the process of transmission and consequently none of the Issuer, TIM Guarantor, Optics, the Dealer Managers, the Exchange and Information Agent, or any person who controls, or any director, officer, employee, agent or affiliate of, any such person accepts any liability or responsibility whatsoever in respect of any difference between the Exchange Offer Memorandum distributed to you in electronic format and the hard copy version available to you on request from the Dealer Managers, the Exchange and Information Agent, Optics, TIM Guarantor or the Issuer.

If you have sold or otherwise transferred all of your EUR TIF Original Notes, please forward the Exchange Offer Memorandum to the purchaser or transferee, or to the stockbroker, bank or other agent through whom the sale or transfer was effected, for transmission to the purchaser or transferee, provided (a) the Exchange Offer Memorandum may be lawfully delivered to such person in accordance with the laws of the jurisdiction where such person is located or resident and (b) such person confirms the representations given in (i) to (vii) above.

THE EXCHANGE OFFER MEMORANDUM SHOULD NOT BE REPRODUCED IN ANY MANNER WHATSOEVER AND SAVE AS REFERRED TO IN THE PREVIOUS PARAGRAPH, SHOULD NOT BE FORWARDED OR DISTRIBUTED TO ANY PERSON OTHER THAN THE RECIPIENT. ANY SUCH FORWARDING OR DISTRIBUTION OR ANY REPRODUCTION OF THE EXCHANGE OFFER MEMORANDUM IN WHOLE OR IN PART IS UNAUTHORIZED. FAILURE TO COMPLY WITH THIS RESTRICTION MAY RESULT IN A VIOLATION OF THE APPLICABLE LAWS OF CERTAIN JURISDICTIONS.

You are otherwise reminded that the Exchange Offer Memorandum has been sent to you on the basis that you are a person into whose possession the Exchange Offer Memorandum may be lawfully delivered in accordance with the laws of the jurisdiction in which you are located or resident and, except as specified above, you may not, nor are you authorized to, deliver the Exchange Offer Memorandum to any other person.

The communication of the Exchange Offer Memorandum and any other documents or materials relating to the EUR TIF Exchange Offer are not being made, and such documents and/or materials have not been approved, by an authorized person for the purposes of section 21 of the Financial Services and Markets Act 2000. Accordingly, such documents and/or materials are not being distributed to, and must not be passed on to, the general public in the United Kingdom. The communication of such documents and/or materials as a financial promotion is only being made to persons in the United Kingdom who are Investment Professionals (as defined in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “**Order**”)) or within Article 49(2)(a) to (d) of the Order, or any other persons to whom it may otherwise lawfully be made under the Order (such persons together being the “**Relevant Persons**”). **The Exchange Offer Memorandum is only available to Relevant Persons and the**

transactions contemplated herein will be available only to, or engaged in only with, Relevant Persons, and this financial promotion must not be relied or acted upon by persons other than Relevant Persons.

None of the EUR TIF Exchange Offer, this Exchange Offer Memorandum or any other documents or materials relating to the EUR TIF Exchange Offer has been submitted to the clearance procedures of the *Commissione Nazionale per le Società e la Borsa* ("**CONSOB**") pursuant to Italian laws and regulations. The EUR TIF Exchange Offer is being carried out in the Republic of Italy ("**Italy**") as an exempted offer pursuant to Article 101-bis, paragraph 3-bis of the Legislative Decree No. 58 of February 24, 1998, as amended and supplemented (the "**Italian Financial Services Act**") and Article 35-*bis*, paragraphs and 3 and 4, of CONSOB Regulation No. 11971 of May 14, 1999, as amended and supplemented ("**Issuers' Regulation**"). Holders or beneficial owners of the EUR TIF Original Notes may offer for exchange their EUR TIF Original Notes in the EUR TIF Exchange Offer through authorized persons (such as investment firms, banks or financial intermediaries permitted to conduct such activities in Italy in accordance with the Italian Financial Services Act, CONSOB Regulation No. 20307 of February 15, 2018, as amended and supplemented ("**CONSOB Regulation on Intermediaries**") and Legislative Decree No. 385 of September 1, 1993, as amended) and in compliance with applicable laws and regulations or with requirements imposed by CONSOB or any other Italian authority. Each intermediary must comply with the applicable laws and regulations concerning information duties vis-à-vis its clients in connection with the EUR TIF Original Notes, the EUR TIF Exchange Offer or this Exchange Offer Memorandum.

MiFID II Product Governance/Professional Investors and ECPs Only Target Market: Solely for the purposes of the manufacturers' product approval process, the target market assessment in respect of the Notes (as defined below) has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in Directive 2014/65/EU (as amended, "**MiFID II**"); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

UK MiFIR Product Governance / Professional Investors and ECPs Only Target Market: Solely for the purposes of the manufacturers' product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties, as defined in the FCA Handbook Conduct of Business Sourcebook ("**COBS**"), and professional clients, as defined in Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA ("**UK MiFIR**"); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the "**UK MiFIR Product Governance Rules**") is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

Prohibition of Sales to EEA Retail Investors: The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the "**EEA**"). For these purposes, a "retail investor" means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (as amended, the "**Prospectus Regulation**"). Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

Prohibition of Sales to UK Retail Investors: The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom (the "**UK**"). For these purposes, a "retail investor" means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European

Union (Withdrawal) Act 2018 (the "**EUWA**"); (ii) a consumer within the meaning of the provisions of the Financial Services and Markets Act 2000, as amended (the "**FSMA**"), and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that consumer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA ("**UK MiFIR**"); or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently, no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "**UK PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

The distribution of the Exchange Offer Memorandum in certain jurisdictions may be restricted by law. Persons into whose possession the Exchange Offer Memorandum comes are required by the Issuer, TIM Guarantor, Optics, the Dealer Managers, the Exchange and Information Agent to inform themselves about, and to observe, any such restrictions.

THIS MEMORANDUM IS IMPORTANT AND REQUIRES YOUR IMMEDIATE ATTENTION. This exchange offer memorandum (the "**Exchange Offer Memorandum**") contains important information which should be read carefully before any decision is made to participate in the EUR TIF Exchange Offer (as defined below). If you are in any doubt as to the action you should take, you are recommended to seek your own legal, regulatory, tax, business and investment advice immediately from your own advisers, and financial advice immediately from your stockbroker, bank manager, accountant or other independent financial adviser. Any individual or company whose EUR TIF Original Notes (as defined below) are held on its behalf by a broker, dealer, bank, custodian, trust company or other nominee must contact such entity if they wish to participate in the EUR TIF Exchange Offer. None of TIM S.p.A. ("**TIM**" or "**TIM Guarantor**"), Telecom Italia Finance ("**TIF**" or the "**Issuer**"), Banco Santander, S.A., BNP Paribas, Crédit Agricole Corporate and Investment Bank, Deutsche Bank Aktiengesellschaft, Goldman Sachs International, J.P. Morgan SE, MUFG Securities (Europe) N.V., Société Générale and UniCredit Bank GmbH (together, the "**Dealer Managers**"), or Kroll Issuer Services Limited (the "**Exchange and Information Agent**") makes any recommendation as to whether or not holders of EUR TIF Original Notes should participate in the EUR TIF Exchange Offer. This Exchange Offer Memorandum and its contents are confidential and should not be distributed, published or reproduced (in whole or in part) or disclosed by recipients to any other person. If you have recently sold or otherwise transferred your entire holding of EUR TIF Original Notes, you should immediately return this Exchange Offer Memorandum to the bank or other agent from whom you received it.

*The EUR TIF Exchange Offer is not being made within, and this Exchange Offer Memorandum is not for distribution into, the United States of America (the "**United States**") or to any person resident or located in any jurisdiction where it is unlawful to distribute this document. The distribution of this Exchange Offer Memorandum in certain jurisdictions may be restricted by the laws of those jurisdictions.*

EXCHANGE OFFER MEMORANDUM DATED APRIL 18, 2024

INVITATION BY

Telecom Italia Finance

(incorporated with limited liability under the laws of the Grand-Duchy of Luxembourg)

to Eligible Holders to offer to exchange

the securities listed below up to the Total Cap (as defined herein)

EUR TIF Original Notes	ISIN/Common Code	Aggregate Principal Amount Outstanding	EUR Minimum Series Exchange Condition	EUR Exchange Consideration (1)	Participation Premium (per €1,000 of EUR TIF Original Notes) (2)
€1,050,000,000 7.750 per cent. Guaranteed Notes due January 24, 2033 (the "**EUR TIF Original Notes**")	XS0161100515/016110051	€1,015,000,000	€300,000,000	€1,000 principal amount of EUR TIF New Notes per €1,000 of EUR TIF Original Notes	€2.50

(1) The principal amount of EUR TIF Original Notes offered for exchange by an Eligible Holder (as defined below) may be subject to pro-ration to comply with the Final Series Acceptance Amount (as defined herein), as applicable. The EUR TIF New Notes (and, upon the occurrence of the Acquisition Closing Date (as defined herein), the EUR Optics (TIF) Notes (as defined below), (if any) will be issued in minimum denominations of €100,000 and in integral multiples of €1,000 in excess thereof. TIF will not accept for exchange any offer that would result in the issuance of less than €100,000 in principal amount of EUR TIF New Notes to a Participating Holder (as defined below). As a result, a Holder will be unable to participate in the EUR TIF Exchange Offer if such holder's ownership of EUR TIF Original Notes is not at a sufficient level to meet these minimum requirements.

(2) Participating Holders will be entitled to receive the Participation Premium (as defined below) in cash to the extent its EUR TIF Original Notes are accepted and exchanged as part of the EUR TIF Exchange Offer. The Participation Premium shall be payable on the EUR Settlement Date (as defined below) in respect of such EUR TIF Original Notes accepted by TIF and exchanged.

For

an equal aggregate principal amount of new 7.750 per cent. Guaranteed Notes due January 24, 2033 (the "**EUR TIF New Notes**") to be issued by Telecom Italia Finance ("**TIF**" or the "**Issuer**") and guaranteed by TIM S.p.A. ("**TIM**" or "**TIM Guarantor**") with terms substantially the same as the terms of the EUR TIF Original Notes, including maturity, interest rate, interest payment dates and restrictive covenants and except for provisions relating to the minimum denominations and the EUR TIF Mandatory Acquisition Exchange (as defined below) as described elsewhere in this Exchange Offer Memorandum upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum and, if such EUR TIF Original Notes are validly offered for exchange (and not validly withdrawn) on or prior to the EUR Expiration Time (as defined below) and accepted, a cash amount of €2.50 per €1,000 of accepted and exchanged EUR TIF Original Notes (the "**Participation Premium**") shall be payable on the EUR Settlement Date (as defined below).

Summary of Key Features of the EUR TIF Exchange Offer

In connection with their participation in the EUR TIF Exchange Offer, each Eligible Holder of the EUR TIF New Notes hereby agrees in advance without further action on its part that its EUR TIF New Notes will (a) if the Acquisition (as defined herein) is or will be consummated on or prior to the Longstop Date (as defined herein), on the date the Acquisition is consummated, be mandatorily exchanged for an equal aggregate principal amount of new 7.750 per cent. Notes due January 24, 2033 (the "**EUR Optics (TIF) Notes**") to be issued by Optics Bidco S.p.A. ("**Optics**") with terms substantially the same as the terms of the EUR TIF New Notes including maturity, interest rate, interest payment dates and other material terms, except for the provisions relating to them being secured and certain other provisions as set forth in the relevant description of such EUR Optics (TIF) Notes included elsewhere in this Exchange Offer Memorandum, or (b) if the Acquisition is not or will not be consummated on or prior to the Longstop Date, remain outstanding as a separate series not fungible with the EUR TIF Original Notes not validly offered or otherwise accepted as part of the EUR TIF Exchange Offer, each on the terms set forth herein.

THE EUR TIF EXCHANGE OFFER WILL EXPIRE AT 5:00 PM (CET) ON MAY 1, 2024, UNLESS EXTENDED, RE-OPENED OR TERMINATED BY TIF, AS PROVIDED IN THIS EXCHANGE OFFER MEMORANDUM (SUCH DATE AND TIME, AS MAY BE EXTENDED, THE "EUR EXPIRATION TIME"). ANY PARTICIPATING HOLDER (AS DEFINED BELOW) WILL, TO THE EXTENT THEIR EUR TIF ORIGINAL NOTES ARE ACCEPTED BY TIF, BE ENTITLED TO RECEIVE THE PARTICIPATION PREMIUM ON THE EUR SETTLEMENT DATE. SUBJECT TO THE TERMS AND CONDITIONS HEREIN, ELIGIBLE HOLDERS (AS DEFINED BELOW) MUST VALIDLY OFFER FOR EXCHANGE THEIR RELEVANT EUR TIF ORIGINAL NOTES ON OR PRIOR TO THE EUR EXPIRATION TIME, AND NOT VALIDLY WITHDRAW THEIR RELEVANT EUR TIF ORIGINAL NOTES, TO BE ELIGIBLE TO RECEIVE THE EUR TIF NEW NOTES AND THE PARTICIPATION PREMIUM ON THE EUR SETTLEMENT DATE. THE DEADLINES SET BY ANY CUSTODIAN, INTERMEDIARY OR CLEARING SYSTEM MAY BE EARLIER THAN THESE DEADLINES. ONLY DIRECT PARTICIPANTS (AS DEFINED HEREIN) MAY SUBMIT INSTRUCTIONS. EACH ELIGIBLE HOLDER THAT IS NOT A DIRECT PARTICIPANT MUST ARRANGE FOR THE DIRECT PARTICIPANT THROUGH WHICH SUCH ELIGIBLE HOLDER HOLDS ITS EUR TIF ORIGINAL NOTES TO SUBMIT AN INSTRUCTION ON ITS BEHALF TO THE RELEVANT CLEARING SYSTEM BEFORE THE DEADLINES SPECIFIED BY THE RELEVANT CLEARING SYSTEM, WHICH MAY BE EARLIER THAN THE DEADLINES SPECIFIED IN THIS EXCHANGE OFFER MEMORANDUM. INSTRUCTIONS ARE IRREVOCABLE, EXCEPT IN THE LIMITED CIRCUMSTANCES DESCRIBED IN THIS EXCHANGE OFFER MEMORANDUM.

The Concurrent EUR TIM Exchange Offers and USD Exchange Offers

Concurrently with the launch of this EUR TIF Exchange Offer (as defined below), (i) Telecom Italia S.p.A. ("**TIM**") has launched exchange offers (the "**EUR TIM Exchange Offers**" and, together with this EUR TIF Exchange Offer,

the “**EUR Exchange Offers**”) in respect of the EUR TIM Original Notes (as defined below), as further described in the exchange offer memorandum relating to the EUR TIM Exchange Offers (the “**EUR TIM Exchange Offer Memorandum**”) and (ii) Telecom Italia Capital (“**TICAP**”) has launched an exchange offer (the “**USD Exchange Offers**” and, together with this EUR TIF Exchange Offer and the EUR TIM Exchange Offers, the “**Exchange Offers**”) in respect of the USD Original Notes (as defined below), whose combined aggregate outstanding principal amount is $4.0 billion, as further described in the exchange offer memorandum relating to the USD Exchange Offers (the “**USD Exchange Offer Memorandum**”).

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, the EUR TIM Exchange Offer Memorandum and the USD Exchange Offer Memorandum, TIM, TIF and TICAP are inviting holders to offer for exchange their EUR TIM Original Notes, EUR TIF Original Notes and /or USD Original Notes in an aggregate principal amount up to €5.0 billion to be accepted across the Exchange Offers in the sole discretion of TIM, TIF and/or TICAP, as applicable (the “**Total Cap**”) for an equal aggregate principal amount of corresponding EUR TIM New Notes, EUR TIF New Notes and/or USD New Notes. TIM, TIF and TICAP (acting together) reserve the right, but are not obligated, to increase the Total Cap in their sole and absolute discretion, subject to applicable laws, and Holders of EUR TIF Original Notes will not be entitled to any revocation rights as a result of such increase.

Summary of Certain Key Terms of the EUR TIF Exchange Offer

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, TIF is hereby inviting Eligible Holders to offer for exchange their EUR TIF Original Notes (the “**EUR TIF Initial Exchange**”) for an equal aggregate principal amount of the corresponding EUR TIF New Notes subject to the Total Cap.

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, the EUR TIF Exchange Offer is conditional upon valid offers for exchange being received from (and not being validly withdrawn by) Eligible Holders of EUR TIF Original Notes and accepted in the EUR TIF Exchange Offer in a sufficient aggregate principal amount such that at least €300,000,000 in aggregate principal amount of EUR TIF New Notes would be issued by TIF and guaranteed by TIM upon consummation of the EUR TIF Initial Exchange, (the “**EUR Minimum Series Exchange Condition**”). TIF may elect, in its sole discretion, to increase, decrease or waive the EUR Minimum Series Exchange Condition with respect to the EUR TIF Original Notes and Holders will not be entitled to any revocation rights as a result of any such decrease, increase or waiver. Accordingly, Holders should not rely on the EUR Minimum Series Exchange Condition in making their decision as to whether to offer their EUR TIF Original Notes for exchange in the EUR TIF Exchange Offer. The EUR TIF Exchange Offer is also subject to the satisfaction or waiver of certain additional general conditions, each as described in this Exchange Offer Memorandum. See “*Conditions of the EUR TIF Exchange Offer*” beginning on page 18.

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, if TIF decides, in its sole discretion, to accept for exchange valid offers to exchange EUR TIF Original Notes pursuant to the EUR TIF Exchange Offer, the final acceptance amount for the EUR TIF Original Notes (the “**Final Series Acceptance Amount**”) will be determined by TIF in its sole and absolute discretion and will be announced by TIF as soon as reasonably practicable following the EUR Expiration Time. For the avoidance of doubt, TIF will determine the Final Series Acceptance Amount in its sole and absolute discretion. In the event that the principal amount of the EUR TIF Original Notes validly offered for exchange (and not validly withdrawn) exceeds the Final Series Acceptance Amount, offers to exchange in respect of the EUR TIF Original Notes are to be accepted by TIF on a pro rata basis and, for the purposes of such acceptance, will be scaled by a factor (a “**Pro-Ration Factor**”) equal to (i) the Final Series Acceptance Amount, divided by (ii) the aggregate principal amount of EUR TIF Original Notes that have been validly offered (and not validly withdrawn) for exchange (subject to adjustment to allow for the aggregate principal amount of the EUR TIF Original Notes accepted for exchange to equal the Final Series Acceptance Amount). Each such offer to exchange will be rounded up or down to the nearest €1,000 in principal amount, after application of the Pro-Ration Factor, subject to the minimum denominations and Minimum Exchange Amount (as defined below) as set out herein.

If application of the Pro-Ration Factor will result in either (i) the relevant Noteholder who is transferring EUR TIF Original Notes to TIF receiving less than the minimum denomination of the EUR TIF New Notes on exchange or (ii) EUR TIF Original Notes in a principal amount of less than €1,000 being returned to a Noteholder, then TIF will, in its sole and absolute discretion, either reject or accept all of such Noteholder’s validly tendered EUR TIF Original Notes. EUR TIF Original Notes not accepted for exchange as a result of pro-ration will be returned to the relevant

Noteholder. The calculations of the Pro- Ration Factor will be made by TIF and such calculations will be final and binding on all Eligible Holders, absent manifest error.

If, on or prior to October 15, 2024, or any further date agreed prior to the then current longstop date between TIM and Optics pursuant to the Transaction Agreement (as defined herein), and announced to the relevant Noteholders promptly thereafter (such date, the "**Longstop Date**"), the Acquisition (i) is, or will be, consummated (such date the Acquisition is consummated, the "**Acquisition Closing Date**"), then upon no less than five business days prior notice by TIF to the principal paying agent for the EUR TIF New Notes (the "**New Notes Agent**"), Optics and the Holders of the EUR TIF New Notes (in accordance with the terms and conditions (the "**Conditions**")), on the Acquisition Closing Date, the EUR TIF New Notes will be mandatorily exchanged without the need for further action by the relevant Noteholders (the "**EUR TIF Mandatory Acquisition Exchange**") for an equal aggregate principal amount of EUR Optics (TIF) Notes to be issued by Optics with terms substantially the same as the EUR TIF New Notes, including maturity, interest rate, interest payment dates and other material terms, except for the provisions relating to them being secured and certain other provisions as set forth in the relevant description of such EUR Optics (TIF) Notes included elsewhere in this Exchange Offer Memorandum, or (ii) is not, or will not be, consummated on or prior to the Longstop Date, then the EUR TIF New Notes will remain outstanding as a separate series not fungible with the EUR TIF Original Notes not validly offered for exchange or otherwise accepted by TIF as part of the EUR TIF Exchange Offer.

The "**EUR TIF Exchange Offer**" refers herein to the EUR TIF Initial Exchange of the EUR TIF Original Notes for EUR TIF New Notes including the EUR TIF Mandatory Acquisition Exchange provisions within their terms and conditions. No further action by Holders is required to effect the EUR TIF Mandatory Acquisition Exchange.

The EUR TIF Exchange Offer is also subject to the satisfaction or waiver of certain additional general conditions, as described in this Exchange Offer Memorandum. See "*Conditions of the EUR TIF Exchange Offer*" beginning on page 18. In addition, TIF reserves the right to waive any or all of the conditions to the EUR TIF Exchange Offer in its sole discretion, subject to applicable law. In addition, TIF has the right to extend, reopen, amend, terminate or withdraw the EUR TIF Exchange Offer, at any time and for any reason, including based on the acceptance rate and outcome of the EUR TIF Exchange Offer or if any of the conditions described in the section "*Conditions of the EUR TIF Exchange Offers*" are not satisfied or waived.

EUR TIF Initial Exchange

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum (including the Minimum Exchange Amount), on the settlement date of the EUR TIF Initial Exchange (the "**EUR Settlement Date**"), in exchange for each €1,000 in principal amount of the EUR TIF Original Notes that is validly offered for exchange (and not validly withdrawn) on or prior to the EUR Expiration Time and accepted for exchange by TIF in the EUR TIF Initial Exchange (and subject to the Minimum Exchange Amount), each Participating Holder will receive €1,000 in principal amount of the EUR TIF New Notes. On the EUR Settlement Date, the (i) Participation Premium and (ii) accrued and unpaid interest, if any, in respect of the EUR TIF Original Notes validly offered for exchange (and not validly withdrawn) and accepted for exchange by TIF, for the period from, and including, the immediately preceding interest payment date in respect of the EUR TIF Original Notes up to, but excluding, the EUR Settlement Date will be paid by TIF in cash (rounded to the nearest €0.01, with €0.005 rounded upwards) (the "**Accrued Interest Amount in respect of the EUR TIF Original Notes**"). On the Acquisition Closing Date, accrued and unpaid interest, if any, in respect of the EUR TIF New Notes for the period from, and including, the later of (x) the immediately preceding interest payment date in respect of the EUR TIF New Notes and (y) the EUR Settlement Date, as applicable, up to, but excluding, the Acquisition Closing Date will be paid by TIF in cash (rounded to the nearest €0.01, with €0.005 rounded upwards) (the "**Accrued Interest Amount in respect of the EUR TIF New Notes**").

Eligible Holders of EUR TIF Original Notes whose EUR TIF Original Notes are not accepted for exchange by TIF or who do not offer to exchange and Ineligible Holders will continue to hold their EUR TIF Original Notes according to the terms of the EUR TIF Original Notes.

Eligible Holders who wish to participate in the EUR TIF Exchange Offer must offer for exchange their EUR TIF Original Notes for an aggregate principal amount of EUR TIF Original Notes that is sufficient to receive, in each case, at least €100,000 in principal amount of EUR TIF New Notes in the EUR TIF Exchange Offer (the "**Minimum Exchange Amount**").

The EUR TIF New Notes will be issued in minimum denominations of €100,000 and in integral multiples of €1,000 in excess thereof. TIF will not accept for exchange any offer that would result in the issuance of less than €100,000 in principal amount of EUR TIF New Notes to a Participating Holder. As a result, a Holder will be unable to participate in the EUR TIF Exchange Offer if such Holder's ownership of EUR TIF Original Notes is not at a sufficient level to meet the required minimum denomination and the Minimum Exchange Amount. The terms of the EUR TIF New Notes will be substantially the same as the terms of the EUR TIF Original Notes, including the same maturity date, interest rate, interest payment dates and restrictive covenants as the corresponding Series of EUR TIF Original Notes, except, for example, for the minimum denomination and the provisions relating to the EUR TIF Mandatory Acquisition Exchange as described elsewhere in this Exchange Offer Memorandum. See "*Terms and Conditions of the EUR TIF New Notes*". EUR TIF Original Notes accepted by TIF for exchange shall be cancelled in accordance with the terms and conditions of such EUR TIF Original Notes.

EUR TIF Mandatory Acquisition Exchange

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, on the Acquisition Closing Date, and pursuant to the EUR TIF Mandatory Acquisition Exchange, in exchange for each €1,000 in principal amount of EUR TIF New Notes outstanding, each Holder of EUR TIF New Notes will mandatorily receive €1,000 in principal amount of EUR Optics (TIF) Notes. On the Acquisition Closing Date, Holders of EUR TIF New Notes will also be paid the Accrued Interest Amount in respect of the EUR TIF New Notes. Interest on the EUR Optics (TIF) Notes will accrue from the issue date of the EUR Optics (TIF) Notes.

The terms of the EUR Optics (TIF) Notes will be substantially the same as the terms of the corresponding series of the EUR TIF New Notes, including the maturity, interest rate, interest payment dates and other material terms, except for the provisions relating to them being secured and certain other provisions as set forth in the relevant description of such EUR Optics (TIF) Notes included elsewhere in the Exchange Offer Memorandum. See "*Summary—Summary of the EUR Optics (TIF) Notes*", "*Terms and Conditions of the EUR Optics Notes*" and "*Risk Factors—Risks Relating to the EUR Optics Notes*". Moreover, on their issue date, the EUR Optics (TIF) Notes will not be guaranteed and will be secured on a first priority basis by 100% of the share capital of Optics and certain receivables arising from material intercompany loans granted to Optics (if any) (the "**Optics Notes Issue Date Collateral**"). Within 60 days after the Acquisition Closing Date if the Push-Down Merger (as defined herein) has not occurred, (i) Optics will procure that, subject to certain agreed security principles and certain significant limitations under Italian law, NetCo guarantees the EUR Optics (TIF) Notes and (ii) the EUR Optics (TIF) Notes will be secured, subject to certain agreed security principles and certain perfection requirements, by first-ranking security interests in the share capital of NetCo held by Optics (on a basis whereby (a) the grant of security shall not trigger any tag-along rights in favor of any shareholder of NetCo and (b) the enforcement of such security will not be subject to any lock-up under any shareholder arrangements relating to the shares in NetCo) and certain receivables arising from material intercompany loans granted by Optics to NetCo, if any (the "**Optics Notes Post-Issue Date Collateral**"). Fastweb (as defined herein) currently owns a 4.5% stake in FiberCop. Subject to the outcome of current negotiations among the parties, Optics may acquire Fastweb's stake in NetCo or Fastweb may remain a minority shareholder in NetCo following the Acquisition. If Fastweb continues to be a shareholder of NetCo following the Acquisition, the minority stake of Fastweb is expected to be diluted in connection with the consummation of the Acquisition. To the extent Fastweb remains a shareholder in NetCo following the Transactions, it is not expected to pledge the stake it owns in NetCo, including after the occurrence of the Push-Down Merger. In the event that the Push-Down Merger cannot be effected with the security interests over the shares in NetCo held by Optics and/or the intercompany loans made available by Optics HoldCo to Optics remaining in place, such security interests shall be released in order to effect the Push-Down Merger and Optics HoldCo shall, within 20 Business Days following the Push-Down Merger, enter into replacement security over (i) the issued share capital of NetCo held by Optics Holdco: and (ii) receivables arising from material intercompany loans granted by Optics Holdco to NetCo, if any (the "**Optics Notes Replacement Collateral**"). Pursuant to the terms of the Intercreditor Agreement, the holders of the EUR Optics (TIF) Notes will share equally with the lenders under the Optics Financing Arrangements, the holders of the EUR Optics (TIM) Notes, if any, (as defined below) and the holders of the USD Optics Notes (as defined below), if any, the proceeds of the enforcement of the Optics Notes Collateral (as defined herein). See "*Summary—Summary of the EUR Optics (TIF) Notes*", "*Terms and Conditions of the EUR Optics (TIF) Notes*" and "*Risk Factors—Risks Relating to the EUR Optics Notes*". The value of the collateral securing the EUR Optics (TIF) Notes may not be sufficient to satisfy Optics' obligations under the EUR Optics (TIF) Notes, as applicable, and such collateral may be reduced or diluted under certain circumstances. See also "*Risk Factors—Risks Relating to the Optics Notes—Once granted, the guarantees, including the NetCo Guarantee, and the Optics*

Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability" and "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations.*"

If you are in any doubt as to the action you should take, you are recommended to seek your own financial, legal, tax, regulatory, investment or other advice immediately from your stockbroker, bank manager, accountant or another independent financial adviser. Prior to making a decision as to whether to offer for exchange the EUR TIF Original Notes pursuant to the EUR TIF Exchange Offer, Holders of EUR TIF Original Notes should carefully consider all of the information in this Exchange Offer Memorandum and, in particular, the risk factors described in "*Risk Factors*" beginning on page 116.

Any individual or company whose EUR TIF Original Notes are held on its behalf by a broker, dealer, bank, custodian, trust company or other nominee must contact such entity if they wish to validly offer for exchange their EUR TIF Original Notes pursuant to the EUR TIF Exchange Offer. None of TIF, TIM, Optics, Banco Santander, S.A., BNP Paribas, Crédit Agricole Corporate and Investment Bank, Deutsche Bank Aktiengesellschaft, Goldman Sachs International, J.P. Morgan SE, MUFG Securities (Europe) N.V., Société Générale and UniCredit Bank GmbH (the "**Dealer Managers**"), or the Exchange and Information Agent (or their respective directors, agents, officers, employees or affiliates) makes any recommendation as to whether or not Holders of EUR TIF Original Notes should offer their EUR TIF Original Notes for exchange.

There is currently no market for the EUR TIF New Notes, and we cannot assure you that any market will develop. The EUR TIF New Notes are expected to be issued in bearer form and initially represented by a temporary global note (each, a "**Temporary Global Note**"), without interest coupons, which will be deposited on or prior to the relevant issue date with a common safekeeper for Euroclear Bank SA/NV ("**Euroclear**") and Clearstream Banking S.A. ("**Clearstream, Luxembourg**"). Interests in the relevant Temporary Global Note will be exchangeable for interests in a permanent global note (each, a "**Permanent Global Note**" and, together with a Temporary Global Note, the "**Global Notes**"), without interest coupons, on or after a date which is expected to be 40 days after the relevant issue date, upon certification as to non-U.S. beneficial ownership. Interests in the relevant Permanent Global Note will be exchangeable for definitive notes only in certain limited circumstances.

There is currently no market for the EUR Optics (TIF) Notes, and we cannot assure you that any market will develop. The EUR Optics (TIF) Notes are expected to be in registered form and be represented by a global certificate (each a "**Global Certificate**"), which will be registered in the name of a nominee of a common depositary and deposited on or prior to the relevant issue date with a common depositary for Euroclear Bank SA/NV ("**Euroclear**") and Clearstream Banking S.A. ("**Clearstream, Luxembourg**").

The EUR TIF New Notes, the EUR TIF Original Notes, the guarantees of the EUR TIF New Notes and the guarantees of the EUR TIF Original Notes have not been, and will not be, and the EUR Optics (TIF) Notes and the guarantees of the EUR Optics (TIF) Notes, if issued in the EUR TIF Mandatory Acquisition Exchange, will not be, registered under the U.S. Securities Act, or any state securities law, and the EUR TIF New Notes and the EUR Optics (TIF) Notes may not be offered or sold within the United States or to, or for the account or benefit of, any U.S. person (as such terms are defined in Regulation S), except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act. For a further description of certain restrictions on the offering of the EUR TIF New Notes and EUR Optics (TIF) Notes, see "*Notice to Investors*" and "*Offer Restrictions*".

With respect to the EUR TIF New Notes and the EUR Optics (TIF) Notes, respectively, application will be made to the Luxembourg Stock Exchange (the "**Stock Exchange**") for the EUR TIF New Notes and the EUR Optics (TIF) Notes to be listed on the Official List of the Stock Exchange and admitted for trading on the professional segment of the Euro MTF Market thereof from their respective issue dates. The Euro MTF Market is not a regulated market pursuant to the provisions of Directive 2014/65/EU on markets in financial instruments (as amended, "**MiFID II**") nor a UK regulated market for the purposes of Regulation (EU) No 600/2014 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 (the "**EUWA**") ("**UK MiFIR**").

This Exchange Offer Memorandum includes additional information on the terms of the EUR TIF New Notes and the EUR Optics (TIF) Notes, including redemption and repurchase prices, covenants and offer restrictions.

The Luxembourg Stock Exchange has only scrutinized and approved the sections of this Exchange Offer Memorandum that relate to the listing of the EUR TIF New Notes and the EUR Optics (TIF) Notes and not the sections that relate to the Exchange Offers. The sections relating to the Exchange Offers are provided for informational purposes only.

NOTICE TO INVESTORS

This Exchange Offer Memorandum does not constitute a prospectus for the purposes of Regulation (EU) 2017/1129 (the "**Prospectus Regulation**").

The Issuer accepts responsibility for the information contained in this Exchange Offer Memorandum. To the best of the knowledge of the Issuer (having taken all reasonable care to ensure that such is the case), the information contained in this Exchange Offer Memorandum is in accordance with the facts and does not omit anything affecting the import of such information.

The information on the websites to which this Exchange Offer Memorandum refers does not form part of this Exchange Offer Memorandum.

Save for the Issuer and TIM Guarantor, no other party has separately verified all the information contained herein. Accordingly, no representation, warranty or undertaking, express or implied, is made and no responsibility or liability is accepted by the Dealer Managers as to the accuracy or completeness of the information contained or incorporated in this Exchange Offer Memorandum or any other information provided by the Issuer or TIM Guarantor in connection with the Notes. No Dealer Manager accepts any liability in relation to the information contained in this Exchange Offer Memorandum or any other information provided by the Issuer or TIM Guarantor.

Neither the Dealer Managers nor any of their respective affiliates, employees, directors, officers, agents or advisers have authorized the whole or any part of this Exchange Offer Memorandum and none of them makes any representation or warranty or accepts any responsibility as to the accuracy or completeness of the information contained in this Exchange Offer Memorandum or any responsibility for any acts or omissions of the Issuer or TIM Guarantor or any other person in connection with the issuance and the EUR TIF Exchange Offer.

None of the EUR TIM Original Notes Trustee, EUR TIF Original Notes Agent, New Notes Agent, Optics Notes Trustee, Optics Notes Transfer Agent and Registrar or Optics Notes Paying Agent (each as hereinafter defined) makes any representation or warranty whatsoever or accepts any responsibility as to the accuracy or completeness of the information contained in this Exchange Offer Memorandum or any responsibility for the acts or omissions of the Issuer or TIM Guarantor or any other person in connection with the issuance and the EUR TIF Exchange Offer.

No person is or has been authorized by the Issuer or TIM Guarantor to give any information or to make any representation not contained in or consistent with this Exchange Offer Memorandum or any other information supplied in connection with the Notes and, if given or made, such information or representation must not be relied upon as having been authorized by the Issuer or TIM Guarantor or any of the Dealer Managers or their respective affiliates, employees, directors, officers, agents or advisers.

Neither this Exchange Offer Memorandum nor any other information supplied in connection with the Notes (a) is intended to provide the basis of any credit or other evaluation or (b) should be considered as a recommendation by any of the Issuer, TIM Guarantor or any of the Dealer Managers or any of the EUR TIM Original Notes Trustee, EUR TIF Original Notes Agent, the New Notes Agent, Optics Notes Trustee, Optics Notes Transfer Agent and Registrar or Optics Notes Paying Agent (each as hereinafter defined) that any recipient of this Exchange Offer Memorandum or any other information supplied in connection with the Notes should purchase any Notes. Each investor contemplating purchasing any Notes should make its own independent investigation of the financial condition and affairs, and its own appraisal of the creditworthiness, of the Issuer, TIM Guarantor and Optics. Neither this Exchange Offer Memorandum nor any other information supplied in connection with the Notes constitutes an offer or invitation by or on behalf of the Issuer, TIM Guarantor or any of the Dealer Managers to any person to subscribe or purchase any Notes.

Neither the delivery of this Exchange Offer Memorandum nor the offering, sale or delivery of the EUR TIF New Notes or EUR Optics (TIF) Notes shall in any circumstances imply that the information contained in it concerning the Issuer, TIM Guarantor or Optics is correct at any time subsequent to its date or that any other information supplied in connection with the EUR TIF New Notes or EUR Optics (TIF) Notes is correct as at any time subsequent to the date indicated in the document containing the same. The Dealer Managers expressly do not undertake to review the financial condition or affairs of the Issuer, TIM Guarantor or Optics during the life of the EUR TIF New Notes or

EUR Optics (TIF) Notes or to advise any investor in the EUR TIF New Notes or EUR Optics (TIF) Notes of any information coming to their attention.

By receiving this Exchange Offer Memorandum, you acknowledge that you have had an opportunity to request from the Issuer or TIM Guarantor for review, and that you have received, all additional information you deem necessary to verify the accuracy and completeness of the information contained in this Exchange Offer Memorandum. You also acknowledge that you have not relied on the Dealer Managers in connection with your investigation of the accuracy of this information or your decision whether to invest in the Notes.

The EUR TIF New Notes, the guarantees of the EUR TIF New Notes, the EUR Optics (TIF) Notes and the guarantees of the EUR Optics (TIF) Notes have not been and will not be registered under the United States Securities Act of 1933, as amended (the "**U.S. Securities Act**") and may not be offered or sold in the United States or to, or for the account or benefit of, U.S. persons (as defined in Regulation S under the U.S. Securities Act) except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act, and are subject to U.S. tax law requirements. For a further description of certain restrictions on the offering and sale of the Notes and on the distribution of this document, see "*Offer Restrictions.*"

Each prospective purchaser of the Notes must comply with all applicable laws and rules and regulations in force in any jurisdiction in which it purchases, offers or sells the Notes and must obtain any consent, approval or permission required by it for the purchase, offer or sale by it of the Notes under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers or sales, and none of the Issuer, TIM Guarantor or the Dealer Managers has any responsibility therefor.

As a prospective investor, you should be aware that you may be required to bear the financial risks of this investment for an indefinite period of time. By purchasing any Notes, you will be deemed to have made certain acknowledgments, representations and agreements as described in those sections of this Exchange Offer Memorandum. None of the Issuer, TIM Guarantor or the Dealer Managers nor their respective affiliates, employees, directors, officers, agents or advisers are making an offer to sell the Notes in any jurisdiction where the offer and sale of the Notes is prohibited. None of the Issuer, TIM Guarantor or the Dealer Managers are making any representation to you that the Notes are a legal investment for you.

In this Exchange Offer Memorandum, unless the contrary intention appears, a reference to a law or a provision of a law is a reference to that law or provision as extended, amended or re-enacted.

The language of this Exchange Offer Memorandum is English. Certain legislative references and technical terms have been cited in their original language in order that the correct technical meaning may be ascribed to them under applicable law.

PROHIBITION OF SALES TO EEA RETAIL INVESTORS

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "**MiFID II**"); or (ii) a customer within the meaning of Directive (EU) 2016/97 (the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Prospectus Regulation.

Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

PROHIBITION OF SALES TO UNITED KINGDOM RETAIL INVESTORS

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("**UK**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No

2017/565 as it forms part of domestic law by virtue of the EUWA; or (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA.

Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "**UK PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

MIFID II PRODUCT GOVERNANCE / PROFESSIONAL INVESTORS AND ECPS ONLY TARGET MARKET

Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties ("**ECPs**") and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to ECPs and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

UK MIFIR PRODUCT GOVERNANCE / PROFESSIONAL INVESTORS AND ECPS ONLY TARGET MARKET

Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is only eligible counterparties, as defined in the FCA Handbook Conduct of Business Sourcebook ("**COBS**"), and professional clients, as defined in Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("**UK MiFIR**"); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the "**UK MiFIR Product Governance Rules**") is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

NOTICE TO HONG KONG INVESTORS

The Notes may not be offered or sold in Hong Kong by means of any document other than to (1) "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571) of Hong Kong and any rules made thereunder, or (2) in circumstances which do not result in the document being a "prospectus" as defined in the Companies Ordinance (Cap. 32) of the laws of Hong Kong or which do not constitute an offer to the public within the meaning of that Ordinance. No invitation, advertisement or document relating to the Notes may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to the Notes which are intended to be disposed of only to persons outside Hong Kong or only to "professional investors," as defined under the Securities and Futures Ordinance (Cap. 571) of the laws of Hong Kong and any rules made thereunder.

NOTICE TO ITALIAN INVESTORS

No action has been or will be taken which could allow an offering of the Notes to the public in the Republic of Italy within the meaning of Article 1, paragraph 1, letter t) of the Italian Financial Services Act and, in particular, the Exchange Offers have not been submitted to and/or cleared by CONSOB (the Italian securities exchange commission) and the offering of the Notes described in this Exchange Offer Memorandum has not been registered with CONSOB pursuant to Italian securities legislation and will not be subject to formal review or clearance by CONSOB.

Accordingly, the Notes may not be offered, sold or delivered, directly or indirectly, nor may copies of the following Exchange Offer Memorandum or of any other document relating to the Notes described in this Exchange Offer Memorandum be distributed in the Republic of Italy, except: (a) to qualified investors *(investitori qualificati*) ("**Qualified Investors**") pursuant to Article 2, paragraph (e) of the Prospectus Regulation, Article 100 of the Italian Financial Services Act, and implementing CONSOB regulations, including CONSOB Regulation No. 11971 of May 14, 1999, as amended ("**Issuers' Regulation**") and CONSOB Regulation No. 20307 of February 15, 2018, as amended ("**CONSOB Regulation on Intermediaries**") or (b) in any other circumstances which are exempted from the rules on public offerings pursuant to Article 1 of the Prospectus Regulation, Article 100 of the Italian Financial Services Act, Article 34-*ter* of the Issuers' Regulation and the applicable Italian laws and regulations.

The Notes may not be offered, sold or delivered and neither this Exchange Offer Memorandum nor any other material relating to the Notes may be distributed or made available in the Republic of Italy unless such offer, sale or delivery of Notes or distribution or availability of copies of this Exchange Offer Memorandum or any other offering material or other documentation relating to the Notes in the Republic of Italy is made in compliance with the selling restrictions above and must be made as follows: (a) by *soggetti abilitati* (including investment firms, banks or financial intermediaries, as defined by Article 1, first paragraph, letter r, of the Italian Financial Services Act) permitted to conduct such activities in Italy in accordance, as applicable, with the Legislative Decree No. 385 of September 1, 1993, as subsequently integrated and amended, (the "**Italian Consolidated Financial Act**"), the Italian Financial Services Act, the Issuers' Regulation, the CONSOB Regulation on Intermediaries and any other applicable laws and regulations; and (b) in compliance with all relevant Italian securities, tax and exchange control and other applicable laws and regulations and any other applicable requirements or limitations which may be imposed from time to time by CONSOB, the Bank of Italy (including, the reporting requirements, where applicable, pursuant to Article 129 of the Italian Consolidated Banking Act and the implementing guidelines of the Bank of Italy issued on August 25, 2015, as amended on August 10, 2016 and November 2, 2020 and as further amended from time to time) and/or any other competent Italian authority.

Any investor purchasing the Notes is solely responsible for ensuring that any offer, sale, delivery or resale of the Notes by such investor occurs in compliance with applicable laws and regulations.

NOTICE TO FRENCH INVESTORS

This Exchange Offer Memorandum has not been prepared and is not being distributed in the context of an offer to the public of financial securities in France within the meaning of Article L.411 1 of the French Code monétaire et financier and Title 1 of Book II of the *Règlement Général de l'Autorité des Marchés Financiers*, and has not been approved by, registered or filed with the *Autorité des marchés financiers* (the "**AMF**"), nor any competent authority of another EEA Member State that would have notified its approval to the AMF under the Prospectus Regulation as implemented in France and in any relevant EEA Member State. Therefore, the Notes may not be, directly or indirectly, offered or caused to be offered or sold to the public in France (*offre au public de titres financiers*) and this Exchange Offer Memorandum and any other offering or marketing material or information relating to the Notes has not been and will not be released, issued or distributed or caused to be released, issued or distributed to the public in France or used in connection with any offer for subscription or sales of the Notes to the public in France in any way that would constitute, directly or indirectly, an offer to the public in France. Offers, sales and distributions have only been and shall only be made in France to qualified investors *(investisseurs qualifiés*) acting solely for their own account (*agissant pour compte propre*) and/or to providers of investment services relating to portfolio management for the account of third parties *(personnes fournissant le service d'investissement de gestion de portefeuille pour compte de tiers*), all as defined in and in accordance with Articles L.411 1, L.411 2, D.411 1, D.411 4, D.744 1, D.754 1 and D.764 1 of the French Code monétaire et financier. Prospective investors are informed that (a) this Exchange Offer Memorandum has not been and will not be submitted for clearance to the AMF, (b) in compliance with Articles L.411 2, D.411 1, D.411 4, D.744 1, D.754 1 and D.764 1 of the French Code monétaire et financier, any qualified investors subscribing for the Optics Notes should be acting for their own account (*agissant pour compte propre*) and (c) the direct and indirect distribution or sale to the public of the Notes acquired by them may only be made in compliance with Articles L.411 1, L.411 2, L.412 1 and L.621 8 through L. 621 8 3 of the French Code monétaire et financier.

NOTICE TO JAPANESE INVESTORS

The Notes have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended, the "**Financial Instruments and Exchange Act**"). Accordingly, no Notes have been

offered or sold, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan (which term as used herein means any person resident in Japan, including any corporation or other entity organized under the laws of Japan) or to others for re-offering or re-sale, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the Financial Instruments and Exchange Act and other relevant laws and regulations of Japan.

NOTICE TO SINGAPOREAN INVESTORS

This Exchange Offer Memorandum has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, each Dealer Manager has not offered or sold any Notes or caused the Notes to be made the subject of an invitation for subscription or purchase and will not offer or sell any Notes or cause the Notes to be made the subject of an invitation for subscription or purchase, and has not circulated or distributed, nor will it circulate or distribute, this Exchange Offer Memorandum or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the Notes, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act 2001 of Singapore, as modified or amended from time to time (the "**SFA**")) pursuant to Section 274 of the SFA or (ii) to an accredited investor (as defined in Section 4A of the SFA) pursuant to and in accordance with the conditions specified in Section 275 of the SFA.

Notification under Section 309B(1) of the SFA — the Issuer has determined, and hereby notifies all persons (including all relevant persons (as defined in Section 309A(1) of the SFA)), that the Notes are prescribed capital markets products (as defined in the Securities and Futures (Capital Market Products) Regulations 2018 of Singapore) and Excluded Investment Products (as defined in Monetary Authority of Singapore ("MAS") Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

NOTICE TO SWISS INVESTORS

The offering if the Notes is not a public offering in Switzerland. The Notes offered hereby may not be publicly offered, sold, or advertised, directly or indirectly, in, into, or from Switzerland. This document is not intended to constitute an offer or solicitation to purchase or invest in the Optics Notes described herein. Neither this Exchange Offer Memorandum nor any other offering or marketing material relating to the Notes constitutes a prospectus as such term is understood pursuant to Article 652a or Article 1156 of the Swiss Code of Obligations, and neither this Exchange Offer Memorandum nor any other offering or marketing material relating to the Notes may be publicly distributed or otherwise made publicly available in Switzerland. The Notes offered hereby will not be listed on the SIX Swiss Exchange Ltd. or on any other exchange or regulated trading facility in Switzerland, and, therefore, the documents relating to the Notes offered hereby, including, but not limited to, this Exchange Offer Memorandum, do not claim to comply with the disclosure standards of the Swiss Code of Obligations and the listing rules of SIX Swiss Exchange Ltd. and corresponding prospectus schemes annexed to the listing rules of the SIX Swiss Exchange Ltd.

ITALIAN "WHITE LIST STATES"

In order to qualify as eligible to receive interest free from Italian *Imposta Sostitutiva* (Italian Substitute Tax) under Italian Legislative Decree No. 239 of April 1, 1996 (the "**Decree No. 239**"), *inter alia*, non-Italian resident holders of the Notes and beneficial interest therein, subject to certain formalities, must be beneficial owners resident for tax purposes in, or be "institutional investors" established in, a country which the Italian government identifies as allowing for a satisfactory exchange of information with Italy, as listed in the Italian Ministerial Decree dated September 4, 1996, as amended from time to time, pursuant to Article 11, paragraph 4, let. c) of Decree No. 239 (the "**White List**"). See "*Certain Tax Considerations—Certain Italian Tax Considerations*." Subject to certain limited exceptions, such as for central banks and supranational bodies established in accordance with international agreements in force in Italy, this residency requirement applies to all holders of the Notes and beneficial interests therein, including ultimate beneficiaries of interest payments under the Notes holding via sub-accounts to which interests in the Notes may be allocated upon purchase or thereafter. In the case of failure to comply with the requirements and procedures set forth in Decree No. 239, an Italian Substitute Tax will apply on any payment made in respect of the Notes to a non-Italian resident holder of the Notes, at a rate of 26.0% or the rate applicable pro tempore under Decree No. 239 (possibly reducible under double taxation treaties entered into by Italy, where applicable). As of April 1, 2024, the White List includes the following countries:

Albania	Ecuador	Lithuania	Singapore
Alderney (Channel Island)	Egypt	Luxembourg	Sint Maarten
Algeria	Estonia	Macedonia	Slovak Republic
Andorra, Principality of	Ethiopia	Malaysia	Slovenia
Anguilla, The Island of	Faroe Islands	Malta	South Africa
Argentina	Finland	Mauritius	Spain
Armenia	France	Mexico	Sri Lanka
Aruba	Georgia	Moldova	Sweden
Australia	Germany	Monaco, Principality of	Switzerland
Austria	Ghana	Montenegro	Syria
Azerbaijan	Gibraltar	Montserrat	Taiwan
Bangladesh	Greece	Morocco	Tajikistan
Barbados, The Island of	Greenland	Mozambique	Tanzania
Belarus	Guernsey (Channel Islands)	Nauru, Republic of	Thailand
Belgium	Herm (Channel Islands)	New Zealand	Trinidad and Tobago
Belize	Holy See (Vatican City State)	Netherlands	Tunisia
Bermuda Islands	Hong Kong	Nigeria	Turkey
Bosnia and Herzegovina	Hungary	Niue	Turkmenistan
Brazil	Iceland	Norway	Turks and Caicos Islands
British Virgin Islands	India	Oman	Uganda
Bulgaria	Indonesia	Pakistan	Ukraine
Cameroon	Ireland	Philippines	United Arab Emirates
Canada	Isle of Man	Poland	United Kingdom
Cayman Islands	Israel	Portugal	United States of America
Chile		Qatar	Uruguay
China	Japan	Romania	Uzbekistan
Colombia	Jersey (Channel Islands)	Russian Federation	Venezuela

You are advised to consult your own attorney, accountant and business adviser as to legal, tax, business, financial and related matters concerning the purchase of Notes. The White List may change and the Issuer has no obligation to provide notice of any such change. Holders of the Notes will bear the risk of changes in the White List and should therefore inform themselves of any such changes.

IMPORTANT INFORMATION RELATING TO THE USE OF THIS EXCHANGE OFFER MEMORANDUM AND OFFERS OF NOTES GENERALLY

This Exchange Offer Memorandum does not constitute an offer to sell or the solicitation of an offer to buy any Notes in any jurisdiction to any person to whom it is unlawful to make the offer or solicitation in such jurisdiction. The distribution of this Exchange Offer Memorandum and the offer or sale of Notes may be restricted by law in certain jurisdictions. None of the Issuer, TIM Guarantor and the Dealer Managers represent that this Exchange Offer Memorandum may be lawfully distributed, or that any Notes may be lawfully offered, in compliance with any applicable registration or other requirements in any such jurisdiction, or pursuant to an exemption available thereunder,

or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by the Issuer, TIM Guarantor and the Dealer Managers which would permit a public offering of any Notes or distribution of this Exchange Offer Memorandum in any jurisdiction where action for that purpose is required. Accordingly, no Notes may be offered or sold, directly or indirectly, and neither this Exchange Offer Memorandum nor any advertisement or other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable laws and regulations. Persons into whose possession this Exchange Offer Memorandum or any Notes may come must inform themselves about, and observe, any such restrictions on the distribution of this Exchange Offer Memorandum and the offering and sale of Notes. In particular, there are restrictions on the distribution of this Exchange Offer Memorandum and the offer or sale of Notes in the United States, the EEA (including the Republic of Italy and France), the United Kingdom, Japan, Switzerland, Hong Kong and Singapore. See "*Offer Restrictions*."

TERMS OF THE EUR TIF EXCHANGE OFFER

General

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, the EUR TIM Exchange Offer Memorandum and the USD Exchange Offer Memorandum, TIM, TIF and TICAP are inviting holders to offer for exchange their EUR TIM Original Notes, EUR TIF Original Notes and /or USD Original Notes in an aggregate principal amount up to €5.0 billion to be accepted across the Exchange Offers in the sole discretion of TIM, TIF and/or TICAP, as applicable (the "**Total Cap**") for an equal aggregate principal amount of corresponding EUR TIM New Notes, EUR TIF New Notes and/or USD New Notes. TIM, TIF and TICAP (acting together) reserve the right, but are not obligated, to increase the Total Cap in their sole and absolute discretion, subject to applicable laws, and Holders of EUR TIF Original Notes will not be entitled to any revocation rights as a result of such increase.

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, TIF is hereby inviting Eligible Holders to offer for exchange their EUR TIF Original Notes (the "**EUR TIF Initial Exchange**") for an equal aggregate principal amount of the corresponding EUR TIF New Notes subject to the Total Cap.

If, on or prior to October 15, 2024 or any further date agreed prior to the then current longstop date between TIM and Optics pursuant to the Transaction Agreement (as defined herein) and announced to the relevant Noteholders promptly thereafter, (the "**Longstop Date**"), the Acquisition (i) is, or will be, consummated (such date the Acquisition is consummated, the "**Acquisition Closing Date**"), then upon no less than five business days prior notice by TIF to the principal paying agent for the EUR TIF New Notes (the "**New Notes Agent**"), Optics, and the Holders of the EUR TIF New Notes (in accordance with the relevant Conditions), on the Acquisition Closing Date, the EUR TIF New Notes will be mandatorily exchanged without the need for further action by the relevant Noteholders (the "**EUR TIF Mandatory Acquisition Exchange**") for an equal aggregate principal amount of EUR Optics (TIF) Notes to be issued by Optics with terms substantially the same as the terms of the EUR TIF New Notes including maturity, interest rate, interest payment dates and other material terms, except for the provisions relating to them being secured and certain other provisions as set forth in the relevant description of such EUR Optics (TIF) Notes included elsewhere in this Exchange Offer Memorandum, or (ii) is not, or will not be, consummated on or prior to the Longstop Date, then the EUR TIF New Notes will remain outstanding as a separate series not fungible with the EUR TIF Original Notes not validly offered for exchange or otherwise accepted as part of the EUR TIF Exchange Offer. The EUR TIF Mandatory Acquisition Exchange will be completed on a mandatory basis pursuant to the terms set out in the EUR TIF New Notes by exchanging the EUR Optics (TIF) Notes for the outstanding EUR TIF New Notes through the relevant Clearing System(s) and no consent or any other action will be required by the holders of the EUR TIF New Notes for the EUR TIF Mandatory Acquisition Exchange to take place. See "*Terms and Conditions of the EUR TIF New Notes—The Notes Exchanges*". Upon consummation of the EUR TIF Mandatory Acquisition Exchange, the EUR TIF New Notes will be cancelled.

EUR TIF Initial Exchange

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, on the EUR Settlement Date, in exchange for each €1,000 in principal amount of EUR TIF Original Notes that is validly offered for exchange (and not validly withdrawn) on or prior to the EUR Expiration Time and accepted for exchange by TIF in the EUR TIF Initial Exchange (and subject to the Minimum Exchange Amount), each Participating Holder of EUR TIF Original Notes will receive €1,000 in principal amount of the EUR TIF New Notes (the "**EUR Exchange Consideration**").

In addition to the EUR Exchange Consideration, on the EUR Settlement Date, Participating Holders whose EUR TIF Original Notes are accepted for exchange pursuant to the EUR TIF Exchange Offer will also be paid (i) accrued and unpaid interest, if any, in respect of EUR TIF Original Notes validly offered for exchange (and not validly withdrawn) and accepted for exchange by TIF for the period from, and including, the immediately preceding interest payment date in respect of the EUR TIF Original Notes up to, but excluding, the EUR Settlement Date by TIF in cash (rounded to the nearest €0.01, with €0.005 rounded upwards) (the "**Accrued Interest Amount in respect of the EUR TIF Original Notes**") and (ii) the Participation Premium.

Eligible Holders of EUR TIF Original Notes whose EUR TIF Original Notes are not accepted for exchange by TIF or who do not offer for exchange and Ineligible Holders will continue to be paid interest according to the terms of the EUR TIF Original Notes.

Eligible Holders who wish to participate in the EUR TIF Exchange Offer must offer for exchange their EUR TIF Original Notes for an aggregate principal amount of EUR TIF Original Notes that is sufficient to receive at least €100,000 in principal amount of EUR TIF New Notes in the EUR TIF Exchange Offer (the "**Minimum Exchange Amount**").

The EUR TIF New Notes will be issued in minimum denominations of €100,000 and in integral multiples of €1,000 in excess thereof. TIF will not accept for exchange any offer that would result in the issuance of less than €100,000 in principal amount of EUR TIF New Notes to a Participating Holder. As a result, a Holder will be unable to participate in the EUR TIF Exchange Offer if such Holder's ownership of EUR TIF Original Notes is not at a sufficient level to meet the required minimum denomination and the Minimum Exchange Amount. EUR TIF Original Notes accepted by TIF for exchange shall be cancelled in accordance with the terms and conditions of such EUR TIF Original Notes.

EUR TIF Mandatory Acquisition Exchange

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, on the Acquisition Closing Date, and pursuant to the EUR TIF Mandatory Acquisition Exchange, in exchange for each €1,000 in principal amount of EUR TIF New Notes outstanding, each Holder of EUR TIF New Notes will mandatorily receive €1,000 in principal amount of EUR Optics (TIF) Notes. On the Acquisition Closing Date, Holders of EUR TIF New Notes will also be paid accrued and unpaid interest, if any, in respect of EUR TIF New Notes for the period from, and including, the later of (x) the immediately preceding interest payment date in respect of the EUR TIF New Notes and (y) the EUR Settlement Date, as applicable, up to, but excluding, the Acquisition Closing Date by TIF in cash (rounded to the nearest €0.01, with €0.005 rounded upwards) (the "**Accrued Interest Amount in respect of the EUR TIF New Notes**").

Interest on the EUR Optics (TIF) Notes will accrue from the issue date of the EUR Optics (TIF) Notes.

The terms of the EUR Optics (TIF) Notes will be substantially the same as the terms of the EUR TIF New Notes, including the same maturity date, interest payment dates and interest rate as the EUR TIF New Notes, except for the provisions relating to them being secured and certain other provisions as set forth in the relevant description of such EUR Optics (TIF) Notes included elsewhere in the Exchange Offer Memorandum. See "*Summary—Summary of the EUR (TIF) Optics Notes—*", "*Terms and Conditions of the EUR Optics (TIF) Notes*" and "*Risk Factors—Risks Relating to the EUR Optics (TIF) Notes*". Moreover, on their issue date, the EUR Optics (TIF) Notes will not be guaranteed and will be secured on a first priority basis by 100% of the share capital of Optics and certain receivables arising from material intercompany loans granted to Optics (if any) (the "**Optics Notes Issue Date Collateral**"). Within 60 days after the Acquisition Closing Date if the Push-Down Merger (as defined herein) has not occurred, (i) Optics will procure that, subject to certain agreed security principles and certain significant limitations under applicable laws, NetCo guarantees the EUR Optics (TIF) Notes and (ii) the EUR Optics (TIF) Notes will be secured, subject to certain agreed security principles and certain perfection requirements, by first-ranking security interests in the share capital of NetCo held by Optics (on a basis whereby (a) the grant of security shall not trigger any tag-along rights in favor of any shareholder of NetCo and (b) the enforcement of such security will not be subject to any lock-up under any shareholder arrangements relating to the shares in NetCo) and certain receivables arising from material intercompany loans granted to NetCo, if any (the "**Optics Notes Post-Issue Date Collateral**"). Fastweb currently owns a 4.5% stake in FiberCop. Subject to the outcome of current negotiations among the parties, Optics may acquire Fastweb's stake in NetCo or Fastweb may remain a minority shareholder in NetCo following the Acquisition. If Fastweb continues to be a shareholder of NetCo following the Acquisition, the minority stake of Fastweb is expected to be diluted in connection with the consummation of the Acquisition. To the extent Fastweb remains a shareholder in NetCo following the Transactions, it is not expected to pledge the stake it owns in NetCo, including after the occurrence of the Push-Down Merger. In the event that the Push-Down Merger cannot be effected with the security interests over the shares of NetCo held by Optics and/or intercompany loans made available by Optics HoldCo to Optics remaining in place, such security interests shall be released in order to effect the Push-Down Merger and Optics HoldCo shall within 20 Business Days following the Push-Down Merger, enter into the Optics Notes Replacement Collateral. However, pursuant to the terms of the Intercreditor Agreement, the holders of the EUR Optics (TIF) Notes

will share equally with the lenders of the Optics Financing Arrangements, the holders of the EUR Optics (TIM) Notes, if any, and the holders of the USD Optics Notes, if any, the proceeds of the enforcement of the Optics Notes Collateral. See "*Summary—Summary of the EUR Optics (TIF) Notes—*", "*Terms and Conditions of the EUR Optics (TIF) Notes*" and "*Risk Factors—Risks Relating to the EUR Optics Notes*". The value of the collateral securing the EUR Optics (TIF) Notes may not be sufficient to satisfy Optics' obligations under the EUR Optics (TIF) Notes, as applicable, and such collateral may be reduced or diluted under certain circumstances. See also "*Risk Factors—Risks Relating to the Optics Notes—Once granted, the guarantees, including the NetCo Guarantee, and the Optics Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability"* and "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations.*"

Completion of the EUR TIF Exchange Offer is subject to the satisfaction or waiver of certain conditions as set forth in this Exchange Offer Memorandum. See "*Conditions of the EUR TIF Exchange Offer*". TIF reserves the right to waive any or all of the conditions to the EUR TIF Exchange Offer in its sole discretion, subject to applicable law or to terminate or withdraw the EUR TIF Exchange Offer at any time and for any reason before any EUR TIF Original Notes are accepted for exchange, including based on the acceptance rate and outcome of the EUR TIF Exchange Offer if any of the conditions described herein are not satisfied or waived. In addition, TIF has the right to extend, reopen, amend, terminate or withdraw, in its sole discretion, the EUR TIF Exchange Offer at any time and for any reason before any EUR TIF Original Notes are accepted for exchange, including if the conditions to the EUR TIF Exchange Offer described under "*Conditions of the EUR TIF Exchange Offer*" are not satisfied or waived.

Valid Instructions

Holders of EUR TIF Original Notes held through the Clearing Systems should note that, by delivering an Instruction, they will agree that (subject to the rights of such Holders to revoke their Instruction in the limited circumstances described in "Holders' Rights of Revocation") their EUR TIF Original Notes will be, and will remain, blocked in the relevant Clearing System and transfers thereof will be restricted, with effect from and including the date on which their Instruction is received by the relevant Clearing System until the earliest of (i) the date on which they validly revoke their Instruction in the limited circumstances in which such revocation is permitted (see "*Holders' Rights of Revocation*"), (ii) the date on which the EUR TIF Exchange Offer is terminated or withdrawn and (iii) the time of settlement of the EUR TIF Initial Exchange on the EUR Settlement Date, all in accordance with the normal operating procedures of such Clearing System, and after taking into account the deadlines imposed by such Clearing System.

TIF will at all times have the discretion to accept any EUR TIF Original Notes for exchange pursuant to the EUR TIF Exchange Offer, the offer of which would otherwise be invalid or, in the sole opinion of TIF, may otherwise be invalid.

Holders' Rights of Revocation

The submission of any Instruction, in accordance with the procedures set out in the section headed "*Procedures for Participating in the EUR TIF Exchange Offer*" will be irrevocable except in the limited circumstances described in "*Termination, Withdrawal and Amendment of the EUR TIF Exchange Offer*" below.

Extension of certain dates

Subject to applicable law, TIF may, in its sole discretion (but without giving revocation rights to Holders pursuant to "*Holders' Rights of Revocation*"), extend the EUR Expiration Time by giving notice to the Holders of EUR TIF Original Notes through the Clearing Systems and on the website of Luxembourg Stock Exchange.

At any time when the Issuer extends the EUR Expiration Time, it may, at the same time and in the same notice, extend the other dates set out herein.

Eligible Holders

A Holder who is an Ineligible Holder may not receive any EUR TIF New Notes or EUR Optics (TIF) Notes pursuant to the EUR TIF Exchange Offer (including the mandatory EUR TIF Mandatory Acquisition Exchange). Any Holder

of EUR TIF Original Notes seeking to participate in the EUR TIF Exchange Offer and holding less than the Minimum Exchange Amount immediately prior to the EUR Settlement Date shall be deemed to be an Ineligible Holder.

Holders should also note that, without prejudice to any other right of action which may be available to TIF, TIF reserves the right to conduct whatever investigation it deems necessary (including requiring the delivery of evidence satisfactory to it as to a Holder's status as an Eligible Holder or, as the case may be, an Ineligible Holder) in order to satisfy itself that it is appropriate for it to deliver the EUR TIF New Notes to an Eligible Holder.

Holders must satisfy themselves as to their status as an Eligible Holder or otherwise. The form of Instruction requires the relevant Holder to represent and warrant that it is an Eligible Holder. Failure to do so will result in TIF treating the relevant Holder as being an Ineligible Holder unless TIF in its sole discretion determines otherwise.

As it may be unlawful in certain jurisdictions to deliver (or be deemed to have delivered) EUR TIF New Notes to Holders, Holders who are residents, citizens, nationals of or have otherwise some form of connection with certain jurisdictions are required to inform themselves about and observe any applicable legal requirements. It is the responsibility of any such person to satisfy themselves as to the full observance of the laws of the relevant jurisdiction in connection therewith, including the obtaining of any governmental, exchange control or other consents which may be required and the compliance with any other necessary formalities.

For the purposes of the EUR TIF Exchange Offer:

"**Eligible Holder**" means a person who holds EUR TIF Original Notes and:

- either (i)(A) is the beneficial owner of the EUR TIF Original Notes being offered for exchange and (B) is located outside the United States and is participating in the EUR TIF Exchange Offer from outside the United States and is not a U.S. person or (ii)(A) is acting on behalf of the beneficial owner of the EUR TIF Original Notes being offered for exchange on a non-discretionary basis and has been duly authorized to so act and (B) such beneficial owner has confirmed to such person that it is located outside the United States and is participating in the EUR TIF Exchange Offer from outside the United States and is not a U.S. person;

- is, and (if acting as an intermediary) each person for whom such person is acting as intermediary and who is making an investment decision in respect of the EUR TIF New Notes, is, a person that is not a "retail investor" in the EEA or in the UK;

- is not a person to whom it is unlawful to make the EUR TIF Exchange Offer under the applicable securities laws, and such person has not distributed or forwarded the Exchange Offer Memorandum or any other documents or materials relating to the EUR TIF Exchange Offer to any person(s) to whom such distribution cannot be lawfully made, and that such person has (before submitting, or arranging for the submission on its behalf, as the case may be, of the Instruction) complied with all laws and regulations applicable to it for the purpose of its participation in the EUR TIF Exchange Offer;

- such person's participation in the EUR TIF Exchange Offer will not result in a breach of any relevant laws or regulations in the jurisdiction in which it is resident or from which it is submitting an Instruction; and

- is not, nor is he/she acting on behalf of a, Sanctions Restricted Person (as defined herein), provided that this representation shall only apply if and to the extent that it would not result in a violation or breach of, or conflict with, (a) Council Regulation (EC) No 2271/96 of November 22, 1996 (or any law or regulation implementing such Regulation in any member state of the European Union, including Section 7 of the German Foreign Trade Ordinance (*Außenwirtschaftsverordnung*)); (b) any similar blocking or anti-boycott law of the United Kingdom (including, without limitation, Council Regulation (EC) No 2271/96 as it forms a part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018).

TIF reserves the right (in its sole discretion) to permit a Holder who is prima facie not an Eligible Holder to receive the relevant EUR TIF New Notes if requested by such Holder provided TIF is satisfied that to do so would not contravene the applicable laws and regulations of any relevant jurisdiction.

For the purposes of this Exchange Offer Memorandum, a "**retail investor**" means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II or as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the EUWA, (ii) a customer within the meaning of the Insurance Distribution Directive, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II or a consumer within the meaning of the provisions of the FSMA, and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that consumer would not qualify as a professional client, as defined in point (8) of Article 2(1) of UK MiFIR, (iii) not a qualified investor as defined in the Prospectus Regulation or as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA.

Announcements

Unless stated otherwise, announcements in connection with the EUR TIF Exchange Offer will substantially simultaneously be made by: (i) the delivery of notices to the Clearing Systems for communication to Direct Participants and (ii) publication on the website of Luxembourg Stock Exchange, and may also be found on the relevant Reuters International Insider Screen. Copies of all such announcements, press releases and notices can also be obtained from the Exchange and Information Agent, the contact details for which are on the last page of this Exchange Offer Memorandum. Significant delays may be experienced where notices are delivered to the Clearing Systems and Holders are urged to contact the Exchange and Information Agent for the relevant announcements during the course of the EUR TIF Exchange Offer. In addition, Holders of EUR TIF Original Notes may contact the Dealer Managers for information using the contact details on the last page of this Exchange Offer Memorandum.

Governing law

The EUR TIF Exchange Offer and any non-contractual obligations arising out of or in connection with the EUR TIF Exchange Offer, shall be governed by and construed in accordance with English law (see also "*Procedures for Participating in the EUR TIF Exchange Offer—Governing Law*").

EUR Minimum Series Exchange Condition, Final Series Acceptance Amount and Pro-Ration Factor

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, the EUR TIF Exchange Offer is conditional upon valid offers for exchange being received from (and not being validly withdrawn by) Eligible Holders of EUR TIF Original Notes and accepted in the EUR TIF Exchange Offer in a sufficient aggregate principal amount such that at least €300,000,000 in aggregate principal amount of EUR TIF New Notes would be issued, upon consummation of the EUR TIF Initial Exchange by TIF (the "**EUR Minimum Series Exchange Condition**"). TIF may elect, in its sole discretion, subject to applicable law, to decrease, increase or waive the EUR Minimum Series Exchange Condition with respect to the EUR TIF Original Notes and Holders will not be entitled to any revocation rights as a result of such increase, decrease or waiver. Accordingly, Holders should not rely on the EUR Minimum Series Exchange Condition in making their decision as to whether to offer for exchange their relevant EUR TIF Original Notes for exchange in the EUR TIF Exchange Offer. The EUR TIF Exchange Offer is also subject to the satisfaction or waiver of certain additional general conditions, each as described in this Exchange Offer Memorandum. See "*Conditions of the EUR TIF Exchange Offers*" beginning on page 18.

Upon the terms and subject to the conditions set forth in this Exchange Offer Memorandum, if TIF decides, in its sole discretion, to accept for exchange valid offers to exchange EUR TIF Original Notes pursuant to the EUR TIF Exchange Offer, the final acceptance amount for the EUR TIF Original Notes (the "**Final Series Acceptance Amount**") will be determined by TIF in its sole and absolute discretion and will be announced by TIF as soon as reasonably practicable following the EUR Expiration Time. For the avoidance of doubt, TIF will determine the Final Series Acceptance Amount in its sole and absolute discretion. In the event that the principal amount of EUR TIF Original Notes validly offered for exchange (and not validly withdrawn) exceeds the Final Series Acceptance Amount, offers to exchange in respect of the EUR TIF Original Notes are to be accepted by TIF on a pro rata basis and, for the purposes of such acceptance, each such offer for exchange will be scaled by a factor (the "**Pro-Ration Factor**") equal to (i) the Final

Series Acceptance Amount for the EUR TIF Original Notes, divided by (ii) the aggregate principal amount of the EUR TIF Original Notes that have been validly offered (and not validly withdrawn) for exchange (subject to adjustment to allow for the aggregate principal amount of the relevant EUR TIF Original Notes accepted for exchange to equal the Final Series Acceptance Amount). Each such offer for exchange will be rounded up or down to the nearest €1,000 in principal amount, after application of the Pro- Ration Factor, subject to the treatment of minimum denominations and the Minimum Exchange Amount (as defined below) as set out herein.

If application of the Pro-Ration Factor will result in either (i) the relevant Noteholder who is transferring EUR TIF Original Notes to TIF receiving less than the minimum denomination of the EUR TIF New Notes on exchange or (ii) EUR TIF Original Notes in a principal amount of less than €1,000 being returned to a Noteholder, then TIF will, in its sole and absolute discretion, either reject or accept all of such Noteholder's validly tendered EUR TIF Original Notes. EUR TIF Original Notes not accepted for exchange as a result of pro-ration will be returned to the relevant Noteholder. The calculations of the Pro- Ration Factor will be made by TIF and such calculations will be final and binding on all Eligible Holders, absent manifest error.

Consequences of Failure to Participate in the EUR TIF Exchange Offer

Any EUR TIF Original Notes that are not exchanged in the EUR TIF Exchange Offer will remain outstanding and will be entitled to the rights and benefits their holders have under the applicable terms and conditions thereof. If a sufficiently large aggregate principal amount of EUR TIF Original Notes does not remain outstanding after the EUR TIF Exchange Offer, the trading markets for the remaining outstanding aggregate principal amount of EUR TIF Original Notes may be less liquid. See "*Risk Factors—Risks Relating to the Non-Exchanging Holders of the Original Notes— The Exchange Offers may result in reduced liquidity for the Original Notes that are not exchanged*."

Delivery of EUR TIF New Notes

If EUR TIF Original Notes validly offered for exchange (and not validly withdrawn) pursuant to the EUR TIF Exchange Offer are accepted for exchange by TIF, the EUR TIF New Notes will be delivered on the EUR Settlement Date.

The EUR TIF New Notes will be delivered and the relevant Accrued Interest Amount in respect of the EUR TIF Original Notes and Participation Premium shall be paid in cash, to the Clearing System accounts in which the relevant EUR TIF Original Notes are held (see "*Procedures for Participating in the EUR TIF Exchange Offer*").

Provided TIF, or a person acting on TIF's behalf, delivers the relevant EUR TIF New Notes, the Accrued Interest Amount in respect of the EUR TIF Original Notes and Participation Premium in exchange for the EUR TIF Original Notes accepted for exchange by TIF in the EUR TIF Exchange Offer to the Clearing Systems on or before the EUR Settlement Date, under no circumstances will any additional interest be payable to a Participating Holder because of any delay in the delivery of EUR TIF New Notes by, or transmission of funds from, the relevant Clearing System or any other intermediary with respect to such EUR TIF Original Notes of that Participating Holder.

Termination, Withdrawal and Amendment of the EUR TIF Exchange Offer

Notwithstanding any other provision of the EUR TIF Exchange Offer, TIF, subject to applicable laws, at its option and in its sole discretion, at any time may:

- extend the EUR Expiration Time or re-open the EUR TIF Exchange Offer, as applicable (in which case all references in this Exchange Offer Memorandum to "*Expiration Time*" shall, unless the context otherwise requires, be to the latest time and date to which the EUR Expiration Time has been so extended or the EUR TIF Exchange Offer reopened);

- otherwise amend the EUR TIF Exchange Offer in any respect; or

- terminate the EUR TIF Exchange Offer.

TIF will ensure Holders of the EUR TIF Original Notes are notified of any such extension, re-opening, amendment or termination as soon as is reasonably practicable after the relevant decision is made. Such announcements will be made substantially simultaneously by (i) delivery of notices to the Clearing Systems for communication to Direct Participants and (ii) publication on the website of Luxembourg Stock Exchange, and may also be found on the relevant Reuters International Insider Screen. Copies of all such announcements, press releases and notices can also be obtained from the Exchange and Information Agent, the contact details for whom are on the last page of this Exchange Offer Memorandum.

If TIF amends any of the terms of the EUR TIF Exchange Offer in any way that, in the opinion of TIF (in consultation with the Dealer Managers) is materially prejudicial to Eligible Holders that have already submitted Instructions before the announcement of such amendment (which announcement shall include a statement whether in the opinion of the Issuer such amendment is materially prejudicial to such Eligible Holders), then all Instructions of affected EUR TIF Original Notes may be revoked at any time from the date and time of such announcement until 10:00 a.m. (CET) on the second day, other than a Saturday or Sunday or a public holiday on which commercial banks and foreign exchange markets are open for business in Luxembourg following such announcement (subject to the earlier deadlines required by the Clearing Systems and any intermediary through which such Eligible Holders hold their relevant EUR TIF Original Notes).

For the avoidance of doubt, any decision to increase, decrease or waive the EUR Minimum Series Exchange Condition with respect to the EUR TIF Original Notes and/or the Total Cap shall not be considered to be materially prejudicial to Noteholders.

Any decision by TIF to extend the EUR Expiration Time or re-open the EUR TIF Exchange Offer in accordance with "*Termination, Withdrawal and Amendment of the EUR TIF Exchange Offer*" above shall not be considered to be materially prejudicial to Eligible Holders that have already submitted Instructions before the announcement of such extension or re-opening and will not result in such Eligible Holders of the EUR TIF Original Notes receiving the right of revocation.

Eligible Holders wishing to exercise any such right of revocation should do so in accordance with the procedures set out in "*Procedures for Participating in the EUR TIF Exchange Offer*". Beneficial owners of EUR TIF Original Notes that are held through an intermediary are advised to check with such entity when it would require receipt of instructions to revoke an Instruction, in order to meet the above deadline. For the avoidance of doubt, any Eligible Holder who does not exercise any such right of revocation in the circumstances and in the manner specified above, shall be deemed to have waived such right of revocation and its original Instruction, will remain effective.

Certain Other Matters

TIF reserves the right at any time or from time to time to issue an invitation to Holders of the EUR TIF Original Notes to offer for exchange their EUR TIF Original Notes, on terms that may be more or less favorable than those contemplated by this Exchange Offer Memorandum.

ACCEPTANCE OF EUR TIF ORIGINAL NOTES; ACCRUAL OF INTEREST

Acceptance of EUR TIF Original Notes for Exchange

If the conditions to the EUR TIF Exchange Offer are satisfied, including the EUR Minimum Series Exchange Condition for the EUR TIF Original Notes or if TIF waives all of such conditions that have not been satisfied, and if TIF does not terminate the EUR TIF Exchange Offer, TIF will accept for exchange on the EUR Settlement Date, with respect to the EUR TIF Original Notes up to the Final Series Acceptance Amount validly offered (as described in "*Procedures for Participating in the EUR TIF Exchange Offer*") in the EUR TIF Exchange Offer and not validly withdrawn, the EUR TIF Original Notes to be exchanged by notifying the Exchange and Information Agent of TIF's acceptance, subject to the terms and conditions set forth in this Exchange Offer Memorandum, as described above under "*Terms of the EUR TIF Exchange Offer—General*". TIF must give such notice in writing to the Exchange and Information Agent and by making public disclosure by press release or other appropriate means to the extent required by law.

TIF expressly reserves the right, in its sole discretion, to delay acceptance of EUR TIF Original Notes offered for exchange pursuant to the EUR TIF Exchange Offer in order to comply with applicable laws.

TIF will at all times have the discretion to accept any EUR TIF Original Notes offered for exchange, the offer of which would otherwise be invalid or, in the sole opinion of TIF, may otherwise be invalid.

TIF is not under any obligation to accept any offer of EUR TIF Original Notes for exchange pursuant to the EUR TIF Exchange Offer and shall not be liable to any person for the failure to accept any offer of EUR TIF Original Notes for exchange pursuant to the EUR TIF Exchange Offer. Offers of EUR TIF Original Notes for exchange may be rejected in the sole discretion of TIF for any reason and TIF is not under any obligation to Holders of the EUR TIF Original Notes to furnish any reason or justification for refusing to accept an offer of EUR TIF Original Notes for exchange. For example, offers of EUR TIF Original Notes for exchange may be rejected if the EUR TIF Exchange Offer is terminated, if such offer does not comply with the relevant requirements of a particular jurisdiction, if the principal amount of EUR TIF Original Notes offered for exchange is not at least equal to the Minimum Exchange Amount, or for any other reason.

In all cases, TIF will only exchange EUR TIF Original Notes for EUR TIF New Notes after the submission of a valid Instruction in accordance with the procedures described in "*Procedures for Participating in the EUR TIF Exchange Offer*". These procedures include the blocking of the EUR TIF Original Notes offered for exchange in the relevant account in the relevant Clearing System from the date the relevant Instruction is submitted until the earliest of (i) the date on which they validly revoke their Instruction in the limited circumstances in which such revocation is permitted (see "*Terms of the EUR TIF Exchange Offer – Holders' Rights of Revocation*"), (ii) the date on which the EUR TIF Exchange Offer is terminated or withdrawn and (iii) the time of settlement of the EUR Initial Exchange on the EUR Settlement Date, all in accordance with the normal operating procedures of such Clearing System, and after taking into account the deadlines imposed by such Clearing System.

Accrued Interest

On the EUR Settlement Date, Participating Holders of EUR TIF Original Notes will receive a cash payment of the accrued and unpaid interest, if any, in respect of EUR TIF Original Notes validly offered for exchange (and not validly withdrawn), and accepted for exchange by TIF for the period from, and including, the immediately preceding interest payment date in respect of the EUR TIF Original Notes up to, but excluding, the EUR Settlement Date (the "**Accrued Interest Amount in respect of the EUR TIF Original Notes**"), and interest on the EUR TIF New Notes will begin to accrue on the issue date of the EUR TIF New Notes.

On the Acquisition Closing Date, Holders of EUR TIF New Notes will receive a cash payment from the Issuer of the accrued and unpaid interest, if any, in respect of EUR TIF New Notes for the period from, and including, the later of (x) the immediately preceding interest payment date in respect of the EUR TIF New Notes and (y) the EUR Settlement Date, as applicable, up to, but excluding, the Acquisition Closing Date (the "**Accrued Interest Amount in respect of the EUR TIF New Notes**"), and interest on the EUR Optics (TIF) Notes will begin to accrue on the issue date of the EUR Optics (TIF) Notes.

Under no circumstances will any special interest be payable because of any delay in the transmission of funds to any Participating Holder of EUR TIF Original Notes with respect to the EUR TIF New Notes to be received in exchange for the EUR TIF Original Notes or with respect to the EUR Optics (TIF) Notes to be received in exchange for EUR TIF New Notes in the EUR TIF Mandatory Acquisition Exchange or otherwise.

PROCEDURES FOR PARTICIPATING IN THE EUR TIF EXCHANGE OFFER

Holders who need assistance with respect to the procedures for participating in the EUR TIF Exchange Offer should contact the Exchange and Information Agent, the contact details for whom are on the last page of this Exchange Offer Memorandum.

Summary of action to be taken

In order to participate in the EUR TIF Exchange Offer, each Holder must deliver, or arrange to have delivered on its behalf, Instructions through the Clearing Systems in accordance with the procedures of, and within the time limit specified by, the Clearing Systems for receipt by the Exchange and Information Agent on or prior to the EUR Expiration Time. TIF will only accept an offer of EUR TIF Original Notes for exchange by way of the submission of a valid Instruction in accordance with the procedures set out in this section.

Holders are advised to check with any bank, securities broker or other intermediary through which they hold EUR TIF Original Notes when such intermediary would require to receive instructions to participate in, or (in the limited circumstances in which revocation is permitted) revoke their instruction to participate in, the EUR TIF Exchange Offer in order to meet the deadlines specified in this Exchange Offer Memorandum. ***The deadlines set by any such intermediary and each Clearing System for the submission and withdrawal of Instructions will be earlier than the relevant deadlines specified in this Exchange Offer Memorandum****.*

Submission of Instructions

The offer of EUR TIF Original Notes by a Holder for exchange or the submission of an Instruction will be deemed to have occurred upon receipt by the Exchange and Information Agent from the relevant Clearing System of a valid Instruction submitted in accordance with the requirements of such Clearing System.

The receipt of an Instruction by the relevant Clearing System will be acknowledged in accordance with the standard practices of such Clearing System and will result in the blocking of the relevant EUR TIF Original Notes in the relevant Holder's account, so that no transfers may be effected in relation to such EUR TIF Original Notes.

Holders must take the appropriate steps through the relevant Clearing System so that no transfers may be effected in relation to such blocked EUR TIF Original Notes at any time after the date of submission of such Instruction, in accordance with the requirements of the relevant Clearing System and the deadlines required by such Clearing System. By blocking such EUR TIF Original Notes in the relevant Clearing System, each Direct Participant will be deemed to consent to have the relevant Clearing System provide details concerning such Direct Participant's identity to the Exchange and Information Agent (and for the Exchange and Information Agent to provide such details to TIF and the Dealer Managers).

Only Direct Participants may submit Instructions. Each Holder that is not a Direct Participant must arrange for the Direct Participant through which such Holder holds its EUR TIF Original Notes to submit an Instruction on its behalf to the relevant Clearing System by the deadlines specified by the relevant Clearing System, which may be earlier than the deadlines specified in this Exchange Offer Memorandum.

The receipt of an Instruction by the relevant Clearing System will constitute instructions to debit the securities account of the relevant Holders on the EUR Settlement Date in respect of all of the accepted EUR TIF Original Notes that such Holder has offered for exchange, upon receipt by such Clearing System of an instruction from the Exchange and Information Agent to deliver such EUR TIF Original Notes against credit of the relevant principal amount of EUR TIF New Notes and payment in cash of the applicable Participation Premium and the Accrued Interest Amount in respect of the EUR TIF Original Notes; or subject to the automatic withdrawal of those instructions on the date of any termination of the EUR TIF Exchange Offer or on the valid revocation of such Instruction, in the limited circumstances in which such revocation is permitted as described in this Exchange Offer Memorandum, and subject to acceptance of the relevant EUR TIF Original Notes for exchange or purchase by TIF and the satisfaction of all other conditions of the EUR TIF Exchange Offer.

Instructions are irrevocable except in the limited circumstances described in "*Terms of the EUR TIF Exchange Offer – Holders' Rights of Revocation*". In such circumstances, Instructions may be revoked by a Holder, or the relevant Direct Participant on its behalf, by submitting a valid electronic withdrawal instruction to the relevant Clearing System. To be valid, such instruction must specify the EUR TIF Original Notes to which the original Instruction related, the securities account to which such EUR TIF Original Notes are credited and any other information required by the relevant Clearing System.

The failure of any person to receive a copy of this Exchange Offer Memorandum or any announcement made or notice issued in connection with the EUR TIF Exchange Offer shall not invalidate any aspect of the EUR TIF Exchange Offer. No acknowledgement of receipt of any Instruction and/or other documents will be given by TIF, TIM, the Dealer Managers, the EUR TIF Original Notes Agent (as defined herein) or the Exchange and Information Agent.

Representations and Undertakings of Holders

By submitting a valid Instruction to the relevant Clearing System in accordance with the standard procedures of such Clearing System, a Holder and any Direct Participant submitting such Instruction on such Holder's behalf shall be deemed to agree, and acknowledge, represent, warrant and undertake, to TIF, TIM, Optics, the Dealer Managers, the EUR TIF Original Notes Agent, the New Notes Trustee, the New Notes Agent, the Optics Notes Trustee, the Optics Notes Transfer Agent and Registrar, the Optics Notes Paying Agent and the Exchange and Information Agent at the EUR Expiration Time and on the EUR Settlement Date (if a Holder or Direct Participant is unable to make any such agreement or acknowledgement or give any such representation, warranty or undertaking, such Holder or Direct Participant should contact the Exchange and Information Agent immediately) that:

- it is an Eligible Holder;
- upon the terms and subject to the conditions of the EUR TIF Exchange Offer, it accepts such EUR TIF Exchange Offer in respect of the principal amount of EUR TIF Original Notes in its account blocked in the relevant Clearing System;
- subject to and effective upon the acceptance for exchange of the EUR TIF Original Notes offered, it sells, assigns and transfers to TIF all right, title and interest in and to such EUR TIF Original Notes as are being offered;
- it irrevocably constitutes and appoints the Exchange and Information Agent as its true and lawful agent, attorney-in-fact and proxy with respect to EUR TIF Original Notes offered for exchange, with full power of substitution (such power of attorney being deemed to be an irrevocable power coupled with an interest), among other things, to cause the EUR TIF Original Notes to be assigned, transferred and exchanged (including delivery of any certificates representing the EUR TIF Original Notes and all applicable evidences of transfer and authenticity and presentation of the EUR TIF Original Notes for transfer on the security register, as applicable) and to receive all benefits or otherwise exercise all rights of beneficial ownership of the EUR TIF Original Notes (except that the Exchange and Information Agent will have no rights to, or control over, TIF's funds), all in accordance with the terms of the EUR TIF Exchange Offer;
- it irrevocably constitutes and appoints the New Notes Trustee, the New Notes Agent, the Optics Notes Trustee, the Optics Notes Transfer Agent and Registrar and the Optics Notes Paying Agent, as directed by TIF and Optics (or another agent of TIF and/or the Optics) as its true and lawful agent, attorney-in-fact and proxy with respect to the EUR TIF New Notes to effect the EUR TIF Mandatory Acquisition Exchange pursuant to the terms described in this Exchange Offer Memorandum, with full power of substitution (such power of attorney being deemed to be an irrevocable power coupled with an interest), among other things, to cause the EUR TIF New Notes to be assigned, transferred and exchanged and to receive all benefits or otherwise exercise all rights of beneficial ownership of EUR TIF New Notes, all in accordance with the terms of the EUR TIF Mandatory Acquisition Exchange;

- it will, upon request, execute and deliver any additional documents deemed by TIF to be necessary or desirable to complete the sale, assignment and transfer of the EUR TIF Original Notes offered for exchange or for the EUR TIF Mandatory Acquisition Exchange;

- it recognizes that, under certain circumstances set forth below in the section "Conditions of the EUR TIF Exchange Offer", TIF may not be required to accept for exchange any of the EUR TIF Original Notes offered for exchange;

- it must bear the economic risk of its investment in the EUR TIF New Notes (including the EUR TIF Mandatory Acquisition Exchange into the EUR Optics (TIF) Notes) for an extended period of time;

- it has knowledge and experience in financial and business matters and it is capable of evaluating the merits and risks of an investment in the applicable EUR TIF New Notes (including the EUR TIF Mandatory Acquisition Exchange into the EUR Optics (TIF) Notes);

- it has carefully reviewed this Exchange Offer Memorandum, has been furnished with all other materials that it considers relevant to an investment in the applicable EUR TIF New Notes (including the EUR TIF Mandatory Acquisition Exchange into the EUR Optics (TIF) Notes), have had a full opportunity to ask questions of and receive answers from TIF, TIM or any person or persons acting on behalf of TIF concerning the terms and conditions of an investment in the EUR TIF New Notes (including the EUR TIF Mandatory Acquisition Exchange into the EUR Optics (TIF) Notes) and no statement or printed material which is contrary to this Exchange Offer Memorandum has been made or given to it by or on behalf of TIF and or TIM;

- it acknowledges there are risks incident to the acquisition of the EUR TIF New Notes, including, without limitation, those risks which are summarized under the section entitled "Risk Factors" in this Exchange Offer Memorandum;

- it recognizes that TIF is relying upon such Holder's representations, warranties and agreements contained in this Exchange Offer Memorandum in determining the applicability of certain laws and regulations to the EUR TIF Exchange Offer;

- it agrees to be bound by the terms and subject to the conditions set forth in this Exchange Offer Memorandum;

- it has full power and authority to offer for exchange, sell, assign and transfer the offered EUR TIF Original Notes;

- when such EUR TIF Original Notes are accepted for exchange, TIF will acquire good and unencumbered title to such EUR TIF Original Notes, free and clear of all liens, restrictions, charges and encumbrances and not subject to any adverse claim and such EUR TIF Original Notes will not have been transferred to TIF in violation of any contractual or other restriction on the transfer thereof;

- any EUR TIF New Notes acquired in exchange for offered EUR TIF Original Notes will have been acquired in the ordinary course of business of the person receiving such EUR TIF New Notes, whether or not it is such person;

- it is aware that any EUR TIF New Notes include the mandatory exchanges pursuant to the EUR TIF Mandatory Acquisition Exchange for the receipt of EUR Optics (TIF) Notes without any further consent or action on their part on the Acquisition Closing Date and it hereby authorizes and directs the New Notes Trustee, the New Notes Agent, the Optics Notes Transfer Agent and Registrar, the Optics Notes Paying Agent and the Optics Notes Trustee to take any and all necessary actions on their behalf to accomplish the mandatory exchange of the EUR TIF New Notes for the EUR Optics (TIF) Notes;

- except as set forth herein, no information has been provided to it by TIM, TIF, Optics, the Dealer Managers or the Exchange and Information Agent with regard to the tax consequences to holders of

EUR TIF Original Notes arising from (i) the exchange of EUR TIF Original Notes in the EUR TIF Initial Exchange for the receipt of EUR TIF New Notes, (ii) the exchange of the EUR TIF New Notes in the EUR TIF Mandatory Acquisition Exchange for the receipt of EUR Optics (TIF) Notes or (iii) the ownership or disposition of EUR TIF New Notes or EUR Optics (TIF) Notes, and it hereby acknowledges that it is solely liable for any taxes and similar or related payments imposed on it under the laws of any applicable jurisdiction as a result of its participation in the EUR TIF Exchange Offer (including the EUR TIF Mandatory Acquisition Exchange) and agrees that it will not and does not have any right of recourse (whether by way of reimbursement, indemnity or otherwise) against TIF, TIM, Optics, the Dealer Managers, the EUR TIF Original Notes Agent, the New Notes Agent, the Optics Notes Trustee, the Optics Notes Transfer Agent and Registrar, the Optics Notes Paying Agent, the Exchange and Information Agent or any other person in respect of such taxes and payments;

- it and the person receiving the EUR TIF New Notes are not persons to whom it is unlawful to make an invitation under the EUR TIF Exchange Offer under applicable laws;

- it and the person receiving the EUR TIF New Notes have observed the laws of all relevant jurisdictions, obtained all requisite governmental, exchange control or other required consents, complied with all requisite formalities and paid any issue, transfer or other taxes or requisite payments due from it in each respect in connection with any offer or acceptance in any jurisdiction, and that it and such person or persons have not taken or omitted to take any action in breach of the terms of the EUR TIF Exchange Offer or which will or may result in TIF, TIM or Optics or any other person acting in breach of the legal or regulatory requirements of any such jurisdiction in connection with the EUR TIF Exchange Offer or the offer of the EUR TIF Original Notes in connection therewith;

- it has received this Exchange Offer Memorandum, and has reviewed and accepts the offer and distribution restrictions, terms, conditions, risk factors, the relevant Conditions of the EUR New Notes and other considerations relating to the EUR TIF Exchange Offer, all as described in this Exchange Offer Memorandum, and has undertaken an appropriate analysis of the implications of the EUR TIF Exchange Offer, without relying on TIF, TIM, the Dealer Managers, the EUR TIF Original Notes Agent or the Exchange and Information Agent;

- by submitting or procuring the submission of an Instruction to, and by blocking the relevant EUR TIF Original Notes in, the relevant Clearing System, it will be deemed to consent, in the case of a Direct Participant, to have that Clearing System provide any details set forth in the Instruction to TIF, the Dealer Managers, the EUR TIF Original Notes Agent, and the Exchange and Information Agent and their respective advisers and it acknowledges that its Instruction contains an offer to enter into a contractual relationship with the Issuer in accordance with the terms of the EUR TIF Exchange Offer and that, consequently, the information contained in such Instruction is required in connection with the EUR TIF Exchange Offer and it agrees that the Exchange and Information Agent will store, process and use the data contained in such Instruction to the extent required for the completion of the EUR TIF Exchange Offer and/or the exercise of any rights under the representations, warranties and undertakings given in connection with the EUR TIF Exchange Offer;

- upon and subject to the terms and the conditions of the EUR TIF Exchange Offer, it irrevocably submits and agrees for the principal amount of EUR TIF Original Notes in its account to be blocked in the relevant Clearing System (such principal amount of EUR TIF Original Notes being at least equal to the Minimum Exchange Amount) and, subject to and effective upon such exchange by TIF, it renounces all right, title and interest in and to all such EUR TIF Original Notes exchanged by or at the direction of TIF and waives and releases any rights or claims it may have against TIF and TIM with respect to any such EUR TIF Original Notes and the EUR TIF Exchange Offer (including, without limitation, in relation to the Accrued Interest Amount in respect of the EUR TIF Original Notes);

- the exchange of EUR TIF Original Notes shall be deemed to constitute full performance and satisfaction by TIF and TIM of all of their obligations under the EUR TIF Original Notes and the EUR TIF Exchange Offer, such that following the exchange or substitution and cancellation of such EUR TIF Original Notes

and delivery of the applicable EUR TIF New Notes and payment in cash of the applicable Participation Premium and the Accrued Interest Amount in respect of the EUR TIF Original Notes, it shall have no contractual or other rights or claims in law or equity arising out of or related to its EUR TIF Original Notes;

- if it has submitted such Instructions through any custodian or any other holder or third party acting on its behalf, it has constituted and appointed such custodian, holder or third party as its true and lawful agent and attorney to carry out all the necessary actions that are required to submit such Instructions pursuant to the EUR TIF Exchange Offer and to transfer such EUR TIF Original Notes for cancellation and it will not revoke any instructions and/or powers-of-attorney given to such custodian, holder or third party unless it validly revokes such Instruction;

- it has observed the applicable laws of all relevant jurisdictions; obtained all requisite governmental, exchange control or other required consents; complied with all requisite formalities; and paid any issue, transfer or other taxes or requisite payments due from it in each respect in connection with any offer or acceptance in any jurisdiction and that it has not taken or omitted to take any action in breach of the terms of the EUR TIF Exchange Offer or which will or may result in TIF, TIM, Optics, the Dealer Managers, the EUR TIF Original Notes Agent, the Exchange and Information Agent or any other person acting in breach of the legal or regulatory requirements of any such jurisdiction, in the case of each of the foregoing, in connection with the EUR TIF Exchange Offer;

- all authority conferred or agreed to be conferred pursuant to its acknowledgements, agreements, representations, warranties and undertakings, and all of its obligations shall be binding upon its successors, assigns, heirs, executors, trustees in bankruptcy and legal representatives, and shall not be affected by, and shall survive, its death or incapacity or that of the party on whose behalf such holder is acting;

- it is not located or resident in the United Kingdom or, if it is located or resident in the United Kingdom, it is a person falling within the definition of Investment Professionals (as defined in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the "Order")) or within Article 43(2) of the Order, or to whom this Exchange Offer Memorandum and any other documents or materials relating to the EUR TIF Exchange Offer may otherwise lawfully be communicated in accordance with the Order;

- it is not located or resident in Italy or, if it is located or resident in Italy, it is a Qualified Investor that is an authorized person or is offering for exchange and transfer its EUR TIF Original Notes through an authorized person (such as an investment firm, bank or financial intermediary permitted to conduct such activities in Italy in accordance, as applicable, with the Italian Financial Services Act, as amended, CONSOB regulation No. 20307 of February 15, 2018 (the "**CONSOB Regulation on Intermediaries**") on Intermediaries, as amended, and Legislative Decree No. 385 of September 1, 1993, as amended and any other applicable laws and regulations), and in compliance with all relevant Italian securities, tax and exchange control and other applicable Italian laws and regulations and any other applicable requirements or limitations which may be imposed from time to time by CONSOB, the Bank of Italy or any other Italian competent authority;

- it is outside the Republic of France or, if it is located in the Republic of France, it is (i) a provider of investment services relating to portfolio management for the account of third parties (*personne fournissant le service d'investissement de gestion de portefeuille pour compte de tiers*); and/or (ii) a qualified investor (*investisseur qualifié*), as defined in and in accordance with Articles L.411-1 and D.411-2 to D.411-3 of the French Code monétaire et financier;

- it is not located or resident in Belgium or, if it is located or resident in Belgium it is a qualified investor within the meaning of Article 10 of the Belgian Law of June 16, 2006 on public offerings of investment instruments and the admission of investment instruments to trading on regulated markets;

- it is and the person receiving the EUR TIF New Notes is not located or resident in Switzerland, did not receive this Exchange Offer Memorandum or any invitation to participate in the EUR TIF Exchange Offer in Switzerland and is not acting on behalf of investors located or resident in Switzerland;

- it is not, and is not owned or controlled by, a Sanctions Restricted Person, provided that this representation shall only apply if and to the extent that it would not result in a violation or breach of, or conflict with, (a) Council Regulation (EC) No 2271/96 of November 22, 1996 (or any law or regulation implementing such Regulation in any member state of the European Union, including Section 7 of the German Foreign Trade Ordinance (*Außenwirtschaftsverordnung*)); (b) any similar blocking or anti-boycott law of the United Kingdom (including, without limitation, Council Regulation (EC) No 2271/96 as it forms a part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018);

- it has full power and authority to offer for exchange and transfer the EUR TIF Original Notes offered for exchange and, if such EUR TIF Original Notes are accepted for exchange by TIF, such EUR TIF Original Notes will be transferred to, or to the order of, TIF with full title free from all liens, charges and encumbrances, not subject to any adverse claim and together with all rights attached to such EUR TIF New Notes, and it will, upon request, execute and deliver any additional documents and/or do such other things deemed by TIF to be necessary or desirable to complete the transfer of such EUR TIF New Notes or to evidence such power and authority;

- it holds and will hold, until the time of the EUR Settlement Date, the TIF Original Notes blocked in the relevant Clearing System and, in accordance with the requirements of, and by the deadline required by, such Clearing System, it has submitted, or has caused to be submitted, an Instruction to such Clearing System to authorize the blocking of the EUR TIF Original Notes offered for exchange with effect on and from the date of such submission so that, at any time pending the transfer of such EUR TIF Original Notes on the EUR Settlement Date to TIF or to its agent on its behalf and, no transfers of such EUR TIF Original Notes may be effected;

- the terms and conditions of the EUR TIF Exchange Offer shall be deemed to be incorporated in, and form a part of, the Instruction which shall be read and construed accordingly, and that the information given by or on behalf of such Noteholder in the Instruction is true and will be true in all respects at the time of the exchange on the EUR Settlement Date;

- it accepts that TIF is under no obligation to accept EUR TIF Original Notes for exchange pursuant to the EUR TIF Exchange Offer, and accordingly any such EUR TIF Exchange Offer may be accepted or rejected by TIF in its sole discretion and for any reason and accepts that TIF shall not be liable to any person for the failure to accept any offer of EUR TIF Original Notes for exchange pursuant to the EUR TIF Exchange Offer;

- it understands that acceptance for exchange of EUR TIF Original Notes validly offered for exchange pursuant to the EUR TIF Exchange Offer will constitute a binding agreement between it and TIF, in accordance with and subject to the terms and conditions of the EUR TIF Exchange Offer;

- if any one or more of the above representations, warranties and undertakings made by or with respect to it shall be or become invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining representations, warranties and undertakings made by or with respect to it, and the representations, warranties and undertakings made by or with respect to all other holders, shall in no way be affected, prejudiced or otherwise disturbed thereby;

- it shall indemnify TIF, TIM, Optics, the Dealer Managers, the EUR TIF Original Notes Agent, the EUR TIF Original Notes Agent, the New Notes Agent, the Optics Notes Trustee, the Optics Notes Transfer Agent and Registrar, the Optics Notes Paying Agent and the Exchange and Information Agent against all and any losses, costs, claims, liabilities, expenses, charges, actions or demands which any of them may incur or which may be made against any of them as a result of any breach of any of the terms of, or

any of the acknowledgements, representations, warranties and/or undertakings given pursuant to, the EUR TIF Exchange Offer by any such holder;

- it irrevocably direct the Optics Notes Trustee to execute and deliver the necessary documentation to enter into the Intercreditor Agreement entered on December 19, 2023 by and between, among others, Optics and UniCredit S.p.A., as the facility agent, certain creditors thereunder and the Optics Notes Security Agent, as amended, supplemented and restated from time to time;

- it understands that in the event of a termination of the EUR TIF Exchange Offer, the Instructions with respect to such EUR TIF Original Notes will be deemed to be withdrawn, and the EUR TIF Original Notes will be unblocked in the Direct Participant's Clearing System account;

- it understands that validly offered EUR TIF Original Notes (or defectively offered EUR TIF Original Notes with respect to which TIF has waived, or has caused to be waived, such defect) will be deemed to have been accepted by TIF if, as and when TIF gives oral or written notice thereof to the Exchange and Information Agent;

- If it is a broker-dealer, it additionally represents, warrants and agrees that:

  - it has not entered into any arrangement or understanding with the Issuer to distribute any EUR TIF New Notes in connection with any resale of such notes;

  - it acquired the EUR TIF Original Notes to be exchanged for EUR TIF New Notes as a result of market-making activities or other trading activities;

  - it understands and acknowledges that the EUR TIF New Notes (or the EUR Optics (TIF) Notes, if any) are not and will not be registered under the U.S. Securities Act or any U.S. state securities laws and are therefore subject to restrictions on transferability and resale; and

  - it agrees to notify the Issuer prior to using this Exchange Offer Memorandum in connection with the sale or transfer of any EUR TIF New Notes and agrees that, upon receipt of notice from the Issuer of the occurrence of any event that makes any statement in this Exchange Offer Memorandum untrue in any material respect or which requires changes to this Exchange Offer Memorandum in order to make the statements herein (in light of the circumstances under which they were made) not misleading, you will suspend use of this Exchange Offer Memorandum until:

    - the Issuer has amended or supplemented this Exchange Offer Memorandum to correct such misstatement or omission; and

    - the Issuer has furnished copies of the amended or supplemented Exchange Offer Memorandum to you.

General

Binding

A valid Instruction, upon receipt by the relevant Clearing System and the Exchange and Information Agent, will constitute a binding agreement between the relevant Holder and TIF in accordance with its terms, and subject to the conditions, set forth in this Exchange Offer Memorandum and the Instruction.

Separate Instructions

Instructions must be submitted in respect of a principal amount of EUR TIF Original Notes of no less than €100,000 and may thereafter be submitted in integral multiples of €1,000. A separate Instruction must be completed on behalf of each beneficial owner of the EUR TIF Original Notes and in respect of the EUR TIF Original Notes.

Offer to exchange instructions submitted other than in accordance with the procedures set out in this section will not be accepted

Subject as set out under "*Irregularities*" below, TIF will only accept the offer of EUR TIF Original Notes for exchange and Holders of EUR TIF Original Notes may only otherwise offer EUR TIF Original Notes for exchange, by way of the submission of valid Instruction in accordance with the procedures set out in this section "*Procedures for Participating in the Exchange Offers*". Noteholders should not send Instructions to TIF or the Dealer Managers.

Irrevocability

The submission of a valid Instruction in accordance with the procedures set out in this section "*Procedures for Participating in the EUR TIF Exchange Offer*" will be irrevocable (except in the limited circumstances described in the section entitled "*Terms of the EUR TIF Exchange Offer —Termination, Withdrawal and Amendment of the EUR TIF Exchange Offer*").

Irregularities

All questions as to the validity, form, eligibility and valid revocation (including times of receipt) of any Instruction will be determined by TIF, in its sole discretion, which determination shall be final and binding.

TIF reserves the absolute right to reject any and all Instructions, and Revocation Instructions not in proper form or for which any corresponding agreement by TIF to exchange would, in the opinion of TIF and its legal advisers, be unlawful. TIF also reserves the absolute right to waive any defects, irregularities or delay in the submission of any and all Instructions, or Revocation Instructions. TIF also reserves the absolute right to waive any such defect, irregularity or delay in respect of particular EUR TIF Original Notes, whether or not TIF elects to waive similar defects, irregularities or any delay in respect of other TIF Original Notes.

Any defect, irregularity or delay must be cured within such time as the Issuer determines, unless waived by it. The Instruction or will be deemed not to have been made until such defects, irregularities or delays have been cured or waived. None of TIF, TIM, the Dealer Managers, the EUR TIF Original Notes Agent or the Exchange and Information Agent shall be under any duty to give notice to any Holders of any defects, irregularities or delays in any Instruction, and Revocation Instruction, nor shall any of them incur any liability for failure to give such notice.

Governing Law

The EUR TIF Exchange Offer, any Instruction, any Revocation Instruction, any exchange of EUR TIF Original Notes pursuant to the EUR TIF Exchange Offer and any non-contractual obligations arising out of or in connection with the foregoing shall be governed by and construed in accordance with English law. By submitting an Instruction, or Revocation Instruction, the relevant Holder irrevocably and unconditionally agrees for the benefit of TIF, TIM, the Dealer Managers, the EUR TIF Original Notes Agent, the New Notes Agent, the Optics Notes Trustee, the Optics Notes Transfer Agent and Registrar, the Optics Notes Paying Agent and the Exchange and Information Agent that the courts of England are to have jurisdiction to settle any disputes that may arise out of or in connection with the EUR TIF Exchange Offer, or any of the documents referred to above and that, accordingly, any suit, action or proceedings arising out of or in connection with the foregoing may be brought in such courts.

CONDITIONS OF THE EUR TIF EXCHANGE OFFER

TIF is not under any obligation to accept any offer with respect to the EUR TIF Original Notes for exchange pursuant to the EUR TIF Exchange Offer and TIF shall not be liable in respect of the failure to accept such EUR TIF Original Notes.

TIF may, in its sole discretion, reject an offer with respect to the EUR TIF Original Notes for exchange made pursuant to the EUR TIF Exchange Offer for any reason and TIF is not under any obligation to Holders of EUR TIF Original Notes to furnish any reason or justification for refusing to accept an offer with respect to the EUR TIF Original Notes for exchange. For example, an offer of EUR TIF Original Notes for exchange may be rejected if the EUR TIF Exchange Offer is terminated, if such offer does not comply with the relevant requirements of a particular jurisdiction or for any other reason.

TIF's acceptance of any EUR TIF Original Notes validly offered for exchange (and not validly withdrawn) will be irrevocable and will be subject only to satisfaction of the General Conditions described below. Once accepted (subject only as aforesaid), the EUR TIF Exchange Offer will constitute binding obligations of the offering Holders and TIF to settle the EUR TIF Exchange Offer.

The EUR TIF Exchange Offer for the EUR TIF Original Notes is conditioned upon the following conditions being satisfied:

- the EUR Minimum Series Exchange Condition;
- there shall not have been instituted, threatened or be pending any action, proceeding, application, claim counterclaim or investigation (whether formal or informal) (or there shall not have been any material adverse development to any action, application, claim counterclaim or proceeding currently instituted, threatened or pending) before or by any court, governmental, regulatory or administrative agency or instrumentality, domestic or foreign, or by any other person, domestic or foreign, in connection with the EUR TIM Exchange Offers and/or the EUR TIF Exchange Offer and/or the USD Exchange OfferS that, in TIF's sole judgment, either (a) is, or is reasonably likely to be, materially adverse to the TIF's business, operations, properties, condition (financial or otherwise), income, assets, liabilities or prospects, (b) would or might prohibit, prevent, restrict or delay consummation of the EUR TIF Exchange Offer or (c) would materially impair the contemplated benefits of the EUR TIF Exchange Offer to TIF or be material to holders in deciding whether to accept the EUR TIF Exchange Offer;
- an order, statute, rule, regulation, executive order, stay, decree, judgment or injunction shall not have been proposed, enacted, entered, issued, promulgated, enforced or deemed applicable by any court or governmental, regulatory or administrative agency or instrumentality that, in TIF's sole judgment, either (a) would or might prohibit, prevent, restrict or delay consummation of the EUR TIF Exchange Offer or (b) is, or is reasonably likely to be, materially adverse to TIF's business, operations, properties, condition (financial or otherwise), income, assets, liabilities or prospects;
- there shall not have occurred or be likely to occur any event or condition affecting TIF's or its subsidiaries' business or financial affairs that, in TIF's sole judgment, either (a) is, or is reasonably likely to be, materially adverse to the TIM's and/or NetCo's business, operations, properties, condition (financial or otherwise), income, assets, liabilities or prospects, (b) would or might prohibit, prevent, restrict or delay consummation of the EUR TIF Exchange Offer or (c) would materially impair the contemplated benefits of the EUR TIF Exchange Offer to TIF or be material to holders in deciding whether to accept the EUR TIF Exchange Offer;
- the consummation of the EUR TIF Exchange Offer (including the EUR TIF Mandatory Acquisition Exchange) would not, in TIF's sole judgment, violate any terms of TIF's existing obligations;
- the EUR TIF Original Notes Agent shall not have objected in any respect to or taken action that could, in TIM's sole judgment, adversely affect the consummation of the EUR TIF Exchange Offer (including the EUR TIF Mandatory Acquisition Exchange) or shall not have taken any action that challenges the

validity or effectiveness of the procedures used by TIF in the making of the EUR TIF Exchange Offer or the acceptance of, or payment for, some or all of the EUR TIF Original Notes pursuant to the EUR TIF Exchange Offer;

- there does not exist, in TIF's sole judgment, any actual or threatened legal impediment to the acceptance for exchange of, or exchange of, the EUR TIF Original Notes or for the consummation of the EUR TIF Exchange Offer (including the EUR TIF Mandatory Acquisition Exchange); and
- there has not occurred (a) any general suspension of, or limitation on prices for, trading in securities in the United States securities or financial markets, (b) any significant adverse change in the price of TIF's securities, (c) a material impairment or significant adverse change in pricing in the trading market for debt securities, (d) a declaration of a banking moratorium or any suspension of payments in respect to banks in the United States, any jurisdiction of the European Union, the United Kingdom or other major financial markets, (e) any limitation (whether or not mandatory) by any government or governmental, administrative or regulatory authority or agency, domestic or foreign, or other event that, in TIF's reasonable judgment, might affect the extension of credit by banks or other lending institutions, (f) a commencement of a war, armed hostilities, terrorist acts or other national or international calamity directly or indirectly involving the United States or any jurisdiction of the European Union, the United Kingdom or (g) in the case of any of the foregoing existing on the date hereof, a material acceleration or worsening thereof.

(together, the "**General Conditions**").

Each of the General Conditions is for the sole benefit of TIF. The General Conditions may be waived by TIF, in whole or in part, at any time and from time to time, in its discretion with respect to the EUR TIF Original Notes. For the avoidance of doubt, the waiver of any General Condition shall not be considered to be materially prejudicial to Eligible Holders that have already submitted Instructions before the announcement of such amendment and will not result in Noteholders receiving the right of revocation (see "*Terms of the EUR TIF Exchange Offer – Holders' Rights of Revocation*").

Any determination by TIF concerning the conditions set forth above (including whether or not any such condition has been satisfied or waived) will be final and binding upon all parties. If the foregoing General Conditions are not satisfied, in the opinion of TIF, or waived by TIF in full with respect to the EUR TIF Original Notes, the invitation to offer EUR TIF Original Notes for exchange, will lapse.

Notwithstanding the satisfaction of the above General Conditions, TIF expressly reserves the right, in its sole discretion, to delay delivery of the EUR TIF New Notes offered for exchange pursuant to the EUR TIF Exchange Offer, in order to comply with applicable laws.

SUMMARY OF THE TERMS OF THE EUR TIF EXCHANGE OFFER

The summary below describes the principal terms of the EUR TIF Exchange Offer. Certain of the terms and conditions described below are subject to important limitations and exceptions. For a more complete understanding of the terms and conditions of the EUR TIF Exchange Offer, you should read this entire Exchange Offer Memorandum.

The EUR TIF Exchange Offer	TIF is inviting Eligible Holders to offer for exchange their EUR TIF Original Notes (the "**EUR TIF Initial Exchange**") for an equal aggregate principal amount of EUR TIF New Notes subject to the Total Cap. The "**EUR TIF Exchange Offer**" refers herein to the EUR TIF Initial Exchange of the EUR TIF New Notes, with the EUR TIF Mandatory Acquisition Exchange included within the terms and conditions of the EUR TIF New Notes.
Total Cap	Up to €5.0 billion in aggregate principal amount of the EUR TIM Original Notes, EUR TIF Original Notes and/or USD Original Notes to be accepted across the Exchange Offers in the sole discretion of TIM, TIF and/or TICAP, by TIM, TIF and/or TICAP, as applicable, in accordance with the terms and subject to the conditions set forth in this Exchange Offer Memorandum, the EUR TIM Exchange Offer Memorandum and the USD Exchange Offer Memorandum, as the case may be.
Final Series Acceptance Amount.............	The final acceptance amount for the EUR TIF Original Notes that TIF decides, in its sole discretion, to accept for exchange valid offers to exchange EUR TIF Original Notes pursuant to the EUR TIF Exchange Offer. The Final Series Acceptance Amount will be determined by TIF in its sole and absolute discretion and will be announced by TIF as soon as reasonably practicable following the EUR Expiration Time.
Minimum Exchange Amount	Eligible Holders who wish to participate in the EUR TIF Exchange Offer must offer for exchange their EUR TIF Original Notes for an aggregate principal amount of EUR TIF Original Notes that is sufficient to receive at least €100,000 in principal amount of the EUR TIF New Notes in the EUR TIF Exchange Offer (the "**Minimum Exchange Amount**").
Conditions to the EUR TIF Exchange Offer	The EUR TIF Exchange Offer of EUR TIF Original Notes is conditional upon valid offers for exchange being received from (and not being validly withdrawn by) Eligible Holders of EUR TIF Original Notes and accepted in the EUR TIF Exchange Offer in a sufficient aggregate principal amount such that at least €300,000,000 in aggregate principal amount of the EUR TIF New Notes would be issued upon consummation of the EUR TIF Initial Exchange(the "**EUR Minimum Series Exchange Condition**"). TIF may elect, in its sole discretion, subject to applicable law, to decrease, increase or waive the EUR Minimum Series Exchange Condition with respect to the EUR TIF Original Notes and Eligible Holders will not be entitled to any revocation rights as a result of such increase, decrease or waiver. The EUR TIF Exchange Offer is also subject to the satisfaction or waiver of certain additional general conditions each as described in this Exchange Offer Memorandum. See "*Conditions of the EUR TIF Exchange Offer*" beginning on page 18.

EUR Expiration Time .... The EUR TIF Exchange Offer will expire at 5:00 P.M., CET, on May 1, 2024, unless extended, re-opened or terminated.

EUR Settlement Date................................ Subject to the terms and conditions of the EUR TIF Exchange Offer, the settlement date for the EUR TIF Initial Exchange will be as soon as practicable following the EUR Expiration Time and expected to be on May 8, 2024.

Pro-Ration Factor.................................... If TIF decides to accept valid exchange instructions of EUR TIF Original Notes and the aggregate principal amount of EUR TIF Original Notes validly exchanged is greater than the Final Series Acceptance Amount, EUR TIF Original Notes are to be accepted on a *pro rata* basis. In the event of any such proration, TIF shall determine the applicable pro-ration factor (the "**Pro-Ration Factor**") by dividing the Final Series Acceptance Amount by the aggregate principal amount of the EUR TIF Original Notes validly offered and not validly withdrawn in the EUR TIF Exchange Offer, subject to certain adjustments to equal the Final Series Acceptance Amount.

EUR TIF Mandatory Acquisition Exchange.. If, on or before the Longstop Date, the Acquisition is, or will be, consummated, then upon no less than five business days prior notice by TIF to the New Notes Agent, Optics and the holders of the EUR TIF New Notes, on the Acquisition Closing Date, the EUR TIF New Notes will be mandatorily exchanged without the need for further action by the holders of the EUR TIF New Notes (the "**EUR TIF Mandatory Acquisition Exchange**") for an equal aggregate principal amount of EUR Optics (TIF) Notes to be issued by Optics with the same maturity and interest rate as the EUR TIF New Notes but with other terms as described elsewhere in this Exchange Offer Memorandum.

Upon consummation of the EUR TIF Mandatory Acquisition Exchange, the EUR TIF New Notes will be cancelled.

The EUR TIF New Notes .... For a description of the terms of the EUR TIF New Notes, see "*Terms and Conditions of the EUR TIF New Notes*".

The EUR Optics (TIF) Notes .... For a description of the terms of the EUR Optics (TIF) Notes, "*Terms and Conditions of the EUR Optics (TIF) Notes*".

Accrued and Unpaid Interest

EUR TIF Initial Exchange....................... On the EUR Settlement Date, Participating Holders whose EUR TIF Original Notes are accepted for exchange pursuant to the EUR TIF Exchange Offer will also be paid in cash (rounded to the nearest €0.01, with €0.005 rounded upwards) the accrued and unpaid interest, if any, on such EUR TIF Original Notes from, and including, the immediately preceding interest payment date for such EUR TIF Original Notes up to, but excluding, the EUR Settlement Date. Eligible Holders who do not exchange and Ineligible Holders will continue to be paid interest according to the terms of the EUR TIF Original Notes.

EUR TIF Mandatory Acquisition Exchange.. On the Acquisition Closing Date, Holders of the EUR TIF New Notes will also be paid in cash (rounded to the nearest €0.01, with €0.005 rounded upwards) the accrued and unpaid interest, if any, on such EUR TIF New Notes for the period from, and including, the later of (x) the

immediately preceding interest payment date in respect of the EUR TIF New Notes and (y) the EUR Settlement Date, as applicable, up to, but excluding, the Acquisition Closing Date.

Denominations

EUR TIF New Notes .... The EUR TIF New Notes will be issued in minimum denominations of €100,000 and in integral multiples of €1,000 in excess thereof. TIF will not accept for exchange any offer that would result in the issuance of less than €100,000 in principal amount of EUR TIF New Notes to a Participating Holder. As a result, an Eligible Holder will be unable to participate in the EUR TIF Exchange Offer if such Holder's ownership of EUR TIF Original Notes is not at a sufficient level to meet the required minimum denomination and the Minimum Exchange Amount.

EUR Optics (TIF) Notes .... The EUR Optics (TIF) Notes will be issued in minimum denominations of €100,000 and in integral multiples of €1,000 in excess thereof.

Eligible Holders... The EUR TIF Exchange Offer is directed, and the EUR TIF New Notes and the EUR Optics (TIF) Notes will be issued, only to those holders of the EUR TIF Original Notes who are not "U.S. persons" (as defined in Regulation S) and are outside the United States transacting in an offshore transaction in accordance with Regulation S and if they are resident in any member state of the EEA or the United Kingdom, who are not "retail investors" in the EEA or the United Kingdom and are not persons to whom it is unlawful to make the EUR TIF Exchange Offer or a Sanctions Restricted Person.

Participating Holder .... Means an Eligible Holder that has validly submitted (and not validly withdrawn) an Instruction on or prior to the EUR Expiration Time in order to participate in the EUR TIF Exchange Offer.

Instruction .... In order to offer EUR TIF Original Notes for exchange in the EUR TIF Exchange Offer, an Eligible Holder must deliver the electronic blocking instruction to the relevant Clearing System and specifying, *inter alia*, the aggregate principal amount of EUR TIF Original Notes that such Holder wishes to offer for exchange, in accordance with the requirements and procedures of the relevant Clearing System.

Instructions will be irrevocable, except in the limited circumstances described under "*Terms of the EUR TIF Exchange Offer – Holders' Rights of Revocation*" herein.

Procedures for Participating in the EUR TIF Exchange Offer........................ In order to participate in the EUR TIF Exchange Offer, each Eligible Holder must deliver, or arrange to have delivered on its behalf, Instructions through the Clearing Systems in accordance with the procedures of, and within the time limit specified by, the Clearing Systems for receipt by the Exchange and Information Agent prior to the EUR Expiration Time. TIF will only accept an offer of EUR TIF Original Notes for exchange by way of the submission of a valid Instruction in accordance with the procedures set out in the section headed "*Procedures for Participating in the EUR TIF Exchange Offer*".

Holders are advised to check with any bank, securities broker or other intermediary through which they hold EUR TIF Original Notes when

such intermediary would require to receive instructions to participate in, or (in the limited circumstances in which revocation is permitted) revoke their instruction to participate in, the EUR TIF Exchange Offer in order to meet the deadlines specified in this Exchange Offer Memorandum. ***The deadlines set by any such intermediary and each Clearing System for the submission and withdrawal of Instructions will be earlier than the relevant deadlines specified in this Exchange Offer Memorandum***.

Revocation Instruction .... An electronic revocation instruction to revoke an Instruction or delivered in accordance with the provisions set out in "*Terms of the EUR TIF Exchange Offer – Holders' Rights of Revocation*".

Revocation Rights .... If TIF amends any of the terms of the EUR TIF Exchange Offer in any way that, in the opinion of TIF (in consultation with the Dealer Managers) is materially prejudicial to Eligible Holders that have already submitted Instructions before the announcement of such amendment (which announcement shall include a statement whether in the opinion of TIF such amendment is materially prejudicial to such Eligible Holders), then all Instructions may be revoked at any time from the date and time of such announcement until 10:00 a.m. (CET) on the second day, other than a Saturday or Sunday or a public holiday on which commercial banks and foreign exchange markets are open for business in Luxembourg, following such announcement (subject to the earlier deadlines required by the Clearing Systems and any intermediary through which such Eligible Holders hold their relevant EUR TIF Original Notes).

For the avoidance of doubt, (i) any decision to increase, decrease or waive the EUR Minimum Series Exchange Condition with respect to the EUR TIF Original Notes and/or the Total Cap or (ii) any waiver of any General Condition shall not be considered to be materially prejudicial to Eligible Holders that have already submitted Instructions before the announcement of such amendment.

Any decision by TIF to extend the EUR Expiration Time or re-open the EUR TIF Exchange Offer in accordance with "*Termination, Withdrawal and Amendment of the EUR TIF Exchange Offer*" herein shall not be considered to be materially prejudicial to Eligible Holders that have already submitted Instructions before the announcement of such extension or re-opening and will not result in Eligible Holders receiving the right of revocation.

Consequences of Failure to Exchange..... For a description of the consequences of failing to exchange your EUR TIF Original Notes pursuant to the EUR TIF Exchange Offer, see *"Consequences of Failure to Participate in the EUR TIF Exchange Offer"*

Termination, Withdrawal and Amendment of the Exchange Offer........ TIF, subject to applicable laws, at its option and in its sole discretion, at any time may: a) extend the EUR Expiration Time or re-open the EUR TIF Exchange Offer, as applicable (in which case all references in this Exchange Offer Memorandum to "*Expiration Time*" shall, unless the context otherwise requires, be to the latest time and date to which the EUR Expiration Time has been so extended or the EUR TIF Exchange

	Offer reopened); b) otherwise amend the EUR TIF Exchange Offer in any respect; or c) terminate the EUR TIF Exchange Offer.
Use of Proceeds..	The Issuer does not expect to receive any cash proceeds in the EUR TIF Exchange Offer. See "*Use of Proceeds*".
Dealer Managers.......................................	The Issuer has retained Banco Santander, S.A., BNP Paribas, Crédit Agricole Corporate and Investment Bank, Deutsche Bank Aktiengesellschaft, Goldman Sachs International, J.P. Morgan SE, MUFG Securities (Europe) N.V., Société Générale and UniCredit Bank GmbH to act as dealer managers (the "**Dealer Managers**") in connection with the EUR TIF Exchange Offers.
Exchange and Information Agent...........	Kroll Issuer Services Limited (the "**Exchange and Information Agent**") has been appointed as exchange and information agent in connection with the EUR TIF Exchange Offers.
Risk Factors...	See "*Risk Factors*" and the other information included elsewhere in this Exchange Offer Memorandum for a discussion of factors you should carefully consider before deciding to participate in the EUR TIF Exchange Offer.
Taxation	For a discussion of certain material tax consequences of the EUR TIM Exchange Offers, see "Certain Tax Considerations".

CERTAIN DEFINED TERMS

For explanations or definitions of certain technical terms relating to the TIM Group's and NetCo's businesses as used herein, please see "*Appendix C (Glossary)*" included elsewhere in this Exchange Offer Memorandum.

Capitalized terms which are used but not defined in any particular section of this Exchange Offer Memorandum will have the meaning attributed to them in the sections entitled "*Terms and Conditions of the EUR TIF New Notes*" and "*Conditions of the EUR Optics (TIF) Notes*" or any other section of this Exchange Offer Memorandum.

Unless otherwise specified or the context requires otherwise, in this Exchange Offer Memorandum:

"**Acquisition**"..	means the acquisition by Optics of the entire stake of TIM in NetCo following the contribution of the NetCo Business to FiberCop;
"**Acquisition Closing Date**".......................	means the date on which the Acquisition is consummated which will coincide with the date of the Acquisition Exchange;
"**Acquisition Exchange**"............................	means, collectively, the USD Acquisition Exchange and the EUR Acquisition Exchange;
"**Agreed Form SHA**".................................	The agreed form shareholders' agreement relating to the NetCo group of companies to be entered into on the Acquisition Closing Date by the shareholders of Optics HoldCo;
"**Applicable Euro/USD Exchange Rate**"	means the Euro/USD exchange rate prevailing at the Early Participation Deadline (as defined in the USD Exchange Offer Memorandum), as reported on the display page on the Bloomberg service designated as the "BFIX" page (or, if such screen is unavailable or is manifestly erroneous, a generally recognized source for currency quotations with quotes as of a time as close as reasonably possible to the aforementioned time as determined by TICAP in consultation with the Dealer Managers);
"**Clearing Systems**"	Euroclear Bank SA/NV and Clearstream Banking S.A;
"**Conditions**"	means the Conditions of the EUR Original Notes, the Conditions of the EUR New Notes or the Conditions of the EUR Optics Notes, as the case may be;
"**Conditions of the EUR New Notes**"	Means, collectively, the terms and conditions for each series of EUR New Notes set out in Appendix A to this Exchange Offer Memorandum and to the EUR TIF Exchange Offer Memorandum;
"**Conditions of the EUR Original Notes**"	Means, collectively, the terms and conditions for each series of EUR Original Notes set out in the relevant EUR TIM Original Notes Trust Deed and EUR TIF Original Notes Agency Agreement;
"**Conditions of the EUR Optics Notes**"	means the terms and conditions for each series of EUR Optics Notes set out in Appendix B to this Exchange Offer Memorandum or to the EUR TIF Exchange Offer Memorandum, as the case may be;
"**Dealer Managers**"...................................	means, collectively, Banco Santander, S.A., BNP Paribas, Crédit Agricole Corporate and Investment Bank, Deutsche Bank Aktiengesellschaft, Goldman Sachs International, J.P. Morgan SE, MUFG Securities (Europe) N.V., Société Générale and UniCredit Bank GmbH;

"**Direct Participants**"	means each person who is shown in the records of the Clearing Systems as a holder of the EUR TIF Original Notes at the time of submission of the relevant Instruction;
"**EBLco**"	means Optics EBLco S.r.l., which is a KKR vehicle;
"**EUR Acquisition Exchange**"	means the EUR TIF Mandatory Acquisition Exchange and EUR TIM Mandatory Acquisition Exchange;
"**EUR TIF Mandatory Acquisition Exchange**"	has the meaning given to such term in "*Terms of the EUR TIF Exchange Offer*";
"**EUR TIM Mandatory Acquisition Exchange**"	has the meaning given to such term in "*Terms of the EUR TIM Exchange Offers*" in the EUR TIM Exchange Offer Memorandum;
"**EUR Exchange Offers**"	refers to the EUR TIM Exchange Offers and the EUR TIF Exchange Offer;
"**EUR Initial Exchange**"	means the EUR TIM Initial Exchange and the EUR TIF Initial Exchange;
"**EUR New February 2028 Notes**"	means 6.875 % Notes due February 15, 2028 expected to be issued by TIM at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR New January 2026 Notes**"	means 2.875 % Notes due January 28, 2026 expected to be issued at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR New January 2029 Notes**"	means 1.625 % Notes due January 18, 2029 expected to be issued by TIM at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR New July 2028 Notes**"	means 7.875 % Notes due July 31, 2028 expected to be issued by TIM at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR New March 2055 Notes**"	means 5.25 % Notes due March 17, 2055 expected to be issued by TIM at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR New May 2026 Notes**"	means 3.625 % Notes due May 25, 2026 expected to be issued by TIM at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR New Notes**"	means the EUR TIM New Notes and the EUR TIF New Notes;
"**EUR New October 2027 Notes**"	means 2.375 % Notes due October 12, 2027 expected to be issued by TIM at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR Optics February 2028 Notes**"	means 6.875 % Notes due February 15, 2028 expected to be issued by Optics at the Acquisition Closing Date pursuant to the EUR TIM Exchange Offers assuming the corresponding series of EUR New Notes are issued at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;

"**EUR Optics January 2026 Notes**"	means 2.875 % Notes due January 28, 2026 expected to be issued by Optics at the Acquisition Closing Date pursuant to the EUR TIM Exchange Offers assuming the corresponding series of EUR New Notes are issued at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR Optics January 2029 Notes**"	means 1.625 % Notes due January 31, 2029 expected to be issued by Optics at the Acquisition Closing Date pursuant to the EUR TIM Exchange Offers assuming the corresponding series of EUR New Notes are issued at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR Optics January 2033 Notes**"	means 7.750 % Notes due January 24, 2033 expected to be issued by Optics at the Acquisition Closing Date pursuant to the EUR TIF Exchange Offer assuming the corresponding series of EUR TIF New Notes are issued at the EUR TIF Initial Exchange pursuant to the EUR TIF Exchange Offer;
"**EUR Optics July 2028 Notes**"	means 7.875 % Notes due July 31, 2028 expected to be issued by Optics at the Acquisition Closing Date pursuant to the EUR TIM Exchange Offers assuming the corresponding series of EUR New Notes are issued at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR Optics March 2055 Notes**"	means 5.25 % Notes due March 17, 2055 expected to be issued by Optics at the Acquisition Closing Date pursuant to the EUR TIM Exchange Offers assuming the corresponding series of EUR New Notes are issued at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR Optics May 2026 Notes**"	means 3.625 % Notes due May 25, 2026 expected to be issued by Optics at the Acquisition Closing Date pursuant to the EUR TIM Exchange Offers assuming the corresponding series of EUR New Notes are issued at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR Optics Notes**"	means, collectively, the EUR Optics (TIM) Notes and the EUR Optics (TIF) Notes;
"**EUR Optics (TIF) Notes**"	means the EUR Optics January 2033 Notes;
"**EUR Optics (TIM) Notes**"	means the (i) EUR Optics January 2026 Notes, (ii) EUR Optics May 2026 Notes, (iii) EUR Optics October 2027 Notes, (iv) EUR Optics February 2028 Notes, (v) EUR Optics July 2028 Notes, (vi) EUR Optics January 2029 Notes, and (vii) EUR Optics March 2055 Notes, expected to be issued by Optics at the Acquisition Closing Date pursuant to the EUR TIM Exchange Offers assuming the corresponding Series of EUR TIM New Notes are issued at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;
"**EUR Optics October 2027 Notes**"	means 2.375 % Notes due October 12, 2027 expected to be issued by Optics at the Acquisition Closing Date pursuant to the EUR TIM Exchange Offers assuming the corresponding series of EUR New Notes are issued at the EUR TIM Initial Exchange pursuant to the EUR TIM Exchange Offers;

"**EUR Optics Notes Agency Agreement**" .	refers to the agency agreement dated as of the Optics Notes Issue Date by and among Optics, as issuer, the Optics Notes Trustee, the Optics Notes Transfer Agent and Registrar and the Optics Notes Paying Agent, as amended and/or supplemented from time to time with respect to the EUR Optics Notes;
"**EUR Optics Notes Trust Deed**"...............	refers to the trust deed dated as of the Optics Notes Issue Date by and among Optics, as issuer and the Optics Notes Trustee, as amended and/or supplemented from time to time with respect to the EUR Optics Notes;
"**EUR Original February 2028 Notes**"	means €1,250,000,000 6.875 % Notes due February 15, 2028 issued by TIM on January 27, 2023;
"**EUR Original February 2028 Notes Trust Deed**"..	means the trust deed dated as of January 27, 2023 by and among TIM, as issuer, and the relevant EUR TIM Original Notes Trustee, as amended and/or supplemented from time to time;
"**EUR Original January 2026 Notes**"	means €750,000,000 2.875 % Notes due January 28, 2026 issued by TIM on June 28, 2018;
"**EUR Original January 2026 Notes Trust Deed**"..	means the trust deed dated as of June 8, 2018 by and among TIM, as issuer and the relevant EUR TIM Original Notes Trustee, as amended and/or supplemented from time to time;
"**EUR Original January 2029 Notes**"	means €1,000,000,000 1.625 % Notes due January 18, 2029 issued by TIM on January 18, 2021;
"**EUR Original January 2029 Notes Trust Deed**"..	means the trust deed dated as of June 18, 2020 by and among TIM, as issuer and the relevant EUR TIM Original Notes Trustee, as amended and/or supplemented from time to time;
"**EUR Original July 2028 Notes**"	means €1,500,000,000 7.875 % Notes due July 31, 2028 issued by TIM on July 20, 2023;
"**EUR Original July 2028 Notes Trust Deed**"	means the trust deed dated as of July 20, 2023 by and among TIM, as issuer and the relevant EUR TIM Original Notes Trustee, as amended and/or supplemented from time to time;
"**EUR Original March 2055 Notes**"	means €850,000,000 5.25 % Notes due March 17, 2055 issued by TIM on March 17, 2005;
"**EUR Original March 2055 Notes Trust Deed**"...	means the trust deed dated as of January 23, 2004 by and among TIM, as issuer and the relevant EUR TIM Original Notes Trustee, as amended and/or supplemented from time to time;
"**EUR Original May 2026 Notes**"..............	means €1,000,000,000 3.635 % Notes due May 25, 2026 issued by TIM on May 25, 2016;
"**EUR Original May 2026 Notes Trust Deed**"...	means the trust deed dated as of June 30, 2015 by and among TIM, as issuer and the relevant EUR TIM Original Notes Trustee, as amended and/or supplemented from time to time;
"**EUR Original Notes**"................................	means, collectively, the EUR TIM Original Notes and the EUR TIF Original Notes;

“**EUR Original October 2027 Notes**”........	means €1,250,000,000 2.375 % Notes due October 12, 2027 issued by TIM on October 12, 2017;
“**EUR Original October 2027 Notes Trust Deed**”..	means the trust deed dated as of July 13, 2017 by and among TIM, as issuer and the relevant EUR TIM Original Notes Trustee, as amended and/or supplemented from time to time;
“**EUR Settlement Date**”	means the settlement date for the EUR TIM Initial Exchange;
“**EUR TIF Exchange Offer**”	means the EUR TIF Initial Exchange of the EUR TIF New Notes, with the EUR TIF Mandatory Acquisition Exchange included within the terms of the EUR TIF New Notes;
“**EUR TIF Initial Exchange**”	has the meaning given to such term in “*Terms of the EUR TIF Exchange Offer*”;
“**EUR TIF New Notes**”	means 7.750 % Guaranteed Notes due January 24, 2033 expected to be issued at the EUR TIF Initial Exchange pursuant to the EUR TIF Exchange Offer by TIF and guaranteed by TIM;
“**EUR TIF New Notes Agency Agreement**”	refers to the agency agreement dated as of the date of the EUR TIF Initial Exchange by and among TIF, as issuer and the New Notes Agent, as amended and/or supplemented, with respect to the EUR TIF New Notes;
“**EUR TIF New Notes Deed of Covenant**”	refers to the deed of covenant dated as of the date of the EUR TIF Initial Exchange by TIF as issuer in respect of the EUR TIF New Notes;
“**EUR TIF New Notes Deed of Guarantee**”...	refers to the deed of guarantee dated as of the date of the EUR TIF Initial Exchange by TIM as guarantor in respect of the EUR TIF New Notes;
“**EUR TIF Original Notes**”........................	means €1,050,000,000 7.750 % Guaranteed Notes due January 24, 2033 issued by TIF, originally Olivetti Finance N.V., and guaranteed by TIM, originally Olivetti S.p.A.;
“**EUR TIF Original Notes Agency Agreement**”..	refers to the agency agreement dated as of May 14, 2002 by and among TIF, originally Olivetti Finance N.V., as issuer, TIM, originally Olivetti S.p.A., as guarantor and the EUR TIF Original Notes Agent;
“**EUR TIF Original Notes Agent**”.............	means The Bank of New York Mellon;

"**Notes**" .... means, collectively, the New Notes and the Optics Notes;

"**Optics**" .... means Optics Bidco S.p.A.;

"**Optics Financing Arrangements**" .... means, collectively, the Senior Bridge Facility Agreement and the Senior Facilities Agreement;

"**Optics Group**" .... means Optics and its subsidiaries;

"**Optics HoldCo**" .... Optics Holdco S.r.l.;

"**Optics Notes**" .... means, collectively, the EUR Optics Notes and the USD Optics Notes;

"**Optics Notes Collateral**" .... means the Optics Notes Issue Date Collateral (including any Optics Notes Replacement Collateral, if any) and the Optics Notes Post-Issue Collateral and any and all assets from time to time in which a security interest has been or will be granted pursuant to any Security Document to secure the obligations under the USD Optics Notes Indenture, EUR Optics Notes Trust Deed and the Optics Notes, in each case as may be in existence from time to time, as the context may require;

"**Optics Notes Issue Date**" .... means the date on which the Optics Notes are issued, which is expected to be the Acquisition Closing Date;

"**Optics Notes Issue Date Collateral**"........ has the meaning given to such term in the "*Summary of the EUR Optics (TIF) Notes*";

"**Optics Notes Post-Issue Date Collateral**" .... has the meaning given to such term in the "*Summary of the EUR Optics (TIF) Notes*";

"**Optics Notes Replacement Collateral**" refers to the security that Optics HoldCo will enter into within 20 Business Days following the Push-Down Merger in the event that the Push-Down Merger cannot be effected with, and to replace, the security interests over the shares in NetCo held by Optics and/or intercompany loans made available by Optics HoldCo;

"**Optics Notes Security Agent**" .... means UniCredit S.p.A. in its capacity as security agent for the secured creditors under the USD Optics Notes Indenture, the EUR Optics Notes Trust Deed, the Intercreditor Agreement and the Senior Facilities Agreement, the Senior Bridge Facility Agreement and as representative (*rappresentante*) of the holders of the Optics Notes

pursuant to and for the purposes set forth under Article 2414-bis, Paragraph 3, of the Italian Civil Code;

"**Optics Notes Paying Agent**" .... means Citibank, N.A., London Branch for the EUR Optics Notes and the USD Optics Notes;

"**Optics Notes Transfer Agent and Registrar**" .... means Citibank Europe plc for the EUR Optics Notes and Citibank, N.A., London Branch for the USD Optics Notes;

"**Optics Notes Trustee**" .... means Citibank, N.A., London Branch for the EUR Optics Notes and the USD Optics Notes;

"**Original Notes**" .... means, collectively, the EUR Original Notes and USD Original Notes;

"**Participating Holders"** .... means an Eligible Holder that has validly submitted (and not validly withdrawn) an Instruction on or prior to the EUR Expiration Time in order to participate in the EUR TIF Initial Exchange;

"**Push-Down Merger**" .... means the merger between Optics and NetCo on the Push-Down Merger Date, with NetCo being the surviving entity.

"**Push-Down Merger Date**" .... means the date on which the Push-Down Merger becomes effective;

"**Revocation Instructions**" .... means an electronic revocation instruction to revoke an Instruction or delivered in accordance with the provisions set out in "*Terms of the EUR TIF Exchange Offer – Holders' Rights of Revocation*;"

"**Sanctioned Territory**" .... any jurisdiction or other territory that is, or was at the relevant time, subject to a comprehensive export, import, financial or investment embargo under any Sanctions, including Cuba, Iran, North Korea, Syria, the Crimea, Zaporizhzhia and Kherson regions of Ukraine, the so-called People's Republic of Donetsk, the so-called People's Republic of Luhansk or any other country or territory that is similarly the target of country-wide or territory-wide Sanctions.

"**Sanctions**" .... any economic or financial restrictive measures administered or enforced by any Sanctions Authority.

"**Sanctions Authority**" .... the United Nations Security Council or the respective governmental institutions and agencies of the United States, the United Kingdom, the European Union or a member state of the European Union or Switzerland including, without limitation, the Office of Foreign Assets Control of the United States Department of the Treasury, the United States Department of State, the United States Department of Commerce and the Office of Financial Sanctions Implementation of His Majesty's Treasury or any other equivalent governmental or regulatory authority, institution or agency which administers economic, financial or trade sanctions.

"**Sanctions Restricted Person**" .... means an individual or entity:

(a) that is designated on the lists of Specially Designated Nationals and Blocked Persons or Foreign Sanctions Evaders or any other sanctions list maintained by OFAC, the U.S. Department of

Commerce, the U.S. Department of State and any other agency of the U.S. government;

(b) that is designated on the Consolidated List of Persons, Groups and Entities Subject to EU Financial Sanctions maintained by the European Commission, any equivalent list maintained by the competent sanctions authority of any EU Member State;

(c) that is designated on the Consolidated List of Financial Sanctions Targets maintained by the Office of Financial Sanctions Implementation, His Majesty's Treasury of the United Kingdom;

(d) that is, or is part of, a government of a Sanctioned Territory;

(e) that is located, organized or residing in any Sanctioned Territory;

(f) that is otherwise a target of any Sanctions;

(g) that is, in the aggregate, 50% or greater owned, directly or indirectly, or otherwise controlled by a person or persons described in (a) – (f), above;

(h) that is acting on behalf of any of the persons listed in (a) – (g) above for the purposes of evading or avoiding or having the intended effect of or intending to evade or avoid, or facilitating the evasion or avoidance of any Sanctions; or

(i) whose participation in the EUR TIF Exchange Offer would otherwise result in a violation of Sanctions by any person (including any person participating in the EUR TIF Exchange Offer whether as a dealer manager, adviser, investor or otherwise);

"**Security Documents**"................................ means the security agreements, pledge agreements, collateral assignments, and any other instrument and document executed and delivered pursuant to the USD Optics Notes Indenture and EUR Optics Notes Trust Deed or otherwise or any of the foregoing, as the same may be amended, supplemented or otherwise modified from time to time, creating the security interests in the Optics Notes Collateral as contemplated by the USD Optics Notes Indenture and EUR Optics Notes Trust Deed;

"**Senior Bridge Facility Agreement**"......... means the senior bridge facility agreement dated December 19, 2023 (as amended and restated on April 8, 2024) and made between, inter alios, Optics, each Lender thereunder and as defined in the Senior Bridge Facility Agreement and the Optics Notes Senior Facility Agent;

"**Senior Facilities Agreement**"................... means the senior facilities agreement dated December 19, 2023 (as amended and restated on April 8, 2024) and made between, inter alios, Optics, each Lender thereunder and as defined in the Senior Facilities Agreement and the Optics Notes Senior Facility Agent;

"**Stock Exchange**"....................................... means the Luxembourg Stock Exchange;

"**Telenergia**".. means Telenergia S.r.l.;

"**TICAP**"	means Telecom Italia Capital, a public limited company, (*societe' anonyme*) organised under the laws of the Grand Duchy of Luxembourg;
"**TIM Group**"...	means TIM and its consolidated subsidiaries, which until the Acquisition Closing Date will continue to include FiberCop;
"**Transactions**"..	refers to the Acquisition, the EUR Initial Exchange, the USD Initial Exchange, the EUR Acquisition Exchange, the USD Acquisition Exchange, the entry into the Master Services Agreement (as defined herein), the entry into the Transitional Services Agreement (as defined herein), and any ancillary transactions, transfers, agreements or undertakings necessary, whether by contract or operation of law, to effect these transactions;
"**Transaction Agreement**"..........................	means the share purchase agreement dated November 6, 2023, among *inter alios*, TIM as seller and Optics as purchaser in respect of the sale of TIM's entire stake in NetCo, after the contribution of the NetCo Business to FiberCop (as amended from time to time);
"**US-Dollar Equivalent**"	means, by reference to an amount in Euros, the United States dollars equivalent of such amount, determined by multiplying such amount by the Applicable Euro/USD Exchange Rate;
"**USD Acquisition Exchange**"	means the exchange of the USD New Notes for an equal aggregate principal amount of USD Optics Notes on the Acquisition Closing Date, as further detailed in the USD Exchange Offer Memorandum;
"**USD Exchange Offers**"	means the invitation by TICAP to holders of the USD Original Notes to tender their USD Original Notes for exchange for an equal aggregate principal amount of USD New Notes by TICAP including the terms of the USD Acquisition Exchange;
"**USD Initial Exchange**"	means invitation by TICAP to holders of the USD Original Notes to tender their USD Original Notes for exchange for an equal aggregate principal amount of USD New Notes by TICAP;
"**USD New 2033 Notes**"..............................	means 6.375% Guaranteed Senior Notes due November 15, 2033 expected to be issued by TICAP at the USD Initial Exchange pursuant to the USD Exchange Offers;
"**USD New 2034 Notes**"	means 6.000% Guaranteed Senior Notes due September 30, 2034 expected to be issued by TICAP at the USD Initial Exchange pursuant to the USD Exchange Offers;
"**USD New 2036 Notes**"..............................	means 7.200% Guaranteed Senior Notes due July 18, 2036 expected to be issued by TICAP at the USD Initial Exchange pursuant to the USD Exchange Offers;
"**USD New 2038 Notes**"..............................	means 7.721% Guaranteed Senior Notes due June 4, 2038 expected to be issued by TICAP at the USD Initial Exchange pursuant to the USD Exchange Offers;
"**USD New Notes**"......................................	means USD New 2033 Notes, USD New 2034 Notes, USD New 2036 Notes and USD New 2038 Notes expected to be issued at the Initial Exchange pursuant to the Exchange Offers;

“**USD Optics 2033 Notes**” .... means 6.375 % Senior Secured Notes due November 15, 2033 expected to be issued by Optics on the Acquisition Closing Date pursuant to the USD Exchange Offers assuming the corresponding series of USD New Notes are issued on the USD Initial Exchange pursuant to the Exchange Offers;

“**USD Optics 2034 Notes**” .... means 6.000 % Senior Secured Notes due September 30, 2034 expected to be issued by Optics on the Acquisition Closing Date pursuant to the USD Exchange Offers assuming the corresponding series of USD New Notes are issued on the USD Initial Exchange pursuant to the Exchange Offers;

“**USD Optics 2036 Notes**” .... means 7.200 % Senior Secured Notes due July 18, 2036 expected to be issued by Optics on the Acquisition Closing Date pursuant to the USD Exchange Offers assuming the corresponding series of USD New Notes are issued on the USD Initial Exchange pursuant to the Exchange Offers;

“**USD Optics 2038 Notes**” .... means 7.721 % Senior Secured Notes due June 4, 2038 expected to be issued by Optics on the Acquisition Closing Date pursuant to the USD Exchange Offers assuming the corresponding series of USD New Notes are issued on the USD Initial Exchange pursuant to the Exchange Offers;

“**USD Optics Notes**” .... means, collectively, the USD Optics 2033 Notes, the USD Optics 2034 Notes, the USD Optics 2036 Notes and the USD Optics 2038 Notes expected to be issued at the Acquisition Closing Date pursuant to the USD Exchange Offers assuming the corresponding series of USD New Notes are issued on the USD Initial Exchange pursuant to the Exchange Offers;

“**USD Optics Notes Indenture**” .... refers to the indenture dated as of the date of the USD Acquisition Exchange among, *inter alios*, Optics, as issuer, the Optics Notes Trustee and the Optics Notes Security Agent, as amended and/or supplemented from time to time;

“**USD Original 2033 Notes**” .... means $1,000,000,000 6.375% Guaranteed Senior Notes due November 15, 2033 issued by TICAP on October 29, 2003;

“**USD Original 2034 Notes**” .... means $1,000,000,000 6.000% Guaranteed Senior Notes due September 30, 2034 issued by TICAP on October 6, 2004;

“**USD Original 2036 Notes**” .... means $1,000,000,000 7.200% Guaranteed Senior Notes due July 18, 2036 issued by TICAP on July 18, 2006;

“**USD Original 2038 Notes**” .... means $1,000,000,000 7.721% Guaranteed Senior Notes due June 4, 2038 issued by TICAP on June 4, 2008;

“**USD Original Notes**” .... means, collectively, the USD Original 2033 Notes, USD Original 2034 Notes, USD Original 2036 Notes and USD Original 2038 Notes (and each a “**Series of USD Original Notes**”);

“**Vivendi**” .... means Vivendi S.E.

IMPORTANT DATES

The times and dates below are indicative only and subject to extension. Any publication or notification will be made as soon as practicable after the relevant event hereunder.

Events	Dates and Time
	(Unless otherwise stated, all times are CET)
Commencement of the EUR TIF Exchange Offer	
The EUR TIF Exchange Offer is announced and notice of the EUR TIF Exchange Offer is submitted to the Clearing Systems and published on the website of the Luxembourg Stock Exchange.	April 18, 2024
The Exchange Offer Memorandum available from the Exchange and Information Agent to eligible recipients upon request.	
EUR Expiration Time	
Deadline for receipt by the Exchange and Information Agent of valid Instructions from Participating Holders to offer their EUR TIF Original Notes for exchange in the EUR TIF Exchange Offer and their EUR TIM Original Notes for exchange in the EUR TIM Exchange Offers.	5:00 p.m. (CET) on May 1, 2024
The EUR Expiration Time for the EUR TIF Exchange Offer and the EUR TIM Exchange Offers is expected to occur on the same day as the Early Participation Deadline of the USD Exchange Offers.	
Announcement and publication of acceptance of amount of offered EUR TIF Original Notes and EUR TIF New Notes to be issued	
Announcement of (i) the final aggregate principal amount of the EUR TIF Original Notes accepted for exchange, (ii) the Final Series Acceptance Amount for EUR TIF Original Notes, (iii) the final aggregate principal amount of EUR TIF New Notes to be issued, (iv) the aggregate principal amount of EUR TIF Original Notes not offered for exchange or not accepted by TIF and (v) the relevant Pro-Ration Factor. Announcement to be submitted to the Clearing Systems and published on the Luxembourg Stock Exchange.	As soon as reasonably practicable after the EUR Expiration Time.
Settlement of the EUR TIF Initial Exchange	
The date on which TIF will issue the EUR TIF New Notes in exchange for the EUR TIF Original Notes validly offered for exchange (and not validly withdrawn) on or prior the EUR Expiration Time. On the EUR Settlement Date, Participating Holders whose EUR TIF Original Notes are accepted for exchange in the EUR TIF Exchange Offer will receive the EUR Exchange Consideration, the Accrued Interest Amount in respect of the EUR TIF Original Notes and the Participation Premium. Following the EUR Settlement Date, the EUR TIF Mandatory Acquisition	As soon as practicable following the EUR Expiration Time and expected on May 8, 2024

Events	Dates and Time
	(Unless otherwise stated, all times are CET)
Exchange may occur at any time on or prior to the Longstop Date.	
EUR TIF Mandatory Acquisition Exchange; Longstop Date	
If the Acquisition is not or will not be consummated on or prior to the Longstop Date, the EUR TIF New Notes will remain outstanding as a separate series and will not be fungible with the EUR TIF Original Notes not validly offered or otherwise accepted by TIF as part of the EUR TIF Exchange Offer.	No later than October 15, 2024, or any further date agreed prior to the then current long stop date between TIM and Optics pursuant to the Transaction Agreement.
Settlement of the EUR TIF Mandatory Acquisition Exchange	
If the Acquisition is or will be consummated on or prior to the Longstop Date, on the Acquisition Closing Date the EUR TIF New Notes will be mandatorily exchanged into the EUR Optics (TIF) Notes without the need for further action by the relevant Noteholders. On the Acquisition Closing Date, Holders of the EUR TIF New Notes will receive, if applicable, the Accrued Interest Amount in respect of the EUR TIF New Notes.	Upon no less than five business days prior notice by TIF to the New Notes Agent, Optics and the holders of the EUR TIF New Notes. To be communicated to Holders by TIF via written notice delivered as set out in "*Announcements*".

The above times and dates are subject, where applicable, to the right of TIF to extend, re-open, amend and/or terminate the EUR TIF Exchange Offer (subject to applicable law, and as provided in this Exchange Offer Memorandum). The deadlines set by any such intermediary and each Clearing System for the submission and withdrawal of Instructions may be earlier than the relevant deadlines above. See "*Procedures for Participating in the EUR TIF Exchange Offer*".

Holders are advised to check with any broker, dealer, bank, custodian, trust company or other nominee or other intermediary through which they hold EUR TIF Original Notes to confirm whether such intermediary requires that it receive instructions for such Holder to participate in, or (in the limited circumstances in which revocation is permitted) revoke such Holder's instruction to participate in, the EUR TIF Exchange Offer before the deadlines specified above.

THE EUR TIM EXCHANGE OFFERS

The EUR TIM Exchange Offers will expire at 5:00 pm (CET) on May 1, 2024, unless extended, re-opened or terminated by TIM and as provided in the EUR TIM Exchange Offer Memorandum. The settlement date of the initial exchange for the EUR TIM Exchange Offers will coincide with the settlement date of the EUR TIF Initial Exchange.

THE USD EXCHANGE OFFERS

The expiration time for the EUR Exchange Offers is expected to occur on the same day as the Early Participation Deadline (as defined in the USD Exchange Offer Memorandum) of the USD Exchange Offers. Since TICAP is inviting the holders of the USD Original Notes to offer for exchange the US-dollar equivalent (as determined by reference to the Applicable Euro/USD Exchange Rate) of up to the Total Cap *less* the aggregate principal amount of any EUR Original Notes offered for exchange and accepted by TIM and TIF in the EUR Exchange Offers, the aggregate principal amount of USD Original Notes accepted as part of the USD Exchange Offers will depend on the aggregate principal amount of EUR Original Notes offered for exchange and accepted by TIM and TIF in the EUR Exchange Offers, which will be announced as soon as practicable after the expiration time of the EUR Exchange Offers and the Early Participation Deadline of the USD Exchange Offers. The USD Exchange Offers will expire at 5:00 p.m. (New

York time) on May 16, 2024, unless extended by TICAP (the "**USD Expiration Time**"). As soon as practicable after the USD Expiration Time, TICAP will announce the final aggregate principal amount of the USD Original Notes accepted for exchange. The settlement of the USD Initial Exchange (as defined in the USD Exchange Offer Memorandum) is expected to take place not later than the third business day following the USD Expiration Time.

FORWARD-LOOKING STATEMENTS

All statements other than statements of historical fact included in this Exchange Offer Memorandum regarding the TIM Group's and the Optics Group's business financial condition, results of operations and certain of the TIM Group's plans, objectives, assumptions, expectations or beliefs with respect to these items and statements regarding other future events or prospects are forward-looking statements.

These statements include, without limitation, those concerning: the TIM Group's and Optics Group's strategy and the TIM Group's and Optics Group's ability to achieve it; expectations regarding revenues, profitability and growth; plans for the launch of new services; the TIM Group's and Optics Group's possible or assumed future results of operations; research and development, capital expenditure and investment plans; adequacy of capital; and financing plans. The words "aim," "may," "will," "expect," "forecast," "anticipate," "believe," "future," "continue," "help," "estimate," "plan," "potential," "predict," "project," "seek" "intend," "should," "could," "would," "shall" or the negative or other variations thereof as well as other statements regarding matters that are not historical fact, are or may constitute forward-looking statements.

In addition, this includes forward-looking statements relating to the TIM Group's and Optics Group's potential exposure to various types of market risks, such as foreign exchange rate risk, interest rate risks and other risks related to financial assets and liabilities.

These forward-looking statements have been based on the TIM Group's management's current view with respect to future events and financial performance. These views reflect the best judgment of the TIM Group's management but involve a number of risks and uncertainties which could cause actual results to differ materially from those predicted in such forward-looking statements and from past results, performance or achievements. Although the TIM Group's management believes that the estimates reflected in the forward-looking statements are reasonable, such estimates may prove to be incorrect.

By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-thinking statements. These factors include, but are not limited to the following:

- requirements of the TIM Group's and/or NetCo's heavily regulated industries, changes in the regulatory environment as well failure to comply with such changes;
- the TIM Group's and/or NetCo's inability to deliver the expected regulatory and business benefits of the Transactions;
- the TIM Group's failure to successfully implement its strategic objectives and factors beyond its control which may prevent it from successfully implementing its strategy;
- complexities in relation to the separation of NetCo from the TIM Group, including unexpected uncertainties and costs;
- deterioration of the relationship with, or in the financial condition of, NetCo for the TIM Group and deterioration of the relationship with, or in the financial condition of, the TIM Group for NetCo;
- challenging market conditions for the TIM Group and NetCo resulting from competition;
- the TIM Group's customer churn or threat of customer churn;
- credit risk with respect to the TIM Group's customers;
- forward-looking nature of the assumptions and estimates used in by the TIM Group and/or NetCo in assessing target components, steps and objectives;

- the TIM Group's difficulties responding to new telecommunications technologies;
- the TIM Group's restrictions on customer access to mobile phone financing;
- the TIM Group's increasing data security restrictions;
- the TIM Group's reliance on third parties
- TIM Group's outsourcing risk;
- enhanced competition from changes in technologies and competitive offerings;
- the TIM Group's ability to successfully implement its internet, 4.5G/5G Next Generation Mobile Networks and ICT, ultrabroadband access network strategies;
- the TIM Group's and NetCo's ability to successfully upgrade their respective network;
- the TIM Group's ability to generate positive returns from capital expenditures;
- the TIM Group's and NetCo's ability to perform in case of unpredictable increase of traffic;
- risks related system and network failures;
- cybersecurity risks;
- risks related potential future strategic transactions, such as acquisitions, investments or dispositions, and the integration of such entities;
- goodwill impairment in relation to acquired businesses;
- the TIM Group's and NetCo's potential intellectual property rights litigation risks;
- complexities relating to the TIM Group's governance structure;
- the TIM Group's and NetCo's ability to successfully meet environmental, social and governance related requirements;
- the TIM Group's and NetCo's ability to close the digital divide;
- changes in the TIM Group's directorships and/or senior management;
- the TIM Group's and NetCo's ability to recruit, retain and engage skilled employees;
- the TIM Group's and NetCo's exposure to a variety of macroeconomic conditions;
- potential exchange rate fluctuations and interest rate risk;
- global economic conditions and political events;
- potential slowdowns in economic growth of Italy;
- the impact of inflations pressure and rising input and borrowing costs on Italy's employment rates;
- the impact of the COVID-19 pandemic or other unexpected and uncertain events;
- the impact of consolidation in the Brazilian telecommunication market for the TIM Group;

- the impact of the Italian Golden Power Authority exercising its significant power over the TIM Group and/or NetCo;
- changing requirements of government authorizations to carry out certain activities;
- the TIM Group's and NetCo's ability to comply with data protection laws;
- changing EU regulation of the levels of roaming charges for the TIM Group;
- actual or perceived health risks or other problems relating to mobile handsets or transmission masts for the TIM Group;
- potential fraud risks, and adequacy of our organizational policies and procedures to prevent frauds;
- risks related to the TIM Group's and NetCo's compliance with Italian Legislative Decree 231/2001;
- the TIM Group's and NetCo's risks related actual and/or potential litigations;
- the TIM Group's ability to protect its image, reputation and brand;
- the TIM Group's potential loss caused by its customers by use of Internet;
- the TIM Group's and NetCo's potential risks of labor disputes;
- the TIM Group's and NetCo's potential risks of claims and penalties in connection with health and safety of their respective employees or of third parties;
- NetCo's requirements to comply with cost-orientation obligations;
- NetCo's ability to secure sufficient liquidity and/or access to financing to fund its capital expenditures and/or generate expected returns;
- NetCo's ability to develop, maintain, repair, upgrade, protect and replace its fixed-line network;
- NetCo's ability to successfully implement its ultrabroadband fixed-line network strategy and objectives;
- deterioration in the financial conditions of NetCo's key customers for NetCo;
- NetCo's lack of history as an operating and independent company;
- complexities in relation to NetCo's ability to achieve a fully operational regime;
- NetCo's reliance on certain suppliers to provide services to its direct customers and to support its operations;
- NetCo's unexpected compliance issues and/or liabilities not known by Optics or greater than anticipated;
- uninsured losses in excess of NetCo's insurance coverage and unanticipated changes in NetCo's insurance costs;
- risks related to shareholders deadlock at Optics HoldCo;
- reliability of certain information provided by Optics;
- NetCo's inability to implement pass-through mechanisms;
- NetCo's ability to comply with anti-competition laws and regulations;

- risks related to changes in NetCo's strategy and estimates from its future controlling shareholder,
- risks related to the assumptions, estimates and reliability of the pro forma financial information contained in this Exchange Offer Memorandum;
- risks relating to the Transactions;
- risks relating to the Exchange Offers;
- risks relating to non-exchanging holders of the Original Notes; and
- risks relating to the New Notes and the Optics Notes.

Prospective investors are cautioned not to place undue reliance on these forward-looking statements. Neither the Issuer nor the TIM Group nor Optics Group undertakes any obligation to republish revised forward-looking statements to reflect events or circumstances after the date hereof or otherwise. Prospective purchasers are also urged carefully to review and consider the various disclosures made by the Issuer and the TIM Group in this Exchange Offer Memorandum which attempt to advise interested parties of the factors that affect the Issuer, the TIM Group and their business, including the disclosures made under "*Risk Factors,*" "*Business of the TIM Group*" and "*Business of NetCo*."

All subsequent written or oral forward-looking statements attributable to the Issuer, the TIM Group, the Optics Group or persons acting on their behalf, are expressly qualified in their entirety by the cautionary statements contained throughout this Exchange Offer Memorandum. As a result of these risks, uncertainties and assumptions, investors should not place undue reliance on these forward-looking statements as a prediction of actual results or otherwise.

MARKET AND INDUSTRY DATA

In this Exchange Offer Memorandum, the Issuer relies on and refers to information regarding its business and the markets in which it operates and competes. The Issuer has made statements in this Exchange Offer Memorandum regarding the economy, the telecommunications industry, the TIM Group's and the Optics Group's position in the industry, their market share and the market shares of various industry participants based on internal estimates, its experience, its own investigation of market conditions and its review of industry publications, including information made available to the public by its competitors. For the purposes of this Exchange Offer Memorandum, certain market and industry data have been calculated without regard to additional subdivisions or segmentation of the relevant markets or industries.

Such market and industry data and certain industry forward-looking statements and forecasts are derived from various industry and other independent sources, where available, including from internal surveys, market research, governmental reports and other publicly available information and third-party consultants. In particular, certain information has been derived from certain aggregated market information available to the TIM Group.

Unless otherwise indicated, statements regarding the market environment, market developments, growth rates, market trends and the competitive situation in the markets and segments in which it operates are based on market data, statistical information, sector reports and third-party studies as well as on the TIM Group's estimates.

The TIM Group believes that information in this Exchange Offer Memorandum that has been sourced from third parties has been accurately reproduced and, as far as it is aware and able to ascertain from the information published by such third parties, no facts have been omitted that would render the reproduced information inaccurate or misleading. Notwithstanding the foregoing, such third-party information has not been independently verified, and neither the TIM Group nor the Dealer Managers make any representation or warranty as to the accuracy or completeness of such information set forth in this Exchange Offer Memorandum. Market studies and analyses are frequently based on information and assumptions that may not be accurate or technically correct, and their methodology may be forward-looking and speculative. The TIM Group has not verified the figures, market data and other information used by third parties in the studies, publications and financial information reproduced herein, or the external sources on which the TIM Group's estimates are based. The TIM Group therefore assumes no liability for and offer no guarantee of the accuracy of the data from studies and third-party sources contained in this Exchange Offer Memorandum or for the accuracy of third-party data on which its estimates are based. This Exchange Offer Memorandum also contains estimates of market data and information derived from such data that cannot be obtained from publications by independent sources.

In addition, certain information in this Exchange Offer Memorandum for which no third-party source is given, regarding the TIM Group and NetCo's market positions relative to their competitors in the telecommunication industry, is not based on published statistical data or information obtained from independent third parties. Such information and statements particularly reflect the TIM Group's best estimates based upon information obtained from trade and business organizations and associations and other contacts within the market in which the TIM Group and/or NetCo compete, as well as information published by the TIM Group's competitors. As some of the foregoing information was compiled or provided by the TIM Group's management or advisers and is not publicly available, such information accordingly may not be considered to be as independent as that provided by other third-party sources.

The TIM Group believes that its estimates of market data and the information it has derived from such data helps investors to better understand the industry in which the TIM Group and/or NetCo operate and their positions within it. The TIM Group's estimates have not been verified externally. While the TIM Group assumes that its market observations are reliable, there can be no assurance as to the accuracy of the TIM Group's estimates and their information. They may differ from the TIM Group's competitors' estimates or other independent sources. While the TIM Group is not aware of any misstatements regarding the market, industry or similar data presented herein, such data involves risks and uncertainties and is subject to change based on various factors, including those discussed under "*Risk Factors*" in this Exchange Offer Memorandum.

ROUNDING

Certain figures and percentages included in this Exchange Offer Memorandum have been subject to rounding adjustments; accordingly, figures shown in the same category presented in different tables may vary slightly and figures shown as totals in certain tables may not be an arithmetic aggregation of the figures which precede them. In addition, as a result of such rounding, the totals of certain financial information may differ from the information that would have appeared in such totals using the unrounded financial information.

TRADEMARKS AND TRADE NAMES

The TIM Group owns or has rights to certain trademarks or trade names that they use in conjunction with the operation of their businesses. The TIM Group asserts, to the fullest extent under applicable law, its rights to its trademarks and trade names. Each trademark, trade name or service mark of any other company appearing in this Exchange Offer Memorandum is the property of its respective holder.

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

Audited Financial Information

TIM Audited Consolidated Financial Statements

This Exchange Offer Memorandum contains the following financial information of the TIM Group:

- an English translation of the audited consolidated financial statements and the accompanying notes thereto of the TIM Group as of and for the year ended December 31, 2023, including comparative figures as of and for the year ended December 31, 2022 (the "**2023 TIM Audited Consolidated Financial Statements**") audited by the TIM Group's independent auditor, EY S.p.A. as set forth in the English translation of its audit report included elsewhere in this Exchange Offer Memorandum, which have been prepared in accordance with IFRS;

- an English translation of the audited consolidated financial statements and the accompanying notes thereto of the TIM Group as of and for the year ended December 31, 2022, including comparative figures as of and for the year ended December 31, 2021 (the "**2022 TIM Audited Consolidated Financial Statements**") audited by the TIM Group's independent auditor, EY S.p.A. as set forth in the English translation of audit report included elsewhere in this Exchange Offer Memorandum, which have been prepared in accordance with IFRS;

- an English translation of the audited consolidated financial statements and the accompanying notes thereto of the TIM Group as of and for the year ended December 31, 2021 (the "**2021 TIM Audited Consolidated Financial Statements**" and, together with the 2023 TIM Audited Consolidated Financial Statements and the 2022 TIM Audited Consolidated Financial Statements, the "**TIM Audited Consolidated Financial Statements**") audited by the TIM Group's independent auditor, EY S.p.A. as set forth in the English translation of audit report included elsewhere in this Exchange Offer Memorandum, which have been prepared in accordance with IFRS

The TIM Group's financial year ends on December 31, and references in this Exchange Offer Memorandum to any specific year are to the twelve-month period ended on December 31, of such year. The TIM Group's independent auditors, EY S.p.A., have been appointed for the nine-year period spanning 2019-2027.

NetCo Audited Combined Carve-out Financial Information

This Exchange Offer Memorandum contains an English translation of the audited consolidated special purpose income statements and statement of financial position and the accompanying notes thereto of NetCo (which for the avoidance of doubt, means FiberCop following the contribution of the NetCo Business to FiberCop) as of and for the year ended December 31, 2023, including comparative audited figures of the income statement for the year ended December 31, 2022 (the "**NetCo Audited Combined Carve-out Financial Information**") audited by the TIM Group's independent auditor, EY S.p.A. as set forth in the English translation of its audit report included elsewhere in this Exchange Offer Memorandum, which have been prepared using the same accounting standards applied in preparing the 2023 TIM Audited Consolidated Financial Statements. The NetCo Audited Combined Carve-out Financial Information does not include a consolidated statement of cash flows, a consolidated statement of changes in net invested capital, or a consolidated statement of comprehensive income, as TIM's management believes that this information would not provide any useful information to investors.

The NetCo Audited Combined Carve-out Financial Information has not been adjusted to reflect the impact of any changes to the income statements and statement of financial position that might occur as a result of purchase accounting adjustments to be applied as a result of the Transactions. However, Optics will account for the Acquisition using the acquisition method of accounting under IFRS and will apply purchase accounting adjustments in connection with the Acquisition to the financial statements for accounting periods subsequent to the Acquisition Closing Date. The application of purchase accounting could result in different carrying values for existing assets and liabilities and the TIM Group may add additional assets to its statement of financial position, which may include intangible assets, such as goodwill, brand name, customer relationships, leasehold rights and software. NetCo may also recognize

additional amortization and depreciation expenses related to the additional assets recognized. Due to these and other potential adjustments, NetCo's future financial statements could be materially different once the adjustments are made and may not be comparable to the financial statements included in this Exchange Offer Memorandum.

For more information, see "*Consolidated Financial Statements.*"

Pro Forma Financial Information

This Exchange Offer Memorandum contains the following pro forma financial information:

TIM Unaudited Consolidated Pro Forma Financial Information

The pro forma consolidated income statements and statement of financial position of the TIM Group as of and for the year ended December 31, 2023, are derived from the 2023 TIM Audited Consolidated Financial Statements (the "***TIM Unaudited Consolidated Pro Forma Financial Information***"). The pro forma consolidated financial information of the TIM Group gives effect to the Transactions by applying pro forma adjustments to the historical consolidated financial statements of the TIM Group to reflect the exclusion of the NetCo assets, FiberCop, Telenergia, an assumed debt transfer as part of the Exchange Offers (assuming the Initial Exchange is subscribed at the Total Cap amount), the unwinding of the relevant hedge contracts, an assumed cash-in from the Acquisition, including in connection with a payment by Optics to TIM in respect of the Exchange Offers in accordance with the Transaction Agreement, the repayment of the FiberCop Intercompany Loan and certain adjustments, including the impact of the Master Services Agreement and the Transitional Services Agreement. The TIM Unaudited Pro Forma Financial Information does not reflect the final attribution of goodwill by the TIM Group to the NetCo Business, following the application of the applicable IFRS accounting principles, such as IAS 36 (Impairment of Assets), at the Acquisition Closing Date and after the final determination of the relative values of the business disposed of and the portion of the cash generating unit retained (or other method to better reflect the goodwill associated with the operation disposed of).

The cash-in from the Acquisition does not reflect the payment by the TIM Group of any early bird premium or participation premium of, in each case, $2.50 or €2.50 per $1,000 or €1,000 principal amount (as the case may be) per Original Note accepted in connection with the Initial Exchange).

The pro forma consolidated income statement for the year December 31, 2023 was prepared to give effect to the Transactions as if they had been completed on January 1, 2023 and the pro forma consolidated statement of financial position as of December 31, 2023 was prepared to give effect to the Transactions as if they had been completed on December 31, 2023.

The notes to the TIM Unaudited Consolidated Pro Forma Financial Information include an explanation of their basis of preparation.

The TIM Unaudited Consolidated Pro Forma Financial Information presented in this Exchange Offer Memorandum is based on available information and certain current market-based assumptions that the TIM Group's management believes are reasonable. The TIM Unaudited Consolidated Pro Forma Financial Information is presented for illustrative purposes only and does not purport to represent what the actual results of operations would have been if the events for which the pro forma adjustments were made had occurred on the dates assumed, nor does it purport to project the TIM Group's results of operations for any future period or financial condition at any future date. The TIM Group's future operating results may differ materially from the pro forma amounts set out in this Exchange Offer Memorandum due to various factors, including changes in operating results.

The TIM Unaudited Consolidated Pro Forma Financial Information set forth below is presented, unless otherwise specified, in accordance with the accounting principles used in the preparation of the TIM Audited Consolidated Financial Statements, which have been prepared in accordance with IFRS. The TIM Unaudited Consolidated Pro Forma Financial Information should be read together with the TIM Audited Consolidated Financial Statements included elsewhere in this Exchange Offer Memorandum.

The TIM Unaudited Consolidated Pro Forma Financial Information set forth elsewhere in this Exchange Offer Memorandum has not been prepared in accordance with the requirements of Regulation S-X under the U.S. Securities

Exchange Act of 1934, the Prospectus Directive, U.S. GAAP or any other generally accepted accounting standards. Neither the adjustments nor the resulting TIM Unaudited Consolidated Pro Forma Financial Information have been audited or reviewed in accordance with International Standards on Auditing (Italy).

NetCo Unaudited Combined Pro Forma Carve-out Financial Information

The pro forma combined income statements and statement of financial position of NetCo as of and for the year ended December 31, 2023 and the *pro forma* combined income statement for the year ended December 31, 2022 are derived from the NetCo Audited Combined Carve-out Financial Information (the "***NetCo Unaudited Combined Pro Forma Carve-out Financial Information***"). The *pro forma* carve-out financial information of NetCo gives effect to the Transactions by applying *pro forma* adjustments to the consolidated carve-out financial information of the NetCo to reflect certain adjustments as of and for the year ended December 31, 2023, including the impact of the Master Services Agreement, the Transitional Services Agreement and the repayment of the FiberCop Intercompany Loan with a new loan to be granted to NetCo and assuming the same interest rate as the interest rate of the FiberCop Intercompany Loan will apply to it. The NetCo Unaudited Combined Pro Forma Carve-out Financial Information does not reflect any adjustment relating to the purchase price allocation as the exercise to determine the fair value of the net assets acquired will be carried out only after Acquisition Closing Date.

The NetCo Unaudited Combined Pro Forma Carve-out Financial Information does not reflect the financial and economic effects of the Exchange Offers, the financial position or results of Optics (including the debt incurred by Optics under the Senior Facilities Agreement, the Bridge Facility Agreement (if applicable) and the Acquisition Exchange (if any) or any pro forma interest expense related thereto) or the expenses at the Acquisition Closing Date and the costs that NetCo, as a standalone entity, could incur as part of the ongoing cost structure of the NetCo Business.

The pro forma combined income statement for the year December 31, 2023 was prepared to give effect to the Transactions as if they had been completed on January 1, 2023, the pro forma combined income statement for the year December 31, 2022 was prepared to give effect to the Transactions as if they had been completed on January 1, 2022, and the pro forma combined statement of financial position as of December 31, 2023 was prepared to give effect to the Transactions as if it had been completed on December 31, 2023. For more information, see "*NetCo Unaudited Combined Pro Forma Carve-out Financial Information*."

The notes to the NetCo Unaudited Combined Pro Forma Carve-out Financial Information include an explanation of the basis of preparation.

The NetCo Unaudited Combined Pro Forma Carve-out Financial Information presented in this Exchange Offer Memorandum is based on available information and certain current market-based assumptions that the TIM Group's management believes are reasonable. The NetCo Unaudited Combined Pro Forma Carve-out Financial Information is presented for illustrative purposes only and does not purport to represent what the actual results of operations would have been if the events for which the *pro forma* adjustments were made had occurred on the dates assumed, nor does it purport to project NetCo's results of operations for any future period or financial condition at any future date. The NetCo's future operating results may differ materially from the *pro forma* amounts set out in this Exchange Offer Memorandum due to various factors, including changes in operating results.

The NetCo Unaudited Combined Pro Forma Carve-out Financial Information set forth below is presented, unless otherwise specified, in accordance with the accounting principles used in the preparation of the NetCo Audited Carve-out Financial Information. The NetCo Unaudited Combined Pro Forma Carve-out Financial Information should be read together with the NetCo Audited Carve-out Financial Information included elsewhere in this Exchange Offer Memorandum.

The NetCo Unaudited Combined Pro Forma Carve-out Financial Information set forth elsewhere in this Exchange Offer Memorandum has not been prepared in accordance with the requirements of Regulation S-X under the U.S. Securities Exchange Act of 1934, the Prospectus Directive, U.S. GAAP or any other generally accepted accounting standards. Neither the adjustments nor the resulting NetCo Unaudited Combined Pro Forma Carve-out Financial Information have been audited or reviewed in accordance with International Standards on Auditing (Italy) or IFRS.

Factors Impacting Comparability

In the year ended December 31, 2023, the TIM Group applied the accounting policies on a basis consistent with those of the previous years, except for the changes to the accounting standards issued by the IASB and in force as of January 1, 2023. For further information on the new standards and interpretations endorsed by the EU applicable to the years ended December 31, 2023, 2022 and 2021, see Note 2 to the 2023 TIM Audited Consolidated Financial Statements and 2022 TIM Audited Consolidated Financial Statements.

Presentation of Non-IFRS Measures

In this Exchange Offer Memorandum, the TIM Group presents certain financial measures and ratios that are not recognized by IFRS or any other generally accepted accounting principles. These measures as referred to as "non-IFRS" or "alternative performance measures" ("**non-IFRS**" or "**Alternative Performance Measures**") as they exclude amounts that are included in, or include amounts that are excluded from, the most directly comparable measure calculated and presented in accordance with IFRS, or are calculated using financial measures that may not be calculated in accordance with IFRS.

The TIM Group believes that these non-IFRS measures are important supplementary measures of its underlying performance and liquidity (as a whole and at a business unit level) and that they are widely used by investors comparing performance between companies. It also believes that these and similar measures are used widely by the investment community, securities analysts and other interested parties, as supplemental measures of performance and liquidity and are intended to assist investors in their analysis of the TIM Group's results of operations, profitability and ability to service its debt.

The non-IFRS measures presented in this Exchange Offer Memorandum may be used by different companies for different purposes and are often calculated in ways that reflect the circumstances of those companies. Investors should exercise caution in comparing such measures to similar measures used by other companies. The information presented by each non-IFRS measure is unaudited and has not been prepared in accordance with IFRS or any other accounting standards. In addition, the presentation of these measures is not intended to and does not comply with the reporting requirements of the SEC; compliance with its requirements may require the TIM Group to make changes to the presentation of this information.

Further, these non-IFRS measures are not measurements of performance under IFRS and investors should not consider them an alternative to pre-tax income or operating income determined in accordance with IFRS, or, as the case may be, to cash flows from/(used in) operating activities, cash requirements used in investing activities or cash flow from/(used in) financing activities. In particular, investors should not consider EBIT and EBITDA as an alternative to: (i) operating income or income for the period (as determined in accordance with IFRS) as a measure of operating performance; (ii) cash flows provided by operating, investing and financing activities as a measure of the ability to meet cash needs; or (iii) any other measures of performance under generally accepted accounting principles. EBIT and EBITDA and other non-IFRS measures have limitations as an analytical tool, and investors should not consider them in isolation, or as a substitute for an analysis of the TIM Group's results as reported under IFRS. Additionally, these non-IFRS measures should not be considered as an alternative to operating income or operating margin as a measure of operating performance. Further, these non-IFRS measures should not be considered in isolation or construed as a substitute for measures in accordance with IFRS. Furthermore, the non-IFRS measures as used in some of the sections of this Exchange Offer Memorandum, may not be calculated in the same manner as similar measures are calculated pursuant to the relevant trust deed/indenture governing the Notes or for the purposes of any of TIM Group's other indebtedness.

Presentation of Non-IFRS Measures of the TIM Group

In this Exchange Offer Memorandum, the following Alternative Performance Measures are presented for the TIM Group on an historical basis without giving effect to the Transactions:

- ***EBIT/EBITDA***: These measures are used by the TIM Group as a financial target and are calculated as follows:

Profit (loss) before tax from continuing operations	
+	Finance expenses
-	Finance income
+/-	Other expenses (income) from investments
+/-	Share of losses (profits) of associates and joint ventures accounted for using the equity method
EBIT – Operating profit (loss)	
+/-	Impairment losses (reversals) on non-current assets
+/-	Losses (gains) on disposals of non-current assets
+	Depreciation and amortization
EBITDA – Operating profit before depreciation and amortization, capital gains (losses) and impairment reversals (losses) on non-current assets	

- ***Organic change and impact of the non-recurring items on revenues, EBITDA and EBIT***: These measures express changes (amount and/or percentage) in revenues, EBITDA and EBIT, excluding, where applicable, the effects of the change in the scope of consolidation, the exchange differences and the non-recurring events and transactions. The TIM Group presents a reconciliation between the 'accounting' or 'reported' figures and the 'organic excluding the non-recurring component' figures.

- ***EBITDA margin and EBIT margin***: The TIM Group believes that these margins represent useful indicator of the ability of the TIM Group (as a whole and at business unit level) to generate profits from its revenues. EBITDA margin and EBIT margin are a measure of the percentage of revenues that are converted into EBITDA and EBIT, respectively.

- ***Net Financial Debt/ Net Financial Debt carrying amount***: The TIM Group believes that Net Financial Debt represents an accurate indicator of its ability to meet its financial obligations. It is calculated by deducting Cash and Cash Equivalents and other Financial Assets from Gross Financial Debt. Additionally, to provide a better representation of the true performance of Net Financial Debt, in addition to the usual indicator (renamed 'Net Financial Debt carrying amount'), the TIM Group reports a measure titled "**Adjusted Net Financial Debt**," which it believes neutralizes the effects caused by the volatility of financial markets. Given that some components of the fair value measurement of derivatives (contracts for setting the exchange and interest rate for contractual flows) and of derivatives embedded in other financial instruments do not result in actual monetary settlement, Adjusted Net Financial Debt excludes these purely accounting and non-monetary effects (including the effects of IFRS 13 (Fair Value Measurement)) from the measurement of derivatives and related financial assets/liabilities.

Adjusted Net Financial Debt is calculated as follows:

+	Non-current financial liabilities
+	Current financial liabilities
+	Financial liabilities directly associated with Discontinued operations/Non-current assets held for sale
A)	Gross financial debt
+	Non-current financial assets
+	Current financial assets
+	Financial assets relating to Discontinued operations/Non-current assets held for sale
B)	Financial assets
C= (A – B)	Net Financial Debt Carrying amount
D)	Reversal of fair value measurement of derivatives and related financial liabilities/assets
E=(C + D)	Adjusted Net Financial Debt

- ***Equity Free Cash Flow (EFCF)***: This financial measure represents the free cash flow available for the remuneration of own capital, to repay debt and to cover any financial investments and payments of licenses

and frequencies. In particular, the indicator highlights the change in Adjusted Net Financial Debt without considering the impacts of payment of dividends, changes in equity, acquisitions/disposals of equity investments, outlay for the purchase of licenses and frequencies, increases/decreases of finance lease liabilities payable (new lease operations, renewals and/or extensions, cancellations/early extinguishing of leases).

Equity Free Cash Flow is calculated as follows:

	Reduction/(Increase) in Adjusted Net Financial Debt from continuing operations
+/-	Impact for finance leases (new lease operations and/or renewals and/or extensions (-)/any terminations/early extinguishing of leases (+))
-	Payment of TLC licenses and for the use of frequencies
+/-	Financial impact of acquisitions and/or disposals of investments
-	Dividend payment and Change in Equity
	Equity Free Cash Flow

- ***Capital Expenditures (net of spectrum)***: This financial measure represents capital expenditures less capital expenditures on an accrual basis on TLC licenses for the use of frequencies.

Alternative Performance Measures After Lease

- ***EBITDA After Lease ("EBITDA-AL")***: This is calculated by adjusting EBITDA by the amounts connected with the accounting treatment of the lease contracts.

- ***Organic EBITDA After Lease ("Organic EBITDA-AL")***: This is calculated by adjusting the Organic EBITDA, net of the non-recurring items, by the amounts connected with the accounting treatment of the lease contracts.

- ***Adjusted Net Financial Debt After Lease ("Adjusted Net Financial Debt-AL")***: This is calculated by excluding from the Adjusted Net Financial Debt the net liabilities related to the accounting treatment of lease contracts. TIM believes that the Adjusted Net Financial Debt-AL represents an indicator of the ability to meet its financial obligations;

- ***Equity Free Cash Flow After Lease***: This is calculated by excluding from the Equity Free Cash Flow the amounts related to lease payments. In particular, this measure is calculated as follows:

+	Equity Free Cash Flow
-	Principal share of lease payments

The TIM Group believes that this measure is a useful indicator of the ability to generate Free Cash Flow.

- ***Operating Free Cash Flow and Operating Free Cash Flow (net of licenses)***: These financial measures represent the free cash flow available to repay debt (including leases) and to cover any financial investments and, in the case of Operating Free Cash Flow, payments of licenses and frequencies. The measures are not adjusted for lease payments.

Operating Free Cash Flow and Operating Free Cash Flow (net of licenses) measures are calculated as follows:

	EBITDA – Operating profit before depreciation and amortization, capital gains (losses) and impairment reversals (losses) on non-current assets
-	Capital expenditures on an accrual basis
+/-	Change in working capital (changes in inventories, trade receivables and other net receivables, trade payables, payables for mobile telephone licenses/spectrum, changes in operating receivables/payables, change in provisions for employee benefits, and operating provisions and Other changes)
	Operating Free Cash flow

-	Payment of TLC licenses and for the use of frequencies
	Operating Free Cash flow (net of licenses)

For further information on the TIM Group's primary non-IFRS measures, please see "*Presentation of Non-IFRS Measures—Presentation of Non-IFRS Measures of the TIM Group*" and the relevant footnotes thereto.

Presentation of Non-IFRS Measures of the TIM Group, NetCo and Optics on a pro forma basis after giving effect to the Transactions

In this Exchange Offer Memorandum, certain Alternative Performance Measures for the TIM Group, NetCo and Optics, respectively, are presented after giving *pro forma* effect to the Transactions.

In particular, the following non-IFRS measures for the TIM Group are presented after giving effect to the Transactions:

- Organic EBITDA-AL;
- Organic EBITDA-AL Margin;
- Adjusted Net Financial Debt-AL;
- Operating Free Cash Flow;
- Operating Free Cash Flow-AL;
- Ratio of Pro forma Adjusted Net Financial Debt-AL to Organic EBITDA-AL; and
- Ratio of Organic EBITDA-AL to Net finance income/(expenses).

For more information, see "*Summary Historical Consolidated Financial and Other Information and Pro Forma Carve Out Information of the TIM Group*."

In particular, the following non-IFRS measures for NetCo are presented on a pro forma basis after giving effect to the Transactions:

- Organic EBITDA-AL;
- Organic EBITDA-AL Margin;
- Adjusted Net Financial Debt-AL;
- Operating Free Cash Flow;
- Operating Free Cash Flow-AL
- Ratio of Pro forma Adjusted Net Financial Debt-AL to Organic EBITDA-AL; and
- Ratio of Organic EBITDA-AL to Net finance income/(expenses).

For more information, see "*Summary Historical Consolidated Financial and Other Information of NetCo and Optics*."

In particular, the following non-IFRS measure for Optics is presented on a pro forma basis after giving effect to the Transactions:

- Adjusted Net Financial Debt-AL *As adjusted for the Transactions*;
- Ratio of Pro forma Adjusted Net Financial Debt-AL *As Adjusted for the Transactions* to Organic EBITDA-AL of NetCo; and

- Ratio of Organic EBITDA-AL of NetCo to Net finance income/(expenses) *As Adjusted for the Transactions.*

The above non-IFRS measures, as well as the data presented in the "*As Adjusted*" column under "*Capitalization of NetCo and Optics*", have been prepared by Optics. The preparation of such data involved applying specific adjustments to the NetCo Unaudited Combined Pro Forma Carve-out Financial Information. These adjustments were made to reflect the effects of the Transactions, based on certain assumptions, including the expected outstanding debt of Optics as of the Acquisition Closing Date on a *pro forma* basis for the Acquisition. For more information, see "*Summary Historical Consolidated Financial and Other Information of NetCo and Optics*."

Key Performance Indicators (KPIs) of the TIM Group

In this Exchange Offer Memorandum, the TIM Group presents certain key operating metrics which it believes clarifies its performance from period to period and facilitates comparison with its peers. These key performance indicators and other non-financial operating data included in this Exchange Offer Memorandum, including subscriber related data like ARPU, churn rate and penetration rate (described below), are derived from management estimates and are not part of the TIM Audited Consolidated Financial Statements or the TIM Group's accounting records and have not been audited or otherwise reviewed by outside auditors, consultants or experts. The TIM Group's use or computation of these measures may not be comparable to the use or computation of similarly titled measures reported by other companies. Any or all of these measures should not be considered in isolation or as an alternative measure of performance under IFRS.

The key performance indicators used in this Exchange Offer Memorandum are:

- ***Average Mobile Revenue Per User ("ARPU")***: ARPU is calculated by dividing the revenue for the applicable period by the average number of recurring customers for such period, divided further by the number of months in the applicable period. The TIM Group's Management believes that ARPU provides useful information concerning the appeal and usage patterns of the TIM Group's tariff plans and service offerings and its performance in attracting and retaining high-value subscribers of its services.

- ***Churn and churn rate***: Churn refers to the percentage of subscriber disconnections. The TIM Group deems mobile subscribers to have churned when their mobile services with the TIM Group are disconnected (whether resulting from a subscriber decision or a decision by the TIM Group). The TIM Group calculates the churn rate by dividing the number of disconnections of subscribers during a period by the average number of subscribers during the same period. The definition of churn may vary between operators. A churn policy that is more expansive in its determination of when a subscriber is deemed to have churned may result in a reduction of the number reported for total subscribers, an increase in churn rate and potentially higher ARPU. As a result, such data and any related comparisons of the TIM Group to other operators included in this Exchange Offer Memorandum may not accurately reflect the TIM Group's competitive position and the competitive positions of such other operators.

- ***Penetration and penetration rates***: Penetration refers to the measurement, usually as a percentage, of the relevant telecommunications services. As of any date, it represents the number of accesses or active lines of a specific service divided by the number of total households. The TIM Group calculates the penetration rate as a percentage for ultrabroadband (UBB) service adoption, convergent customers (including fixed line and mobile) and media content service adoption.

Key Performance Indicators (KPIs) of NetCo

In this Exchange Offer Memorandum, the TIM Group presents certain key operating metrics which it believes clarifies NetCo's performance from period to period and facilitates comparison with its peers. These key performance indicators and other non-financial operating data included in this Exchange Offer Memorandum, including FTTH coverage and FTTC coverage, are derived from management estimates and are not part of the NetCo Audited Combined Carve-out Financial Information or NetCo's accounting records and have not been audited or otherwise reviewed by outside auditors, consultants or experts. NetCo's use or computation of these measures may not be comparable to the use or computation of similarly titled measures reported by other companies. Any or all of these measures should not be considered in isolation or as an alternative measure of performance under IFRS.

Business Segments of the TIM Group

The TIM Group currently operates its business through three business units: the Domestic Business Unit, the Brazil Business Unit and Other Operations. These are operating segments in accordance with IFRS 8 (*Operating segments*). For further information, please refer to Notes 1 and 39 to the 2023 TIM Audited Consolidated Financial Statements, Notes 1 and 39 to the 2022 TIM Audited Consolidated Financial Statements and Notes 1 and 38 to the 2021 TIM Audited Consolidated Financial Statements.

As part of the Delayering Plan, the TIM Group is currently planning the reorganization of its structure through a revised business segmentation, which will account for the contribution of the NetCo Business to FiberCop and the sale of TIM's stake in FiberCop and it is expected that the TIM Group will continue to pursue its focused strategy. The resulting business areas are expected to be TIM Enterprise, TIM Consumer and TIM Brasil, which the TIM Group believes will more accurately represent the TIM Group's horizontal structure following the successful completion of the Transactions. In line with the Delayering Plan, during 2024, once the Transactions are completed, an assessment will be carried out to identify the operating segments in accordance with IFRS 8. This will take into account the specific guidance provided by the standard itself (autonomy of operating flows, method of allocating financial resources, management reporting, etc.). See "*Summary—The TIM Group's Strategy*."

NetCo Pro Forma Information

In this Exchange Offer Memorandum, the TIM Group presents revenue breakdown by business area (access services and premium and other services), by service for wholesale access services (FTTH, FTTC, ADSL & Legacy voice), capital expenditures based on cash flows (assurance and maintenance capital expenditures and growth capital expenditures). Although such information derive from the NetCo Unaudited Combined Pro Forma Carve-Out Financial Information, they have not been audited or reviewed by the TIM Group's independent auditors.

Exchange Rates

The TIM Group's consolidated financial results are reported in Euro. Certain financial information contained in this Exchange Offer Memorandum has been translated from BRL into Euro and U.S. dollars to Euro solely for your convenience. The TIM Group do not make any representation that any amount translated herein has been, or could be, converted into Euro at the rates indicated or any other rate.

SUMMARY

This summary highlights selected information contained elsewhere in this Exchange Offer Memorandum. This summary does not contain all of the information that you should consider before tendering in the New Notes and the Optics Notes. Prospective investors should read this entire Exchange Offer Memorandum before making an investment decision. Prospective investors should carefully consider the information set forth under "Risk factors," "Forward-looking statements," "Management's Discussion and Analysis of Financial Condition and Results of Operations of the TIM Group," "Management's Discussion and Analysis of Pro Forma Carve-out Financial Information and Results of Operations of NetCo" and the historical and pro forma financial statements and the notes related to those financial statements appearing elsewhere in this Exchange Offer Memorandum.

The following summary of the TIM Group's business as well as references to the "TIM Group" are as of and for the year ended December 31, 2023. Therefore, unless explicitly stated otherwise or the context otherwise requires, the following summary of the TIM Group's business as well as references to the "TIM Group" therein do not reflect the effects and implications of the Transactions. See "Business of the TIM Group" for further information.

Unless explicitly stated otherwise, the following summary of NetCo's business as well as references to the "TIM Group" therein reflect the effects and implications of the Transactions as if they had already occurred. See "Business of the NetCo" for further information.

Overview of the TIM Group

The TIM Group is one of the leading information and communications technology ("**ICT**") providers, operating principally in Italy and Brazil. The TIM Group offers mobile and fixed-line telephony products and services to individuals and families for communication and entertainment and digitalization services to small and medium enterprises through a portfolio which is personalized to their needs. As of December 31, 2023, the TIM Group provided 30.1 million mobile lines (including both "human" SIM and Machine to Machine ("**M2M**")) and 8.0 million fixed-line lines (of which 5.6 million were ultrabroadband) in Italy, and 61.2 million mobile lines in Brazil.

History

The TIM Group, formerly known as Telecom Italia, is a joint-stock company established under Italian law on October 20, 1908.

On July 18, 1997, the predecessor to Telecom Italia was merged with and into Società Finanziaria Telefonica per Azioni ("**STET**"), its parent holding company, with STET as the surviving corporation. As of the effective date of the merger, STET changed its name to "Telecom Italia S.p.A." In November 1997, the Ministry of the Treasury of the Republic of Italy completed the privatization of Telecom Italia, selling substantially all of its stake in the predecessor Telecom Italia Group through a global offering and a private sale to a stable group of shareholders.

In July 1998, as part of the privatization of Telebrás, the Brazilian state-owned telecommunications monopoly, the Federal Government sold substantially all its shares of the twelve holding companies into which Telebrás had initially been broken up. After a series of corporate reorganizations, mergers, acquisitions and name changes, the majority of share capital is currently held, directly and indirectly, by Telecom Italia through its indirectly wholly owned subsidiary, TIM Brasil Serviços e Participações S.A., formed in 2002 as the holding company of Telecom Italia's operating companies in Brazil.

On May 21, 1999, Olivetti obtained control of the predecessor Telecom Italia Group through a tender offer where approximately 52.12% of predecessor Telecom Italia Ordinary Shares were tendered to Olivetti.

On August 4, 2003, the predecessor Telecom Italia merged with and into Olivetti. Olivetti, as the surviving company, changed its name to "Telecom Italia S.p.A."

In 2003, the TIM Group launched its 3G mobile network in Italy, becoming one of the first telecommunications companies in Europe to offer such technology at that time. The launch helped to establish the TIM Group as an innovative leader in the telecommunications industry. On June 30, 2005, Telecom Italia Mobile, a leading mobile telecommunications provider in Italy, merged with and into TIM. The acquisition further strengthened the TIM

Group's position in the Italian market, enabling it to offer customers a comprehensive range of telecommunications services.

On November 6, 2023, TIM entered into the Transaction Agreement for the sale of the NetCo Business to Optics. See "—*The Transaction*" for further information.

TIM Group Operations

The TIM Group's business comprises three business units: the Domestic Business Unit, which primarily includes its operations in Italy, the Brazil Business Unit and the Other Operations Business Unit, which includes ancillary operations of the TIM Group (including financial operations). See "—*TIM Group Business Units*" for further information.

Italy

In Italy, the TIM Group offers full-service solutions (including mobile voice, landline voice and fixed broadband), leveraging its own and third party operators' fixed and mobile infrastructure. As of September 30, 2023, the TIM Group held a leading position in Italy across both the fixed broadband and mobile (total SIM) retail markets, with market shares of approximately 40.2% and approximately 27.9%, respectively by number of lines (Source: AGCOM (Communication market monitoring system No. 4/2023)). As of December 31, 2023, the TIM Group's 4G mobile network covered approximately 99% of the population in Italy.

The TIM Group's service offerings include broadband speeds of up to ten gigabytes per second ("**Gbps**"), fully flexible television packages, including streaming services and a wide range of mobile data packages, with speeds of up to 2 Gbps on 5G networks. In 2022, the TIM Group completed the phase-out of its 3G network in Italy, enabling the TIM Group to focus on its ongoing investments in 4G and 5G technologies, which the TIM Group believes are more energy efficient and higher performing in terms of the quality of service offered to its customers. Additionally, as of December 31, 2023, the TIM Group provided approximately 7.2 million fixed line broadband retail accesses in Italy. Further, as of December 31, 2023, the TIM Group also provided approximately 30.1 million mobile lines (including both "human" SIM and M2M) in Italy. The TIM Group also holds the 3.6-3.8 GHz spectrum band and believes that it is well positioned to satisfy the market demand for LTE and 5G services. The TIM Group's 5G spectrum rights, acquired at auction in 2018, will expire in 2037.

In Italy, the TIM Group manages 16 data centers in eight cities (within 50,000 sqm if system rooms and approximately 58 MW available IT power) to guarantee the maximum levels of operation, security and energy efficiency as further certified by highest rankings in industry standards and certifications.

The resilience and sustainability of the TIM Group amidst macroeconomic events and geopolitical uncertainty has been demonstrated, particularly, in light of the COVID-19 pandemic and the Ukraine-Russia conflict. In particular, the TIM Group routinely establishes initiatives in support and in the wake of worldwide crises. In light of the declaration of the state of emergency of the Italian government, resolved by the Italian Council of Ministries on February 28, 2022, aimed at assuring, through to December 31, 2022, aid and assistance to the Ukrainian population on national territory, the TIM Group, among other operators, voluntarily started major solidarity initiatives in support, in particular, of its Ukrainian customers living in Italy, to allow them to communicate free of charge or at special prices with their family members in Ukraine. With the support of the European Commission, on April 8, 2022, TIM also signed a joint declaration, together with other EU and Ukraine operators to provide affordable or zero-rated roaming and international call services between the EU and Ukraine. The joint declaration seeks to provide a more stable context in which to help the Ukrainian evacuees throughout Europe to stay in contact with friends and family.

Brazil

In Brazil, the TIM Group offers mobile voice and data services, broadband Internet access, value-added services and other telecommunications services and products. The TIM Group believes that it is one of the main players and a leader in 5G coverage in the South American communications market, the TIM Group being the only operator in all the Brazilian municipalities. In 2021, the TIM Group completed the phase-out of its 2G network in Brazil. According to ANATEL, as of November 30, 2023, the TIM Group held 24% market share of the Brazilian mobile

telecommunications market and approximately 3% market share of the Brazilian fixed-line market. As of December 31, 2023, the TIM Group provided 61.2 million mobile lines in Brazil and its mobile network covered areas in which approximately 99% of the Brazilian urban population lives and works.

Following the acquisition by the TIM Group of Oi Movel S.A. ("**Oi**"), which completed in 2022, the TIM Group has the capacity to leverage the additional infrastructure and spectrum from Oi, together with the opportunity to exchange 4G into 5G investments and to accelerate the migration from FTTC to FTTH to drive network quality in Brazil. As a result of this acquisition, the TIM Group believes that it will have improved scale and new revenue generation opportunities, higher efficiency due to additional spectrum and opportunities to capture value from infrastructure overlap. The TIM Group, with the acquisition of Oi, became the leading player among Brazilian competitors in terms of cities covered, population served and spectrum per client. The TIM Brazilian mobile market share, as of December 31, 2023, was 24%.

TIM Group Operations as a Result of the Implementation of the Delayering Plan

As part of the Delayering Plan, the TIM Group is currently planning the reorganization of its business, which will account for the contribution of the NetCo Business to FiberCop and the sale of TIM's stake in FiberCop and it is expected that the TIM Group will continue to pursue its focused strategy. In line with the Delayering Plan, the resulting business is expected to be classified around three business areas: TIM Enterprise, TIM Consumer and TIM Brasil. The TIM Group believes these new future business areas will more accurately represent the TIM Group's horizontal structure following the successful completion of the Transactions. For a detailed description of the TIM Group's planned new business reshaping, please see "*—The TIM Group's Strategy—Delayering Plan—The new business areas set forth under the Delayering Plan: TIM Enterprise, TIM Consumer and TIM Brasil*."

Overview of NetCo

NetCo is the largest national independent not vertically integrated open-source fixed-line network provider by revenue in a major European country with €3,977 million revenue and €1,948 million Organic EBITDA-AL for the year ended December 31, 2023, after giving *pro forma* effect to the Transactions. NetCo will be the leading national fixed-line wholesale network in Italy, providing mission-critical digital infrastructure to households and businesses. As of December 31, 2023, NetCo, through its comprehensive suite of services and indirectly via its extensive customer base comprising approximately 550 telecommunications operators, has captured 84% of the access services for the fixed broadband market share, excluding FWA and 76% including FWA, as of September 2023. Additionally, NetCo holds in excess of 60% of premium connectivity market share as of December 31, 2022.

NetCo exhibits attractive infrastructure characteristics, including: (i) a difficult to replicate, operate and maintain network infrastructure with broad national FTTC coverage and an expanding FTTH network with limited overlap outside of Black Areas (as defined below), (ii) strong underlying demand in the Italian fixed broadband market, (iii) longstanding relationships with major operators, including TIM as the anchor tenant, as well as Fastweb, Vodafone, WindTre and SkyWifi, who generate high sales volumes, (iv) a hedge to technology risk, as its existing ADSL and FTTC network provides a natural hedge against the possibility of slower than expected FTTH take-up, and (v) strong profitability and cash flow conversion, with Organic EBITDA-AL for 2022 and 2023, after giving *pro forma* effect to the Transactions, of €1,812 million and €1,948 million, respectively.

NetCo's extensive network infrastructure in Italy will include 9.0 million kilometers of backbone fiber optics, more than 7 million square meters of real estate and more than 14.8 million kilometers of fiber optics corresponding to 372,000 kilometers of fiber cables, of which 135,000 kilometers of backbone and 237,000 kilometers of access as of December 31, 2023. After giving effect to the Transactions, NetCo will also have a strong workforce of approximately 19.9 thousand employees.

Italy represents one of the most attractive markets in Europe, given its low fixed broadband penetration in comparison to other European markets and is the only country to lack a DOCSIS co-axial cable infrastructure among major European countries. See "*NetCo Industry Overview*." Within Italy, NetCo's FTTx infrastructure stands at approximately 22 million homes passed as of December 31, 2023, delivering good broadband speeds of 50 to 200 Mbps. Currently, there are 9.2 million homes passed in Italy by FTTH infrastructure representing an attractive opportunity for continued FTTH development. Fiber network overlap is currently limited to Black Areas (as defined

below) only and there is a low risk of new entrants in the FTTH market given the challenges of building a scaled infrastructure and driving penetration. NetCo is well positioned to benefit from the secular growth trend of fixed broadband in Italy, which is expected to reach 88% penetration by 2031 as a result of expected FTTH coverage expansion and progress in digitalization.

A significant portion of NetCo's subscribers comes from operators other than the TIM Group. NetCo's relationships with its direct customer base are also characterized by longevity, with an average customer relationship duration of multiple years and anchor customers that, following the Transactions, will include the TIM Group and other leading operators underpinned by multi- term contracts.

NetCo's fiber roll-out strategy is backed by strong and stable profitability and cash flow generation, with Organic EBITDA-AL Margins of approximately 49% and 47%, for the years ended December 31, 2023 and 2022, respectively, after giving *pro forma* effect to the Transactions. NetCo's FTTC network also provides high stability and long term visibility of revenue.

NetCo's physical infrastructure assets are central to Italy's economy, providing long term cash flows with limited correlation to economic cycles.

Furthermore, NetCo is backed by strong support from KKR, which has a strong track record in investing in infrastructure. NetCo was also subject to a memorandum of understanding (the "**MoU**") between the Italian Government and KKR signed on August 10, 2023 with respect to the Italian government obtaining a minority stake in NetCo. The MoU has been superseded by the Agreed Form SHA, which reflects the provisions of the MoU (with such amendments as agreed between KKR and the Italian government).

NetCo's Key Strengths

NetCo is expected to benefit from the following competitive strengths, some of which will be further strengthened by the successful completion of the Transactions:

NetCo owns the largest independent fiber network in Europe and is expected to be the first independent network player in a major European economy.

NetCo is expected to become the main national fixed line wholesale network in Italy and the third largest by revenue in Europe. Its scaled national infrastructure network is expected to become the first largest and independent fiber network (including its FTTH and FTTC networks) in a major European economy, meaning that it will not be vertically integrated or owned by a fixed-line or mobile telecommunication operator and will be able to offer services on an operator-neutral basis and as an independent player. For the year ended December 31, 2023, after giving *pro forma* effect to the Transactions, NetCo generated €4 billion in revenue. NetCo is expected to be the only operator in Italy with a national infrastructure capable of reaching almost every home passed. With an infrastructure network that is invested across several fixed line technologies (ADSL, FTTC and FTTH), NetCo's FTTx coverage extended to 22 million homes passed and its FTTH coverage of 9.2 million homes passed as of December 31, 2023 represented 58% of its roll-out plan.

NetCo is expected to benefit from 9.0 million kilometers of backbone fiber optics, more than 7.0 million square meters of real estate and more than 14.8 million kilometers of fiber optics corresponding to 372,000 kilometers of fiber cables, of which 135,000 kilometers of backbone and 237,000 kilometers of access network and NetCo is also expected to benefit from a strong workforce of 19.9 thousand employees.

NetCo's fixed line network in Italy represents mission-critical strategic infrastructure.

NetCo is expected to own a wholly penetrated fixed-line network in Italy, potentially ensuring the widest national coverage through a network that will extend across several technologies, including both copper and fiber, and reaching nearly all Italian households and businesses. Its nationwide network includes 13.7 million copper accesses, providing nearly 100% FTTC coverage and NetCo is committed to increasing its 1.5 million FTTH accesses as of September 30, 2023. The scale and depth of NetCo's infrastructure makes it hard to replicate.

NetCo underpins a mission-critical fiber connectivity market with growing demand for reliability, high speeds and bandwidth from across society, including consumers, businesses, the public sector and carriers. With increasing digitization in all areas of life and business and continuous growth in Internet traffic, the mission-criticality of NetCo's fixed line network is underlined by the fact that down time in the network could trigger significant financial, social, reputational and security impacts.

NetCo has strong relationships with all major Italian operators and will further benefit from the Master Services Agreement with TIM.

NetCo is expected to have a strong customer base with blue-chip customers, in areas where it competes, and commercial relationships with all the major operators in the areas where it is the sole network provider of ADSL, FTTC and FTTH. In particular, in Black Areas, TIM Group as NetCo's anchor tenant, as well as Fastweb, Iliad and Tiscali combined account for more than half of NetCo's subscriber base. NetCo also benefits from agreements with Vodafone, WindTre and SkyWifi, either directly or via wholesale agreements with Fastweb.

Additionally, upon the successful completion of the Acquisition, on the Acquisition Closing Date, TIM and NetCo will enter into a master services agreement (the "**Master Services Agreement**" or "**MSA**") pursuant to which NetCo will provide or procure certain services to TIM and TIM will provide or procure certain services to NetCo. NetCo will mainly provide: (i) a variety of access services required for the purposes of the transmission of data and voice traffic directed to and/or generated by TIM's end customers, (ii) premium connectivity services such as point-to-point fiber optic connectivity, (iii) network services consisting of engineering services for the purposes of network operations and maintenance, delivery services for the access activation in favor of TIM's end customers and assurance services for solving faults experience by TIM's end-consumers, (iv) real estate services mainly regarding the use, by TIM, of certain real estate properties leased or subleased by NetCo, (v) energy supply and procurement services (which will be specifically provided by Telenergia) and (vi) other minor services. On the other hand, the TIM Group will mainly provide certain ancillary services including: (i) mobile telecommunication services for NetCo's employees, (ii) hosting arrangements within TIM Group's data centers, (iii) access to the corporate network, (iv) the provisions of IT services supporting NetCo's employees activities and (v) the provision of certain service components (such as bandwidth) enabling NetCo to sell aggregated services to the OAOs. The MSA will have a general duration consisting of a first term of 15 years with a renewal mechanism for an additional term.

NetCo will be the main wholesale operator in Italy and anticipates the completion of its FTTH infrastructure deployment in Grey Areas as outlined in the NRRP tenders, by 2027.

NetCo reached 84% of the access services market for fixed broadband, excluding FWA, and 76% including FWA as of September 2023. NetCo is expected to become the sole wholesale provider of fixed broadband (including ADSL and FTTC) at scale in each area it serves in Italy, except for FTTH where there is network overlap in Black Areas. NetCo's unique positioning in the fixed-line broadband market is underpinned by the extensive and comprehensive reach of its network infrastructure due to significant historical investment, which is difficult to fully replicate mainly due to the high costs and capital expenditures associated with developing a comparable infrastructure that offers similar national coverage, latency and bandwidth.

In Italy, FTTH coverage and competition is segmented according to European Union guidelines into Black, Grey and White Areas, with an added level of granularity within Grey and White Areas provided by the TIM Group's accounting of the impact of the "Italia a 1 Giga" plan (based on management's estimates):

- White Areas are areas without ultrabroadband (UBB) networks (connectivity), where private investors do not intend to invest in the next three years without public support. Within these White Areas, low density areas (reaching approximately 4.3 million households) have been granted a concession by Infratel to Open Fiber for service provision. In contrast, in very low density areas, (reaching approximately 0.5 million households), undertaking fiber roll-out investments is not considered economically efficient.

- Grey Areas are areas in which an ultrabroadband network is present or is expected to be developed in the next three years by a single private operator per lot. Subsidies associated with the "Italia a 1 Giga" plan are allocated to only specific segments of these Grey Areas. Given the lack of significant overlap between

NetCo's and Open Fiber's fiber networks, NetCo and Open Fiber act as the sole providers in their respective subsidized areas.

- Black Areas are areas in which at least two ultrabroadband networks of different operators are present or are expected to be developed over the next three years. In Italy's case, the Black Areas would be those areas of the market where both NetCo and Open Fiber are present and their respective fiber networks overlap.

Specifically, outside of certain Black Areas, where NetCo's market share and that of its sole competitor, Open Fiber, are determined by wholesale agreements with telecommunications operators, there is limited FTTH overlap and NetCo is expected to remain the main FTTH provider where NetCo rolls out FTTH, as a result of unit economics and government concessions:

- In certain Grey Areas, NetCo has started to roll out its FTTH network, aiming to bring its coverage up from 19% to 100% by 2027, while competitors have no official roll-out plan in these areas and low ARPU relative to capital expenditure per house passed makes competition and overbuild, in which a network provider builds a competing network in an area already served by an existing network, economically unattractive.

- In other, more suburban Grey Areas, the roll-out of FTTH is allotted to either NetCo or Open Fiber on an exclusive, subsidized, area-by-area basis as determined by the result of the "Italia 1 Giga" tender mapping through the NRRP. In May 2022, the TIM Group was awarded seven lots for the FTTH rollout, covering approximately 2.9 million "unique addresses" that could potentially receive connectivity. This number was halved following the completion of walk-in activities in July 2023. Italy's "Italia a 1 Giga" plan aims to provide better connectivity in rural areas, covering approximately 6.9 million unique addresses. The plan involves subsidies of €3.7 billion and aims to cover areas not included in any fixed ultrabroadband roll-out plan. Under the tender scheme, subsidies to cover a maximum of 70% of the overall eligible investments are available under a roll-out timetable to be completed by June 2026. The temporary business group (*raggruppamento temporaneo di imprese*) between TIM and FiberCop, which has been awarded €1,628 million of subsidies to roll out fiber to its seven lots under the "Italia a 1 Giga" tender represent the maximum amount of subsidies that was available to it under the scheme. As part of the Acquisition, the "Italia 1 Giga" plan and its associated subsidies will be transferred, in whole or in part, to NetCo.

In White Areas, NetCo is expected to mainly operate through its existing FTTC network. No NetCo FTTH roll out is foreseen in certain White Areas where Open Fiber operates as the sole FTTH network provider.

Although wholesale telecommunication operators in Italy currently compete on a single network, with the exception of Black Areas and certain Grey Areas where long-term wholesale agreements are in place, Italy has two main network operators deploying fiber nationally: NetCo and Open Fiber. In contrast, peer European countries such as Spain, Germany, the United Kingdom, and France feature at least four fiber network deployers focusing on different geographic areas.

Italy also features a supportive framework incentivizing investments in digital infrastructure with subsidies and support through the aforementioned "Italia a 1 Giga" plan.

NetCo operates in a very attractive Italian market with strong digitalization tailwinds and where its FTTC network provides a hedge against slow FTTH take-up.

Italy is one of the most attractive markets in Europe, having a low fixed broadband penetration rate of 66% of households in comparison to rates exceeding 80% for peer European countries as of 2021.

Italy is the only major European country to lack DOCSIS co-axial cable infrastructure, having instead one primary nationwide network for Internet connectivity based on copper infrastructure. See "*NetCo Industry Overview*." This has resulted in an extensive, high-quality FTTC network with average distance between cabinets and premises among the shortest in Europe, thereby ensuring high connection speeds. This FTTC network provides a valuable complement to the significant opportunities for FTTH development in Italy.

These FTTC connections remain resilient and cash generative in the Italian market, delivering high speed broadband speeds of up to 200 Mbps, supporting a strong customer base in the long term. As of September 30, 2023, FTTC accounted for approximately 65% of NetCo's subscribers, whereas FTTH and ADSL and traditional voice accounted for 11% and 25%, respectively. In the medium term, FTTC connections are expected to maintain stability as the migration from FTTC to FTTH is anticipated to be balanced by the shift from legacy technologies (primarily ADSL and traditional voice) to FTTC.

As a result of the sufficiency and quality of Italy's FTTC connections, the FTTH market in Italy also remained underpenetrated at 13%, as compared to an average of 35% across the European Union as of September 30, 2022 (*source: FTTH Council, April 2023*), supporting significant digitization opportunities as customers migrate. The availability of FTTH in the Italian market is anticipated to grow rapidly from 53.7% coverage of homes available in 2022 to 85% by 2026, with NetCo expected to be a significant contributor to such growth. See *"—NetCo will be the main wholesale operator in Italy and anticipates the completion of its FTTH infrastructure deployment in Grey Areas as outlined in the NRRP tenders, by 2027.*"

For NetCo, the ownership of the sole national FTTC network provides a natural hedge against the possibility of slower fiber take-up by subscribers, despite FTTH becoming widely available.

Stable revenues with large, resilient cash flows.

NetCo's strategy is underpinned by strong and stable profitability and cash flow generation with high long term visibility, with Organic EBITDA-AL for 2022 and 2023, *pro forma* after giving effect to the Transactions, of €1,812 million and €1,948 million, respectively. In particular, NetCo's resilient cash flows are further underpinned by its stable cash flow generated by its ADSL and FTTC services and certain multi-year wholesale contracts in place, including the Master Services Agreement.

After giving *pro forma* effect to the Transactions, for the year ended December 31, 2023, NetCo's revenue amounted to €4 billion.

As NetCo rolls out its fiber network, it is expected that NetCo will significantly reduce its operational costs base and capital expenditure requirements. After giving pro forma effect to the Transactions, for the year ended December 31, 2023 and 2022, NetCo's assurance and maintenance capital expenditures represented approximately 18% and 21% of its capital expenditures, respectively. FTTH and FTTC are more energy-efficient than copper, requires lower central office density and less maintenance than copper, and their greater reliability requires fewer field support staff.

KKR's track record in managing infrastructure in Italy in partnership with the TIM Group provides a strategic advantage in managing NetCo following the Transactions, as further supported by a slate of blue-chip investors

KKR is a leading global investment firm with more than $553 billion of assets under management, including more than $50 billion in infrastructure assets. After the Transactions, KKR will indirectly exercise sole control over NetCo. KKR will be able to provide NetCo with a dedicated team of highly experienced professionals, enhanced through the interaction with KKR Capstone, a team of approximately 100 operating executives who work with portfolio company senior managers to help identify and implement operational improvements.

KKR's investment in NetCo will follow its strong track record of investments in fiber infrastructure and will represent a natural continuation of its investment in FiberCop in which it indirectly acquired a 37.5% stake in 2021. KKR has successfully completed eight fiber transactions globally, including, among others, the acquisition of a 30% stake in the Norwegian Telenor Fiber AS in 2023 and the acquisition of a 49% stake in the Spanish dark fiber operator Eléctrica Infraestructuras de Telecomunicación SAU (Reintel) in 2022. KKR believes that through these acquisitions it has helped accelerate the speed of fiber roll-out, customers' and subscribers' migration and the overall development of the telecommunications infrastructure space in the respective countries. With its involvement in NetCo, KKR aims to leverage the strong track record and experience in Italy it has gained since the 2021 acquisition of its stake in FiberCop, the TIM Group company that combines its secondary network and its fiber network infrastructure.

Furthermore, a blue-chip slate of investors will be investing in NetCo alongside KKR, as minority shareholders on the terms set forth in the Agreed Form SHA, including (directly or indirectly) the MEF, the Abu Dhabi Investment

Authority, F2i (Fondi Italiani per le Infrastrutture) and Canada Pension Plan Investment Board. This strategic partnership is expected to align NetCo's strategy with the Italian digitalization agenda. See "*Principal Shareholders of Optics—Principal Shareholders of Optics—Shareholders' Agreement*."

NetCo's Strategy

NetCo, as a prominent independent wholesale provider of fixed broadband services in Italy, aims to benefit from growth opportunities from Italy's underpenetrated fixed broadband and ultrabroadband connections, as only approximately 66% of Italian households have a broadband connection versus an average European penetration of approximately 78% as of December 31, 2022 (*source: "Digital Economy and Society Index 2022" – European Commission*). The ongoing investment program to deploy FTTH, in certain areas, also benefits from government support under the NRRP for the "Italia a 1 Giga" and "5G Backhauling" initiatives, for which the TIM Group has been awarded and will receive a reimbursement totalling approximately 70% and 90% of the total eligible investments for the "Italia a 1 Giga" and "5G Backhauling" plans, respectively. Data consumption in Italy is expected to continue growing, driven primarily by broadband connectivity usage and will be further supported by the FTTH deployment. As reported by AGCOM, fixed data traffic over the first nine months of the year has doubled between 2019 and 2023. Following a FTTH investment cycle, NetCo expects to become a focused infrastructure company with stable cash flows as a regulated business set to guarantee third-party access to large communication service providers.

Leading on sustainability by advancing digitization

NetCo intends to accelerate Italy's transition to a digital and sustainable economy through innovative infrastructure and digital solutions. NetCo aims to create efficient infrastructure with an increasing use of renewable energy, circular models for recycling and recovery of waste and selection of suppliers by evaluating their commitment to sustainability. The fiber roll-out is key to NetCo's sustainability project as, in addition to being more energy efficient, production of fiber results in significantly lower CO_2 emissions than copper wires, and fiber is made of abundant, non-harmful silicon dioxide. In addition, NetCo's energy-saving plan has already led to 28 GWh of fixed network energy savings in 2023 via decommissioning activities that included the shutdown of obsolete technologies and services, such as network exchanges. NetCo also adopts new processes to avoid waste and transform it into value, such as measuring the revenue generated by lower waste production and an increase in the resale of waste and unused goods

Go-to independent wholesale provider

NetCo intends to become the leading independent wholesale provider of fixed broadband services in Italy by offering services on a non-discriminatory operator-neutral basis. This will drive scale and network utilisation as well as further reinforce the aforementioned digitalization tailwinds in Italy.

Future-proofing investment program

While NetCo has built a next-generation fixed infrastructure through significant investments over time, it remains committed to further developing and future-proofing its network with the support of the NRRP plan by investing in the latest network technologies. NetCo intends to continue its FTTH roll-out, with the aim to achieve approximately 48% FTTH coverage of all households by 2025, up from approximately 38% as of December 31, 2023 and approximately 32% as of December 31, 2022.

NetCo's investment plans are expected to meet customer demand for high-speed services and to provide the critical high capacity fiber backhaul services required by mobile operators to meet the growing demand for mobile data services. Growth in data traffic is expected to increase the utilization of NetCo's fiber network. The ongoing investment program benefits from government support under the NRRP for the "Italia a 1 Giga" and "5G Backhauling" initiatives.

NetCo's cost savings potential

The shift from copper to fiber is expected to reduce the operational cost structure and result in slowing capital expenditure requirements, as fiber features lower real estate requirements, while increased take-up from the operational

status of the planned deployment of FTTH network is expected to further contribute to economies of scale and growth in profitability. Further, additional significant savings are expected from other aspects of the business, including:

- the use of more efficient technology enabling a significant reduction in maintenance costs, providing for 4x savings for certain technologies; and
- the natural retirement of NetCo's workforce will contribute to adjust the staff base over time while allowing NetCo to hire young talent and reskilling the current workforce. For context, 53% of NetCo's workforce is more than 55 years old as of December 31, 2023.

Moreover, in relation to wholesale tariffs, AGCOM has approved, and the EU Commission has greenlighted, an increase in regulated access prices for 2023 in comparison to 2022, for certain jurisdictions, including Italy, which are applicable retroactively from January 1, 2023.

The TIM Group's Key Strengths

The TIM Group believes that it benefits from the following competitive strengths, some of which will be further strengthened by the successful completion of the Transactions and the implementation of the Delayering Plan:

The TIM Group is a leading player in the Italian telecommunications market and benefits from an improving domestic market environment across the different business units after years of challenging market conditions.

The TIM Group is a leading player in the Italian fixed and mobile retail services and mobile wholesale markets.

While the Italian telecommunications market (in both the fixed and mobile retail segments) has experienced some price pressure as a result of years of competitive tension, due to the elevated number of operators, the mobile and fixed retail markets are now showing clearer signs of market rationality. This translates into lower churn rates and offers opportunities to upsell customers with "more for more" propositions. See "*—Strong and resilient profitability profile with demonstrated resilience and upside potential underpinned by ongoing cost saving initiatives and improving market trends*." Moreover, the telecommunications industry has proven to be resilient and essential for companies and consumers during the COVID-19 pandemic, as the industry has facilitated valuable activities such as remote working, e-schooling and virtual entertainment.

The Italian broadband market is still underpenetrated and, accordingly, it shows room for further growth. Due to lack of cable infrastructure and difficult morphology, as of December 31, 2023, Very High Capacity Network ("**VHCN**") coverage in Italy was approximately 54% compared to approximately 73% in the European Union, according to the Digital Decade Country Report 2023, issued by the European Commission. This trend suggests that Italy may offer opportunities for further network deployment, particularly fiber roll-out. Following the successful completion of the Transactions, the TIM Group is expected to benefit from this trend in two significant ways. First, through the Master Services Agreement, the TIM Group will have access to NetCo's future deployed fiber network benefitting from the extended duration of the Master Services Agreement. Secondly, by externalizing the NetCo Business and its potential coverage growth, the TIM Group is expected to benefit from a decrease in capital expenditures and a corresponding reduction in associated risks.

In the consumer segment, the TIM Group believes that the main drivers of data traffic growth include trends such as the growing use of streaming platforms, online shopping, online banking applications, video-on-demand as well as gaming and video activities. The growing adoption of these new applications was boosted by social distancing measures implemented during the COVID-19 lockdowns and the ensuing changes in work and life habits.

In the enterprise segment (which mainly focuses on large enterprises and public administration), relevant drivers for data traffic growth include cloud services, IoT, business continuity and security.

On the back of these long-term trends, data consumption in Italy is expected to continue growing, driven primarily by broadband connectivity usage. As reported by AGCOM, as of September 30, 2023, fixed and mobile data traffic had almost doubled and tripled, respectively, in three years.

The TIM Group also competes in IT services, which, even if such market has been consistently growing in the last years, has historically been, and remains, underpenetrated compared to equivalent markets in other European countries. In the year ended December 31, 2023, the business spending for IT and connectivity services in the Italian market addressable by the enterprise segment was as follows: (i) approximately €3.6 billion (for which the TIM Group addresses approximately 30% of the spending in the serviceable market) spent on IoT, (ii) approximately €4.7 billion (for which the TIM Group addresses approximately 60% of the spending in the serviceable market) spent on cloud services, (iii) approximately €1.8 billion (for which the TIM Group addresses approximately 60% of the spending in the serviceable market) spent on security services; (iv) approximately €2.3 billion (for which the TIM Group approximately 70% of the spending in the serviceable market) spent on traditional connectivity services and (v) approximately €13 billion (for which the TIM Group addresses approximately 56% of the spending in the serviceable market) spent on other IT services and products. The increasing penetration of IT services in Italy is expected to accelerate as Italian companies increase their spending on IT services to improve their competitive advantage and keep pace with the global trend towards digitalization. The TIM Group's ability to foster the digitalization of the country has also passed through the development of strategic innovation programs in the territory, in which TIM has acted effectively as an enabler of open innovation and co-innovation models, through participation in technology transfer centers, such as five public-private partnership state funded Competence Centers. Commitment to innovation allowed TIM to be among the few enterprises representing Italy in the €1.2 billion funds IPCEI project on cloud and Edge computing, awarded by the European Commission during 2023.

The Italian IT services markets are characterized by structural market dynamics which work against international competitors, mainly due to cultural and local commercial complexities, such as language, local regulatory constraints in many markets including banking, energy, and healthcare, the importance of local relationships and proximity to customers, which is particularly applicable to public sector companies. As a result, the TIM Group believes that such dynamics favor local players, thus allowing the TIM Group to capitalize on its leading positioning in the IT services market, given its deep knowledge of the domestic market and long-lasting relationships with a wide cross-section of Italian customers and partners. Italian customers have also been shown to prefer IT service suppliers with whom they share a common language, that have extensive operations in Italy and that have an in-depth know-how of the applicable Italian legal and regulatory framework, which the TIM Group believes makes entering the Italian telecommunications markets more challenging for international players. The TIM Group considers that the growth of its underlying enterprise market is mainly driven by strong ongoing digitalization across the Italian public and private sector institutions, with increased IT services spend on, and diversified growth of, new digital enabling technologies such as (i) IoT (which is expected to grow by a CAGR of approximately 9% between 2022 and 2026), (ii) cloud services (which is expected to grow by a CAGR of approximately 17% between 2022 and 2026), (iii) security (which is expected to grow by a CAGR of approximately 11% between 2022 and 2026), and (iv) traditional connectivity services which is expected to grow by a CAGR of approximately 1.4% and 0.7% between 2022 and 2026) and other IT services (which is expected to remain substantially stable between 2022 and 2026).

In response to the COVID-19 pandemic, the European Union put in place a set of measures applicable to all member states in order to help them through the crisis and create a joint platform for economic and social recovery. The national recovery and resilience plan ("**NRRP**") presented by Italy provided for substantial investment and a set of reforms representing approximately €250 billion in total, which will be funded both at EU level and nationally. One of the plan's main objectives is the digital modernization of Italy's communication infrastructure, both in public administration and the country's production system, in order to provide fast connectivity nationwide for individuals, businesses, schools and hospitals. The plan therefore comprises several measures to boost the creation of high-performance networks, notably fiber and 5G as well as satellite technologies, and simplifies the regulatory framework for their rollout. Under the NRRP, the TIM Group has been awarded approximately €2.9 billion (includes the amount awarded to TIM and the temporary business groups led by TIM), which will allow clear opportunities for the TIM Group in the infrastructure development, digitization and innovation fields. In particular, the TIM Group was awarded two lots under the "connected healthcare" initiative (representing approximately 3,100 healthcare facilities) and four lots under the "connected schools" initiative (representing approximately 5,900 schools). For more information, see "*Regulation of the TIM Group—Regulatory Levies*" and "*Regulation of NetCo—Regulatory Levies.*"

The TIM Group holds a leading market share in Italy in its fixed and mobile retail and enterprise sectors.

The TIM Group benefits from an established leading position across the fixed retail Italian sectors (including voice and fixed broadband) with a 40.2% market share as compared to 15.9%, 14.0%, 13.8% and 3.7% for the next four competitors and 11.4% for the remaining players, as of September 30, 2023. In the mobile market in Italy (including mobile voice and mobile broadband, and including both "human" SIM and M2M), the TIM Group benefitted from a 27.9% market share as compared to 27.2%, 23.7%, 9.7% and 4.1% for the next four competitors and 7.5% for the remaining players, as of September 30, 2023 (Source: AGCOM Communication market monitoring system No. 4/2023). The TIM Group's service offering is a best in class offering with broadband speeds of up to 10 Gbps, fully flexible TV packages including streaming services, and a wide range of data packages available in mobile, with speeds of up to 2 Gbps on 5G.

The TIM Group is an ICT player in Italy and benefits from an established position in the Italian IT services market for large enterprise and is uniquely positioned in the public administration segment through the Domestic Enterprise organization and an ICT value proposition based on multiple lines of business (i.e. fixed, mobile, cloud, cyber security, IoT and professional services). The TIM Group is one of the leading ICT providers for large enterprises, serving approximately 33,000 customers. Moreover, the TIM Group holds 47% market share in connectivity services for the large enterprise market (i.e. services needed to provide connections, or unique, active service access points, to the network). This includes voice services and data services as well as M2B network access and human access. A single subscriber may operate several different connections and multiple connections may be associated with one subscriber or one device. The TIM Group also benefits from approximately 8% market share in IT services (i.e. application of business and technical expertise to enable organizations to create, manage and optimize, or access, information and business processes). The IT services market can be segmented by the type of skills that are employed to deliver the service (such as the design, building and operation of services).

The TIM Group is also a leader and has a unique position in the provision of services for public administration, with approximately 25,000 clients and a consolidated market share with respect to connectivity services and IT services in Italy as of December 31, 2023. Consolidating itself as a pioneer company in the country's digital transformation process, the TIM Group has taken on a key role in the implementation of the NRRP, with particular reference to the National Strategic Hub works to which more than 300 public administrations have already adhered, thus representing a fundamental axis in the national strategy for the digitization of the Italian public administration sustained by approximately €2 billion NRRP Mission 1 funds. Moreover, the TIM Group has started the deployment of LTE Public safety mobile services which was awarded to TIM by the Italian Public Security Department in 2022.

The IT service market is characterized by a relatively high compound market share captured by many local players, mainly due to cultural and local commercial complexities, such as language, local regulatory and privacy constraints in most industries (including banking, energy and healthcare) as well as the importance of local relationships and proximity to customers. The TIM Group is one of the largest local players in this highly fragmented market, in which it believes scale increasingly matters, and the TIM Group is able to capitalize on its position as a leading ICT provider to large customers and the public administration segment due to the trust that it has built with, and its proximity to, such customers and its ability to offer converged end-to-end solutions. The TIM Group believes that due to a trend among its customers to reduce operational complexity, compounded by increasing internal ICT skills shortages, by consolidating key partners for telecommunication and data services, cloud, IoT and security, a natural convergence will occur. Accelerated by NRRP, the growth in IT services spend is also driven by the increasingly mission-critical nature of IT Services in business operations which the TIM Group expects to result in IT Services spend in Italy becoming more recurring and resilient in the face of future market downturns and less correlated to macroeconomic trends.

Following the successful implementation of the Delayering Plan, the TIM Group is expected to further capitalize on its leading positions across its served markets through a highly resilient business model partly due to its ability to offer full-service solutions (including mobile voice, landline voice and fixed broadband) and leverage its own mobile infrastructure, the portion of fixed-line infrastructure which is not included in the NetCo's Business and NetCo's fixed-line infrastructure through the Master Services Agreement. See "*—Summary—The Transactions—Master Services Agreement*" for further information.

The TIM Group has a set of valuable assets, from a top brand, to unique telecommunications and IT infrastructure and know-how and is a dedicated customer service provider.

The TIM Group leads its competitors across a number of key attributes, including its valuable assets, all equipment and infrastructure components and know-how, comprising its extensive and reliable mobile network with one of the largest spectrum portfolios in Italy, all supported by its top brand and dedicated customer service functions.

Top Brand and Know-How

The TIM Group benefits from strong brand recognition in the telecommunications industry in Italy, with a brand awareness of approximately 65% and a top-of-mind awareness, to June 2023, at approximately 43% among a consumer target population representative of the broader Italian population according to MPS Research – Brand Image & Reputation Study – June Report. The TIM Group's leading market positions in Italy in fixed and mobile retail and mobile wholesale markets further underscore the strength of its brands among Italian consumers. The TIM Group is also well advertised throughout Italy, partnering with popular music events, key personalities and opinion leaders, such as Matteo Berrettini, Danielle Madam, Christian Vieri, Federica Pellegrini, Marcell Jacobs, Iza and Marcos Mion, in order to maintain its brand positioning across different target groups and industries.

The TIM Group's top brand is underpinned by its best-in-class technology and know-how. As a fully convergent player in both the business-to-business and business-to-consumer connectivity and service platform, the TIM Group is expected to leverage its extensive and reliable mobile network as well as its future partnership with NetCo to offer a suite of fixed and mobile line services, including 5G, 4G, TV and games, as well as IT services, including cloud, security, AI and IoT. See "—*The Transactions—Master Services Agreement*."

Telecommunications and IT Infrastructure

The TIM Group benefits from unique telecommunications and IT infrastructure in Italy. As part of the Delayering Plan, the TIM Group will invest in various technology advancement initiatives which are expected to allow it to possess the most distinctive digital and telecommunication infrastructure in Italy. In particular, as of December 31, 2023, the TIM Group has provided 30.1 million mobile lines (including both "human" SIM and Machine to Machine ("**M2M**")) and 8.0 million fixed-line retail lines (of which 5.6 million were ultrabroadband) in Italy, and 61.2 million mobile lines in Brazil.

Furthermore, following the successful implementation of the Delayering Plan, the TIM Enterprise business area will be an infrastructure-based ICT player in Italy in light of its assets base, which spans from telecommunication assets to the largest proprietary data center footprint in the country, with 16 data centers, of which seven were "top tier," as of December 31, 2023. Over recent years, the TIM Group has deployed significant investments and has developed specific expertise in leading technologies and solutions. The TIM Group expects that the TIM Consumer business area will own a proprietary backbone in strategic areas, with a mobile virtual network operator agreement within the consumer segment, which will guarantee participation in tenders requiring a proprietary backbone and a mobile core network and to offer flexibility to match client requirements.

Customer service

The TIM Group is dedicated to customer service and maintaining strong relationships with its loyal customer base. In particular, the TIM Group has invested considerably in recent years to improve its customer service, which has resulted in better customer experiences and reduced churn rates. These improvements reflect the TIM Group's focus on better services and the shift to a more digital customer service model. High customer satisfaction is further underpinned by the TIM Group's extensive customer data, a unique combination of digital and physical channels service and a reliable customer service platform. Specifically, the TIM Group benefits from a loyal customer base, with on average a continued relationship of over 20 years with its top ten clients. These longstanding relationships are underpinned by its end-to-end solutions and experienced employee base who provide deep institutional knowledge. The TIM Group deploys a significant amount of resources to attract, maintain and train its employees, project managers and digital and technology specialists. The TIM Group generally has a low turn-over among its employees and believes that its strong commitment to training, together with its reputation as of one of the leading independent players, will allow it to continue to attract and retain skilled employees.

The TIM Group's cutting-edge mobile infrastructure will be further strengthened by the TIM Group's ongoing future-proofing investment program.

The TIM Group's 5G network is among the fastest in Europe in terms of download speed according to Opensignal. The TIM Group's 5G has reached 2,300 municipalities as of December 31, 2023, with service already available in each of them (in Milan, the TIM Group's 5G has reached over 90% coverage), with capex-efficient deployment benefitting from the sharing of network infrastructure with Vodafone. The TIM Group has provided approximately 30.1 million mobile lines (including both "human" SIM and M2M) in Italy as of December 31, 2023. The TIM Group has also entered the world's top 30 companies for having enabled an improvement in the switch from the 4G to the 5G network in terms of download and upload speeds as well as in the spread of videos and gaming experience. Moreover, as of December 31, 2023, the TIM Group's 4G network covered over 99% across Italy, marking the highest level recorded in Italy. Such extensive coverage has been maintained since 2018, following a steady increase from approximately 88% in 2015, approximately 96% in 2016 and approximately 98% in 2017. With this rapid expansion of 4G network coverage, the TIM Group believes that it is well positioned to satisfy the growing market demand for LTE and 5G services.

Future-proofing Investment Program

While the TIM Group has built a market leading, next-generation mobile infrastructure through significant investments over time, it remains committed to further developing and future-proofing its mobile network with the support of NRRP funds by investing in the latest network technologies. In particular, the TIM Group intends to continue updating and expanding its mobile network, which it expects to significantly expand 5G coverage to approximately 90% across Italy by 2025 in line with its 5G 700 MHz licensing obligations and increase its high-speed mobile data capabilities to over 50% of the population with 3.7 GHz. The TIM Group's 5G expansion is underpinned by its valuable spectrum rights acquired in 2018. In the 2018 multiband spectrum auction, TIM has obtained significant spectrum rights on all available frequencies in the 700 MHz and 3.7 and 26 GHz bands (specifically, 2x10 MHz in 700 MHz, 1x80 MHz in 3.6-3.8 GHz and 1x200 MHz in 26.5-27.5 GHz), further consolidating its leading role in the sector. These 5G spectrum rights expire in 2037. Moreover, in the future, the TIM Group will gradually be able to use its 4G frequencies (including its 800 MHz, 1800 MHz, 2100 MHz and 2400 MHz bands) for 5G.

The TIM Group believes that its investment plans uniquely position it to meet customer demand for high speed services, as well as providing the critical high capacity fiber backhaul services required by mobile operators to meet the growing demand for mobile data services and deliver its primary goal of having the best mobile network for its customers. The TIM Group believes that the growth in data traffic will increase utilization of its mobile network and, given the planned quality and reach of its network, the TIM Group expects this will enable it to further differentiate its network in the medium term. The ongoing investment program benefits from government support under the NRRP for the "5G coverage," connected healthcare and connected schools initiatives.

The Brazil Business Unit benefits from next-generation telecommunication infrastructure, driving strong growth, profitability and cash flow generation.

The TIM Group entered the Brazilian market more than 20 years ago. Through the Brazil Business Unit, the TIM Group offers mobile voice and data services, broadband Internet access, value-added services and other telecommunications services and products in Brazilian market.

The Brazilian telecommunications market offers attractive fundamentals as one of the largest consumer markets with approximately 255 million "human" SIMs and M2M SIMs collectively and, according to Anatel, approximately 47 million fixed lines, as of November 30, 2023. Moreover, the Brazilian telecommunication market is expected to enjoy a cycle of ARPU growth after years of competitive tension due to the consolidation of operators from four to three following the Oi acquisition. The TIM Group believes that it is well positioned to benefit from this growth, underpinned by its acquisition of Oi mobile assets, which completed in 2022. The TIM Group believes that the Brazilian market offers strong growth and expects the Brazil Business Unit to be able to leverage the additional infrastructure and spectrum from Oi, together with the opportunity to exchange 4G into 5G investments and accelerate the migration from FTTC to FTTH to drive network quality in order to outgrow the market.

The Brazil Business Unit benefits from next-generation telecommunication infrastructure distributed throughout Brazil. Its mobile network covers areas in which approximately 99% of the Brazilian urban population lives and works (4G urban population coverage). According to ANATEL, as of November 30, 2023, the Brazil Business Unit had approximately a 24% market share of the Brazilian mobile telecommunications market and approximately 3% market share of the Brazilian fixed-line market. The Brazil Business Unit is one of the most profitable group of companies in the Latin American telecommunications market achieving leadership among its peers.

Strong and resilient profitability profile with demonstrated resilience and upside potential underpinned by ongoing cost saving initiatives and improving market trends.

The TIM Group is a leading and historically profitable company. On the key profitability metric of Organic EBITDA margin, the TIM Group is among the top performers in the Italian market with an Organic EBITDA margin of approximately 39% for the year ended December 31, 2023, slightly better than comparable European peers with an average Organic EBITDA margin of approximately 37%, according to TIM's management's analysis of publicly reported financial statements.

The TIM Group generated an Organic EBITDA-AL of €5,304 million for the year ended December 31, 2023 and €3,450 million for the year ended December 31, 2023, after giving pro forma effect to the Transactions. See "*Summary Historical Consolidated Financial and Other Information and Pro Forma Carve Out Information of the TIM Group*." Moreover, the TIM Consumer and TIM Enterprise business areas, are expected to benefit from structural resiliency in the Italian market, allowing for increased predictability as well as profitability.

The TIM Group believes that its resilient profitability profile is a direct result of its focus on cost optimization and organizational efficiency, which it expects to be further underpinned by the Transformation Plan (as defined below) as well as a prudent capital expenditure policy. Specifically, the TIM Group's Transformation Plan (as defined below) includes long-term targets regarding savings on labor and external operational capital expenditure, expected to be achieved by accelerating digitalization, simplifying the cost structure and labor and cost optimization. See "*—The TIM Group's Strategy—Transformation Plan*" for more details.

In addition to ongoing cost-saving initiatives, the mobile and fixed markets are now showing clearer signs of market rationality on price. The fixed churn rate has been stable, with a monthly average churn rate of 1.1% for the year ended December 31, 2023, in comparison to 1.1% and 1.1% for the year ended December 31, 2022 and December 31, 2021, respectively. The mobile churn, despite price increases, has been contained, with a monthly average churn rate of 1.1% for the year ended December 31, 2023, in comparison to 1.1 and 1.2% for the year ended December 31, 2022 and December 31, 2021, respectively. Additionally, for the year ended December 31, 2023, compared to the year ended December 31, 2022, the TIM Group's net adds improved and consumer fixed ARPU (net of activation fee) increased by 4.1%.

The TIM Group had selectively repriced 4.3 million fixed lines and 2.1 million mobile lines between January and March 2023, which the TIM Group believes would have achieved significant revenue upside for the year ended December 31, 2023, in comparison to year ended December 31, 2022. At the same time, the market has introduced inflation indexed tariffs, further aiding price rationality. Such price rationality translates into lower churn rates and offers opportunities to upsell customers with "more for more" propositions. The TIM Group's "more for more" proposition involves repositioning the customer base for higher value deals by providing them more value in terms of calls, data and content for the price paid.

In relation to wholesale tariff pricing, AGCOM has approved, and the EU Commission has greenlighted, an increase in regulated access prices for 2023 in comparison to 2022, for certain jurisdictions, including Italy, which are applicable retroactively from January 1, 2023.

Highly accomplished management team, committed to deleveraging with proven track record of delivery.

The TIM Group benefits from a highly accomplished and experienced management team, led by its CEO, Pietro Labriola, who was appointed as general manager in November 2021 and then appointed as CEO in January 2022 and brings over 20 years of experience at the TIM Group including as the former CEO of TIM Brasil where he transformed TIM Brasil from a newcomer to a market leader. Under Pietro Labriola's leadership, the Brazil Business Unit has

successfully evolved from a newcomer with an EBITDA margin of approximately 34% as of December 31, 2016, to a market leader with an EBITDA margin of 46% margin for the year ended December 31, 2022. The TIM Group's senior managers also include Adrian Calaza as CFO, Claudio Giovanni Ezio Ongaro as Chief Strategy, Business Development & Wholebuy Officer, Elio Schiavo as Chief Enterprise and Innovative Solutions Officer and Andrea Rossini as Chief Consumer, Small & Medium and Mobile Wholesale Market Officer, who together have strong sector knowledge of the broader telecommunications environment and international experience. See "*Risk Factors—Risks Related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—Any changes in the TIM Group's directorship and/or senior management could adversely affect the TIM Group's business*."

The TIM Group's management team is seasoned in running, acquiring and staffing telecommunications businesses and in navigating consumer markets both in Italy and abroad, and they leverage the expertise they acquired over decades of combined experience at top-tier telecommunications companies such as Telecom Argentina, Wind Telecomunicazioni, Wind Tre, Apple and Vodafone. More importantly, the management team has a strong track record of delivering growth from both organic initiatives and strategic acquisitions and has won and maintained strong stakeholder support while maintaining a strong debt capital structure. This industry-leading management team is supported by a deep bench of divisional managers.

The TIM Group's management brings a strong commitment to deleveraging the group, both organically and through the strategic options created by the Delayering Plan, as discussed under "*—The TIM Group's Strategy—Delayering Plan*." The TIM Group's management has also enacted the Transformation Plan (as defined below) with ambitious cost-cutting targets, and for the year ended December 31, 2023, management has achieved approximately €800 million of savings. See "*—The TIM Group's Strategy—Transformation Plan*" for more details.

The TIM Group's Strategy

The TIM Group's strategy embeds two distinctive features, the Delayering Plan and the Transformation Plan (as defined below), as further described below.

Delayering Plan

The Implementation of the Delayering Plan

On March 3, 2022, the TIM Group conceptually approved a plan to reorganize its business segments with the aim of separating its national fixed-line access network infrastructural assets and shifting from its existing business model to a new more horizontal structure encompassing four business areas, one of which, TIM Brasil, would be dedicated to the Brazilian market. The remaining three areas would be: TIM Enterprise, TIM Consumer and a business area comprising also certain network assets, including the entire mobile network, the national backbone and data centers (the "**Delayering Plan**"). On July 6, 2022, the board of directors of TIM (the "**Board**") approved the Delayering Plan (the "**2022-2024 Industrial Plan**"). On February 14, 2023, and on March 6, 2024 the Board approved the continuation of the Delayering Plan for the periods 2023-2025 (the "**2023-2025 Industrial Plan**") and 2024-2026 (the "**2024-2026 Industrial Plan**"), respectively.

The purpose of the Delayering Plan is both "industrial," which translates into unlocking growth and achieving better operational results and "financial," with a specific attention to efficiencies and funding the investments that will increase the value in the medium to long term, the valorization of long-term assets and debt sustainability. To pursue these objectives, the TIM Group seeks to substantially reduce its net leverage and achieve a long-term sustainable capital structure. The TIM Group's strategy to achieve such goals includes utilizing of cash proceeds from corporate transactions and engaging in deleveraging activities, such as the one contemplated in this Exchange Offer Memorandum. Accordingly, on November 6, 2023, the Board entered into the Transaction Agreement to give effect to the Transactions. See "*—The Transactions*."

In addition, the TIM Group maintains a high degree of flexibility to explore additional cash-in options in order to maximize value for the TIM Group and its stakeholders and believes that it is well equipped to navigate the challenging and volatile market conditions.

The implementation of the Delayering Plan is expected to facilitate each of the new business areas pursuing their own focused strategy

The TIM Group operates in a highly regulated and competitive market. See "*TIM Group Regulation*" and "*TIM Group Industry Overview*" for further information. In particular, the new TIM Consumer, TIM Enterprise and the existing TIM Brasil business area will operate in distinct markets, responding to different competitive dynamics and business trends with tailored strategies. The Delayering Plan is set to facilitate the business reorganization of the TIM Group around such new business areas and the implementation of their focused strategies. Accordingly, such organizational refocusing will allow management to operate on clear and business-specific KPIs to measure success in order to facilitate efficient management and improved capital allocation, in order to shorten the path to yet a more satisfying cash generation.

In particular, the TIM Consumer business area, is expected to follow a more focused path with a goal of increasing the perception of a premium and highly reliable telecommunications operator, seeking to benefit from pricing flexibility and planning to be ready for in-market consolidation opportunities. On the other hand, the TIM Enterprise business area is expected to drive the TIM Group's innovation path, intended to confirm it as a unique integrated ICT provider. The TIM Group, through its TIM Enterprise business area, aims to cater to blue-chip companies and the Italian public sector by offering bespoke B2B solutions and proprietary products.

Although not directly impacted by the Italian delayering strategy, activities in Brazil will continue to leverage the additional infrastructure and spectrum obtained through the Oi acquisition, together with the opportunity to exchange 4G into 5G investments and to accelerate the migration from FTTC to FTTH to drive network quality. Through the Oi acquisition, the TIM Group has improved scale, new revenue generation opportunities, higher efficiency mainly due to additional spectrum and opportunities to capture value from infrastructure overlap.

The Delayering Plan is expected to bring regulatory relief

Following the successful completion of the Transactions, the TIM Group expects to benefit from an easing of its current regulatory obligations. AGCOM is expected to classify NetCo as a wholesale-only operator. However, it is uncertain whether such favorable decision will be adopted by AGCOM. Such a classification, if given, will result in improvements to the regulatory environment for the TIM Group in the Italian market, enabling it to compete on a level playing field with other market participants under applicable competition laws.

In particular, the TIM Group expects that, as a result of the Transactions, its current obligations to offer retail access prices replicable by competitors and to submit new retail offers to AGCOM for prior approval will no longer apply to the TIM Group's future retail offers, thereby allowing it to shape commercial offering on more competitive terms. For additional information, please see "*TIM Group Regulation*." Therefore, the TIM Group believes it is strategically positioned to leverage this prospective regulatory change and to implement its pricing strategies with greater autonomy. Moreover, the discontinuation of AGCOM's *ex ante* approval process is expected to boost the TIM Group's ability to quickly adapt to market demands, leading to a more rapid introduction of new services and promotional activities, effectively enhancing its time to market.

The implementation of the Delayering Plan is expected to bring competitive efficiencies

Following the completion of the Transactions, the TIM Group will transition to a smarter asset model, maintaining direct ownership and control over key infrastructure such as, among others, its mobile network, data centers and IP backbone, while providing fixed-line services to retail customers through wholesale access services from NetCo. Such smart asset model is expected to provide the TIM Group with a strategic flexibility while maintaining access to the required infrastructural asset base.

In the mobile retail market, the TIM Group's key strategic assets (such as, among others, the IP backbone, transport and spectrum coverage), are expected to serve as a significant competitive edge over its main competitors. These assets are fundamental for scaling up 5G services. The IP backbone, in particular, is a critical competitive asset for maintaining performance next-generation mobile network that integrates edge computing and cloud technologies. Additionally, the TIM Group's superior spectrum holdings are key to deliver high-quality service. The synergy of

these assets positions the TIM Group to effectively pursue strategies aimed at enhancing the value of its customer base.

In the fixed retail market, the TIM Group's activities in fixed-line services are expected to be sustained through the strategic divestment of those assets concerning its fixed-line network which are contemplated by the Transactions. This maneuver is complemented by a contractual arrangement with NetCo (i.e. the Master Services Agreement), a draft of which is attached to the Transactions Agreement and will be signed on the Acquisition Closing Date.

In particular, the TIM Group will provide, among others, the following services to NetCo pursuant to the Master Services Agreement: (i) mobile telecommunication services, (ii) hosting arrangements within TIM Group's data centers, (iii) access to the corporate network, (iv) the provisions of IT "business support systems" supporting NetCo's employees activities and (v) the provision of certain service components (such as bandwidth) enabling NetCo to sell aggregated services to the OAOs. On the other hand, NetCo will provide, among others, the following services to the TIM Group: (i) a variety of access services required for the purposes of the transmission of data and voice traffic directed to and/or generated by TIM's end customers, (ii) premium connectivity services such as point-to-point fiber optic connectivity, (iii) network services consisting of engineering services for the purposes of network operations and maintenance, delivery services for the access activation in favor of TIM's end customers and assurance services for solving faults experience by TIM's end customers, (iv) real estate services mainly regarding the use, by TIM, of certain real estate properties leased or subleased by NetCo, (v) energy supply and procurement services (which will be specifically provided by Telenergia) and (vi) other minor services. Accordingly, following the Transactions, the TIM Group is expected to benefit from, among other things, the extended duration of the Master Services Agreement. For further information regarding the Master Services Agreement, please see "*—The Transactions—Master Services Agreement*."

As part of the Delayering Plan, the Transactions will allow the TIM Group to significantly delever

Following the successful completion of the Transactions, the TIM Group is expected to significantly delever. The strategic asset dispositions alongside the successful completion of the Exchange Offers, both as contemplated by the Transactions, are expected to contribute substantially to the reduction in the net leverage of the TIM Group, setting the stage for a new phase of debt sustainability. After giving *pro forma* effect to the Transactions, the TIM Group's Adjusted Net Financial Debt-AL would have decreased by €13,768 million to €6,581 million.

The TIM Group's Adjusted Net Financial Debt-AL and Ratio Adjusted Net Financial Debt-AL to Organic EBITDA-AL were €20.3 billion and approximately 3.8x for the year ended December 31, 2023, respectively.

The TIM Group believes that following the Transactions it will benefit from increased financial flexibility and be able to align its net leverage ratio with best-in-class peers, thereby enhancing its competitive position.

See "*Presentation of Financial and Other Information—TIM Audited Consolidated Financial Statements*" and "*Risk Factors—Risks Related to The TIM Group—Risks Related to the TIM Group's Business Activity and Industry—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective*."

The implementation of the Delayering Plan is expected to allow the TIM Group to have strategic flexibility

The successful implementation of the Delayering Plan is expected to grant the TIM Group enhanced strategic flexibility, enabling it to swiftly pursue growth initiatives, both organic and inorganic, within its new organizational model, including, for example, inorganic growth in ICT services to enterprises in the areas of cybersecurity and artificial intelligence. This strategic adaptability is expected to empower the TIM Group to capitalize on emerging market opportunities, streamline operations and foster innovation across its new and reshaped business. By reorganizing its structure, the TIM Group aims to position itself to respond more effectively to the dynamic telecommunications landscape, drive efficiency and optimize its asset portfolio to support sustained growth and value creation.

The new business areas set forth under the Delayering Plan: TIM Enterprise, TIM Consumer and TIM Brasil

For the year ended December 31, 2023, after giving *pro forma* effect to the Transactions, TIM Consumer business area, TIM Enterprise business area, Sparkle and TIM Brasil would have generated €6.2 billion, €3.4 billion, €1.0 billion and €4.4 billion in revenue respectively. These figures consider the effects of Master Services Agreement and Transitional Services Agreement as well as intercompany agreements between TIM Consumer, TIM Enterprise and Sparkle, amounting €0.4 billion between TIM Consumer and TIM Enterprise and €0.2 billion between Sparkle and other domestic entities within the TIM Group. For the same period, after giving *pro forma* effect to the Transactions, TIM Consumer business area, TIM Enterprise business area, Sparkle and TIM Brasil would have generated €1.1 billion, €0.7 billion, €0.1 billion and €1.6 billion of Organic EBITDA-AL and would have incurred in €1.0 billion, €0.3 billion, €0.1 billion and €0.8 billion of Capital Expenditures, respectively.

However, in the TIM Audited Consolidated Financial Statements and in this Exchange Offer Memorandum, the TIM Group presents its financial and operating information per the business units and segments in the manner described under "*—TIM Group Business Units.*" See also "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the TIM Group—Operating Segments*" for more details. As such, in this Exchange Offer Memorandum, the TIM Group does not present its business in terms of the new organizational model.

TIM Enterprise

The TIM Enterprise business area will be the only full ICT provider in the domestic market capable of providing fixed and mobile connectivity, cloud, cyber security and IoT solution swill benefit from a strong position in the Italian IT services market for large enterprise and uniquely positioned in the public administration segment, providing the following end-to-end ICT offerings:

- *Managed and professional services*: This will include change assessment, cloud migration and cost optimization, and running deployment, systems and application management, full outsourcing, managed audit and billing and managed security and governance.
- *Solutions*: This will include cloud solutions for modern workplace, customer experience, modern and enterprise applications, digital marketplaces and trusted services. It will also include security solutions for cybersecurity and cyber risk management and crypto. Additionally, it will also provide IoT solutions.
- *Cloud infrastructure*: This will include TIM Cloud, Google Cloud, Edge Cloud and other third-party clouds.
- *Data center and Edge*: This will include data center offerings as well as TIM Edge.
- *Network:* This will include providing traditional voice and VoIP, xDSL and fiber, software defined network offerings in the fixed line retail market and providing 2G, 4G, 5G, human and M2M, device and technical assistance offering, and 5G private network offerings in the mobile market.

The TIM Enterprise business area will be one of the leading ICT providers for large enterprises, employing 5,300 people with over 2,000 different types of certifications, of which over 1,500 employed in pre-sales, sales and post-sales. Moreover, the TIM Enterprise business area will hold a leading market share in connectivity services for the large enterprise market (i.e. services needed to provide connections, or unique, active service access points, to the network). This includes voice services and data services as well as M2M network access and human access. A single subscriber may operate several different connections and multiple connections may be associated with one subscriber or one device.

The TIM Enterprise business area will also benefit from its market share in IT services (i.e. application of business and technical expertise to enable organizations to create, manage and optimize, or access, information and business processes held by the TIM Group). The IT services market can be segmented by the type of skills that are employed to deliver the service, such as the design, building, and operation of services.

The TIM Enterprise business area will also be a leader and will have a leading position in the provision of services for public administration, with approximately 25,000 clients.

The IT service market is characterized by a relatively high compound market share captured by many local players, mainly due to cultural and local commercial complexities, such as language, local regulatory and privacy constraints in most industries (including banking, energy and healthcare), the importance of local relationships and proximity to customers. The TIM Enterprise business area will be one of the largest local players in this highly fragmented market, in which scale increasingly matters, and the TIM Group is able to capitalize on its position as a leading ICT provider to large customers and the public administration segment due to the trust that it has built with, and its proximity to, such customers and its ability to offer converged end-to-end solutions. The TIM Group believes that due to a trend among its customers to reduce operational complexity, compounded by increasing internal ICT skills shortages, by consolidating key partners for telecommunication and data services, cloud, IoT and security, a natural convergence will occur. Accelerated by NRRP, the growth in IT services spend is also driven by the increasingly mission-critical nature of IT services in business operations which the TIM Group expects to result in IT services spend in Italy becoming more recurring and resilient in the face of future market downturns and less correlated to macroeconomic trends.

The TIM Enterprise business area will have clear and distinctive competitive advantages to gain from expected market momentum, including: (i) an unmatched offering in the Italian market, (ii) an owned mobile core network, (iii) 16 directly owned data centers, of which seven were “top tier,” as of December 31, 2023 and (iv) opportunities to develop dedicated customer infrastructure.

The unique combination of (i) deep, established customer relationships (in the case of the TIM Group’s top 10 clients of more than 20 years, as of December 31, 2023), with an average contract duration of approximately three years, (ii) an unparalleled asset base with 16 proprietary data centers, (iii) a proprietary backbone in strategic areas with a dedicated assets and access to a broader network, (iv) a customer base exceeding 33,000 clients and (v) strategic partnerships with leading technology providers such as Google, Oracle, Microsoft, Fortninet, Cisco and VMWare makes the TIM Enterprise business area the natural reference point for many large enterprises and public bodies that seek to streamline their telecommunication and IT infrastructure, ideally with a single counterparty providing seamless end-to-end services. With core data services increasingly integrated with cloud, IoT and security solutions, the TIM Group believes that this convergence can only continue. The TIM Enterprise business area is uniquely positioned to capitalize on this opportunity.

As part of establishing the TIM Enterprise as its own business area, the TIM Group’s management is developing an integrated go-to-market approach between the historically and separately managed brands of the TIM Enterprise business area, including Noovle, Telsy and Olivetti. A scaled-up combined product factory will end historic fragmentation between the brands, thereby creating potential for synergies and capacity for new proprietary capabilities due to fully integrated end-to-end product capabilities. The TIM Group’s primary focus is on the continuing acquisition of scale, focusing on proprietary products and a public administration cloud strategy, personnel reskilling in light of an expanding offering, phasing-out one off restructuring costs and expanding its data centers footprint for improved offerings.

The TIM Enterprise business area is expected to benefit from sustainable growth, underpinned by a further expansion in the ICT market, the optimization of key assets, ensuring more efficient operations and a shift in its operating model, aiming to insource certain external capabilities. In particular, the key features of TIM Enterprise business area’s operating model are expected to be as follows:

- centralized corporate sales and account management involving a single point of contact to engage with customers in order to better identify needs and explore opportunities;
- integrated marketing and solution development, by industry and top clients;
- specialized pre-sales, with product-focused pre-sales specialists supporting account managers during sales process;

- vertical product management, with product-focused business and technical requirement identification to steer competence center development;
- integrated delivery project management with specialized project management for project delivery coordination;
- vertical delivery specialists with product-focused experts responsible for single product delivery;
- integrated research and development to setup common standards and methodology;
- product-specific competence centers to develop internal IP from product management inputs;
- integrated technical practices for management of key partners' technology solutions;
- integrated managed services for infrastructure;
- vertical application managed services (product-specific); and
- integrated operations and assurance in charge of post-sales services, assurance and maintenance.

The TIM Group believes that these measures will result in (i) higher revenues generated by the activities within the TIM Enterprise business area, including revenues generate by ICT services, (ii) significantly increased cash conversion and (iii) optimized capital expenditures as well as operational costs.

TIM Consumer

The TIM Consumer business area will be the leading fixed and mobile services provider in the consumer and Small and Medium Business retail market in Italy. To support its operations, the TIM Consumer business area will continue to rely on the direct ownership of its mobile infrastructure, data centers and backbone and further equipment and infrastructure components (not included in the NetCo Business) and will utilize fixed-line wholesale access services from NetCo through the bespoke and flexible Master Services Agreement.

The TIM Consumer business area will continue to operate in a competitive environment. In order to address these challenges, the TIM Group's management is implementing a recovery strategy. The main goal of the TIM Group is to transform its TIM Consumer business area into an agile, efficient and commercially flexible premium and highly reliable business with a shift in strategy, from volume to value. The Delayering Plan will enable the TIM Group's management to focus on end-to-end responsibility for the entire business, with full accountability for the implementation of the strategy. The TIM Group also expects that delayering will enable higher commercial flexibility by lifting price-replicability and allowing a level playing field with competitors.

As part of the transformation, the TIM Consumer business area has focused on activities that delivered value in the short term both in terms of costs and top line such as a successful implementation of a brand repositioning and pricing redesign, improvised organizational structure and capital expenditure and IT demand optimization. The TIM Consumer business area will continue to focus on striving for sales excellence and data-driven customer value management, providing turn-key ICT solutions for Small and Medium Businesses.

As near-term goal, the TIM Group aims at stabilizing the customer base within its TIM Consumer business area through a turnaround plan. This strategy entails, among other things, reduced churn, with gradual ARPU increases through a "more for more" proposition, a restructuring of its current content strategy and the TIM Vision platform, the optimization and digitalization of the current channel mix and higher FTTH/5G uptake which should provide opportunities for improved pricing and up-selling.

As a long-term objective, following expected market and revenue stabilization, the TIM Group believes that TIM Consumer business area will be able to enhance its performance by expanding beyond connectivity services, thereby broadening its scope from a telecommunication operator to a customer platform business. This strategy involves evaluating new business potentials and defining a go-to market approach. Growth prospects include a more distinct

differentiation of entertainment services alongside a restructuring of its content strategy to prioritize profitability. This strategy will pivot towards a new business model that focuses on distributing content from leading third-party providers like Netflix, Apple TV and Disney+ on a revenue-sharing basis, thereby requiring minimal investment. The TIM Group also plans to enrich its 5G and ICT portfolio and advance its data-driven strategy. Furthermore, the TIM Group plans to broaden its current offering scaling up certain of its existing products and services, including media and insurance services, as well as expanding on new high-value services, including consumer finance, health and education. These initiatives are designed to lay the foundation for sustainable growth, anchored in high-quality service positioning and a compelling digital service offering.

The TIM Group believes that its TIM Consumer business area will have the opportunity to capitalize on its unique asset portfolio and capabilities to increase its organizational efficiency and support its consumer platform strategy and partner attraction. In particular, the TIM Group expects to benefit from: (i) a robust customer base, rooted in longstanding relationships with a significant portion of households and enterprises, complemented by comprehensive subscriber data, (ii) a widespread sales channels capillarity across major Italian cities, efficient call centers and a strong online presence, (iii) a well-established and reputable brand, ranking among the top ten most valuable brands in Italy and the leading among Italian telecommunications operators and (iv) a meticulously structured customer interaction system, ranging from widespread presence throughout Italy to more personalized engagement for specific interactions, such as billing relationships and home access via set-top-box. The strengths of the TIM Consumer business area are expected to underpin continued growth and help maintain its competitive position in the market. These advantages are essential for the unit to respond effectively to evolving consumer needs, leveraging technological advancements and capitalizing on its strong market presence to secure ongoing success and a leading role in the industry.

TIM Brasil

The TIM Brasil business area aims at becoming the next generation telecommunications operator driving the digitalization of Brazil, distinguished by offering superior service and network quality and committed to providing a fully differentiated and reliable suite of services in order to deliver superior and sustainable value to its shareholders. TIM S.A., a 67%-owned listed subsidiary of the TIM Group, is already among the most profitable telecommunications companies in Latin America and leads its peers with a free cash flow yield of approximately 10.3% for the year ended December 31, 2023. TIM Brasil business area will continue to operate in a large, increasingly attractive and growing market, which has benefited from recent consolidation from five to three mobile operators (including TIM S.A.'s integration of part of Oi), a healthy regulatory environment, continuous growth in addressable customer base and the favorable effects after reduction of the Brazilian turnover tax ICMS from 28% to approximately 20%-22% for the years ended December 31, 2022 and 2023, respectively. The TIM Brasil business area is uniquely positioned to become the preferred telecommunications operator in Brazil, offering leading value propositions in markets driven by value. In particular, the TIM Brasil business area has received several recognitions within the industry, including being the first operator to provide 4G connectivity across all 5,570 Brazilian cities and delivering innovative services through strategic partnerships with key industry players. See "*Business of the TIM Group*" and "*TIM Group Industry Overview*"

The TIM Group's strategy for its TIM Brasil business area aims at further strengthening cash flow generation in its core connectivity business, through the deployment of 5G coverage, the migration of FTTC to FTTH technology as well as a prudent capital allocation and expenditures. The strategy is further bolstered by the competitive advantage of operating in a market characterized by fragmentation and the presence of numerous regional players as well potential opportunities in the business-to-business IoT market. Benefits to efficiency and scale are expected to originate from the ongoing integration of Oi operations, which is currently subject to one-off operation expenditure and capital expenditure as part of the integration. Further growth opportunities targeted by the TIM Brasil go beyond the core business with the ambition to become a full vertical orchestrator of B2B and IoT services, in partnership with industry leaders.

Transformation Plan

In addition to the Delayering Plan, the TIM Group is also in the process of implementing an ambitious cost-cutting transformation plan (the "**Transformation Plan**") covering TIM Consumer business area and TIM Enterprise business area (collectively, the "**TIM Domestic business area**"). As of December 31, 2023, TIM Domestic business area generated approximately €1.1 billion of total savings, of which approximately €0.7 billion were operating expenditure savings and approximately €0.4 billion were cash cost, respectively. This was achieved mainly through, among other

things: (i) a hourly reduction involving more than 70% employees, (ii) voluntary exits of approximately 0.6 thousand employees, (iii) a company-wide insourcing program, reskilling about 1.1 thousand employees, (iv) energy initiatives, (v) an optimization of approximately 200 thousand square meters premises, (vi) a reduction of approximately 18% year-over-year of human calls in its customer care operations and (vii) a dismantling of approximately 14 thousand public payphones.

Following the targets and objectives achieved between 2022 and 2023 under the Transformation Plan (the "**First Wave**"), the TIM Group is further committed to continuing its transformation journey, setting forth new targets for the 2024-2026 period (the "**Second Wave**").

The Second Wave is founded on two key transformation pillars. Specifically, the TIM Group aims to (i) continue streamlining its cash cost baseline by simplifying and right-sizing cost structures, ensuring clear and full cost accountability and (ii) reassess its processes and operating models across all group companies, with a particular focus on advancing the TIM Group's digital capabilities, processes, and operating models. The TIM Group anticipates that these measures will help mitigate total cash cost increase associated with the expected shift in revenue mix. The TIM Group believes that such strategy will allow it to mitigate the expected cost increases resulting from the expected shift in revenue mix, from higher-margin connectivity services to lower-margin ICT and multimedia services. In particular, the TIM Group is expected to focus on a series of high-impact initiatives:

- *People re-skill and insourcing*: The TIM Group is committed to launching a new company-wide insourcing program aim at internalizing current external activities, leveraging internal skills and capacity. This initiative is expected to enhance market responsiveness, reduce external costs and improve margins.

- *End-to-end Processes*: This initiative focuses on digitalizing and automating critical, human-intensive business processes throughout the TIM Group through the implementation of advanced technologies, such as AI. The goal is to simplify and enhance operations and streamline costs, ultimately accelerating revenue generation.

- *Customer Care*: This initiative aims to reduce human interactions by offering targeted interactions and a wider suite of digital customer care alternative, such as a dedicated mobile app and voicebot. The TIM Group expect to capitalize on the reduction of external costs related to outsourced activities and enhance its customer engagement.

- *Multi-product Sales Channels*: In addition to ongoing channel mix and cost optimization activities, this initiative aims to leverage the TIM Group's existing channels to lower per-unit acquisition costs by offering a broader range of products and services, such as insurance and energy.

- *Mobile Network*: This initiative aims to implement a new data-driven approach which prioritizes sites that offer a higher return on investment and optimize capital expenditures allocation. The TIM Group believes that such initiative will expedite the rollout of the 5G network and close the competitive gap with its competitors.

- *IT*: This initiative aims to enhance productivity by adopting a new operating model that leverages strategic partnerships with key partners.

The assumptions used in estimating total savings, including the components of such estimates and the steps to be taken to realize such savings and the assumptions used in estimating the timing and the expected business and regulatory benefits from as a result of the successful completion of the Transaction and the implementation of the Delayering Plan are forward-looking in nature, inherently uncertain and subject to a variety of business, economic, competitive and legal risks and uncertainties. The TIM Group cannot assure investors that the information on which it has based its assumptions will not change or that it will be able to realize any of the as-yet unrealized cost savings or benefits it believes are possible based on the TIM Group's management estimates and assumptions. Furthermore, the costs that the TIM Group will incur in connection with the Transactions, the Delayering Plan and the Transformation Plan may be substantially higher than currently estimated and may outweigh any benefit. There can be no assurance that the Transactions, the Delayering Plan and the Transformation Plan will be effective or that the savings targets or the expected benefits presented herein will be achieved in whole or in part.

For further information, please see "Risk Factors—Risks related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—The TIM Group's business will be adversely affected if the TIM Group is unable to successfully implement its strategic objectives and factors beyond its control may prevent it from successfully implementing its strategy," "Risk Factors—Risks related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—The separation of NetCo from the TIM Group may be complex, could cause the TIM Group to incur unexpected uncertainties and costs" and "Risk Factors—Risks related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—Following the successful completion of the Transactions, any deterioration of the relationship with, or in the financial condition of, NetCo could negatively impact the TIM Group's business, financial condition and results of operations."

Recent Developments

FiberCop Term Loan Waiver

FiberCop is in the process of submitting a waiver request to the agent to obtain the lenders' consent to waive any actual or potential breach of any clause of the FiberCop Term Loan that may arise as a result of the completion of the Acquisition and to undertake not to exercise any rights and remedies they may have under the FiberCop Term Loan on completion of the Acquisition, and waive the provisions in terms of mandatory early redemption under the FiberCop Term Loan that might arise as a result of the completion of the Acquisition, with the effect that the outstanding amounts under the FiberCop Term Loan that may be accelerated by the lenders as a consequence of any such breach will not automatically become due and payable on the closing of the Acquisition, *provided* that FiberCop will repay any such amounts due in full, together with any accrued interest, within 60 days of the Acquisition Closing Date. In the event that the waiver request is not granted, it is understood that Optics will repay the loan promptly in connection with the completion of the Acquisition. Any necessary funds to proceed with such repayment are expected to be made available to FiberCop by Optics on the basis of drawings to be made under the Senior Facilities Agreement and Senior Bridge Facility Agreement. See "*—Optics Financings—Senior Facilities Agreement and Senior Bridge Facility Agreement*"

TIM Term Facility Agreement

On April 4, 2024, TIM signed a term facility agreement with certain lenders party thereto (the "**TIM Term Facility Agreement**"). The TIM Term Facility Agreement provides a Euro term loan facility to TIM as borrower. The total commitment under the TIM Term Facility Agreement is equal in aggregate to €1.5 billion with a maturity of 18 months. The TIM Term Facility Agreement contains certain customary conditions and requires mandatory prepayment upon certain events, including in connection with the consummation of Acquisition. As of the date of this Exchange Offer Memorandum, the TIM Term Facility Agreement has been drawn down for the full amount to refinance short-term indebtedness of the TIM Group.

The Transactions

The NetCo Separation

As a part of its Delayering Plan, and consistent with its deleveraging strategy to achieve a long-term sustainable capital structure, the TIM Group is in the course of completing the separation and sale of certain of its infrastructure assets related to the copper and fiber fixed active and passive network. On February 1, 2023, TIM reported having received from KKR a non-binding offer for the purchase of a newco being established, consisting of certain infrastructure assets of the fixed network, including the assets and business of FiberCop, as well as the holding in TIM Sparkle ("**NewCo**"). Thereafter, on March 5, 2023, TIM reported having received from a consortium consisting of CDP Equity S.p.A. and Macquarie Infrastructure and Real Assets (Europe) Limited, acting on behalf of a group of investment funds managed or assisted by the Macquarie Group (the "**Consortium**"), a non-binding offer for the purchase of NewCo. In order to allow both the Consortium and KKR to submit their best offers in a defined competitive process, TIM's board of directors at its meeting held on March 15, 2023, mandated the Chief Executive Officer, Pietro Labriola, to start a regulated process, sending both offerors, through their advisors, a process letter setting out: (i) the terms that would give them access to additional, specific information, identical for both offerors; and (ii) the ways by which each could submit an improved non-binding offer by April 18, 2023. On April 18, 2023, TIM announced having received two new non-binding offers by the Consortium and KKR and, in its meeting on May 4, 2023, TIM's board of directors analyzed the non-binding offers received and concluded, in light of the readiness expressed by at least one of the

bidders to improve its non-binding offer, to allow the bidders additional time to present revised non-binding offers by June 9, 2023. On June 9, 2023, TIM announced that new non-binding offers were submitted by each of KKR and the Consortium. On June 22, 2023, TIM announced that its board of directors met and examined the new non-binding offers and, after extensive and in-depth discussions, conducted with the assistance of leading financial advisors, TIM's board of directors deemed that the offer submitted by KKR was preferable in terms of executability and timing, and higher pricing than the competing offer submitted by the Consortium. In light of the foregoing, TIM's board of directors unanimously mandated TIM's Chief Executive Officer to initiate, on an exclusive basis, an ameliorative negotiation with KKR, aimed at obtaining the presentation of a conclusive and binding offer according to the best terms and conditions, as well as to agree on the perimeter, methods and timing for the execution of the confirmatory due diligence referred to in KKR's offer. The exclusive negotiation with KKR came to conclusion with the submission, on October 15, 2023, of a binding offer which was then negotiated and approved by TIM's board of directors on November 5, 2023 and the subsequent signing on November 6, 2023 of the transaction agreement by TIM, Optics and Teemo Bidco S.à r.l (the "**Transaction Agreement**").

The Transaction Agreement

Under the Transaction Agreement, the Acquisition is subject to the satisfaction or waiver of three conditions precedent: (i) obtaining a decision (including through the lapse of time limits) under the powers conferred to it by antitrust law including, but not limited to, (i) Articles 101 and 102 of the Treaty on the Functioning of the European Union and equivalent provisions; (ii) Italian Law No 287 of 10 October 1990; (iii) Regulation (EC) No 139/2004 and any applicable merger control rules (the "**Antitrust Law**") by the European Commission, under the powers conferred to it by Antitrust Law approving the Acquisition or confirming that the Acquisition does not require approval (ii) obtaining a decision by the European Commission (including through the lapse of time limits), under the powers conferred to it by Regulation (EU) 2022/2560 of the European Parliament and of the Council of December 14, 2022 on foreign subsidies distorting the internal market (the "**FSR Law**") approving the Acquisition or confirming that the Acquisition does not require approval and (iii) obtaining an authorization, either unconditional or subject to certain conditions agreed upon under the Transaction Agreement by the TIM Group and NetCo, of the Acquisition by the Presidency of the Italian Council of Ministries (*Presidenza del Consiglio dei Ministri*) under the Italian Golden Power Legislation.

On January 16, 2024, TIM and Optics obtained the authorization by the Presidency of the Italian Council of Ministries concerning the Italian Golden Power Legislation subject to certain specific undertakings with reference to, among others, governance, internal organization, planning, compliance, operating permits, security of the networks, continuity of supplies, locations where certain activities can be performed and certain assets can be located, supply chain, intellectual property and information. As of the date of this Exchange Offer Memorandum, TIM has not yet obtained (i) the authorization by the European Commission approving the Acquisition or confirming that the Acquisition does not require approval. and (ii) the authorization from the European Commission, under the powers conferred to it by FSR Law, approving the Acquisition or confirming that the Acquisition does not require approval. See "*Risk Factors—Risks Related to the Transactions—The Acquisition is subject to certain uncertainties and conditions and, as a result, the Acquisition may not be consummated and this may adversely impact the trading in the New Notes and the rating of the Original Notes and New Notes*."

The consideration for the Acquisition will consist of a base price (the "**Base Price**") as calculated in accordance with the Transaction Agreement. The Base Price will be adjusted to reflect, among other things, the results of the Exchange Offers. Additionally, the consideration will be adjusted to reflect debt-like items or actions resulting in the loss of cash or other value from NetCo in accordance with the Transaction Agreement (the Base Price, together with any relevant purchase price adjustment, the "**Purchase Price**").

The Master Services Agreement

Upon the successful completion of the Acquisition, on the Acquisition Closing Date, TIM and NetCo will enter into the Master Services Agreement pursuant to which NetCo will provide or procure certain services to TIM (the "**NetCo Services**") and TIM will provide or procure certain services to NetCo (the "**TIM Services**" and together with the NetCo Services, the "**Services**"). The NetCo Services mainly encompass: (i) a variety of access services required for the purposes of the transmission of data and voice traffic directed to and/or generated by TIM's end customers, (ii) premium connectivity services such as point-to-point fiber optic connectivity, (iii) network services consisting of

engineering services for the purposes of network operations and maintenance, delivery services for the access activation in favor of TIM's end customers and assurance services for solving faults experience by TIM's end-consumers, (iv) real estate services mainly regarding the use, by TIM, of certain real estate properties leased or subleased by NetCo, (v) energy supply and procurement services (which will be specifically provided by Telenergia, a company wholly owned by NetCo and licensed to this purpose) and (vi) other minor services. The TIM Services mainly include: (i) mobile telecommunication services, (ii) hosting arrangements within TIM Group's data centers, (iii) access to the corporate network, (iv) the provisions of IT services supporting NetCo's employees activities and (v) the provision of certain service components (such as bandwidth) enabling NetCo to sell aggregated services to the OAOs.

Without prejudice to the shorter term applicable to certain Services, the Master Services Agreement has a general duration consisting of a first term of 15 years with a renewal mechanism for an additional term.

According to the MSA, TIM and NetCo shall set up a technical committee (composed of two representatives appointed by each of them) acting as consultancy body with the aim of assessing possible contentions between the parties and overseeing the execution of the Services.

In addition, the MSA includes provisions for penalties should either party fail to meet specified performance parameters, such as KPIs, KPOs, and SLAs.

The Transitional Services Agreement

On the Acquisition Closing Date, TIM and NetCo will enter into a transitional services agreement (the "**Transitional Services Agreement**" or "**TSA**"), which will govern the supply of certain services from TIM to NetCo and from NetCo to TIM for a limited time to help ensure both entities orderly transitions in the context of the separation. The transitional services to be rendered in accordance with the Transitional Services Agreement consist, *inter alia*, of: (i) IT services regarding certain so-called hybrid systems and (ii) cyber-security services.

Under the TSA, a specific procedure will be provided in order for the receiving party to withdraw from the agreement with respect to one or more transitional services in case it becomes independent in respect thereof (either insourcing the service or acquiring the service from a third-party provider) earlier than applicable contractual term.

Optics Financings

Equity and Rollover Equity Contributions

Optics anticipates financing a portion of the Acquisition through cash equity and contributed rollover equity provided by funds, vehicles, and/or accounts managed or advised by KKR, institutional co-investors and the Italian Ministry of Economy and Finance (the "**MEF**") of approximately €10,452 million in aggregate, in exchange for new share capital in Optics HoldCo. These funds will then be pushed down through the acquisition structure to Optics in support of the Acquisition.

Senior Facilities Agreement and Senior Bridge Facility Agreement

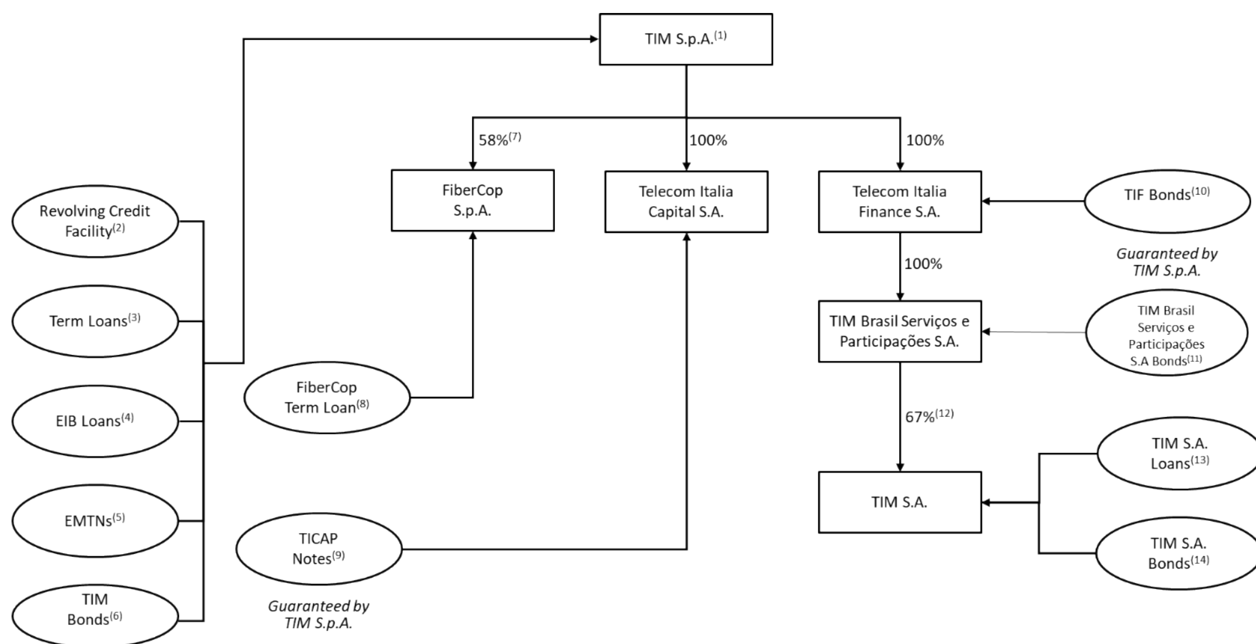
On December 19, 2023, Optics entered into the Senior Facilities Agreement and the Senior Bridge Facility Agreement and on April 8, 2024 Optics entered into amendment and restatement agreements with respect to both facilities. The Senior Facilities Agreement provides a euro term loan facility (the "**TLB**") and a revolving facility (the "**RCF**") to Optics as borrower and original guarantor. The Senior Bridge Facility Agreement provides a euro term loan facility (the "**Bridge**") to Optics as borrower and original guarantor. As of the date of this Exchange Offer Memorandum, the total commitments under the TLB and the Bridge are €4.0 billion and €4.5 billion, respectively (see "*Description of Certain Other Financing Arrangements of the Optics Group—Senior Facilities Agreement and Bridge Facility Agreement*"), and the total commitments under the RCF are €2.0 billion.

Assuming that a principal amount of between €4.5 billion and €5.0 billion equivalent (the Total Cap amount) of Original Notes are accepted as part of the Initial Exchange with the New Notes issued pursuant to the Acquisition Exchange split by equal principal amount across each series of the EUR New Notes (€430 million) and each series of

the USD New Notes ($431 million), respectively (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023), Optics currently expects to (i) finance a portion of the Acquisition with a drawdown of between €3.5 billion and €4.0 billion under the TLB (dependent on the principal amount of New Notes issued pursuant to the Acquisition Exchange) and (ii) cancel (subject to lender cancellation opt-out provisions) the Senior Bridge Facility Agreement in full. In the event that less than €4.5 billion equivalent principal amount of Original Notes are accepted as part of the Initial Exchange, Optics currently intends to draw amounts under the Bridge Facility Agreement for each incremental euro or US dollar below €4.5 billion equivalent principal amount of New Notes issued pursuant to the Acquisition Exchange which is required to complete the Acquisition. See "*Description of Certain Other Financing Arrangements of the Optics Group*."

CORPORATE STRUCTURE AND CERTAIN FINANCING ARRANGEMENTS OF THE TIM GROUP AS OF DECEMBER 31, 2023

The following diagram summarizes the TIM Group's expected corporate and principal financing structure without giving effect to the Transactions as of December 31, 2023. The diagram does not include all entities in the TIM Group, nor all of the debt obligations thereof. The following diagram is provided for indicative and illustration purposes only and should be read in conjunction with the information contained elsewhere in this Exchange Offer Memorandum, including "*Capitalization of the TIM Group,*" "*Description of Certain Other Financing Arrangements of the TIM Group.*"



---

(1) As of December 31, 2023, Vivendi and Cassa Depositi e Prestiti S.p.A. directly or indirectly hold 23.75% and 9.81%, respectively, of the outstanding share capital of TIM, with the remaining shares held by certain minority investors. See "*Principal Shareholders of the TIM Group*." The shares of TIM are listed on the *Borsa Italiana* (Milan stock exchange). TIM is a joint stock company (*società per azioni)* and, together with its subsidiaries, is engaged in providing telecommunication services and equipment primarily in the Italian and Brazilian markets.

(2) The Revolving Credit Facility provides for total commitments in an aggregate principal amount of €4,000 million, and, as of December 31, 2023, was fully undrawn. The obligations of TIM, as borrower, under the Revolving Credit Facility are unsecured and do not benefit from guarantees. See "*Description of Certain Other Financing Arrangements of the TIM Group—Revolving Credit Facility*" for more details.

(3) As of December 31, 2023, the aggregate principal amount of outstanding Terms Loans was €2,700 million, which does not reflect (i) the repayment of the Intesa Sanpaolo Loan Agreement of €500 million on March 25, 2024 and (ii) the drawdown under the TIM Term Facility Agreement of €1.5 billion on April 10, 2024. The obligations of TIM, as borrower, under the Term Loan Agreement are unsecured. See "*Description of Certain Other Financing Arrangements of the TIM Group—Term Loans*" for more details.

(4) As of December 31, 2023, the aggregate principal amount outstanding under the EIB Loans was €1,060 million. The obligations of TIM, as borrower, under the 2019 EIB Loan, 2021 Incremental EIB Loan and 2021 EIB Loan are partially secured. The 2023 EIB Loan is backed by a 60% SACE Guarantee and is unsecured. See "*Description of Certain Other Financing Arrangements of the TIM Group—EIB Loans*" for more details. The EIB Loans include a provision based on which in the event of the disposal of the entire fixed network or a substantial part of it (in any case, more than half in quantitative terms) to third parties not controlled by the TIM Group, or in the event of disposal of the controlling interest in the company in which the fixed network or a substantial part of it has previously been transferred, TIM has undertaken to immediately notify EIB, which, following consultations with TIM, may then opt to demand additional guarantees or amendments to the EIB Loans or to agree to an alternative solution. If such requests are not satisfied within 30 days, EIB has the right to cancel the commitments and/or request the immediate repayment of all outstanding loans.

(5) As of December 31, 2023, the principal amount outstanding under TIM's EMTN Programme was €8,070 million, which does not reflect (i) the repayment at maturity of €450 million aggregate principal amount of the 2024 3.625% Euro Notes on January 19, 2024 and (ii) the repayment at maturity of €950 million aggregate principal amount of the 2024 4% Euro Notes on April 11, 2024. The EMTNs (i) are general unsecured obligations of TIM, (ii) rank *pari passu* in right of payment to any existing and future senior indebtedness of TIM, including the TIM Notes; (iii) are senior in right of payment to all future subordinated indebtedness of TIM; (iv) are effectively subordinated to all existing

and future secured indebtedness of TIM to the extent of the value of the assets securing such indebtedness; and (v) are structurally subordinated to all existing and future indebtedness and other claims and liabilities, including preferred stock, of subsidiaries of TIM. See "*Description of Certain Other Financing Arrangements of the TIM Group—EMTN Programme*" for more details.

(6) As of December 31, 2023, the principal amount outstanding of the notes issued by TIM was €2,750 million. The outstanding notes issued by TIM (i) are general unsecured obligations of TIM; (ii) rank *pari passu* in right of payment to any existing and future with all existing and future senior indebtedness of TIM; (iii) are senior in right of payment to all future subordinated indebtedness of TIM; (iv) are effectively subordinated to all existing and future secured indebtedness of TIM to the extent of the value of the assets securing such indebtedness; and (v) are structurally subordinated to all existing and future indebtedness and other claims and liabilities, including preferred stock, of subsidiaries of the Issuer. See "*Description of Certain Other Financing Arrangements of the TIM Group—TIM Bonds—Existing Notes*" for more details. The conditions of the EUR Original February 2028 Notes and EUR Original July 2028 Notes contain provisions relating to certain events constituting a "Network Event" in relation to TIM. Should a "Network Event" occur, each holder of EUR Original February 2028 and the EUR Original July 2028 Notes will be entitled to require TIM to redeem (or, at TIM's option, to purchase) the EUR Original February 2028 and EUR Original July 2028 Notes held by it (in whole but not in part) at 101% of their principal amount together with interest accrued to (but excluding) the date of redemption. However, under the conditions of the EUR Original February 2028 Notes and EUR Original July 2028 Notes, such "Network Event" will only be triggered if, pro forma for the expected transaction, the "Consolidated Net Leverage Ratio" of the TIM Group exceeds 3.00 to 1.00. As of the date of this Exchange Offer Memorandum, TIM does not expect that, after the Acquisition is consummated and based on current results, the "Network Event" provisions under the EUR Original February 2028 Notes and EUR Original July 2028 Notes will be triggered. See "*Risk Factors—Risks Relating to the Non-Exchanging Holders of the Original Notes—TIM may not be able to obtain the funds required to repurchase or redeem the EUR Original February 2028 or EUR Original July 2028 Notes or certain other outstanding indebtedness upon a Change of Control or a Network Event (each as defined in the conditions of such series of EUR TIM Original Notes) or otherwise in connection with the closing of the Acquisition*."

(7) In 2021, Teemo Bidco S.à r.l., an indirect subsidiary of KKR Global Infrastructure Investors III L.P., acquired 37.5% of Fibercop and Fastweb S.p.A. subscribed to 4.5% of Fibercop. Fastweb currently owns a 4.5% stake in FiberCop. Subject to the outcome of current negotiations among the parties, Optics may acquire Fastweb's stake in NetCo or Fastweb may remain a minority shareholder in NetCo following the Acquisition. If Fastweb continues to be a shareholder of NetCo following the Acquisition, the minority stake of Fastweb is expected to be diluted in connection with the consummation of the Acquisition. To the extent Fastweb remains a shareholder in NetCo following the Transactions, it is not expected to pledge the stake it owns in NetCo, including after the occurrence of the Push-Down Merger.

(8) As of December 31, 2023, the FiberCop Term Loan is fully drawn in an aggregate principal amount of €1,500 million. See "*Description of Certain Other Financing Arrangements of the TIM Group—FiberCop Term Loan*" and "*Summary—Recent Developments*" for more details.

(9) Telecom Italia Capital, a public limited liability company (*société anonyme*) organized under the laws of the Grand Duchy of Luxembourg, having its registered office in 12 rue Eugène Ruppert, L-2453 Luxembourg, Grand Duchy of Luxembourg and registered with the Luxembourg Trade and Companies Register (*Registre de Commerce et des Sociétés de Luxembourg)* under number B77970. As of December 31, 2023, the principal amount outstanding TICAP Notes was $4,000 million. The TICAP Notes are senior unsecured obligations of TICAP and are guaranteed on a senior basis by TIM. See "*Description of Certain Other Financing Arrangements of the TIM Group—TICAP Bonds*" for more details.

(10) Telecom Italia Finance, a public limited liability company (*société anonyme*) organized under the laws of the Grand Duchy of Luxembourg, having its registered office in 12 rue Eugène Ruppert, L-2453 Luxembourg, Grand Duchy of Luxembourg and registered with the Luxembourg Trade and Companies Register (*Registre de Commerce et des Sociétés de Luxembourg)* under number B76448. As of December 31, 2023, the principal amount outstanding TIF Bonds was €1,015 million. The TIF Bonds are senior unsecured obligations of TIF and are guaranteed on a senior basis by TIM. See "*Description of Certain Other Financing Arrangements of the TIM Group—TIF Bonds*" for more details.

(11) As of December 31, 2023, the principal amount outstanding TIM Brasil Serviços e Participações S.A Bond was BRL 5,000 million. The TIM Brasil Serviços e Participações S.A Bond are non-convertible and unsubordinated. See "*Description of Certain Other Financing Arrangements of the TIM Group—TICAP Bonds*" for more details.

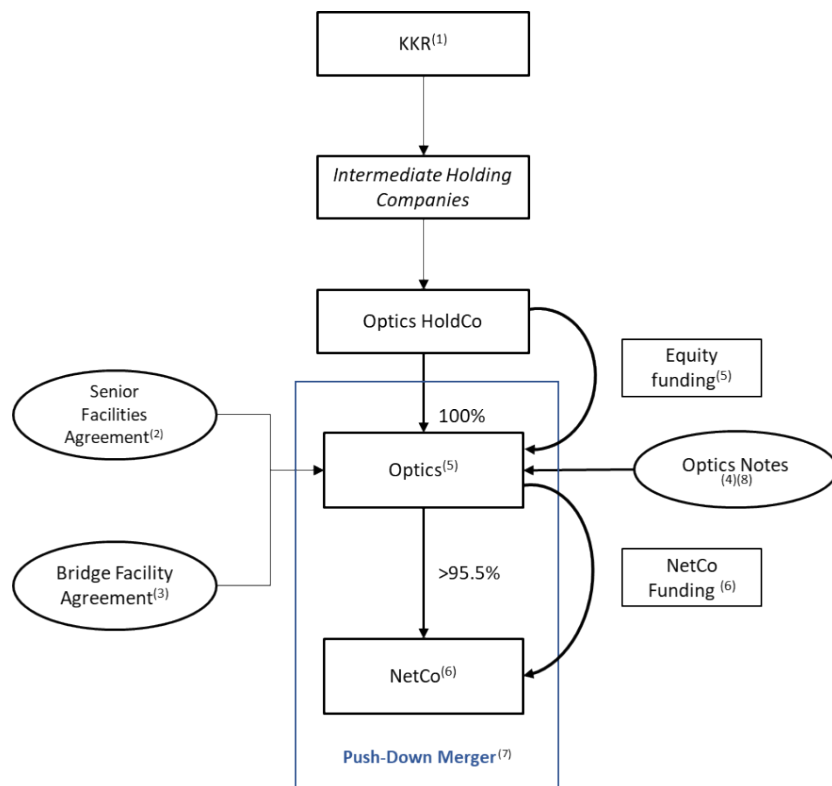
(12) The common shares of TIM S.A. are listed on the *Novo Mercado* segment of the B3 (Brazil stock exchange) and its American Depositary Shares are listed on the New York Stock Exchange.

(13) As of December 31, 2023, the outstanding amount under the TIM S.A. Loans BRL 1,912 million. See "*Description of Certain Other Financing Arrangements of the TIM Group—TIM S.A. Loans*" for more details.

(14) As of December 31, 2023, the outstanding amount under the TIM S.A. notes was BRL 1,600 million. The TIM S.A. Notes are senior unsecured obligations of TIM S.A. and are guaranteed on a senior basis by the Issuer See "*Description of Certain Other Financing Arrangements of the TIM Group—TIM S.A. Bonds*" for more details.

CORPORATE STRUCTURE AND CERTAIN FINANCING ARRANGEMENTS OF THE OPTICS GROUP PRO FORMA FOR THE TRANSACTIONS AS OF DECEMBER 31, 2023

The following diagram summarizes the Optics Group expected corporate and principal financing structure after giving effect to the Transactions (assuming the Initial Exchange is subscribed at the Total Cap amount, with the Optics Notes split with equal principal amounts across each series of the EUR Optics Notes (€430 million) and each series of the USD Optics Notes ($431 million), based on an exchange rate of $1.105 per €1.000 as of December 31, 2023). The diagram does not include all the debt obligations of the Optics Group and does not include all the subsidiaries of Optics Holdco S.r.l. The following diagram is provided for indicative and illustration purposes only and should be read in conjunction with the information contained elsewhere in this Exchange Offer Memorandum, including "*Capitalization of NetCo and Optics*," "*Description of Certain Other Financing Arrangements of the Optics Group*."



(1) Upon the consummation of the Acquisition, funds managed and/or advised by KKR will indirectly exercise sole control over NetCo through a wholly owned subsidiary, expected to be EBLco. On or after the Acquisition Closing Date, it is expected that Azure Vista C 2020 S.à r.l. ("Azure Vista") an investment vehicle indirectly wholly-owned by the Abu Dhabi Investment Authority, 13545369 Canada Inc., an investment vehicle formed by the Canada Pension Plan Investment Board ("CPPIB"), F2i (Fondi Italiani per le Infrastrutture) SGR S.p.A. ("F2i") and the MEF will invest for a stake of up to approximately 17.5%, 17.5%, 11% and 16% of Optics HoldCo, respectively. The final stakes of their respective investments will depend on the actual equity capital needed at completion of the Transactions.

(2) The Senior Facilities Agreement provides for aggregate borrowings of up to €4,000,000,000, maturing five years following initial utilization. See "Description of Certain Financing Arrangements of the Optics Group— Senior Facilities Agreement and Bridge Facility Agreement— Senior Facilities Agreement."

(3) The Senior Bridge Facility Agreement provide for aggregate borrowings of up to €4,500,000,000, maturing two years following initial utilization. See "Description of Certain Financing Arrangements of the Optics Group—Senior Facilities Agreement and Bridge Facility Agreement—Bridge Facility Agreement."

(4) The Optics Notes will be general, senior secured obligations of Optics, will rank senior in right of payment to all of Optics' future debt that is expressly subordinated in right of payment to the Optics Notes and will rank pari passu in right of payment with Optics' existing and future debt that is not so subordinated. On the Optics Notes Issue Date, the Optics Notes will be secured, subject to certain perfection requirements, by the Optics Notes Issue Date Collateral. Within 60 days after the Acquisition Closing Date if the Push-Down Merger has not occurred, the Optics Notes will be secured, subject to certain agreed security principles, certain material limitations under applicable laws and certain perfection requirements, by the Optics Notes Post-Issue Collateral. Upon completion of the Push-Down Merger, NetCo will no longer be a

separate legal entity and any Funding Loan and security interests over Optics' receivables in respect of any such Funding Loan will automatically cease to exist and, to the extent that NetCo is the successor company of the Push-Down Merger, the security interests over the share capital of Optics will be extinguished by operation of law and the USD Optics Notes will instead be secured by the pledge on the shares held by Optics in NetCo as entity resulting from the Push-Down Merger. In the event that the Push-Down Merger cannot be effected with the security interests over the shares in NetCo and/or intercompany loans made available by Optics HoldCo to Optics remaining in place, such security interests shall be released in order to effect the Push-Down Merger and Optics HoldCo shall, within 20 Business Days following the Push-Down Merger, enter into the Optics Notes Replacement Collateral. The Optics Notes Collateral may be subject to release under certain circumstances. For further information, see "Description of the USD Optics Notes—Security."

(5) The Acquisition is expected to be financed with (a) equity and rollover equity contributions to be provided by funds, vehicles and/or accounts managed or advised by KKR, institutional co-investors and the MEF of approximately €10,452 million in aggregate and (b) assuming that a principal amount of between €4.5 billion and €5.0 billion equivalent (the Total Cap amount) of Original Notes are accepted as part of the Initial Exchange with the New Notes issued pursuant to the Acquisition Exchange split by equal principal amount across each series of the EUR New Notes (€430 million) and each series of the USD New Notes ($431 million) (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023), a drawdown of between €3.5 billion and €4.0 billion under the TLB (dependent on the principal amount of Optics Notes issued pursuant to the Acquisition Exchange). In the event that less than €4.5 billion equivalent principal amount of Original Notes are accepted as part of the Initial Exchange, Optics currently intends to draw amounts under the Bridge Facility Agreement for each incremental euro or US dollar below €4.5 billion equivalent principal amount of New Notes issued pursuant to the Acquisition Exchange which is required to complete the Acquisition.

(6) In 2021, Teemo Bidco S.à r.l., an indirect subsidiary of KKR Global Infrastructure Investors III L.P., acquired 37.5% of Fibercop and Fastweb S.p.A. subscribed to 4.5% of Fibercop. Fastweb currently owns a 4.5% stake in FiberCop. Subject to the outcome of current negotiations among the parties, Optics may acquire Fastweb's stake in NetCo or Fastweb may remain a minority shareholder in NetCo following the Acquisition. If Fastweb continues to be a shareholder of NetCo following the Acquisition, the minority stake of Fastweb is expected to be diluted in connection with the consummation of the Acquisition. The €1,500,000,000 facilities agreement entered into on December 23, 2021 between NetCo, as borrower, and certain lenders set out therein (the "**FiberCop Term Loan**") is expected to be repaid on or about the Acquisition Closing Date. The Senior Facilities Agreement and the Senior Bridge Facility Agreement include an undertaking for Optics to procure the repayment of the FiberCop Term Loan within 60 days of completion of the Acquisition. See "*Description of Certain Financing Arrangements of the Optics Group*," and "*—Recent Developments—FiberCop Term Loan Waiver*." The repayment of (i) the FiberCop Term Loan and (ii) any amount outstanding under the existing intercompany loan originally granted on March 31, 2021 by TIM to NetCo (the "**FiberCop Intercompany Loan**"), will be carried out by means of either (x) an intercompany loan to be granted from Optics to NetCo Agreement (the "**Funding Loan**") and/or (y) an equity contribution made by Optics to NetCo in exchange for newly issued shares in NetCo (collectively, the "**NetCo Funding**"), in each case of (x) and (y) above applying a portion of the proceeds of the Senior Facilities Agreement and the Senior Bridge Facility (if applicable).

(7) Optics is a holding company incorporated under the laws of Italy as a joint stock company (*società per azioni*). Optics is currently not expected to engage in any activities other than those related to the Transactions, the management of NetCo following the Acquisition and any other future potential transactions. Following the Acquisition Closing Date, Optics intends to use commercially reasonable endeavours, subject to any relevant approval and/or authorization by any competent authority, to merge Optics with NetCo in accordance with applicable provisions of Italian law and as further described herein, with NetCo being the incorporating entity; the Push-Down Merger is expected to be approved during the six months following the Acquisition Closing Date. See "*Description of the USD Optics Notes—Push-Down Merger.*" The Push-Down Merger will be subject to certain conditions and requirements and may not be completed. See "*Risk Factors—Risks Relating to the Optics Notes—Optics may be unable to complete the Push-Down Merger within the anticipated time-frame, or at all*."

(8) On the Optics Notes Issue Date, the Optics Notes will not be guaranteed. Optics shall procure that, subject to certain agreed security principles and certain material limitations pursuant to applicable laws, NetCo guarantees the Optics Notes within 60 days after the Acquisition Closing Date if the Push-Down Merger has not occurred. See "*Risk Factors—Risks Relating to the Optics Notes—Corporate benefit, financial assistance laws, capital maintenance and other limitations on the guarantee may adversely affect the validity and enforceability of the NetCo Guarantee*." Upon completion of the Push-Down Merger, Optics will be incorporated into NetCo and therefore cease to exist and NetCo will become the surviving issuer of the Optics Notes and, if granted, the NetCo Guarantee will be extinguished by operation of law. See "*Description of the USD Optics Notes—Guarantee*." The NetCo Guarantee will be subject to certain material contractual and legal limitations. See "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations,*" "*Risk Factors—Risks Relating to the Optics Notes—Once granted, the guarantees, including the NetCo Guarantee, and the Optics Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability*." The guarantee of NetCo will be subject to the terms of the Intercreditor Agreement and may be subject to release under certain circumstances. See "*Description of Certain Financing Arrangements of the Optics Group—Intercreditor Agreement*" and "*Description of the USD Optics Notes—Guarantee.*"

SUMMARY OF THE EUR TIF NEW NOTES

The summary below describes the principal terms of the EUR TIF New Notes offered hereby. It may not contain all the information that is important to you. Certain of the terms and conditions described below are subject to important limitations and exceptions. Defined terms used in this summary, but not defined herein, have the meanings set forth in the "Terms and Conditions of the EUR TIF New Notes." Please refer to the "Terms and Conditions of the EUR TIF New Notes" section in this Exchange Offer Memorandum.

Issuer	Telecom Italia Finance, a public limited liability company (*société anonyme*) organized under the laws of the Grand Duchy of Luxembourg, having its registered office in 12 rue Eugène Ruppert, L-2453 Luxembourg, Grand Duchy of Luxembourg and registered with the Luxembourg Register of Commerce and Companies (*Registre de Commerce et des Sociétés*) under number B76448 ("**TIF**")
Guarantor	Telecom Italia S.p.A. ("**TIM**" or the "**TIM Guarantor**")
Notes Offered	7.750% Guaranteed Notes due January 24, 2033 issued in exchange for the EUR TIF Original Notes tendered and accepted by the Issuer (the "**EUR TIF New Notes**")
Issue Date	Delivery of the EUR TIF New Notes will occur on the settlement date of the EUR TIF Initial Exchange (the "**EUR TIF New Notes Issue Date**")
Maturity Date	January 24, 2033
Interest	7.750%
Interest Payment Dates	January 24 in each year
Consideration	€1,000 in principal amount of EUR TIF New Notes per €1,000 in principal amount of EUR TIF Original Notes
Status of the EUR TIF New Notes	The EUR TIF New Notes constitute unconditional, unsecured and unsubordinated obligations of TIF which will at all times rank *pari passu* among themselves and at least *pari passu* with all other present and future unsecured and unsubordinated obligations of TIF, save for such obligations as may be preferred by provisions of law that are both mandatory and of general application
Status of the Guarantee of the EUR TIF New Notes	The Guarantee of the EUR TIF New Notes constitutes direct, general and unconditional obligations of TIM Guarantor which will at all times rank at least *pari passu* with all other present and future unsecured and unsubordinated obligations of TIM Guarantor, save for such obligations as may be preferred by provisions of law that are both mandatory and of general application
The Guarantee of the EUR TIF New Notes	TIM has unconditionally and irrevocably guaranteed the due and punctual payment of all sums from time to time payable by TIF in respect of the EUR TIF New Notes pursuant to the EUR TIF New Notes Deed of Guarantee (the "**Guarantee**")
EUR TIF Mandatory Acquisition Exchange	If, on or before the Longstop Date, the Acquisition is, or will be, consummated, then upon no less than five business days prior notice by TIF to the New Notes Agent, Optics and the holders of the EUR TIF

	New Notes, on the Acquisition Closing Date, the EUR TIF New Notes will be mandatorily exchanged (the "**EUR TIF Mandatory Acquisition Exchange**") for an equal aggregate principal amount of EUR Optics (TIF) Notes to be issued by Optics with the same maturity and interest rate as the EUR TIF New Notes but with other terms as described elsewhere in this Exchange Offer Memorandum. Upon consummation of the EUR TIF Mandatory Acquisition Exchange, the EUR TIF New Notes will be cancelled.
Optional Redemption at the option of the Issuer..	Not Applicable
Optional Redemption at the option of the Holders	Not Applicable
Optional Redemption for Tax Reasons...	Early redemption will only be permitted for tax reasons as described in the Condition 6(b) (*Redemption for tax reasons*)
Minimum Denomination of EUR TIF New Notes	The EUR TIF New Notes will be issued in minimum denominations of €100,000 and integral multiples of €1,000 in excess thereof up to and including €199,000. EUR TIF New Notes in denominations of less than €100,000 will not be available
New Notes Agent	The Bank of New York Mellon, London Branch
Offer Restrictions.....................................	The EUR TIF New Notes have not been, and will not be, registered under the U.S. Securities Act or the securities laws of any other jurisdiction. The EUR TIF New Notes are subject to restrictions on offer, sale and transfer. See "*Notice to Investors*" and "*Offer Restrictions*"
Form, Clearance and Settlement............	The EUR TIF New Notes will be issued in new global note (NGN) form and are intended to constitute eligible collateral for the Eurosystem monetary policy, provided the other eligibility criteria are met. The EUR TIF New Notes will be issued in bearer form. The EUR TIF New Notes will initially be in the form of the relevant Temporary Global Note, exchangeable for the relevant Permanent Global Note which may be exchanged for the relevant Definitive Notes in the limited circumstances set out in the relevant Permanent Global Note. See "*Summary of Provisions Relating to the EUR TIF New Notes While Represented by the Global Notes*"
Absence of a Public Market for the EUR TIF New Notes	The EUR TIF New Notes will be new securities for which there is currently no established trading market. Although the Dealer Managers have advised TIF that they intend to make a market in the EUR TIF New Notes, they are not obligated to do so and they may discontinue market making activities at any time without notice. Accordingly, there is no assurance that an active trading market will develop or be maintained for the EUR TIF New Notes
Listing and Admission to Trading..........	Application will be made for the EUR TIF New Notes to be admitted to listing on the Official List of the Stock Exchange and trading on the professional segment of its Euro MTF Market, in accordance with the rules thereof. The Stock Exchange's Euro MTF Market is not a regulated market for the purposes of MiFID II. There can be no

	assurance that the EUR TIF New Notes will be, or will remain, listed on the Official List of the Stock Exchange or remain admitted to trading on the Euro MTF Market thereof
Governing Law..	The EUR TIF New Notes and all matters arising from or connected with the EUR TIF New Notes are governed by, and shall be construed in accordance with, English law. Articles 470-1 to 470-19 of the Luxembourg law on commercial companies of August 10, 1915, as amended, are excluded
Risk Factors	Investing in the EUR TIF New Notes involves substantial risks. You should consider carefully all of the information in this Exchange Offer Memorandum and, in particular, you should evaluate the specific risk factors set forth in the "*Risk Factors*" section before making a decision whether to invest in the EUR TIF New Notes.
Taxation	All payments in respect of the EUR TIF New Notes (including pursuant to the Guarantee of the EUR TIF New Notes) will be made free and clear of withholding taxes of the jurisdiction of incorporation of TIF or (in the case of payments under the Guarantee of the EUR TIF New Notes) the Republic of Italy, unless the withholding is required by law. In that event, TIF or (as the case may be) TIM Guarantor will (subject as provided in the Condition 8 (Taxation)) pay such additional amounts as will result in the Holders of the EUR TIF New Notes receiving such amounts as they would have received in respect of such EUR TIF New Notes had no such withholding been required. See Condition 8 (*Taxation*) for further details
Security Codes...	ISIN: XS2798880493 Common Code: 279888049
EUR TIF New Notes Agency Agreement	The fiscal agency agreement dated as of the date of the EUR TIF New Notes Issue Date by and among TIF, as issuer, TIM, as guarantor, and the New Notes Agent, as amended and/or supplemented from time to time.
EUR TIF New Notes Deed of Guarantee	The deed of guarantee dated as of the date of the EUR TIF Initial Exchange by TIM as guarantor in respect of the EUR TIF New Notes

SUMMARY OF THE EUR OPTICS (TIF) NOTES

The summary below describes the principal terms of the EUR Optics (TIF) Notes offered hereby. It may not contain all the information that is important to you. Certain of the terms and conditions described below are subject to important limitations and exceptions. Defined terms used in this summary, but not defined herein, have the meanings set forth in the relevant "Terms and Conditions of the EUR Optics (TIF) Notes." For clarity, the definitions of "Optics Notes Collateral" shall have the meanings ascribed to the terms "Optics Notes Collateral," in the relevant "Terms and Conditions of the EUR Optics (TIF) Notes." Please refer to the "Terms and Conditions of the EUR Optics (TIF) Notes" section in this Exchange Offer Memorandum.

Issuer.. Optics Bidco S.p.A., a joint stock company (*società per azioni*) organized under the laws of Italy

Notes Offered... 7.750% Notes due January 24, 2033 issued in exchange for the EUR TIF New Notes (the "**EUR Optics January 2033 Notes**" or the "**EUR Optics (TIF) Notes**")

Issue Date... Delivery of the EUR Optics (TIF) Notes will occur on or about the settlement date of the Acquisition Exchange (the "**Optics Notes Issue Date**").

Maturity Date .... January 24, 2033

Interest... 7.750%

Interest Payment Dates .... January 24

Consideration .... €1,000 in principal amount of the EUR Optics (TIF) Notes per €1,000 in principal amount of EUR TIF New Notes;

Ranking of the EUR Optics (TIF) Notes. The EUR Optics (TIF) Notes will be:

- senior secured obligations of Optics and, subsequent to the Push-Down Merger, NetCo as the surviving issuer
- senior in right of payment to any indebtedness that is subordinated in right of payment to the Optics Notes
- *pari passu* in right of payment with any existing and future indebtedness of Optics that is not subordinated in right of payment to the EUR Optics (TIF) Notes, including indebtedness incurred under the Senior Bridge Facility Agreement, the Senior Facilities Agreement and the USD Optics Notes
- effectively senior in right of payment to any existing or future unsecured debt of Optics, or debt that is secured on a basis junior to the EUR Optics (TIF) Notes, to the extent of the value of the property or assets that is available to satisfy the obligations under the EUR Optics (TIM) Notes
- effectively subordinated to any existing and future indebtedness of Optics that is secured by property or assets that do not secure the

Optics Notes, to the extent of the value of the property and assets securing such indebtedness

- structurally subordinated to any existing or future indebtedness of Optics' subsidiaries that do not guarantee the EUR Optics (TIF) Notes, including obligations to trade creditors

See "*Terms and Conditions of the EUR Optics (TIF) Notes*" for more details.

The Guarantee .... On the Optics Notes Issue Date, the EUR Optics (TIF) Notes will not be guaranteed.

Optics shall procure that, subject to certain agreed security principles and certain material limitations pursuant to applicable laws and the terms of the EUR Optics Notes Trust Deed, NetCo guarantees the Optics Notes within 60 days after the Acquisition Closing Date if the Push-Down Merger has not occurred (the "**NetCo Guarantee**") and, together with any and all other future restricted subsidiaries of Optics that may guarantee the Optics Notes (collectively, the "**Guarantors**" and individually a "**Guarantor**") from time to time pursuant to the relevant Conditions of the EUR Optics Notes, the "**Guarantees**" and individually a "**Guarantee**"). See "*Terms and Conditions of the EUR Optics (TIF) Notes—Notes Guarantee*."

The NetCo Guarantee will be subject to certain material contractual and legal limitations including the limitations described in the "*Terms and Conditions of the EUR Optics (TIF) Notes*" and in "*Risk Factors—Risks Relating to the Optics Notes—Corporate benefit, financial assistance laws, capital maintenance and other limitations on the guarantee may adversely affect the validity and enforceability of the NetCo Guarantee*," "*Risk Factors—Risks Relating to the Optics Notes—The pledge over NetCo's shares may not cover the entire share capital of Optics* and see "*Risk Factors—Risks Relating to the Optics Notes—Once granted, the guarantees, including the NetCo Guarantee, and the Optics Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability*" and "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations*".

Ranking of the Guarantee....................... The Guarantee of a Guarantor will be:

- a senior obligation of the Guarantor
- senior in right of payment to any indebtedness of that Guarantor that is subordinated in right of payment to such Optics Notes Guarantee
- *pari passu* in right of payment with any senior indebtedness of the Guarantor that is not subordinated in right of payment to such Optics Notes Guarantee (including that Guarantor's obligations

under the Senior Bridge Facility Agreement, the Senior Facilities Agreement, the USD Optics Notes)

- effectively subordinated to all existing or future Indebtedness of the Guarantor that is secured by property or assets that do not secure the Guarantee, to the extent of the value of the property and assets securing such other indebtedness
- structurally subordinated to any existing or future indebtedness, including obligations to trade creditors, of the subsidiaries of the Guarantor that are not Guarantors
- subject to certain contractual and legal limitations, including the limitations described in the "*Terms and Conditions of the EUR Optics (TIF) Notes*" and in "*Risk Factors—Risks Relating to the Optics Notes—Once granted, the guarantees, including the NetCo Guarantee, and the Optics Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability*" and "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations*"
- the Guarantees will be subject to release under certain circumstances

Optics Notes Collateral............................ Subject to the Intercreditor Agreement, the operation of certain agreed security principles, certain perfection requirements, any permitted encumbrances, certain material limitations pursuant to applicable laws and the terms of the applicable Security Documents, if the Push-Down Merger has not occurred, the EUR Optics (TIF) Notes will be secured:

(i) as of the Optics Notes Issue Date, by Italian law-governed first-ranking security interests granted by Optics HoldCo over: (i) the issued share capital of Optics held by Optics HoldCo; and (ii) receivables arising from material intercompany loans granted by Optics HoldCo to Optics (if any) (collectively, the "**Optics Notes Issue Date Collateral**"); and

(ii) no later than the date falling 60 days after the Acquisition Closing Date, if the Push-Down Merger has not occurred by such date, by Italian law-governed first-ranking security interests granted by Optics over: (i) the issued share capital of NetCo held by Optics (on a basis whereby (a) the grant of security shall not trigger any tag-along rights in favor of any shareholder of NetCo and (b) the enforcement of such security will not be subject to any lock-up under any shareholder arrangements relating to the shares in NetCo); and (ii) receivables arising from any Funding Loan (the "**Optics Notes Post-Issue Date Collateral**").

(iii) in the event that the Push-Down Merger cannot be effected with the security interests over the shares in NetCo held by Optics and/or intercompany loans made available by Optics HoldCo to Optics remaining in place, such security interests

shall be released in order to effect the Push-Down Merger and, Optics HoldCo shall, within 20 Business Days following the Push-Down Merger, enter into replacement security over (i) the issued share capital of NetCo held by Optics HoldCo; and (ii) receivables arising from material intercompany loans granted by Optics HoldCo to NetCo, if any (the "**Optics Notes Replacement Collateral**") .

Collectively, the Optics Notes Issue Date Collateral (including any Optics Notes Replacement Collateral, if any) and the Optics Notes Post-Issue Date Collateral, and any and all assets from time to time in which a security interest has been or will be granted pursuant to any Security Document to secure the obligations under the USD Optics Notes Indenture and the EUR Optics Notes Trust Deed, the Optics Notes and/or any Guarantees, in each case as may be in existence from time to time, as the context may require, are be referred to as the "**Optics Notes Collateral**".

Fastweb currently owns a 4.5% stake in FiberCop. Subject to the outcome of current negotiations among the parties, Optics may acquire Fastweb's stake in NetCo or Fastweb may remain a minority shareholder in NetCo following the Acquisition. If Fastweb continues to be a shareholder of NetCo following the Acquisition, the minority stake of Fastweb is expected to be diluted in connection with the consummation of the Acquisition. To the extent Fastweb remains a shareholder in NetCo following the Transactions, it is not expected to pledge the stake it owns in NetCo, including after the occurrence of the Push-Down Merger.

Accordingly, the Optics Notes Post-Issue Date Collateral, including following the Push-Down Merger, may include only 95.5% (or any other percentage held in NetCo from time to time) of NetCo' s share capital.

Covenants ....

The EUR Optics Notes Trust Deed relating to the EUR Optics Notes, among other things, will restrict the ability of Optics, and, as applicable, NetCo and any future subsidiary to:

(i) create or incur certain security interests;

(ii) consolidate or merge with other entities;

(iii) impair the security interests for the benefit of the holders of the EUR Optics Notes;

(iv) in the case of Optics, carry on any material business other than activities relating to holding companies prior to the Push-Down Merger; and

(v) in the case of NetCo, incur indebtedness other than as permitted under the Senior Facilities Agreement prior to the Push-Down Merger.

In addition, the EUR Optics Notes Trust Deed will require that Optics use commercially reasonable endeavors to complete the Push-Down

Merger within six months of the Optics Notes Issue Date. See "*Terms and Conditions of the EUR Optics (TIF) Notes*" for more details

Push-Down Merger...................................

Optics shall use commercially reasonable endeavors, subject to any relevant approval and/or authorization by any competent authority, to merge with NetCo in accordance with Articles 2501-bis and following of the Italian Civil Code and other applicable provisions of Italian law, with NetCo being the surviving entity, within six months of the Acquisition Closing Date. Fastweb currently owns a 4.5% stake in FiberCop. If Fastweb continues to be a shareholder of NetCo following the Acquisition, it is expected that Fastweb will have a withdrawal right pursuant to article 2437 of the Italian Civil Code (which is substantially a right to sell its shares to NetCo or other shareholders of NetCo, on the terms and conditions provided by law), in particular in the event that certain amendments are made to the bylaws of NetCo (prior to or at the consummation of the Acquisition). This includes amendments with respect to the deletion/amendment of certain transfer restrictions currently included in the bylaws, which may be necessary to allow (or in any event facilitate) the creation of security over the NetCo's shares in the context of the Transactions and the subsequent transfer that could occur following the enforcement of the pledge upon exercise). Accordingly, Fastweb may opt to exercise such withdrawal right to sell its minority stake and to be liquidated following the Acquisition. The funding of the potential liquidation of Fastweb shares will be determined by Optics at the relevant time. As of the date of this Exchange Offer Memorandum, Optics does not anticipate funding the potential liquidation of Fastweb shares through the incurrence of debt.

Following the Push-Down Merger, NetCo will succeed to, and be substituted for, and may exercise every right and power of, and shall assume all of the existing obligations of, Optics, including those relating to the USD Optics Notes and the USD Optics Notes Indenture. Optics will use commercially reasonable endeavours to effect the Push-Down Merger, provided that the security interests over the shares in NetCo held by Optics (to the extent such security interests are already in place by the time the Push-Down Merger becomes effective) and intercompany loans made available by Optics HoldCo to Optics shall remain in place, with NetCo succeeding in the position of Optics. In the event that the Push-Down Merger cannot be effected with the security interests over the shares in NetCo held by Optics and/or intercompany loans made available by Optics HoldCo to Optics remaining in place, such security interests shall be released in order to effect the Push-Down Merger and Optics HoldCo shall, within 20 Business Days following the Push-Down Merger, enter into replacement security. Upon completion of the Push-Down Merger, the security interests over Optics' receivables in respect of the Funding Loan, if any, will automatically cease to exist and, since Optics will be incorporated into NetCo and therefore cease to exist, the security interest over the share capital of Optics will be extinguished by operation of law. To the extent required, security interests granted in favor of the EUR Optics Notes will be re-granted or re-confirmed in accordance with section "*Terms and Conditions of the EUR Optics (TIF) Notes—Covenants—Impairment of Security Interests"* To the extent that NetCo has provided a Notes Guarantee, in respect of the EUR Optics Notes prior to the Push-

Down Merger, such Notes Guarantee shall be extinguished by operation of law.

Each Noteholder of the EUR Optics (TIF) Notes, by accepting a EUR Optics (TIF) Note, will be deemed to agree, for the purposes of Articles 2503 et seq. of the Italian Civil Code, to the consummation of the Push-Down Merger and the assumption by NetCo of all obligations of the issuer in respect of the EUR Optics (TIF) Notes, the EUR Optics Notes Trust Deed, the Intercreditor Agreement and, to the extent applicable, the Security Documents upon completion of the Push-Down Merger.

The Push-Down Merger is subject to certain conditions and may not be completed. See "*Risk Factors— Risks Relating to the Optics Notes—Optics may be unable to complete the Push-Down Merger within the anticipated time frame, or at all*."

Optional Redemption of the Issuer .... (i) Redemption at the Option of Optics (Make-Whole Call); and (ii) Redemption at the Option of Optics (Par Call) (each as defined and further described in the Conditions of the EUR Optics (TIF) Notes). See "*Terms and Conditions of the EUR Optics (TIF) Notes*" for more details.

Optional Redemption of the Holders ...... Redemption at the Option of the Holders on the occurrence of a Put Event (as defined and further described in the Conditions of the EUR Optics (TIF) Notes). A Put Event will only be deemed to have occurred if a Change of Control is accompanied by a Negative Event (as defined and further described in the relevant Conditions of the EUR Optics Notes) in connection with such event. See "*Terms and Conditions of the EUR Optics (TIF) Notes*" for more details.

Additional Amounts................................. All payments made by or on behalf of Optics, NetCo or any other Guarantor (including, in each case, any successor entity thereof) (each, a "**Payor**") on the EUR Optics (TIF) Notes and the Coupons will be made free and clear of and without withholding or deduction for, or on account of, any taxes unless the withholding or deduction of such taxes is then required by law (including any taxing authority's interpretation or administration thereof). If the Payor is required to withhold or deduct any taxes imposed or levied by or on behalf of any Tax Jurisdiction (as defined in "*Terms and Conditions of the EUR Optics (TIF) Notes - Additional Amount*") from payments on the Notes or Coupons, the Payor will pay such additional amounts as may be necessary in order that the net amounts received by the Noteholder or Couponholder after the withholding or deduction will equal the amounts which would have been received in the absence of such withholding or deduction, subject to certain exceptions.

See "*Terms and Conditions of the EUR Optics (TIF) Notes*" for more details

Optional Redemption for Tax Reasons... In the event of certain developments affecting taxation or certain merger or similar transactions of NetCo or Optics, Optics may redeem the Notes in whole, but not in part, at any time, at a redemption price of 100% of

	the principal amount, plus accrued and unpaid interest and additional amounts, if any, to the date of redemption. See "*Terms and Conditions of the EUR Optics (TIF) Notes*" for more details
Minimum Denomination of EUR Optics Notes	The EUR Optics (TIF) Notes will be issued in minimum denominations of €100,000 and integral multiples of €1,000 in excess thereof up to and including €199,000. EUR Optics (TIF) Notes in denominations of less than €100,000 will not be available
Optics Notes Trustee	Citibank, N.A., London Branch, having its registered office at Citigroup Centre, Canada Square, Canary Wharf, London E14 5LB, United Kingdom
Optics Notes Paying Agent.......................	Citibank, N.A., London Branch, having its registered office at Citigroup Centre, Canada Square, Canary Wharf, London E14 5LB, United Kingdom
Optics Notes Transfer Agent and Registrar	Citibank Europe plc, having its registered office at 1 North Wall Quay, Dublin, 1, Ireland;
Offer Restrictions......................................	The EUR Optics (TIF) Notes have not been, and will not be, registered under the U.S. Securities Act or the securities laws of any other jurisdiction, including Italy. The EUR Optics (TIF) Notes are subject to restrictions on offer, sale and transfer. Optics has not agreed to, or otherwise undertaken to, register the EUR Optics (TIF) Notes under the securities laws of any jurisdiction (including by way of an exchange offer). See "*Notice to Investors*" and "*Offer Restrictions*".
Form, Clearance and Settlement.............	The EUR Optics (TIF) Notes will be issued in classic global note (CGN) form. The EUR Optics (TIM) Notes will be issued in registered form. The EUR Optics (TIM) Notes will be represented by a global certificate in registered form which may be exchanged for the relevant definitive certificate only in certain limited circumstances. See "*Summary of Provisions Relating to the EUR Optics (TIM) Notes while Represented by the Global Notes*"
Absence of a Public Market for the Notes	The EUR Optics (TIF) Notes will be new securities for which there is currently no established trading market. Although the Dealer Managers have advised Optics that they intend to make a market in the EUR Optics (TIF) Notes, they are not obligated to do so and they may discontinue market making activities at any time without notice. Accordingly, there is no assurance that an active trading market will develop or be maintained for the EUR Optics (TIF) Notes
Listing and Admission to Trading...........	Application will be made for the EUR Optics (TIF) Notes to be admitted to listing on the Official List of the Stock Exchange and trading on the professional segment of its Euro MTF Market from their issue date, in accordance with the rules thereof. The Stock Exchange's Euro MTF

	Market is not a regulated market for the purposes of MiFID II. There can be no assurance that the EUR Optics (TIF) Notes will be, or will remain, listed on the Official List of the Stock Exchange or remain admitted to trading on the Euro MTF Market thereof
Governing Law...	The EUR Optics Notes Trust Deed and the EUR Optics (TIF) Notes, will be governed by English law, save for mandatory provisions of Italian law relating to the meetings of Noteholders, the Optics Notes Security Agent as *mandatario con rappresentanza* and legal representative of the holders of the Optics Notes pursuant to Article 2414-bis, paragraph 3, of the Italian Civil Code and the common representative (*rappresentante comune*) pursuant to Articles 2417 and 2418 of the Italian Civil Code. See "*Terms and Conditions of the EUR Optics (TIF) Notes*"
Risk Factors	Investing in the EUR Optics (TIF) Notes involves substantial risks. You should consider carefully all of the information in this Exchange Offer Memorandum and, in particular, you should evaluate the specific risk factors set forth in the "*Risk Factors*" section before making a decision whether to invest in the EUR Optics (TIF) Notes
Security Codes	ISIN: XS2804497506 Common Code: 280449750
EUR Optics Notes Trust Deed	The trust deed dated as of the Optics Notes Issue Date by and among Optics, as issuer and the Optics Notes Trustee, as amended and/or supplemented from time to time, with respect to the EUR Optics (TIF) Notes.

SUMMARY HISTORICAL CONSOLIDATED FINANCIAL AND OTHER INFORMATION AND PRO FORMA CARVE-OUT OF THE TIM GROUP

The summary historical consolidated financial information and other data set forth below is the consolidated financial data of the TIM Group as of and for each of the years ended December 31, 2023, 2022 and 2021, which has been extracted or derived from the applicable TIM Audited Consolidated Financial Statements.

This section should be read in conjunction with the TIM Audited Consolidated Financial Statements included elsewhere in this Exchange Offer Memorandum and the notes thereto and the information set forth in "*Presentation of Financial and Other Information*," "*Summary*," "*Use of Proceeds*," "*Capitalization of the TIM Group*," "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the TIM Group*," and "*Business of the TIM Group.*"

Summary Consolidated Income Statement

	For the year ended December 31,		
	2023	**2022**	**2021**
(€m)		(audited)	
Revenues	**16,296**	**15,788**	**15,316**
of which: service revenues	14,953	14,600	13,905
Other income	206	213	272
Total operating revenues and other income	**16,502**	**16,001**	**15,588**
Acquisition of goods and services	(7,518)	(7,239)	(6,550)
Employee benefits expenses	(2,987)	(3,180)	(2,941)
Other operating expenses	(872)	(816)	(1,502)
Changes in inventories	47	22	10
Internally generated assets	538	559	475
EBITDA	**5,710**	**5,347**	**5,080**
of which: impact of non-recurring items	(673)	(682)	(1,143)
Depreciation and amortization	(4,863)	(4,777)	(4,490)
Gains/(losses) on disposals and impairment reversals (losses) on non-current assets	(11)	36	(4,119)
Operating profit (loss) (EBIT)	**836**	**606**	**(3,529)**
of which: impact of non-recurring items	(676)	(682)	(5,263)
Share of profits (losses) of associates and joint ventures accounted for using the equity method and other income (expenses) from investments	24	229	164
Finance income	1,095	1,115	1,124
Finance expenses	(2,835)	(2,538)	(2,274)
Profit (loss) before tax from continuing Operations	**(880)**	**(588)**	**(4,515)**
of which: impact of non-recurring items	(669)	(490)	(5,144)
Income tax expense	(227)	(2,066)	(3,885)
Profit (loss) from continuing operations	(1,107)	**(2,654)**	**(8,400)**
Profit (loss) from Discontinued operations/non-current assets held for sale	**-**	**-**	**-**
Profit (loss) for the period	**(1,107)**	**(2,654)**	**(8,400)**
Of which: impact of non-recurring items	(670)	(2,437)	(8,653)

Summary Consolidated Statement of Financial Position

(€m)	As of December 31, 2023	2022	2021
		(audited)	
Cash and cash equivalents	2,912	3,555	6,904
Property, plant and equipment owned	14,692	14,100	13,311
Total assets	**62,159**	**62,027**	**69,187**
Total equity	**17,513**	**18,725**	**22,039**
Total liabilities	**44,646**	**43,302**	**47,148**

Summary Consolidated Statement of Cash Flows

(€m)	As of December 31, 2023	2022	2021
		(audited)	
Cash flows from/(used in) operating activities	3,944	4,895	4,336
Cash flows from/(used in) investing activities	(4,149)	(5,335)	(5,117)
Cash flows from/(used in) financing activities	(456)	(2,869)	3,164
Cash flows from/(used in) Discontinued operations/Non-current assets held for sale	-	-	-
Aggregate cash flows	**(661)**	**(3,309)**	**2,383**

Other Financial Data

(€m)	For the year ended December 31, 2023	2022	2021
	(unaudited, unless stated otherwise)		
Revenues	16,296	15,788	15,316
of which: service revenues [1]	14,953	14,600	13,905
EBITDA [2]*	5,710	5,347	5,080
EBITDA-AL[2]*	4,631	4,313	4,261
Capital Expenditures [3]	3,982	4,077	4,630
Capital Expenditures (net of spectrum) [3]*	3,982	3,979	3,826
Operating free cash flow [4]*	2,601	(625)	1,444
Operating free cash flow (net of licenses) [4]*	2,649[5]	1,617[5]	1,879[5]

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of the TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Service revenue represents revenues for voice and data services on fixed and mobile networks for retail customers and for other wholesale operators.

(2) EBITDA represents operating profit (loss) before depreciation and amortization expenses, capital gains (losses) and impairment reversals (losses) on non-current assets. EBITDA-AL represents EBITDA adjusted for lease payments. See "*—Certain Pro Forma and As Adjusted Financial Data*" table below on reconciliation of the TIM Group's Profit (loss) for the year to EBITDA and of EBITDA to EBITDA-AL for the periods presented.

(3) Capital Expenditures represents capital expenditures on an accrual basis. Capital Expenditures (net of spectrum) represents capital expenditures less Capital Expenditures on an accrual basis on TLC licenses for the use of frequencies. See "*—Certain Pro Forma and As Adjusted Financial Data*" table below for a reconciliation of the TIM Group's Capital Expenditures to Capital Expenditures (net of spectrum) for the periods presented.

(4) Operating Free Cash Flow represents EBITDA less capital expenditures, change in working capital. Operating Free Cash Flow (net of licenses) represents Operating Free Cash Flow, further adjusted for payment of TLC licenses and for the use of frequencies. See "*—Certain Pro Forma and As Adjusted Financial Data*" table below for a reconciliation of the TIM Group's Operating Free Cash Flow to Operating Free Cash Flow (net of licenses) for the periods presented.

(5) Operating free cash flow (net of licenses) is not adjusted for lease payments.

Net Financial Debt

(€m)	As of and for the year ended December 31, 2023	2022	2021
	(unaudited, unless stated otherwise)		
Cash and cash equivalents	(2,912)	(3,555)	(6,904)
Net Financial Debt Carrying amount[(1)*]	25,776	25,370	22,416
Adjusted Net Financial Debt[(2)*]	25,656	25,364	22,187
Adjusted Net Financial Debt-AL[(3)*]	20,349	20,015	17,573

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of the TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Net Financial Debt Carrying Amount represents gross financial debt (current and non-current financial liabilities and financial liabilities directly associated with discontinued operations /non-current assets held for sale) less financial assets (current and non-current financial assets and financial assets directly associated with discontinued operations /non-current assets held for sale).

(2) Adjusted Net Financial Debt represents the Net Financial Debt Carrying Amount, which neutralizes the effects caused by the volatility of financial markets. Given that some components of the fair value measurement of derivatives (contracts for setting the exchange and interest rate for contractual flows) and of derivatives embedded in other financial instruments do not result in actual monetary settlement, the Adjusted Net Financial Debt excludes these purely accounting and nonmonetary effects (including the effects of IFRS 13 – Fair Value Measurement) from the measurement of derivatives and related financial assets/liabilities.

(3) Adjusted Net Financial Debt-AL represents Adjusted Net Financial Debt, excluding the net liabilities related to the accounting treatment of lease contracts according to IFRS 16. See "*—Certain Pro Forma and As Adjusted Financial Data*" table below for a reconciliation of gross financial debt to Adjusted Net Financial Debt-AL for the periods presented.

Organic EBITDA-AL, Organic EBITDA-AL Margin

(€m, except ratios and percentages)	As of and for the year ended December 31, 2023
	(unaudited)
Organic EBITDA-AL [(1)*]	5,304
Organic EBITDA-AL Margin [(2)*]	32.55%
Adjusted Net Financial Debt-AL[(3)*]	20,349
Ratio of Adjusted Net Financial Debt-AL to Organic EBITDA-AL.	3.83x

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Organic EBITDA-AL represents EBITDA excluding, where applicable, effects of the change in the scope of consolidation, exchange differences, non-recurring events and transactions and lease payments. See table below for a reconciliation of the TIM Group's EBITDA to Organic EBITDA-AL for the periods presented.

(2) Organic EBITDA-AL Margin represents the ratio of Organic EBITDA-AL to Organic Revenues, in each case for the year ended December 31, 2023, expressed as a percentage.

(3) Adjusted Net Financial Debt-AL represents Adjusted Net Financial Debt excluding the net liabilities related to the accounting treatment of lease contracts according to IFRS 16. See table below for a reconciliation of gross financial debt to Adjusted Net Financial Debt-AL for the periods presented. The Adjusted Net Financial Debt-AL includes €425 million relating to the reclassification, among net financial position items, of a portion of the non-financial liability related to NRRP advance payments received by TIM at the end of 2023. Following the Transactions, TIM could be required to reimburse these advances, as it would no longer be entitled to such grants, given that those advance payments are related to capital expenditures that have yet to be made. See "*Regulation of the TIM Group—Regulatory Levies" and "Regulation of NetCo—Regulatory Levies*."

Reconciliation of Profit (loss) for the period to EBITDA and of EBITDA to EBITDA-AL

EBITDA-AL represents EBITDA adjusted for lease payments. The following table provides a reconciliation of the TIM Group's Profit (loss) for the year to EBITDA and of EBITDA to EBITDA-AL for the periods presented:

(€m)	For the year ended December 31, 2023	2022	2021
	(unaudited, unless stated otherwise)		
Profit (loss) for the period	**(1,107)**	**(2,654)**	**(8,400)**
Profit (loss) from Discontinued operations/non-current assets held for sale	—	—	—
Income tax expense	227	2,066	3,885
Finance expenses	2,835	2,538	2,274
Finance income	(1,095)	(1,115)	(1,124)
Share of profits (losses) of associates and joint ventures accounted for using the equity method and other income (expenses) from investments	(24)	(229)	(164)
Gains/(losses) on disposals and impairment reversals (losses) on non-current assets	11	(36)	4,119
Depreciation and amortization	4.863	4,777	4,490
EBITDA	**5,710**	**5,347**	**5,080**
Lease payments*	(1,079)	(1,034)	(819)
EBITDA-AL	**4,631**	**4,313**	**4,261**

(*) Adjusted for lease payments during the period on a historical basis. The year ended December 31, 2021 is not presented on a comparable base with December 31, 2022.

Reconciliation of Capital Expenditures to Capital Expenditures (net of spectrum)

Capital Expenditures (net of spectrum) represents capital expenditures less Capital Expenditures on an accrual basis on TLC licenses for the use of frequencies. The following table provides a reconciliation of the TIM Group's Capital Expenditures to Capital Expenditures (net of spectrum) for the periods presented:

(€m)	For the year ended December 31, 2023	2022	2021
	(unaudited, unless stated otherwise)		
Capital Expenditures (on accrual basis)	3,982	4,077	4,630
of which spectrum *	-	98	804
Capital Expenditures (net of spectrum)*	3,982	**3,979**	**3,826**

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

Reconciliation of EBITDA to Operating Free Cash Flow (net of licenses)

Operating Free Cash Flow represents EBITDA less capital expenditures, change in working capital. Operating Free Cash Flow (net of licenses) represents Operating Free Cash Flow, further adjusted for payment of TLC licenses and for the use of frequencies. The following table provides a reconciliation of the TIM Group's Operating Free Cash Flow to Operating Free Cash Flow (net of licenses) for the periods indicated:

	For the year ended December 31,		
	2023	**2022**	**2021**
(€m)	(unaudited, unless stated otherwise)		
EBITDA(*)	5,710	5,347	5,080
Capital Expenditures (on accrual basis)	(3,982)	(4,077)	(4,630)
Change in working capital(*)(1)	873	(1,895)	994
Operating Free Cash Flow(*).	**2,601**	**(625)**	**1,444**
of which payment of TLC licenses and for the use of frequencies(*)(2)	48	2,242	435
Operating Free Cash Flow (net of licenses) (*)(3)	**2,649**	**1,617**	**1,879**

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Change in working capital represents changes in inventories, trade receivables and other net receivables, trade payables, payables for mobile telephone licenses/spectrum, changes in operating receivables/payables, change in provisions for employee benefits, and operating provisions and other changes.

(2) Represents the payment for licenses for telecommunications frequencies and related commitments in Italy and Brazil.

(3) This measure is not adjusted for lease payments.

Reconciliation of gross financial debt to Adjusted Net Financial Debt-AL

Net Financial Debt Carrying Amount represents gross financial debt (current and non-current financial liabilities and financial liabilities directly associated with discontinued operations /non-current assets held for sale) less financial assets (current and non-current financial assets and financial assets directly associated with discontinued operations /non-current assets held for sale). Adjusted Net Financial Debt represents the Net Financial Debt Carrying Amount, which neutralizes the effects caused by the volatility of financial markets. Given that some components of the fair value measurement of derivatives (contracts for setting the exchange and interest rate for contractual flows) and of derivatives embedded in other financial instruments do not result in actual monetary settlement, the Adjusted Net Financial Debt excludes these purely accounting and nonmonetary effects (including the effects of IFRS 13 – Fair Value Measurement) from the measurement of derivatives and related financial assets/liabilities. Adjusted Net Financial Debt-AL represents Adjusted Net Financial Debt, excluding the net liabilities related to the accounting treatment of lease contracts according to IFRS 16.

The following table shows the composition of gross financial debt and provides a reconciliation of gross financial debt to Adjusted Net Financial Debt-AL for the periods presented:

	As of December 31,		
	2023	**2022**	**2021**
(€m)		(unaudited)	
Bonds	18,563	18,058	20,895
Amounts due to banks, other financial payables and liabilities	8,492	8,720	8,487
Financial liabilities for lease contracts	5,581	5,467	4,715
Financial liabilities directly associated with Discontinued operations/Non-current assets held for sale	-	-	-
Gross financial debt(*)	**32,636**	**32,245**	**34,097**
Financial assets	6,860	6,875	11,681

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Aggregate amount of leases under IFRS 16.

Reconciliation of EBITDA to Organic EBITDA-AL

Organic EBITDA-AL represents EBITDA excluding, where applicable, effects of the change in the scope of consolidation, exchange differences, non-recurring events and transactions and lease payments. The following table provides a reconciliation of the TIM Group's EBITDA to Organic EBITDA-AL for the periods presented:

(€m)	For the year ended December 31, 2023 (unaudited)
EBITDA[(*)]	**5,710**
Non-recurring expenses/(income)[(1)]	673
Lease payments	(1,079)
Organic EBITDA-AL[(*)(2)]	**5,304**

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Non-recurring expenses/(income) relate to events and transactions that, in the opinion of management, by their nature do not occur on an ongoing basis in the normal course of operations and which have impact results in a significant amount. Non-recurring charges include, among others, provisions for regulatory disputes and potential liabilities related to them, liabilities with customers and/or suppliers, and provisions for onerous contracts, charges associated with corporate reorganization/restructuring and prior-year adjustments. Specifically, non-recurring events for the year ended December 31, 2023 include:

(i) €189 million relating to (a) charges mainly connected to disputes, settlements, regulatory sanctions and potential liabilities related to them, (b) the update of contractual risk provisions for onerous contracts (IAS 37) relating to an existing multi-year relationship, (c) other non-recurring expenses associated with agreements and the development of non-recurring projects (d) non-recurring income associated with the recovery of certain operating expenses.

(ii) €484 million benefits expenses mainly relating to outgoing managerial and non-managerial staff in connection with the corporate reorganization and restructuring processes, in accordance with the application of Article 4 of Italian Law No. 92 of June 28, 2012 and the former Article 41, subsection 5bis, of Italian Legislative Decree No. 148/2015, and agreements signed during the year ended December 31, 2022, with certain trade unions relating to the Italian companies comprising the Domestic Business Unit.

(iii) €3 million associated with net capital losses from the sale of non-current assets.

(2) Organic EBITDA for any of the periods presented equals Organic EBITDA-AL, with the above adjustment for lease payments added back in. Organic EBITDA-AL represents EBITDA excluding, where applicable, effects of the change in the scope of consolidation, exchange differences, non-recurring events and transactions and lease payments.

The financial information set forth below are derived from the unaudited pro forma consolidated income statement and unaudited pro forma consolidated statement of financial position of the TIM Group as of and for the year ended December 31, 2023. The pro forma financial information of the TIM Group gives effect to the Transactions by applying pro forma adjustments to the historical consolidated financial statements of the TIM Group to reflect the exclusion of the NetCo assets, FiberCop, Telenergia, an assumed debt transfer as part of the Exchange Offers, the unwinding of the relevant hedge contracts, an assumed cash-in from the Acquisition including in connection with a payment by Optics to TIM in respect of the Exchange Offers in accordance with the Transaction Agreement, the repayment of the FiberCop Intercompany Loan and certain adjustments, including the impact of the Master Services Agreement and the Transitional Services Agreement. The TIM Unaudited Pro Forma Financial Information does not reflect the final attribution of goodwill by the TIM Group to the NetCo Business, following the application of the applicable IFRS accounting principles, such as IAS 36 (Impairment of Assets), at the Acquisition Closing Date and after the final determination of the relative values of the business disposed of and the portion of the cash generating unit retained (or other method to better reflect the goodwill associated with the operation disposed of).

This section should be read in conjunction with the TIM Unaudited Consolidated Pro Forma Financial Information included elsewhere in this Exchange Offer Memorandum and the notes thereto and the information set forth in "Presentation of Financial and Other Information," "Summary," "Use of Proceeds," "Capitalization of the TIM Group," "Management's Discussion and Analysis of Financial Condition and Results of Operations of the TIM Group," and "Business of the TIM Group."

Summary Unaudited Consolidated Pro Forma Income Statement

(€m)	For the year ended December 31, 2023 (unaudited)
Revenues	**14,436**
Other income	116
Acquisition of goods and services	(8,673)
Employee benefits expenses	(1,972)
Other operating expenses/Changes in inventories/Internally generated assets	(413)
EBITDA	**3,494**
Depreciation and amortization/Gains(losses) on disposals and impairment reversals (losses) on non-current assets	(3,350)
Operating profit (loss) (EBIT)	**144**
Other income (expenses) from investments	24
Finance income (expenses), net	(997)
Profit (loss) before tax from continuing Operations	**(829)**
Income tax expense	(191)
Profit (loss) from continuing operations	**(1,020)**
Profit (loss) from Discontinued operations/Non-current assets held for sale	**-**
Profit (loss) for the year	**(1,020)**

Summary Unaudited Consolidated Pro Forma Statement of Financial Position

(€m)	As of December 31, 2023 (unaudited)
Total Non-Current Assets	**29,848**
Net Working Capital	**(4,618)**
Net Invested Capital*	**25,230**

* Net Invested Capital is the sum of Total Non-Current Assets plus Net Working Capital; which is also the sum of Invested Capital plus Net Financial Debt.

Other Pro Forma Financial Data

(Pro Forma) **(€m)**	**For the year ended December 31, 2023** (unaudited, unless stated otherwise)
Revenue	14,436
EBITDA [(1)(*)]	3,494
EBITDA-AL[(1)(*)]	2,778
Capital Expenditures [(2)]	2,168
Capital Expenditures (net of spectrum) [(2)(*)]	2,168

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Pro Forma EBITDA represents the TIM Group's operating profit (loss) before depreciation and amortization expenses, capital gains (losses) and impairment reversals (losses) on non-current assets, on a pro forma basis for the Transactions. Pro Forma EBITDA-AL represents the TIM Group's Pro Forma EBITDA adjusted for lease payments. See "*—Certain Pro Forma and As Adjusted Financial Data*" table below on reconciliation of the TIM Group's Profit (loss) for the year to Pro Forma EBITDA and of Pro Forma EBITDA to Pro Forma EBITDA-AL for the periods presented.

(2) Pro Forma Capital Expenditures represents capital expenditures on an accrual basis. Pro Forma Capital Expenditures (net of spectrum) represents capital expenditures less Pro Forma Capital Expenditures on an accrual basis on TLC licenses for the use of frequencies. Pro Forma Capital Expenditures and Pro Forma Capital Expenditures (net of spectrum) are identical for the year ended December 31, 2023, since no capital expenditures relating to TLC licenses for the use of frequencies were incurred during that year. See "*—Certain Pro Forma and As Adjusted Financial Data*" table below for a reconciliation of the TIM Group's Pro Forma Capital Expenditures to Pro Forma Capital Expenditures (net of spectrum) for the periods presented.

Pro Forma Net Financial Debt

(Pro Forma) **(€m)**	**As of and for the year ended December 31, 2023[(1)]** (unaudited, unless stated otherwise)
Cash and cash equivalents[(2)(*)]	(10,872)
Net Financial Debt Carrying amount[(3)(*)]	10,182
Adjusted Net Financial Debt[(4)(*)]	10,113

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Does not reflect (i) the repayment at maturity of €450 million aggregate principal amount of the 2024 3.625% Euro Notes on January 19, 2024, (ii) the repayment at maturity of €950 million aggregate principal amount of the 2024 4% Euro Notes on April 11, 2024, (iii) the repayment of the Intesa Sanpaolo Loan Agreement of €500 million on March 25, 2024 and (iv) the drawdown under the TIM Term Facility Agreement of €1.5 billion on April 10, 2024.

(2) Reflects the assumed cash in from the Acquisition, including in connection with a payment by Optics to TIM in respect of the Exchange Offers in accordance with the Transaction Agreement, but excludes payment by the TIM Group of any early bird premium or participation premium of, in each case, \$2.50 or €2.50 per \$1,000 or €1,000 principal amount (as the case may be) per Original Note accepted in connection with the Initial Exchange. For the purposes of calculating the cash-in from the Acquisition, which depends, among other factors, on the results of the Exchange Offers, the management assumed that the Initial Exchange is subscribed at the Total Cap amount, with the New Notes issued pursuant to the Acquisition Exchange split by equal principal amount across each series of the EUR New Notes (€430 million) and each series of the USD New Notes (\$431 million), respectively (based on an exchange rate of \$1.105 per €1.000 as of December 31, 2023).This measure does not reflect the drawdown under the TIM Term Facility Agreement of an amount equal to €1.5 billion on April 10, 2024. If the Initial Exchange is subscribed below the Total Cap, or if no or fewer New Notes are issued pursuant to the Initial Exchange, the cash purchase price of the Acquisition will increase commensurately. The cash and cash equivalents at the Acquisition Closing Date may differ due to a number of factors, including, without limitation, the triggering of any purchase price adjustments pursuant to the Transaction Agreement, the date on which the Acquisition is consummated, ongoing operations of the TIM Group and the other matters set forth in this footnote. The Pro Forma Cash and Cash equivalents do not reflect any adjustments in respect of the order of seizure issued on February 2, 2024 by the preliminary investigation judge (*giudice per le indagini preliminary*) of the Court of Milan carrying out a preventive seizure (*sequestro preventivo*) of the sums held in the TIM Group's bank accounts amounting to approximately €249.0 million. See "*Risk Factors—Risks Related to The TIM Group—Risks Related to the TIM Group's Legislative and Legal Framework— The TIM Group is exposed to risks in connection with fraud.*"

(3) Pro Forma Net Financial Debt Carrying Amount represents gross financial debt (current and non-current financial liabilities and financial liabilities directly associated with discontinued operations /non-current assets held for sale) less financial assets (current and non-current financial assets and financial assets directly associated with discontinued operations /non-current assets held for sale).

(4) Pro Forma Adjusted Net Financial Debt represents the Pro Forma Net Financial Debt Carrying Amount, which neutralizes the effects caused by the volatility of financial markets. Given that some components of the fair value measurement of derivatives (contracts for setting the exchange and interest rate for contractual flows) and of derivatives embedded in other financial instruments do not result in actual monetary settlement, the Pro Forma Adjusted Net Financial Debt excludes these purely accounting and nonmonetary effects (including the effects of IFRS 13 – Fair Value Measurement) from the measurement of derivatives and related financial assets/liabilities.

Certain Pro Forma and As Adjusted Financial Data

(Pro Forma) **(€m, except ratios)**	**As of and for the year ended December 31, 2023** (unaudited)
Organic EBITDA-AL [1][*]	3,450
Organic EBITDA-AL Margin[2][*]	23.90%
Adjusted Net Financial Debt-AL[3][*]	6,581
Net finance expenses[4]	(997)
Ratio of Adjusted Net Financial Debt-AL to Organic EBITDA-AL	1.91x
Ratio of Organic EBITDA-AL to Net finance expenses)	3.46x

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Pro Forma Organic EBITDA-AL represents Pro Forma EBITDA excluding, where applicable, effects of the change in the scope of consolidation, exchange differences, non-recurring events and transactions and lease payments. See table below for a reconciliation of the TIM Group's Pro Forma EBITDA to Pro Forma Organic EBITDA-AL for the periods presented.

(2) Pro Forma Organic EBITDA-AL Margin represents the ratio of Pro Forma Organic EBITDA-AL to Pro Forma Revenues, in each case for the year ended December 31, 2023, expressed as a percentage.

(3) Pro Forma Adjusted Net Financial Debt-AL represents Adjusted Net Financial Debt, after giving *pro forma* effect to Transactions. The Pro Forma Adjusted Net Financial Debt-AL excludes the net liabilities related to the accounting treatment of lease contracts according to IFRS 16. The Adjusted Net Financial Debt-AL includes €425 million relating to the reclassification, among net financial position items, of a portion of the non-financial liability related to NRRP advance payments received by TIM at the end of 2023. Following the Transactions, TIM could be required to reimburse these advances, as it would no longer be entitled to such grants, given that those advance payments are related to capital expenditures that have yet to be made. See "*Risk Factors—Risks related to the TIM Group's Financial Information—The pro forma financial information of the TIM Group may not be necessarily representative of the results that the TIM Group would have achieved as a result of the Transactions and may not be a reliable indicator of its future performance.*"

(4) *Pro forma* Net finance expenses represents Net finance expenses, after giving pro forma effect to the Transactions (assuming the Initial Exchange is subscribed at the Total Cap amount, with the New Notes issued pursuant to the Initial Exchange split by equal principal amount across each series of the EUR New Notes (€430 million) and each series of the USD New Notes ($431 million), respectively (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023). For presentational purposes, euro equivalents of dollar denominated indebtedness have been converted using an exchange rate of $1.0857 per €1.00, which is the exchange rate used for TIM Group's balance sheet as of December 31, 2023. The actual amounts accepted in each of the US Exchange and EUR Exchange may vary substantially. *Pro forma* Net finance income/(expenses) is presented for illustrative purposes only and does not purport to be what the Issuer's interest expense would have actually been had these transactions occurred on the date assumed, nor does it purport to project the Issuer's interest expense for any future period or TIM Group's financial condition at any future date. *Pro forma* Net finance income/(expenses) does not reflect (i) the repayment at maturity of €450 million aggregate principal amount of the 2024 3.625% Euro Notes on January 19, 2024, (ii) the repayment at maturity of €950 million aggregate principal amount of the 2024 4% Euro Notes on April 11, 2024, (iii) the repayment of the Intesa Sanpaolo Loan Agreement of €500 million on March 25, 2024 and (iv) the drawdown under the TIM Term Facility Agreement of €1.5 billion on April 10, 2024.

Reconciliation of Pro Forma Profit (loss) for the period to Pro Forma EBITDA and of Pro Forma EBITDA to Pro Forma EBITDA-AL

Pro Forma EBITDA-AL represents Pro Forma EBITDA adjusted for lease payments. The following table provides a reconciliation of the TIM Group's Pro Forma Profit (loss) for the year to Pro Forma EBITDA and of Pro Forma EBITDA to Pro Forma EBITDA-AL for the periods presented:

(€m)	For the year ended December 31, 2023 (unaudited, unless stated otherwise)
Profit (loss) for the year	**(1,020)**
Income tax expense	(191)
Finance income (expenses), net	(997)
Other income (expenses) from investments	24
Depreciation and amortization / Gains/(losses) on disposals and impairment reversals (losses) on non-current assets	(3,350)
EBITDA	**3,494**
Lease payments[*]	(716)
EBITDA-AL	**2,778**

(*) Adjusted for lease payments during the period on a historical basis.

Reconciliation of Pro Forma gross financial debt to Pro Forma Adjusted Net Financial Debt-AL

Pro Forma Net Financial Debt Carrying Amount represents gross financial debt (current and non-current financial liabilities and financial liabilities directly associated with discontinued operations /non-current assets held for sale) less financial assets (current and non-current financial assets and financial assets directly associated with discontinued operations /non-current assets held for sale). Pro Forma Adjusted Net Financial Debt represents the Pro Forma Net Financial Debt Carrying Amount, which neutralizes the effects caused by the volatility of financial markets. Given that some components of the fair value measurement of derivatives (contracts for setting the exchange and interest rate for contractual flows) and of derivatives embedded in other financial instruments do not result in actual monetary settlement, the Pro Forma Adjusted Net Financial Debt excludes these purely accounting and nonmonetary effects (including the effects of IFRS 13 – Fair Value Measurement) from the measurement of derivatives and related financial assets/liabilities. Pro Forma Adjusted Net Financial Debt-AL represents Pro Forma Adjusted Net Financial Debt, excluding the net liabilities related to the accounting treatment of lease contracts according to IFRS 16.

The following table shows the composition of gross financial debt and provides a reconciliation of gross financial debt to Pro Forma Adjusted Net Financial Debt-AL for the periods presented:

(Pro Forma)	As of December 31,
	2023
(€m)	(unaudited)
Bonds	13,551
Amounts due to banks, other financial payables and liabilities	7,253
Financial liabilities for lease contracts	3,634
Gross financial debt[*][(1)]	**24,438**
Financial assets	(14,256)
of which: cash and cash equivalents	(10,872)
Net Financial Debt Carrying Amount[*]	**10,182**
Reversal of fair value measurement of derivatives and related financial liabilities/assets	(69)
Adjusted Net Financial Debt	**10,113**
Leases[(2)]	(3,532)
Adjusted Net Financial Debt-AL	**6,581**

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Pro Forma Gross Financial Debt has been calculated assuming the Initial Exchange is subscribed at the Total Cap amount, with the New Notes issued pursuant to the Initial Exchange split by equal principal amount across each series of the EUR New Notes (€430 million) and each series of the USD New Notes ($431 million), respectively (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023). Pro Forma Gross Financial Debt does not reflect (i) the repayment at maturity of €450 million aggregate principal amount of the 2024 3.625% Euro Notes on January 19, 2024, (ii) the repayment at maturity of €950 million aggregate principal amount of the 2024 4% Euro Notes on

April 11, 2024, (iii) the repayment of the Intesa Sanpaolo Loan Agreement of €500 million on March 25, 2024 and (iv) the drawdown under the TIM Term Facility Agreement of €1.5 billion on April 10, 2024.

(2) Aggregate amount of leases under IFRS 16.

Reconciliation of Pro Forma EBITDA to Pro Forma Organic EBITDA-AL

Pro Forma Organic EBITDA-AL represents Pro Forma EBITDA excluding, where applicable, effects of the change in the scope of consolidation, exchange differences, non-recurring events and transactions and lease payments. The following table provides a reconciliation of the TIM Group's Pro Forma EBITDA to Pro Forma Organic EBITDA-AL for the periods presented:

(Pro Forma)	**For the year ended December 31, 2023**
(€m)	(unaudited)
EBITDA(*)	**3,494**
Non-recurring expenses/(income)(1) and other estimated normalization items (2)	671
Lease payments (3)	(716)
Organic EBITDA-AL(*)(4)	**3,450**

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of TIM Group's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Non-recurring expenses/(income) relate to events and transactions that, in the opinion of management, by their nature do not occur on an ongoing basis in the normal course of operations and which have impact results in a significant amount. Non-recurring charges include, among others, provisions for regulatory disputes and potential liabilities related to them, liabilities with customers and/or suppliers, and provisions for onerous contracts, charges associated with corporate reorganization/restructuring and prior-year adjustments. Specifically, non-recurring events for the year ended December 31, 2023 include:

(i) €174 million for charges mainly connected to disputes, regulatory sanctions and potential liabilities related to them, the update of the contractual risk provision for onerous contracts (IAS 37) relating to an existing multi-year relationship as well as agreements and the development of non-recurring projects and the recovery of operating costs;

(ii) €445 million for employee benefit expenses also connected to the application of the Art. 4 of Law June 28, 2012 no. 92, as per the agreements signed with the trade unions by Domestic Business Unit companies.

(2) Estimated normalization items refer to certain costs historically incurred by the TIM Group that, as of the date of this Exchange Offer Memorandum, the TIM's management estimates will be borne by NetCo as a standalone entity following the consummation of the Acquisition. In particular, they include:

(i) certain personnel costs relating to the social shock absorbers ("*contratto di espansione*") incurred in connection with the union agreement entered into by TIM on July 28, 2022 together with other minor provisions relating to personnel amounted to €37 million;

(ii) provision accruals for litigations & disputes and related legal costs amounted to €10 million;

(iii) provision accruals for bad debt (relating to trade receivables overdue by more than 365 days) amounted to €5 million.

These costs are not reflected in the NetCo Audited Combined Carve-out Financial Information or in the NetCo Unaudited Combined Pro forma Carve-out Financial Information included elsewhere in this Exchange Offer Memorandum which have been prepared in accordance with the Transaction Agreement. These normalization items do not purport to represent the full range of additional costs or dis-synergies that NetCo, as a standalone entity, could incur as part of the ongoing cost structure of the NetCo Business.

(3) Lease payments refer to the actual cash outflows incurred in the year related to lease contracts.

(4) Pro Forma Organic EBITDA for any of the periods presented equals Pro Forma Organic EBITDA-AL, with the above adjustment for lease payments added back in. Pro Forma Organic EBITDA-AL represents Pro Forma EBITDA excluding, where applicable, effects of the change in the scope of consolidation, exchange differences, non-recurring events and transactions and lease payments.

SUMMARY FINANCIAL AND OTHER PRO FORMA CARVE-OUT INFORMATION OF NETCO AND OPTICS

The summary financial information and other data set forth below is the unaudited pro forma combined financial data of NetCo as of and for each of the years ended December 31, 2023 and 2022, which has been extracted or derived from the applicable NetCo Unaudited Combined Pro Forma Carve-out Financial Information.

This section includes certain data, on a pro forma basis for the Transactions, relating to the Optics Group. These data have been prepared by Optics. The preparation of such data involved applying specific adjustments to the NetCo Unaudited Combined Pro Forma Carve-out Financial Information. These adjustments were made to reflect the effects of the Transactions, based on certain assumptions, including the expected outstanding debt of Optics as of the Acquisition Closing Date on a *pro forma* basis for the Acquisition.

This section should be read in conjunction with NetCo Unaudited Combined Pro Forma Carve-out Financial Information included elsewhere in this Exchange Offer Memorandum and the notes thereto and the information set forth in "*Presentation of Financial and Other Information*," "*Summary*," "*Capitalization of NetCo and Optics*," "*Management's Discussion and Analysis of Pro Forma Carve-out Financial Information and Results of Operations of NetCo*."

Summary Unaudited Consolidated Pro Forma Carve-out Income Statement of NetCo

(Pro Forma) **(€m)**	**For the year ended December 31,**	
	2023	**2022**
	(unaudited)	
Revenues	**3,977**	**3,858**
Other income	240	244
Acquisition of goods and services	(959)	(961)
Employee benefits expenses	(1,015)	(1,050)
Other operating expenses/Changes in inventories/Internally generated assets	110	117
EBITDA	**2,353**	**2,208**
Depreciation and amortization/Gains (losses) on disposals and impairment reversals (losses) on non-current assets	(1,573)	(1,535)
Operating profit (EBIT)	**780**	**673**
Finance income (expenses), net	(336)	(239)
Profit before tax from continuing operations	**444**	**434**
Income tax expense	(133)	(130)
Profit from continuing operations	**311**	**304**
Profit for the year	**311**	**304**

Summary Unaudited Consolidated Pro Forma Carve-out Statement of Financial Position of NetCo

(Pro Forma) **(€m)**	**As of December 31, 2023**
	(unaudited)
Total Non-Current Assets	**13,118**
Net Working Capital	**(1,891)**
Net Invested Capital*	**11,227**

* Net Invested Capital is the sum of Total Non-Current Assets plus Net Working Capital; which is also the sum of Invested Capital plus Net Financial Debt (as shown under NetCo Unaudited Combined Pro Forma Carve-out Financial Information and not under "Capitalization of NetCo and Optics").

The financial information set forth below is derived from the consolidated carve-out income statements and consolidated carve-out statement of financial position of the NetCo as of and for the years ended December 31, 2023 and 2022. The pro forma combined financial information of NetCo gives effect to the Transactions by applying pro forma adjustments to the historical consolidated financial statements of NetCo to reflect certain adjustments including the impact of the Master Services Agreement, the Transitional Services Agreement and the repayment of the FiberCop Intercompany Loan with a new loan to be granted to NetCo and assuming the same interest rate as the interest rate

of the FiberCop Intercompany Loan will apply to it. The NetCo Unaudited Combined Pro Forma Carve-out Financial Information does not reflect any adjustment relating to the purchase price allocation as the exercise to determine the fair value of the net assets acquired will be carried out only after Acquisition Closing Date.

This section should be read in conjunction with the NetCo Unaudited Combined Pro Forma Carve-out Financial Information included elsewhere in this Exchange Offer Memorandum and the notes thereto and the information set forth in "Presentation of Financial and Other Information," "Summary," "Capitalization of NetCo and Optics," "Management's Discussion and Analysis of Pro Forma Carve-out Financial Information and Results of Operations of NetCo," and "Business of NetCo."

Certain Pro Forma Data of NetCo

(Pro Forma) **(€m, except percentages)**	**As of and for the year ended December 31, 2023**
	(unaudited)
Capital Expenditures[1][*]	1,814
Operating free cash flow[2][*]	680
Organic EBITDA-AL [3][*]	1,948
Organic EBITDA-AL Margin [4][*]	48.98%
Adjusted Net Financial Debt-AL[5][*]	3,409

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of NetCo's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) *Pro Forma* Capital Expenditures represents pro forma capital expenditures on an accrual basis.

(2) *Pro Forma* Operating Free Cash Flow represents Pro Forma EBITDA less pro forma capital expenditures, change in working capital.

(3) *Pro Forma* Organic EBITDA-AL represents Pro Forma EBITDA adjusted for, where applicable, certain items excluded from the transaction perimeter but considered normal ongoing expenses, non-recurring events and transactions and lease payments. See table below for a reconciliation of the NetCo's Pro Forma EBITDA to Pro Forma Organic EBITDA-AL for the periods presented.

(4) *Pro Forma* Organic EBITDA-AL Margin represents the ratio of Pro Forma Organic EBITDA-AL to Pro Forma Revenues, in each case for the year ended December 31, 2023, expressed as a percentage.

(5) *Pro Forma* Adjusted Net Financial Debt-AL represents Pro Forma Adjusted Net Financial Debt, excluding the net liabilities related to the accounting treatment of lease contracts according to IFRS 16. See table below for a reconciliation of gross financial debt to Pro Forma Adjusted Net Financial Debt-AL for the periods presented. See "*Capitalization of NetCo and Optics*." This measure does not include the debt to be incurred in connection with the Transactions which will sit at Optics pending the Push-Down Merger.

Reconciliation of Pro Forma Profit (loss) for the period to Pro Forma EBITDA of NetCo

The following table provides a reconciliation of NetCo's Pro Forma Profit for the year to Pro Forma EBITDA for the periods presented:

(Pro Forma) **(€m)**	**For the year ended December 31,**	
	2023	**2022**
	(unaudited, unless stated otherwise)	
Profit for the year	**311**	**304**
Income tax expense	133	130
Finance income (expenses), net	336	239
Depreciation and amortization/Gains (losses) on disposals and impairment reversals (losses) on non-current assets	1,57 3	1,53 5
EBITDA	**2,35 3**	**2,20 8**

Reconciliation of Pro Forma gross financial debt to Pro Forma Adjusted Net Financial Debt-AL of NetCo

Pro Forma Net Financial Debt Carrying Amount represents gross financial debt (current and non-current financial liabilities and financial liabilities directly associated with discontinued operations /non-current assets held for sale) less financial assets (current and non-current financial assets and financial assets directly associated with discontinued operations /non-current assets held for sale). Pro Forma Adjusted Net Financial Debt represents the Pro Forma Net Financial Debt Carrying Amount, which neutralizes the effects caused by the volatility of financial markets. Given that some components of the fair value measurement of derivatives (contracts for setting the exchange and interest rate for contractual flows) and of derivatives embedded in other financial instruments do not result in actual monetary settlement, the Pro Forma Adjusted Net Financial Debt excludes these purely accounting and nonmonetary effects (including the effects of IFRS 13 – Fair Value Measurement) from the measurement of derivatives and related financial assets/liabilities. Pro Forma Adjusted Net Financial Debt-AL represents Adjusted Net Financial Debt, excluding the net liabilities related to the accounting treatment of lease contracts according to IFRS 16.

The following table shows the composition of gross financial debt of NetCo and provides a reconciliation of gross financial debt to Pro Forma Adjusted Net Financial Debt-AL for the periods presented:

(Pro Forma) **(€m)**	**As of December 31, 2023** (unaudited)
Bonds	-
Amounts due to banks, other financial payables and liabilities	3,584
Financial liabilities for lease contracts	2,328
Gross financial debt(*)	**5,912**
Financial assets	(356)
of which: cash and cash equivalents	(152)
Net Financial Debt Carrying Amount(*)	**5,556**
Reversal of fair value measurement of derivatives and related financial liabilities/assets	-
Adjusted Net Financial Debt	**5,556**
Leases [(1)]	(2,147)
Adjusted Net Financial Debt-AL	**3,409**

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of NetCo's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Aggregate amount of leases under IFRS 16.

Reconciliation of Pro Forma EBITDA to Pro Forma Operating Free Cash Flow of NetCo

The following table provides a reconciliation of the NetCo's Pro Forma EBITDA to Pro Forma Operating Free Cash Flow for the periods presented:

(Pro Forma) **(€m)**	**For the year ended December 31, 2023** (unaudited)
EBITDA	**2,353**
Change in inventories	(11)
Change in trade receivables	(60)
Change in trade payables	217
Change other operating assets / liabilities	2
Change in provision	5
Change in provision for employee benefits	(12)
Capital expenditures	(1,814)

(Pro Forma) **(€m)**	**For the year ended December 31, 2023** (unaudited)
Operating Free Cash Flow(*)	**680**
Lease payments	(370)
Operating Free Cash Flow-AL(*)	**310**

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of NetCo's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) These measures are based on NetCo's pro forma statement of financial position as of December 31, 2023, which is included elsewhere in this Exchange Offer Memorandum, and on NetCo's statement of financial position as of December 31, 2022, derived from certain unaudited management accounts that are not included in this Exchange Offer Memorandum.

No pro-forma statement of cash flows has been prepared for the year ended December 31, 2023, as, under the circumstances, it would not provide useful information to investors. The above table provides a reconciliation of NetCo's Pro Forma EBITDA to Pro Forma Operating Free Cash Flow for the periods presented, which is based on NetCo's pro forma statement of financial position as of December 31, 2023, which is included elsewhere in this Exchange Offer Memorandum, and on NetCo's statement of financial position as of December 31, 2022, derived from certain unaudited management accounts that are not included in this Exchange Offer Memorandum.

Reconciliation of Pro Forma EBITDA to Pro Forma Organic EBITDA-AL of NetCo

The following table provides a reconciliation of the NetCo's Pro Forma EBITDA to Pro Forma Organic EBITDA-AL for the periods presented:

(Pro Forma) **(€m)**	**For the year ended December 31,**	
	2023	**2022**
	(unaudited)	
EBITDA	**2,353**	**2,208**
Estimated normalization items (1)	(52)	(59)
Non-recurring expenses(2)	17	13
Lease payments(3)	(370)	(351)
Organic EBITDA-AL(*)	**1,948**	**1,812**

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of NetCo's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(1) Estimated normalization items refer to certain costs historically incurred by the TIM Group that, as of the date of this Exchange Offer Memorandum, the TIM's management estimates will be borne by NetCo as a standalone entity following the consummation of the Acquisition. In particular, they include:

a) certain personnel costs relating to the social shock absorbers (*contratto di espansione*) incurred in connection with the union agreement entered into by TIM on July 28, 2022 together with other minor provisions relating to personnel amounted to €37 million and €42 million for the years ended December 31, 2023 and 2022, respectively;

b) provision accruals for litigations & disputes and related legal costs amounted to €10 million and €9 million for the years ended December 31, 2023 and 2022, respectively; and

c) provision accruals for bad debt (relating to trade receivables overdue by more than 365 days) amounted to €5 million and €8 million for the years ended December 31, 2023 and 2022, respectively.

These costs are not reflected in the NetCo Audited Combined Carve-out Financial Information or in the NetCo Unaudited Combined Pro forma Carve-out Financial *Information* included elsewhere in this Exchange Offer Memorandum which have been prepared in accordance with the Transaction Agreement. These normalization items do not purport to represent the full range of additional costs or dis-synergies that NetCo, as a standalone entity, could incur as part of the ongoing cost structure of the NetCo Business. "*Risk Factors— Risks Related to NetCo's Financial Information—NetCo Audited Combined Carve-out Financial Information and NetCo Unaudited Combined Pro Forma Carve-out Financial Information, as the case may be, may not be necessarily representative of the results that NetCo would have achieved as a separate and independent company and may not be a reliable indicator of its future performance*" and "*—NetCo's Pro Forma Organic*

EBITDA-AL and other non-IFRS measures presented in this Exchange Offer Memorandum are based upon estimates and assumptions regarding specific initiatives and the impact of certain events. Such estimates and assumptions might prove to be materially incorrect as a result of factors beyond NetCo's control and are subject to known and unknown risks, uncertainties and other factors."

(2) Non-recurring expenses relate to events and transactions that, in the opinion of management, by their nature do not occur on an ongoing basis in the normal course of operations and which have impact results in a significant amount. Specifically, non-recurring events for the year ended December 31, 2022 and 2023 mainly include:

a) expenses related to COVID emergency prevention;

b) write-off, in 2023, of a positive income related to a Telenergia dispute; and

c) Personnel costs related to training.

(3) Lease payments refer to the actual cash outflows incurred in the year related to lease contracts.

Certain Pro Forma Data As Adjusted for the Transactions of the Optics Group[(#)]

(Pro Forma) **(€m, except ratios)**	**As of and for the year ended December 31, 2023**
	(unaudited)
Cash and cash equivalents *As Adjusted for the Transactions*[(1)]	152
Adjusted Net Financial Debt-AL *As Adjusted for the Transactions*[(2)(*)]	8,348
Net finance income/(expenses) *As Adjusted for the Transactions*[(3)]	(446)
Ratio of Pro forma Adjusted Net Financial Debt-AL *As Adjusted for the Transactions* to Organic EBITDA-AL of NetCo[(*)]	4.29x
Ratio of Organic EBITDA-AL of NetCo to Net finance income/(expenses) *As Adjusted for the Transactions*	4.36x

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of NetCo's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

(#) The data presented "*As Adjusted for the Transactions*" have been prepared by Optics. The preparation of such data involved applying specific adjustments to the NetCo Unaudited Combined Pro Forma Carve-out Financial Information. These adjustments were made to reflect the effects of the Transactions, based on certain assumptions, including the expected outstanding debt of Optics as of the Acquisition Closing Date on a *pro forma* basis for the Acquisition.

(1) Cash and cash equivalents *As Adjusted for the Transactions* represents the cash and cash equivalents of the Optics Group after giving *pro forma* effect to the Transactions. This measure reflects the pro forma cash and cash equivalents of NetCo of €152 million. Cash and cash equivalents *As Adjusted for the Transactions* does not account for any potential cash in from TIM or Infratel related to the NRRP advance payments received by TIM at the end of 2023 nor does it reflect any adjustments to the Purchase Price including in connection with the outcome of Exchange Offers. In addition, Cash and cash equivalents *As Adjusted for the Transactions* does not take into account the payment of any transaction costs associated with the Transactions by Optics. Accordingly, the actual Cash and cash equivalents *As Adjusted for the Transactions* of the Optics Group at completion of the Acquisition will vary, potentially substantially, from the measure above for the foregoing and other factors.

(2) *Pro forma* Adjusted Net Financial Debt-AL *As Adjusted for the Transactions* represents Adjusted Net Financial Debt-AL after giving pro forma effect to the Transactions reflecting (i) a drawdown under the Senior Facilities Agreement of €3.5 billion on the assumption that the Initial Exchange is subscribed at the Total Cap amount and (ii) the principal amount of any Optics Notes expected to be issued pursuant to the Exchange Offers. For more information "*Description of certain other financing arrangements of the Optics Group*."

Note that the Pro Forma Adjusted Net Financial Debt-AL, *As Adjusted for the Transactions*, will not be impacted by the results of the Exchange Offers. If a principal amount of between €4.5 billion and €5.0 billion equivalent (the Total Cap amount) of Original Notes are accepted as part of the Initial Exchange with the Optics Notes issued pursuant to the Acquisition Exchange split by equal principal amount across each series of the EUR Optics Notes (€430 million) and each series of the USD Optics Notes ($431 million) (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023), a drawdown of between €3.5 billion and €4.0 billion under the TLB (dependent on the principal amount of Optics Notes issued pursuant to the Acquisition Exchange). In the event that less than €4.5 billion equivalent principal amount of Original Notes are accepted as part of the Initial Exchange, Optics currently intends to draw amounts under the Bridge Facility Agreement for each incremental euro or US dollar below €4.5 billion equivalent principal amount of Optics Notes issued pursuant to the Acquisition Exchange which is required to complete the Acquisition. "*Summary—Optics Financing*." The Pro Forma Adjusted Net Financial Debt-AL, *As Adjusted for the Transactions*, does not account for any potential cash in from TIM or Infratel related to the NRRP advance payments received by TIM at the end of 2023 nor does it reflect any adjustments to the Purchase Price including in connection with the outcome of Exchange Offers.

(3) Pro forma Net finance expenses *As Adjusted for the Transactions* represents Net finance income/(expenses), after giving pro forma effect to the Transactions as if these transactions had occurred on December 31, 2023 assuming (i) the Initial Exchange is subscribed at the Total Cap amount, with the Optics Notes issued pursuant to the Acquisition Exchange split by equal principal amount across each series of the EUR Optcs Notes (€430 million) and each series of the USD Optics Notes ($431 million), respectively (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023) and (ii) an estimated hedged interest rate under the Senior Facility Agreement. The actual amounts accepted in each of the US Exchange and EUR Exchange may vary substantially, which would have corresponding impacts on the calculation of Pro Forma Net finance expense *As Adjusted for the Transactions* as if these transactions had occurred on December 31, 2023. *Pro forma* Net finance income/(expenses) is presented for illustrative purposes only and does not purport to be what the NetCo's interest expense would have actually been had these transactions occurred on the date assumed, nor does it purport to project the NetCo's interest expense for any future period or NetCo's financial condition at any future date.

RISK FACTORS

An investment in the Notes involves a high degree of risk. Prospective investors should carefully consider all of the information contained in this Exchange Offer Memorandum and each of the risks described below.

In this Section, unless specified otherwise, (i) references to the Original Notes, shall refer to both the EUR Original Notes and the USD Original Notes, (ii) references to the New Notes, shall refer to both the EUR New Notes and the USD New Notes (iii) references to the Optics Notes, shall refer to both the EUR Optics Notes and the USD Optics Notes and (iv) references to the Exchange Offers shall refer to both the EUR Exchange Offers and the USD Exchange Offers.

Some of the risks relate to the Transactions, to the Exchange Offers, to not tendering in the Exchange Offers, to the New Notes and the Optics Notes. Any of the following risks could, individually or in the aggregate, materially and adversely affect the TIM Group's and NetCo's businesses, financial condition and results of operations and the actual outcome of matters as to which forward-looking statements are made in this Exchange Offer Memorandum. Most of these risks are contingencies which may or may not occur and there is no guarantee regarding the likelihood of such events. As a result, prospective investors could lose some or all of their investment. The risks and uncertainties described herein are not the only ones that the TIM Group, NetCo and/or Optics face. It is not possible to identify all such factors or to determine which factors are most likely to occur. Although material risks affecting the TIM Group's and NetCo's businesses, after giving pro forma effect to the Transactions, have been identified and discussed below, there may be additional risks and uncertainties that are not presently known that may adversely affect the TIM Group's and NetCo's businesses, financial condition and results of operations in the future.

In addition, the TIM Group's, NetCo's and Optics' historical and pro forma historical financial performances may not be a reliable indicator of their future performance and historical trends should not be used to anticipate results or trends in future periods. This Exchange Offer Memorandum also contains forward-looking statements that involve risks and uncertainties. Actual results may materially differ from those anticipated in these forward-looking statements as a result of various factors, including the risks described below and elsewhere in this Exchange Offer Memorandum. See "Forward-Looking Statements."

Risks Related to the TIM Group

Risks Related to the TIM Group's Business Activity and Industry

The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective.

The TIM Group's fixed and mobile telecommunications operations, in Italy and abroad, are subject to extensive, costly and evolving regulatory regimes. Changes in such laws and regulations, or failure by the TIM Group to comply with such laws and regulations could materially and adversely affect the TIM Group's business, financial condition, results of operations, reputation and prospects. As a member of the EU, Italy has adapted its regulatory legislation and rules for electronic communications services to the framework established by the EU Parliament and Council.

Pursuant to the EU regulatory framework, the Italian regulator, the Italian Communications Authority (*Autorità per le garanzie nelle comunicazioni*) ("**AGCOM**"), is required to identify operators with "Significant Market Power" ("**SMP**") in the relevant markets subject to regulation. On the basis of market analyses proceedings ("**Market Analyses**"), AGCOM imposes requirements necessary to address identified competition problems. The regulatory framework in the telecommunications industry mainly targets wholesale network providers, while the regulation of retail markets has been largely withdrawn over time, with the exception of price tests on retail access offers (for telephone, broadband and ultrabroadband services).

Within this regulatory framework, the main risks the TIM Group faces include the lack of predictability concerning both the timing of the regulatory proceedings and their final outcome and possible AGCOM decisions that apply retroactively and their potential impact on the TIM Group's business, results of operations and on the guidance

presented to the market (*e.g.*, review of prices from prior years following the decisions of administrative courts, repricing decisions, proceedings that impact technological decisions and return on investment).

New Market Analyses shall be periodically conducted by AGCOM in order to (i) deal with the evolution of market conditions and technology developments and (ii) set the rules for a subsequent regulatory period of up to five years (potentially extended to up to six years upon a AGCOM's specific application process to the European Commission). In addition, a specific Market Analysis shall be conducted each time a vertically integrated operator with SMP notifies a detailed delayering project pursuant to Article 89 of Italian Legislative Decree No. 259 of 2003 (*separazione volontaria da parte di un'impresa verticalmente integrata*), such as the one envisaged as part of the Transactions. On June 21, 2023, AGCOM called a public consultation concerning a scheme for a new Market Analysis aimed at regulating the period 2024-2028. A final draft was approved by AGCOM at the end of January 2024 and submitted to the Italian Antitrust Authority (*Autorità Garante della Concorrenza e del Mercato*) ("**AGCM**") for its opinion. Following the receipt of AGCM's opinion, the draft has been notified to the European Commission and made public. The final text of the Market Analysis is expected to be published in the first half of May 2024, following the receipt of the European Commission's comments. Although the TIM Group may contribute to public consultations promoted by AGCOM to update the regulatory framework applicable to its operations, there can be no assurance that AGCOM will take into account the TIM Group's comments and proposals, thus setting forth a regulatory framework applicable to its business which is not in line with the TIM Group's expectations.

On January 19, 2024, TIM notified AGCOM of its intention to proceed with a detailed delayering project. As TIM is an operator with SMP, the notification will trigger a new Market Analysis. Depending on the results of the Market Analysis, NetCo may be officially recognized by AGCOM as a "wholesale-only" operator within the meaning of Article 91 of Italian Legislative Decree No. 259 of 2003.

The TIM Group expects that the consummation of the Transactions will result in an improvement of the regulatory environment for the TIM Group in the Italian market (enabling it to compete on a level playing field with other market participants under applicable competition laws), such as the withdrawal of the obligations to apply retail access prices that are replicable by other competitors and to submit new retail access offers to AGCOM for prior approval that apply to the TIM Group ahead of the successful completion of the Transaction. However, although it seems reasonable to expect a specific AGCOM decision recognizing the consequences of the vertical separation a few months after the Acquisition Closing Date, it is currently uncertain whether and when AGCOM may grant such regulatory reliefs. See "*TIM Group Regulation*" and "*Summary—The TIM Group's Strategy*."

Regulation is a key factor in evaluating the likelihood of return on investments and therefore in deciding where to invest. Regulatory uncertainty and regulatory changes imposed on the TIM Group can impact its revenues and can make it more difficult to make important investment decisions.

Moreover, a high level of disputes arising from operators challenging AGCOM decisions before administrative courts results in a further degree of uncertainty with respect to rules and economic requirements.

The AGCM and AGCOM, under certain circumstances, may also intervene in the TIM Group's business, setting fines and/or imposing changes in its service provision operating processes and in its offers. In addition, AGCOM or AGCM decisions may impose constraints on the pricing of fixed and mobile offers based on consumer protection legislation.

The Brazil Business Unit is also subject to extensive regulation. Its international operations, therefore, face similar regulatory issues as the TIM Group faces in Italy, including the possibility for regulators to impose obligations and conditions on how the TIM Group operates its businesses in Brazil as well as taking decisions that can have an adverse effect on its results.

As a result, the decisions of regulators or the implementation of new regulations in Brazil and the costs of its compliance with any such decisions or new regulations, may limit its flexibility in responding to market conditions, competition and changes in its cost base which could individually or in the aggregate, have a material adverse effect on its business and results of operations.

Due to the continuous evolution of the regulatory regime affecting various parts of its business in Italy and in its international operations, the TIM Group is unable to clearly predict the impact of any proposed or potential changes

in the regulatory environment in Italy, Brazil and its other international markets. Regulations in the telecommunications industry are constantly changing to adapt to new competition and technology. See "*TIM Group Industry Overview*" and "*—The TIM Group may be subject to increasing market competition*." Changes in laws, regulation or government policy could adversely affect the TIM Group's business and competitiveness. In particular, the TIM Group's ability to compete effectively in its existing or new markets could be adversely affected if regulators decide to expand the restrictions and obligations to which it is subject or extend them to new services and markets. Finally, decisions by regulators regarding the granting, amendment, revocation or renewal of its authorizations and public concessions, or those of third parties, could adversely affect its future operations in Italy and in other countries where the TIM Group operates.

Following the successful completion of the Transactions, there can be no assurance that the TIM Group will be able to deliver any or all of the related expected benefits of the Transactions from a business perspective.

Following the successful completion of the Transactions, the TIM Group expects, among other things, to be able to implement a strategic flexibility, compete on a level playing field among its peers and further benefit from organic and inorganic growth. However, the TIM Group may be unable to realize or capitalize on the anticipated benefits it expects to achieve from the successful completion of the Transactions. Failure to achieve or capitalize on such benefits could adversely affect its business, results of operations and financial condition. See "*Summary—The TIM Group's Key Strengths*" and "*Summary—The TIM Group's Strategy*."

The TIM Group's business will be adversely affected if the TIM Group is unable to successfully implement its strategic objectives and factors beyond its control may prevent it from successfully implementing its strategy.

In recent years, the telecommunications market has shown a high level of competition, which has resulted in a significant reduction in customer spending, while at the same time requiring an increasing level of investment needed to support network development. In the face of the contraction of the traditional telecommunication core business related to connectivity of voice and data, the TIM Group has progressively evolved its positioning across its markets. Currently, the TIM Group is effectively operating in adjacent markets, with different levels of competition and different investment cycles, using specific commercial approaches and operating models. See "*TIM Group Industry Overview*" for further information. For the Italian market, the TIM Group has defined a specific strategy for the different areas of competition, which includes:

- Development of 5G solutions (with the support under the NRRP);
- In the Enterprise segment, which is characterized by stable growth and a change in the revenue mix with an increase in the weight of cloud, IoT and security services, the TIM Group's commercial strategy is focused on transitioning to advanced connectivity solutions and development of proprietary ICT services, products and solutions and strengthening the integrated approach to the ICT offer to large enterprises and public administrations; and
- In the Consumer and SMB segments, the TIM Group is engaged in strengthening its premium positioning with a greater focus on the retention of its customer base and the penetration of ICT solutions among target customers.

For the Brazilian market, the TIM Group aims at improving revenues and selective growth, while maintaining financial discipline. To achieve this goal, it seeks to strengthen its market position by leveraging mobile telephony to increase broadband usage and by exploiting opportunities arising from emerging technologies and customer behavior changes. In respect of its strategic efforts regarding broadband, it is seeking to increase its presence in the residential broadband market by investing significant efforts and resources to expand its footprint and the density of its fiber optic broadband service (FTTx), by providing a higher-speed fixed connection closer to the customer residence, under the brand TIM UltraFibra (formally TIM Live), and launching its fixed broadband service through mobile network where the TIM Group offers broadband through LTE or 4G or 5G wireless communication networks as a type of FWA. The provision of fiber optic broadband service is a highly capital-intensive business that brings a long-term return on investments and increases the risks to the TIM Group's operation. To mitigate such risk while boosting fiber infrastructure and market access, TIM Brasil created FiberCo and sought a strategic partner. After regulatory approvals, TIM Brasil acquired a controlling stake in FiberCo (now I-Systems), aiming to accelerate residential broadband growth and unlock

infrastructure value through an open network approach and focused operations. However, as a new business, residential broadband also brings new risks, particularly related to market response and customer behavior, that could negatively impact the use of the TIM Group's mobile network resources.

For more details of the TIM Group's existing market competition strategy, please see "*Summary—Key Strengths*" and "*Summary—The TIM Group's Strategy*."

On March 6, 2024, the TIM's board of directors approved the 2024-2026 Industrial Plan (the "**2024-2026 Industrial Plan**"), which contains the strategic guidelines and growth objectives of the TIM Group for the relevant period. In particular, pursuant to the 2024-2026 Industrial Plan, in order to mitigate regulatory constraints, and increase the focus on the markets it focuses on, the TIM Group has confirmed the Delayering Plan, pursuant to which it plans to transition to a more horizontal structure, divided into three business areas: (i) TIM Enterprise, dedicated to the segment of large Italian companies and the Italian public administration (and possibly further separate this business area into a standalone entity) (ii) TIM Consumer, to serve Italian households, individuals and small and medium-sized enterprises (iii) and TIM Brasil, which serves the Brazilian market.

For more details of the TIM Group's strategic objectives and the Delayering Plan, please see "*Summary—The TIM Group's Strategy*," and "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the TIM Group*." The TIM Group's ability to implement and achieve its strategic objectives and priorities may be influenced by certain factors, including factors outside of its control. Such factors include:

- an increase in the number of competitors in the telecommunications industry that could reduce TIM Group's market share;
- the TIM Group's ability to successfully compete on both price and innovation capabilities with respect to new products and services, including competition from mobile virtual network operators ("**MVNOs**"), which offer telecommunication services to customers by leasing network capacity from traditional network providers, without their own network infrastructure and global and local OTT providers which offer content and services using the Internet, without their own network infrastructure;
- a deterioration of the macroeconomic conditions affecting (also taking into consideration the impact of the current inflationary environment and energy crisis) the principal markets in which the TIM Group operates, including, in particular, its core Italian market;
- the impact of regulatory decisions and changes in the regulatory environment in Italy, Brazil and other countries in which the TIM Group operates, including the ability of the Italian government to exercise certain powers with respect to strategic transactions under the Italian Golden Power Legislation;
- the TIM Group's ability to develop and introduce new technologies that it considers attractive for its principal markets, to manage innovation, to supply value added services and to increase the use of its mobile networks;
- the TIM Group's ability to secure government subsidies and funds;
- the TIM Group's ability to obtain, maintain and renew necessary licenses and authorizations in a timely and cost-effective manner;
- controls and system technology failures, which could negatively affect the TIM Group's revenues and reputation;
- the introduction of transformative technologies that could be difficult for the TIM Group to keep pace with and could cause significant revenues decrease;
- the TIM Group's ability to operate efficiently and to refinance the TIM Group's debt as it comes due, particularly in consideration of political and economic conditions and uncertainties in credit and capital markets;

- the TIM Group's ability to most efficiently scale the TIM Group's structure;
- the TIM Group's ability to attract and retain qualified personnel;
- government policy and changes in the regulatory environment or legal frameworks;
- the TIM Group's ability to successfully implement its Internet and broadband and ultrabroadband strategy (especially with respect to FTTH in Brazil);
- the TIM Group's ability to successfully achieve its financial targets (including debt reduction);
- physical and/or cyber threats;
- the effect of exchange rate and inflation fluctuations;
- the impact of fluctuations in currency exchange, inflation, interest rates and the performance of the financial markets in general;
- the outcome of litigation, disputes and investigations in which the TIM Group is involved or may become involved, including those potentially arising in connection with the Transactions;
- large scale adverse events that could cause negative effects, requiring a long recover period, or even impact permanently the socioeconomic environment, such as natural disasters, political instability, or pandemics;
- the possibility of an increase in taxes by governments in order to balance their financial deficit;
- increasing demand on the TIM Group's system bandwidth to manage the continuous growth of mobile data traffic, which in turn requires further investments in infrastructure or the acquisition of additional spectrum frequencies in order to maintain network quality and prevent turnover, especially in big cities, where the population is highly concentrated and the costs of network expansion are considerably high;
- the TIM Group's ability to build up its business in adjacent markets and in international markets due to its specialist and technical resources;
- the TIM Group's ability to achieve the expected return on the investments and capital expenditures it has made and continues to make in Italy, Brazil and other countries in which it operates;
- the amount and timing of any future impairment charges for the TIM Group's authorizations, goodwill or other assets;
- the TIM Group's ability to manage any business or operating model transformation plans;
- any difficulties which the TIM Group may encounter in its supply and procurement processes, including as a result of the insolvency or financial weaknesses of its suppliers;
- non-recurring events (see "*Management's Discussion and Analysis of Financial Condition and Results of Operation of the TIM Group*"); and
- the costs the TIM Group incurs due to unexpected events, in particular where its insurance is not sufficient to cover such costs.

The factors outlined above, individually or in the aggregate, could materially adversely impact the TIM Group's business, financial condition and results of operations. Accordingly, there can be no assurance that the business and strategic objectives identified by the TIM Group's management can effectively be attained in the manner and within the timeframes described. Furthermore, if the TIM Group is unable to attain its strategic priorities, or if a further deterioration of macroeconomic and geopolitical environments exacerbates financial market conditions in the form of

higher rates or wider credit spreads, and if the TIM Group is unable to sufficiently pass on any associated costs to its customers, its goodwill may be further impaired, which could result in significant write-offs.

The separation of NetCo from the TIM Group may be complex, could cause the TIM Group to incur unexpected uncertainties and costs.

In connection with the Transitional Services Agreement, the TIM Group on the Acquisition Closing Date will provide or procure certain transitional services to NetCo and NetCo will provide or procure certain transitional services to the TIM Group for a period of time sufficient to facilitate the transition to separate operations. For further information regarding the Transitional Services Agreement, please refer to "*Summary—The Transactions—Transitional Services Agreement*." Additionally, following the Transactions, the TIM Group will maintain access to NetCo's infrastructure through the Master Services Agreement. For further information regarding the Master Services Agreement, please refer to "*Summary—The Transactions—Master Services Agreement*." In light of these agreements, and based on their consequent contractual structures, the TIM Group could be subject to, among other things, (i) unexpected additional costs or adverse impacts on its business functions as a result of non-performance and/or underperformance by NetCo of its obligations under such agreements and/or (ii) potential liabilities during the period of the Master Services Agreement and the Transitional Services Agreement if it fails to deliver certain obligations to NetCo, each of which could adversely affect its business, financial condition and results of operations.

Following the successful completion of the Transactions, any deterioration of the relationship with, or in the financial condition of, NetCo could negatively impact the TIM Group's business, financial condition and results of operations.

In connection with the Transactions, the TIM Group will divest its ownership interest in NetCo. For further information, see "*Summary—The Transactions*." This divestment will transition the relationship between NetCo and the TIM Group into a new phase of commercial engagement. Pursuant to the Transaction Agreement, on the Acquisition Closing Date, the two parties will enter into the Master Services Agreement. For further information regarding the Master Services Agreement, please refer to "*Summary—The Transactions—Master Services Agreement*."

Pursuant to the Master Services Agreement, NetCo will, among other things, provide certain fixed-line wholesale access services to the TIM Group for an initial term of 15 years, with a renewal mechanism for an additional term. During such term, there can be no assurances that disputes will not arise between NetCo and the TIM Group. In the event of a dispute, any actions NetCo or the TIM Group could take, including the application of contractual penalties, to resolve the dispute could result in additional costs or lower revenues for the TIM Group. If a technological problem, such as any increase in traffic, a physical or cyber-attack or any other circumstances affecting the operations and reliability of NetCo's fixed-line network were to occur, the TIM Group would be unable to offer reliable and seamless fixed-line connectivity to its customers. This could in turn generate customer churn and materially and adversely affect the TIM Group's business, financial condition and results of operations.

As part of the Acquisition, TIM and NetCo will enter into the Master Services Agreement on the Acquisition Closing Date. A draft of the agreed form Master Services Agreement has been attached to the Transaction Agreement. However, it cannot be ruled out that changes to the language or content of the Master Services Agreement could be made in the future, including as required by applicable or regulation. Such amendments could affect the future business of the TIM Group, the Purchase Price and the pro forma financial information included in this Exchange Offer Memorandum, which have been calculated based on certain assumptions, including the economic conditions currently anticipated under the Master Services Agreement.

Following the successful completion of the Transactions, the TIM Group will acquire from NetCo certain fixed-line wholesale access services. Therefore, the TIM Group's costs and results of operations could be materially affected if NetCo, for any reason, fails to develop, maintain, repair, upgrade, protect and replace its existing fixed-line network in Italy in order to meet the needs of the TIM Group.

As part of the Transactions, the TIM Group will be transferring the NetCo Business to NetCo. Accordingly, following the successful completion of the Transactions, the TIM Group will continue to rely on the direct ownership of its mobile infrastructure, data centers, backbone and further equipment and infrastructure components that are not

included in the NetCo Business, but it will acquire fixed-line wholesale access services from NetCo to maintain its fixed offerings to its retail customers pursuant to the Master Services Agreement that the TIM Group and NetCo will enter into on the Acquisition Closing Date.

In the event NetCo (1) fails to develop, maintain, repair, upgrade, protect and replace its fixed-line network, (2) experiences a major disruption in its business, such as a strike, work stoppage or slowdown, a supply chain problem or a decrease in orders from other OLOs or (3) files for bankruptcy protection, the TIM Group's business, financial condition and results of operations could be materially adversely affected. Therefore, the loss of, or a significant reduction in, services offered by NetCo, the early termination of the Master Services Agreement, or other material operational or financial difficulties experienced by NetCo could materially adversely affect the TIM Group's business, financial condition and results of operations. For a detailed description of the risks associated with NetCo and its business, please see "*—Risks Related to NetCo*."

The TIM Group may be subject to increasing market competition.

Telecommunications operators have generally faced challenging market conditions in recent years, principally as a result of the decline in voice traffic and significant pricing pressures resulting from increased competition among operators.

Strong competition exists in all principal areas of the Italian telecommunications industry in which the TIM Group operates, particularly from other licensed operators ("**OLO**") in the consumer segment (as described in "*Business of the TIM Group*" and "*TIM Group Industry Overview*"). Competition may become even more acute in the coming years, with additional international operators accessing the Italian market. The Italian telecommunications market continues to have an intense level of competition which generates for the TIM Group risks of a reduction in market share and pressure on prices. In the fixed retail market, for example, the recent launch of Iliad has added an additional risk pressure to an already complex situation. In addition, potential consolidation between telecommunications operators in the Italian market could increase economies of scale for these telecommunication operators which could, in turn, lead to competitive pricing strategies that could have an impact to TIM Group's services and products.

In Brazil, the TIM Group faces competition throughout Brazil from many providers in the personal communications service ("**PCS**") market. The TIM Group also competes with providers of mobile telecommunication, voice over Internet protocol services ("**VoIP**") and landline telecommunications services, including from providers who bundle voice and data to its customers in a single offer. Due to this increasing competition, the TIM Group may incur higher advertising and commercial costs as it attempts to maintain or expand its market share. Other than the TIM Group, the following main competitors also hold authorizations to provide PCS with national coverage: Claro S.A., under the brand name "*Claro*" and Telefônica Brasil S.A., under the brand name "*Vivo*." Moreover, all PCS providers with national coverage offer third generation, or 3G, and fourth generation, or 4G, fifth generation, or 5G mobile telecommunications network technology, reducing differentiation amongst competitors. With the assets acquired from the Oi Movel S.A. by TIM, Vivo and Claro, the TIM Group believes that the likelihood of further consolidations in the Brazilian telecommunications market among the main competitors are remote, but if further consolidations driven by main competitors were to occur, those consolidations may favor their strategic advantage with increased market power and access to greater financial resources, thereby weakening the TIM Group's market position.

The TIM group also faces increased competition from other services outside the telecommunications industry. While technological changes, such as the development, roll out, and improvement of 4G and 5G mobile networks, may create new revenue streams, it also hinders traditional services and introduces additional sources of competition, for example, with services like VoLTE calls, messages and SMSs. These OTT communication apps are often free of charge (i.e. no subscription fee), accessible by smartphones and usually allow their users to have access to potentially unlimited messaging and voice services over the Internet, bypassing traditional and more profitable voice and messaging services. As a result, voice traffic is migrating to data. Offers from almost all competitors have started to include unlimited voice, thereby accelerating commoditization. Furthermore, very often OTT applications become so important to customers that they are bundled as zero-rated services, or OTT applications for which data usage is free. These and other factors, including the regulatory and tax asymmetry, are responsible for the increase in the competitive pressure are the TIM Group is facing in the mobile market. OTT application service providers also leverage existing infrastructures and generally do not operate capital-intensive business models associated with traditional mobile network operators like the TIM Group. Technological developments have led to significant improvements in the

services provided by OTT applications, particularly in speech quality delivered by data communications apps, thereby strengthening their positioning and relevance as competitors. In addition, providers with strong brand capability and financial strengths have turned their attention to the provision of OTT application services. In the long term, if non-traditional mobile voice and data services or similar services continue to increase to satisfy customers' needs and if the TIM Group is not able to address this competition, this could contribute to further declines in mobile MARPU as well as lower margins across many of products and services the TIM Group offers, thereby having a material adverse effect on its business, results of operations, financial condition and prospects. See "*—Continuing rapid changes in technologies could increase competition, reduce the usage of traditional services and require the TIM Group to make substantial additional investments*." The OTT service providers hold most of the content, the means to create it and the distribution channel. Together with these resources they dedicate themselves to creating new ways for their customers to interact with and consume content. As a result, it can be challenging for network operators, to design value-added services that are beneficial to customers. In addition to technological hurdles, the TIM Group may face other hurdles to offering value-added services, such as regulatory hurdles. Additionally, the TIM Group expects that the 3.5GHz rights that were acquired by regional providers may provide them with an opportunity to become mobile network operators. In addition, the new neutral network, which is proposed to be offered by Winity Telecom (the winner of the 700 MHz spectrum), may leverage mobile network capacity for ISPs, thereby allowing ISPs to extend their offerings to their current broadband customer base with bundle offerings, which may increase their competitive offering in the marketplace.

Given the current macroeconomic environment, the TIM Group is introducing price mechanisms for adjusting its offers to account for increased costs associated with the prevalent inflationary environment in which it operates in order to reduce the pressure on cash costs. Given the high level of competition in the market, there is the concrete risk that some competitors will not pursue price-based competition, resulting in the reduction of the TIM Group's market share and further pressure on price on the Retail market segment the TIM Group's core business is expanding to include innovative and convergent services and offers for fixed and mobile telecommunication, as well as television content. This expansion creates new opportunities and risks for the TIM Group, as it faces increased competition from providers of IT as well as OTT and other media platforms and devices. The telecommunications market is also experiencing consolidation and globalization, which may further intensify competition. See "*—Risks Related to Macroeconomic Conditions Affecting the TIM Group.*"

In addition, competition concerning innovative products and services in the TIM Group's Italian domestic mobile telephony and broadband and ultrabroadband businesses has led, and could further lead to:

- obsolescence of existing technologies and more rapid deployment of new technologies;
- an increase in costs and payback period related to investments in new technologies that are necessary to retain customers and market share; and
- difficulties in reducing debt and funding strategic and technological investments if the TIM Group cannot generate sufficient profits and cash flows.

In the Brazilian market, the competitive risks are represented by the rapid transition of the business model from traditional to more innovative services. Changes in the consumption profile of the customer base (voice-to-data migration) require operators to be quick to prepare their infrastructure and modernize their portfolios of products and services. In this context, the Brazil Business Unit could be impacted by the need for rapid development of technologies and infrastructures.

Competition in the TIM Group's principal lines of business has led, and could further lead, to:

- price and margin erosion for its traditional products and services;
- loss of market share in its core markets;
- loss of prospective customers; and
- greater difficulty in retaining existing customers.

Although the TIM Group continues to take steps to realize additional efficiencies and to rebalance its revenue mix through the continuous introduction of innovative and value-added services, if any or all of the events described above occur, the impact of such factors could have a material adverse effect on the results of operations and financial condition of the TIM Group.

Customer churn, or the threat of customer churn, may adversely affect the TIM Group's business.

The TIM Group is exposed to the risk of customer churn. Customer churn is a measure of the number of customers who stop subscribing for one or more of its products or services. Churn may arise mainly as a result of competitive influences, the relocation of clients outside of the TIM Group network area and price increases that the TIM Group may put in place. In addition, customer churn may also increase if the TIM Group is unable to deliver satisfactory services over its network or if its local and regional advertisement strategies are not effective. For example, any interruption of its services, including the removal of certain services, which may not be under its control, or other customer service problems, could contribute to an increase in customer churn or inhibit its goal of reducing customer churn. Any increase in customer churn could have a material impact on the TIM Group's business, financial condition and results of operations.

The TIM Group is subject to credit risk with respect to its customers.

The TIM Group's operations depend to a significant extent on the ability of its customers to pay for its services. In Brazil, under Anatel regulations, the TIM Group is allowed to undertake certain measures to reduce customer defaults, such as restricting or limiting the services the TIM Group provide to customers with a history of defaults, whereas in Italy such similar regulated protection has not been implemented yet. If the TIM Group is unable to undertake measures to limit payment defaults by its subscribers or that allow it to accept new subscribers based on credit history, the TIM Group will remain subject to outstanding uncollectible amounts, which could have an adverse effect on its business, financial condition and results of operations.

The assumptions used in estimating savings targets components and steps as well as expected business and regulatory benefits are forward-looking in nature.

In this Exchange Offer Memorandum, the TIM Group presents certain forward-looking savings targets that the TIM Group expects to realize pursuant to the Transformation Plan and certain forward-looking business and regulatory benefits that the TIM Group expects to realize as a result of the successful completion of the Transactions and the implementation of the Delayering Plan. The assumptions used in estimating total savings, including the components of such estimates, and the steps to be taken to realize such savings as well as and the assumptions used in estimating the timing and the expected business and regulatory benefits from as a result of the successful completion of the Transactions and the implementation of the Delayering Plan are forward-looking in nature, inherently uncertain and subject to a variety of business, economic and competitive risks and uncertainties. It cannot be guaranteed that the information on which the TIM Group has based its estimates and assumptions will not change or that the TIM Group will be able to realize the cost savings or benefits that it believes possible based on these management's estimates and assumptions. See "*Summary—The TIM Group's Strategy*."

The TIM Group may face difficulties responding to new telecommunications technologies.

The wireless telecommunications market is experiencing significant technological changes worldwide, as evidenced by the following, among other factors:

- ongoing improvements in the capacity and quality of digital technology available in Brazil;
- shorter time periods between the introduction of new telecommunication technologies and subsequent upgrades or replacements;
- the development of user interface, or UI, and user experience, or UX, technology;
- the development of customer behaviors, particularly the migration of services from voice to data, requiring new planning models and accelerating the evolution of communications to increasingly occur on IP networks;

- the development of cloud solutions to provide platform as a service (PaaS), software as a service (SaaS), or infrastructure as a service (IaaS), in order to drive down costs;
- voice over LTE, known as VoLTE, which increases significantly the quality of voice calls and allows companies to traffic voice as data through their 4G networks;
- the expansion of 5G DSS technology, matched with the simultaneous management of multiple layers of legacy technology, such as GSM, 3G (Switch Off in Italy in 2H 2022), and 4G through different spectrum bands, which involves managing the LTE radio access network ("**RAN**"), sharing agreement among the TIM Group and other companies, which creates specific demands on bandwidth and performance, and takes advantage of network virtualization, distributed cloud at the wireless edge, and allows multiple logical networks to run on top of a shared physical network infrastructure, known as network slicing, for traffic control in a service-based architecture;
- the recent acquisition of the 100 MHz frequency nationally in the 3.5 GHz band, in addition to 40 MHz blocks in the 2.3 GHz band in the South and Southeast regions of Brazil (excluding São Paulo);
- the deployment of a new technology in mobile network called 5G standalone ("**5G SA**"), which requires unprecedented levels of automation across an end-to-end network to fulfil the needs of new services and applications. The 5G SA network needs to be flexible, programmable and distributable in nature, so that it can provide the necessary flexibility to reduce time-to-market and provide the greatest performance and efficiency gains. As a result of the development of 5G SA, products and services supplied by different providers can be more greatly differentiated as between competitors, as 5G SA better enables the provision of custom services, including, for example, services with very high throughputs and/or very low latencies;
- the widespread implementation, in the near future, of Embedded Subscriber Identity Module (e-SIM), technology, which is a small microchip built into phones as an alternative to the conventional physical SIM card, and which will enable the TIM Group's customers to switch faster to other providers, thereby increasing competition;
- the expansion of the IoT technology in all of its forms and applications, requiring the creation of new platforms enabling its operation in new areas of the value chain. Ecosystem IoT strengthening with new partnerships, using connectivity as an enabler to increase productivity and expand the monetization of customer base; and
- the acceleration in the use of artificial intelligence, or AI, and machine learning, in order to use resources more efficiently, reduce spending and increase agility.

The TIM Group business may be negatively impacted by restrictions on customer access to mobile phone financing.

Like other operators in the telecommunication industry, the TIM Group bases part of its strategy for attracting and retaining customers on mobile phone financing offered to its subscribers. Should consumers' access to mobile phone financing be more limited or more costly, in the future, for example, as a result of adverse financial market conditions in light of current inflationary market conditions or in the event of a recession, or a re-emergence of the COVID-19 pandemic causing lenders to tighten lending standards for consumer financing, consumers may be unable or unwilling to finance the purchase of handsets and other hardware from the TIM Group and so may delay their purchase of TIM Group's products or services, negatively impacting its sales, growth capacity and the generation of cash to cover the TIM Group's financial obligations.

Increasing data security requirements by financial institutions, certain other corporate customers and governmental entities may adversely affect the TIM Group's business and profitability.

The TIM Group is a provider of fixed-line and mobile retail services to a number of public and private financial institutions, government entities and corporate customers with data security requirements. These customers may continue to increase their data security requirements, and the TIM Group may be required to undertake additional investments in order to adhere to these enhanced data security requirements, such as by, for example, enhanced

encryption requirements, as well as evolving statutory and regulatory requirements, including obtaining and maintaining certain ISO certifications, improving access rights management systems and developing a corporate data encryption infrastructure. As a result, the TIM Group may incur additional capital expenditures to satisfy its data security requirements. These customers could be unsatisfied with the TIM Group's enhanced data security requirements and could terminate their contracts with the TIM Group. Such terminations could have a material adverse effect on the TIM Group's business, financial condition and results of operations.

The TIM Group depends on data centers operated by third parties and third-party cloud computing platforms, and any disruption in the operation of these facilities or platforms or access to the Internet would adversely affect the TIM Group's business.

The TIM Group's business requires the ongoing availability and uninterrupted operation of internal and external systems and services. The TIM Group has adopted new technology infrastructure solutions, which carries with it some risk to business continuity. With the adoption of cloud computing technology, key IT systems are being migrated to the public cloud. Despite cloud computing reducing some risks, such as delays in the supply of equipment by suppliers (like spare parts, servers, etc.), the adoption of cloud computing means that the control and responsibilities for the proper functioning of the systems are shared between the TIM Group and the third parties. In all cases the third parties will be responsible for the physical infrastructure, connectivity, energy supply, cooling and all the capabilities related to infrastructure availability. Depending of the cloud service type involved for any specific system (*e.g.*, for IaaS, PaaS, SaaS), other capabilities will be the responsibility of the third party, according to the principles of the shared responsibility model defined by the Cloud Security Alliance, and incorporated into TIM Group's contracts with the third-party providers These third-party providers may experience connectivity disruption, outages and other performance problems, which may be caused by a variety of factors, including infrastructure changes, human or software errors, viruses, security attacks, fraud, spikes in customer usage and denial of service issues. As such, the TIM Group's success also depends directly on the continuity of the provision of computing capacity and the availability of connectivity between the cloud computing provider's data centers, including the connectivity with the TIM Group's data centers and internal networks. An intermittent failure or complete lack of connectivity or system availability, may cause interruption to the TIM Group's services, affecting its availability indicators as well as its revenue and reputation. Having data hosted on a public cloud also poses a risk to the TIM Group's ability to comply with data protection principles or law (such as the GDPR and LGPD (defined below)). As such, the TIM Group's success depends on its ability to certify that cloud providers are adopting security best practices, as well as complying with the terms of data protection laws in accordance with its contractually agreed terms.

The TIM Group may be subject to liability related to outsourcing certain functions to third-party service providers.

The TIM Group may be exposed to contingent liabilities due to outsourcing of certain functions to third-party service providers. For example, following the Transactions, the TIM Group will acquire fixed-line wholesale access services from NetCo to maintain its fixed offerings to its retail customers. See "*Summary—The Transactions*." Such potential liabilities may involve claims by third-party providers who claim that they are treated as direct employees as well as claims for secondary liability resulting from workplace injury, wage parity and overtime pay complaints. The TIM Group's financial condition and results of operation may be adversely affected in the event that a material portion of these liabilities are decided against it. In Brazil, the Supreme Court has declared the outsourcing of any company's main activities as legal, which indicates a probable favorable outcome regarding the matter. Regardless of the decision in Supreme Court, the TIM Group would be jointly liable with the service provider in connection with any violation of labor obligations related to the outsourced workers. If the contracting of third-party services is considered to involve the main activities of the company, it may be characterized as a direct employment, which would significantly increase the TIM Group's costs and as a result the TIM Group may be subject to administrative proceedings by the relevant labor authorities and may be required to pay fines to the third-party service providers. See also "*—Risks Related to the TIM Group's Business Activity and Industry—Following the successful completion of the Transactions, the TIM Group will acquire from NetCo certain fixed-line wholesale access services. Therefore, the TIM Group's costs and results of operations could be materially affected if NetCo, for any reason, fails to develop, maintain, repair, upgrade, protect and replace its existing fixed-line network in Italy in order to meet the needs of the TIM Group*."

The TIM Group relies on certain third parties to provide services to its customers and to support its operations. Any delay or failure by such third parties to provide their services or products, any increase in the prices they charge

the TIM Group or any decision not to renew their contracts with the TIM Group could cause delay or interruptions in its operations, which could damage its reputation and result in the loss of revenue and/or customers.

The TIM Group has important relationships with several suppliers of hardware, software and services that it uses to operate its network and systems and provide customer service. Further, it relies on various vendors to supply network equipment, mobile handsets and accessories necessary for its business It also uses many suppliers, particularly in relation to smartphones suppliers, software licenses providers and for deploying mobile telecommunications network. To achieve the transmission capacity and quality levels needed for its growing number of subscribers and their changing requirements, the TIM Group relies partly on electronic communications networks belonging to other operators and networks rolled out by certain local authorities, such as Fastweb, Open Fiber, A2A. In addition, following the Transactions, the TIM Group will acquire fixed-line wholesale access services from NetCo to maintain its fixed offerings to its retail customers. See also "*—Following the successful completion of the Transactions, the TIM Group will acquire from NetCo certain fixed-line wholesale access services. Therefore, the TIM Group's costs and results of operations could be materially affected if NetCo, for any reason, fails to develop, maintain, repair, upgrade, protect and replace its existing fixed-line network in Italy in order to meet the needs of the TIM Group*."

The TIM Group's primary suppliers are involved in the provision and deployment of fixed-line and mobile telecommunications network as well as the supply of mass-market product, such as smart devices and software licenses. Even though there are no constraints on the TIM Group in substituting these suppliers with other providers, any changes in macroeconomic conditions affecting the TIM Group or any other factors described in the "*Risk Factors—Risk Factors Related to the TIM Group*" section, individually or in the aggregate, could limit the TIM Group's ability to renew its existing contracts or substitute these suppliers with other providers on commercially reasonable terms, if at all. This could have a material adverse effect on the TIM Group's business, financial condition and results of operations.

One or more of the suppliers of the TIM Group may not be able to supply the products and/or services concerned. This could affect the TIM Group's ability to fully control its networks, offer high quality services and conduct its operations, or could lead to additional costs, each of which could have a material adverse impact on the TIM Group's business, financial condition and results of operations.

The TIM Group also hires a number of subcontractors to maintain its network, operate its call centers and supply, install and maintain the terminals set up at its customers' homes. Even if the TIM Group works with a limited number of subcontractors which it carefully selects and closely monitors, it cannot guarantee that their tasks are properly carried out and fully compliant with the quality and safety standards it requires or that they tasks will not be further assigned to other third-party contractors. In the event that hardware or software products or related services from or by third-party contractors are defective, or if the tasks assigned to its subcontractors are not properly carried out, it may be difficult or impossible to enforce recourse claims against suppliers or subcontractors, especially if warranties included in contracts with suppliers or subcontractors are exceeded by those in the TIM Group's contracts with customers, in individual cases, or if the suppliers or subcontractors are insolvent, in whole or in part. In addition, this would damage the TIM Group's relationships with its customers and the reputation of its brands.

There can be no assurance that the TIM Group will be able to obtain the hardware, software and services it needs for the operation of its business, in a timely manner, on competitive terms and in adequate amounts, or at all. The occurrence of any of these risks may create technical problems, damage its reputation, result in the loss of customers and have a material adverse effect on its business, financial condition and results of operations.

Additionally, the TIM Group has entered into long-term contracts for television content distribution that commit it to paying a guaranteed minimum amount to the counterparties. The evaluation of these contracts and the estimate of the costs associated with them, are subject to a number of risks and uncertainties which include, among others, market dynamics, decisions of the market regulatory authorities and the development of new technologies to support the services. These estimates are periodically reviewed on the basis of actual data in order to ensure that the forecast data remain within reasonably predictable ranges. In the past, the TIM Group has faced risks relating to its internal control procedures with respect to complex contracts and it may face similar risks in the future. For example, in the year ended December 31, 2023, the TIM Group recorded significant provisions for contractual risks for onerous contracts. See Note 22 to the 2023 TIM Audited Consolidated Financial Statements for further information. Not all of the factors mentioned are under the TIM Group's control could therefore have a significant impact on future forecasts regarding

the performance of the contracts, the estimated margin amount (positive or negative) and/or the cash flows that will be generated.

Continuing rapid changes in technologies could increase competition, reduce the usage of traditional services and require the TIM Group to make substantial additional investments.

The TIM Group, like other operators, faces increasing competition from non-traditional data services with respect to new voice and messaging OTT technologies, in particular OTT applications such as Skype, FaceTime, Messenger and WhatsApp. These applications are often free of charge, other than charges for data usage, and are accessible via smartphones, tablets and computers. These applications provide users with potentially unlimited access to messaging and voice services over the Internet, bypassing more expensive traditional voice and messaging services, such as SMS, which have historically been a source of significant revenues for mobile network operators like the TIM Group. In Italy and Brazil, an increasing number of customers are using OTT applications services instead of traditional voice and SMS communications.

Historically, the TIM Group has generated a substantial portion of its revenues from voice and SMS services, particularly in its mobile business in Italy, and the substitution of data services for these traditional voice and SMS volumes has had, and could continue to have, a negative impact on the TIM Group’s operating results and financial position.

If non-traditional voice and messaging data services continue to increase to satisfy customers’ needs and the TIM Group is unable to address such competition, its ARPU could decline and the TIM Group would face lower margins across many of its products and services, resulting in a material adverse effect on the TIM Group’s operating results and financial position.

Changes in competitive offerings for content, including the potential rapid adoption of piracy-based video offerings, could adversely impact the TIM Group’s business.

The market for content is intensely competitive and subject to rapid change. Through new and existing distribution channels, consumers have increasing options to access entertainment video, sports and other content. The various economic models underlying these channels include subscription, transactional, ad-supported and piracy-based models. All of these have the potential to capture meaningful segments of the content market. Piracy, in particular, threatens to damage the TIM Group’s business, as its fundamental proposition to consumers is so compelling and difficult to compete against: virtually all content for free. Furthermore, in light of the compelling consumer proposition, piracy services are subject to rapid global growth. Traditional providers of content, including broadcasters, as well as Internet-based e-commerce or content providers are increasing their Internet based offerings. Several of these competitors have long operating histories, large customer bases, strong brand recognition and significant financial, marketing and other resources. They may secure better terms from suppliers, adopt more aggressive pricing and devote more resources to product development, technology, infrastructure, content acquisitions and marketing. New entrants may enter the market or existing providers may adjust their services with unique offerings or approaches to providing content. Companies also may enter into business combinations or alliances that strengthen their competitive positions. If the TIM Group is unable to successfully or profitably compete with current and new competitors, its business will be adversely affected, and it may not be able to increase or maintain its market shares, revenues and/or profitability.

The TIM Group may be adversely affected if it fails to successfully implement its Internet and 4.5G/5G Next Generation Mobile Networks strategy.

With the continuing development of Internet and broadband services, and due to the use of public funds linked to NRRP, the TIM Group aims to increase the use of its networks to offset the continuing decline of traditional voice services. However, the TIM Group’s ability to successfully implement this strategy may be negatively affected if:

- broadband mobile coverage does not grow as the TIM Group expects;
- competition grows to include players from adjacent markets or technological developments introducing new platforms for Internet access and/or Internet distribution;

- the TIM Group is unable to provide superior broadband connections and broadband/mobile services relative to its competitors;
- delays in obtaining the necessary permits, concessions and authorizations (including spectrum concessions and any required permits in relation to environmental, urbanistic, building permits, expropriation, zoning and fire prevention matters) occur or the TIM Group's is unable to ensure continued compliance with the requirements set forth by such permits;
- delays in the procurement of materials and devices occur due to possible supply shocks;
- the TIM Group experiences network interruptions or related capacity problems with network infrastructure; or
- the TIM Group is unable to obtain adequate returns from the investments related to its network development.

In addition, the implementation of 4.5G/5G technologies is dependent on a number of factors, including the availability and selection of cutting-edge technology from the TIM Group's network/platforms and device vendors. If the TIM Group fails to achieve its objectives for the implementation of 4G/5G coverage in a timely manner, or at all, it may lose market share to its competitors in this strategically important segment.

Any of the above factors may adversely affect the successful implementation of the TIM Group's strategy and, accordingly, the TIM Group's business, financial condition and results of operations. In particular, any delays in NRRP tenders or related activities are subject to predetermined penalties, which could be significant and, could result in the overall revocation of the grant awarded to the TIM Group.

The TIM Group's business may be adversely affected if it fails to successfully implement its ICT strategy.

The TIM Group intends to continue focusing on information technology-telecommunication ("**IT-TLC**") convergence by addressing the ICT market, offering network and infrastructure management, as well as application management. In particular, as the market for cloud services continues to grow, the ICT market is expected to become a key element of its strategy.

For this reason, the National Strategic Hub (*Polo Strategico Nazionale)*, in which the TIM Group holds a 45% equity interest, was recently established, dealing with the design, preparation, fitting out and management of infrastructure for the supply of cloud services and solutions for Italian local and national public administrations.

TIM anticipates that the competition in this market will intensify as new players, particularly telecommunications operators collaborating with IT operators, enter the market. See "*—The TIM Group may be subject to increasing market competition*."

The TIM Group's business may be adversely affected if it fails to successfully implement its ultrabroadband mobile access network strategy.

One of the TIM Group's goals is to accelerate the roll out of a new telecommunications network capable of providing customers with ultrabroadband connections, also thanks to the use of public funds linked to the NRRP in the regions where the TIM Group has won the tender.

However, the implementation of ultrabroadband technologies is dependent on a number of factors, including:

- delays in receiving the necessary permissions and authorizations for installation of lines;
- delay in supplying of material and devices due to possible supply chain shocks; and
- increase in transport, raw materials and labor cost of network companies due to inflationary pressures and increase in energy costs (see "*—Risks related to Macroeconomic Conditions Affecting the TIM Group*").

If the TIM Group fails to achieve its objectives for the implementation of ultrabroadband coverage promptly, or at all, the TIM Group may lose market share to its competitors in this strategically important segment, which may adversely impact the TIM Group's operating results and financial position.

Delays in NRRP tenders or in completing roll outs are subject to predetermined penalties, which can be significant and could result in the overall revocation of the awarded grant.

The TIM Group's business depends on upgrading its existing networks.

The TIM Group must continue to maintain, improve and upgrade its existing mobile networks in Italy and Brazil, in a timely and satisfactory manner to retain and expand its customer base in each of its markets. A reliable and high-quality network is necessary to manage turnover by sustaining its customer base, maintaining strong customer brands and reputation and satisfying regulatory requirements, including minimum service requirements. The maintenance and improvement of the TIM Group's existing networks depends on its ability to:

- upgrade the functionality of its networks to offer increasingly customized services to its customers;
- increase coverage in some of its markets;
- expand and optimize customer service, network management and administrative systems;
- expand the capacity of its existing mobile networks to cope with increased bandwidth usage; and
- upgrade older systems and networks to adapt them to new technologies and enhance architecture.

In addition, due to rapid changes in the telecommunications industry, the TIM Group's network investments may prove to be inadequate or may be superseded by new technological changes. Its network investments may also be limited by market uptake and customer acceptance. If the TIM Group fails to make adequate capital expenditures or investments, or to properly and efficiently allocate such expenditures or investments, the performance of its networks could suffer, resulting in lower customer satisfaction, diminution of brand strength and increased turnover.

Many of these factors are not entirely under the TIM Group's control and may be affected by, among other things, applicable regulation. If the TIM Group fails to maintain, improve or upgrade its networks, its services and products may be less attractive to new customers and it may lose existing customers to competitors.

The TIM Group's capital expenditures may not generate a positive return.

The businesses in which the TIM Group operates, even after the completion of the Transactions, are capital intensive. See "*—The TIM Group's business depends on upgrading its existing networks*." Significant capital expenditures are required to add customers to its networks, including expenditures for equipment and labor costs as well as for the acquisition and extension of various operating licenses. The TIM Group employs a proactive capital expenditure strategy aimed at supporting its business as a telecommunications operator (*e.g.*, rolling out mobile networks and purchasing spectrum in the markets) and establishing its commercial presence (through physical stores). The TIM Group's strategy is also designed to enhance its subscriber relations (by communicating through all media including video calls and virtual assistance) and to develop new products and services. However, it cannot be assured that the TIM Group's future upgrades will generate a positive return or that the TIM Group will have adequate capital available or will be able to access debt financing on commercially reasonable terms, if at all, to finance such future upgrades. Mobile network rollouts in Italy and Brazil remain the TIM Group's largest priority. If the TIM Group is unable to, or elects not to, pay for costs associated with expanding or upgrading its mobile network or making other planned or unplanned capital expenditures, this could have a material adverse on the TIM Group's business, financial condition and results of operations. The TIM Group has based its estimates on assumptions that may prove to be inaccurate, and it could use its capital resources sooner than it currently expects, or its business plan may change as a result of a number of factors currently unknown to it.

The TIM Group's business may be affected by an unpredictable instant increase of traffic.

Unpredictable instant and massive increases of traffic due to, for example, live video events broadcasted over the IP network from an OTT and/or CSP could materially affect the TIM Group's overall mobile network performance, causing slowdowns or momentary blockages of communications with consequences on reputation and customer satisfaction.

System and network failures could result in reduced user traffic and reduced revenue and could harm the TIM Group's reputation.

The TIM Group's success largely depends on the continued and uninterrupted performance of its IT, network systems and of certain hardware and data centers that it manages for its clients. In addition, the TIM Group's operations involve daily processing and storage of large amounts of customer data and require uninterrupted, accurate, permanently available, real-time and safe transmission and storage of customer and other data in compliance with applicable laws and regulations.

The TIM Group's technical infrastructure, including its network infrastructure for mobile telecommunications services, and the assets managed on behalf of clients, are vulnerable to damage or interruption from technology failures, power loss, floods, windstorms, heatwaves, fires, terrorism, intentional wrongdoing, human error and similar events. Unanticipated problems at the TIM Group's facilities, system failures, hardware and software failures, computer viruses and cyber-attacks (including information theft, data corruption, operational disruption or financial loss associated with the foregoing) and data leakage, as well as terrorist attacks against its infrastructure could affect the quality of its services and cause service interruptions. Any of these occurrences could result in reduced user traffic and reduced revenue and could negatively affect the TIM Group's levels of customer satisfaction, reduce its customer base and harm its reputation.

The TIM Group has implemented processes of vulnerability analysis, development of technical protection solutions, optimization of capital allocation on technical investments and partial financial transfer of risk to the insurance market in order to seek to address the risks described above but there can be no assurance such measures will be sufficient.

The TIM Group's businesses are subject to cybersecurity risks.

Cybersecurity risks are among the most relevant risks for the TIM Group due to the central role of IT in its operations.

Despite efforts to modernize its network and replace outdated systems, the TIM Group's networks and systems are vulnerable to security threats, including cyber-attacks from internal and external sources. The cyber security attacks may be committed third parties operating in any region, including jurisdictions where law enforcement measures to address such attacks are unavailable or ineffective. These attacks can disrupt service availability and compromise data, posing a significant risk to the TIM Group's reputation as a provider of critical national infrastructure. The TIM Group works to prevent and limit the impact of cyber-attacks, but an absolute protection cannot be guaranteed. However, the TIM Group or its third-party providers and other contractors cannot assure that they will be successful in protecting customers' personal data and other data that is stored on the TIM Group system and their systems.

To address these risks, the TIM Group must continue to identify and address technical vulnerabilities and weaknesses in its processes and enhance its ability to detect and respond to incidents. This includes strengthening security in the supply chain and ensuring the security of cloud services. The TIM Group has adopted ISO 27001 standard best practices and certified in November 2022. The TIM Group has also strengthened security measures related to remote access and teleworking in response to the COVID-19 pandemic and the Russia-Ukraine conflict.

Moreover, in order to prevent any impacts and in line with the provisions of the National Cyber Security Perimeter (NCSP – *Perimetro di Sicurezza Cibernetica Nazionale*), the TIM Group was requested by the Computer Security Incident Response Team (a structure set up at the *Agenzia per la Cyber Sicurezza Nazionale*, which among other things, issues early warnings, cyber bulletins and disseminates information to interested parties regarding cyber risks) to raise the level of attention, adopting as a priority some mitigation actions including:

- verification of the consistency and offline availability of the backups necessary for the recovery of the core business services in particular;
- increase in monitoring and logging activities;
- creation, updating, maintenance and periodic exercise of incident response capabilities, business continuity and resilience plans;
- availability of key personnel;
- particular attention to cloud environments;
- prioritization of patching activities;
- monitor service and administration accounts for anomalous activity;
- network traffic monitoring to analyze anomalous peaks; and
- increasing the ability to protect e-mail infrastructures against spear-phishing activities.

Furthermore, in order to partially mitigate any economic-financial impact deriving from cyber-attacks, the TIM Group has structured a specific financial risk transfer policy through dedicated insurance coverage.

The inability to operate the TIM Group networks and systems as a result of cyber-attacks, even for a limited period of time, may result in significant expenses and a loss of market share to other communications providers. The costs associated with a major cyber-attack could include expensive incentives offered to existing customers and business partners to retain their business, increased expenditures on cyber-security measures and the use of alternate resources, lost revenues from business interruption and litigation. A major security incident or business interruption, or non-compliance with applicable laws and regulations (including those establishing the NCSP) could result in financial loss, reputational damage, market share loss and regulatory sanctions. Further, as cyber-attacks continue to evolve, and also in light of any further obligation imposed on the TIM Group as a result of its inclusion in the NCSP, the TIM Group may incur significant costs in the attempt to modify or enhance the TIM Group's protective measures or investigate or remediate any vulnerability. Any loss of confidential or proprietary data through a breach could have a material adverse effect on the TIM Group's business, financial condition, results of operations and prospects. Pursuant to the applicable data protection regulations, if a significant or widely publicized unlawful disclosure of employee or customer data were to occur, whether as a result of a failure of the TIM Group's information technology security systems, employee negligence or the actions of its vendors, the TIM Group may be subject to legal claims by individuals, fines or other enforcement action. *See* "*—The TIM Group's activities could be materially negatively affected by failure to comply with GDPR and Italian Privacy Code*."

Future partnerships or joint ventures that the TIM Group enters into may not bring the expected financial results and could cause harm to its image as well as financial costs.

The TIM Group may enter into relationships with other businesses in order to expand the TIM Group's platform, which could involve preferred or exclusive licenses, additional channels of distribution, or discount pricing or investments in other companies. Negotiating these transactions can be time-consuming, difficult and expensive, and the TIM Group's ability to close these transactions may be subject to third-party approvals, such as government regulatory approvals, which are beyond its control. Consequently, the TIM Group can make no assurance that these transactions, once undertaken and/or announced, will close.

Furthermore, the TIM Group's established partnerships are subject to common litigation risks and the TIM Group can make no assurance that these established partnerships or future partnerships will not become involved in any type of dispute. The TIM Group may also be required to initiate litigation to protect its interests.

The TIM Group has entered and may enter into strategic transactions, such as acquisitions, investments or dispositions, involving unforeseen risks, and it may not realize the financial and strategic goals that were

contemplated at the time of any transaction and, additionally, there are risks associated with the integration of any acquisitions.

As part of TIM Group's business strategy, it pursues strategic and opportunistic acquisitions, investments and dispositions, including the Transactions, any of which could be material to its financial condition or results of operations. The TIM Group cannot guarantee that it will be able to continue making such acquisitions, investments and dispositions and its ability to enter into these transactions may be limited by many factors, including availability of financing, complex ownership structures among potential targets and government regulation and competition from other potential acquirers. In addition, if the purchase price is paid in cash, it will reduce the TIM Group's cash reserves. Further, the TIM Group's debt burden may increase if it borrows funds to finance any future acquisition or investments, which could have a negative impact on its cash flows and its ability to finance its overall operations and make cash interest payments on its outstanding indebtedness. Even if the TIM Group is successful in acquiring new businesses or disposing existing business, the integration of such businesses may prove to be more difficult than it initially anticipated and could create unforeseen operating difficulties and expenditures. For example, in 2022, the TIM Group acquired Oi, which it expects will add strategic value to the TIM Group's portfolio of businesses. However, the TIM Group cannot assure that any benefits will materialize, and it may suffer losses in connection to the used funds and to the opportunity costs related to such transactions.

Additionally, acquisitions and investments pose certain risks, such as (i) identifying acquisition, partnership and joint venture targets, competition from competitors targeting the same acquisition or investment, difficulties or delays in consolidating operations and achieving anticipated synergies, cost savings, revenues and cash flow enhancements, growth, operational efficiencies and other benefits (ii) diversion of managerial resources away from its day-to-day business operations and (iii) potentially dilutive issuances of equity securities to the extent that it issues new shares to fund an acquisition; and the assumption of unexpected liabilities and undisclosed risks.

Furthermore, certain contracts of the TIM Group contain "change of control" provisions that require the acquired or acquiring company to notify the counterparty of a potential change of control, or contain language that could be interpreted as allowing, subject to certain conditions, the counterparty to terminate the contract. If a substantial number of these contracts are or will be terminated as a result of a potential acquisition or disposition, the TIM Group may be forced to enter into new contracts on less favorable terms, or it may be unable to secure replacements. While the TIM Group strives to mitigate unexpected liabilities and risks through contractual protections in its acquisition and disposition documentation, it cannot ensure that such protections will be effective. If the TIM Group enters into an acquisition or disposition agreement, but the acquisition or disposition is not consummated, the TIM Group may be liable for break-up fees or other payments, which may be material.

Goodwill impairments may be required in relation to acquired businesses.

The TIM Group has recorded a significant amount of goodwill. As of December 31, 2023, after giving *pro forma* effect to the Transactions, its total goodwill, which represents the excess of the cost of acquisitions over interest in the net fair value of the assets acquired and liabilities and contingent liabilities assumed, amounted to €11,467 million, representing 23.5% of its total assets. The TIM Unaudited Pro Forma Financial Information does not reflect the final attribution of goodwill by the TIM Group to the NetCo Business, following the application of the applicable IFRS accounting principles, such as IAS 36 (Impairment of Assets), at the Acquisition Closing Date and after the final determination of the relative values of the business disposed of and the portion of the cash generating unit retained (or other method to better reflect the goodwill associated with the operation disposed of). Additionally, the TIM Group has made business acquisitions in the past and may make further acquisitions in the future. See "*—The TIM Group has entered and may enter into strategic transactions, such as acquisitions, investments or dispositions, involving unforeseen risks, and it may not realize the financial and strategic goals that were contemplated at the time of any transaction and, additionally, there are risks associated with the integration of any acquisitions.*" It is possible that the goodwill which has been attributed, or may be attributed, to these businesses may have to be written down if the valuation assumptions are required to be reassessed as a result of any deterioration in the underlying profitability, asset quality and other relevant matters of the businesses. According to the relevant IFRS accounting standard, impairment testing in respect of goodwill is performed annually, or more frequently if there are impairment indicators present, and comprises a comparison of the carrying amount of the cash-generating unit with its recoverable amount. Accordingly, there can be no assurances that the TIM Group will not have to write down the value attributed to goodwill in the future, which would adversely affect its results and net assets.

The TIM Group is dependent on intellectual property rights, particularly trademarks, logos and domain names, and inadequate protection of its intellectual property rights, or intellectual property rights litigation, could adversely affect its business.

The TIM Group relies on its trade names, trademarks, logos, domain names, copyrights, patents and trade secrets, as well as licenses and other agreements with its vendors and other parties, to use its technologies, conduct its operations and sell its products and services. The TIM Group relies upon a combination of copyright, trademark and patent laws to establish and protect its intellectual property rights, but it cannot be assured that the actions the TIM Group has taken or will take in the future will be adequate to prevent violation of its proprietary rights. The TIM Group cannot assure that measures taken in Italy, Brazil and elsewhere to protect its intellectual property rights, particularly its trademarks, logos and domain names, will be effective or that third parties will not infringe or misappropriate its intellectual property rights. There can be no assurance that litigation will not be necessary to enforce its trademark or proprietary rights, such litigation may be costly, and could ultimately be unsuccessful in enforcing its intellectual property rights. Any of these factors could have a material impact on the TIM Group's business, financial condition and results of operations.

The TIM Group operates in an industry characterized by frequent disputes over intellectual property. Its competitors may engage in hostile intellectual property action. Given the evolving high-tech nature of its business, the TIM Group has set up mechanisms to comply with all intellectual property laws to which it is subject, but there can be no assurance that the TIM Group is not infringing, or will not infringe, the intellectual property rights of third parties. As the number of convergent product offerings and overlapping product functions increase, the possibility of intellectual property infringement claims against it may correspondingly increase. Any such claims or lawsuits, whether with or without merit, could be expensive and time consuming to defend, could cause the TIM Group to cease offering its licensing services and products that incorporate the challenged intellectual property, or could require it to develop non-infringing products or services, if feasible, which could divert the attention and resources of technical and management personnel as well as substantial capital resources. In addition, it cannot be guaranteed that the TIM Group will prevail in any litigation related to infringement claims against it. A successful claim of infringement against the TIM Group could result in a requirement to pay significant damages, cease the development or sale of certain products and services that incorporate the challenged intellectual property, obtain licenses from the holders of such intellectual property, which may not be available on commercially reasonable terms, or otherwise redesign those products to avoid infringing upon others' intellectual property rights.

The complexity of the TIM Group's governance structure could influence, delay or hinder strategic and management decisions.

The TIM Group's governance structure is complex, in part due to the large diffusion of its shareholding which is subject to continuous change. As a result of this complexity, it is possible that the TIM Group's strategic and management decisions could be influenced, challenged, delayed or hindered, which may adversely affect its operating results and financial condition. See "*Business* of *the TIM Group—Legal Proceedings and Disputes*" for further information.

As of December 31, 2023, the largest shareholders in TIM are Vivendi and Cassa Depositi e Prestiti S.p.A., which hold 23.75% and 9.81%, respectively, of TIM's outstanding ordinary shares.

Failure to meet stakeholders' Environmental, Social and Governance ("ESG") expectations as well as increasing ESG regulatory requirements, may lead to reputational loss, loss of business or limit access to sustainable finance as well as to the imposition of fines and other regulatory constraints. Operational and financial costs and cost of capital associated with enhancing ESG performance may be significant.

The TIM Group's operations and value chain have negative environmental impacts, in particular in terms of greenhouse gas ("**GHG**") emissions and of electronic waste ("**e-waste**"). The majority of the TIM Group's GHG emissions are generated in the supply chain, while e-waste is primarily associated with end of life of mobile devices, routers and network equipment.

The TIM Group is subject to increasing requirements and expectations from its stakeholders to manage these negative impacts. There is also increasing regulatory and self-regulatory pressure worldwide in relation to areas such as energy

efficiency in data centers and extending the lifetime of electronic devices. Compliance with such requirements may lead to increased operational and financial costs and cost of capital for the TIM Group.

The TIM Group has set itself the goal of becoming carbon-neutral by 2030, also due to a commitment to purchase 100% renewable energy by 2025.

Furthermore, the TIM Group has committed to achieve net zero emissions by 2040 and to reach a 47% reduction in the emissions of its value chain (Scope 3) relating to the purchase of goods and services, the purchase of capital goods and the use of products sold to customers.

The worsening of climate change increases the likelihood and severity of extreme weather events such as heat waves, floods and windstorms which may cause severe disruptions to telecommunications and ICT services, reduce the work efficiency (hours actually worked), have a consequential impact on the TIM Group's business. More extreme weather may also drive the need for additional investments in cooling technology and other more resilient infrastructure; the risk that external environmental condition can pose for business continuity could increase the weighted average cost of capital (WACC). Failure to implement circular business models such as offering of products and services designed with eco-sustainable criteria or the use of recyclable materials may lead to lost opportunities for cost savings and a failure to realize additional revenues. Increasing electricity prices, the availability of renewable energy certificates or the possible introduction of carbon taxation could also increase operational costs for the TIM Group.

Moreover, there is a global trend towards ESG-related financial disclosure. Several number of countries have established mandatory disclosure regimes and/or set timelines for the implementation of legislation regarding mandatory climate, social and governance related disclosure requirements. For example, the European Commission has established a number of sustainability-related reporting and compliance regimes, including the Non-Financial Reporting Directive and the Corporate Sustainability Reporting Directive, which will enhance the scope and reporting requirements under the Non-Financial Reporting Directive, as well as proposals for new regulatory regimes that are aimed at, for example, prohibiting corporates from placing or making available on the EU market or exporting from the EU market products made with forced labor; requiring companies to identify, prevent, bring to an end, mitigate and account for adverse human rights and environmental impacts in operations, subsidiaries and value chains; and enhancing gender pay reporting requirements. The sustainability reporting shall comply with the EU Sustainability Reporting Standards ("**ESRS**"), which will increase mandatory reporting requirements. The ESRS will require to disclose information aligned with the EU Taxonomy (2020/852/EU) as well as climate-related information in line with the recommendations of the Task Force on Climate-Related Disclosure. Potentially, the failure to adopt criteria aligned to the EU legislation on Taxonomy could have impacts also on the sources of financing.

Failure to meet regulatory and stakeholders' requirements or expectations regarding ESG topics may lead to reputational loss, loss of business or limit access to sustainable finance as well as to the imposition of fines and other regulatory constraints. Increasing electricity prices, the availability of renewable energy certificates or the possible introduction of carbon taxation could increase operational costs for the TIM Group.

For further information see "*Business of the TIM Group—Sustainability of the TIM Group*."

Failure to close the digital divide may adversely affect the TIM Group's business, financial condition and results of operations.

The digital divide represents a major obstacle to the spread of digitization and the related connectivity services with a risk due to the lack of correlation between the supply of advanced TLC products and services and the demand for traditional products/services.

The TIM Group is highly committed to promoting digital inclusion and has engaged in, among other things, NRRP tenders, such as those for Connected Schools and Digital Health or the National Strategic Hub project aimed at strengthening the digitalization of the Italian public administration services.

The TIM Group also focuses on digital identity services in Italy: more than five million active services between certified e-mail address ("**PEC**"), Digital Signature and Public Digital Identity System ("**SPID**") to allow citizens and businesses to access public administration's online services.

Failure to successfully implement the TIM Group's strategy to address the digital divide may lead to a reputational damage and revenue losses, which could adversely affect the TIM Group's business, financial condition and results of operations.

Any changes in the TIM Group's directorship and/or senior management could adversely affect the TIM Group's business.

The TIM Group may face difficulties in realizing its strategic goals, such as executing its 2024-2026 Industrial Plan, the Delayering Plan and the Transformation Plan alongside making necessary adjustments required following, and as a result of, the Transactions. Maintaining consistent directorship and leadership may ease the transition into this new business phase. However, any changes in the TIM Group's directorship and/or senior management could disrupt this continuity, potentially leading to delays, interruptions or deviations in the execution of the TIM Group's strategic plans.

It is currently expected that on April 23, 2024, the shareholders' meeting of TIM will convene to resolve, among others, on the appointment of a new board of directors of TIM (the "**New Board**"). There can be no assurance that the New Board will not face (i) hardships in executing the TIM Group's strategic plan and its various objectives and/or (ii) difficulties in operating the TIM Group's business following the completion of the Transactions. The New Board may be unable to effectively direct the new business or navigate through the goals and objectives of the 2024-2026 Industrial Plan and/or the Delayering Plan. If the New Board fails to implement or deviates from any aspect of the TIM Group's strategic plan, this could have a material adverse effect on the TIM Group's business, financial condition, results of operations and cash flows.

Failure to recruit, retain and engage skilled employees may adversely affect the achievement of strategic objectives.

The TIM Group's ability to attract and retain qualified, specialized and motivated personnel is a key success factor in the pursuit of strategic objectives and in maintaining customer satisfaction.

The demand and competition for talent in the ICT and cybersecurity sector is becoming increasingly challenging. In order to secure appropriate talent, the TIM Group needs to recruit, develop and retain highly skilled employees. Failure to recruit, develop and retain necessary skilled employees may impact the TIM Group's ability to develop new or high growth business areas and thereby deliver on the strategic objectives set out in the Strategic Plan.

Risks Related to Macroeconomic Conditions Affecting the TIM Group

The TIM Group operates in multiple jurisdictions and is exposed to a variety of macroeconomic factors, which may impact its operating results and financial position.

The TIM Group's international presence enables the diversification of its activities across various countries, but it also exposes the TIM Group to diverse legislation, as well as to the political developments and economic environments of the countries in which it operates. Any adverse developments in this regard, particularly in the key markets in which the TIM Group operates (Italy and Brazil) including exchange rate or sovereign-risk fluctuations, as well as growing geopolitical tensions, may adversely affect the TIM Group's operating results and financial condition and/or may hinder the TIM Group's cost saving objectives set out in the Strategic Plan.

Fluctuations in currency exchange and interest rates and the performance of, or any adverse changes in, the financial markets in general may adversely affect the TIM Group's results.

In the past, the TIM Group has made substantial international investments, particularly in Latin America, significantly expanding its operations outside of the Eurozone.

The TIM Group's non-current operating assets are located as follows:

- Italy: as of December 31, 2023, €40,769 million (83.7% of total non-current operating assets); and

- Outside of Italy: as of December 31, 2023, €7,917 million (16.3% of total non-current operating assets). Non-current operating assets outside of Italy are primarily denominated in BRL.

The TIM Group generally hedges its foreign exchange exposure but does not cover conversion risk relating to its foreign subsidiaries. According to its policies, the hedging of the foreign exchange exposure related to the financial liabilities is mandatory. Movements in the euro exchange rates relative to other currencies (particularly the BRL) may adversely affect its consolidated results. A rise in the value of the Euro relative to other currencies in certain countries in which the TIM Group operates or have made investments will reduce the relative value of the revenues or assets of its operations from those countries and, therefore, may adversely affect its operating results and financial position.

In addition, the TIM Group has raised, and may raise an increasing proportion, financing in currencies other than the Euro (principally U.S. dollars and BRL). In accordance with its risk management policies, the TIM Group generally hedges the foreign currency risk exposure related to non-Euro denominated liabilities, through cross-currency and interest rate swaps. However, hedging instruments may not be successful in protecting the TIM Group effectively from adverse exchange rate movements.

The TIM Group aims to minimize the impact of negative interest, in part by hedging its exposure to negative interest through the use of derivatives instruments. Any changes in interest rates that have not been adequately hedged by derivative contracts may result in increased financial liabilities in connection with the TIM Group's floating rate debt, which may have adverse effects on the results of its operations and cash flows.

An increase of sovereign spreads, and of the default risk they reflect, in the countries where the TIM Group operates, may affect the value of its assets in such countries.

The TIM Group may also be exposed to financial risks such as those related to the performance of the equity markets in general, and, more specifically, risks related to the performance of the share price of the TIM Group companies.

The TIM Group may be exposed to financial risks, such as those deriving from fluctuations of interest and exchange rates, credit risk, liquidity risk and general risks associated with the financial markets that it is exposed to and, more specifically, risks associated with deviations in the stock price of the TIM Group's subsidiaries. Such risks can have a negative impact on the financial results and structure of the TIM Group.

Financial markets may also suffer from adverse macroeconomic conditions. During 2021 and 2022, uncertainty surrounding global growth rates, the impact of the COVID-19 pandemic and the Russian-Ukraine military conflict have affected companies' access to the credit markets, leading to higher borrowing costs for funding ongoing operations. While the TIM Group may prove to be successful in accessing the credit and fixed income markets when needed, adverse changes in the financial markets could render it able to access these markets only at higher interest costs and with restrictive financial or other conditions, severely affecting its business operations. Additionally, downgrades of its credit rating by the major credit rating agencies could increase its cost of borrowing and also impact the collateral the TIM Group would be required to post under certain agreements it enters, which could negatively impact its liquidity.

Therefore, in order to manage such risks, the TIM Group has established the guidelines for operational management, identification of the financial instruments most suitable to meet the objectives set and monitoring the results achieved. In particular, and in order to mitigate liquidity risks, the TIM Group aims to maintain an "adequate level of financial flexibility," in terms of cash and committed syndicated credit lines in order to cover its financing needs for 12-18 months, at minimum.

Any significant increase in interest rates could therefore lead to an increase in TIM Group's debt service expenses, which would have a material adverse effect on the TIM Group's business, financial condition, results of operations and prospects.

Global economic conditions and political events could adversely affect the TIM Group's business, results of operations and financial condition.

The TIM Group's operations are influenced by global geopolitical events, including the ongoing Russia-Ukraine conflict and the recent military tensions between Hamas and Israel. These situations have indirect yet tangible effects on the TIM Group's business, primarily through increased costs in energy, raw materials and transportation.

At the moment the impact of the geopolitical situation on the TIM Group's business is of an indirect nature, primarily associated with the increase in costs of energy, materials and transportation. This geopolitical situation has contributed to a general rise in energy prices. In particular, for the TIM Sparkle entities (part of the TIM Group) that operate in areas impacted by the Ukraine-Russia conflict, there have been no significant repercussions in commercial relations, in the demand for international services from areas affected by the conflict and in the substantially regular collections of trade receivables. The TIM Group's assets in affected countries are not significant. The increase in energy prices has also led to an increase in inflation and ultimately in the cost of financing. Further, the Ukraine-Russia conflict may involve cyber-attacks against countries that support economic sanctions against Russia. The TIM Group, in coordination of the National Cybersecurity Agency ("**ACN"**), have raised the alert level of ICT monitoring for cyber security risks has implemented the technical indications from ACN.

The recent outbreak of an armed conflict between Hamas and Israel in early October 2023 presents a risk of regional escalation in the Middle East. Although the TIM Group does not engage in operations within Middle Eastern countries, the duration, ramifications and outcome of this conflict are highly uncertain. Potential short- or long-term consequences may include economic sanctions, economic and political instability, rising inflation and energy costs, supply chain disruptions and negative impacts on currency exchange rates and financial markets.

More generally, escalating geopolitical tensions, either in Europe or worldwide, could affect the TIM Group's operations, including the safety and security of its employees and the integrity of its network operations. These events, individually or in the aggregate, could materially and adversely affect the TIM Group's business, financial condition, results of operations and prospects.

There is a risk that Italy's economic growth in 2024 will experience a slowdown.

In the fourth quarter of 2023, Italy's gross domestic product expanded by 0.2% with respect to the previous quarter and by 0.6% compared to the fourth quarter of 2022. In 2023, Italy's gross domestic product at current prices grew by 6.2% compared to the previous year. The prospects for comparable growth in 2024 will hinge on Italy's employment growth, the deceleration of expansion and a partial increase in salaries.

A significant slowdown in Italy's economic growth could impact the demand for telecommunications products and services in Italy, which could have an adverse effect on the TIM Group's business, financial condition and results of operations.

The inflationary pressure and rising input and borrowing costs may cause a slowdown in Italy's employment rate and ultimately in the TIM Group's consumers' demand.

The Italian economy is facing significant risks due to an energy price shock and high inflation. The inflation rate in Italy, which has reached record highs of almost 12%, is putting pressure on real disposable incomes and weakening purchasing power, negatively impacting internal demand. If wages adapt to the new level of prices within a reasonable time lag (a number of wage agreements were concluded before the energy price shock commenced) and price pressures ease, private consumption may pick up again during the course of 2024.

High input costs and a prolonged tightening of financing conditions triggered by the more stringent monetary policies introduced by the major central banks to fight inflation will likely negatively affect corporate investments. The housing market will also be negatively impacted. Government capital spending (on the back of NRRP fund financed investment) is instead expected to remain robust. Significant increase in interest expenditure and the need for fiscal discipline is expected to reduce the measures.

Labor demand is already decreasing in more energy-intensive sectors such as manufacturing and construction, but employment growth has also slowed down in the retail and tourism sector. Overall, the unemployment rate, which as of December 31, 2023, was around 7.2% is expected to slightly rise over the next two years.

The Italian government's interest expenditure increased in 2021 by €5.5 billion due to higher bond yields on its debt, although the interest expenditure relative to GDP remained stable at 3.5%, and there is a need to reduce the country's general government debt-to-GDP ratio, which reached 172.5% in 2022. As a result, the Italian government's financial

maneuvering room will be very limited in the coming years, especially if European-level agreements on returning to fiscal discipline are implemented.

The above factors are affecting the spending capacity of the TIM Group's consumer and business customers leading to weaker demand, customers being less willing to pay for premium services and an increase in the risk of bad debts, which could each result in a reduction in the TIM Group's revenue and/or profit.

The economic outlook in Brazil is uncertain and any downturn in economic conditions in Brazil may have an adverse impact on the TIM Group's operations.

The Brazilian economy growth is affected by the slowdown in the global economy, in particular in the United States and China. Further, as a consequence of a restrictive monetary policy which served to restore credibility and stability to the Brazilian currency and to contain inflation, a slowdown in overall growth for the Brazilian economy in 2023 was expected and reached approximately 2.9%. The reduction in growth and the need to maintain subsidies for the poorest part of the population, as well as the growing of public and private debt, represent the main risks and challenges that the country is facing after the presidential elections at the end of the year.

Worsening market and financial conditions in Brazil could have adverse impacts on the TIM Group's Brazilian operations, which could have a material impact on the TIM Group's business, financial condition and results of operations.

Risks related to Brazilian political conditions may negatively affect the TIM Group's business.

Political conditions in Brazil may affect the confidence of investors and the public in general, as well as the development of the economy. Political crises have affected and continue to affect the confidence of investors and the general public, historically resulting in economic deceleration and heightened volatility in the prices of securities offered by companies with significant operations in Brazil.

The most recent presidential elections in Brazil, held in October 2022, resulted in the election of Luiz Inácio Lula da Silva as President of Brazil. In 2023, the new government achieved significant advancements in the economic agenda, including the approval of the long-awaited tax reform, which has been under discussions for over forty years. Additionally, there was a comprehensive overhaul of the Administrative Council of Tax Appeals, a review of measures concerning tax credits and interest on equity and an extension of incentives for exploration profits. The approval of foundational economic themes by the National Congress demonstrated that the federal government, despite lacking a parliamentary majority, has been able to find consensus for voting on matters essential to the country's growth. However, there can be no assurance that the new government will be able to continue to positively contribute to Brazil's development.

Uncertainties regarding the new government's ability to implement policies and reforms, as well as the external perception of the Brazilian economy and political environment may materialize in the future, which could have a negative impact on the TIM Group's business. In particular, if the Brazilian government is unable to implement any necessary reforms this may lead to diminished confidence in the Brazilian government's budgetary condition and fiscal stance, which could result in downgrades of Brazil's sovereign foreign credit rating by credit rating agencies, negatively impact Brazil's economy and lead, in turn, to depreciation of the real and/or an increase in inflation and interest rates. Any such developments may have a material adverse impact on the TIM Group's business, results of operations, financial condition and prospects. Uncertainty about the Brazilian government's implementation of changes in policies, or regulations that affect such implementation, may contribute to economic instability in Brazil and increase the volatility of securities issued abroad by Brazilian companies, including TIM Group's securities.

Any of the above factors may create additional political uncertainty, which could harm the Brazilian economy and, consequently, the TIM Group's business, and could adversely affect its business, results of operations, financial condition and price of its common shares.

The COVID-19 pandemic has adversely affected the TIM Group's business, financial condition and results of operations and unexpected and uncertain events, such as the emergence of new variants of COVID-19, could significantly affect the TIM Group's operations.

Since its outbreak in December 2019, a pandemic caused by coronavirus, COVID-19, had spread globally and had created significant macroeconomic uncertainty and disruption, affecting markets where the TIM Group has operations, including Italy and Brazil. In response, many governments had implemented measures to stop or slow the COVID-19 pandemic, such as lockdowns, and these measures remained in place for a significant amount of time. The COVID-19 pandemic also led to scarcity of financing, weakness in the capital markets, weak consumer confidence and declining consumption in many markets. It also worsened the sovereign debt crises, particularly in the Eurozone. During the COVID-19 pandemic, the TIM Group had implemented measures to minimize health and safety risks, including social distancing, travel restrictions and working from home. Although such measures have now been lifted in line with government guidance, the TIM Group remains prepared to reintroduce necessary measures.

The COVID-19 pandemic and the response thereto had materially adversely impacted and may continue to materially adversely impact the TIM Group's business, as well as its various stakeholders. As a result of the COVID-19 pandemic, the TIM Group's operations experienced delays and disruptions, such as temporary closure of its distribution network, heightened pressure on its networks by remote working trends and increases in data usage. In addition, its mobile services revenue declined, particularly in the second quarter of 2020, including because of customers buying fewer new devices, travel restrictions disincentivizing customers from subscribing to roaming services abroad. The COVID-19 pandemic also negatively impacted TIM Group subscribers' ability to fulfil their payment obligations. The availability of lower disposable income also led to a decrease in the number of subscribers and types of subscriptions. In future, if business interruptions caused by epidemic or pandemics last longer than expected, the TIM Group may need to seek other sources of liquidity, and there can be no guarantee that additional liquidity will be readily available or available on favorable terms and in an amount sufficient to enable it to service and repay its indebtedness or to fund its other liquidity needs. The extent to which it impacted the TIM Group's financial condition and results of operations is discussed in "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the TIM Group,*" included elsewhere in this Exchange Offer Memorandum.

The repercussions of the COVID-19 pandemic and the response implemented could have complex and hard-to-predict consequences for the future. Additionally, to the extent the COVID-19 pandemic continues, or a different pandemic begins, it may also have the effect of heightening other risks described in this "*Risk Factors—Risks related to the TIM Group*" section. The possibility of new outbreaks of COVID-19, cannot be completely excluded. It may affect the TIM Group's operations by resulting in, among other things, declines in roaming volumes, shortage of electronic components and other items used to manufacture its network equipment, lower subscriber growth or increasing bad debt of businesses and consumer subscribers. It may also have significant negative effects on network improvements and maintenance, procurement and the supply chain, as well as decreasing margins, lower revenues or delays in cash flows. Such instability and any resulting market volatility may create contagion risks in jurisdictions where TIM Group operates. Additionally, any deterioration in financial markets could impair the TIM Group's ability to obtain financing in the future, including its ability to incur additional indebtedness to operate its ongoing operations, fund liquidity needs or to refinance or repay debt obligations. Any of the foregoing risks could materially and adversely affect the TIM Group's business, financial condition and results of operations.

The TIM Group may be unable to respond to the trend towards consolidation in the Brazilian telecommunications market.

The Brazilian telecommunications market has been subject to market consolidation. For example, in 2014, Telefónica S.A. acquired all of the shares of GVT Participações S.A from Vivendi. In 2019, Nextel Brazil was acquired by Claro S.A. In August 2020, Bordeaux Fundo de Investimentos ("**Bordeaux**") acquired the Brazilian regional operator Sercomtel Telecomunicações following its privatization. Subsequently, in November 2020, Bordeaux was successful in a competitive auction to acquire Copel-backed Copel Telecom. In 2022, the TIM Group acquired Oi.

The economic and regulatory environment faced by some relevant telecommunications companies in Brazil, such as Sercomtel, a local phone and Internet service provider in the state of Paraná, and Sky, could also be expected to encourage the consolidation trend or even the entry of a new competitor in the Brazilian telecommunications market. In 2018, via a new resolution, Anatel reduced one of the main regulatory barriers to consolidation in the mobile market.

Resolution No. 703/2018 changed the spectrum cap regulation by increasing the amount of spectrum bandwidth an operator is allowed to retain, depending on frequency range and applicable antitrust measures. If such consolidation occurs, it may result in increased competition within the telecommunication market. The TIM Group may be unable to adequately respond to pricing pressures resulting from consolidation in the market, adversely affecting its business, financial condition and results of operations. On November 5, 2020, Anatel Resolution No. 736/2020 amended Resolution No. 703/2018 by establishing new maximum limits for the spectrum between 1 GHz and 3 GHz, with the allocation of L Band (+90 MHz in the 1.5 GHz band) for SMP. The TIM Group may also consider engaging in merger or acquisition activity in response to changes in the competitive environment, which could divert resources away from other aspects of the TIM Group's business. See "*—The TIM Group has entered and may enter into strategic transactions, such as acquisitions, investments or dispositions, involving unforeseen risks, and it may not realize the financial and strategic goals that were contemplated at the time of any transaction and, additionally, there are risks associated with the integration of any acquisitions*."

Risks Related to the TIM Group's Legislative and Legal Framework

The Italian Golden Power Authority has exercised, and may in the future exercise, its special powers under the Golden Power Legislation with respect to the TIM Group, including with respect to the TIM Group's ability to enter into strategic transactions.

In Italy, the Italian Golden Power Legislation provides the Italian Golden Power Authority with certain special powers over companies of strategic importance for the national essential interest.

In particular, pursuant to the Italian Golden Power Legislation, the Italian Golden Power Authority may, among other things, exercise a veto or impose undertakings, conditions and other requirements in certain cases, such as:

(i) the acquisition of certain shareholdings in companies having assets and relationships in sectors qualified as strategic, such as, among others, defence and national security, energy, transport, communications, financial, healthcare, agri-food, critical technologies and personal data processing (the "**Strategic Companies**"); and

(ii) resolutions, acts or transactions concerning Strategic Companies that hold strategic assets, and which involve a change in the ownership, control, possession or intended use or purpose of such assets or relationships of strategic importance, such as mergers, de-mergers, transfers of assets or business units in which such assets are included and the enforcement and, according to a prudential interpretation, the granting or extension of securities over (i) the shares, if it concerns a shareholding in a Strategic Company meeting or exceeding, as the case may be, the thresholds indicated below or (ii) strategic assets.

With reference to the acquisition of shareholdings in Strategic Companies, the Italian Golden Power Legislation provides that the following transactions shall be communicated to the Italian Golden Power Authority for screening purposes and the possible exercise of the veto right or the imposition of undertakings, conditions and/or other requirements:

- acquisitions by both EU/EEA (including Italian) and non-EU/EEA natural persons or legal entities of shareholdings in Strategic Companies in the defense and national security sectors exceeding 3% of the share capital and/or voting rights, and subsequently in the event of exceeding the thresholds of 5%, 10%, 15%, 20%, 25% and 50%;

- acquisitions, by non-EU/EEA natural persons or legal entities, of a stake representing at least 10% of the share capital and/or the voting rights (when the value of the investment is equal to at least €1.0 million) of a Strategic Company in any sector covered by the Italian Golden Power Legislation; acquisitions that exceed the thresholds of 15%, 20%, 25% and 50% or that in any case result in the acquisition of control over the relevant Strategic Company are also subject to the reporting obligation; and

- acquisitions, by EU/EEA (including Italian) natural persons or legal entities of control over Strategic Companies in the energy, transport, communication, water, health, financial and agri-food sectors.

The Italian Golden Power Legislation provides for specific sanctions to be applied in case of non-compliance with its provisions, including, among others, administrative pecuniary sanctions up to two times the value of the transaction and in any case not less than 1% (of the company turnover or of the cumulative turnover of the companies involved in the relevant transactions) as resulting from the last financial year for which the financial statements have been approved. In addition, failure to comply with the Italian Golden Power Legislation or with any veto, undertaking, condition and/or other measure imposed by the Italian Golden Power Authority may result in the relevant transaction, act or resolution being unwound or declared null and void.

In addition to the above, by Italian Legislative Decree No. 21 of March 21, 2022, converted into law with amendments by Italian Law No. 51 of May 20, 2022, Italian Golden Power Legislation was amended, requiring Strategic Companies operating in the telecommunications sector to provide the Italian Golden Power Authority in advance with an annual plan of purchases of goods, including in particular technology-intensive components, and services relating to the design, implementation, maintenance and management of activities regarding broadband communication services based on 5G technology. The said purchases plan is subject to approval of the Italian Golden Power Authority, possibly with the imposition of undertakings, and can be updated by the relevant Strategic Company on a quarterly basis, subject to a new application to the Italian Golden Power Authority.

On October 16 and November 2, 2017, specific provisions regarding corporate governance and organization were imposed on the TIM Group through two Prime Ministerial Decrees. Among these, the establishment of a security organization (the "**Security Organization**") was imposed, which is responsible for activities relevant to national security and involved in all decision-making processes relating to strategic activities and the network. This structure provides that the Security Organization relies on a security officer, who reports to a member of the board of directors with exclusive responsibility for security.

On January 16, 2024, the Italian Golden Power Authority issued a decree with which it imposed undertakings in reference to the Acquisition, as the NetCo Business was considered as a strategic asset for the telecommunications sector and for defense and national security. For more information, see "*Risks Related to NetCo—Risks Related to NetCo's Legislative and Legal Framework—The Italian Golden Power Authority has in the past exercised its special powers under the Italian Golden Power Legislation with respect to the TIM Group and may in the future exercise again the said special powers, including with respect to strategic transactions to be entered into by NetCo*." In particular, the Italian Golden Power Authority has imposed various requirements and conditions including in relation to governance, internal organization (confirming the obligation to establish a Security Organization), planning, compliance, network security, continuity of supplies, the locations where certain activities can be carried out and certain assets can be located, the supply chain, intellectual property and information. Furthermore, NetCo is required to provide every six months to the monitoring committee of the Italian Golden Power Authority a compliance report describing the measures implemented by NetCo in order to comply with these requirements.

In light of the above, in relation to the corporate aspects of NetCo, the Italian Golden Power Authority may veto or impose undertakings, conditions and/or requirements to consent to the implementation of any transaction, act or resolution falling within the scope of application of the Italian Golden Power legislation. Consequently, following the successful completion of the Transactions, the right of the TIM Group and NetCo to pursue resolutions, deeds or commercial or industrial operations which provide for, among other things, the acquisition or subscription of their shares will remain subject to the Italian Golden Power Authority and the Italian Golden Power Legislation. Therefore, the TIM Group and NetCo may not be authorized to undertake such transactions, acts or resolutions in a timely manner, without restrictions and/or undertakings which may or may not have a material impact. Pursuant to Italian Golden Power legislation, the Push-Down Merger will also be the subject of a new application to the Italian Golden Power Authority.

Anatel classified the TIM Group as an economic group with significant market power in some markets and are now subject to increased regulation.

In July 2018, Anatel published Resolution No. 694/2018, or the "New PGMC," revising the general plan for competition goals (Plano Geral de Metas de Competição) ("**PGMC 2012**"). Under the New PGMC, TIM Group has been classified as having significant market power in the following relevant markets: (i) mobile network; (ii) national roaming; and (iii) high-capacity data transport. Due to such classification, the TIM Group is subject to increased regulation under the New PGMC, which could have an adverse effect on its business financial condition, results of

operations and compliance with regulations. In the Brazil national roaming market, the TIM Group must also offer roaming services at regulated rates to other mobile providers. The new PGMC is currently under review by Anatel and a new regulation is expected to come into force in the second half of 2024, after a public consultation to proposed to be held in the second half of 2023.

The TIM Group's radio frequency ("**RF**"), authorizations for the 800 MHz, 900 MHz, 1,800 MHz and 2,100 MHz bands that it uses to provide PCS services started to expire in September 2007 and are renewable for one additional 15-year period, requiring payment at every two-year period equal to 2% of the prior year's revenue net of taxes, by way of investment under the basic and alternative service plans, which are intended to increase telecommunications penetration throughout Brazil. Anatel has stated that the revenue on which the 2% payment is based should be calculated as including revenues derived from interconnection as well as additional facilities and conveniences. As a result, the TIM Group is currently disputing these RF authorization renewal payments both administratively and judicially. Although there are administrative procedures still pending on analysis, Anatel has denied the TIM Group's appeals and issued Precedent No. 13, determining that revenues from interconnection as well as additional facilities and conveniences should be considered on the basis of the calculation of the price due to the renewal of the spectrum licenses. Judicially, the matter is also still under dispute. In December 2018, under Judgment No. 706 and No. 707, Anatel approved a new radiofrequency revenue segregation methodology to be applied. The application of this new methodology allows the segregation of significant market power revenues by the percentage of radiofrequency extended in relation to the total of existing radiofrequencies, both expressed in the amount of MHz, and addresses part of the dispute about the values to be paid by the TIM Group due in connection with the initial renewal process. After the expiration of the second renewal of radiofrequency use rights, there may be new administrative and judicial discussions and disputes regarding the applicable calculation methodology and deadlines after the approval of Law No. 13,879, of October 3, 2019. The Federal Court of Accounts ruled that such renewal process may be subject to a new bidding procedure. However, Anatel has granted the TIM Group and other competitors extensions for shorter terms until a decision has been made on how to proceed with the radiofrequency use rights.

Finally, both of the above aspects are under revision by Anatel: the Spectrum Use Regulation ("**RUE**"), which must rely on a "use it or share it" principle to ensure spectrum usage in a secondary basis; in addition to the revision of the PGMC Regulation, in order to create a new significant market power for RAN sharing agreements. Anatel is assuming that these initiatives could leverage the competition in the mobile market. However, there can be no assurance that the actual outcome of the revision undertaken by Anatel and/or the factual implementation of these new regulation may bring the expected results.

The TIM Group operates under authorizations granted by government authorities and has to satisfy certain obligations in order to maintain such authorizations.

Many of the TIM Group's activities require authorizations from governmental authorities both in Italy and abroad. These authorizations specify the types of services the operating company holding such authorization may provide. The continued existence and terms of the TIM Group's authorizations are subject to review by regulatory authorities and to interpretation, modification or termination by these authorities. In addition, its current authorizations to provide networks and services require that the TIM Group satisfies certain obligations, including minimum specified quality levels, service and coverage conditions. Failure to comply with these obligations could result in the imposition of fines or even in the revocation or forfeiture of the authorization. In addition, the need to meet scheduled deadlines may require it to expend more resources than otherwise budgeted for a particular network build-out. If the TIM Group fails to renew any of its licenses, permits, or authorizations, the TIM Group's ability to effectively operate relevant businesses may be materially and adversely affected. The procedure to obtain licenses, permits, and authorizations (and renewals thereof) may be complex, lengthy, expensive and may require ongoing compliance with various obligations. Moreover, even if the TIM Group obtains the renewal of its licenses, permits, and authorizations, the costs for obtaining those might be higher than those it expected. Finally, if the TIM Group fails to comply with the requirements of the applicable legislation and regulatory framework in general, which are very detailed and complex in nature, its authorizations may be suspended or terminated, or significant fines imposed.

Additional authorizations may also be required if the TIM Group expands its services into new product areas, and such authorizations may be related to auctions (*e.g.*, in the assignment of spectrum right of use) or otherwise prove expensive or require significant cash outlays, or have certain terms and conditions, such as requirements related to coverage and pricing, with which the TIM Group may not have previously had to comply.

In Brazil, the TIM Group also operates under an authorization regime and, as a result, it is obliged to maintain minimum quality and service standards. In December 2019, Anatel approved the new Telecommunications Services Quality Regulation ("**RQUAL**"), based on reactive regulation. In this new model, quality is measured on the basis on three main indicators – a Service Quality Index, a Perceived Quality Index and User Complaints index – and operators are classified into five categories (A to E). Under this regulation, Anatel may take measures according to specific cases, such as consumer compensation, adoption of an action plan or adoption of preventive measures to ensure improvements in quality standards, generating a risk of impact on planned investment volumes, expected revenues and potential penalties. Following a joint effort by Anatel, operators, and the Quality Assurance Support Authority to define the objectives, criteria and reference values of the indicators by the end of November 2021, Anatel's board of directors formalized the reference documents supporting this regulation: the Operational Manual and the Reference Values; and established the entry into operational effectiveness on March 1, 2022. Currently, the results of quality indicators are already being disclosed monthly by the agency on its website. Specifically, regarding the Quality Seal (which encourages competition in quality), in November 2023, the agency determined the temporary and partial suspension of the Reference Values Document and the quality seals for the years 2022 and 2023 and granted a 120-day period for the submission of new proposals for reference methods and parameters for defining the quality seals.

The TIM Group's activities could be materially negatively affected by failure to comply with GDPR and Italian Privacy Code.

In the ordinary course of business, the TIM Group processes personal data on customers, business partners, employees, users, third parties and others and therefore it must comply with strict data protection and privacy laws and regulations. Any processing of personal data of individuals located in the EEA in the course of the provision of services is governed by European data protection laws and regulations, which restrict its ability to collect, process and use personal data relating to customers, potential customers, business partners, and employees, including for marketing purposes.

Such laws and regulations concern the collection, use, retention, security, processing and transfer of personal data. In particular, starting from May 25, 2018, the TIM Group's operations are subject to the provisions of Regulation (EU) 2016/679 of April 27, 2016 ("**GDPR**") and to the Italian Legislative Decree No. 196/2003, as amended by Italian Legislative Decree No. 101/2018, which adapted Italian rules to GDPR ("**Italian Privacy Code**"). The GDPR increased both the number and the restrictive nature of the obligations binding the TIM Group, in particular with respect to the collection, processing and use of personal data. Such obligations include, for example, (i) the processing of personal data in accordance with the transparency, data minimization, accuracy, storage limitation, security and confidentiality principles, (ii) the ability to demonstrate compliance with such principles (accountability), (iii) the obligation to identify a legal basis before the processing, (iv) the obligation to ensure the rights of data subjects, such as, among others, the right of access, the right to rectification and the right to erasure (which would require the TIM Group to permanently delete a user's personal data in certain circumstances) and (v) more onerous consent requirements, as consent will always have to be express/opt-in, while implied/opt-out consent has at times been deemed sufficient under the former regime. The GDPR obligates companies to implement several formal processes and policies as well as to review and document the data protection implications of the development, acquisition, or use of all new products, technologies, or types of data. The GDPR, *inter alia*, provides for significant applicable maximum fines, up to the higher of (i) €20 million or (ii) 4% of annual global turnover per breach, as opposed to fines of less than €1 million under the former regime. The fine may be imposed instead of, or in addition to, measures that may be ordered by supervisory authorities (such as the request to cease processing). In addition, according to the Italian Privacy Code, certain criminal sanctions could be applied to individuals involved in unlawful processing activities.

The regulatory environment governing the TIM Group's use of data relating to identifiable individuals (customers, employees and others) is complex. Privacy and information security laws and regulations change frequently, and compliance with such laws and regulations may require the TIM Group to incur significant costs to make necessary systems changes and implement new administrative processes.

For example, the European Commission has proposed to replace Directive 2002/58/EC on Privacy and Electronic Communications (the "**ePrivacy Directive**") with a new regulation primarily aimed at aligning certain provisions of the ePrivacy Directive to the GDPR. The Proposal for a Regulation on Privacy and Electronic Communications (the "**ePrivacy Regulation**") was published by the European Commission on January 10, 2017 and is currently under negotiation in light of the draft proposals issued by the European Parliament and the European Council. The draft

ePrivacy Regulation proposes heightened regulatory requirements in connection with unsolicited communications, the use of cookies, security of personally identifiable information, confidentiality of communications, consent, data security and data integrity. In line with the GDPR, breaches of the ePrivacy Regulation may result in maximum fines equal to the greater of €20 million and 4% of the annual global turnover of the sanctioned company.

The TIM Group has executed a deep gap analysis, identified the main issues, and consequently planned and deployed a master plan to reach full compliance with the GDPR requirements as well as with the Italian Privacy Code. It constantly monitors regulatory developments, measures and opinions adopted by the Italian Data Protection Authority (*Autorità Garante per la Protezione dei Dati Personali*) and adopts all the necessary initiatives needed to fulfil compliance with the aforementioned provisions. The TIM Group, in this context, is also committed in maintaining and verifying continuously the effectiveness of the adopted controls and engages in communications with the Italian Data Protection Authority with respect to data security matters where it deems necessary or advisable.

However, the risk of deficiencies in implementing security measures, in fulfilling legal requirements on data processing, in applying rules on data retention, in notifying data breaches within the narrow mandatory timeframes could lead to disputes with the Italian Data Protection Authority and to be sanctioned with heavy fines. Any failure, or perceived failure, by the TIM Group to comply with any applicable data protection laws and regulations could result in proceedings, investigations or actions (including class actions) brought against it by governmental entities, or agencies; or private individuals or entities, and in significant fines, penalties, judgments and reputational damages to the TIM Group business, requiring it to change business practices and increasing the costs and complexity of compliance, any of which could materially adversely affect its business, financial condition, results of operations and prospects. Moreover, the risk of personal data breaches can lead to disputes with the interested data subjects. Even the perception of data protection and privacy concerns, whether or not valid, may harm the TIM Group's reputation and inhibit its business with current and future customers, which could have an adverse effect on its business, financial condition and results of operations.

The TIM Group's activities could be materially negatively affected by failure to comply with Brazilian Data Protection Laws.

The TIM Group's operations and reputation could be materially negatively affected by cyber-security threats or its failure to comply with new data protection laws, mainly the Brazilian General Data Protection Law (Law No. 13,709/2018) ("**LGPD**"), which came into effect on September 18, 2020, following the President of Brazil's veto of Article 4 of Provisional Measure No. 959/2020, which established that the LGPD would only come into effect on May 3, 2021. However, the administrative sanctions provisions of LGPD only became enforceable as of August 1, 2021, pursuant to Law No. 14,010/2020. Any proceeding or action and related damages could be harmful to the TIM Group's reputation, force it to incur significant expenses, divert the attention of its management, increase its costs of doing business or result in the imposition of financial penalties.

In addition, Decree No. 10,474/2020 created the regulatory agency of the National Data Protection Authority ("**ANPD**"). The ANPD must ensure the protection of personal data and will deal with cases regarding commercial and industrial secrets in Brazil. ANPD is also responsible for developing guidelines for the Protection of Personal Data and Privacy National Policy and for inspecting and applying sanctions in the event of data breaches according to resolution cd/ANPD No. 1, of October 28, 2021.

Moreover, ANPD can issue regulations and procedures to protect personal data and privacy, as well as responsible for assessing the impact of personal data protection in scenarios that may be deemed as a high risk to personal data protection principles. As a result of ANPD's new regulations and procedures, the TIM Group may be required to change its business practices and implement additional measures to adapt its personal data processing activities. This could adversely affect the TIM Group's business, financial condition, or results of operations. The TIM Group cannot assure potential investors that its LGPD compliance efforts will be deemed appropriate or sufficient by regulatory authorities or by courts. The TIM Group is carrying out a continuous assessment to identify any problems and based on the results identified, it has implemented controls in order to achieve full compliance with the requirements of the LGPD. However, deficiencies in the full adoption of data security measures, implementing personal data processing and retention requirements and reporting data measures within a narrow mandatory time frame could lead to disputes with data protection authorities, fines or harm to the TIM Group's reputation.

Sophisticated information and processing systems are vital to the TIM Group's growth and its ability to monitor costs, render monthly invoices, process customer orders, provide customer service and achieve operating efficiencies. The TIM Group cannot assure that it will be able to successfully operate and upgrade its information and processing systems or that it will continue to perform as expected without any failure. A severe failure in its accounting, information and processing systems could impair its ability to collect payments from customers and respond satisfactorily to customer needs, which could adversely affect the TIM Group's business, financial condition and results of operations.

EU regulation of the levels of roaming charges may in the future have a material adverse effect on the TIM Group's business.

EU regulators have imposed price caps applicable to all operators in the EU at wholesale level. In particular, in 2022, the European Regulation (EU) No. 2022/612 of the European Parliament and the European Council of April 6, 2022 on roaming on public mobile communications networks within the EU came into effect. Pursuant to the latter regulation, the maximum wholesale prices for roaming mobile services (calls, SMS and mobile data) shall decrease according to a glide path culminating with maximum prices for voice, SMS and data services, respectively, of € 1.9 cent/min, € 0.3 cent/SMS and 1 €/GB. In general terms, reduction of prices of mobile roaming services, as well as operation of alternative roaming providers may have a material adverse effect on the TIM Group's business, financial condition and results of operations.

Actual or perceived health risks or other problems relating to mobile handsets or transmission masts could lead to litigation or decreased mobile communications usage.

The effects of, and any damage caused by, exposure to an electromagnetic field were and are the subject of careful evaluations by the international scientific community, but until now there is no scientific evidence of harmful effects on health. The allocation of the frequencies required for rolling out and operating 5G networks have heightened the public debate and concerns about this issue. The TIM Group cannot rule out that exposure to electromagnetic fields or other emissions originating from wireless handsets will not be identified as a health risk in the future.

The TIM Group's mobile communications business may be harmed as a result of these alleged health risks. For example, the perception of these health risks could result in a lower number of customers, reduced usage per customer, prevent the installation of mobile communication masts and wireless networks, affect network rollouts and the deployment of higher frequencies in the TIM Group networks, generate additional costs or investment, or result in potential claims and litigations. See also "*—The TIM Group may be subject to claims and penalties relating to the health and safety of its employees or of third parties.*" Additionally, as the TIM Group holds mobile communications licenses, in light of the concerns about the potential health effects that could arise from exposure to mobile telecommunications equipment, it faces the risk that lawsuits may be filed against it in relation therewith. Further, the TIM Group installations, and particularly its 5G installations, may be subject to attack by members of the public.

In Brazil, Anatel Resolution No. 700/2018 sets limits of emission and exposure for fields with frequencies between 8.3 kHz and 300 GHz, and Anatel Act No. 17,865/2023 and Law No. 11,934/2009 establish limits related to the magnetic and electromagnetic emissions recommended by the World Health Organization and require that operators have to maintain a record of the measurements of the levels of the magnetic and electromagnetic emissions of each transmitting station. In 2021, Law No. 14,173/2021 came into force, which amended Law No. 11,934/2009, revoking the mandatory sharing of towers with less than 500 meters between them. The withdrawal of this obligation was considered essential for the implementation of 5G in Brazil, allowing for the expected increase in density for the new technology. Further, in 2022 Law No. 14,424/2022 came into force, which allowed operators to be authorized to install antennas, even if the competent authority does not respond within a period of 60 days.

Although laws already impose strict limits in relation to transmission equipment, these concerns may cause regulators to impose greater restrictions on the construction of radio base station towers or other infrastructure, which may hinder the completion of network buildouts and the commercial availability of new services and may require additional investments.

The TIM Group is exposed to risks in connection with fraud.

The TIM Group is exposed to risks in connection with fraud. For example, it is subject to the risk of customers attempting to benefit from its services or goods without paying for them. In view of the large number of invoices that the TIM Group issue and the volume of its payment transactions, such fraud could represent heavy financial losses.

The TIM Group is also exposed to risks of fraud with potentially material adverse effects should such risks materialize. In today's environment of increasingly complex technologies, more virtual networks and faster implementation of new services and new applications, cases of fraud may arise that are more difficult to detect or control. For example, on February 29, 2024, the TIM Group was served with an order of seizure issued on February 2, 2024 by the preliminary investigation judge (*giudice per le indagini preliminari*) of the Court of Milan carrying out a preventive seizure (*sequestro preventivo*) of the sums held in the TIM Group's bank accounts amounting to approximately €249.0 million. Such preventive measure related to an alleged cyber fraud (*frode informatica*) pursuant to Italian criminal law allegedly conducted by Content Service Providers in the context of value-added services. Since becoming aware of these irregularities in 2019, TIM proactively reported the matter to the Public Prosecutor's Office of Rome. Following the investigation, these facts were determined to be a fraud committed against TIM. Nonetheless, TIM has taken swift action to safeguard its customers by refunding all known irregular activations and blocking any value-added services found to be affected by irregular activations. The TIM Group is not under investigation in these proceedings, however, any similar alleged case of fraud or any related criminal investigation in the aggregate could have a material adverse effect on the TIM Group's business, reputation, results of operation and financial condition.

The TIM Group's organizational policies and procedures embodied in the organizational model adopted pursuant to Italian Legislative Decree 231/2001 may be insufficient to prevent fraud and may fail to prevent certain officers or employees from engaging in unlawful conducts, for which TIM Group could be liable.

Any contact by the TIM Group's directors, employees, agents or partners with the public administration or procurement officers of private clients (including in the context of participations in auctions, interactions held with the public administration in the process of obtaining or renewing any authorization or license and any possible public contribution) involves risks associated with fraud, bribery, corruption, incorrect use of public contributions and other fraudulent activities by the TIM Group's employees and related investigations.

The TIM Group is also exposed to the risk that its directors, employees or agents commit IT related crime, which may consist of using the TIM Group's infrastructure to violate the IT systems of its competitors, unlawful access to banking data (including that of its customers) and damages to the IT systems and documents. In addition, the TIM Group may be subject to claims in connection with damage to property, business interruptions, unauthorized use of property, unauthorized entry or breach of security protocols, negligence, willful misconduct or other tortious acts by its employees or people who have gained unauthorized access to premises operated by the TIM Group. Such claims may be substantial and may result in adverse publicity for the TIM Group. The TIM Group's business activities may also involve risks related to possible accidents, which may be due to its employees' activities or mistakes and may consist in crimes, breaches of security measures, damages to third parties or manslaughter.

The TIM Group has put in place an organizational model pursuant to Italian Legislative Decree 231/2001, in order to create a system of rules capable of preventing certain forms of unlawful conduct by senior management, executives and employees generally that might result in liabilities for it. The organizational model is adopted by TIM and by its Italian subsidiaries. A specific version of the organizational model has been adopted by the TIM Group pursuant to the anti-corruption Brazilian law (Law 12.846/13) and aligns with Legislative Decree No. 231/2001 of Italy, and international standards on anti-corruption, such as the Foreign Corrupt Practices Act and the UK Bribery Act 2010.

The TIM Group has also implemented, and will continue to maintain in force, policies, procedures, systems, and controls designed to ensure compliance by its directors, employees, consultants, partners, agents and third-party agents, representatives and intermediaries with applicable anti-bribery and anti-corruption legislation.

The organizational model is continuously reviewed and kept up to date to reflect changes in operations and in the regulatory environment. The TIM Group has established a 231 Steering Committee (management committee composed of Group Compliance Officer, the Chief Human Resources & Organization Office, the General Counsel

and the Audit Director as listener) to prepare and consider proposals for changes to the model, for submission to the board of directors for approval.

Notwithstanding the existence of this model or any updates that the TIM Group may make to it, there can be no assurances that it will function as designed, or that it will be considered adequate by any relevant legal authority. Further, the TIM Group may be unable to detect or prevent every instance of unlawful conduct involving its directors, employees, consultants, partners, agents and third-party agents' representatives and intermediaries and/or may fail to adequately update and implement such policies, procedures, systems and controls. The TIM Group's monitoring systems may not be sufficient to prevent, detect and identify inadequate practices and violation of law by such individuals.

In particular, pursuant to Italian Legislative Decree 231/2001, the TIM Group may be held responsible for certain crimes committed in Italy or abroad including, among others, bribery, money laundering, corruption (including among private individuals), anti-competitive behavior, fraud against the state, corporate offenses, market abuse, certain tax and customs violations, and certain environmental and workplace safety violations in the TIM Group's interest or for the TIM Group's benefit, by individuals having a functional relationship with the TIM Group at the time the relevant crime was committed, including third-party agents, partners or intermediaries, unless the TIM Group is able to prove that such individuals fraudulently violated the internal control model and it was reasonably not possible for the TIM Group to avoid such violation. Liability, on top of minor administrative fines, may also attach in case the TIM Group fails to adequately implement a whistleblowing system and/or to follow up on whistleblowing reports according to applicable requirements, including Directive (EU) 2019/1937 on the protection of persons who report breaches of Union Law, and Italian Legislative Decree No. 24/2023. In such circumstances, the TIM Group may be subject to pecuniary fines, confiscation of profits or disqualifying sanctions (which could be applied also as interim measures during the investigations), including, subject to certain conditions being met, the termination of authorization, permits, licenses, concessions and financing arrangements, including facilitated financing, the suspension of the TIM Group's operations, or prohibitions on contracting with public authorities. The duration of these disqualifications could range from a minimum of three months to a maximum of two years, although in very serious cases, some of these disqualifications can be applied for a longer duration period. As an alternative to the disqualifying sanctions, the court may appoint a judicial custodian to run the company, with the consequence that the profits gained during the receivership period are automatically confiscated.

Any of the foregoing events may have a material adverse effect on the TIM Group's business, financial condition and results of operations.

The TIM Group is involved in disputes and litigation with regulators, competition authorities, competitors and other parties, including its shareholders, and is the subject of a number of investigations by judicial authorities, the ultimate outcome of which is generally uncertain.

The TIM Group is subject to numerous risks relating to legal (civil and criminal), tax, competition and regulatory (including health and safety) proceedings in which it is currently a party, or which could develop in the future. It is also the subject of a number of investigations by judicial authorities. The TIM Group is also subject to a number of public civil actions and class actions that have been brought against mobile telecommunications providers in Brazil mainly relating to network quality, the expiration of prepaid usage credits, minimum term clauses, subscription fees, quality of service and the use of land to install the TIM Group's network sites. These suits include claims contesting certain aspects of the fee structure of the TIM Group's prepaid plans, hybrid (monthly billed fixed price), or so-called control plans and postpaid plans, which are commonplace in the Brazilian telecommunications industry. Additionally, federal, state and municipal tax authorities have questioned some tax procedures that the TIM Group has adopted and has raised questions regarding the calculation of the basis for certain sector-specific contributions. Moreover, there are tax proceedings arising from the acquisition of the former Intelig business (currently TIM S.A.) by the former parent company of the TIM Participações group, relating to the purchase price.

Furthermore, the TIM Group, and possibly also its directors and officers, may be subject to legal (civil and criminal) proceedings, such as derivative and direct suits from TIM's shareholders, which may challenge an action, or inaction, taken by TIM alleging an infringement of corporate purposes and/or a denial of shareholders' rights. For example, on December 15, 2023, Vivendi started legal proceedings before the Court of Milan challenging the validity and effectiveness of TIM's board resolution of November 5, 2023, which approved the Transactions and the Transaction

Agreement. Vivendi argued that the Transactions required an amendment to TIM's corporate purposes approved by an extraordinary shareholders' meeting. Vivendi also contended that the resolution should have required shareholders' approval due to the alleged significant structural changes that will cause to TIM's activities. Vivendi also alleged the violation of the related party transactions procedure. Should Vivendi successfully prove the alleged violation of Italian corporate law, it could materially adversely affect the TIM Group's governance and reputation. For further information, please see "*Business of the TIM Group—Legal Proceedings and Disputes—Vivendi case*."

Such proceedings and investigations are inherently unpredictable. In addition, as a result of certain alleged antitrust violations, the TIM Group may be subject to customers, competitors or other third parties' lawsuits for damages or out-of-court requests, which could result in significant liabilities. Legal, tax, competition and regulatory proceedings and investigations in which the TIM Group is, or may become, involved (or settlements thereof) may, individually or in the aggregate, have a material adverse effect on the TIM Group's results of operations and/or financial condition and cash flows in any particular period. Furthermore, its involvement in such proceedings and investigations may adversely affect its reputation.

If TIM, or another TIM Group company, faces an adverse decision in any of the legal proceedings to which it is a party, and is ordered to pay amounts greater than what it has recognized to cover potential liabilities, it may face adverse effects with respect to it and/or the TIM Group's operations, financial position, income statement and cash flows.

The final outcomes of those proceedings are generally uncertain. In recognizing potential liabilities, the TIM Group takes into consideration the risks connected with each dispute and the relevant accounting standards, which require reserves to be recognized where liabilities are probable and can be estimated reliably. The provisions represent an estimate of the financial risk connected with the particular proceedings, in line with the relevant accounting standards. Nonetheless, the TIM Group may be obligated to meet liabilities linked to unsuccessful outcomes for proceedings that were not taken into consideration when calculating those reserves and the provisions made may not be sufficient to fully meet such obligations through use of its reserves. If any material disputes are resolved against the TIM Group, they could, individually or in the aggregate, have a material adverse effect on the TIM Group's results of operations, financial condition and cash flows.

For more details, please see "*Business of the TIM Group—Legal Proceedings and Disputes.*"

Failure to protect the TIM Group's image, reputation and brand could materially affect the TIM Group's business.

The TIM Group's success depends on its ability to maintain and enhance the image and reputation of its companies, of its existing products and services and to develop a favorable image and reputation for new products and services. The image and reputation of its products and services may be reduced in the future if concerns about the quality, reliability and cost-benefit analysis of its products and services, the quality of its support centers, the environmental footprint of its business and its capability to deliver to its customers the level of services advertised are raised, even if such concerns are unfounded, could tarnish its image and reputation of the image and reputation of its products and services. Restoring its image and reputation or that of its products and services may be costly and not always possible. Any of the above factors could have a material impact on the TIM Group's business, financial condition and results of operations.

The use of Internet by the TIM Group's customers could cause it to suffer losses and adversely affect its reputation.

Pursuant to applicable Italian regulation, the TIM Group, as a host and provider of data transmission services, is required to inform competent authorities without delay of any alleged illegal or illicit activity by its customers of which it is aware. The TIM Group must also provide the authorities with any information it has identifying such customers. Any failure to comply with this obligation could cause it to become involved in civil proceedings or could harm public perception of its brand and services. Any such event could result in legal and/or regulatory proceedings.

The TIM Group is exposed to the risk of labor disputes, in particular as a result of its plan to restructure its labor costs.

The acceleration in technological transformation in the telecommunications sector has created the need to address integrated organizational review activities, digitalization of processes and adaptation of the skills and capabilities of all staff members.

Overall, the TIM Group has a good relationship with its workers and trade unions. However, there can be no assurance that the TIM Group's workers and trade unions will be fully satisfied with the Acquisition. Furthermore, material labor disputes may occur, including as a result of (i) claims from former employees of the TIM Group transferred to NetCo in the context of the Transactions, who may challenge their transfer and seek to be re-transferred to the TIM Group and (ii) the TIM Group's plan to restructure its labor costs, which could, individually or in the aggregate, have a material adverse impact on the TIM Group's operations. See "*Business of the TIM Group—Employees.*"

The TIM Group may be subject to claims and penalties relating to the health and safety of its employees or of third parties.

The TIM Group's operations are subject to environmental as well as health and safety laws and regulations, including those concerning occupational health. In most cases, the TIM Group is responsible for the safety of its personnel as well as any external worker operating at its premises and the general health wellbeing of its customers' employees and patrons who may work or do business nearby. If the TIM Group fails to implement safety procedures or if the procedures the TIM Group implements are ineffective, its employees and others may become injured. The TIM Group may incur significant costs, including fines, penalties (including operational bans), civil, criminal (also pursuant to Italian Legislative Decree No. 231/2001) and administrative sanctions as a result of violations of, or liabilities under the applicable health and safety laws and regulations. Under applicable Italian law, when workers become injured in connection with their duties and as a result are absent from work for more than 40 days, the relevant public prosecutor must open an investigation into workplace safety and, depending on the circumstances, may bring criminal proceedings against the TIM Group, its local officer entrusted with workplace safety or against its management or chief executive officer.

Incidents or similar occurrences may damage the TIM Group's reputation and negatively affect its reputation and result in criminal and/or administrative liability, including pursuant to Italian Legislative Decree No. 231/2001. See also "*—Risks Related to the TIM Group's Business Activity and Industry—Actual or perceived health risks or other problems relating to mobile handsets or transmission masts could lead to litigation or decreased Mobile Communications usage." and "—the TIM Group's organizational policies and procedures embodied in the organizational model adopted pursuant to Italian Legislative Decree 231/2001 may be insufficient to prevent fraud and may fail to prevent certain officers or employees from engaging in unlawful conducts, for which the TIM Group could be liable*."

Risks Related to the TIM Group's Financial Information

The pro forma financial information of the TIM Group may not be necessarily representative of the results that the TIM Group would have achieved as a result of the Transactions and may not be a reliable indicator of its future performance.

During all historical periods covered by the financial statements included in this Exchange Offer Memorandum, and until the consummation of the Transactions, NetCo has been and will be part of the TIM Group. Accordingly, the TIM Group historical financial information cannot be used as a basis for evaluating the TIM Group's financial condition, results of operations and expected future performance following the Transactions.

The pro forma financial information of the TIM Group included in this Exchange Offer Memorandum was prepared solely for illustrative purposes and does not reflect, *inter alia*, the amount of goodwill that will be attributed by the TIM Group to the NetCo Business, following the application of the applicable IFRS accounting principles, such as IAS 36 (*Impairment of Assets*), at the Acquisition Closing Date and after the final determination of the purchase price for the Acquisition. The *pro forma* financial information of the TIM Group included in this Exchange Offer Memorandum is based on assumptions and its usefulness is, therefore, inherently limited. Such *pro forma* financial

information is derived and give effect to the Transactions by applying certain *pro forma* adjustments to the historical consolidated financial statements of the TIM Group. In preparing the *pro forma* financial information of the TIM Group included in this Exchange Offer Memorandum, the TIM Group made certain adjustments to the historical consolidated financial statements of the TIM Group based on the TIM Group's management's data and information, currently available information and on assumptions that the TIM Group's management believes are reasonable. The estimates and assumptions used in the calculation of such pro forma financial information, including (i) the exclusion of the NetCo assets, FiberCop, Telenergia, (ii) an assumed debt transfer as part of the Exchange Offers and the unwinding of the relevant hedge contracts, (iii) an assumed cash-in from the Acquisition, including in connection with a payment by Optics to TIM in respect of the Exchange Offers in accordance with the Transaction Agreement, (iv) the repayment of the FiberCop Intercompany Loan and (v) certain adjustments, including the impact of the Master Services Agreement and the Transitional Services Agreement, may be materially different from the actual results. For example, the TIM Audited Consolidated Pro Forma Carve-Out Financial Information does not reflect the potential cash relating to payments from TIM to NetCo or Infratel to reimburse part of the advance payments received by the TIM Group within the framework of the tenders for the "Italia a 1 Giga" Plan, the "Italia 5G" Plan, and the Fiber Backhauling Tender. See "*Regulation of the TIM Group—Regulatory Levies" and "Regulation of NetCo—Regulatory Levies*." In addition the pro forma financial information of the TIM Group includes €425 million relating to the reclassification, among net financial position items, of a portion of the non-financial liability related to NRRP advance payments received by TIM at the end of 2023. Following the Transactions, TIM could be required to reimburse these advances, as it would no longer be entitled to such grants, given that those advance payments are related to capital expenditures that have yet to be made. Furthermore, the *pro forma* financial information of the TIM Group included in this Exchange Offer Memorandum does not give effect to any other events than those described in such *pro forma* financial information, and the notes thereto, nor does it reflect forward-looking data, as it was prepared to represent only the isolatable and objectively measurable effects of the Transactions, without taking account of the potential effects of changes in management policy and operating decisions resulting from the Transactions. Considering that the purposes of the *pro forma* financial information included in this Exchange Offer Memorandum are different than those of the historical consolidated financial statements, the two sets of data should be read and interpreted separately, without trying to connect them from an accounting perspective.

For more information, see "*Summary Historical Consolidated Financial and Other Information and Pro Forma Carve Out Information of the TIM Group*" and "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the TIM Group—Liquidity and Capital Resources*."

Risks Related to NetCo

Risks Related to NetCo's Business Activity and Industry

NetCo operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business.

NetCo operates in the fixed telecommunications industry in Italy and, therefore, its operations are subject to extensive, costly and evolving European and Italian regulatory regimes. Changes in such laws and regulations, or failure by NetCo to comply with such laws and regulations, could materially and adversely affect NetCo's business, financial condition, results of the operations, reputation and prospects.

On top of environmental, building, zoning, seismic and fire prevention regulations, generally applicable to the infrastructure operations of NetCo, NetCo is subject to the specific regulatory framework for electronic communication services established by the EU Parliament and Council, as implemented in Italy.

Pursuant to the EU regulatory framework, the Italian regulator, the AGCOM, is required to identify operators with SMP in the relevant markets subject to regulation. On the basis of Market Analyses, AGCOM imposes requirements necessary to address identified competition problems.

Within this regulatory framework, the main risks NetCo faces include the lack of predictability concerning both the timing of the regulatory proceedings and their final outcome and possible AGCOM decisions that apply retroactively and their potential impact on NetCo' business, results of operations, financial condition and on the guidance presented to the market (*e.g.*, definition of wholesale prices).

New Market Analyses shall be periodically conducted by AGCOM in order to (i) deal with the evolution of market conditions and technology developments and (ii) set the rules for a subsequent period of up to five years (potentially extended to up to six years upon a AGCOM's specific application process to the European Commission).

In addition, a specific Market Analysis shall be conducted each time a vertically integrated operator with SMP notifies a detailed delayering project pursuant to Article 89 of Italian Legislative Decree No. 259 of 2003 (*separazione volontaria da parte di un'impresa verticalmente integrata*), such as the one envisaged as part of the Transactions. On June 21, 2023, AGCOM called a public consultation concerning a scheme for a new Market Analysis aimed at regulating the period 2024-2028. A final draft was approved by AGCOM at the end of January 2024 and submitted to the AGCM for its opinion. Following the receipt of AGCM's opinion, the draft has been notified to the European Commission and made public. The final text of the Market Analysis is expected to be published in the first half of May 2024, following the receipt of the European Commission's comments. Although NetCo may contribute to public consultations promoted by AGCOM to update the regulatory framework applicable to its operations, there can be no assurance that AGCOM will take into account NetCo's comments and proposals, thus setting forth a regulatory framework applicable to its business which is not in line with NetCo's expectations.

On January 19, 2024, TIM notified AGCOM of its intention to proceed with a detailed delayering project. As TIM is an operator with SMP, the notification will trigger a new Market Analysis. Depending on the results of the Market Analysis, NetCo may be officially recognized by AGCOM as a "wholesale-only" operator within the meaning of Article 91 of Legislative Decree No. 259 of 2003.

While it is expected that NetCo will be recognized as a "wholesale-only" operator, it is currently uncertain whether, when and to what extent AGCOM may grant such recognition. Regulation is a key factor in evaluating the likelihood of return on investments and therefore in deciding where to invest. Regulatory uncertainty and regulatory changes imposed on NetCo may impact its expected revenue and make it more difficult to make important investment decisions. See "*NetCo Regulation*" and "*—Risks Related to NetCo's Legislative and Legal Framework*" for further details.

Moreover, a high level of disputes arising from operators challenging AGCOM decisions before administrative courts results in an even greater degree of uncertainty with respect to rules and economic requirements.

AGCM and AGCOM, may also intervene in NetCo's business, setting fines and/or imposing changes in its service provision operating processes and in its offers.

Due to the continuous evolution of the regulatory regime affecting various parts of its business, NetCo is unable to clearly predict the impact of any proposed or potential changes in the regulatory environment in which it operates. Regulations in the telecommunications industry are constantly changing to adapt to new competition and technology. See "*NetCo Industry Overview*" and "*—NetCo is subject to market competition*." Changes in laws, regulation or government policy could adversely affect NetCo's business and competitiveness. In particular, NetCo's ability to compete effectively in its existing or new markets could be adversely affected if regulators decide to expand the restrictions and obligations to which NetCo is subject (or to which NetCo may become subject as a result of the upcoming Market Analyses mentioned above) and/or extend them to new services and markets. Finally, decisions by regulators regarding the granting, amendment, revocation or renewal of NetCo's authorizations and/or public concessions, or those of third parties, could adversely affect NetCo's future operations.

NetCo is required to provide telecommunication service providers with access to its network infrastructure and capacity at regulated terms and conditions.

Italian laws and regulations require telecommunication infrastructure operators to give access to their telecommunication infrastructure to telecommunication service providers.

While NetCo endeavors to offer wholesale services on market terms where possible, and indeed it is to NetCo's advantage to maximize usage of its network, its core business includes tariff-regulated services in the wholesale market, which are expected to account for a sizeable share of NetCo's revenues. The terms of these wholesale agreements, particularly pricing, could be subject to lighter regulation or regulatory interventions in the form of the so called "fair and reasonable" prices, subject to NetCo's recognition as a "wholesale-only" operator, which recognition may only occur several months after the Acquisition Closing Date. As a result of current or future

regulatory constraints, NetCo may not be permitted to charge telecommunication service providers who lease its network infrastructure the fees that NetCo would consider, from time to time, as adequately profitable. Should the relevant regulatory body set unfavorable conditions for any of these services, this could materially and adversely impact NetCo's business, financial condition and results of operation. See "*—NetCo operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment could adversely affect its business,*" "*—There can be no assurance that NetCo will be able to deliver any or all of the related expected benefits of the Transactions from a regulatory perspective, including as a result of NetCo's recognition as a "wholesale-only" operator*" and "*NetCo Regulation*."

To the extent cost-orientation obligations based on the BU-LRIC$^+$ model, as implemented by AGCOM, could be maintained with regard to certain of NetCo's activities, NetCo's business, results of operations and financial condition may be adversely affected.

Although NetCo expects that, as a result of the AGCOM's assessment in the context of the Market Analysis which will take into consideration the effects of the Transactions, NetCo's regulated activities will be relieved from the cost-oriented approach based on the BU-LRIC$^+$ model, it is currently uncertain whether, when and to what extent AGCOM may grant such relief. The BU-LRIC$^+$ model is implemented by AGCOM, which determines service pricing by considering, among other things, network and equipment costs, projected sales volumes, maintenance, commercial costs and the impact of the cost of capital and inflation.

Even if NetCo will only be subject to fair and reasonable pricing, AGCOM may use BU-LRIC$^+$ as a benchmark in the context of Market Analyses that are generally expected to occur every five years. See "*—NetCo operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business.*" Since this is a forecast cost model, the application of the BU-LRIC$^+$ model could generate negative or positive effects for NetCo as a result of any discrepancies between the forecasts of the model made by AGCOM and the actual statistics that will be accounted for by NetCo regarding, among others, inflationary dynamics, demand volumes and costs. If the BU-LRIC$^+$ model is applied to certain of NetCo's tariffs and any such discrepancies occur, NetCo could be unable to or find it difficult to pass through its costs, which could have a material adverse effect on its business, results of operations and profitability. See "*—NetCo is subject to market competition*."

Following the successful completion of the Transactions, the TIM Group will become a key customer of NetCo and as such any material deterioration of the TIM Group's business could negatively affect NetCo's business, financial condition and results of operations.

In connection with the Transactions, the TIM Group will divest its ownership interest in NetCo. For further information, see "*Summary—The Transactions*." This divestment will transition the relationship between NetCo and the TIM Group into a new phase of commercial engagement. Pursuant to the Transaction Agreement, on the Acquisition Closing Date, the two parties will enter into the Master Services Agreement. For further information regarding the Master Services Agreement, please refer to "*Summary—The Transactions—Master Services Agreement*."

Pursuant to the Master Services Agreement, NetCo will, among other things, provide certain services to the TIM Group and the TIM Group will provide certain services to NetCo. The Master Services Agreement is established for an initial term of 15 years, with a renewal mechanism, under terms to be negotiated, for an additional term. In the event of a decline in the TIM Group's subscribers or if any other factors described in the "*Risk Factors—Risk Factors Related to NetCo*" section necessitate a renegotiation of the Master Services Agreement, NetCo could face challenges in making such adjustments due to the long-term nature of the agreement. As a result, NetCo would remain obligated to fulfil the terms of the Master Services Agreement, limiting its ability to mitigate revenue losses. In addition, during the duration of the Master Services Agreement, there can be no assurance that disputes will not arise between NetCo and the TIM Group. In the event of a dispute, any actions NetCo or the TIM Group could take, including the application of contractual penalties, to resolve the dispute could result in additional costs or lower revenues for NetCo. If the TIM Group were to withhold payments for NetCo's services, NetCo's cash flow and financial position could be materially adversely affected.

Furthermore, any prolonged disruption to the relationship between NetCo and the TIM Group could have a material adverse effect on NetCo's reputation among its other major customers, which could raise concerns about the dependability of NetCo's services, potentially compromising long-term customer relationships. For example, such shift in perception might cause other NetCo's customers to question NetCo's services reliability, leading to a domino effect where more customers might decide (i) against renewing their agreements and/or (ii) to switch to alternate providers, where available, or alternative technologies operators providing for a similar level of service. See also "—*NetCo is subject to market competition.*"

As part of the Acquisition, TIM and NetCo will enter into the Master Services Agreement on the Acquisition Closing Date. A draft of the Master Services Agreement has been attached to the Transaction Agreement. However, it cannot be ruled out that changes to the language or content of such draft could be made if, in the context of the discussions with the relevant authorities, supplementary or amending provisions would be instrumental to evidence of the Master Services Agreement's compliance with applicable laws. To the extent that the consequence of any such changes shall have not been already addressed in the draft of the Master Services Agreement, these supplementary or amending provisions could affect the future business of the TIM Group, Purchase Price and the pro forma financial information included in this Exchange Offer Memorandum, which have been calculated based on certain assumptions, including the economic conditions currently anticipated under the Master Services Agreement.

Should any of the above risks materialize, this could have a material adverse effect on NetCo's business, financial condition, results of operations and prospects.

NetCo is subject to market competition.

Telecommunications operators, such as NetCo, are navigating a landscape marked by significant technological changes and challenging market conditions. As such, although not necessarily with the same degree of geographic penetration or range of service offered, NetCo faces direct competition from alternative network operators ("**AltNets**"), and may face indirect competition from other substitute technologies, such as high-speed wireless, FWA and LEOS broadband services.

In the Italian fiber fixed-line market, Open Fiber is the only AltNet and it has undertaken development plans for ultrabroadband networks in major Italian cities (i.e. Black Areas) and previously underserved "market failure" zones (i.e. White Areas). NetCo's competitive dynamics differ across these coverage areas. In Black Areas, NetCo risks infrastructure overlap with Open Fiber's FTTH network, which can intensify competition when OLOs opt to use Open Fiber's connections, potentially resulting in customer and revenue losses for NetCo. In White and Grey Areas, state intervention drives fiber infrastructure build-out, assigning distinct regions to either NetCo or Open Fiber to invest and serve as main FTTH network provider. In regions within White and Grey Areas where Open Fiber is the main FTTH network provider, given that NetCo only provides ADSL and FTTC solutions, it could experience revenue losses as a result of Open Fiber's fiber take-up and a corresponding lower FTTH conversion rate. Such scenarios could have a material adverse effect on NetCo's business, results of operations and financial condition.

Moreover, NetCo may face indirect competition from broadband products delivered using wireless technologies, in particular fifth-generation, or 5G, broadband mobile networks. Even though 5G broadband networks have not yet been thoroughly implemented in Italy, they are potentially capable of high headline speeds that may become comparable to certain current speeds available on NetCo's network, depending on certain factors, including network configuration, proximity to a mobile base station, traffic volume and the hardware and software employed at the provider and user ends. See "*NetCo Industry Overview*" for further information. If mobile network providers are able in certain areas to offer a 5G broadband service with latency and bandwidth comparable to NetCo's services, NetCo may experience losses as telecommunications operators and consumers' demand could shift towards such alternative technology. Furthermore, NetCo may encounter competition from emerging or currently unforeseen substitute technologies, including FWA and those in the early stages of development, such as LEOS technologies. While the speeds offered by FWA and LEOS technologies are currently lower than those typically provided by terrestrial networks, technological advancements could enhance these speeds, potentially impacting NetCo's competitive position in the market.

Despite NetCo's strategic initiatives to enhance efficiency and introduce innovative services, the competitive pressures and the technological advancements within the industry could have a material adverse effect on NetCo's business,

financial condition and results of operations. In particular, the Italian telecommunications market's competition for fiber-based networks, may reduce NetCo's FTTH-related market share and put further pressure on its tariffs for ultrabroadband services.

NetCo's business is capital intensive and there can be no assurance that NetCo will have sufficient liquidity and/or the ability to access financing to fund its capital expenditures for future expansions and/or generate expected returns.

Broadband and ultrabroadband services are undergoing rapid and significant technological changes and a dramatic increase in usage, in particular, the demand for faster and seamless usage of data, including video, across mobile and fixed devices. The COVID-19 pandemic accelerated these trends and also resulted in higher network utilization, as more customers consume bandwidth from changes in "work from home" trends. NetCo must continually invest in its fixed-line infrastructure in order to improve its broadband and ultrabroadband services to meet this increasing demand and changes in its customers and end-consumers expectations, while remaining competitive. Improvements in these services depend on many factors, including continued access to government support initiatives (which includes funds available under the NRRP) and strategic deployment of capital needed to expand its network. After giving pro forma effect to the Transactions, NetCo's growth capital expenditures represented 82% and 79% of its capital expenditures for the year ended December 31, 2023 and 2022, respectively. NetCo's business model is capital intensive, necessitating significant capital expenditure to develop, maintain, repair, upgrade, protect and replace its existing network. In addition, to remain competitive and meet evolving customer needs, NetCo is required to expand, modernize and update its fixed-line infrastructure, including activities such as unbundling, construction, and co-financing of fiber-based network deployment. A careful approach to capital expenditure is essential for NetCo to maintain its status as a prominent fixed-line telecommunications operator and to fulfil its significant growth initiatives, including its fiber roll out plan. As of December 31, 2023, NetCo had completed a relevant portion of its roll out plan.

In order to finish its roll out plan, NetCo expects this to require a substantial amount of capital expenditures particularly in the first years following the successful completion of the Transactions. See "*Business* of *NetCo—Business Areas—Access Services*." NetCo's strategic execution will necessitate substantial cash flow to support the planned capital investment. In addition, additional capital resources could be required if cash flows from its existing fixed-line services prove unable to support the planned capital investment. Moreover, macroeconomic conditions, such as geopolitical instability and inflationary pressures, could influence the timing and terms of debt financing, potentially leading to higher costs, or limited availability or less attractive terms. Should NetCo experience any deficiencies in generating the required cash flow or accessing the financial markets on reasonable terms, if at all, this could have a material adverse effect on its business, results of operations and financial condition.

Moreover, the execution of NetCo's roll out plan (i.e. the amount and timing of NetCo's future capital requirements) may differ materially from its current estimates due to various factors beyond its control, including, but not limited to:

- increases in operating costs;
- labor disputes and disputes with contractors and sub-contractors;
- inadequate engineering, project management, capacity or infrastructure, including as a result of failure by third parties to fulfil their obligations relating to the provision of utilities and transportation links that are necessary or desirable for the successful operation of a project;
- inflationary pressures;
- adverse weather conditions and natural disasters;
- changes in law, rules, regulations, governmental priorities and regulatory regimes;
- political, social and economic conditions; and
- physical and/or cyber threats.

As a result, NetCo could be required to raise additional debt financing in amounts that could be substantial. The type, timing and terms of any future source of debt financing will depend on its cash needs and the prevailing conditions in the financial markets. See also "*Risks Related to NetCo's Financial Information—NetCo Audited Combined Carve-out Financial Information and NetCo Unaudited Combined Pro Forma Carve-out Financial Information, as the case may be, may not be necessarily representative of the results that NetCo would have achieved as a separate and independent company and may not be a reliable indicator of its future performance*" and *"—NetCo has no history of operating as an independent company.*" In addition, NetCo may not be able to accomplish any of these measures on a timely basis or on commercially reasonable terms, if at all. NetCo may not be able to generate sufficient cash flows in the future to meet its capital expenditure needs, sustain its operations or projected returns, which may have a material adverse effect on its business, financial condition and results of operations. See "*Management's Discussion and Analysis of Pro Forma Carve-out Financial Information and Results of Operations of NetCo*."

NetCo's costs of developing, maintaining, repairing, upgrading, protecting and replacing its existing fixed-line network are high and could become higher than expected.

NetCo must continue to develop, maintain, repair, improve, upgrade and replace its existing fixed-line network in a timely and satisfactory manner to retain and expand its offering in each of its coverage areas. A reliable and high-quality network is necessary to sustain its customer base, maintain strong customer relationships and a good reputation and satisfy regulatory requirements, including minimum service requirements. The continuous development, maintenance, repair, enhancement, protection, and renewal of NetCo's network are critical activities that require dedicated management's time and capital investment. These activities are also sensitive, among other things, to changes in commodity prices and hinge on NetCo's ability to:

- ensure ongoing maintenance, timely repairs and upgrades to maintain the functionality of its fixed-line network, enabling the provision of increasingly tailored services to customers;
- enhance network coverage, particularly in areas where NetCo faces competition and needs to strengthen its market presence;
- improve and streamline network management and administrative systems to support efficient operations;
- invest in the development and expansion of network capacity to meet the growing demand for bandwidth; and
- modernize and upgrade outdated systems and network segments throughout Italy, transitioning from legacy copper networks to advanced fiber-based infrastructure to meet current and future connectivity needs.

Many of these factors are not entirely under NetCo's control and may be affected by, among other things, applicable laws and regulation. If NetCo fails to develop, maintain, repair, improve, upgrade and replace its existing fixed-line network, its services may be less attractive to its customers, which could have a material adverse effect on its business, financial condition, results of operations and prospects.

In addition, to support these operational needs, NetCo must incur substantial maintenance capital expenditures. For the year ended December 31, 2023, these maintenance capital expenditures represented a significant portion of NetCo's revenue and are expected to continue to similarly affect NetCo's revenue particularly in the first years following the successful completion of the Transactions, underscoring the ongoing substantial investment required to maintain and enhance the network. See "*Management's Discussion and Analysis of Pro Forma Carve-out Financial Information and Results of Operations of NetCo*." In addition, due to rapid changes in the telecommunications industry, NetCo's network investments may prove to be inadequate or may be superseded by new technological changes. See "*—NetCo is subject to market competition.*" As a result, NetCo may encounter situations that necessitate additional capital expenditure to address such events and satisfy customer demand. NetCo may not be able to generate sufficient operating cash flows and external financing sources may not be available in an amount sufficient to enable it to meet such additional capital expenditures on schedule or at all. Inability to execute timely and sufficient capital expenditures or investments, or to allocate funds effectively, could compromise the reliability and performance of NetCo's network. This could in turn have a material adverse impact on NetCo's business, financial condition, results of operations and prospects.

NetCo's business may be adversely affected if it fails to successfully implement its ultrabroadband fixed-line network strategy and objectives.

One of NetCo's goals is to accelerate the roll out of a new telecommunications network capable of providing its customers with ultrabroadband connections, also in part thanks to the use of government subsidies and funds, such as those linked to the NRRP in the regions where NetCo won tenders.

However, the implementation of ultrabroadband technologies is dependent on a number of factors, including:

- NetCo's ability to secure government subsidies and funds;
- Growing competition for NetCo, especially in the Black Areas where Open Fiber operates;
- NetCo's ability to provide superior ultrabroadband services to its customers relative to Open Fiber;
- NetCo's delayed receipt of the necessary permissions and authorizations for installation of lines (including any required permits in relation to environmental, urbanistic, building, expropriation, zoning and fire prevention matters) and NetCo's ability to ensure continued compliance with the requirements set forth by such permits;
- resistance by road administrators to the use of innovative techniques for excavation and the laying of fiber optic cables;
- delay in supply of material and devices due to possible supply chain shocks;
- potential network interruptions or related capacity problems with network infrastructure;
- NetCo's ability to obtain adequate returns from the investments related to its network development;
- increase in transport, raw materials and labor costs of network companies due to inflationary pressures and increase in energy costs (see "*—Risks related to Macroeconomic Conditions Affecting NetCo*"); or
- delay by SINFI (*Sistema Informativo Nazionale Federato delle Infrastrutture*) in the verification and control activities required for coordination and transparency under the new Italian broadband and ultrabroadband strategy (among other functions, SINFI promotes the sharing of infrastructure through an orderly management of underground and above ground infrastructure and the related maintenance, and also offers a single dashboard that efficiently manages and monitors maintenance).

If NetCo fails to achieve its objectives for the implementation of ultrabroadband coverage promptly, or at all, this may materially and adversely impact its business, results of operations and financial condition.

Furthermore, any delays in completing in NRRP tenders' roll outs are subject to predetermined penalties, which can be significant and have a material adverse effect on the financial outcomes of the projects. These penalties encompass fixed charges per each unconnected street address and increase with the length of the delay, potentially leading to the overall revocation of the awarded grants.

The assumptions used in estimating cost-savings associated with NetCo's fiber roll out and/or NetCo's fiber take-up objectives are forward-looking in nature.

Certain forward-looking cost-savings initiatives associated with NetCo's planned fiber roll out and certain forward-looking fiber take-up objectives and FTTH conversion rates that NetCo expects to realize are presented in the Exchange Offer Memorandum. The assumptions used in estimating cost-savings, including the components of such estimates, and the steps to be taken to realize such cost-savings, as well as and the assumptions used in estimating the timing and degree of fiber take-up NetCo plans to achieve in the short- to medium-term are forward-looking in nature, inherently uncertain and subject to a variety of business, economic and competitive risks and uncertainties. It cannot be guaranteed that the information on which such estimates and assumptions are based on will not change or that

NetCo will be able to realize the cost-savings or benefits that NetCo deems possible based on these estimates and assumptions. See "*Summary—NetCo's Key Strengths*" and "*Summary—NetCo's Strategy*."

NetCo's recognition as a "wholesale-only" operator and its related regulatory benefits will be subject to AGOM's assessment.

NetCo expects that the successful completion of the Transactions will result in NetCo being recognized as a "wholesale-only" operator. However, there can be no assurance that said designation will apply to NetCo after such Transactions, as such decision will ultimately depend on the assessment of AGCOM. See "*—Risks Related to NetCo's Business Activity and Industry—NetCo operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment could adversely affect its business,*" "*NetCo Regulation.*"

Any deterioration of the financial condition of NetCo's key customers could adversely affect its results of operations.

NetCo depends on a limited number of telecommunication operators, including the TIM Group, which contribute a significant share of its revenue. In the event one of NetCo's key customers (i) reduces its demand for NetCo's services, mainly due to (x) changes in NetCo's regulatory framework (*e.g.*, unfavorable pricing models and contractual terms being introduced by regulators), (y) customers' latency and bandwidth needs and/or (z) competing technology advancements (*e.g.*, 5G, LEOS and FWA connectivities), (ii) experiences a major disruption in its business, such as a strike, work stoppage or slowdown or a supply chain problem (iii) files for bankruptcy protection, NetCo's business, financial condition and results of operations could be materially adversely affected. In addition, any consolidation in NetCo's customer base could result in pricing pressure, which in turn could have a material adverse effect on NetCo's business, financial condition, results of operations and prospects. See "*NetCo Regulation*."

NetCo has no history of operating as an independent company.

Upon the successful consummation of the Transactions, NetCo is expected to become the first national independent open-source fixed-line network provider not vertically integrated in a major European country, offering wholesale broadband and ultrabroadband services to telecommunications operators. However, NetCo has not previously operated as an independent company.

As NetCo transitions to full independence in its operations, supported by the Transitional Services Agreement with the TIM Group, the predictability of its future performance remains uncertain. In particular, NetCo's business will require the ongoing availability and uninterrupted operation of internal and external systems and services. As part of its transition to an independent and fully operational company, NetCo will receive certain services from the TIM Group under the Transitional Services Agreement, which will include, among other things, services related to IT hybrid systems and cyber-security. Any disruption in the operation of these facilities or platforms or access to the Internet would adversely affect the NetCo's business, financial condition and results of operations. For further information, see "*—Achieving a fully operational regime may be complex, could cause NetCo to incur unexpected costs. There can be no assurance that NetCo will be able to deliver all of the expected benefits underlying the Transactions*" and "*Summary—The Transactions—Transitional Services Agreement*." In particular, following the Transactions, EBLco and other shareholders will appoint new directors to the board of directors of the NetCo group of companies. The board of directors of Optics HoldCo will be in charge of, among other things, appointing the senior management of the NetCo group in consultation with EBLco and other shareholders. The NetCo Group could also encounter challenges in recruiting the necessary executive talent. See "*—Failure to recruit, retain and engage skilled employees may materially and adversely impact NetCo's business, financial condition, results of operations and/or prospects*." The expertise and understanding of NetCo's business, regulatory constraints and market dynamics by such directors and senior executives cannot be assured.

Furthermore, the estimated costs and timelines for achieving full independence in its operations are subject to risks and uncertainties, including those associated with NetCo establishing itself as a fully independent wholesale telecommunications operator. There can be no assurance that NetCo's estimates regarding the costs and time required for such transition will be accurate. See "*—Certain information relating to NetCo and the impacts of the Transactions on Optics have been provided by Optics and have not been independently verified by the TIM Group*." The transition process is complex and may encounter delays, budget overruns and other unknown or unforeseen factors. NetCo's

ability to develop the necessary operational and administrative capabilities to function independently or expand its business cannot be guaranteed.

In addition, the considerable majority of NetCo's revenue is expected to be subject to regulatory constraints. See "*NetCo Regulation*" and "*—To the extent cost-orientation obligations based on the BU-LRIC+ model, as implemented by AGCOM, could be maintained with regard to certain of NetCo's activities, NetCo's business, results of operations and financial condition may be adversely affected*." These changes could have a material adverse effect on NetCo's ability to finance its capital expenditures as well as manage its debt obligations effectively.

Prospective investors of the Optics Notes should carefully consider NetCo's business and prospects in light of the risks and challenges NetCo faces as a company with no independent operational history, low diversification and subject to certain regulatory constraints. Key considerations include NetCo's ability to:

- retain its customer base, especially in competitive market segments;
- accurately price services not governed by regulated pricing models;
- successfully service its customers;
- maintain and improve its operational efficiency;
- successfully operate and improve its technology platform while maintaining a reliable, secure, high-performance, and scalable network infrastructure;
- carefully and appropriately budget expenses;
- attract and retain qualified personnel, including NetCo's senior management;
- anticipate trends that may emerge and affect its business;
- anticipate and adapt to changing market conditions, including technological developments and changes in competitive landscape;
- obtain, maintain, and renew necessary licenses and authorizations in a timely and cost-effective manner;
- secure government subsidies promptly; and
- navigate a dynamic and intricate regulatory environment.

Failure to successfully address these risks and challenges could materially and adversely affect NetCo's business, results of operations, financial condition and prospects.

Achieving a fully operational regime may be complex, could cause NetCo to incur unexpected costs. There can be no assurance that NetCo will be able to deliver all of the expected benefits underlying the Transactions.

In connection with the Transactions, on the Acquisition Closing Date, NetCo will enter into a Transitional Services Agreement with the TIM Group pursuant to which, among other things, the TIM Group will agree to provide or procure certain transitional services to NetCo for a certain period of time with the aim of facilitating the transition to separate operations. These services include, *inter alia*, certain information technology, such as the provision of the TIM Group's IT hybrid systems and cyber-security services. For further information regarding the Transitional Services Agreement, please see "*Summary—The Transactions—Transitional Services Agreement*." As a result, during the term of the Transitional Services Agreement, NetCo could be subject to, among other things (i) certain one-time costs and other duplicative expenses associated to transitional activities, (ii) unexpected additional costs or adverse impacts on its business functions as a result of the separation process or performance of NetCo's obligations under such Transitional Services Agreement and/or (iii) potential liabilities if it fails to deliver certain obligations to

the TIM Group or does not receive the necessary services from the TIM Group, each of which could adversely affect its business, results of operations and financial condition.

Moreover, there can be no assurance that NetCo will successfully complete the transition to a fully operational company within NetCo's estimated timeline. In such event, failure to renew or replace such arrangements on a comparable basis could have a material adverse effect on NetCo's business, financial condition, results of operations and prospects. See also "*—NetCo has no history of operating as an independent company*."

NetCo relies on certain suppliers to provide services to its direct customers and to support its operations. Any delay or failure by such suppliers to provide their services or products, any increase in the prices they charge NetCo or any decision not to renew their contracts with NetCo could cause delay or interruptions in its operations, which could damage its reputation and result in the loss of revenue and/or customers.

NetCo has key relationships with limited hardware, software and services suppliers essential for delivering its services. It also depends on limited number of leading international telecommunications equipment manufacturers for equipment and services necessary to maintain and expand its fixed-line network infrastructure.

The successful maintenance, expansion and functioning of NetCo's network are contingent upon timely access to core and transmission telecommunications equipment (*e.g.*, network terminals and base stations), network materials (including fiber optics and copper), switching equipment, radio access network solutions and other essential services and products. Most of this equipment cannot be sourced locally.

NetCo's operations could be significantly affected by disruptions in the business or supply chains of its key suppliers due to various factors, including, among other things, major geopolitical events, changes in laws or regulations, the imposition of restrictions to manage health crises such as the COVID-19 pandemic, ongoing military conflicts such as the Russia-Ukraine conflict, trade disputes, and direct or indirect export and re-export restrictions. In addition, NetCo aims to engage a number of independent contractors to outsource certain operations aimed at developing and upgrading its network and the services provided to its customers. Although NetCo works with a carefully selected and closely monitored limited number of independent contractors, it cannot ensure that their tasks will always be executed properly, timely and in full compliance with NetCo's stringent quality and safety standards, or that these tasks will not be further delegated to subcontractors.

Should products or services from suppliers or independent contractors prove defective, or if they fail to perform their tasks adequately, enforcing recourse claims against them may be challenging, particularly if they are insolvent, either wholly or partially. Such scenarios could have a material NetCo's business, financial condition and results of operations.

Moreover, NetCo might find difficulties in find replacements for its suppliers or independent contractors if they fail to provide the equipment or services that NetCo deems necessary. Any delays or difficulties in obtaining adequate supplies or services on favorable terms could lead to increased costs or impede NetCo's ability to maintain and expand its network, which could materially and adversely affect its business, financial condition, results of operations and prospects.

There can be no assurance that NetCo will be able to obtain products and services critical to deliver high quality broadband and ultrabroadband services to its customers, in a timely manner, on competitive terms and in adequate amounts, or at all. The occurrence of any of these risks may create technical problems, damage its reputation, result in the loss of customers, each of which could have a material adverse effect on its business, financial condition and results of operations.

NetCo's business may be affected by unpredictable instant surges in traffic.

NetCo's fixed-line network performance may be significantly impacted by sudden and substantial surges in traffic, such as those caused by live video events broadcasted by OTT or CSPs over the IP network. Such unexpected increases in traffic may lead to network congestion, resulting in slowdowns or temporary disruptions in communication. These performance issues have the potential to harm NetCo's reputation and customer satisfaction. In Black Areas, where

NetCo primarily faces competition, these service disruptions could result in end-consumer churn, which in turn could potentially affect NetCo's business operations and financial results. See "—*NetCo is subject to market competition*."

System and network failures could result in reduced traffic and reduced revenue and could harm NetCo's reputation.

NetCo's future success largely depends on the continued and uninterrupted performance of its IT, fixed-line network infrastructure and of certain hardware that it manages for its customers. In particular, NetCo's operations require uninterrupted, accurate, permanently available, real-time and safe transmission of data through its fixed-line network.

NetCo's technical infrastructure (including its network infrastructure for fixed telecommunications services) and the assets managed on behalf of its customers, are vulnerable to damage or interruption from technology failures, power loss, floods, heatwaves, windstorms, fires, terrorism, intentional wrongdoing, human error and similar events. Unanticipated problems at NetCo's facilities, system failures, hardware and software failures, computer viruses and cyber-attacks (including information theft, data corruption, operational disruption or financial loss associated with the foregoing) and data leakage, as well as terrorist attacks against its infrastructure could affect the quality of its services and cause service interruptions. Any of these occurrences could result in reduced user traffic and reduced revenue and could negatively affect NetCo's levels of customer satisfaction, reduce its customer base and harm its reputation.

NetCo has implemented processes of vulnerability analysis, development of technical protection solutions, optimization of capital allocation on technical investments and partial financial transfer of risk to the insurance market in order to seek to address the risks described above but there can be no assurance such measures will be sufficient.

NetCo's business is subject to cybersecurity risks.

NetCo's fixed-line network and equipment are vulnerable to a range of cybersecurity threats.

Despite efforts to modernize its fixed-line network and replace outdated systems, NetCo's networks and systems are vulnerable to security threats, including cyber-attacks from internal and external sources. The cyber security attacks may be committed by third parties operating in any region, including jurisdictions where law enforcement measures to address such attacks are unavailable or ineffective. These attacks can disrupt service availability and compromise data, posing a significant risk to NetCo's reputation as a prominent provider of critical fixed-line network infrastructure. NetCo works to prevent and limit the impact of cyber-attacks, but an absolute protection cannot be guaranteed and NetCo or its third-party providers and other contractors cannot assure that cyber-attacks may materialize in the future.

To address these risks, NetCo must continue to identify and address technical vulnerabilities and weaknesses in its processes and enhance its ability to detect and respond to incidents. This includes strengthening security in the supply chain and ensuring the security of its IT systems.

Furthermore, in order to partially mitigate any economic-financial impact deriving from cyber-attacks, NetCo has structured a specific financial risk transfer policy through dedicated insurance coverage. In addition, further obligations may be imposed on NetCo in case NetCo is included within the National Cyber Security Perimeter – NCSP following the successful completion of the Transactions.

The inability to operate NetCo's fixed-line network and systems as a result of cyber-attacks, even for a limited period of time, may result in significant expenses, reduced customer satisfaction and potential loss of revenue. The costs associated with a major cyber-attack could include expensive incentives offered to existing customers to retain their business, increased expenditures on cyber-security measures and the use of alternate resources, lost revenues from business interruption and litigation. A major security incident or business interruption, or non-compliance with applicable laws and regulations, could result in financial loss, reputational damage, negative ESG impact, market share loss and regulatory sanctions. Further, as cyber-attacks continue to evolve, NetCo may incur significant costs in the attempt to modify or enhance its protective measures or investigate or remediate any vulnerability. Any loss of confidential or proprietary data through a breach could have a material adverse effect on NetCo's business, financial condition, results of operations and prospects. Pursuant to the applicable data protection regulations, if a significant or widely publicized unlawful disclosure of employee or customer data were to occur, whether as a result of a failure

of NetCo's information technology security systems and/or employee negligence, NetCo may be subject to legal claims by individuals, fines or other enforcement action. *See* "*—NetCo's activities could be materially negatively affected by failure to comply with GDPR and Italian Privacy Code.*"

Future partnerships or joint ventures that NetCo may enter into may not bring the expected financial results and could harm its business.

NetCo may enter into relationships with other businesses in order to further expand its presence across business segments and coverage areas. Negotiating these transactions can be time-consuming, difficult and expensive, and NetCo's ability to close these transactions may be subject to third-party approvals, such as government regulatory approvals, which are beyond its control. Consequently, no assurance can be made that these transactions, once undertaken and/or announced, will eventually close. NetCo may invest substantial amounts in these joint ventures and it cannot be assured that they will produce the expected returns.

NetCo may enter into strategic transactions, such as acquisitions, investments or dispositions, involving unforeseen risks, and it may not realize the financial and strategic goals that were contemplated at the time of any transaction and, additionally, there are risks associated with the integration of any acquisitions.

As part of NetCo's business strategy, NetCo may evaluate and pursue strategic and opportunistic acquisitions and investments, any of which could be material to its financial condition or results of operations. It cannot be guaranteed that NetCo will be able to continue making such acquisitions and investments, and its ability to enter into these transactions may be limited by many factors, including availability of financing, complex ownership structures among potential targets, competition from other potential acquirers and government regulation. In addition, if the Purchase Price is paid in cash, this will reduce NetCo's cash reserves. Further, NetCo's debt burden may increase if it borrows funds to finance any future acquisition or investments, which could have a negative impact on its cash flows and its ability to finance its overall operations and make cash interest payments on its outstanding indebtedness, including the Optics Notes. Acquisitions and investments pose certain risks, for example, difficulties or delays in consolidating operations and achieving anticipated synergies, cost savings, revenues and cash flow enhancements, growth, ESG performance integration, operational efficiencies and other benefit, diversion of managerial resources away from its day-to-day business operations and the assumption of unexpected liabilities and undisclosed risks. Even if NetCo may be successful in acquiring new businesses, the integration of such businesses may prove to be more difficult than it initially anticipated and could create unforeseen operating difficulties and expenditures. However, it cannot be assured that any benefits will materialize, or it may not suffer any losses in connection to the used funds and to the opportunity costs related to such transactions.

Additionally, NetCo may encounter liabilities during due diligence for future acquisitions or investments that were not disclosed or underestimated, such as unpaid debts, tax or pension liabilities, or legal and regulatory compliance issues. The due diligence process, reliant on available resources and information from sellers and third-party advisors, may not uncover all relevant facts, and there can be no assurance of the completeness or ongoing accuracy of the information provided.

Furthermore, certain of NetCo's contracts contains "change of control" provisions that require the acquired or acquiring company to notify the counterparty of a potential change of control, or contain language that could be interpreted as allowing, subject to certain conditions, the counterparty to terminate the contract. If a substantial number of these contracts are or will be terminated as a result of a potential acquisition or disposition, NetCo may be forced to enter into new contracts on less favorable terms, or it may be unable to secure replacements. While it strives to mitigate unexpected liabilities and risks though contractual protections in its acquisition and disposition documentation, it cannot be assured that such protections will be effective.

Any of these risks, individually or in the aggregate, could have a material adverse effect on NetCo business, financial condition and results of operations.

NetCo may encounter compliance issues and have liabilities that are not known to Optics or greater than anticipated.

NetCo may have liabilities or compliance issues with respect to applicable laws and regulations that were unknown to the TIM Group and Optics or that Optics failed or was unable to discover while performing its due diligence investigations in connection with the Transactions. In addition, Optics may underestimate the actual value of the liabilities that Optics discovered in connection with such due diligence activities. Therefore, such liabilities may be greater than Optics expected. See "*NetCo Regulation*" and "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Legislative and Legal Framework*." Any such unknown or previously underestimated liabilities or any compliance issues, individually or in the aggregate, could have a material adverse effect on NetCo's business, financial condition and results of operations. In addition, there can be no assurance that the due diligence exercise Optics has undertaken highlighted all relevant facts necessary or helpful in evaluating the Transactions.

NetCo is dependent on intellectual property rights, particularly patents and licenses, and inadequate protection of its intellectual property rights, or intellectual property rights litigation, could adversely affect its business.

NetCo depends on copyright, trademark, and patent laws to establish and safeguard its intellectual property rights, but cannot guarantee the effectiveness of its actions to prevent violations or ensure the protection of its intellectual property, particularly its patents. Litigation may be necessary to enforce its patent rights, which could be costly and ultimately unsuccessful, this may potentially impact on certain aspects NetCo's business relying on the exclusive use of NetCo's own intellectual property, if any, and could ultimately affect NetCo's results of operations and financial condition.

Upon completion of the Transactions, NetCo will rely mainly on agreements with third parties, including vendors of network apparatus/systems and service vendors, to utilize its network, conduct operations and provide services. Intellectual property warranty, hold-harmless and indemnification clauses in the agreements with providers are meant to protect NetCo, to the extent possible, from intellectual property disputes with third parties. Notwithstanding the above, NetCo, operating in an industry prone to intellectual property disputes, may encounter aggressive litigation from other market participants or non-practicing entity intellectual property owners. Despite efforts to comply with intellectual property laws, ensure intellectual property warranty, hold-harmless and indemnification protection from third party providers and establish intellectual property compliance mechanisms, there is no guarantee against infringement of third-party intellectual property rights, particularly on any internally developed (or internally integrated) network or service solution used by NetCo or provided by NetCo to clients, as any such solution, being not entirely sourced from third parties, might be not fully covered by the provider's intellectual property warranty, hold-harmless and indemnification protection. Such claims or lawsuits could be expensive to defend and divert technical and management resources.

The outcome of any litigation related to infringement claims against NetCo is uncertain. Successful claims could result in significant damages, cessation of certain services, or the need to obtain licenses, potentially affecting NetCo's business, results of operations, financial condition and prospects.

Uninsured losses, losses in excess of insurance coverage for certain risks and unanticipated changes in NetCo's insurance costs could have a material adverse effect on its business, financial condition, cash flows and/or results of operations.

NetCo maintains insurance coverage to protect against a broad range of risks, including, among others, property damage, data breaches, business interruptions, directors' and officers' liability, professional indemnity, third party liability, at levels it believes to be appropriate and consistent with current industry practice. However, such insurance may not cover all risks associated with its business and is subject to limitations, including deductibles and limits. NetCo may incur losses beyond these maximum limits or outside the coverage of its insurance policies. If this occurs, and it incurs liability, it could have a material adverse effect on its business, financial condition and results of operations.

In addition, from time to time, various types of insurance for companies in NetCo's industry have not been available on commercially acceptable terms or, in some cases, have not been available at all. In the future, NetCo may not be able to obtain coverage at current levels, and/or premiums and deductibles for certain insurance policies may increase

significantly on the policy coverage that NetCo currently maintains. If some insurance coverages are not available at economically acceptable premiums, there is a risk that NetCo's could decide to reduce its level of coverage.

Furthermore, to discharge an uninsured large claim or prior to receiving significant reimbursement of insurance proceeds, NetCo may need to divert capital from other planned expenditures. Costs associated with unanticipated events in excess of its insurance coverage, or a failure to maintain such coverage could materially adversely affect its business, financial condition, cash flows and results of operations.

Failure to close the digital divide may harm NetCo's business.

The digital divide is a significant barrier to the expansion of digitization and related connectivity services, with risks arising from the mismatch between the supply of advanced products and services and the demand for traditional ones.

A crucial measure of the digital divide is the adoption rate of fiber connectivity, also known as "**take-up**." Deploying fiber networks is capital-intensive, and insufficient consumer take-up presents significant risks for NetCo. In Italy, as of December 31, 2022, the fiber take-up rate was approximately 26.8% according to AGCOM, markedly lower than the corresponding rates recorded in other European countries. This disparity can impact NetCo's reputation, as it may be perceived as failing to facilitate Italy's technological advancement. Additionally, in the long term should NetCo experience low fiber take-up relative to Open Fiber or low FTTH conversion rates it could lead to substantial financial losses, with the potential for significant investments in infrastructure not yielding the expected returns. If NetCo's strategies either to bridge the digital divide or hedge the risk of not doing so by relying upon its existing ADSL and FTTC networks are not effective, NetCo could face reputational harm and revenue losses, adversely impacting its results of operations, financial condition and prospects.

Failure to meet stakeholders' Environmental, Social and Governance ("ESG") expectations, as well as increasing ESG regulatory requirements, may lead to reputational loss, loss of business or limit access to sustainable finance, as well as to the imposition of fines and other regulatory constraints. Operational and financial costs and cost of capital associated with enhancing ESG performance may be significant.

NetCo's operations and value chain have negative environmental impacts, in particular in terms of GHG emissions and of e-waste. The majority of NetCo's GHG emissions are generated from its operations and maintenance activities, while e-waste is primarily associated with network components, such as copper-based products and network equipment.

NetCo is subject to certain requirements and expectations from its stakeholders to manage these negative impacts. There is a growing trend in regulatory and self-regulatory measures globally, focusing on improving energy efficiency in transitioning to fiber-based network infrastructure and CO_2 reduction. Compliance with such environmental standards may result in increased operational and financial costs for NetCo.

The worsening of climate change increases the likelihood and severity of extreme weather events such as droughts, floods, windstorms and heatwaves which may cause severe disruptions to telecommunications services, reduce the work efficiency (hours actually worked) and have a consequential impact on NetCo's business. More extreme weather may also drive the need for additional investments in cooling technology and other more resilient infrastructure; the risk that external environmental condition can pose for business continuity could increase the weighted average cost of capital (WACC). Failure to implement circular business models such as offering of services designed with eco-sustainable criteria or the use of sustainable materials may lead to lost opportunities for cost savings and a failure to realize additional revenue Furthermore, Increasing electricity prices, the availability of renewable energy certificates or the possible introduction of carbon taxation could also increase operational costs for NetCo.

Moreover, there is a global trend towards ESG-related financial disclosure. Several countries have established mandatory disclosure regimes and/or set timelines for the implementation of legislation regarding mandatory climate, social and governance related disclosure requirements. For example, the European Commission has established a number of sustainability-related reporting and compliance regimes, including the Non-Financial Reporting Directive and the Corporate Sustainability Reporting Directive, which will enhance the scope and reporting requirements under the Non-Financial Reporting Directive, as well as proposals for new regulatory regimes that are aimed at, for example, prohibiting corporates from placing or making available on the EU market or exporting from the EU market products

made with forced labor; requiring companies to identify, prevent, bring to an end, mitigate and account for adverse human rights and environmental impacts in operations, subsidiaries and value chains; and enhancing gender pay reporting requirements. The Sustainability Reporting will have to be in accordance with the EU Sustainability Reporting Standards (ESRS), which will increase mandatory reporting requirements. The ESRS will require to disclose information aligned with the EU Taxonomy (2020/852/EU) as well as climate-related information in line with the recommendations of the TCFD. Potentially the lack of criteria aligned to the EU legislation on Taxonomy could have impacts also on the sources of financing.

Failure to meet regulatory and stakeholders' requirements or expectations about ESG topics may lead to reputational loss, loss of business or limit access to sustainable finance, as well as to the imposition of fines and other regulatory constraints.

Failure to recruit, retain and engage skilled employees may materially and adversely impact NetCo's business, financial condition, results of operations and/or prospects.

NetCo's ability to attract, recruit, retain and train qualified, specialized and motivated personnel is essential for executing its business strategies effectively.

The demand and competition for high skilled employees in the telecommunications industry, such as electrical engineers, telecommunication engineers and talents in general is becoming increasingly challenging. To secure appropriate talent, NetCo needs to recruit, develop and retain highly skilled employees. Failure to recruit, develop and retain necessary skilled employees could lead to adverse consequences, such as reduced revenue and increased vulnerability to market downturns. Such outcomes could materially and adversely affect NetCo's business, financial condition, results of operations and/or prospects.

Following the successful completion of the Transactions, the interest of NetCo's controlling shareholder and/or minority shareholders may conflict with the interests of NetCo and the holders of the Optics Notes.

Optics is controlled by funds advised by KKR. Upon the successful completion of the Transactions, Optics will own more than 95.5% of NetCo.

Fastweb currently owns a 4.5% stake in FiberCop. Subject to the outcome of current negotiations among the parties, Optics may acquire Fastweb's stake in NetCo or Fastweb may remain a minority shareholder in NetCo following the Acquisition. If Fastweb continues to be a shareholder of NetCo following the Acquisition, the minority stake of Fastweb is expected to be diluted in connection with the consummation of the Acquisition. There can be no assurance that the interests of this minority shareholders will not conflict with those of NetCo and/or the holders of the Optics Notes.

As a result, KKR via its control of Optics will possess significant influence over most corporate decisions, including the selection and dismissal of a majority of directors, appointment of a certain number of statutory auditors, certain modifications to the NetCo's articles of associations and by-laws and other substantial transactions, including dividend distributions. Consequently, KKR's ability to direct these matters could lead to decisions that may not align with the interests of NetCo and/or the holders of the Optics Notes.

In addition, it is expected that an investment vehicle controlled by the Abu Dhabi Investment Authority, an investment vehicle controlled by the Canadian Pension Plan Investment Board, an investment vehicle controlled by Fondi Italiani per le Infrastrutture SGR S.p.A. and the MEF will invest for a stake of up to approximately 17.5%, 17.5%, 11% and 16% of Optics HoldCo, respectively, with the final stakes of their respective investments depending on the actual equity capital needed at completion of the Transactions. There can be no assurance that the interests of these minority shareholders will not conflict with those of NetCo and/or the holders of the Optics Notes.

KKR is in the business of making investments in companies and may acquire and hold interests in businesses that compete, directly or indirectly, with NetCo and/or that operate in its markets or adjacent ones. In addition, KKR may also pursue acquisition opportunities that are complementary to or in competition with NetCo's business and, as a result, those acquisition opportunities may not be available to NetCo. Furthermore, KKR may hold interests in suppliers or customers of NetCo. KKR and its affiliates could also have an interest in pursuing acquisitions,

divestitures (including one or more divestitures of all or part of NetCo's business or sales of its shares which would result in changes to NetCo's shareholding structure), financings, dividend distributions or other transactions that, in their judgment, could enhance their equity investments, although such transactions might involve risks to prospective investors of the Optics Notes.

There can be no assurance that shareholders deadlocks at Optics HoldCo will not affect the operations and business of NetCo and/or the holders of the Optics Notes.

Other than funds advised by KKR, it is expected that an investment vehicle controlled by the Abu Dhabi Investment Authority, an investment vehicle controlled by the Canadian Pension Plan Investment Board, an investment vehicle controlled by Fondi Italiani per le Infrastrutture SGR S.p.A. and the MEF will invest for a non-controlling stake of up to approximately 17.5%, 17.5%, 11% and 16% in Optics HoldCo, respectively with the final stakes of their respective investments depending on the actual equity capital needed at completion of the Transactions. Consequently, Optics HoldCo faces the risk of its shareholders being unable to agree on critical decisions, which could materially affect its decision-making processes and lead to deadlocks that can further potentially impact the interests of Optics and, following the Push-Down Merger, of NetCo, and as such of the holders of the Optics Notes.

Under Optics HoldCo's shareholders agreement, in the event of a deadlock, which is defined as a matter for which votes in favor and against are equal in number, the shareholders agree to cooperate in good faith to attempt to resolve such deadlock within a designated period. If the deadlock remains unresolved upon expiry of such period, the relevant matter is deemed not approved.

In the event of a deadlock, Optics HoldCo's ability to make timely and effective decisions could be impaired, and potentially affect critical decision-making processes at its direct subsidiary, NetCo. This, in turn, could negatively impact NetCo's operations and financial performance. Moreover, shareholder deadlocks may necessitate additional financial and managerial resources to resolve disputes, including potential litigation or arbitration costs. The effort to break deadlocks could also result in the alteration of governance structure or changes in the Optics HoldCo's shareholder base, which may result in incremental negative outcomes for NetCo's business and/or the holders of the Optics Notes. Accordingly, there can be no assurance that such deadlocks will not occur or, if they do occur, that they will not have a material adverse effect on Optics HoldCo, NetCo or the holders of the Optics Notes.

Certain information relating to NetCo and the impacts of the Transactions on Optics have been provided by Optics and have not been independently verified by the TIM Group.

Certain information presented in this Exchange Offer Memorandum, particularly those related to NetCo's business structure, financial projections and strategic plans, the financial arrangements of Optics in connection with the Transactions as well as the impacts of the Transactions on Optics have been supplied by Optics. See "*Forward-looking Statements*." While TIM's management considers this information and any associated estimates to be reliable, neither the TIM Group nor its advisors or consultants have independently verified their accuracy or completeness, nor have they ascertained the underlying assumptions relied upon therein. This information and estimates involve risks and uncertainties and are subject to change based on various factors, including those described under "*Risk Factors—Risks Related to NetCo*." Accordingly, no assurance can be provided regarding the feasibility of NetCo's business structure and business plans or the accuracy of future performance projections. Prospective investors of the Optics Notes should carefully consider the risks associated with relying on such information when making investment decisions.

Risks Related to Macroeconomic Conditions Affecting NetCo

Global economic conditions and political events could adversely affect NetCo's business, results of operations and financial condition.

NetCo's operations are influenced by global geopolitical events, including the ongoing Russia-Ukraine conflict and recent military tensions between Hamas and Israel. These situations have indirect yet tangible effects on NetCo's business, primarily through increased costs in energy, raw materials, and transportation.

At the moment the impact of the geopolitical situation on NetCo's business is of an indirect nature, primarily associated with the increase in costs of energy, materials and transportation. This geopolitical situation has contributed to a general rise in energy prices and there can be no assurance that a potential shift in the strategic outlook of the war does not materialize, which could further adversely impact energy prices. See "—*Increasing energy costs and NetCo's inability to effectively implement pass-through mechanisms may adversely affect its results of operations*."

The recent outbreak of an armed conflict between Hamas and Israel in early October 2023 and the direct involvement of Iran in hostilities in April 2024 presents a risk of regional escalation in the Middle East. Although NetCo does not engage in operations within Middle Eastern countries, the duration, ramifications and outcome of this conflict are highly uncertain. Potential short- or long-term consequences may include economic sanctions, economic and political instability, rising inflation and energy costs, supply chain disruptions and negative impacts on currency exchange rates and financial markets.

More generally, escalating geopolitical tensions, either in Europe or worldwide, could affect NetCo's operations, including the safety and security of its employees and the integrity of its network operations. These events, individually or in the aggregate, could materially and adversely affect NetCo's business, financial condition, results of operations and prospects.

Adverse changes in global financial markets could limit NetCo's ability to access capital or increase the cost of capital needed to fund its operations.

During 2021, 2022 and 2023, uncertainty surrounding global growth rates, inflationary pressures, the Russian-Ukraine armed conflict as well as the potential risk of regional escalation in the Middle East following the armed conflict between Hamas and Israel, continued to produce volatility in the credit, currency and financial markets. Volatility may affect companies' access to the credit markets, leading to higher borrowing costs, or for funding ongoing operations. NetCo, similarly to other operators in the telecommunications industry, contracts with large financial institutions to support its own operations, and may enter into contracts to hedge its exposure on interest rates and foreign exchange and the funding of credit lines and other short-term debt obligations. These financial institutions face stricter capital-related and other regulations in Italy and Europe, as well as ongoing legal and financial issues concerning their loan portfolios, which may hamper their ability to provide credit or raise the cost of providing such credit.

While NetCo may prove to be successful in accessing the credit and fixed income markets when needed, adverse changes in the financial markets could render it able to access these markets only at higher interest costs and with restrictive financial or other conditions, severely affecting its business operations. Additionally, downgrades of its credit rating by the major credit rating agencies could increase its cost of borrowing and also impact the collateral NetCo would be required to post under certain agreements it enters, which could negatively impact its liquidity.

There is a risk that Italy's economic growth in 2024 will experience a slowdown.

NetCo currently operates exclusively in the Italian market and its success is therefore closely tied to general economic, legal and political developments in Italy and cannot be offset by developments in other markets. NetCo's operates in the fixed telecommunications industry in Italy. In the fourth quarter of 2023, Italy's gross domestic product expanded by 0.2% with respect to the previous quarter and by 0.6% compared to the fourth quarter of 2022. In 2023, Italy's gross domestic product at current prices grew by 6.2% compared to the previous year. The prospects for comparable growth in 2024 will hinge on Italy's employment growth, the deceleration of expansion and a partial increase in salaries.

A significant slowdown in Italy's economic growth could impact the demand for telecommunications products and services in Italy, which could have an adverse effect on NetCo's business, financial condition and results of operations.

Increasing energy costs and NetCo's inability to effectively implement pass-through mechanisms may adversely affect its results of operations.

NetCo is dependent on a constant supply of energy in order to manage its large fixed-line network and operations. If, for any reason, certain of its energy supply contracts were terminated or were not renewed upon expiration, or if

market conditions were to substantially change resulting in a significant increase in the energy prices, including as a result of the ongoing inflationary surge as well as the military conflict between Russia and Ukraine, NetCo could not be able to timely find alternative, comparable suppliers or suppliers capable of providing energy on terms or in amounts that NetCo deems satisfactory. See "*—Global economic conditions and political events could adversely affect NetCo's business, results of operations and financial condition*."

Even though NetCo maintains a sourcing strategy in place to stabilize its energy costs, in light of the current macroeconomic conditions, increases in energy costs in the short- to medium-term could adversely impact NetCo's margins. See "*Global economic conditions and political events could adversely affect NetCo's business, results of operations and financial condition*." For a description of the risks associated with NetCo's regulated activities, please see "*—Risks Related to NetCo's Business Activity and Industry—To the extent cost-orientation obligations based on the BU-LRIC+ model, as implemented by AGCOM, could be maintained with regard to certain of NetCo's activities, NetCo's business, results of operations and financial condition may be adversely affected*." However, NetCo may only be able to pass them through on a delayed basis, which could reduce its margins, either temporarily or for an extended period of time. If NetCo fails to effectively pass through such costs, its business, financial condition and results of operations may be negatively affected.

The inflationary pressure and rising input and borrowing costs may cause a slowdown in Italy's employment rate and ultimately in NetCo's direct customers' services demand.

The Italian economy is facing significant risks due to an energy price shock and high inflation. The inflation rate in Italy, which has reached record highs of almost 12%, is putting pressure on real disposable incomes and weakening purchasing power, negatively impacting internal demand. If wages adapt to the new level of prices within a reasonable time lag (a number of wage agreements were concluded before the energy price shock commenced) and price pressures ease, private consumption may pick up again during the course of 2024.

High input costs and a prolonged tightening of financing conditions triggered by the more stringent monetary policies introduced by the major central banks to fight inflation will likely negatively affect corporate investments. The housing market will also be negatively impacted. Government capital spending (on the back of NRRP fund financed investment) is instead expected to remain robust. Significant increase in interest expenditure and the need for fiscal discipline is expected to reduce the measures.

Labor demand is already decreasing in more energy-intensive sectors such as manufacturing and construction, but employment growth has also slowed down in the retail and tourism sector. Overall, the unemployment rate, which as of December 31, 2023, was at around 7.2%, is expected to slightly rise over the next two years.

The Italian government's interest expenditure increased in 2021 by €5.5 billion due to higher bond yields on its debt, although the interest expenditure relative to GDP remained stable at 3.5%, and there is a need to reduce the country's general government debt-to-GDP ratio, which reached 172.5% in 2022. As a result, the Italian government's financial manoeuvring room will be very limited in the coming years, especially if European-level agreements on returning to fiscal discipline are implemented.

The above factors are affecting the spending capacity of NetCo's direct costumers and end-consumers. Prolonged macroeconomic conditions such as those described above could materially affect NetCo's direct customers. Given that NetCo is expected to provide wholesale-only related services to telecommunication operators, it could not take any proactive measure to offset such conditions. NetCo will remain dependant on how its direct customer will handle downfalls in demand. As a result, NetCo could be exposed to financial instability of its clients, thereby increasing its bad debts and reducing its revenue streams, which could in turn have a material adverse effect on its results of operations and financial stability.

Any outbreak of severe communicable diseases, including the emergence of new variants of COVID-19, could significantly affect NetCo's operations.

Since its outbreak in December 2019, a pandemic caused by coronavirus, COVID-19, had spread globally and had created significant macroeconomic uncertainty and disruption, affecting markets where NetCo has operations. In response, many governments had implemented measures to stop or slow the COVID-19 pandemic, such as lockdowns,

and these measures remained in place for a significant amount of time. The COVID-19 pandemic also led to scarcity of financing, weakness in the capital markets, weak consumer confidence and declining consumption in many markets. It also worsened the sovereign debt crises, particularly in the Eurozone.

The COVID-19 pandemic and the response thereto had materially adversely impacted other telecommunication operators and may in the future materially adversely impact NetCo's business, as well as its various stakeholders. As a result of COVID-19 pandemic, or any other outbreak of severe communicable diseases, NetCo's operations could experience delays and disruptions, such as heightened pressure on its networks by remote working trends and increases in data usage. In future, if business interruptions caused by epidemic or pandemics last longer than expected, NetCo may need to seek other sources of liquidity, and there can be no guarantee that additional liquidity will be readily available or available on favorable terms and in an amount sufficient to enable it to service and repay its indebtedness or to fund its other liquidity needs.

The repercussions of the COVID-19 pandemic and the response implemented could have complex and hard-to-predict consequences for the future. Additionally, to the extent the COVID-19 pandemic continues, or a different pandemic begins, it may also have the effect of heightening other risks described in this "*Risk Factors—Risks Related to NetCo*" section. The possibility of outbreaks of new COVID-19 strains, or other severe communicable diseases, cannot be completely excluded. It may affect NetCo's operations by resulting in, among other things, shortage of electronic components and other items used to manufacture its network equipment or increasing bad debt of its customers. It may also have significant negative effects on network improvements and maintenance, procurement and the supply chain, as well as decreasing margins, lower revenues or delays in cash flows. Additionally, any deterioration in financial markets could impair NetCo's ability to secure financing in the future, including its ability to incur additional indebtedness to operate its ongoing operations, fund liquidity needs or to refinance or repay debt obligations, including the Optics Notes. See "*NetCo's costs of developing, maintaining, repairing, upgrading, protecting and replacing its existing fixed-line network are high and could become higher than expected*" and "*NetCo's business is capital intensive and it may not have sufficient liquidity to fund its capital expenditures or generate the expected returns in the future.*" Any of the foregoing risks could materially and adversely affect NetCo's business, financial condition and results of operations.

Risks Related to NetCo's Legislative and Legal Framework

The Italian Golden Power Authority has in the past exercised its special powers under the Italian Golden Power Legislation with respect to the TIM Group and may in the future exercise again the said special powers, including with respect to strategic transactions to be entered into by NetCo.

In Italy, the Italian Golden Power Legislation provides the Italian Golden Power Authority with certain special powers over companies of strategic importance for the national essential interests.

In particular, pursuant to the Italian Golden Power Legislation, the Italian Golden Power Authority may, among other things, exercise a veto or impose, undertakings, conditions and other requirements in certain cases, such as:

(i) the acquisition of certain shareholdings in Strategic Companies; and

(ii) resolutions, acts or transactions concerning Strategic Companies that hold strategic assets, and which involve a change in the ownership, control, possession or intended use or purpose of such assets or relationships of strategic importance, such as mergers, de-mergers, transfers of assets or business units in which such assets are included and the enforcement and, according to a prudential interpretation, the granting or extension of securities over (i) the shares, if it concerns a shareholding in a Strategic Company meeting or exceeding, as the case may be, the thresholds indicated below or (ii) on strategic assets.

With reference to the acquisition of shareholdings in Strategic Companies, the Italian Golden Power Legislation provides that the following transactions, acts and resolutions shall be communicated to the Italian Golden Power Authority for screening purposes and the possible exercise of the right of veto or the imposition of undertakings, conditions and/or other requirements:

- acquisitions by both EU/EEA (including Italian) and non-EU/EEA natural persons or legal entities of shareholdings in Strategic Companies in the defense and national security sectors exceeding 3% of the share capital and/or voting rights, and subsequently in the event of exceeding the thresholds of 5%, 10%, 15%, 20%, 25% and 50%;

- acquisitions, by non-EU/EEA natural persons or legal entities, of a stake representing at least 10% of the share capital and/or the voting rights (when the value of the investment is equal to at least €1.0 million) of a Strategic Company in any sector covered by the Italian Golden Power Legislation; acquisitions that exceed the thresholds of 15%, 20%, 25% and 50% or that in any case result in the acquisition of control over the relevant Strategic Company are also subject to the reporting obligation; and

- acquisitions, by EU/EEA (including Italian) natural persons or legal entities of control over Strategic Companies in the energy, transport, communication, water, health, financial and agri-food sectors.

The Italian Golden Power Legislation provides for specific sanctions to be applied in case of non-compliance with its provisions, including, among others, administrative pecuniary sanctions up to two times the value of the transaction and in any case not less than 1% of the company turnover (or of the cumulative turnover of the companies involved in the relevant transaction) as resulting from the last financial year for which the financial statements have been approved. Furthermore, failure to comply with the obligations under the Italian Golden Power Legislation or any veto, undertaking, condition and/or other measure imposed by the Italian Golden Power Authority may result in the relevant transaction, act or resolution being unwound or declared null and void.

On October 16 and November 2, 2017, specific provisions regarding corporate governance and organization were imposed on the TIM Group through two Prime Ministerial Decrees. Among these, the establishment of the Security Organization was imposed, which is responsible for activities relevant to national security and involved in all decision-making processes relating to strategic activities and the network. This structure provides that the Security Organization relies on a security officer, who reports to a member of the board of directors with exclusive responsibility for security.

On January 16, 2024, the Italian Golden Power Authority issued a decree with which it imposed undertakings in reference to the Acquisition, as the NetCo Business was considered as a strategic asset for the telecommunications sector and for defense and national security. In this context, the Italian Golden Power Authority has imposed various requirements and conditions including in relation to governance, internal organization (confirming the obligation to establish a Security Organization), planning, compliance, network security, continuity of supplies, the locations where certain activities can be carried out and certain assets can be located, the supply chain, intellectual property and information. Furthermore, NetCo is required to provide every six months to the monitoring committee of the Italian Golden Power Authority a compliance report describing the measures implemented by NetCo in order to comply with these requirements.

In light of the above, in relation to the corporate aspects of NetCo, the Italian Golden Power Authority may veto or impose conditions and/or requirements to consent to the implementation of any transaction, act or resolution falling within the scope of application of the Italian Golden Power legislation. Consequently, following the successful completion of the Transactions, the right of the TIM Group and NetCo to pursue resolutions, deeds or commercial or industrial operations which provide for, among other things, the acquisition or subscription of its shares will remain subject to the Italian Golden Power Authority and the Italian Golden Power Legislation. Therefore, the TIM Group and NetCo may not be authorized to undertake such transactions, acts or resolutions in a timely manner, without restrictions and/or undertakings which may or may not have a material impact. Pursuant to Italian Golden Power legislation, the Push-Down Merger will also be the subject of a new application to the Italian Golden Power Authority.

Within the framework of the provisions on national security, the Italian Golden Power Legislation was accompanied by the legislation concerning the National Cyber Security Perimeter (“**PSNC**”), established with Italian Law No. 133/2019. The PSNC intends to ensure a high level of security of the networks, information systems and IT services of public administrations, public and private bodies and operators having an office in the national territory, on which the exercise of an essential function in Italy depends, or the provision of an essential service for the maintenance of civil, social or economic activities, fundamental to the interests of Italy and whose malfunction, interruption, even partial, or improper use, may result in prejudice to national security.

NetCo is required to comply with the legislation on the PSNC. Failure to comply with obligations may result in administrative fines of up to €1.8 million. Furthermore, the use of products and services in the absence of the required communications to the relevant authorities, or the passing of the tests or in violation of the established conditions may lead to the application of the additional administrative sanction of inability to assume management, administration and control roles in legal entities and businesses, for a period of three years starting from the date of discovery of the violation. Finally, anyone who provides untruthful information, data or factual elements to hinder or influence the completion of procedures or inspection and supervisory activities is punished with imprisonment from one to three years.

NetCo operates under authorizations granted by government authorities and has to satisfy certain obligations in order to maintain such authorizations.

Many of NetCo 's activities require authorizations from governmental authorities in Italy. These authorizations specify the types of services the operating company holding such authorization may provide. The continued existence and terms of NetCo's authorizations are subject to review by regulatory authorities and to interpretation, modification or termination by these authorities. In addition, its current authorizations to provide networks and services require that NetCo satisfies certain obligations, including minimum specified quality levels, service and coverage conditions. Failure to comply with these obligations could result in the imposition of fines or even in the revocation or forfeiture of the authorization. In addition, the need to meet scheduled deadlines may require it to expend more resources than otherwise budgeted for a particular network build-out. If NetCo fails to renew any of its licenses, permits, or authorizations, NetCo's ability to effectively operate relevant businesses may be materially and adversely affected. The procedure to obtain licenses, permits and authorizations (and renewals thereof) may be complex, lengthy, expensive and may require ongoing compliance with various obligations. Moreover, even if NetCo obtains the renewal of its licenses, permits and authorizations, the costs for obtaining those might be higher than those it expected. Finally, if NetCo fails to comply with the requirements of the applicable legislation and regulatory framework in general, which are very detailed and complex in nature, its authorizations may be suspended or terminated, or significant fines imposed.

NetCo's activities could be materially negatively affected by failure to comply with GDPR and Italian Privacy Code.

In the ordinary course of business, NetCo processes personal data on customers, business partners, employees, users, third parties and others and therefore it must comply with strict data protection and privacy laws and regulations. Any processing of personal data of individuals located in the EEA in the course of the provision of services is governed by European data protection laws and regulations, which restrict its ability to collect, process and use personal data relating to customers, potential customers, business partners, and employees, including for marketing purposes.

Such laws and regulations concern the collection, use, retention, security, processing and transfer of personal data. In particular, NetCo's operations are subject to the GDPR, and to the Italian Privacy Code. The GDPR increased both the number and the restrictive nature of the obligations binding NetCo, in particular with respect to the collection, processing and use of personal data. Such obligations include, for example, (i) the processing of personal data in accordance with the transparency, data minimization, accuracy, storage limitation, security and confidentiality principles, (ii) the ability to demonstrate compliance with such principles (accountability), (iii) the obligation to identify a legal basis before the processing, (iv) the obligation to ensure the rights of data subjects, such as, among others, the right of access, the right to rectification and the right to erasure (which would require NetCo to permanently delete a user's personally identifiable information in certain circumstances), and (v) more onerous consent requirements, as consent will always have to be express/opt-in, while implied/opt-out consent has at times been deemed sufficient under the former regime. The GDPR obligates companies to implement several formal processes and policies to review and document the privacy implications of the development, acquisition, or use of all new products, technologies, or types of data. The GDPR, *inter alia*, provides for significant applicable maximum fines, up to the higher of (i) €20 million or (ii) 4% of annual global turnover per breach, as opposed to fines of less than €1 million under the former regime. The fine may be imposed instead of, or in addition to, measures that may be ordered by supervisory authorities (such as the request to cease processing). In addition, according to the Italian Privacy Code, certain criminal sanctions could be applied to individuals involved in unlawful processing activities.

The regulatory environment governing NetCo's use of personal data (customers, employees and others) is complex. Privacy, data protection and information security laws and regulations change frequently, and compliance with such

laws and regulations may require NetCo to incur significant costs to make necessary systems changes and implement new administrative processes.

For example, the European Commission has proposed to replace the ePrivacy Directive with a new regulation primarily aimed at aligning certain provisions of the ePrivacy Directive to the GDPR. The ePrivacy Regulation was published by the European Commission on January 10, 2017, and is currently under negotiation in light of the draft proposals issued by the European Parliament and the European Council. The draft ePrivacy Regulation proposes heightened regulatory requirements in connection with unsolicited communications, the use of cookies, security of personally identifiable information, confidentiality of communications, consent, data security and data integrity. In line with the GDPR, breaches of the ePrivacy Regulation may result in maximum fines equal to the greater of €20 million and 4% of the annual global turnover of the sanctioned company.

However, the risk of deficiencies in implementing security measures, in fulfilling legal requirements on data processing, in applying rules on data retention, in notifying data breaches within the narrow mandatory timeframes could lead to disputes with the Italian Data Protection Authority (*Autorità Garante per la Protezione dei Dati Personali*) and to be sanctioned with heavy fines. Any failure, or perceived failure, by NetCo to comply with any applicable data protection laws and regulations could result in proceedings, investigations or actions (including class actions) brought against it by governmental entities, agencies, or private individuals or entities, and in significant fines, penalties, judgments and reputational damages to NetCo's business, requiring it to change business practices and increasing the costs and complexity of compliance, any of which could materially adversely affect its business, financial condition, results of operations and prospects. Moreover, the risk of personal data breaches can lead to disputes with the interested data subjects. Even the perception of privacy and data protection concerns, whether or not valid, may harm NetCo's reputation and inhibit its business with current and future customers, which could have an adverse effect on its business, financial condition and results of operations.

If NetCo is found liable for anti-competitive practices, it may be subjected to substantial liability which could have an adverse effect on its reputation, business, financial condition, results of operations and/or prospects.

NetCo is subject to laws and regulations relating to anti-competitive practices and anti-monopoly. With specific reference to Italian Competition Law, Italian Law No. 287 of October 10, 1990, as amended and supplemented from time to time, on the protection of competition and the market, prohibits, inter alia, activities and behavior that amount to anticompetitive agreements and abuses of a dominant market position.

In the future, relevant competition authorities could find NetCo's business practices to have an anti-competitive effect or could determine that it has violated relevant laws and regulations relating to competition and anti-monopoly. For example, the AGCM could find NetCo's business practices discriminatory, alleging unequal treatment and conditions for accessing its fixed-line network, which could potentially disadvantage end-users by limiting their choices and leading to higher prices. Further, in the context of potential AGCM's investigations, NetCo may propose to undertake certain commitments in order to eliminate any alleged anti-competitive effects. If NetCo is found to have violated any laws and regulations relating to competition and anti-monopoly or to have breached any of the abovementioned commitments, it may be subject to, among other things, substantial liability such as payments of fines which could have a material adverse effect on its reputation, business, financial condition, results of operations and/or prospects.

NetCo's organizational policies and procedures embodied in the organizational model adopted pursuant to Italian Legislative Decree 231/2001 may be insufficient to prevent fraud and may fail to prevent certain officers or employees from engaging in unlawful conduct, for which NetCo could be liable.

Any contact by NetCo's directors, employees, agents or partners with the public administration or procurement officers of private clients (including in the context of participations in auctions, interactions held with the public administration in the process of obtaining or renewing any authorization or license and any possible public contribution) involves risks associated with fraud, bribery, corruption, incorrect use of public contributions and other fraudulent activities by its employees and related investigations.

NetCo is also exposed to the risk that its directors, employees or agents commit IT related crimes, which may consist of using NetCo's infrastructure to violate the IT systems of its clients, unlawful access to banking data (including that of its clients' customers) and damages to the IT systems and documents. In addition, NetCo may be subject to claims

in connection with damage to property, business interruptions, unauthorized use of property, unauthorized entry or breach of security protocols, negligence, wilful misconduct or other tortious acts by its employees or people who have gained unauthorized access to premises operated by NetCo. Such claims may be substantial and may result in adverse publicity for NetCo. NetCo's business activities may also involve risks related to possible accidents, which may be due to its employees' activities or mistakes and may consist in crimes, breaches of security measures, damages to third parties or manslaughter.

Notwithstanding the existence of this model or any updates that NetCo may make to it, there can be no assurances that it will function as designed, or that it will be considered adequate by any relevant legal authority. Further, NetCo may be unable to detect or prevent every instance of unlawful conduct involving its directors, employees, consultants, partners, agents and third-party agents' representatives and intermediaries and/or may fail to adequately update and implement such policies, procedures, systems and controls. NetCo's monitoring systems may not be sufficient to prevent, detect and identify inadequate practices and violation of law by such individuals.

In particular, pursuant to Italian Legislative Decree 231/2001, NetCo may be held responsible for certain crimes committed in Italy or abroad including, among others, bribery, money laundering, corruption (including among private individuals), anti-competitive behavior, fraud against the state, corporate offenses, market abuse, certain tax and customs violations, and certain environmental and workplace safety violations in the NetCo's interest or for the NetCo's benefit, by individuals having a functional relationship with NetCo at the time the relevant crime was committed, including third-party agents, partners or intermediaries, unless NetCo is able to prove that such individuals fraudulently violated the internal control model and it was reasonably not possible for NetCo to avoid such violation. In such circumstances, NetCo may be subject to pecuniary fines, confiscation of profits or disqualifying sanctions (which could be applied also as interim measures during the investigations), including, subject to certain conditions being met, the termination of authorization, permits, licenses, concessions and financing arrangements, including facilitated financing, the suspension of NetCo's operations, or prohibitions on contracting with public authorities. The duration of these disqualifications could range from a minimum of three months to a maximum of two years, although in very serious cases, some of these disqualifications can be applied for a longer duration period. As an alternative to the disqualifying sanctions, the court may appoint a judicial custodian to run the company, with the consequence that the profits gained during the receivership period are automatically confiscated.

Any of the foregoing events may have a material adverse effect on NetCo's business, financial condition and results of operations.

NetCo may be involved in disputes and litigation with regulators, competition authorities, competitors and other parties and may become the subject of a number of investigations by judicial authorities, the ultimate outcome of which is generally uncertain.

NetCo could be subject to numerous risks relating to legal (civil and criminal), tax, competition and regulatory (including health and safety) proceedings which could develop in the future. Such proceedings are inherently unpredictable. Legal, tax, competition and regulatory proceedings in which NetCo may become, involved (or settlements thereof) may, individually or in the aggregate, have a material adverse effect on NetCo's results of operations and/or financial condition and cash flows in any particular period. Furthermore, its involvement in such proceedings may adversely affect its reputation.

If NetCo faces an adverse decision in any of the legal proceedings to which it could be a party and is ordered to pay amounts greater than what it has recognized to cover potential liabilities, NetCo may face adverse effects with respect to it and/or its operations, financial position, income statement and cash flows.

The final outcomes of those proceedings are generally uncertain. In recognizing potential liabilities, NetCo takes into consideration the risks connected with each dispute and the relevant accounting standards, which require reserves to be recognized where liabilities are probable and can be estimated reliably. The provisions represent an estimate of the financial risk connected with the particular proceedings, in line with the relevant accounting standards. Nonetheless, NetCo may be obligated to meet liabilities linked to unsuccessful outcomes for proceedings that were not taken into consideration when calculating those reserves and the provisions made may not be sufficient to fully meet such obligations through use of its reserves. If any material disputes are resolved against NetCo, they could, individually or in the aggregate, have a material adverse effect on its results of operations, financial condition and cash flows.

For more details, please see "*Business of NetCo—Legal Proceedings and Disputes*."

NetCo is exposed to the risk of labor disputes.

The acceleration in technological transformation in the telecommunications sector has created the need to address integrated organizational review activities, digitalization of processes and adaptation of the skills and capabilities of all staff members.

Overall, NetCo has a good relationship with its workers and trade unions. However, following the Transactions, NetCo's employees may be, or become, uncomfortable with the Transactions, which could have an impact on work quality and retention. Article 2112 of the Italian Civil Code provides, among other things, for the automatic transfer of all the employees belonging to the business unit being transferred. Also, the transferring employees are entitled to maintain terms and conditions of employment applied to their employment as of the date of transfer, which cannot be unilaterally changed by the transferee. However, terms and conditions of employment of the transferring employees which are in place on the basis of a national, or company level collective agreement can be replaced (even to the detriment of the latter employees) by those in force at the transferee, but only if and to the extent that the latter are provided for, respectively, by the national or company level collective agreement applied by the transferee. In view of the above, it cannot be excluded the risk that, on one hand, some employees of the TIM Group who are not transferred to NetCo may commence a legal claim to be considered as part of the transferred business, asking to be re-qualified as NetCo's employees and/or, on the other hand, claims from former employees of the TIM Group transferred to NetCo in the context of the Transactions, who may challenge their transfer and seek to be retransferred to the TIM Group. Such risks could be avoided only if, after the NetCo Business is transferred, the relevant employees expressly waive any claims and rights deriving from Article 2112 of the Italian Civil Code. Such waiver is to be encompassed in a compromise agreement which needs to be signed before any unions or the labor office. See "*Business of NetCo—Employees*." There can be no assurance that such employees will waive their rights and claims.

NetCo may be subject to claims and penalties relating to the health and safety of its employees or of third parties.

NetCo's operations are subject to environmental as well as health and safety laws and regulations, including those concerning occupational health. In most cases, NetCo is responsible for the safety of its personnel as well as any external worker operating at its premises and the general health wellbeing of its customers' employees and patrons who may work or do business nearby. If NetCo fails to implement safety procedures or if the procedures NetCo implements are ineffective, its employees and others may become injured. NetCo may incur significant costs, including fines, penalties (including operational bans), civil, criminal (also pursuant to Italian Legislative Decree No. 231/2001) and administrative sanctions as a result of violations of, or liabilities under the applicable health and safety laws and regulations. Unsafe work sites also have the potential to expose NetCo to increase employee turnover, increase the cost of a service to its customers or the operation of a facility, and raise its operating costs. Any of the foregoing may result in financial losses, which may have a material adverse effect on its business, results of operations and financial condition.

Under applicable Italian law, when workers become injured in connection with their duties and as a result are absent from work for more than 40 days, the relevant public prosecutor must open an investigation into workplace safety and, depending on the circumstances, may bring criminal proceedings against NetCo, its local officer entrusted with workplace safety or against its management or chief executive officer.

Workplace accidents or similar occurrences may damage NetCo's reputation and negatively affect its reputation and result in criminal and/or administrative liability, including pursuant to Italian Legislative Decree No. 231/2001. See "*—NetCo's organizational policies and procedures embodied in the organizational model adopted pursuant to Italian Legislative Decree 231/2001 may be insufficient to prevent fraud and may fail to prevent certain officers or employees from engaging in unlawful conduct, for which NetCo could be liable*."

In addition, the EU Corporate Sustainability Reporting Directive requires disclosure of any material actual and potential impacts on value chain workers in relation to working conditions (impacts related to living wage, health and safety, social security, working hours, water and sanitation); access to equal opportunities (impacts related to discrimination, including on the rights of workers with disabilities or on women workers, as well as impacts related to issues of equality in pay and work-life balance); other human rights, (impacts related to trade union rights, freedom

of association and collective bargaining, child labor, forced labor, privacy, adequate housing). Failure to comply may lead to reputational loss, loss of business or limit access to sustainable finance, as well as to the imposition of fines and other regulatory constraints. See also "*—Failure to meet stakeholders' Environmental, Social and Governance ("ESG") expectations, as well as increasing ESG regulatory requirements, may lead to reputational loss, loss of business or limit access to sustainable finance, as well as to the imposition of fines and other regulatory constraints. Operational and financial costs and cost of capital associated with enhancing ESG performance may be significant.*"

Risks Related to NetCo's Financial Information

NetCo Audited Combined Carve-out Financial Information and NetCo Unaudited Combined Pro Forma Carve-out Financial Information, as the case may be, may not be necessarily representative of the results that NetCo would have achieved as a separate and independent company and may not be a reliable indicator of its future performance.

During all historical periods covered by the financial statements included in this Exchange Offer Memorandum, and until the consummation of the Transactions, NetCo has been and will be part of the TIM Group. Accordingly, NetCo has no independent operating history that can be used as a basis for evaluating its financial condition, results of operations and expected future performance following the Transactions.

NetCo Unaudited Combined Pro Forma Carve-out Financial Information has been prepared to present the income statement and statement of financial position as if NetCo had been operating as a stand-alone entity during the periods presented and they are based on certain assumptions of the management of the TIM Group, including the impact of the Master Services Agreement, the Transitional Services Agreement and the repayment of the FiberCop Intercompany Loan with a new loan to be granted to NetCo and assuming the same interest rate as the interest rate of the FiberCop Intercompany Loan will apply to it. See also note (6) in "*Corporate Structure and Certain Financing Arrangements of the Optics Group Pro Forma for the Transactions as of December 31, 2023" and "Risk Factors—Risks Relating to the Optics Notes—Until the Push-Down Merger is consummated (if at all), Optics' ability to repay its debt will be dependent on its ability to obtain cash from its subsidiaries*". If NetCo had been operating as standalone company or group during all historical periods covered by the financial statements included in this Exchange Offer Memorandum, the income statement and statement of financial position may have been different from those presented herein, as they would depend on many factors, including organizational structure, financing structure and strategic decisions made in various areas.

NetCo Unaudited Combined Pro Forma Carve-out Financial Information included in this Exchange Offer Memorandum was prepared solely for illustrative purposes and does not reflect any adjustment relating to the purchase price allocation as the exercise to determine the fair value of the net assets acquired will be carried out only after Acquisition Closing Date. NetCo Unaudited Combined Pro Forma Carve-out Financial Information included in this Exchange Offer Memorandum is based on assumptions and its usefulness is, therefore, inherently limited. Such *pro forma* financial information is prepared by applying certain *pro forma* adjustments to the NetCo Audited Combined Carve-out Financial Information, thereby giving effect to the Transactions. In preparing the NetCo Unaudited Combined Pro Forma Carve-out Financial Information included in this Exchange Offer Memorandum, the TIM Group made certain adjustments to the NetCo Unaudited Combined Pro Forma Carve-out Financial Information based on currently available information and on assumptions that the TIM Group's management believes are reasonable. In addition, this Exchange Offer Memorandum includes certain *pro forma* financial information of Optics. In preparing the *pro forma* financial information of Optics included in this Exchange Offer Memorandum, Optics made certain adjustments to the NetCo Unaudited Combined Pro Forma Carve-out Financial Information to give effect to the Transactions which are based on certain assumptions, including the other debt of Optics that will be outstanding as of the Acquisition Closing Date. See "*—Risks related to NetCo's Business and Industry—Certain information relating to NetCo and the impacts of the Transactions on Optics have been provided by Optics and have not been independently verified by the TIM Group."*

The estimates and assumptions used in the calculation of such *pro forma* financial information may be materially different from the actual results. For example, under the Transaction Agreement, TIM and KKR have agreed to negotiate in good faith the allocation of certain payments due from NetCo to TIM. Given the ongoing discussions between TIM and KKR, the NetCo Audited Combined Carve-out Financial Information, NetCo Audited Consolidated Pro Forma Carve-Out Financial Information, and TIM Audited Consolidated Pro Forma Carve-Out Financial

Information have been prepared based on certain assumptions regarding the allocation of such payment, which may not accurately reflect the actual allocation that will be agreed before the Acquisition Closing Date. See "*NetCo Unaudited Combined Pro Forma Carve-out Financial Information.*" In addition, the NetCo Audited Combined Carve-out Financial Information and the NetCo Unaudited Combined Pro Forma Carve-out Financial Information do not include any potential non-financial liabilities and off balance-sheet guarantees associated with the NRRP tenders. Such non-financial liabilities and the related off balance-sheet guarantees could arise if the NRRP advance payments received by TIM at the end of 2023 are subsequently allocated to NetCo (from TIM or Infratel), which would then need to correspondingly reserve a liability in respect of such non-financial liabilities.

Furthermore, the *pro forma* financial information of NetCo included in this Exchange Offer Memorandum does not give effect to any other events than those described in such *pro forma* financial information, and the notes thereto, nor does it reflect forward-looking data, as it was prepared to represent only the isolatable and objectively measurable effects of the Transactions, without taking account of the potential effects of changes in management policy and operating decisions resulting from the Transactions. Considering that the purposes of the *pro forma* financial information included in this Exchange Offer Memorandum are different than those of the historical financial statements, the two sets of data should be read and interpreted separately, without trying to connect them from an accounting perspective.

The NetCo Audited Combined Carve-out Financial Information and the NetCo Unaudited Combined Pro Forma Carve-out Financial Information are provided as of and for the year ended December 31, 2023. After the date of this Exchange Offer Memorandum and prior to the Longstop Date, investors will not receive financial statements or other periodic financial information specifically related to NetCo. Investors should be aware that they will be making their investment decision based on historical information, without the benefit of updated financial data for NetCo.

For more information, see "*Summary Financial and Other Carve-Out Information of NetCo and Optics*," "*Management's Discussion and Analysis of Pro Forma Carve-out Financial Information and Results of Operations of NetCo*" and "*—NetCo's Pro Forma Organic EBITDA figures presented in this Exchange Offer Memorandum are derived from estimates and assumptions regarding specific initiatives and the impact of certain events. These estimates and assumptions could be materially inaccurate due to factors beyond NetCo's control, as well as a range of known and unknown risks, uncertainties and other variables*."

NetCo's Pro Forma Organic EBITDA-AL and other non-IFRS measures presented in this Exchange Offer Memorandum are based upon estimates and assumptions regarding specific initiatives and the impact of certain events. Such estimates and assumptions might prove to be materially incorrect as a result of factors beyond NetCo's control and are subject to known and unknown risks, uncertainties and other factors.

In this Exchange Offer Memorandum, certain *pro forma* adjusted financial data which are based on various assumptions, including, *inter alia*, including the impact of the Master Services Agreement, the Transitional Services Agreement and the repayment of the FiberCop Intercompany Loan with a new loan to be granted to NetCo and assuming the same interest rate as the interest rate of the FiberCop Intercompany Loan will apply to it. See "*Summary Financial and Other Pro Forma Carve-Out Information of NetCo and Optics*" for additional details regarding these *pro forma* adjusted financial data and their underlying assumptions. These assumptions are based on TIM management's estimates, and they involve risks, uncertainties, further assumptions and other factors that may cause actual results, performance or achievements to be materially different from any anticipated future results, performance or achievements expressed or implied by such *pro forma* adjusted financial data.

In particular, NetCo's *Pro Forma* Organic EBITDA-AL presented in this Exchange Offer Memorandum has not been subject to audit or review by auditors, consultants or experts and the estimates, adjustments and assumptions that have been used to calculate such Non-IFRS Measure may prove to be inaccurate or may be affected by other factors that have not been accounted for. NetCo's *Pro Forma* Organic EBITDA is based on a number of assumptions and estimates. These assumptions and estimates are forward-looking by nature and are inherently uncertain and are subject to significant business, economic and competition factors which are difficult to predict and some of which are beyond NetCo's control.

Although estimates and assumptions applied in calculating NetCo's *Pro Forma* Organic EBITDA-AL have been reasonable at the time they were made, there can be no assurance that such assumptions will prove accurate.

Furthermore, the positive effects of these initiatives could be negated by market downturns, rising expenses, or other unforeseen or unknown factors within NetCo's business. In addition, the costs and other benefits described herein may be substantially different than TIM' estimates, which in turn could outweigh any benefit. Furthermore, NetCo's *Pro Forma* Organic EBITDA-AL includes certain estimated normalization items that reflect costs not included in the NetCo Audited Combined Carve-Out Financial Information or the NetCo Unaudited Combined Pro Forma Carve-Out Financial Information. TIM's management estimates that these costs will be incurred by NetCo as a standalone entity following the completion of the Acquisition. These normalization items are not intended to represent the full range of additional costs or potential dis-synergies that NetCo, as a standalone entity, may face as part of its ongoing cost structure.

In addition, NetCo's pro forma Operating Free Cash Flow is are based on NetCo's pro forma statement of financial position as of December 31, 2023, which is included elsewhere in this Exchange Offer Memorandum, and on NetCo's statement of financial position as of December 31, 2022, derived from certain unaudited management accounts that are not included in this Exchange Offer Memorandum. Such management accounts have not been audited or reviewed, nor have any procedures been performed by TIM's independent auditors with respect thereto.

NetCo's *Pro Forma* Organic EBITDA-AL and the underlying calculations have not been prepared with a view to compliance with the published guidelines of the SEC or the guidelines published by any other regulatory or industry body regarding estimates, and therefore have not been, and cannot be, audited, reviewed or verified by any independent accounting firm. NetCo's *Pro Forma* Organic EBITDA-AL is included in this Exchange Offer Memorandum as it provides a useful indication of what its results would have been had certain events happened within a certain timeframe or had certain extraordinary events not occurred or occurred differently; however, this information does not constitute a measure of financial performance under IFRS or other generally accepted accounting principles, and prospective investors of the Optics Notes should not consider any of this information as an alternative to operating profit or any other performance measure derived in accordance with IFRS or as a measure of NetCo's results of operations or liquidity. If any of the underlying assumptions or estimates prove to be incorrect, Optics may not generate sufficient cash flow to redeem the principal of and pay interest on the Optics Notes when they become due.

There is no assurance that NetCo's future controlling shareholder's strategy and estimates will be consistent with TIM's management's.

Upon the successful completion of the Transactions, KKR will transition from holding a 37.5% stake in FiberCop to becoming the controlling shareholder of NetCo. Please see "*—Following the successful completion of the Transactions, the interest of NetCo's controlling shareholder and/or minority shareholders may conflict with the interests of NetCo and the holders of the Optics Notes*" and "*Summary—The Transactions*." With such control, KKR will have the authority to appoint certain number of members to the board of directors and statutory auditors, thereby influencing the direction of NetCo's business and strategic planning.

The financial information regarding NetCo included in this Exchange Offer Memorandum has been prepared by TIM's management. See "*—NetCo Audited Combined Carve-out Financial Information and NetCo Unaudited Combined Pro Forma Carve-out Financial Information, as the case may be, may not be necessarily representative of the results that NetCo would have achieved as a separate and independent company and may not be a reliable indicator of its future performance*" and "*—NetCo's Pro Forma Organic EBITDA-AL and other non-IFRS measures presented in this Exchange Offer Memorandum are based upon estimates and assumptions regarding specific initiatives and the impact of certain events. Such estimates and assumptions might prove to be materially incorrect as a result of factors beyond NetCo's control and are subject to known and unknown risks, uncertainties and other factors*." As such, the perspectives and insights provided reflect TIM's management's understanding and expectations of NetCo's operations, regulatory framework and future potential. However, under KKR's direction and control, there may be shifts in strategic focus, operational priorities and financial projections that could materially differ from those included herein. KKR's vision for NetCo's business plan, strategic initiatives and day-to-day management may introduce new estimates and models that could materially diverge from the data and analysis presented in this Exchange Offer Memorandum. Prospective investors of the Optics Notes should carefully consider that these potential and material differences could impact NetCo's business, results of operations, financial condition and future performance, as KKR could implement its own strategies and operational methodologies in a way that materially differs from the TIM's management's view.

Risks Relating to the Transactions

Termination of the Transaction Agreement or failure to otherwise complete the Acquisition could negatively impact the TIM Group's business and financial results.

Termination of the Transaction Agreement or any failure to otherwise complete the Acquisition may result in various consequences, including:

- the TIM Group not being able to realize the anticipated benefits of the Acquisition. Such anticipated benefits include, among others, the expected reduction in the net leverage of the TIM Group and an easing of the TIM Group's current regulatory obligations. For more information, see "*—Risks Related to the TIM Group's Business Activity and Industry—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective"* and "*Summary—The TIM Group's Strategy—Delayering Plan.*"

- the TIM Group's business being adversely impacted by the failure to pursue other beneficial opportunities due to the focus of management on the Acquisition, without realizing any of the anticipated benefits of completing the Acquisition; and

- negative reactions from the financial markets, respective customers and other stakeholders possibly related to the above.

The Acquisition is subject to certain uncertainties and conditions and, as a result, the Acquisition may not be consummated and this may adversely impact the trading in the New Notes and the rating of the Original Notes and New Notes.

Pursuant to the Transaction Agreement, the completion of the Acquisition is subject to certain closing conditions, including, for example, the satisfaction of antitrust and other regulatory approvals. As of the date of this Exchange Offer Memorandum, TIM has not yet obtained (i) the authorization by the European Commission, under the powers conferred to it by Antitrust Law, approving the Acquisition or confirming that the Acquisition does not require approval. and (ii) the authorization from the European Commission, under the powers conferred to it by FSR Law, approving the Acquisition or confirming that the Acquisition does not require approval. If such conditions are not fulfilled by the Longstop Date or, if for any other reason, the Acquisition is not consummated on or prior to the Longstop Date, the Transaction Agreement may be terminated and the Acquisition may not be completed. While the Exchange Offers are not conditioned upon the Acquisition completing, the Acquisition Exchange is triggered on the basis of whether the Acquisition is consummated or not.

If the Acquisition is not completed on or prior to the Longstop Date, then each series of USD New Notes and EUR New Notes will not be mandatorily exchanged for the notes of the relevant series of USD Optics Notes and EUR Optics Notes pursuant to the Acquisition Exchange and will remain outstanding as a separate series not fungible with the relevant series of USD Original Notes and EUR Original Notes, as applicable. See "*Terms of the EUR TIF Exchange Offer — EUR TIF Mandatory Acquisition Exchange*."

The terms and conditions of each series of the EUR New Notes and USD New Notes will be substantially similar to those of the relevant series of EUR Original Notes and USD Original Notes, subject to certain exceptions, including, but not limited to, the Acquisition Exchange and, in respect of the USD New Notes, qualification of the relevant indentures under the U.S. Trust Indenture Act of 1939, where applicable. Each series of EUR New Notes and USD New Notes will not be fungible with the relevant series of EUR Original Notes and USD Original Notes, which may affect the trading market value of the relevant series of EUR New Notes and USD New Notes.

In addition, there can be no assurance that, if the Acquisition is not consummated, one or more rating agencies will not change or comment on the ratings of the Original Notes and New Notes. Any changes in ratings could adversely affect the market price of the Original Notes and the New Notes. Moreover, the failure to consummate the Acquisition

may also impact the trading of the Original Notes and the New Notes, given that investors participating in the Exchange Offers may have priced in the expectation to become investors in the debt of a stand-alone NetCo business.

The decision of a noteholder to invest in the relevant series of New Notes and, upon completion of the Acquisition, the Optics Notes is made at the time of tendering into the Exchange Offers, and no changes in the terms of the Acquisition or results of operations of the TIM Group or Optics/NetCo shall give rise to any rights to refuse to accept the Optics Notes in connection with the Acquisition Exchange.

The decision of a noteholder to invest in the relevant series of the New Notes and, upon completion of the Acquisition, the Optics Notes, is made at the time of tendering into the Exchange Offers. Changes in the TIM Group's and NetCo's, results of operations or financial condition, or the terms of the Acquisition or the financing thereof between the decision to irrevocably tender into the Initial Exchange and the completion of the Acquisition and the consequential Acquisition Exchange will not give rise to any rights to refuse to accept the Optics Notes in connection with the Acquisition Exchange.

The Acquisition is subject to the compliance of certain undertakings and obligations, and, as a result, NetCo Business pre-consummation of Acquisition or the Acquisition Closing Date may be impacted by such undertakings.

Under the Transaction Agreement, TIM has agreed to certain undertakings that place restrictions on TIM Group's ability to operate the NetCo Business (*e.g.*, limitations to dispose of certain rights, benefits or assets,) until the consummation of the Acquisition. Furthermore, TIM is subject to certain other interim obligations with reference to the NetCo Business which, if materially breached, will entitle Optics to delay the Acquisition Closing Date until the Longstop Date. As a result, whether or not the Acquisition is completed, the announcement, pendency and delays of the consummation of the Acquisition may cause disruptions to NetCo's business, which could have an adverse effect on its business, financial condition and results of operations.

If the Acquisition is not consummated, the substantial leverage and debt service obligations of the TIM Group could adversely affect its business and may jeopardize the fulfillment of its obligations, including its payment obligations under the Original Notes (not offered for exchange or accepted in the Exchange Offers) and the New Notes.

Prior to the consummation of the Acquisition, and in the event the Acquisition is not consummated, the TIM Group will have a significant amount of outstanding debt with substantial debt service requirements. As of December 31, 2023, the TIM Group had €32,636 million of consolidated gross financial debt (including lease liabilities of €5,581 million). The Revolving Credit Facility (as defined in the "*Description of other Indebtedness of the TIM Group*") provides for borrowings up to an aggregate principal amount of €4,000 million, subject to certain conditions. The Revolving Credit Facility was undrawn as of December 31, 2023. The TIM Group's Net Financial Debt Carrying Amount was €25,776 million as of December 31, 2023, compared to €25,370 million as of December 31, 2022. See "*Summary Historical Consolidated Financial and Other Information and Pro Forma Carve Out Information of the TIM Group."* The TIM Group expects that, should the Acquisition not be completed, its high leverage will persist for the foreseeable future. In addition, if the Acquisition is not consummated and, as a result, the contribution to FiberCop of the NetCo Business is not completed, the management and development of the TIM Group's operative business will require significant investments. The TIM Group may, therefore, need to incur additional debt.

Its significant leverage could have important consequences for the TIM Group's business and operations and for holders of the Original Notes (not offered for exchange or accepted in the Exchange Offers) and the New Notes, including, but not limited to:

- making it more difficult for the TIM Group to satisfy its obligations with respect to the Original Notes (not offered for exchange or accepted in the Exchange Offers) and the New Notes and its subsidiaries' other debts and liabilities, including in respect of bonds and credit facilities maturing prior to the maturity date of the Original Notes (not offered for exchange or accepted in the Exchange Offers) and the New Notes;

- requiring the dedication of a substantial portion of its cash flow from operations to the repayment of principal of, and interest on, indebtedness, thereby reducing the availability of such cash flow, and limiting the ability to

obtain additional financing, to fund capital expenditures, working capital, acquisitions, joint ventures, or other general corporate purposes;

- increasing its vulnerability to, and reducing its flexibility to respond to, a downturn in its business or general economic or industry conditions;
- placing the TIM Group at a competitive disadvantage relative to competitors with lower leverage or greater financial resources;
- limiting its flexibility in planning for or reacting to competition or changes in its business and industry;
- negatively impacting credit terms with its creditors;
- increasing its exposure to interest rate increases because some of its indebtedness bears a floating rate of interest;
- limiting, among other things, its ability to borrow additional funds or raise equity capital in the future and increasing the costs of such additional financings; and
- negatively impacting the financial measures used by rating agencies, such as Moody's, S&P and Fitch, to assess the TIM Group's ability to repay its debt and determine its credit quality. Although rating downgrades do not generally have an immediate impact on outstanding debt, other than outstanding debt instruments for which the interest expense is specifically impacted by such ratings, downgrades could adversely impact the TIM Group's ability to refinance existing debt and could increase costs related to refinancing existing debt and managing its derivatives portfolio.

Any of these or other consequences or events could have a material adverse effect on the TIM Group's business, financial condition, results of operations, prospects and ability to satisfy its debt obligations, including the Original Notes (not offered for exchange or accepted in the Exchange Offers) and the New Notes.

For further information regarding the TIM Group's substantial leverage and for more information about its indebtedness that will remain outstanding if the Transactions are not consummated and following the consummation of the Transactions, see "*Capitalization of the TIM Group*" and "*Description of Certain Other Financing Arrangements of the TIM Group*."

Certain indebtedness of the TIM Group matures prior to the stated maturity of the Original Notes and New Notes. If the Acquisition is not consummated, it may become more challenging for the TIM Group to raise the necessary funds to repay the Original Notes (not offered for exchange or accepted in the Exchange Offers) and the New Notes.

The maturity of the Original Notes and New Notes will occur subsequent to 2025. However, some of the TIM Group's indebtedness is due earlier, including the €1.5 billion drawn under the TIM Term Facility Agreement on April 10, 2024. As of December 31, 2023 amounts drawn under (excluding the TIM Term Facility Agreement, which was entered into on April 4, 2024) upcoming medium-long term maturities of financial liabilities of the TIM Group (after lease) amounted to €3,849 million in 2024 and €3,300 million in 2025. As a result, if the Acquisition is not consummated, the TIM Group may not have sufficient cash to repay all amounts owing on the Original Notes and the New Notes at maturity, since, *per se*, the prior maturity of such other indebtedness may make it difficult to refinance the Original Notes (not offered for exchange or accepted in the Exchange Offers) and the New Notes. In addition, if TIM Group's access to capital markets or its ability to enter new financing arrangements is reduced for any reason, it may not be able to refinance its existing debt on satisfactory terms or at all, which could have a material adverse effect on the TIM Group's business, results of operations, financial condition and prospects.

The timely completion of the Transactions and, upon the successful completion of the Transactions, NetCo's business, financial condition and results of operations may be adversely affected if NetCo and the TIM Group are unable to obtain required third-party consents from, or approval of, third parties, including companies controlled by governmental entities, for certain contracts and/or other assets.

The Transaction Agreement provides that certain contracts and other assets, rights and liabilities are to be transferred from the TIM Group to NetCo in connection with the Acquisition. The transfer of certain of these contracts and other assets, rights and liabilities may require consents or approvals of third parties or provide other rights to third parties. Some parties may use consent requirements or other rights to terminate contracts or obtain more favorable contractual terms from NetCo, which, for example, could take the form of price increases for services or assets that NetCo requires, forcing NetCo to either expend additional resources in order to obtain the services or assets previously provided under the contracts or to make arrangements with new third parties. If NetCo does not obtain required consents or approvals, it may be unable to obtain all benefits, assets and contractual commitments that are intended to be allocated to it under the Transaction Agreement. Although contractual remedies vis-à-vis the TIM Group may be available under the Transaction Agreement, NetCo could still be required to seek alternative arrangements to obtain services and assets which may not come on a timely basis, be more costly and/or of lower quality.

The termination, modification, replacement or replication of these contracts or permits or the failure to timely complete the transfer or assignment of these contracts could have a material adverse effect on NetCo's business, financial condition, results of operations and cash flows.

Each of the TIM Group and NetCo may experience disruptions as a result of the Acquisition that make it difficult for them to retain executives and other employees.

Uncertainty about the consummation and effect of the Acquisition on each of the TIM Group's and NetCo's business and operations may impair their ability to attract, retain and motivate personnel until the Transactions are completed. Employee retention may be particularly challenging during the pendency of the Transactions, as employees may feel uncertain about their future roles within the company. If the TIM Group's and/ or NetCo's employees depart because of issues relating to the uncertainty relating to the Transactions or a desire not to continue to be TIM Group or NetCo's employees following completion of the Transactions, this could have a material adverse effect on the TIM Group's and NetCo's business and results of operations.

For further information as to the risks relating to the TIM Group's business after the Transactions complete, please see "—*Risks related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry*" and "—*Risks Related to NetCo—Risks Related to NetCo's Business Activity and Industry*."

TIM will incur certain transaction-related costs in connection with the Transactions.

TIM expects to incur certain non-recurring transaction-related costs associated with the Transactions. These costs include, for example, fees paid to legal, financial and accounting advisors, filing fees, printing costs and potential tax costs related to the Transactions. Many of these costs will be incurred whether or not the Acquisition is consummated. Additional unanticipated costs may also be incurred in connection with or as a result of the consummation of the Transactions.

Risks Relating to the EUR Exchange Offers

Holders are responsible for complying with the procedures of the EUR Exchange Offers.

Holders of EUR Original Notes are responsible for complying with all of the procedures for exchanging EUR Original Notes pursuant to the terms of the EUR Exchange Offers. None of TIM, TIF, Optics, the Dealer Managers or the Exchange and Information Agent assumes any responsibility for informing holders of EUR Original Notes of irregularities with respect to offers to exchange from the holders of EUR Original Notes.

The consummation of the EUR Exchange Offers for any series of EUR Original Notes is subject to certain conditions, including the EUR Minimum Series Exchange Condition, and may not occur. Failure to complete any of the EUR Exchange Offers could negatively affect the price of the EUR Original Notes subject to the EUR Exchange Offers.

The EUR Exchange Offers are subject to the General Conditions, including among others that the EUR Minimum Series Exchange Condition is satisfied. The EUR Exchange Offers may be terminated if, among other things, such conditions are not satisfied or (to the extent permitted under the terms of the EUR Exchange Offers) waived. See

"*Conditions of the EUR TIF Exchange Offer.*" and "*Termination, Withdrawal and Amendment of the EUR TIF Exchange Offer*" If any of the EUR Exchange Offers is not completed with respect to any series of EUR Original Notes, the market price of such series of EUR Original Notes may decline to the extent that the current market price of the EUR Original Notes reflects a market assumption that any of the EUR Exchange Offers has been or will be completed.

In addition, the Issuer is not under any obligation to accept, and shall have no liability to any person for any non-acceptance of, any offer of EUR Original Notes for exchange pursuant to the EUR Exchange Offers. EUR Original Notes validly offered for exchange (and not validly withdrawn) may be rejected in the Issuer's sole discretion for any reason and the Issuer is not under any obligation to Eligible Holders to furnish any reason or justification for refusing to accept validly offered for exchange (and not validly withdrawn) EUR Original Notes for exchange. For example, validly offered for exchange (and not validly withdrawn) EUR Original Notes may be rejected if the EUR Exchange Offers are terminated, if the EUR Exchange Offers do not comply with the relevant requirements of a particular jurisdiction, if the principal amount of the EUR TIF Original Notes offered for exchange is not at least equal to the Minimum Exchange Amount or for any other reason.

The EUR Exchange Offers may be delayed for any reason, including because of a delay in the consummation of the Acquisition, and the EUR Acquisition Exchange will not be consummated if the Acquisition is not completed on or prior to the Longstop Date and this may result in reduced liquidity for the EUR New Notes.

The TIM Group is not obligated to complete any of the EUR Exchange Offers and may terminate one or all of the EUR Exchange Offers. The consummation of each EUR Exchange Offer is subject to, and conditional upon, the satisfaction or waiver of certain conditions as set forth under "*Terms of the EUR TIF Exchange Offer—Conditions to the EUR TIF Exchange Offer*." Even if the EUR Exchange Offers are completed, they may not be completed on the schedule described in this Exchange Offer Memorandum, in particular as such schedule may depend on the timing of the consummation of the Acquisition. Moreover, the Longstop Date may be further extended or the consummation of the Acquisition may be delayed and Eligible Holders participating in the EUR Exchange Offers may have to wait longer than expected to receive the EUR Optics Notes. Moreover, as the EUR TIF Mandatory Acquisition Exchange will happen on the date the Acquisition is consummated, should the Acquisition Closing Date be postponed even after the relevant notice has been given to Noteholders in accordance with the Conditions of the EUR TIF New Notes, the EUR TIF Mandatory Acquisition Exchange will be postponed accordingly and the Noteholders will not receive the relevant Optics Notes and relevant Accrued Interest Amount with respect to the EUR TIF New Notes until the effective Acquisition Closing Date. Additionally, if the Acquisition is not or will not be consummated on or prior to the Longstop Date, or if there are delays in the consummation of the Acquisition, the EUR New Notes will remain outstanding as a separate series not fungible with the EUR Original Notes not validly offered or otherwise accepted as part of the EUR Exchange Offers. As a result, the trading market for each series of the EUR New Notes that remain outstanding if the Acquisition is not or will not be consummated prior to the Longstop Date may be significantly more limited than the currently outstanding EUR Original Notes because such EUR New Notes would not be fungible with the EUR Original Notes. Such remaining EUR New Notes may command lower prices than comparable issues of securities with greater market liquidity, including the currently outstanding EUR Original Notes. Therefore, the market prices for any series of EUR New Notes that remain outstanding if the Acquisition is not or will not be consummated on or prior to the Longstop Date may be adversely affected as a result thereof.

Holders' ability to transfer the EUR New Notes may be limited by the absence of an active trading market and an active trading market may not develop for the EUR New Notes.

The EUR New Notes will be new issues of securities for which there is no established trading market. There can be no assurance that any active trading market for the EUR New Notes will develop or be maintained.

Therefore, an active market for the EUR New Notes may not develop or be maintained, which would adversely affect the market price and liquidity of the EUR New Notes. In that case, the holders of the EUR New Notes may not be able to sell their notes at a particular time or at a favorable price. If a trading market were to develop, future trading prices of the EUR New Notes may be volatile and will depend on many factors, including:

- the number of holders of the EUR New Notes;

- prevailing interest rates;
- NetCo's operating performance and financial condition;
- the interest of securities dealers in making a market for them;
- the market for similar securities;
- market perceptions of the Transactions and its likelihood; and
- the market for the EUR Optics Notes.

Even if an active trading market for the EUR New Notes does develop, there is no guarantee that it will continue. The market, if any, for the EUR New Notes may experience disruptions and any such disruptions may adversely affect the liquidity in that market or the prices at which Holders may sell their EUR New Notes. In addition, subsequent to their initial issuance, the EUR New Notes may trade at a discount from their initial offering price, depending upon prevailing interest rates, the market for similar notes, underlying business performance and other factors.

The EUR Exchange Offers may be extended, amended, terminated or withdrawn.

Subject as provided herein, the Issuer may, subject to applicable law, extend, amend, terminate or withdraw, in its sole discretion, any of the EUR Exchange Offers at any time and for any reason before any EUR Original Notes are accepted for exchange, including failure to satisfy any condition to the EUR Exchange Offers. For details, see "*Termination, Withdrawal and Amendment of the EUR TIF Exchange Offer*."

None of the Issuer's board of directors, the Dealer Managers or the Exchange and Information Agent has made a recommendation as to whether holders should offer for exchange their EUR Original Notes in exchange for EUR New Notes in the EUR Exchange Offers, and the Issuer has not obtained a third-party determination that the EUR Exchange Offers are fair to holders of the Issuer's EUR Original Notes.

None of the Issuer's board of directors, the Dealer Managers or the Exchange and Information Agent has made, and none of them will make, any recommendation as to whether holders of the EUR Original Notes should offer their EUR Original Notes in exchange for EUR New Notes pursuant to the EUR Exchange Offers. The Issuer has not retained, and does not intend to retain, any unaffiliated representative to act solely on behalf of the holders of the EUR Original Notes for purposes of negotiating the terms of the EUR Exchange Offers, or preparing a report or making any recommendation concerning the fairness of the EUR Exchange Offers. Therefore, if holders offer for exchange their EUR Original Notes, they may not receive more than or as much value as if they chose to keep them. Holders of EUR Original Notes must make their own independent decisions regarding their participation in the EUR Exchange Offers.

The EUR Original Notes offered for exchange in the EUR Exchange Offers will be blocked pending termination or settlement of the EUR Exchange Offers.

When considering whether to offer for exchange the EUR Original Notes in the EUR Exchange Offers, holders of the EUR Original Notes should take into account that restrictions on the transfer of the EUR Original Notes will apply from the time of such offer. A holder of the EUR Original Notes will, on offering the EUR Original Notes in the EUR Exchange Offers, agree that the relevant EUR Original Notes will be blocked in the relevant account at the relevant clearing system from the date the relevant offer for exchange of the EUR Original Notes is made until the earliest of (i) the date on which the EUR Exchange Offers are terminated in accordance with the terms of the EUR Exchange Offers, (ii) the time of settlement of the EUR TIF Initial Exchange on the EUR Settlement Date and (iii) the date on which the relevant offer for exchange of the EUR Original Notes has been validly revoked in the limited circumstances in which such revocation is permitted (see "*Terms of the EUR TIF Exchange Offer – Holders' Rights of Revocation*").

Holders must comply with certain offer restrictions.

Holders of EUR Original Notes are referred to the "*Conditions of the EUR TIF Exchange Offer*," "*Terms of the EUR TIF Exchange Offer*", "*Notice to Investors*" and "*Offer Restrictions*". Non-compliance with these restrictions by a holder of EUR Original Notes could result in, among other things, an inability to validly offer for exchange EUR Original Notes, the unwinding of trades and/or other penalties.

There may be significant tax consequences to holders arising from the EUR Exchange Offers.

Eligible Holders should be aware that each of the exchange of EUR Original Notes in the EUR Exchange Offers for EUR New Notes and the exchange of EUR New Notes in the EUR Acquisition Exchange for the EUR Optics Notes, may be subject to certain tax considerations depending on tax laws applicable to them. Both exchanges in the EUR Initial Exchange and the EUR Acquisition Exchange may qualify as an income taxable event from an Italian tax perspective in the hands of the holders of the EUR Original Notes.

Eligible Holders of EUR Original Notes should consult their own tax, accounting, financial and legal advisers regarding the suitability to themselves of the tax or accounting consequences of participating or declining to participate in the EUR Exchange Offers and an investment in the EUR New Notes (including the EUR Acquisition Exchange into the EUR Optics Notes contained therein). See "*Certain Tax Considerations.*". Eligible Holders should be aware that EUR Optics Notes will be subject to Italian tax laws and regulations and, in particular, to the rules and procedures set forth by Decree No. 239. See "*No assurance can be given that the procedural requirements provided by Decree No. 239 will be met*".

Late deliveries of EUR Original Notes or any other failure to comply with the terms and conditions of the EUR Exchange Offers could prevent a holder from exchanging its EUR Original Notes.

Holders of EUR Original Notes are responsible for complying with all the procedures of the EUR Exchange Offers. The issuance of EUR New Notes or EUR Optics Notes in exchange for EUR Original Notes and EUR New Notes, respectively, will only occur upon proper completion of the procedures described in this Exchange Offer Memorandum under "*Terms of the EUR TIF Exchange Offer*." Therefore, holders of EUR Original Notes who wish to offer for exchange them for EUR New Notes or EUR Optics Notes should allow sufficient time for timely completion of the exchange procedure. None of the Exchange and Information Agent, the Dealer Managers or the Issuer are under any duty to give notification of defects or irregularities with respect to the offers of EUR Original Notes for exchange or to extend any of the applicable deadlines. If you are the beneficial owner of EUR Original Notes that are held through the Clearing System in the name of your broker, dealer, commercial bank, trust company or other nominee or custodian, and you wish to offer for exchange in the EUR Exchange Offers, you should promptly contact the person in whose name your EUR Original Notes are held and instruct that person to offer for exchange your EUR Original Notes on your behalf. Beneficial owners should be aware that their broker, dealer, commercial bank, trust company or other nominee or custodian may establish their own earlier deadlines for participation in the EUR Exchange Offers. Accordingly, beneficial owners wishing to participate in the EUR Exchange Offers should contact their broker, dealer, commercial bank, trust company or other nominee or custodian as soon as possible in order to determine the times by which such owner must take action in order to participate in the EUR Exchange Offers.

The Issuer may repurchase any EUR Original Notes that are not offered for exchange in the EUR Exchange Offer on terms that are more favorable to Eligible Holders than the terms of the EUR Exchange Offers.

The Issuer intends to continue to explore options to address its debt maturity profile in the near-term and may, to the extent permitted by applicable law, purchase or redeem the EUR Original Notes from time to time in the open market, in privately negotiated transactions, through subsequent tender or exchange offers, through the exercise of its optional redemption rights under the Conditions of the EUR Original Notes, where applicable, or otherwise. These other purchases or redemptions may be made on the same terms or on terms that are more or less favorable to Eligible Holders than the terms of the EUR Exchange Offers. The Issuer also reserves the right to repurchase or redeem any of the EUR Original Notes not offered for exchange in the EUR Exchange Offers. If the Issuer decides to repurchase or redeem the EUR Original Notes on terms that are more favorable than the terms of the EUR Exchange Offers, those holders who decide not to participate in the EUR Exchange Offers could ultimately receive consideration in cash or

other form that may represent greater value for their EUR Original Notes than the value received by Eligible Holders that participate in the EUR Exchange Offers.

There are differences among the terms of the EUR Original Notes, EUR New Notes and EUR Optics Notes.

Certain conditions of each series of EUR Optics Notes will be different from those of the relevant series of EUR Original Notes and EUR New Notes (which are substantially similar to the applicable terms of the relevant series of EUR Original Notes, subject to certain exceptions including, but not limited to, the mandatory EUR Acquisition Exchange). Holders should carefully consider the differences between the EUR New Notes, EUR Optics Notes and the related EUR Original Notes (which include, *inter alia*, the identity of the issuer, the provision of security and changes to certain terms and covenants relating to the EUR Optics Notes) in deciding whether to deliver EUR Original Notes for exchange in connection with the EUR Exchange Offers. See "*Terms and Conditions of the EUR TIF New Notes*" and "*Terms and Conditions of the EUR Optics (TIF) Notes.*"

Offers for each series of EUR Original Notes may be reduced on a pro-rata basis.

The Final Series Acceptance Amount for each series of EUR Original Notes will be determined at the sole and absolute discretion of the Issuer as soon as reasonably practicable following the EUR Expiration Time. Therefore the Issuer, in its sole discretion, may accept considerably less (or none) of one Series of EUR Original Notes than another.

In the event that valid offers are received in respect of an aggregate principal amount of each series of EUR Original Notes greater than the relevant Final Series Acceptance Amount, a *pro rata* reduction will be applied in order to ensure that the aggregate principal amount of each series of EUR Original Notes accepted for exchange by the Issuer pursuant to the terms of the EUR Exchange Offers does not exceed the relevant Final Series Acceptance Amount.

Minimum denomination of the EUR New Notes and EUR Optics Notes.

Each series of the EUR New Notes (and EUR Optics Notes, if any) will be issued in minimum denominations of €100,000. The Issuer will not accept for exchange any offer that would result in the issuance of less than €100,000 in principal amount of EUR New Notes to a Participating Holder. As a result, a holder will be unable to participate in the EUR Exchange Offers if such holder's ownership of EUR Original Notes is not at a sufficient level to meet these minimum requirements.

The Issuer is under no obligation to accept offers to exchange. Offers to exchange may be rejected in the sole discretion of the Issuer for any reason and the Issuer is under no obligation to Eligible Holders to furnish any reason or justification for refusing to accept an offer for exchange. For example, EUR Original Notes offered for exchange may be rejected if the EUR Exchange Offers are terminated, if the EUR Exchange Offers do not comply with the relevant requirements of a particular jurisdiction, if the Minimum Exchange Amount condition with respect to any Series of EUR Original Notes is not satisfied, or for other reasons.

Irrevocability of Instructions.

Under the EUR TIF Exchange Offer, Instructions (as defined herein) will be irrevocable except in the limited circumstances described in "*Holders' Rights of Revocation*" above.

For the avoidance of doubt, TIF may elect, in its sole discretion, to decrease, increase or waive the EUR Minimum Series Exchange Condition with respect to EUR TIF Original Notes and Holders of the EUR TIF Original Notes will not be entitled to any revocation rights as a result of such increase, decrease or waiver.

Noteholders must satisfy themselves as to their status as an Eligible Holder or otherwise.

The form of Instruction requires the relevant holder of EUR Original Notes to represent and warrant that it is an Eligible Holder. Failure to do so will result in the Issuer treating the relevant holder as being an Ineligible Holder unless the Issuer in its sole discretion determines otherwise. As it may be unlawful in certain jurisdictions to deliver (or be deemed to have delivered) EUR New Notes to holders who are residents, citizens, nationals of or have otherwise some form of connection with certain jurisdictions are required to inform themselves about and observe any applicable legal requirements. It is the responsibility of any such person to satisfy itself as to the full observance of the laws of

the relevant jurisdiction in connection therewith, including the obtaining of any governmental, exchange control or other consents which may be required and the compliance with any other necessary formalities.

Instructions submitted by Sanctions Restricted Persons will not be accepted.

A holder or beneficial owner of the EUR Original Notes who is, or who is believed to be a Sanctions Restricted Person (as defined herein) may not participate in the EUR Exchange Offers. No Instruction submitted by a Sanctions Restricted Person will be accepted or counted, notwithstanding the purported delivery (and non-withdrawal or revocation) of an Instruction by it in respect of the EUR Exchange Offers on or before the EUR Expiration Time. The restriction described in this paragraph shall not apply if and to the extent that it is or would be a breach of any provision of Council Regulation (EC) No. 2271/96 of November 22, 1996 (the "**Blocking Regulation**") and/or any law, instrument or regulation giving effect to the Blocking Regulation in the European Union or any similar and applicable blocking law in the United Kingdom (including the Blocking Regulation as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018).

The trading of the EUR New Notes may be impacted if the Longstop Date is extended.

As of the date of this Exchange Offer Memorandum, the Longstop Date is expected to be October 15, 2024. Pursuant to the Transaction Agreement, TIM and Optics may agree to extend the Longstop Date without any consent of any third party (including the noteholders of the EUR New Notes). The decision to extend the Longstop Date may generate uncertainty regarding the closing of the Acquisition and, as such, may have an adverse effect on the trading of the EUR New Notes. Additionally, an extension of the Longstop Date may extend the anticipated timeline for the issuance of the EUR Optics Notes.

Risks Relating to the Non-Exchanging Holders of the Original Notes

The Exchange Offers may result in reduced liquidity for the Original Notes that are not exchanged.

To the extent offers of Original Notes in the Exchange Offers are accepted by the Issuer and such exchanges pursuant to the Exchange Offers are completed, the trading market for each series of the Original Notes that remain outstanding following such completion may be significantly more limited due to the reduction in the amount of Original Notes outstanding. Such remaining Original Notes may command lower prices than comparable issues of securities with greater market liquidity. Moreover, because the Issuer will have absolute discretion in determining the final amount of each series of EUR Original Notes to be accepted (including accepting none or all of any series of EUR Original Notes), such reduction is more likely to occur with respect to the EUR Original Notes than the USD Original Notes, which are to be accepted up to the Maximum Series Acceptance Amount (as defined in the USD Exchange Offer Memorandum). A reduced market value and liquidity may also make the trading price of such remaining Original Notes more volatile. As a result, the market prices for any Original Notes that remain outstanding after the completion of the Exchange Offers may be adversely affected as a result thereof. There can be no assurance that an active market in the Original Notes will exist, develop or be maintained whether or not the Exchange Offers are consummated. None of the Issuer, the Dealer Managers or the Exchange and Information Agent has any duty to make a market in any such remaining Original Notes.

Even if the Transactions are consummated, the TIM Group may still have significant leverage, which may make it difficult for it to service its debt, including the Original Notes (not offered for exchange or accepted in the Exchange Offers) and impair its ability to operate its business.

Even if the Transactions are consummated, the TIM Group may still have significant leverage and may also incur substantial additional debt in the future, including debt in connection with future acquisitions. As of December 31, 2023, the Adjusted Net Financial Debt-AL of the TIM Group, on a *pro forma* basis after giving effect to the Transactions would have amounted to €6,581 million.

The relevant trust deed or indenture of each series of Original Notes does not contain any restriction on the amount of unsecured indebtedness which the TIM Group may from time to time incur. Therefore, in the event of any insolvency or winding-up of the Issuer, the Original Notes (not offered for exchange or accepted in the Exchange Offers) will rank equally with the Issuer's other unsecured senior indebtedness and, accordingly, any increase in the amount of the

Issuer's unsecured senior indebtedness in the future may reduce the amount recoverable by holders of the Original Notes (not offered for exchange or accepted in the Exchange Offers).

In addition, the Original Notes are unsecured and, save as described in the relevant trust deed or indentures, do not contain any restriction on the provision of security by the TIM Group over present and future indebtedness. Where security has been granted over assets of the TIM Group to secure indebtedness, in the event of any insolvency or winding-up of the Issuer, such indebtedness will rank in priority over the Original Notes (not offered for exchange or accepted in the Exchange Offers) and other unsecured indebtedness of the TIM Group in respect of such assets.

The TIM Group will require a significant amount of cash to service its debt and sustain its operations, which it may not be able to generate or raise. The terms of the TIM Group's borrowings could materially adversely affect its financial condition.

The TIM Group's ability to make payments on and refinance its debt, which will be outstanding even after the Transactions are consummated, will depend on its future operating performance and ability to generate cash from operations. The TIM Group's ability to generate cash from operations is subject, in large part, to general economic, competitive, legislative and regulatory factors and other factors discussed in these "*Risk Factors*," many of which are beyond its control. It may not be able to generate sufficient cash flow from operations or obtain enough capital to service its debt or to fund future capital expenditure, acquisitions or working capital needs.

The TIM Group also faces risks that it may be unable to refinance some or all of its borrowings on similar terms to its existing debt, on terms that it deems appropriate or at all. The TIM Group's ability to refinance its borrowings or to undertake additional borrowings in the future may be affected by a number of factors, including its operating and financial performance, as well as broader market and macroeconomic conditions that are outside its control.

Additionally, the TIM Group relies on non-recourse factoring arrangements and repurchase agreements to manage its liquidity. As a result, the TIM Group's liquidity position may be affected if such arrangements are no longer available on favorable terms, or at all.

If the TIM Group's future cash flow from operations and other capital resources is insufficient to pay its obligations as they mature or to fund its liquidity needs, it may be forced to:

- reduce or delay certain business activities and capital expenditures;
- sell assets or equity;
- obtain additional debt or equity capital;
- forgo strategic opportunities, such as acquisitions of other businesses; or
- restructure or refinance all or a portion of its debt, including the Notes, on or before maturity.

The TIM Group cannot assure that it would be able to accomplish any of these alternatives on a timely basis or on commercially reasonable terms, if at all. Any refinancing of its debt could be at higher interest rates and may require it to comply with more onerous covenants, which could further restrict its business, financial condition and results of operations. The type, timing and terms of any future financing will depend on the TIM Group's cash needs and the prevailing conditions in the financial markets. In addition, the terms of the New Notes and any future debt may limit TIM's ability to pursue any of these measures.

If the TIM Group is unable to access alternative financing, it may not be able to satisfy its debt obligations, including under the Original Notes (not offered for exchange or accepted in the Exchange Offers). In that event, borrowings under other debt agreements or instruments that contain cross-acceleration or cross-default provisions, including the Original Notes (not offered for exchange or accepted in the Exchange Offers), may become payable on demand, and TIM may not have sufficient funds to repay all its debts, including the Original Notes (not offered for exchange or accepted in the Exchange Offers).

A significant change in finance costs, whether due to higher levels of borrowing or an increase in interest payable on future borrowings, or an inability to obtain financing on acceptable terms or at all may have a material adverse effect on the TIM Group's business, results of operations, financial condition and prospects.

TIM depends, in part, on payments from operating companies of the TIM Group to provide it with funds to meet its debt service obligations and the presence of minority shareholders may limit the availability of funds for debt service or result in leakage. In addition, certain of subsidiaries of the TIM Group have non-controlling shareholders whose interests may differ from the TIM Group's interests.

Even after the consummation of the Transactions, the Issuer will still be, in part, dependent upon dividends, distributions and/or intercompany loan arrangements from certain operating companies of the TIM Group in order to service its outstanding indebtedness, including the Original Notes (not offered for exchange or accepted in the Exchange Offers). Certain of the TIM's subsidiaries are not wholly owned by TIM. The TIM Group also owns minority interests in certain companies. As a consequence, the net income available to be distributed by non-wholly owned subsidiaries or minority investments where the TIM Group does not have the ability to control the manner in which distributions are made to the Issuer by way of dividends or distributions is effectively diluted and any dividends or distributions from applicable subsidiaries will result in value leakage, as such minority shareholders or majority shareholders, as the case may be, will receive a pro rata share of any dividends and distributions and thereby reduce amounts ultimately available to the Issuer, which could be used by the Issuer to make payments on its outstanding indebtedness, including the Original Notes (not offered for exchange or accepted in the Exchange Offers). The TIM Group may enter into strategic transactions in the future that involve the sale of majority or minority stakes in certain of its subsidiaries which could in the future diminish the amount of net income available to be distributed to the Issuer and there can be no assurances that the amount of the TIM Group's outstanding indebtedness would be reduced in connection with any such transactions.

Moreover, the TIM Group operates a number of its businesses through strategic partnerships with other investors who hold a non-controlling interest in the relevant business. The TIM Group's relationships with these strategic partners are governed by various contractual arrangements, which regulate, *inter alia*, the corporate governance, management and administration of such businesses. In certain circumstances, certain material decisions regarding such subsidiaries' operations, such as capital increases, relocation of corporate domicile and other relevant matters, require the consent of non-controlling shareholders. In selected cases, the TIM Group has also undertaken to make yearly dividend distributions. The TIM Group's strategic partners may not necessarily share its views on the manner in which the relevant business should operate and may exercise their rights in a manner which is adverse to it, which, in turn, may adversely affect its business. Moreover, if the TIM Group is unable to resolve such conflicts of interest or disputes with strategic partners in an amicable way, it may be required to initiate legal proceedings, which would require it to incur significant costs and expose it to substantially uncertain outcomes. As a result, any disputes with its strategic partners could cause a material adverse effect on its business, financial condition and results of operations.

Restrictions imposed by the terms of the Original Notes and certain of the TIM Group's other outstanding debt agreements will limit its ability to take certain actions, which may limit the TIM Group's ability to finance future operations and capital needs and to pursue business opportunities and activities.

The terms of certain series of the Original Notes and other outstanding debt agreements will limit the TIM Group's flexibility to operate its business.

In addition, credit facilities of the TIM Group provide for various customary representations and undertakings as well as affirmative covenants and negative covenants, including relating to acquisitions, disposals and mergers, which restrict certain aspects of the TIM Group's business, as well as events of default provisions. If TIM and its subsidiaries fail to comply with any of these representations, undertakings, or covenants and are unable to remedy (if applicable) such failure or fail to obtain a waiver or consent, a default could result under such credit facilities, which could result in termination rights, acceleration rights, draw stops or increases in interest rates or fees in such credit facilities. In these circumstances, TIM's assets and cash flow may not be sufficient to repay in full the defaulted debt under such credit facilities or other debt instruments. If such debt was accelerated and TIM's financial resources were insufficient to discharge their respective obligations under such agreement, TIM could be forced into bankruptcy or liquidation.

Moreover, certain credit facilities of the TIM Group include, and in the future might include, certain events of default (such as breaches of representations, warranties and undertakings and if TIM or certain of its subsidiaries fail to make payment when due on certain other debt) that are different from the events of default set forth in the terms of the relevant series of the Original Notes. If an event of default occurs under the relevant series of Original Notes or any of the TIM Group's other debt instruments and is not cured or waived, the holders of the defaulted debt could terminate their commitments and declare all outstanding debt, together with accrued and unpaid interest and other fees, to be immediately due and payable. Borrowings under the TIM Group's debt instruments that contain cross-acceleration or cross-default provisions also may be accelerated or become payable on demand as a result of an event of default under such debt instruments. In these circumstances, the TIM Group's assets and cash flow may not be sufficient to repay in full the defaulted debt and other debt, including the Original Notes (not offered for exchange or accepted in the Exchange Offers) then outstanding. If some or all of these instruments were accelerated, TIM or its subsidiaries could be forced into bankruptcy or liquidation, and they may not be able to repay their obligations under the Original Notes (not offered for exchange or accepted in the Exchange Offers) in such an event.

Any future debt may include similar or other restrictive terms. These restrictions could materially and adversely affect the TIM Group's ability to finance its future operations or capital needs or to engage in other business activities or consummate transactions that may be in its best interests.

TIM may not be able to obtain the funds required to repurchase or redeem the EUR Original February 2028 Notes or EUR Original July 2028 Notes or certain other outstanding indebtedness upon a Change of Control or a Network Event (each as defined in the conditions of such Series of EUR TIM Original Notes) or otherwise in connection with the closing of the Acquisition.

The Conditions of the EUR Original February 2028 Notes and EUR Original July 2028 Notes contain provisions relating to certain events constituting a "Network Event" in relation to TIM. In addition, the Conditions of the EUR Original February 2028 Notes and EUR Original July 2028 Notes contain, and certain other agreements governing the indebtedness of the TIM Group contain, provisions relating to certain events constituting a "Change of Control" in respect of the TIM Group. As of the date of this Exchange Offer Memorandum, assuming the Acquisition will close by October 15, 2024 and that, pending the consummation of the Acquisition the TIM Group will not incur significantly more debt, TIM does not expect that, after the Acquisition is consummated and based on current results, the "Network Event" provisions under the EUR Original February 2028 Notes and EUR Original July 2028 Notes will be triggered. However, should the Longstop Date be postponed or should TIM incur significantly more debt pending the consummation of the Acquisition, TIM's assessment as to whether or not a "Network Event" under the EUR Original February 2028 Notes and EUR Original July 2028 Notes will be triggered may change as such an assessment will mainly depend on the relevant leverage ratio.

Upon the occurrence of an event constituting a Change of Control or a Network Event under the relevant Conditions, each noteholder of the EUR Original February 2028 Notes and EUR Original July 2028 Notes which has not offered for exchange its EUR Original February 2028 Notes or EUR Original July 2028 Notes in the EUR TIM Exchange Offers and received the corresponding EUR TIM New Notes shall have the option to require TIM to redeem (or, at TIM's option, to purchase) the EUR Original February 2028 Notes and EUR Original July 2028 Notes held by it (in whole but not in part) on the date, which is seven days after the expiration of the period of 60 days following the date a notice that a "Network Event" or a "Change of Control" has occurred is given by TIM, at 101% of their principal amount together with interest accrued to (but excluding) the date of redemption.

TIM's ability to redeem, repurchase or repay outstanding indebtedness that is subject to Change of Control or Network Event provisions, including the EUR Original February 2028 Notes and EUR Original July 2028 Notes, as well as other indebtedness containing similar provisions (*e.g.*, the FiberCop Term Loan and certain EIB Loans as well as a mandatory prepayment in respect of the TIM Term Facility Agreement following the closing of the Acquisition), is subject to its ability to fund any such redemption, repurchase or repayment at the applicable time. Such funding may be limited by TIM's ability to source external financing on reasonable terms, or at all. Any failure by TIM to comply with applicable Change of Control or Network Event provisions and any mandatory repayment provisions, including any redemption, repurchase or repayment obligations upon the exercise of a Change of Control or Network Event put option under applicable indebtedness including the EUR Original February 2028 Notes and EUR Original July 2028 Notes, upon the applicable event materializing, would constitute an event of default thereunder, which could, in turn,

trigger a cross-default under other indebtedness of the TIM Group. Should the above risks materialize, this could have a material adverse effect on TIM's business, financial condition, results of operations and prospects.

Some of the TIM Group's indebtedness bears interest at floating rates that could rise significantly, thereby increasing costs and reducing cash flow, and that may be impacted by applicable law and regulation.

A portion of the TIM Group's outstanding borrowings bear interest at floating rates, exposing the TIM Group to the fluctuations of variable interest rates based on benchmark rates such as the Euro Interbank Offered Rate ("**EURIBOR**"). Increases in the applicable benchmark rates used in the calculation of interest on these borrowings would result in higher interest expenses to service these debt levels in the future. An increase in variable and/or fixed interest rates may result in the TIM Group incurring interest expense and cash outflows in relation to these debt instruments at higher levels than anticipated, thereby reducing cash flow available for capital expenditures and hindering the TIM Group's ability to make payments on the Notes. These rates could increase significantly and for a variety of reasons, including due to changes in the monetary and interest rate policies of central banks, as well as broader macro-economic conditions in the European Union and globally. While the TIM Group may from time to time hedge a portion of its interest rate exposure, it is under no obligation to do so and any hedging activity in respect of the TIM Group's variable-rate debt may be discontinued at any time. Further, there can be no assurance that, if the TIM Group wishes to hedge its interest rate exposure, such hedging arrangements will be available to the TIM Group on commercially reasonable terms or at all.

Following allegations of manipulation of LIBOR, another measure of interbank lending rates, regulators and law enforcement agencies from a number of governments and the European Union have conducted investigations into whether banks that contribute data in connection with the calculation of daily EURIBOR or the calculation of LIBOR may have been manipulating or attempting to manipulate EURIBOR and LIBOR.

Various interest rate benchmarks (including EURIBOR) are the subject of recent national and international regulatory guidance and proposals for reform. Some reforms are already effective, including the EU Benchmark Regulation (Regulation (EU) 2016/1011) and the cessation of the publication of Sterling LIBOR rates and certain tenors of U.S. dollar LIBOR rates after December 31, 2021, while others are still to be implemented. On April 3. 2023, it was announced that publication of certain tenors of U.S. dollar LIBOR settings will continue until September 30, 2024 to serve only as a temporary bridge for use in certain legacy contracts.

These reforms and other pressures may cause EURIBOR, the Sterling Over Night Index Average Rate (SONIA), the Secured Overnight Financing Rate (SOFR) or other such benchmarks to disappear entirely, to perform differently than in the past (as a result of a change in methodology or otherwise), create disincentives for market participants to continue to administer or participate in certain benchmarks or have other consequences which cannot be predicted. Based on the foregoing, investors should in particular be aware that (a) any of these reforms or pressures or any other changes to a relevant interest rate benchmark, as well as manipulative practices or the cessation thereof, could affect the level of the published rate, including to cause a sudden or prolonged increase and/or to make it more volatile than it would otherwise be, which could have an adverse impact on the TIM Group's ability to service debt that bears interest at floating rates of interest, and (b) if EURIBOR, SONIA, or SOFR (or any of their successors or other benchmarks) is discontinued, that may require amendments to the TIM Group's finance documentation that references such rate and, in relation to any of its obligations which have not transitioned to a successor rate by the relevant date, then the rate of interest applicable to such obligations may be determined for a period by applicable fallback provisions, specified in the relevant documentation for such obligations, although such provisions, if they are dependent in part upon the provision by reference banks of offered quotations, may not operate as intended (depending on market circumstances and the availability of rates information at the relevant time).

Risks Relating to the New Notes and the Optics Notes

There may not be an active trading market for the New Notes and the Optics Notes in which case the ability of the holders of the New Notes and the Optics Notes to sell such notes will be limited.

Application will be made to the Stock Exchange for the New Notes and the Optics Notes to be admitted to listing on the Official List of the Stock Exchange and trading on the Euro MTF Market but there may be no active trading market for the New Notes and the Optics Notes.

Furthermore, the Issuer and Optics cannot assure the holders as to:

- the liquidity of any market for the New Notes and the Optics Notes;
- the holders' ability to sell their New Notes and their Optics Notes; or
- the prices at which the holders would be able to sell their New Notes and their Optics Notes.

Future trading prices of the New Notes and the Optics Notes will depend on many factors, including, among other things, prevailing interest rates, the Issuer's and Optics' operating results and the market for similar securities. Historically, the market for non-investment grade securities has been subject to disruptions that have caused substantial volatility in the prices of securities similar to the New Notes and the Optics Notes. The liquidity of a trading market for the New Notes and the Optics Notes may be adversely affected by a general decline in the market for similar securities and is subject to disruptions that may cause volatility in prices. It is possible that the market for the New Notes and the Optics Notes will be subject to disruptions. Any such disruption may have a negative effect on the holder of the New Notes and the Optics Notes, regardless of the Issuer's and Optics' prospects and financial performance. As a result, there may not be an active trading market for the New Notes and the Optics Notes. If no active trading market develops, the holders may not be able to resell their New Notes and the Optics Notes at a fair value, if at all.

Holders are required to conduct an independent review and to seek professional advice as they deem appropriate.

Each prospective investor in the New Notes and the Optics Notes must determine, based on its own independent review and such professional advice as it deems appropriate under the circumstances, that its acquisition of the New Notes and the Optics Notes is fully consistent with its financial needs, objectives and condition, complies and is fully consistent with all investment policies, guidelines and restrictions applicable to it and is a fit, proper and suitable investment for it, notwithstanding the clear and substantial risks inherent in investing in or holding the New Notes and the Optics Notes.

Each prospective investor should consult its own advisers as to legal, tax and related aspects of an investment in the New Notes and the Optics Notes. A prospective investor may not rely on the Issuer or Optics, as the case may be, or the Dealer Managers or any of their respective affiliates in connection with its determination as to the legality of its acquisition of the New Notes and the Optics Notes or as to the other matters referred to above.

None of the New Notes Agent, Optics Notes Trustee, Optics Notes Transfer Agent and Registrar or Optics Notes Paying Agent (each as hereinafter defined) makes any representation or warranty whatsoever or accepts any responsibility as to the accuracy or completeness of the information contained in this Exchange Offer Memorandum or any responsibility for the acts or omissions of the Issuer or any other person in connection with the issuance of the New Notes or the Optics Notes or the Exchange Offers or the acquisition of the New Notes and the Optics Notes and therefore each prospective investor should consult its own advisers as to legal, tax and related aspects of an investment in the New Notes and Optics Notes.

The New Notes and the Optics Notes are complex instruments that are not suitable for all investors.

Each prospective investor in the New Notes and the Optics Notes must determine, based on its own independent review and such professional advice as it deems appropriate under the circumstances, that its acquisition of the New Notes and the Optics Notes is fully consistent with its financial needs, objectives and condition, complies and is fully consistent with all investment policies, guidelines and restrictions applicable to it and is a fit, proper and suitable investment for it, notwithstanding the clear and substantial risks inherent in investing in or holding the New Notes and the Optics Notes.

Each prospective investor should consult its own advisers as to legal, tax and related aspects of an investment in the New Notes and the Optics Notes. A prospective investor may not rely on TIM or Optics, as the case may be, or the Dealer Managers or any of their respective affiliates in connection with its determination as to the legality of its acquisition of the New Notes and the Optics Notes or as to the other matters referred to herein.

Each potential investor in the New Notes and the Optics Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- have sufficient knowledge and experience to make a meaningful evaluation of the New Notes and the Optics Notes, the merits and risks of investing in the New Notes and the Optics Notes and the information contained in this Exchange Offer Memorandum;
- have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular
- financial situation, an investment in the New Notes and the Optics Notes and the impact the New Notes and the Optics Notes will have on its overall investment portfolio;
- have sufficient financial resources and liquidity to bear all of the risks of an investment in the New Notes and Optics Notes, including where the currency for principal or interest payments is different from the potential investor's currency;
- understand thoroughly the terms of the New Notes and Optics Notes and be familiar with the behavior of any relevant indices and financial markets; and
- be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Potential investors should not invest in the New Notes and Optics Notes unless they have the expertise (either alone or with the help of a financial adviser) to evaluate how the New Notes and the Optics Notes will perform under changing conditions, the resulting effects on the value of such New Notes and the Optics Notes and the impact this investment will have on the potential investor's overall investment portfolio. The investment activities of investors are subject to applicable investment laws and regulations and/or review or regulation by certain authorities and each potential investor should consult its legal advisers or the appropriate regulators.

The New Notes and the Optics Notes, where applicable, contain optional redemption features, which are likely to limit their market value. During any period when the Issuer or Optics, as the case may be, may elect to redeem the New Notes and the Optics Notes the market value of the New Notes and the Optics Notes generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.

The Issuer and Optics, as the case may be, may be expected to redeem the New Notes and the Optics Notes, as appropriate, when its cost of borrowing is lower than the interest rate on the New Notes and the Optics Notes. At those times, an investor would generally not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the New Notes and the Optics Notes being redeemed and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.

Neither the Issuer, Optics, the Dealer Managers nor any of their respective affiliates has or assumes responsibility for the lawfulness of the acquisition of the New Notes and the Optics Notes by a prospective investor, whether under the laws of the jurisdiction of its incorporation or the jurisdiction in which it operates (if different), or for compliance by that prospective investor with any law, regulation or regulatory policy applicable to it.

An investment in the New Notes and the Optics Notes involves interest rate risks.

Investment in the New Notes and the Optics Notes, which bear a fixed rate of interest, involves the risk that if market interest rates subsequently increase above the rate paid on the New Notes and the Optics Notes, this will adversely affect the value of the New Notes and the Optics Notes. While the nominal interest rate of a security with a fixed interest rate is fixed during the life of such security or during a certain period of time, market interest rates typically change on a daily basis. As market interest rates change, the price of such security changes in the opposite direction. If market interest rates increase, the price of such security typically falls, until the yield of such security is approximately equal to the prevailing market interest rate. Conversely, if market interest rates fall, the price of a security with a fixed interest rate typically increases, until the yield of such security is approximately equal to the

prevailing market interest rate. Investors should be aware that the market price of the New Notes and the Optics Notes may fall as a result of movements in market interest rates.

The market value of the New Notes and the Optics Notes could decrease if the Issuer's or Optics' creditworthiness deteriorates.

The market value of the New Notes and the Optics Notes will suffer if the market perceives the TIM Group or Optics, as the case may be, to be less likely to fully perform all obligations under the New Notes and the Optics Notes when they fall due. Even if the TIM Group's or Optics', as the case may be, ability to fully perform all obligations under the New Notes and the Optics Notes when they fall due has not actually decreased, market participants could nevertheless have a different perception. In addition, market participants' estimation of the creditworthiness of corporate debtors in general or debtors operating in the same business as the TIM Group or Optics, as the case may be, could adversely change, thereby causing the market value of the New Notes and the Optics Notes to fall. If any of these events occurs, third parties would only be willing to purchase New Notes and the Optics Notes for a lower price than before the crystallization of these risks. Under these circumstances, the market value of the New Notes and the Optics Notes could decrease.

Credit ratings may not reflect all risks, are not recommendations to buy or hold securities and may be subject to revision, suspension or withdrawal at any time.

One or more independent credit rating agencies may assign credit ratings to the New Notes and the Optics Notes. The credit ratings address the Issuer's and Optics' ability to perform its obligations under the terms of the New Notes or Optics Notes, as the case may be, and credit risks in determining the likelihood that payments will be made when due under the New Notes or the Optics Notes, as the case may be. Such ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the New Notes or the Optics Notes, as the case may be. A credit rating is not a recommendation to buy, sell or hold securities and may be revised, suspended or withdrawn by the rating agency at any time.

Any adverse change in the credit ratings assigned to the TIM Group or Optics Group and/or to the New Notes or the Optics Notes, as applicable, may have a negative impact on the market value of the New Notes or the Optics Notes, as the case may be, and availability of future financing. Such change may, among other factors, be due to a change in the methodology applied by a rating agency to the rating of securities with similar structures to the New Notes or the Optics Notes, as the case may be, as opposed to any revaluation of the TIM Group's or the Optics Group's financial strength or other factors such as conditions affecting the TIM Group's or the Optics Group's industry generally.

No assurance can be given that a credit rating will remain constant for any given period of time or that a credit rating will not be lowered or withdrawn entirely by the credit rating agency if in its judgement circumstances in the future so warrant. A suspension, reduction or withdrawal at any time of the credit rating assigned to the New Notes or the Optics Notes, as the case may be, by one or more of the credit rating agencies may adversely affect the cost and terms and conditions of the TIM Group's or Optics' financings and could adversely affect the value and trading of the New Notes or the Optics Notes, as the case may be.

Investors who hold less than the minimum specified denomination may be unable to sell their New Notes and the Optics Notes and may be adversely affected if definitive New Notes and the definitive Optics Notes are subsequently required to be issued.

The EUR TIF New Notes and the EUR Optics (TIF) Notes have denominations consisting of the minimum specified denominations of €100,000 plus one or more higher integral multiples of €1,000 in excess thereof up to and including €199,000. As such it is possible that such EUR TIF New Notes and the EUR Optics (TIF) Notes may be traded in amounts in excess of the minimum specified denomination that are not integral multiples of such minimum specified denomination. In such a case, a holder who, as a result of trading such amounts, holds an amount which is less than the minimum specified denomination in his account with the relevant clearing system would not be able to sell the remainder of such holding without first purchasing a principal amount of the EUR TIF New Notes and the EUR Optics (TIF) Notes at or in excess of the minimum specified denomination such that its holding amounts to a specified denomination. Further, a holder who, as a result of trading such amounts, holds an amount which is less than the minimum specified denomination in his account with the relevant clearing system at the relevant time may not receive

a definitive EUR TIF New Note or EUR Optics (TIF) Note, as applicable, in respect of such holding (should definitive EUR TIF New Notes and EUR Optics (TIF) Notes be printed) and would need to purchase a principal amount of EUR TIF New Notes and EUR Optics (TIF) Notes at or in excess of the minimum specified denomination such that its holding amounts to a specified denomination.

If such EUR TIF New Notes and EUR Optics (TIF) Notes in definitive form are issued, holders should be aware that definitive EUR TIF New Notes and EUR Optics (TIF) Notes which have a denomination that is not an integral multiple of the minimum specified denomination may be illiquid and difficult to trade.

The New Notes and/or the Optics Notes may not become, or remain, listed on the Stock Exchange.

Although the Issuer and Optics intend to have the New Notes and the Optics Notes listed on the Official List of the Stock Exchange and to have them admitted to trading on the professional segment of the Euro MTF Market and to maintain such listing as long as the New Notes and the Optics Notes are outstanding, the Issuer and Optics cannot assure prospective investors that the New Notes and/or the Optics Notes will become or remain listed. If the Issuer and/or Optics cannot maintain the listing of the New Notes and/or the Optics Notes on the Official List of the Stock Exchange or it becomes unduly onerous to make or maintain such listing, the Issuer and/or Optics may cease to make or maintain such listing on the Official List of the Stock Exchange. Although no assurance is made as to the liquidity of the New Notes and/or the Optics Notes as a result of listing on the Official List of the Stock Exchange, failure to be approved for listing or the delisting of the New Notes and/or the Optics Notes from the Official List of the Stock Exchange may have a material adverse effect on a holder's ability to resell the New Notes and/or the Optics Notes in the secondary market.

Holders of the New Notes and the Optics Notes will not be entitled to registration rights, and neither the Issuer nor Optics does currently intend to register the New Notes and the Optics Notes, as applicable, under applicable securities laws. There are restrictions on investors ability to transfer or resell the New Notes and the Optics Notes.

The New Notes and the Optics Notes are being sold pursuant to an exemption from registration under the Securities Act and applicable state securities laws, and neither the Issuer nor Optics currently intends to register the New Notes and the Optics Notes, as applicable. The holders of the New Notes and Optics Notes, as applicable, will not be entitled to require the Issuer and Optics to register the New Notes and the Optics Notes, as applicable, for resale or otherwise. Therefore, investors may transfer or resell the New Notes and Optics Notes in the U.S. only in a transaction registered under or exempt from the registration requirements of the Securities Act and applicable state securities laws, and investors may be required to bear the risk of their investment for an indefinite period of time. See "*Notice to Investors*" and "*Offer Restrictions.*" Neither the Issuer nor Optics has agreed to, nor have they undertaken to register, any of the New Notes and Optics Notes, nor do they have any intention to do so.

Prospective investors may face foreign exchange risks by investing in the EUR New Notes and the EUR Optics Notes.

The EUR New Notes and the EUR Optics Notes will be denominated and payable in Euro. An investment in the EUR New Notes and the EUR Optics Notes denominated in a currency other than the currency by reference to which holders measure the return on their investments will entail foreign exchange related risks due to, amongst other factors, possible significant changes in the value of the euro relative to other relevant currencies because of economic, political or other factors over which the Issuer or Optics has no control. Depreciation of the euro against other relevant currencies could cause a decrease in the effective yield of the EUR New Notes and EUR Optics Notes their stated coupon rates and could result in a loss to noteholders when the return on the EUR New Notes or the EUR Optics Notes, as the case may be, is translated into the currency by reference to which noteholders measure the return on their investments. There may be tax consequences for prospective investors as a result of any foreign exchange gains or losses for any investment in the EUR New Notes or the EUR Optics Notes.

In addition, despite the measures taken by countries in the Eurozone to alleviate credit risk, concerns persist regarding the debt burden of certain Eurozone countries and their ability to meet future financial obligations, the overall stability of the euro and the suitability of the euro as a single currency given the diverse economic and political circumstances in individual Eurozone member states. These and other concerns could lead to the reintroduction of individual currencies in one or more member states, or, in more extreme circumstances, the possible dissolution of the euro

entirely. Should the euro dissolve entirely, the legal and contractual consequences for holders of euro-denominated obligations would be determined by laws in effect at such time. Neither the Issuer nor Optics can assure that the official exchange rate at which the EUR New Notes or the EUR Optics Notes, as the case may be, may be redenominated would accurately reflect their value in euro. These potential developments, or market perceptions concerning these developments and related issues, could adversely affect the value of the New Notes or the EUR Optics Notes, as the case may be.

Investment considerations may restrict certain investments.

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (a) the New Notes or the Optics Notes are legal investments for it, (b) the New Notes or the Optics Notes can be used as collateral for various types of borrowing and (c) other restrictions apply to its purchase or pledge of any New Notes or the Optics Notes.

Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of the New Notes or the Optics Notes under any applicable risk-based capital or similar rules.

The net proceeds from the issue of the EUR Original January 2029 Notes were allocated, in whole or in part, to finance or refinance existing and/or new Eligible Green and Social Projects in accordance with TIM Group Sustainability Financing Framework (the "**TIM Framework**"). As of the date of this Exchange Offer Memorandum, such net proceeds have been fully allocated in compliance with the TIM Framework. There can be no assurance that the EUR Optics January 2029 notes will be issued in accordance with the principles set out by the International Capital Market Association, (respectively, the Green Bond Principles ("**GBP**"), the Social Bond Principles ("**SBP**") and the Sustainability Bond Guidelines ("**SBG**")), which may result in adverse consequences for certain investors with portfolio mandates to invest in securities to be used for a particular purpose.

The value of the EUR Optics Notes could be adversely affected by a change in the English or Italian law or administrative practice.

The Conditions of the EUR Optics Notes are based on English law in effect as at the date of this Exchange Offer Memorandum, save that provisions convening meetings of Noteholders and the appointment of the Security Agent as *mandatario con rappresentanza* and legal representative of the holders of the EUR Optics Notes pursuant to Article 2414-bis, paragraph 3, of the Italian Civil Code and the appointment of a common representative (*rappresentante comune*) pursuant to Articles 2417 and 2418 of the Italian Civil Code, if any, in respect of any Series of the EUR Optics Notes are subject to compliance with Italian law. No assurance can be given as to the impact of any possible judicial decision or change to English or Italian law (where applicable) or administrative practice after the date of this Exchange Offer Memorandum which may affect, for example, the extent to which the EUR Optics Notes:

- Remain legal investments for certain Noteholders;
- Can continue to be used as collateral for various types of borrowing; or
- Remain attractive investments to potential buyers or can otherwise be freely traded.

The unforeseen consequences of any such change could have a material adverse effect on the marketability and /or value of EUR Optics Notes or on the right of certain investors to continue holding the EUR Optics Notes and, under those circumstances, certain investors may be compelled to sell their EUR Optics Notes at a loss. See also and "*Decisions at Noteholders' meetings bind all Noteholders and Noteholders' meeting provisions may change by operation of law or because of changes in Optics' circumstances*."

Payments in respect of the Optics Notes may in certain circumstances be made subject to withholding or deduction of tax for which holders may not receive additional amounts.

Optics is organized under the laws of Italy and therefore payments of principal and interest on the Optics Notes and, in certain circumstances, any gain on the Optics Notes, will be subject to Italian tax laws and regulations. All payments

made by Optics or on its behalf in respect of the Optics Notes will be made free and clear of withholding or deduction for, or on account of, any present or future taxes, unless the withholding or deduction is required by law. In that event, subject to a number of exceptions, Optics will pay such additional amounts as may be necessary such that the net amounts received after such withholding or deduction shall equal the respective amounts that would have been received in regard to such Optics Notes, as the case may be, had no such withholding or deduction been required.

Optics and its guarantors are not liable to pay any additional amounts to holders of the Optics Notes, as the case may be, in certain circumstances, including if any withholding or deduction is required pursuant to Decree No. 239 except where the procedures required under Decree No. 239, in order to benefit from an exemption from Italian Substitute Tax, have not been complied with due to the actions or omissions of Optics or its agents. In those circumstances, investors will receive the proceeds of their investment in the Optics Notes, as the case may be, net of applicable withholding or deductions. See "*Certain Tax Consideration – Certain Italian Tax Considerations.*"

In particular, holders of Optics Notes that are not residents in White List countries, holders who are residents in White List countries that do not properly and promptly satisfy the required conditions and procedures set forth by Decree No. 239 (and by the relevant application rules to benefit from exemption from Certain Italian Tax Considerations), and certain categories of holders of the Optics Notes who are residents in Italy, will therefore only receive the net proceeds of their investment in the Optics Notes, as the case may be, and will not be paid any additional amounts to compensate them for the withholding or deduction.

Although Optics believes that, under current law, Italian withholding tax or substitute tax will not be imposed under Decree No. 239 where the Optics Notes are traded on a regulated market or multilateral trading facility of an European Union or EEA country and the holder of the Optics Notes, is a resident for tax purposes in a White List country and such holder promptly and properly complies with certain certification and procedural requirements set forth by Decree No. 239 by the relevant application rules, there is no assurance that this will be the case should there be a change in applicable law or relevant procedures. See "*Certain Tax Consideration.*"

Moreover, holders of the Optics Notes should note that they will bear the risk of any change in the White List.

No assurance can be given that the procedural requirements provided by Decree No. 239 will be met.

The regime provided by Decree No. 239 and in particular the exemption from withholding tax in principle granted to holders of the EUR Optics Notes who are the beneficial owners of the EUR Optics Notes (or, if the holders are institutional investors not subject to tax, even if they are not the beneficial owners of the EUR Optics Notes) and are resident in countries included in the White List applies if certain procedural requirements are met. See "*Certain Tax Considerations—Certain Italian Tax Considerations*". No assurance can be given that all non-Italian resident investors will be eligible for the withholding tax exemption where the relevant foreign intermediary fails to provide sufficient information to the relevant Italian tax authorities under the procedures for applying the exemption regime. Should the procedural requirements not be met, Italian income withholding tax or substitute tax may apply on the payments made on the EUR Optics Notes to foreign investors resident in countries included on the White List. In such event, Optics or the relevant guarantor, as the case may be, will not be required to pay any additional amounts with respect to such withholding tax or substitute tax.

Italian tax changes may affect the tax treatment of the EUR TIF New Notes and of the EUR Optics Notes

Italian Law No. 111 of August 9, 2023 ("**Law 111**"), delegates power to the Italian government to enact, within twenty-four months from its publication, one or more legislative decrees implementing the reform of the Italian tax system (the "**Italian Tax Reform**").

According to Law 111, the Italian Tax Reform could significantly change the taxation of financial incomes and capital gains and introduce various amendments in the Italian tax system at different levels. The precise nature, extent, and impact of these amendments cannot be quantified or foreseen with certainty at this stage.

The information provided in this Exchange Offer Memorandum may not reflect the future tax landscape accurately.

Investors should be aware that the amendments that may be introduced to the tax regime of financial incomes and capital gains could increase the taxation on interest, similar income and/or capital gains accrued or realized under the EUR TIF New Notes and the Optics Notes and could result in a lower return of their investment.

Prospective investors should consult their own tax advisors regarding the tax consequences of the Italian Tax Reform.

TIM and Optics are incorporated in Italy, and Italian insolvency laws may not be as favorable to holders of the New Notes and the Optics Notes as insolvency laws in other jurisdictions with which they may be familiar.

TIM and Optics are organized and are likely to have their center of main interests under the laws of Italy.

The insolvency laws of Italy may not be as favorable to noteholders' interests as the laws of the U.S. or other jurisdictions with which noteholders may be familiar, including in respect of creditors' reorganization, priority of creditors, the ability to obtain post-petition interest and the duration of the insolvency proceedings, and thus may limit noteholders' ability to recover payments due on the New Notes or the Optics Notes, as the case may be, to the extent exceeding the limitations arising under other insolvency laws.

In the event that any one or more of TIM or Optics or a guarantor or any other of the Issuer's subsidiaries experiences financial difficulty, it is not possible to predict with certainty the outcome of such proceedings or their duration (which may be significantly longer than the duration of analogous proceedings in jurisdictions you may be familiar with). In particular, the relevant indentures, trust deed and the Intercreditor Agreement could be limited in scope and effect by Italian courts to the extent their covenants and provisions, which are untested under Italian case law, could be considered to conflict with mandatory provisions of Italian law. In addition, the insolvency and other laws of Italy may be materially different from, or in conflict with, each other, including in the areas of rights of secured and other creditors, the ability to void preferential transfer, priority of governmental and other creditors, the ability to obtain post-petition interest and the duration of the proceeding and preference periods. The application of these laws could call into question whether any particular jurisdiction's laws should apply, adversely affect noteholders' ability to enforce Noteholders' rights in Italy and limit any amounts that noteholders may receive. As a consequence, enforcement of rights under the TIM Notes and/or Optics Notes (as the case may be), the guarantees and the Optics Notes Collateral in an insolvency situation may be delayed and be complex and costly for creditors. See "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations.*"

In addition, Italian insolvency laws and regulations have recently been replaced by a new crisis and insolvency code – introduced by virtue of, among others, Legislative Decree No. 14 of January 12, 2019 implementing the guidelines contained in Law No. 155 dated October 19, 2017 (as subsequently amended and supplemented, the "Insolvency Code," also known as "Code of Business Crisis and Insolvency") (*Codice della Crisi d'Impresa e dell'Insolvenza*) – being a comprehensive and in material respects innovative legal framework regulating, among others, insolvency matters. Other than for minor changes in certain provisions of the Italian Civil Code, which already entered into force on March 16, 2019, the Insolvency Code came into force starting from July 15, 2022. The previous Italian Bankruptcy Law continues to apply to filings for declaration of insolvency procedures and bankruptcy restructuring plans (*concordato fallimentare*) and filings seeking the approval of debt restructuring agreement (*accordo di ristrutturazione dei debiti*) or the opening of a composition with creditors proceeding (*concordato preventivo*), in each case filed or pending before July 15, 2022. As of the date of this Exchange Offer Memorandum, the vast majority of the provisions of the Insolvency Code are untested in Italian courts and there is no guidance or case law available yet on its application. Considering the sweeping nature of this reform and the absence of judicial guidance, the impact cannot be predicted or fully assessed as of the date of this Exchange Offer Memorandum.

Total remuneration under the Notes will be automatically reduced if it exceeds the anti-usury cap levels set under Italian law.

Under Italian law, any obligation of an Italian company and/or any obligation secured or guaranteed by an Italian company, to pay any portion of remuneration (including interest, default interest, fees, charges, expenses and other costs and any other form of compensation related to the Notes) in excess of the thresholds permitted under Italian law No. 108 of March 7, 1996, as amended from time to time and related implementing rules and regulations (the "**Italian Usury Law**") may not be enforceable. Although the applicability of the Italian Usury Law to securities such as the

New Notes and/or the Optics Notes (as the case may be) (and, among others, related original issue discounts and make-whole payments that may be due under the applicable terms) remains untested, the relevant trust deed will provide that, if the remuneration applicable to New Notes and/or the Optics Notes (as the case may be) (including interest, default interest, fees, original issue discounts, premium, charges, expenses and other costs and any other form of compensation related to the New Notes and/or the Optics Notes (as the case may be) (the "**Total Remuneration**")) at any time exceeds the maximum remuneration permitted under applicable Italian law (including the Italian Usury Law), then the Total Remuneration will immediately and automatically be reduced to the maximum remuneration permissible under applicable Italian law (including the Italian Usury Law) for, and limited to, the period during which it is not possible to apply the remuneration as originally provided. This will result in a change of the economic terms of the New Notes and/or the Optics Notes (as the case may be) which, in turn, may adversely impact the rights of the holders of the New Notes and Optics Notes and may have a material adverse effect on the market value of the New Notes and/or the Optics Notes (as the case may be).

Risks Relating to the New Notes

The New Notes are structurally subordinated to the indebtedness and other obligations of TIM's subsidiaries other than those of the Issuer.

Any claim by TIM or any of its creditors, including the holders of the New Notes, against any subsidiaries will be structurally subordinated to all of the claims of creditors of such subsidiaries other than those of the Issuer, including trade creditors and creditors holding debt and guarantees issued by those subsidiaries, and claims of preferred and minority stockholders (if any) of those subsidiaries. The terms of the New Notes will not limit the transfer of assets to, or the making of investments in, any of TIM's subsidiaries.

In the event of insolvency, liquidation or other reorganization of any of its subsidiaries, creditors of such subsidiaries will generally be entitled to payment in full from their respective assets before TIM is entitled to receive any distribution from such assets as equity holders. Except to the extent that TIM may itself be a creditor with recognized claims against a subsidiary, claims of creditors of such subsidiary will have priority with respect to the assets and earnings of that subsidiary over the claims of TIM as equity holder, and there is no assurance that the claims (if any) of TIM as a creditor against such subsidiary may not be reduced, limited or extinguished as a result of applicable insolvency rules (such as the doctrine of equitable subordination or the rules regarding the potential avoidance of transactions concluded with related persons within a certain hardening period). Subsidiaries are also subject to liabilities to other creditors as a result of obligations incurred in the ordinary course of business (such as trade payables), which liabilities are also effectively senior to the New Notes.

Claims of secured creditors of the Issuer, if any, will have priority with respect to their collateral over the claims of unsecured creditors, such as the holders of the New Notes, to the extent of the value of the assets securing such indebtedness.

The New Notes will not be secured. As a result, claims of secured creditors of the Issuer, if any, will have priority with respect to the assets securing their indebtedness over the claims of holders of the New Notes. As such, the New Notes will be effectively subordinated to any existing and future secured indebtedness and other secured obligations of the Issuer, to the extent of the value of the assets securing such indebtedness or other obligations (except to the extent such assets in the future also secure the New Notes on an equal and ratable basis or priority basis). Although the terms of the New Notes will limit the incurrence of secured indebtedness, where applicable, such limitations are subject to a number of significant exceptions.

In the event of any foreclosure, dissolution, winding up, liquidation, reorganization, administration or other bankruptcy or insolvency proceeding of the Issuer at a time when it has secured obligations, holders of secured indebtedness will have priority claims to the assets of the Issuer that constitute their collateral (other than to the extent such assets in the future also secure the New Notes on an equal and ratables basis or priority basis). The holders of the New Notes will participate ratably with all holders of the unsecured indebtedness of the Issuer, and potentially with all their other respective general creditors, based upon the respective amounts owed to each holder or creditor, in the remaining assets of the Issuer. The claims of holders of the New Notes and other unsecured creditors will also depend on whether there is any value left in the bankruptcy estate besides any secured assets. If any of the secured indebtedness of the Issuer becomes due or the creditors thereunder proceed against the operating assets that secure such

indebtedness, their assets remaining after repayment of that secured indebtedness may not be sufficient to repay all amounts owing in respect of the New Notes. As a result, holders of New Notes may receive less, ratably, than holders of secured indebtedness of the Issuer.

Because the Global Notes are held on behalf of Euroclear and Clearstream, Luxembourg, investors will have to rely on their procedures for transfer, payment and communication with the Issuer

The EUR TIF New Notes will be represented by the relevant Global Notes except in certain limited circumstances described in the relevant Permanent Global Note. The relevant Global Notes will be deposited with a common safekeeper for Euroclear and Clearstream, Luxembourg. Except in certain limited circumstances described in the relevant Permanent Global Note, investors will not be entitled to receive definitive EUR TIF New Notes. Euroclear and Clearstream, Luxembourg will maintain records of the beneficial interests in the relevant Global Notes. While the EUR TIF New Notes are represented by the relevant Global Notes, investors will be able to trade their beneficial interests only through Euroclear and Clearstream, Luxembourg.

While the EUR TIF Notes are represented by the relevant Global Notes, TIF will discharge its payment obligations under the EUR TIF New Notes by making payments to or to the order of the common safekeeper for Euroclear and Clearstream, Luxembourg for distribution to their account holders. A holder of a beneficial interest in a Global Note must rely on the procedures of Euroclear and Clearstream, Luxembourg to receive payments under the EUR TIF New Notes. TIF has no responsibility or liability for the records relating to, or payments made in respect of, beneficial interests in the relevant Global Notes.

Holders of beneficial interests in the relevant Global Notes will not have a direct right to vote in respect of the EUR TIF New Notes. Instead, such holders will be permitted to act only to the extent that they are enabled by Euroclear and Clearstream, Luxembourg to appoint appropriate proxies.

There is a risk that restrictions on the deductibility of interest payments under the EUR TIF New Notes may be implemented.

Fiscal and certain tax considerations policy and practice is constantly evolving and there have recently been a number of developments. In particular, a number of changes of law and practice are occurring as a result of the OECD Base Erosion and Profit Shifting project ("**BEPS**"). Investors should note that certain action points which form part of the OECD BEPS project (such as Action 4, which can deny deductions for financing costs as discussed below, or Action 2 on hybrid mismatch arrangements) have been or may be implemented in a manner which may affect the tax position of TIF.

As part of its anti-tax avoidance package, and to provide a framework for a harmonized implementation of a number of the BEPS conclusions across the EU, the EU Council adopted Council Directive (EU) 2016/1164 (the "**EU Anti-Tax Avoidance Directive 1**") on July 12, 2016. The EU Council further adopted Council Directive (EU) 2017/952 (the "**EU Anti-Tax Avoidance Directive 2**" and, together with the Anti-Tax Avoidance Directive 1, the "**EU Anti-Tax Avoidance Directives**") on May 29, 2017, amending the EU Anti-Tax Avoidance Directive 1, to provide for minimum standards for counteracting hybrid mismatches involving EU member states and third countries.

The EU Anti-Tax Avoidance Directives contain various measures that could potentially result in payments of interest under the EUR TIF New Notes ceasing to be fully deductible for Luxembourg corporate income tax purposes. This could increase the TIF liability to tax and reduce the amounts available for payments on the EUR TIF New Notes. There are two measures of particular relevance in this regard.

Firstly, the interest limitation requirements set out by the Anti-Tax Avoidance Directive 1 have already been implemented in Article 168bis of the Luxembourg income tax law effective as of January 1, 2019, which restrict, for a Luxembourg taxpayer, the deduction of net interest expenses qualifying as "excess borrowing costs" to the higher of (i) 30% of the taxpayer's EBITDA (defined as the taxpayers total net income increased by the amount of its excess borrowing costs, depreciation and amortization), and (ii) €3 million.

Excess borrowing costs are defined as the amount by which the deductible borrowing costs of a taxpayer exceeds the taxpayer's taxable interest revenues and other economically equivalent taxable income of the taxpayer. Excess

borrowing costs not deductible in a tax period can be carried forward indefinitely. The same applies to a taxpayer's excess interest capacity which cannot be used in a given tax period (however, such excess interest capacity can only be carried forward for a maximum period of 5 years).

Secondly, the EU Anti-Tax Avoidance Directives also contain rules relating to so-called hybrid mismatches. Luxembourg implemented the anti-hybrid mismatch rules under amended Article 9 of EU Anti-Tax Avoidance Directive 1 and 2 in Article 168ter of the Luxembourg income tax law with effect as of January 1, 2020.

As per Article 168ter of the Luxembourg income tax law, a hybrid mismatch arises when a payment between entities located in different states results in a double deduction or a deduction without inclusion. In the event of a double deduction, the deriving hybrid mismatch should be adjusted by denying the deduction at the level of either (i) the payee or (ii) the payor (*provided* that the deduction has not already been denied at the level of the payee). In the event of a deduction without inclusion, the deriving hybrid mismatch shall be adjusted by means of either (i) the denial of the deduction at the level of the payor or (ii) the inclusion of the payment in the taxable income of the payee (*provided* that the deduction has not already been denied at the level of the payor).

A hybrid mismatch occurs only if it arises either (i) between "associated enterprises" or (ii) in the case of a structured arrangement.

The impact of the EU Anti-Tax Avoidance Directive 2 depends on the tax treatment at the level of the relevant Noteholder and may alter the tax position of the TIF.

Further to Action 1 of the BEPS project, the OECD published blueprints (commonly referred to as "**BEPS 2.0**"), divided into two "pillars" of issues, seeking to address tax challenges arising from digitalization of the economy, and proposing fundamental changes to the international tax system. Pillar One proposes the reallocation of taxing rights between jurisdictions, and Pillar Two additional global anti-base erosion rules. The implementation of the Pillar One and Pillar Two proposals was scheduled for 2023. On December 22, 2021, the European Commission proposed an EU directive ensuring a minimum effective tax rate in line with Pillar Two. The proposal has been unanimously approved by all Member States, which are required to implement these rules into their national systems before December 31, 2023. On December 22, 2023, Luxembourg implemented Pillar 2 into national law.

The extent of the implementation of Pillar 2 Directive in the jurisdictions in which the TIM Group operates is still uncertain. Specifically, the scope and applicability of Pillar 2 are yet to be determined, so that, depending on the application of the technical detail of BEPS 2.0, TIF or any other member of the TIM Group may suffer additional tax as effective tax rates could increase within the TIM Group or on its investments and assets, including by way of higher levels of tax being imposed than is currently the case, possible denial of deductions or increased withholding taxes and/or profits being allocated differently.

Disallowance of the tax deductibility of interest due to associated enterprises located in a country listed on the EU list of non-cooperative jurisdictions

On January 28, 2021, the Luxembourg Parliament passed a law prohibiting as from March 1, 2021 the deduction of interest expenses or royalties, accrued or paid, to entities established in jurisdictions (countries or territories) which are considered to be "non-cooperative" (such countries or territories being designated on a so-called "**Blacklist**"). Expenses will be concerned as from January 1, 2021 onward when they are paid or due to "related parties", a concept as defined for the purposes of Luxembourg's transfer pricing rules, i.e. Article 56 of the Luxembourg income tax law dated December 4, 1967, as amended. This limitation applies when the recipient of the expense is a corporate entity, which, under Luxembourg tax law, is considered as "opaque". However, where a Luxembourg taxpayer can prove "valid commercial reasons that reflect economic reality", such prohibition would not apply. The Blacklist should, in principle, be the same as the most recent list published (at that moment) by the EU Council of "non-cooperative" countries and territories. This Blacklist will be updated regularly by the Luxembourg Government when presenting the annual budget bill. This law may have a significant impact for certain investment structures. The denial of the deductibility regime will cease to apply to interest or royalties owed to an entity that is resident in a jurisdiction that is being removed from the EU list as from the date of the publication of the updated list in the Official Journal of the EU. The list adopted by the EU Council on February 20, 2024 is composed of American Samoa, Anguilla, Antigua and Barbuda, Fiji, Guam, Palau, Panama, the Russian Federation, Samoa, Trinidad and Tobago, the US Virgin Islands

and Vanuatu. Any change to such list could materially and adversely affect the amount of payments made by the TIF to Noteholders in respect of the New Notes.

Risks Relating to the Optics Notes

As the EUR Optics Notes are held by or on behalf of Euroclear and Clearstream, Luxembourg, investors will have to rely on the clearing system procedures for transfer, payment and communication with Optics

The EUR Optics Notes will be registered in the name of a nominee of a common depository and deposited with a common depositary for Euroclear and Clearstream, Luxembourg. Except in the circumstances described in the relevant Global Certificate, investors will not be entitled to receive the relevant Definitive Certificates. Euroclear and Clearstream, Luxembourg will maintain records of the beneficial interests in the relevant Global Certificate. While the EUR Optics Notes are in global form, investors will be able to trade their beneficial interests only through Euroclear or Clearstream, Luxembourg, as the case may be.

While the EUR Optics Notes are in global form, Optics will discharge its payment obligations under the EUR Optics Notes by making payments to, or to the order of, the nominee of a common depositary. A holder of a beneficial interest in a EUR Optics Note must rely on the procedures of Euroclear and/or Clearstream, Luxembourg, as the case may be, to receive payments under the EUR Optics Notes. Optics has no responsibility or liability for the records relating to, or payments made in respect of, beneficial interests in such a Global Note.

Optics may incur substantially more debt in the future, which may make it difficult for it to service its debt, including the Optics Notes, and impair its ability to operate its businesses.

Despite Optics' substantial leverage, Optics may incur substantial additional debt in the future. The USD Optics Notes Indenture, the EUR Optics Notes Trust Deed and the terms of the Optics Financing Arrangements permit Optics to incur an unlimited amount of additional indebtedness, including at subsidiaries that do not guarantee the Optics Notes and a substantial amount of additional indebtedness at NetCo prior to the consummation of the Push-Down Merger. In addition, such indebtedness may be permitted to share in the Optics Notes Collateral or benefit from security interests over assets that do not secure the Optics Notes, and any such indebtedness could mature prior to the Optics Notes. If additional debt is incurred, the related risks that Optics faces would increase. Optics' inability to service its debt could have a material adverse effect on its business, financial position, results of operations and its ability to fulfil Optics' obligations under the Optics Notes.

Optics is subject to restrictive covenants that limit its operating and financial flexibility.

The EUR Optics Notes Trust Deed and the terms of the Optics Financing Arrangements contain covenants which impose significant operating and financial restrictions on Optics. For example, Optics shall be restricted from engaging in material business, with certain specified exceptions, until the completion of the Push-Down Merger.

All of these limitations will be subject to significant exceptions and qualifications. See "*Terms and Conditions of the EUR Optics (TIF) Notes*." In addition, the Optics Group is subject to further covenants and limitations under the Optics Financing Arrangements. The covenants to which Optics is subject could limit its ability to operate the business, to finance its future operations and capital needs and to pursue business opportunities and activities that may be in its interest. For further information, please see "*Description of Certain Other Financing Arrangements of the Optics Group—Senior Facilities Agreement—Affirmative Covenants*," "*Description of Certain Other Financing Arrangements of the Optics Group—Senior Facilities Agreement—Affirmative Covenants*," "*Description of Certain Other Financing Arrangements of the Optics Group—Senior Bridge Facility Agreement—Negative Covenants*" and "*Description of Certain Other Financing Arrangements of the Optics Group—Senior Bridge Facility Agreement—Negative Covenants.*"

The Optics Group will require a significant amount of cash to service its debt and sustain its operations, which it may not be able to generate or raise. The terms of the Optics Group's borrowings could materially adversely affect its financial condition.

The Optics Group's ability to make payments on and refinance its debt will depend on its future operating performance and ability to generate cash from operations. The Optics Group's ability to generate cash from operations is subject, in large part, to general economic, competitive, legislative and regulatory factors and other factors discussed in these "*Risk Factors*," many of which are beyond its control. The Optics Group may not be able to generate sufficient cash flow from operations or obtain enough capital to service its debt or to fund future capital expenditure, acquisitions or working capital needs.

The Optics Group also faces risks that it may be unable to refinance some or all of its borrowings on similar terms to the Optics Notes and the Optics Financing Arrangements, on terms that it deems appropriate or at all. The Optics Group's ability to refinance its future borrowings or to undertake additional borrowings in the future may be affected by a number of factors, including its operating and financial performance, as well as broader market and macroeconomic conditions that are outside its control.

If the Optics Group's future cash flow from operations and other capital resources is insufficient to pay its obligations as they mature or to fund its liquidity needs, it may be forced to:

- reduce or delay certain business activities and capital expenditures particularly with respect to those to be incurred by NetCo;
- sell assets or equity;
- obtain additional debt or equity capital;
- forgo strategic opportunities, such as acquisitions of other businesses; or
- restructure or refinance all or a portion of its debt, including the Notes, on or before maturity.

The Optics Group cannot assure investors that it would be able to accomplish any of these alternatives on a timely basis or on commercially reasonable terms, if at all. Any refinancing of its debt could be at higher interest rates and may require it to comply with more onerous covenants, which could further restrict its business, financial condition and results of operations. The type, timing and terms of any future financing will depend on the Optics Group's cash needs and the prevailing conditions in the financial markets. In addition, the terms of the Optics Notes and any future debt may limit Optics' ability to pursue any of these measures.

If the Optics Group is unable to access alternative financing, it may not be able to satisfy its debt obligations, including under the Optics Notes. In that event, borrowings under other debt agreements or instruments that contain cross-acceleration or cross-default provisions, including the Optics Notes, may become payable on demand, and the Issuer may not have sufficient funds to repay all its debts, including the Optics Notes.

A significant change in finance costs, whether due to higher levels of borrowing or an increase in interest payable on future borrowings, or an inability to obtain financing on acceptable terms or at all may have a material adverse effect on the Optics Group's business, results of operations, financial condition and prospects.

Until the Push-Down Merger is consummated (if at all), Optics' ability to repay its debt will be dependent on its ability to obtain cash from its subsidiaries.

Until the Push-Down Merger is consummated, Optics is a holding company that conducts no business operations of its own and has no significant assets other than the shares it holds in its direct subsidiaries. Repayment of the FiberCop Term Loan and its other indebtedness, including under the Optics Notes, is dependent on the Optics Financing Arrangements and a certain equity contribution from Optics HoldCo to Optics and from Optics to NetCo (by means of an intercompany loan to be granted from Optics to NetCo and/or an equity contribution made by Optics to NetCo), separately, on the ability of Optics' direct and indirect subsidiaries to make cash available to it, by dividend

distributions, debt repayment, including by way of payment of amounts owed to Optics pursuant to any Funding Loan, loans or otherwise. In particular, funds received by NetCo through the NetCo Funding will be applied to repay the FiberCop Term Loan and the FiberCop Intercompany Loan.

In the event that Optics puts in place a Funding Loan to NetCo, the principal amount of such Funding Loan (if any) may be significantly less than the principal amount of indebtedness of Optics pro forma for the Acquisition as of the Acquisition Closing Date. Accordingly, pending the Push-Down Merger, NetCo may need to upstream funds to Optics by way of payments of interest and principal of the Funding Loan (if any), dividends and other means to service indebtedness of Optics, including the Optics Notes which may entail certain inefficiencies and leakages.

Moreover, Optics' subsidiaries may not be able to, or may be restricted by the terms of their existing or future indebtedness, or by law, in their ability to make distributions or advance upstream loans to enable Optics to make payments in respect of its indebtedness, including the Optics Notes. Each subsidiary of Optics is a distinct legal entity and, under certain circumstances, legal and contractual restrictions may limit its ability to obtain cash from its subsidiaries. The Optics Group may enter into strategic transactions in the future that involve the sale of majority or minority stakes in certain of its subsidiaries which could in the future diminish the amount of net income available to be distributed to Optics and there can be no assurances that the amount of Optics' outstanding indebtedness would be reduced in connection with any such transaction.

Optics may be unable to complete the Push-Down Merger within the anticipated time-frame, or at all.

Following the consummation of the Transactions, Optics intends to use commercially reasonable endeavors, subject to any relevant approval and/or authorization by any competent authority, to merge Optics with NetCo, with NetCo being the surviving entity within six months following the Acquisition Closing Date. The Push-Down Merger will be undertaken pursuant to the provisions of Article 2501-*bis* and following of the Italian Civil Code and other applicable provisions of Italian law. Fastweb currently owns a 4.5% stake in FiberCop. If Fastweb continues to be a shareholder of NetCo following the Acquisition, it is expected that Fastweb will have a withdrawal right, pursuant to article 2437 of the Italian Civil Code (which is substantially a right to sell its shares to NetCo or other shareholders of NetCo, on the terms and conditions provided by law), in particular in the event that certain amendments are made to the bylaws of NetCo (prior to or at the consummation of the Acquisition). This includes amendments with respect to the deletion/amendment of certain transfer restrictions currently included in the bylaws, which may be necessary to allow (or in any event facilitate) the creation of security over NetCo's shares in the context of the Transactions and the subsequent transfer that could occur following the enforcement of the pledge upon exercise). Accordingly, Fastweb may opt to exercise such withdrawal right to sell its minority stake and to be liquidated following the Acquisition. The funding of the potential liquidation of Fastweb shares will be determined by Optics at the relevant time. As of the date of this Exchange Offer Memorandum, Optics does not anticipate funding the potential liquidation of Fastweb shares through the incurrence of debt. In order to complete the Push-Down Merger, there are various steps that Optics must take, including the preparation of a merger plan, a report by the directors of the companies involved in the Push-Down Merger (*relazione dell'organo amministrativo*) and a report by an independent expert appointed by the court, assessing the sustainability of debt at the level of NetCo.

Optics' estimation of the timing required to complete the Push-Down Merger is based upon market practice for leveraged buyouts in Italy, which typically involves acquisition vehicles in the form of joint stock companies (*società per azioni*) where an independent expert is required to be appointed by the court, which creates an inherent uncertainty as to the length of time in which the Push-Down Merger can be expected to take place. In addition, there can be no assurance that (i) the independent expert will release its report, (ii) its report will confirm the reasonableness of the merger plan assumptions or (iii) the other steps required for the Push-Down Merger will be taken in a timely manner, or at all. Subject to certain exceptions, the Push-Down Merger can only be implemented following the expiration of 60 days after the latest filing with the competent companies' registry of the resolutions approving the Push-Down Merger. Within this 60-day deadline, the creditors of the companies involved in the Push-Down Merger are entitled to challenge the Push-Down Merger.

As a result of the consummation of the Push-Down Merger, to the extent that NetCo is the successor company of the Push-Down Merger, (i) the obligations of Optics as issuer of the Optics Notes pursuant to the USD Optics Notes Indenture and the EUR Optics Notes Trust Deed will be assumed by NetCo, (ii) NetCo will no longer be a separate legal entity and the security interests over Optics' receivables in respect of material intercompany loans granted to

NetCo will automatically cease to exist, and (iii) the security interests over the share capital of Optics will be extinguished by operation of law and the Optics Notes will instead be secured by the pledge on the portion of the shares of NetCo as entity resulting from the Push-Down Merger held by Optics HoldCo and intercompany loans made available by Optics HoldCo to Optics as substituted by NetCo. In the event Optics is unable to consummate the Push-Down Merger, Optics will remain the issuer of the Optics Notes.

Restrictions imposed by the terms of the Optics Notes and certain of the Optics' other outstanding debt agreements will limit its ability to take certain actions, which may limit the Optics' ability to finance future operations and capital needs and to pursue business opportunities and activities.

The terms of certain series of the Optics Notes and other outstanding debt agreements will limit the Optics' flexibility to operate its business.

In addition, the Optics Financing Arrangements provide for various customary representations and undertakings as well as affirmative covenants and negative covenants, including relating to acquisitions, disposals and mergers, which restrict certain aspects of Optics' business, as well as events of default provisions. If Optics and its subsidiaries fail to comply with any of these representations, undertakings, or covenants and are unable to remedy (if applicable) such failure or fail to obtain a waiver or consent, a default could result under such credit facilities, which, in turn, could result in termination rights, acceleration rights, draw stops or increases in interest rates or fees in such credit facilities. In these circumstances, Optics' assets and cash flow may not be sufficient to repay in full the defaulted debt under such credit facilities or other debt instruments. If such debt was accelerated and Optics' financial resources were insufficient to discharge their respective obligations under such agreement, Optics could be forced into bankruptcy or liquidation.

Moreover, certain credit facilities entered into by Optics include, and in the future might include, certain events of default (such as breaches of representations, warranties and undertakings and if Optics or certain of its subsidiaries fail to make payment when due on certain other debt) that are different from the events of default set forth in the terms of each series of the Optics Notes. If an event of default occurs under any series of the Optics Notes or any of the Optics' other debt instruments and is not cured or waived, the holders of the defaulted debt could terminate their commitments and declare all outstanding debt, together with accrued and unpaid interest and other fees, to be immediately due and payable. Borrowings under the Optics' debt instruments, including certain series of the Optics Notes, that contain cross-acceleration or cross-default provisions also may be accelerated or become payable on demand as a result of an event of default under such debt instruments. In these circumstances, Optics' assets and cash flow may not be sufficient to repay in full the defaulted debt and other debt, including the Optics Notes then outstanding. If some or all of these instruments were accelerated, Optics could be forced into bankruptcy or liquidation, and it may not be able to repay its obligations under the Optics Notes in such an event.

Any future debt may include similar or other restrictive terms. These restrictions could materially and adversely affect Optics' ability to finance its future operations or capital needs or to engage in other business activities or consummate transactions that may be in its best interests.

Some of the Optics Group's indebtedness bears interest at floating rates that could rise significantly, thereby increasing costs and reducing cash flow, and that may be impacted by applicable law and regulation.

A portion of the Optics Group's outstanding borrowings bear interest at floating rates, exposing the Optics Group to the fluctuations of variable interest rates based on benchmark rates such as the Euro Interbank Offered Rate ("**EURIBOR**"). Increases in the applicable benchmark rates used in the calculation of interest on these borrowings would result in higher interest expenses to service these debt levels in the future. An increase in variable and/or fixed interest rates may result in the Optics Group incurring interest expense and cash outflows in relation to these debt instruments at higher levels than anticipated, thereby reducing cash flow available for capital expenditures and hindering the Optics Group's ability to make payments on the Optics Notes. These rates could increase significantly and for a variety of reasons, including due to changes in the monetary and interest rate policies of central banks, as well as broader macro-economic conditions in the European Union and globally. While the Optics Group may from time to time hedge a portion of its interest rate exposure, it is under no obligation to do so and any hedging activity in respect of the Optics Group's variable-rate debt may be discontinued at any time. Further, there can be no assurance

that, if the Optics Group wishes to hedge its interest rate exposure, such hedging arrangements will be available to the Optics Group on commercially reasonable terms or at all.

Following allegations of manipulation of LIBOR, another measure of interbank lending rates, regulators and law enforcement agencies from a number of governments and the European Union have conducted investigations into whether banks that contribute data in connection with the calculation of daily EURIBOR or the calculation of LIBOR may have been manipulating or attempting to manipulate EURIBOR and LIBOR.

Various interest rate benchmarks (including EURIBOR) are the subject of recent national and international regulatory guidance and proposals for reform. Some reforms are already effective, including the EU Benchmark Regulation (Regulation (EU) 2016/1011) and the cessation of the publication of Sterling LIBOR rates and certain tenors of U.S. dollar LIBOR rates after December 31, 2021, while others are still to be implemented. On April 3, 2023, it was announced that publication of certain tenors of U.S. dollar LIBOR settings will continue until September 30, 2024 to serve only as a temporary bridge for use in certain legacy contracts.

These reforms and other pressures may cause EURIBOR, the Sterling Over Night Index Average Rate (SONIA), the Secured Overnight Financing Rate (SOFR) or other such benchmarks to disappear entirely, to perform differently than in the past (as a result of a change in methodology or otherwise), create disincentives for market participants to continue to administer or participate in certain benchmarks or have other consequences which cannot be predicted. Based on the foregoing, investors should in particular be aware that (a) any of these reforms or pressures or any other changes to a relevant interest rate benchmark, as well as manipulative practices or the cessation thereof, could affect the level of the published rate, including to cause a sudden or prolonged increase and/or to make it more volatile than it would otherwise be, which could have an adverse impact on the Optics Group's ability to service debt that bears interest at floating rates of interest, and (b) if EURIBOR, SONIA, or SOFR (or any of their successors or other benchmarks) is discontinued, that may require amendments to the Optics Group's finance documentation that references such rate and, in relation to any of its obligations which have not transitioned to a successor rate by the relevant date, then the rate of interest applicable to such obligations may be determined for a period by applicable fallback provisions, specified in the relevant documentation for such obligations, although such provisions, if they are dependent in part upon the provision by reference banks of offered quotations, may not operate as intended (depending on market circumstances and the availability of rates information at the relevant time).

Optics HoldCo, Optics and any other provider of Optics Notes Collateral will have control over the Optics Notes Collateral, and the sale of particular assets could reduce the pool of assets securing the Optics Notes.

The Security Documents relating to the Optics Notes will allow Optics HoldCo, Optics and any other Optics Notes Collateral providers, as applicable, to remain in possession of, retain exclusive control over, freely operate, and collect, invest and dispose of any income from the Optics Notes Collateral to the extent that it relates to their assets. So long as no acceleration event has occurred and subject to certain conditions, Optics HoldCo, Optics and any other Optics Notes Collateral providers, as applicable, may, among other things, conduct ordinary course activities with respect to the Optics Notes Collateral, such as selling, factoring, abandoning or otherwise disposing of the Optics Notes Collateral and, making ordinary course cash payments, including repayments of indebtedness, in each case in accordance with, or as otherwise permitted or not prohibited by the EUR Optics Notes Trust Deed or the documents creating security over the Optics Notes Collateral or the Intercreditor Agreement. Any of these activities could reduce the value of the Optics Notes Collateral, which could in turn reduce the amounts payable to holders of the Optics Notes from the proceeds of any sale of the Optics Notes Collateral in the case of an enforcement of the liens on the Optics Notes Collateral.

The principal amount of the receivables forming part of the Optics Notes Collateral may be reduced as a result of prepayments of such loan prior to the maturity date of the Optics Notes

The receivables from certain material structural intercompany loans from Optics, including the Funding Loan (if any) (or, after the Push-Down Merger, Optics HoldCo) will constitute part of the Optics Notes Collateral. Repayments of such intercompany loans, including the Funding Loan (if any), prior to the maturity date of the Optics Notes would result in a reduction in the receivables and EUR Optics Notes Trust Deed will not prohibit any such prepayments. Any reduction in the principal amount of such intercompany loans would reduce the value of such receivables and the Optics Notes Collateral.

Prior to completion of the Push-Down Merger and, in the event that the Push-Down Merger does not occur prior to the granting of the guarantee by NetCo, the Optics Notes will be structurally subordinated to the existing or future indebtedness or obligations of each of Optics' subsidiaries, including NetCo. After the granting of the guarantee by NetCo (and subject to the limitations thereon), the Optics Notes will be structurally subordinated to any existing or future indebtedness or obligations of each of the subsidiaries of Optics, other than NetCo. After the Push-Down Merger, the Optics Notes will be structurally subordinated to any existing or future indebtedness or obligations of each of any subsidiaries of NetCo.

On the Optics Notes Issue Date, the Optics Notes will only be obligations of Optics and will not be guaranteed. Subject to certain agreed security principles and to certain material limitations pursuant to applicable laws Optics will use commercially reasonable endeavors, subject to any relevant approval and/or authorization by any competent authority, to implement the Push-Down Merger on terms complying with articles 2501-bis and following of the Italian Civil Code, within six months from the Acquisition Closing Date. The Push-Down Merger is subject to certain conditions and significant limitations under applicable Italian law and there is no assurance that it will be completed. See "*— Optics may be unable to complete the Push-Down Merger within the anticipated timeframe, or at all*," "*—Once granted, the guarantees, including the NetCo Guarantee, and the Optics Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability" and "Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations.*"

Prior to completion of the Push-Down Merger and, in the event that the Push-Down Merger does not occur prior to the granting of the guarantee by NetCo, the Optics Notes will be structurally subordinated to the existing or future indebtedness or obligations of each of the Optics' subsidiaries, including NetCo. After the granting of the guarantee by NetCo (and subject to the limitations thereon), the Optics Notes will be structurally subordinated to any existing or future indebtedness or obligations of each of the subsidiaries of Optics, other than NetCo. After the Push-Down Merger, the Optics Notes will be structurally subordinated to any existing or future indebtedness or obligations of each of the subsidiaries of NetCo.

More generally, the Optics Notes will be structurally subordinated to the existing or future liabilities of the Optics' subsidiaries that are not, or do not become, Guarantors and to the liabilities of any Guarantor to the extent that such liabilities exceed the principal amount of Optics Notes that can be guaranteed or secured by NetCo or any other relevant Guarantor. Subject to the operation of certain agreed security principles and certain significant limitations under applicable laws, the NetCo Guarantee, if and once granted, and any other future Guarantees, will provide the holders of the Optics Notes with direct claims against NetCo or the other relevant Guarantor, as applicable. However, the obligations of any Guarantor of the Optics Notes under its Guarantee will be limited under the EUR Optics Notes Trust Deed to an amount which has been determined so as to ensure that amounts payable will not result in violations of applicable laws (including – without limitation – rules and principles relating to financial assistance and/or corporate benefit) or otherwise cause such Guarantor to be deemed insolvent under applicable law or such Guarantee to be deemed void, unenforceable or ultra vires, or cause the directors of such Guarantor to be held in breach of applicable law for providing the Guarantee. As a result, a Guarantor's liability under its Guarantee could be materially reduced or eliminated depending upon the amount of its obligations and upon applicable laws. The NetCo Guarantee and of any other subsidiary which might be required in the future to become a Guarantor under the EUR Optics Notes Trust Deed be subject to significant limitations pursuant to applicable laws. In particular, if the NetCo Funding will not be made available to NetCo in the form of an intercompany loan and no other financial support (other than equity contributions) is made available by Optics directly or indirectly to NetCo (or any of its direct or indirect subsidiaries pursuant to article 2359, paragraph 1, numbers 1 and/or 2, of the Italian Civil Code) on or following the Optics Notes Issue Date, pursuant to, among others, applicable corporate benefit restrictions under Italian law, the value of NetCo Guarantee and the corresponding liability of NetCo thereunder may be deemed nil. In this respect, see in particular "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations*."

Generally, claims of creditors, including depositors, trade creditors and preferred stockholders (if any) of the non-guarantor subsidiaries of Optics or NetCo, as applicable, are entitled to payments of their claims from the assets of such subsidiaries before these assets are made available for distribution to their respective parent entity or the creditors of Optics or NetCo, as applicable. Accordingly, in the event that any subsidiary of Optics or NetCo, as applicable,

becomes insolvent, is liquidated, reorganized or dissolved or is otherwise wound up other than as part of a solvent transaction:

- the creditors of Optics or NetCo, as applicable, including the holders of the Optics Notes, will have no right to proceed against the assets of such subsidiary; and
- creditors of such subsidiary, including depositors, trade creditors and preferred stockholders (if any) will generally be entitled to payment in full from the sale or other disposal of the assets of such subsidiary before the Optics Notes, as applicable, as a direct or indirect shareholder (as applicable), will be entitled to receive any distributions from such subsidiary.

As such, the Optics Notes and NetCo Guarantee will be structurally subordinated to the creditors, including depositors, trade creditors and any preferred stockholders (if any) of the non-guarantor subsidiaries of Optics. The Optics' subsidiaries that do not guarantee the Optics Notes will have no obligation, contingent or otherwise, to pay amounts due under the Optics Notes or to make any funds available to pay those amounts, whether by dividend, distribution, loan or otherwise. As such, the claims of creditors of Optics' subsidiaries (other than NetCo), including trade creditors and claims of preference shareholders (if any), will have priority with respect to the assets and earnings of the subsidiary over the claims of the creditors of Optics, including claims by the holders of the Optics Notes.

In addition, the EUR Optics Notes Trust Deed will permit Optics, NetCo and any future subsidiaries to incur substantial unlimited indebtedness without such incurrence constituting a default under the Optics Notes Trust Deed, and such indebtedness may also be secured in certain circumstances.

Finally, pursuant to the EUR Optics Notes Trust Deed, under a variety of circumstances, the guarantees granted under the Optics Notes will be released automatically without your consent or the Optics Notes Trustee obtaining your further consent, including, by way of example, in the event that such guarantor is unconditionally released and discharged from its liability with respect to the Senior Facilities Agreement.Moreover, any future Guarantees would be subject to the significant limitations described under "Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations" and, accordingly, the Optics Notes would be structurally subordinated to the liabilities of any guarantors to the extent that such liabilities exceed the principal amount of Optics Notes that can be guaranteed or secured by such guarantors.

Corporate benefit, financial assistance laws, capital maintenance and other limitations on the guarantee may adversely affect the validity and enforceability of the NetCo Guarantee.

Each of Optics, Optics HoldCo and NetCo is incorporated and organized under the laws of Italy. Enforcement of the obligations under a guarantee against, and/or any Optics Notes Collateral provided by, as applicable, any such entity will be subject to certain available defenses. These laws and defenses may include those that relate to fraudulent conveyance or transfer, laws, rules and principles concerning financial assistance, corporate benefit, capital maintenance, preservation of share capital, liquidity maintenance, voidable preferences, thin capitalization or similar laws as well as regulations or defenses affecting the rights of creditors generally, by limiting the amounts recoverable under the relevant guarantee, including NetCo Guarantee, or Optics Notes Collateral and the amounts recoverable thereunder will be limited to the maximum amount that can be guaranteed or secured by the guarantor, including NetCo, or the relevant security provider under the applicable laws of each jurisdiction, to the extent that the granting of such guarantee or Optics Notes Collateral is not in the guarantor's or relevant security provider's corporate interests, or the burden of such guarantee or Optics Notes Collateral exceeds the benefit to the guarantor or relevant security provider, or such guarantee or Optics Notes Collateral would be in breach of laws, rules and principles on capital maintenance, financial assistance, liquidity maintenance or thin capitalization rules or any other general statutory laws and/or would cause the directors of such subsidiary guarantor or security provider to contravene their fiduciary duties and incur civil or criminal liability. An increase in the amount of debt that benefits from the guarantee without a corresponding increase in the amount of the guarantee will dilute the value of the guarantee to its beneficiaries, including the holders of the Optics Notes.

Specifically, as a result of the applicable limitations under Italian law with respect to, among others, corporate benefit, notwithstanding anything to the contrary provided in the EUR Optics Notes Trust Deed, as regards to NetCo, any Guarantee granted by NetCo will only guarantee Optics' obligations under the Optics Notes up to an amount not

exceeding an amount equal to the aggregate principal amount of any Funding Loan made available to NetCo (or any of its direct or indirect subsidiaries pursuant to article 2359, paragraph 1, numbers 1 and/or 2, of the Italian Civil Code) or other financial support (other than equity contributions) made available by Optics directly or indirectly to NetCo (or any of its direct or indirect subsidiaries pursuant to article 2359, paragraph 1, numbers 1 and/or 2, of the Italian Civil Code) on or following the Optics Notes Issue Date, as outstanding at the time of the enforcement of the NetCo Guarantee, in each case net of any proceeds already paid by it pursuant to the enforcement of its guarantee under the Optics Notes and/or received upon the enforcement of any security interests granted by it; *provided further* that NetCo shall not be liable as a Guarantor in respect of any amounts in excess of the amount that it is entitled to set-off against its claims of recourse or subrogation (*regresso* or *surrogazione*) arising as a result of any payment made by it under its NetCo Guarantee. As a result, if at the time of the enforcement of the Guarantee, no amounts have been lent to NetCo under the Funding Loan or other financial support (other than equity contributions) made available by Optics directly or indirectly to NetCo on or following the Optics Notes Issue Date, and is outstanding at the time of the enforcement of the Guarantee, NetCo's liability under its NetCo Guarantee may be deemed nil.

Accordingly, enforcement of the guarantee against the guarantor would be subject to certain defenses available to guarantors generally or, in some cases, to limitations contained in the terms of the guarantee designed to ensure compliance with statutory requirements applicable to the guarantor. As a result, the guarantor's liability under its guarantee could be materially reduced or eliminated, depending upon the law applicable to it.

It is possible that the guarantor or creditor of the guarantor, or the bankruptcy trustee in the case of a bankruptcy of the guarantor, may contest the validity and enforceability of the guarantor's guarantee on any of the above grounds and the applicable court may determine that the guarantee should be limited or voided. To the extent that agreed limitations on the guarantee obligation apply, the Optics Notes would to that extent be structurally subordinated to all liabilities of the guarantor, including trade payables of the guarantor. Any future Guarantees required to be granted under the EUR Optics Notes Trust Deed may be subject to similar limitations. See "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations.*"

Certain of the Optics Notes Collateral will not secure the Optics Notes, and NetCo will not guarantee the Optics Notes, potentially until 60 days after the Acquisition Closing Date, if the Push-Down Merger has not yet occurred. Following the Push-Down Merger, the Optics Notes will not be guaranteed.

The NetCo Guarantee and the Optics Notes Post-Issue Collateral will be granted, subject to certain agreed security principles, certain perfection requirements and certain material limitations pursuant to applicable laws, within 60 days of the Acquisition Closing Date if the Push-Down Merger has not occurred, as further described under "*Terms and Conditions of the EUR Optics (TIF) Notes — Status of Notes, Guarantee and Security—Security.*" Upon completion of the Push-Down Merger, NetCo will no longer be a separate legal entity and security interests over Optics' receivables from material loans granted to NetCo will automatically cease to exist and, to the extent that NetCo is the successor company of the Push-Down Merger, the security interests over the share capital of Optics held by Optics HoldCo will be extinguished by operation of law and the EUR Optics Notes will instead be secured by the pledge on the shares of NetCo held by Optics HoldCo as entity resulting from the Push-Down Merger and intercompany loans made available by Optics HoldCo to Optics as substituted by NetCo. In the event that the Push-Down Merger cannot be effected with the security interest over the shares in NetCo held by Optics and/or the intercompany loans made available by Optics HoldCo to Optics remaining in place, such security interests shall be released in order to effect the Push-Down Merger and Optics HoldCo shall, within 20 Business Days following the Push-Down Merger, enter into replacement security. There can be no assurance, however, that Optics will be successful in procuring such liens within the time periods specified. Once granted, the security interests will be limited to the same extent as those under the terms of the Optics Financing Arrangements and otherwise as set forth under "*—Once granted, the guarantees, including the NetCo Guarantee, and the Optics Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability*" and "*Terms and Conditions of the EUR Optics (TIF) Notes — Status of Notes, Guarantee and Security—Security*", which limitations could be significant. See also "*Corporate benefit, financial assistance laws, capital maintenance and other limitations on the guarantee may adversely affect the validity and enforceability of the NetCo Guarantee*." It should be noted that if a guarantee or a security interest granted by a guarantor in certain jurisdictions is granted or perfected after the secured obligation arose, such guarantee or security interest may be subject to clawback provisions

under applicable local insolvency laws. See "*—Once granted, the guarantees, including the NetCo Guarantee, and the Optics Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability*."

On the Optics Notes Issue Date, the Optics Notes will only be obligations of Optics and will not be guaranteed by NetCo or any of their subsidiaries. Subject to certain agreed security principles and certain significant limitations under Italian law, NetCo is expected to guarantee the Optics Notes. There can be no assurance that Optics will be successful in procuring such NetCo Guarantee. The NetCo Guarantee provides the holders of the Optics Notes with a direct claim against NetCo. However, the obligations of NetCo of the Optics Notes under NetCo Guarantee will be limited under the EUR Optics Notes Trust Deed to an amount which has been determined so as to ensure that amounts payable will not result in violations of applicable laws or otherwise cause a guarantor of the Optics Notes to be deemed insolvent under applicable law or such NetCo Guarantee to be deemed void, unenforceable or ultra vires, or cause the directors of such guarantor to be held in breach of applicable corporate or commercial law for providing the NetCo Guarantee. As a result, a guarantor's liability under its NetCo Guarantee could be materially reduced or eliminated depending upon the amount of its obligations and upon applicable laws. The NetCo Guarantee will be limited as set forth in "*—Once granted, the guarantees, including the NetCo Guarantee, and the Optics Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability*."

Once granted, the guarantees, including the NetCo Guarantee, and the Optics Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability.

Subject to the operation of certain agreed security principles, and certain significant limitations under applicable laws, once granted, the guarantees, including the NetCo Guarantee, will provide the holders of the Optics Notes with a direct claim against the relevant guarantor, including NetCo under the NetCo Guarantee. The obligations of a guarantor, the enforcement of any guarantee and the obligations of the grantor of security and the ability of the Optics Notes Security Agent to enforce on the security interests will be limited under the EUR Optics Notes Trust Deed to the maximum amount that can be guaranteed by the guarantor or provided by the grantor of security under the applicable laws, including the laws of Italy, which has been determined so as to ensure that amounts payable will not result in violations of laws, rules and principles related to, among others, corporate benefit, capitalization, capital preservation, financial assistance or transactions under value, or otherwise cause the guarantor to be deemed insolvent under applicable law or such guarantee to be deemed void, unenforceable or *ultra vires*, or cause the directors of NetCo to be held in breach of applicable corporate or commercial law for providing such guarantee.

In particular, enforcement of a guarantee or collateral against the relevant guarantor or the relevant security grantor would be subject to certain defenses available to guarantors generally or, in some cases, to limitations contained in the terms of the guarantee or pledges of security designed to ensure compliance with statutory requirements applicable to the guarantor or relevant security grantors. These laws and defenses include those that relate to fraudulent conveyances or transfers, insolvency, voidable preferences, rules and principles concerning financial assistance, corporate purpose or benefit, preservation of share capital, thin capitalization, capital maintenance or similar laws and regulation or defenses affecting the rights of creditors generally. As a result, the liability of the guarantor under its guarantee or of a grantor of security could be materially reduced or eliminated, depending on the amounts of its other obligations and the law applicable to it.

In addition, the obligations of a guarantor and/or security provider that becomes a guarantor and/or a security provider will be subject to certain agreed security principles and material limitations pursuant to applicable laws and will be subject to the additional limitations set forth in the relevant deed of guarantee and/or in the applicable security documents, in order for NetCo to comply with the above corporate law requirements, rules and principles on, among others, corporate benefit and financial assistance.

As a result of the applicable limitations under Italian law with respect to, amongst others, financial assistance (namely Article 2358 (*Altre operazioni sulle proprie azioni*) and Article 2474 (*Operazioni sulle proprie partecipazioni*) of the Italian Civil Code, as the case may be) and corporate benefit, notwithstanding anything to the contrary provided in the EUR Optics Notes Trust Deed, Optics Financing Arrangements and the Intercreditor Agreement:

(i) the NetCo Guarantee and security interests granted by NetCo in respect of the Optics Notes shall not exceed at any time (and in aggregate) an amount equal to the principal amount of any Funding Loan granted to it or other financial support (other than equity contributions) made available by Optics directly or indirectly to NetCo (or any of its direct or indirect subsidiaries pursuant to article 2359, paragraph 1, numbers 1 and/or 2, of the Italian Civil Code) on or following the Optics Notes Issue Date, as outstanding at the time of the enforcement of the NetCo Guarantee and/or the relevant security interest, in each case net of any proceeds already paid by it pursuant to the enforcement of its guarantee under the Optics Notes and/or received upon the enforcement of any security interests granted by it; *provided further* that NetCo shall not be liable as a Guarantor in respect of any amounts in excess of the amount that it is entitled to set-off against its claims of recourse or subrogation (*regresso or surrogazione*) arising as a result of any payment made by it under its NetCo Guarantee, *provided further* that, in any event and notwithstanding any other provisions to the contrary under the Indenture, in order to comply with the provisions of Italian law in relation to financial assistance (including Article 2358 (*Altre operazioni sulle proprie azioni*) and/or Article 2474 (*Operazioni sulle proprie partecipazioni*) of the Italian Civil Code, as the case may be) NetCo shall not be liable under the NetCo Guarantee (or in connection with the security interests granted by NetCo in respect of the Optics Notes) in respect of any aggregate principal amount of the EUR Optics Notes whose actual purpose is, or whose proceeds are applied towards, in each case directly or indirectly, the financing or re-financing of (i) the acquisition of, or the subscription for, any shares or quota in NetCo (and/or its direct or indirect holding companies); and/or (ii) the payment of any interest, fees, costs and expenses, stamp, registration or other taxes in connection therewith; and/or (iii) any existing indebtedness incurred or utilized for the purposes of paragraph (i) and (ii) above. Should the NetCo Guarantee granted by be deemed by a court or public authority to be contrary to any provisions regulating financial assistance, including Article 2358 (*Altre operazioni sulle proprie azioni*) and/or Article 2474 *(Operazioni sulle proprie partecipazioni*) of the Italian Civil Code, as the case may be, the NetCo Guarantee could be declared null and void;

(ii) the maximum amount guaranteed and/or secured by NetCo, also in accordance with Article 1938 of the Italian Civil Code (where applicable), will not exceed 150% of the outstanding principal amount of the Notes;

(iii) the aggregate amount of interest in respect of the Optics Notes guaranteed and/or secured by NetCo will be at any time equal to the interest then outstanding in respect of a principal amount of the Optics Notes equal to the principal amount of the Optics Notes guaranteed and/or secured by it at that time; and

(iv) notwithstanding any provision to the contrary in the EUR Optics Notes Trust Deed, in order to comply with the mandatory provisions of Italian law in relation to (i) maximum interest rates (including the Italian Usury Law and Article 1815 of the Italian Civil Code) and (ii) capitalization of interests (including Article 1283 of the Italian Civil Code and Article 120 of the Italian Legislative Decree No. 385 of September 1, 1993), the obligations of NetCo under the NetCo Guarantee shall not include and shall not extend to (A) any interest qualifying as usurious pursuant the Italian Usury Law and (B) any interest on overdue amounts compounded in violation of the provisions set forth by Article 1283 of the Italian Civil Code and/or Article 120 of the Italian Legislative Decree No. 385 of September 1, 1993, respectively. In any case, the maximum amount that NetCo may be required to pay in respect of its obligations as guarantor under the EUR Optics Notes Trust Deed and/or security grantor under the relevant security documents upon enforcement of the security interests granted by NetCo will ratably concur and not cumulate with the corresponding amounts due by NetCo to any guaranteed and/or secured creditor pursuant to terms of the Optics Financing Arrangements and/or the Intercreditor Agreement (including any guaranteed and/or secured creditors with respect to any further *pari passu* indebtedness contemplated under the Intercreditor Agreement) and/or any security documents, and vice versa. For the avoidance of doubt, by virtue of the abovementioned limitations applicable to the NetCo Guarantee and the security interests granted by NetCo, the obligations of NetCo as guarantor and/or security provider under the Optics Notes, the EUR Optics Notes Trust Deed, the terms of Optics Financing Arrangements, the Intercreditor Agreement and any agreement regulating future *pari passu* indebtedness contemplated under the Intercreditor Agreement, the security documents relating to the Optics Notes Collateral and any other transaction documents related thereto shall not be deemed to be cumulative and shall be considered without duplication, and the transaction documents will provide that the aggregate amount of the proceeds deriving from any enforcement of any such guarantee and/ or security obligations of NetCo shall not exceed on an aggregate basis the limit of NetCo's credit support as described above.

In addition to the above, under article 1938 of the Italian Civil Code, if a corporate guarantee is issued by a guarantor incorporated under the laws of Italy to guarantee conditional or future obligations, the guarantee must be limited to a maximum amount. Such maximum amount should be expressly identified at the outset and expressed in figures (either in the guarantee deed or by reference to a separate document, such as the EUR Optics Notes Trust Deed). It has been held that such determination must be proportionate to NetCo's assets. If such determination is deemed disproportionate to the assets of NetCo, there is a risk that the guarantee could be declared void.

The proceeds of the enforcement of said guarantees and/or security interests will be distributed amongst the guaranteed and/or secured creditors (including, without, limitation, the holders of the Optics Notes) in accordance with the provisions of the Intercreditor Agreement. Accordingly, the holders of the Optics Notes will be able to recover limited amounts under the relevant notes guarantee and security. See "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations.*"

The pledge over NetCo's shares may not cover the entire share capital of NetCo.

Fastweb currently owns a 4.5% stake in FiberCop. Subject to the outcome of current negotiations among the parties, Optics may acquire Fastweb's stake in NetCo or Fastweb may remain a minority shareholder in NetCo following with the Acquisition. If Fastweb continues to be a shareholder of NetCo following the Acquisition, the minority stake of Fastweb is expected to be diluted in connection with the consummation of the Acquisition. To the extent Fastweb remains a shareholder in NetCo following the Transactions, it is not expected to pledge the stake it owns in NetCo, including after the occurrence of the Push-Down Merger. Accordingly, the Optics Notes Post-Issue Date Collateral may only include an amount equal to 95.5% (or such higher percentage held in NetCo from time to time) of NetCo's share capital and an enforcement over the shares of NetCo will not provide full control over NetCo.

Moreover, as of the date of this Exchange Offer Memorandum, the bylaws of Fibercop provide for certain transfer restrictions in favor of minorities which would, in turn, also apply to any share pledge over its shares as well as any enforcement thereunder. In particular, the pledge over NetCo's shares may trigger tag-along rights in favor of Fastweb and the enforcement of such share pledge may be subject to any lock-ups relating to NetCo shares pursuant to any shareholder arrangements. Optics will be required to remove these restrictions pursuant to the Optics Financing arrangements upon completion of the Acquisition and, should Fastweb not provide its consent to such removal, this may trigger Fastweb's applicable withdrawal rights under Italian law.

Moreover, prior to the Push-Down Merger, if Fastweb remains in the shareholding of NetCo, any dividends that will be paid by NetCo (whether for the purposes of servicing indebtedness of Optics, including the Optics Notes, or otherwise) will also be paid to Fastweb in accordance with the organizational documents and laws applicable from time to time. Moreover, to the extent that there is no Funding Loan to be repaid by NetCo or the Funding Loan is insufficient to facilitate the servicing of indebtedness of Optics, prior to the consummation of the Push Down Merger, it is expected that NetCo would need to service such debt of Optics, at least in part, by way of dividend payments.

Other limitations pursuant to bankruptcy or insolvency laws apply to the guarantees.

Although laws differ among various jurisdictions, in general, under bankruptcy or insolvency law and other laws, a court could (i) avoid or invalidate all or a portion of a guarantor's obligations under its guarantee, (ii) direct that the holders of the Optics Notes return any amounts paid under a guarantee to the relevant guarantors or to a fund for the benefit of that guarantors' creditors or (iii) take other action that is detrimental to the holders of the Optics Notes, typically if the court found that:

- the relevant guarantee was incurred with actual intent to give preference to one creditor over another, hinder, delay or defraud creditors or shareholders of the relevant guarantors or, in certain jurisdictions, when the granting of the relevant guarantee has the effect of giving a creditor a preference or the creditor was aware that the relevant guarantors was insolvent when the relevant guarantee was given;

- the relevant guarantors did not receive fair consideration or reasonably equivalent value or corporate benefit for the relevant guarantee or the relevant Guarantors was: (i) insolvent or rendered insolvent because of the relevant guarantee; (ii) undercapitalized or became undercapitalized because of the relevant guarantee; or (iii) intended to incur, or believed that it would incur, indebtedness beyond its ability to pay at maturity;

- the relevant guarantee was held to exceed the corporate objects of the relevant guarantors or not to be in the best interests or for the corporate benefit of the relevant guarantors; or
- the amount paid or payable under the relevant guarantee was in excess of the maximum amount permitted under applicable law.

It is possible that a guarantor or a grantor of security, or a creditor of a guarantor or a grantor of security, or the bankruptcy or insolvency trustee in the case of insolvency of a guarantor or a grantor of security, may contest the validity and enforceability of the guarantors' guarantees or grantor's creation of security on any of the aforementioned grounds and that the applicable court may determine that the guarantees or the relevant security interest should be limited or voided. In the event that any guarantee or security interest is invalid or unenforceable, in whole or in part, or to the extent such limitations on the guarantees or security obligation apply, the Notes would be effectively subordinated to all liabilities of the applicable guarantors or grantor, including trade payables of such Guarantors or grantor to the extent of such limitations. Future pledges or guarantees may be subject to similar limitations.

Additionally, the grant of Optics Notes Collateral to secure the Optics Notes may be voidable by the grantor or by an insolvency trustee, liquidator, receiver or administrator or by other creditors, or may otherwise be set aside by a court, or be unenforceable if certain events or circumstances exist or occur, including, among others, if the grantor is deemed to be insolvent at the time of the grant, or if the grant permits the secured parties to receive a greater recovery than if the grant had not been given and an insolvency proceeding in respect of the grantor is commenced within a legally specified "claw back" period following the grant. To the extent that the grant of any security interest is voided, holders of the Optics Notes would lose the benefit of the relevant security interest.

Moreover, under Italian law, claims of certain categories of creditors (*creditori privilegiati*) are given statutory priority in relation to the proceeds of a debtor's property in respect to the claims of other creditors, even if such claims are secured claims. See "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations*."

Holders of the Optics Notes may not control certain decisions regarding the Optics Notes Collateral.

The Intercreditor Agreement provides that the Optics Notes Security Agent will only enforce the Optics Notes Collateral as provided for in the Intercreditor Agreement, and the EUR Optics Notes Trust Deed regulates the ability of the Optics Notes Trustee or the holders of the Optics Notes to instruct the Optics Notes Security Agent to take enforcement action.

The Optics Notes Security Agent is not required to take enforcement action unless instructed to do so in accordance with the provisions described in "*Description of Certain Financing Arrangements of the Optics Group—Intercreditor Agreement*."

The Optics Notes Security Agent may also refrain from acting in accordance with any instructions until it has been indemnified and/or secured that it may in its discretion require for any cost, loss or liability which it may incur in complying with those instructions.

If the Optics Notes Security Agent sells Optics Notes Collateral consisting of the shares of any of Optics' subsidiaries as a result of an enforcement action or other distressed disposal in accordance with the Intercreditor Agreement, claims under the Guarantees and the liens over any other assets of such entities securing the Optics Notes and the Optics Guarantees may be released. See "*Description of Certain Financing Arrangements of the Optics Group—Intercreditor Agreement*."

Delays in enforcement could decrease or eliminate recovery values. In addition, the holders of the Optics Notes will not have any independent power to enforce, or have recourse to, any of the Security Documents or to exercise any rights or powers arising under the Security Documents, except through the Optics Notes Security Agent as provided in the Intercreditor Agreement. By accepting the Optics Notes, the holders of the Optics Notes will be deemed to have agreed to these restrictions. As a result of these restrictions, holders of the Optics Notes will have limited remedies and recourse against Optics and the guarantors of the Optics Notes in the event of a default. See "*Description of Certain Financing Arrangements of the Optics Group—Intercreditor Agreement*."

The Optics Notes will be secured only to the extent of the value of the Optics Notes Collateral that has been granted as security for the Optics Notes and other secured indebtedness may be secured by assets that do not secure the Notes.

The Optics Notes will be secured only to the extent of the value of the relevant Optics Notes Collateral. See "*The Terms and Conditions of the EUR Optics (TIF) Notes—Status of Notes, Guarantee and Security—Security.*" Not all of Optics' and its subsidiaries' assets will secure the Optics Notes, and the EUR Optics Notes Trust Deed allows Optics and its restricted subsidiaries to secure certain future indebtedness permitted to be incurred with certain property and assets that do not secure the Optics Notes. If an event of default occurs and the obligations under the Optics Notes are accelerated, the Optics notes and the guarantees thereof will not benefit from the assets securing such secured debt and will rank equally with the holders of other unsecured indebtedness of Optics and its restricted subsidiaries with respect to any property or assets excluded from the Optics Notes Collateral securing the Optics Notes. The claims of secured creditors that are secured by assets that do not also secure the Optics Notes will have priority with respect to such assets over the claims of holders of the Optics Notes. As such, the claims of the holders of the Optics Notes will be effectively subordinated to the rights of such secured creditors to the extent of the value of the assets securing such indebtedness.

While the EUR Optics Notes Trust Deed create certain obligations to provide additional guarantees and grant additional security over assets, or a particular class of assets, whether as a result of granting liens in favor of other indebtedness or the acquisition or creation of future assets or subsidiaries or otherwise, such obligations are subject to certain exceptions and qualifications pursuant to certain agreed security principles. Such agreed security principles set out a number of limitations on the rights of the holders of the Optics Notes to be granted security or guarantees in certain circumstances. The operation of such agreed security principles may result in, among other things, the amount recoverable under any Optics Notes Collateral provided being limited or security not being granted over a particular type or class of assets. Pursuant to such agreed security principles, the Optics Notes Collateral will be limited to security in the Optics Notes Issue Date Collateral (including any Optics Notes Replacement Collateral, if any), the Optics Notes Post-Issue Collateral and security over the shares of Optics, NetCo and any company that is otherwise required to become a guarantor (and any other future guarantors) and any member of the Optics Group which has earnings before interest, tax, depreciation and amortization (calculated on an unconsolidated basis and subject to certain adjustments) representing more than 5% of the Consolidated EBITDA (as defined in the finance documents relating to Optics Financing Arrangements) of the Optics Group, and certain material intercompany receivables owed to Optics (or, after the Push-Down Merger, Optics HoldCo) by NetCo. Accordingly, such agreed security principles may affect the value of the security or guarantees provided by Optics, HoldCo and any guarantors.

In particular, even though the Optics Notes and the Optics Financing Arrangements are expected to share security interests and Guarantors' package, this may not be the case and circumstances may arise in the future in which additional security or guarantees may be granted for the benefit of creditors under the Optics Financing Arrangements which are not otherwise permitted to be granted in favor of holders of the Optics Notes due to the application of certain agreed security principles and, ultimately, applicable financial assistance and corporate benefit rules. Accordingly, in such circumstances, holders of the Optics Notes would have no and/or limited direct claim for payment against any such additional guarantor nor any and/or limited rights as a secured party with respect to any such additional collateral.

Creditors under certain future indebtedness permitted to be incurred under the terms of the EUR Optics Notes Trust Deed and the Intercreditor Agreement will be entitled to be repaid with recoveries from the proceeds from the enforcement of the Optics Notes Collateral in priority over the Optics Notes.

The Intercreditor Agreement includes provisions governing the sharing of proceeds from enforcement of the Optics Notes Collateral. Such enforcement proceeds are required to be turned over to the Optics Notes Security Agent after certain events, including the acceleration of the Optics Notes. The Optics Notes Security Agent is required to apply turned over amounts and other recoveries by the Optics Notes Security Agent from enforcement actions towards discharging the super senior obligations (including, among others, (following the designation of any such document as a super senior liability in accordance with the terms of the Intercreditor Agreement) those under such document and future indebtedness that may be secured on a super senior basis (the "**Super Senior Liabilities**")) in priority to applying any such amounts towards discharging the Optics Notes. As such, in the event of a foreclosure of the Optics Notes Collateral, you may not benefit from such recoveries if the then outstanding claims under such Super Senior Liabilities are greater than the proceeds recovered. Any proceeds remaining from an enforcement sale of Optics Notes

Collateral will, after all obligations under such Super Senior Liabilities have been discharged, be applied pro rata in repayment of the Optics Notes, and any other indebtedness that ranks *pari passu* with the Optics Notes. See "*Description of Other Indebtedness and Financing Arrangements of the Optics Group—The Intercreditor Agreement*".

The enforcement of the share pledge, which forms part of the Optics Notes Collateral, will require clearance by the Italian Golden Power Authority under the Italian Golden Power Legislation.

The Transactions and the granting of the share pledges, which form part of the Optics Notes Collateral, were authorized by the Italian Golden Power Authority on January 16, 2024. However, the Italian Golden Power Authority designated certain of the TIM Group's assets and activities that, upon the successful completion of the Transactions, will be owned and operated by NetCo as, respectively, strategic for the defense and national security sector and strategic for the communications sector, and imposed various restrictions and undertakings. See "*Risks Related to NetCo – Risks related to NetCo's Legislative and Legal Framework—The Italian Golden Power Authority has in the past exercised its significant powers under the Italian Golden Power Legislation with respect to NetCo, and may in the future exercise again the said significant powers, including with respect to strategic transactions to be entered into by NetCo.*"

Optics (in its capacity as shareholder of NetCo) and NetCo will remain subject to the Italian Golden Power Legislation, pursuant to which the Italian Golden Power Authority may, among others, prohibit or impose restrictions and undertakings on (i) the acquisition of certain shareholdings in companies having assets and relationships in sectors qualified as strategic, such as, among others, defense and national security, energy, transport, communications, financial, healthcare, agri-food, critical technologies and personal data processing (the "Strategic Companies"), and (ii) resolutions, acts or transactions concerning a Strategic Company and resulting in a change in ownership, control, possession or intended use or purpose of such strategic assets or relationships, including the enforcement and, according to a prudential interpretation, the granting or extension of securities over the shares of Strategic Companies or the strategic assets. In light of the above, the enforcement of the share pledges, which form part of the Optics Notes Collateral, will require clearance by the Italian Golden Power Authority under the Italian Golden Power Legislation as it may fall within the scope of application of the transactions indicated under (i) and (ii) above.

The Optics Notes Collateral is limited to certain specific assets, the value of the Optics Notes Collateral securing the Optics Notes may not be sufficient to satisfy Optics' obligations under the Optics Notes and such Optics Notes Collateral may be reduced or diluted under certain circumstances.

If Optics defaults on the Optics Notes, holders of the Optics Notes will be secured only to the extent of the value of the assets underlying the security interests granted in favor of holders of the Optics Notes. In the event of an enforcement of the security interests in respect of the Optics Notes Collateral, the proceeds from the sale of the assets underlying the Optics Notes Collateral may not be sufficient to satisfy Optics' obligations with respect to the Optics Notes. As described elsewhere, the extent of the Optics Notes Collateral is limited. In accordance with certain agreed security principles, guarantee and/or security shall only be granted by certain entities. See "*The Terms and Conditions of the EUR Optics (TIF) Notes—Status of Notes, Guarantee and Security—Security*."

No appraisal of the value of the Optics Notes Collateral has been made in connection with the Exchange Offer. The value of the assets underlying the pledges and the amount to be received upon a sale of the Optics Notes Collateral will also depend on many factors, including, among other things, whether or not the business is sold as a going concern, regulatory restrictions that could affect such sale, the ability to sell the assets in an orderly sale and the condition of the economies in which operations are located and the availability of buyers.

The shares and other Optics Notes Collateral that is pledged or assigned for the benefit of the holders of the Optics Notes may provide for only limited repayment of the Optics Notes, in part because most of the Optics Notes Collateral may not be liquid and its value to other parties may be less than its value to the Optics Group. Likewise, there can be no assurance that the Optics Notes Collateral will be saleable or, if saleable, that there will not be substantial delays in the liquidation thereof. In the event of foreclosure, the transfer of the Optics Group's business operations may be prohibited or only permitted to a limited group of investors eligible to hold such assets, thereby decreasing the pool of potential buyers. Furthermore, entry into the Security Documents, enforcement of the Optics Notes Collateral and any direct or indirect transfer of the Optics Group's operations may require, in certain jurisdictions, governmental or

other regulatory consents, approvals or filings similar to (or different from) those that has been required to be obtained in relation to the Transactions, or might otherwise be challenged. Such consents, approvals or filings may take time to obtain or may not be obtained at all. As a result, enforcement may be delayed, a temporary shutdown of operations may occur and the value of the Optics Notes Collateral may be significantly decreased. Most of the Optics Group's assets will not secure the Optics Notes and it is possible that the value of the Optics Notes Collateral will not be sufficient to cover the amount of indebtedness secured by such Optics Notes Collateral. With respect to any shares of Optics' subsidiaries pledged to secure the Optics Notes, such shares may also have limited value in the event of bankruptcy, insolvency or other similar proceedings in relation to the entity's shares that have been pledged because all of the obligations of the entity whose shares have been pledged must first be satisfied, leaving little or no remaining assets in the pledged entity.

As a result, the creditors secured by a pledge of the shares of these entities may not recover anything of value in the case of an enforcement sale. In addition, the value of this Optics Notes Collateral may decline over time. If the proceeds of the Optics Notes Collateral are not sufficient to repay all amounts due on the Optics Notes, the holders of the Optics Notes (to the extent not repaid from the proceeds of the sale of the Optics Notes Collateral) would have only a senior unsecured, unsubordinated claim against the Issuer's and any Guarantors' remaining assets.

The EUR Optics Notes Trust Deed only limits liens granted in connection with Capital Markets Indebtedness (as defined under "*Terms and Conditions of the EUR Optics (TIF) Notes—Covenants—Restrictions on Security Interests*") and will also permit the granting of certain liens other than those in favor of the holders of the Optics Notes on the Optics Notes Collateral. To the extent that holders of other secured indebtedness or third parties are secured by liens, including statutory liens, whether or not permitted by the EUR Optics Notes Trust Deed or the Security Documents, such holders or third parties may have rights and remedies with respect to such assets which, if exercised, could reduce the proceeds available to satisfy Optics' obligations under the Optics Notes. Moreover, if Optics issues additional notes under the EUR Optics Notes Trust Deed, holders of such Notes would benefit from the same Optics Notes Collateral as the holders of the Notes being offered hereby, thereby diluting your ability to benefit from the liens on the Optics Notes Collateral.

In addition, as described above, the value of the Guarantees and the Optics Notes Collateral that will be granted by the Guarantors will be limited further as described under "*—Once granted, the guarantees, including the NetCo Guarantee, and the Optics Notes Collateral will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit their validity and enforceability*" and "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations*."

The Optics Notes Collateral, the NetCo Guarantee and any other future guarantees or security which may be granted under the EUR Optics Notes Trust Deed, will be subject to exceptions, defects, encumbrances, liens and other imperfections permitted by the EUR Optics Notes Trust Deed and the Intercreditor Agreement.

The existence of such exceptions, defects, encumbrances, liens and other imperfections could adversely affect the value of the Optics Notes Collateral and the guarantees, as well as the ability of the Optics Notes Security Agent to realize or foreclose on such Optics Notes Collateral and the guarantees. Furthermore, the first-priority ranking of security interests can be affected by a variety of factors, including the timely satisfaction of perfection requirements, statutory liens or re-characterization under applicable law. The granting of the guarantees and security interests in connection with the issuance of the Optics Notes, or the incurrence of permitted debt in the future, may create or restart hardening or voidance periods for such security interests in accordance with the laws applicable in certain jurisdictions.

The granting of the NetCo Guarantee (and any other future guarantees which may be granted under the EUR Optics Notes Trust Deed) and security interests to secure the Optics Notes and the Optics Financing Arrangements may create hardening, claw back or voidance periods for such Guarantees and security interests in certain jurisdictions, including Italy. The granting of shared security interests (including security interests in the Optics Notes Collateral), including in connection with any release and retake of such security interest, to secure existing, new or future indebtedness (such as hedging obligations or any additional notes issued under the EUR Optics Notes Trust Deed) or the transfer or the assignment of the security interest may restart or reopen hardening or claw back periods in certain jurisdictions, including Italy. The applicable hardening, claw back or voidance period for these new security interests can run from

the moment each new security interest has been granted, perfected, amended, shared or recreated (as applicable). At each time, if the security interest granted or recreated were to be enforced before the end of the respective hardening or voidance period applicable in such jurisdiction, it may be declared void, ineffective, clawed back and/or it may not be possible to enforce it. Under Italian law, in case any security interests (including security interests in the Optics Notes Collateral) is released and retaken at any time, such release and retaking of security interests may give rise to the start of a new hardening period in respect of such security interests. Under certain circumstances, other creditors, bankruptcy trustees, insolvency administrators or courts could challenge the validity and enforceability of the grant of such security interests. See "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations*."

The EUR Optics Notes Trust Deed will provide that the Optics Notes Collateral securing the Optics Notes may be released and retaken in several circumstances, including in connection certain mergers and other similar events. In Italy, for example, such a release and retaking of Optics Notes Collateral may give rise to new hardening periods in respect of the relevant security interests in the Optics Notes Collateral that are granted, perfected or released and retaken, and the security interests in the relevant Optics Notes Collateral would be subject to the same risks described in the preceding paragraph.

Similar considerations also apply in connection with the accession of further subsidiaries as additional guarantors of the Optics Notes and the granting of security interest over their relevant assets and equity interests for the benefit of holders of the Optics Notes, as applicable.

The Optics Notes Collateral will be subject to exceptions, defects, encumbrances, liens and other imperfections permitted under certain agreed security principles, applicable laws, the EUR Optics Notes Trust Deed and the Intercreditor Agreement. The existence of such exceptions, defects, encumbrances, liens and other imperfections could adversely affect the value of the Optics Notes Collateral, as well as the ability of the Optics Notes Security Agent to realize or foreclose on such Optics Notes Collateral. Furthermore, the first-priority ranking of security interests can be affected by a variety of factors, including the timely satisfaction of perfection requirements, statutory liens or re-characterization under applicable law. The Optics Notes Collateral may be subject to practical problems generally associated with the realization of security interests in collateral. The Optics Notes Security Agent may also need to obtain the consent of a third party to enforce a security interest. The Optics Notes Security Agent may not be able to obtain any such consents. Accordingly, the Optics Notes Security Agent may not have the ability to foreclose upon those assets, and the value of the Optics Notes Collateral may significantly decrease.

The recovery from the enforcement of the share pledges forming part of the Optics Notes Collateral may be complicated, involve long recovery times and a low recovery rate and may require prior approval by certain regulatory bodies.

In connection with the enforcement of share pledges over shares of entities with outstanding debt obligations, any sale of such entities is likely to involve a release of some or all of the debt of such entity, which could result in a taxable capital gain to such entities. As the Optics Notes will be issued by Optics, an enforcement over the shares of Optics would involve the enforcement over the share pledge of an entity with outstanding debt claims. In addition, the EUR Optics Notes Trust Deed does not prohibit Optics from incurring additional debt claims in the future. Consequently, the enforcement of the share pledge over the Optics' shares may result in the release of the Optics' debt obligations, which could result in a taxable capital gain. This taxable capital gain is likely to reduce the proceeds of any recovery from the enforcement of such share pledge. Therefore, the value of the pledge over the shares of the Optics may be limited. In addition, the Optics Notes Collateral includes, *inter alia*, a security interest over the shares of each of Optics, NetCo and, after the Push-Down Merger, NetCo. To the extent the enforcement of this security interest would result in an acquisition of a reportable holding in Optics, NetCo and, after the Push-Down Merger, NetCo, or any strategic asset pursuant to the Italian Golden Power Legislation held by Optics and, after the Push-Down Merger, NetCo, any such enforcement would require clearance by the Italian Government, pursuant to the Italian Golden Power Legislation. Accordingly, the Optics Notes Security Agent may not have the ability to enforce its security and the value of the security interests may significantly decrease.

The security interests in the Optics Notes Collateral will be granted to the Optics Notes Security Agent rather than directly to the holders of the Notes. The ability of the Optics Notes Security Agent to enforce the Optics Notes Collateral may be restricted by local law.

The security interests in the Optics Notes Collateral that will secure the obligations of Optics under the Optics Notes will not be granted directly to the holders of the Optics Notes but to the Optics Notes Security Agent pursuant to the Conditions of the EUR Optics Notes or the USD Optics Notes Indenture (as applicable) and the Intercreditor Agreement for the benefit of all holders of, respectively, the EUR Optics Notes and/or the USD Optics Notes, and thus the holders of the Optics Notes will not have any independent power to enforce, or have recourse to, any of the Security Documents or to exercise any rights or powers arising under the Security Documents except through the Optics Notes Security Agent as provided in the Intercreditor Agreement and the Optics Notes Trustee under the EUR Optics Notes Trust Deed, who will (subject to the provisions of the EUR Optics Notes Trust Deed) provide instructions to the Optics Notes Security Agent accordingly. By accepting an Optics Note, you will be deemed to have agreed to these restrictions. As a result of these restrictions, holders of the Optics Notes will have limited remedies and recourse against Optics in the event of a default. In addition, the Intercreditor Agreement and the documents that will create the security obligations under the Optics Notes place limitations on the ability of the Optics Notes Security Agent to cause the sale of some of the Optics Notes Collateral. These limitations may include requirements that some or all of the Optics Notes Collateral be disposed of only pursuant to public auctions or only at a price confirmed by a valuation. See "*Description of Certain Other Financing Arrangements of the Optics Group—Intercreditor Agreement*".

In addition, the ability of the Optics Notes Security Agent to enforce the security interests is subject to mandatory provisions of the laws of each jurisdiction in which security interests over the Optics Notes Collateral are taken, including Italian law, as applicable. For example, the laws of certain jurisdictions may not allow for the appropriation of certain pledged assets, but require a sale through a public auction and certain waiting periods may apply. There is some uncertainty under the laws of certain jurisdictions as to whether obligations to beneficial owners of the Optics Notes that are not identified as registered holders in, nor are directly parties to, a security document will be validly secured and/or can be enforced; this area of law is untested in the courts of certain jurisdictions (including Italy). In certain jurisdictions, due to the laws and other jurisprudence governing the creation and perfection of security interests and the enforceability of such security interests, the Intercreditor Agreement will provide for the creation of "parallel debt" obligations in favor of the relevant Optics Notes Security Agent ("**Parallel Debt**") mirroring the obligations of Optics and any guarantors owed to holders of the Optics Notes under or in connection with the EUR Optics Notes Trust Deed, as applicable ("**Principal Obligations**"), but in jurisdictions such as Italy, these Parallel Debt provisions would not be applicable taking into account that Italian case law has not ruled for its application. All or part of the pledges and other security interests in such jurisdictions will be granted to the Optics Notes Security Agent as security interests for the Parallel Debt and will not directly secure the Principal Obligations. Under parallel debt structures, the Parallel Debt will typically be at all times in the same amount and payable at the same time as the Principal Obligations and any payment in respect of the Principal Obligations shall discharge the corresponding Parallel Debt and any payment in respect of the Parallel Debt shall discharge the corresponding Principal Obligations. In respect of the security interests granted to secure the Parallel Debt, the holders of the Optics Notes will not have direct security interests and will not be entitled to take enforcement actions in respect of such security interests except through the Optics Notes Security Agent. Therefore, the holders of the Optics Notes will bear the risk of insolvency or bankruptcy of the Optics Notes Security Agent. In addition, the Parallel Debt construct in financing transactions, including credit facilities and bond issuances, has not been tested under law in certain of these jurisdictions, including under Italian law, and to the extent that the security interests in the Optics Notes Collateral created to secure the Parallel Debt construct are not validly granted, are unenforceable or are successfully challenged by other parties, holders of the Optics Notes will not receive any proceeds from an enforcement of such security interests in the Optics Notes Collateral. The enforcement of security interests of the Optics Notes will be subject to the procedures set forth in the Intercreditor Agreement or any additional Intercreditor Agreement (if any). See "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations.*"

For example, in Italy the Optics Notes Collateral will not be granted directly to the holders of the Optics Notes but will be created and perfected in favor of the Optics Notes Security Agent, acting also in its capacity as representative (*rappresentante*) of the holder of the Notes pursuant to Article 2414-*bis*, paragraph 3, of the Italian Civil Code. Under such provision (introduced by Italian Law No. 164 of November 11, 2014), the security interests and guarantees assisting bond issuances can be validly created in favor of an agent (*rappresentante*) of the holders of the Optics Notes

who will then be entitled to exercise in the name and on behalf of the holders all their rights (including any rights before any court and judicial proceedings) relating to the security interests and guarantees. Under the Intercreditor Agreement, the Optics Notes Security Agent (including in its role as representative (*rappresentante*) also for the purposes of Article 2414-bis, paragraph 3, of the Italian Civil Code) also acts on behalf of the lenders under the Senior Facilities Agreement; the trustee and the holders of the EUR Optics Notes under the trust deed governing such notes, the counterparties under certain hedging arrangements in relation to the security interests in favor of such parties. However, there is no guidance or available case law on the exercise of the rights and enforcement of such security interest and guarantee by a *rappresentante* pursuant to Article 2414-*bis*, paragraph 3, of the Italian Civil Code also in the name and on behalf of the holders of the Optics Notes who are neither directly parties to the Optics Notes Collateral nor are specifically identified therein or in the relevant share certificates and corporate documents or public registries.

Furthermore, under Italian law, in the event that Optics (or, after the Push-Down Merger, NetCo) enters into insolvency proceedings, the security interests created under the security documents entered into to secure the Optics' (or, after the Push-Down Merger, NetCo's) obligations under the Optics Notes could be subject to potential challenges by an insolvency administrator or by other creditors of Optics (or, after the Push-Down Merger, NetCo) or by operation of law under the rules of avoidance or claw back of Italian insolvency laws and the relevant law on the non-insolvency avoidance or claw back of transactions by the debtor made during a certain legally specified period (the "suspect period"). A longer period may apply to any Optics Notes Collateral governed by Italian law which may be granted after the Exchange Offer. Moreover, under Italian law, claims of certain categories of creditors (*creditori privilegiati*) are given statutory priority in relation to the proceeds of a debtor's property in respect of the claims of other creditors, even if such claims are secured claims. See "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations*."

The enforcement of any Optics Notes Collateral located in Italy or governed by Italian law is subject to mandatory provisions of Italian law, including in relation to limitations and defenses or to limitations contained in the terms of the Security Documents designed to ensure compliance with applicable statutory requirements.

In case of insolvency of any guarantors, the enforcement of any Optics Notes Collateral provided by such guarantors may be subject to certain restrictions. For a more detailed description of various limitations on the security under Italian law, see "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations*."

Rights in the Optics Notes Collateral may be adversely affected by the failure to perfect security interests in the Optics Notes Collateral.

Under applicable law, a security interest in certain tangible and intangible assets can only be properly perfected, and its priority retained, through certain actions undertaken by the secured party or the grantor of the security, as applicable. The liens on the Optics Notes Collateral securing the Optics Notes may not be perfected with respect to the claims of the Optics Notes if we, or the Optics Notes Security Agent, fail or are unable to take the actions necessary to perfect any of these liens. Any failure to perfect any security interest in the Optics Notes Collateral may result in the invalidity of the relevant security interest, the holder of the security interest having difficulty enforcing such holder's right in Optics Notes Collateral or adversely affect the priority of such security interest in favor of the Optics Notes against third parties, including a trustee in judicial liquidation and other creditors who claim a security interest in the same Optics Notes Collateral, which may have a material adverse effect on the ability of the holders of the Optics Notes to receive proceeds from any enforcement of the Optics Notes Collateral. The Optics Notes Trustee and the Optics Notes Security Agent will not be under any obligation or responsibility to take any steps or action to perfect, or ensure the perfection of, any such liens.

There are circumstances other than the repayment or discharge of the Optics Notes under which the Optics Notes Collateral securing the Optics Notes will be released automatically without your consent or the Optics Notes Trustee or the Optics Notes Security Agent obtaining your further consent.

Pursuant to the EUR Optics Notes Trust Deed, under a variety of circumstances, the Optics Notes Collateral securing the Optics Notes will be released automatically, including, by way of example, the obtainment of the investment grade rating from two rating agencies, certain mergers, a sale or other disposition of such Optics Notes Collateral under the EUR Optics Notes Trust Deed, as applicable, and in connection with an enforcement sale permitted under the

Intercreditor Agreement. Such sale or other disposition will reduce the aggregate value of the Optics Notes Collateral securing the Optics Notes to the extent of liens securing the collateral being sold or disposed of.

Decisions at Noteholders' meetings bind all Noteholders and Noteholders' meeting provisions may change by operation of law or because of changes in Optics' circumstances.

The EUR Optics Notes Trust Deed will contain provisions for calling meetings of Noteholders to consider matters affecting their interests generally, including modifications to the terms and conditions relating to the EUR Optics Notes and the waiver of rights that might otherwise be exercisable against Optics.

For instance, the provisions of the EUR Optics Notes permit defined majorities, to bind all Noteholders of the relevant series of EUR Optics Notes, including the holders of EUR Optics Notes who did not attend and vote at the relevant meeting, and holders of the EUR Optics Notes who voted in a manner contrary to the relevant majority. In particular, under the EUR Optics Notes Trust Deed, an extraordinary resolution may include, among other things, proposals to reduce the rate or change the time for payment of principal or interest in respect of the EUR Optics Notes, to change the date on which any EUR Optics Note may be subject to redemption or reduce the redemption price, to change the currency of payments under the EUR Optics Notes and/or to change the quorum requirements relating to meetings and/or to change the majority required to pass a resolution, and to change the amendment provisions. These and other changes may adversely impact rights of holders of EUR Optics Notes and may have a material adverse effect on the market value of the EUR Optics Notes.

Further, the provisions relating to Noteholders' meetings (including quorums and voting majorities) are subject to compliance with certain mandatory provisions of Italian law, which may change prior to the maturity date of the EUR Optics Notes. Under Italian law, the approval of an extraordinary resolution typically requires the consent of a majority representing at least one half of the aggregate principal amount of the outstanding EUR Optics Notes. Furthermore, the interaction between (i) the provisions set forth under the EUR Optics Notes Trust Deed with respect to meetings of holders of the EUR Optics Notes, the applicable majorities and the rights of each holder of the EUR Optics Notes to vote in the relevant meeting, and (ii) applicable Italian law provisions relating to quorum and majorities in meetings of holders of notes issued by Italian companies is also untested in the Italian courts.

Furthermore, certain Noteholders' meeting provisions could change as a result of amendments to the Optics' by-laws.

Accordingly, Noteholders should not assume that the provisions relating to Noteholders' meetings that will be contained in the EUR Optics Notes Trust Deed will be reflective of mandatory provisions of Italian law applicable to Noteholders' meetings at any future date during the life of the EUR Optics Notes.

There can be no assurance that the trading of the EUR Optics Notes will satisfy the listing requirement of Decree No. 239.

Application will be made to trade the EUR Optics Notes on the Official List of the Stock Exchange. There can be no assurance that the trading of the EUR Optics Notes on the Official List of the Stock Exchange will be granted in a timely manner or at all or that, once granted, will be maintained. Additionally, Optics does not makes any representation that such trading will satisfy the trading requirement under Decree No. 239 in order for the Optics Notes to be eligible to benefit from the exemption from the requirement to apply withholding tax.

The Italian tax authorities issued an interpretive circular relating to, among other things, the trading requirement of the aforementioned legislation that may be interpreted to require that the EUR Optics Notes be traded upon their issuance to benefit from the aforementioned provisions, including the exemption from the requirement to apply withholding tax. Hence, according to a stringent interpretation of this circular, the EUR Optics Notes may not be eligible to benefit from such provisions if the trading of the Optics Notes is not effective as of the EUR Optics Notes Issue Date. In the event that the EUR Optics Notes are not traded or that such trading requirement is not satisfied, payments of interest, premium and other income with respect to the EUR Optics Notes would be subject to a withholding tax (*ritenuta a titolo di imposta o acconto*), currently at a rate of 26% and, subject to certain exceptions under "*Terms and Conditions of the EUR Optics (TIF) Notes—Taxation—Additional Amounts*" Optics would be required to pay additional amounts with respect to such withholding taxes such that holders receive a net amount that is not less than the amount that they would have received in the absence of such withholding. Optics cannot assure the

holders of the EUR Optics Notes that the Italian tax authorities will not interpret the applicable legislation as requiring that the trading be effective at closing (upon issuance of the EUR Optics Notes) and Optics cannot assure the holders of the EUR Optics Notes that the listing can be achieved by the Optics Notes Issue Date. However, Optics intends to achieve the required trading of the holders of EUR Optics Notes on the EUR Optics Notes by obtaining a trading on the Luxembourg Stock Exchange. The imposition of withholding taxes with respect to payments on Optics Notes, and the resulting obligation to pay, subject to certain exemptions, additional amounts to holders of Optics Notes, could have a material adverse effect on Optics' business, financial condition and results of operations.

Certain covenants and events of default will be suspended if Optics receives investment grade ratings.

The EUR Optics Notes Trust Deed will provide that, if at any time following the Optics Notes Issue Date, Optics receives an investment grade rating from at least one of S&P or Moody's and any other rating agency, then the Optics Notes Collateral shall be released. See "*Terms and Conditions of the EUR Optics (TIF) Notes–Security"*.

Optics' right to receive payments under any Funding Loan prior to the Push-Down Merger (if it occurs) may be subordinated by law to the obligations of other creditors, and such Funding Loan is expected to cease to exist in connection with the Push-Down Merger.

Italian corporate law (Articles 2497-*quinquies* and 2467 of the Italian Civil Code) provides for rules to protect creditors against "undercapitalized companies" and provides for remedies in respect thereof. In this respect, in case of a loan to a company made by (i) a person that, directly or indirectly, directs the company or exercises management and coordination powers over that borrowing company or (ii) any entity subject to the management and coordination powers of the same person or (iii) a quotaholder in the case of a company incorporated in Italy as a *società a responsabilità limitata*, such loan will be subordinated to all other creditors of that borrower and rank senior only to the equity in that borrower if the loan is made when, taking into account the kind of business of the borrower, there was an excessive imbalance of the borrower's indebtedness compared to its net assets or the borrower was already in a financial situation requiring an injection of equity and not a loan ("**undercapitalization**"). Pursuant to Article 164 of the Italian Insolvency Code (as defined below), any payment made by the borrower with respect to any such loan within one year prior to the judicial winding-up declaration is ineffective by operation of law. The new provision replaced Article 2467, paragraph 1, of the Italian Civil Code, according to which such payments would be required to be returned to the borrower. For a more detailed explanation of the terms, conditions and consequences of claw-back actions in an insolvency scenario, see "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations—Certain Italian Insolvency Law Considerations—Hardening Period/Clawback and Fraudulent Transfer*" below. In addition to that, Article 292, paragraph 1, of the Italian Insolvency Code sets forth that claims of entities exercising management and coordination powers *vis-à-vis* the entities subject to such powers, and claims of the entities subject to such powers *vis-à-vis* the entities exercising them, deriving from loans granted after the filing of petitions resulting in the opening of judicial winding up in the year before, are subordinated.

The above rules apply to shareholders' loans "made in any form" and scholars generally conclude that such provisions should be interpreted broadly and apply to any form of financial support provided to a company by its shareholders, either directly or indirectly.

As of the date of this Exchange Offer Memorandum, there are several court precedents interpreting the provisions relating to Article 2467 of the Italian Civil Code summarized above. Some of such precedents have held that Article 2467 of the Italian Civil Code also applies to companies incorporated as joint stock companies (*società per azioni*), hence potentially to the borrowers under the intercompany loans that are a joint stock company (*società per azioni*), and therefore potentially to Optics under any Funding Loan.

Therefore, upon the occurrence of the requirements provided for by the relevant provisions, Italian courts may apply such provisions of the Italian Civil Code in respect of any Funding Loan borrowed by NetCo. Accordingly, an Italian court may conclude that the NetCo's obligations under any Funding Loan are subordinated to all its obligations towards other creditors. Should the NetCo's obligations under any Funding Loan be deemed subordinated to the obligations owed to other creditors by operation of law and senior only to the equity, Optics may not be able to recover any amounts under any Funding Loan, which could have a material adverse effect on the Issuer's ability to meet its

payment obligations under the Optics Notes. See "*Certain Limitations on Validity and Enforceability of the Notes Guarantees and the Optics Notes Collateral and Certain Insolvency Law Considerations*."

Moreover, in circumstances where any obligations of an Italian subsidiary under any intercompany loans (including any Funding Loan) or notes are subordinated by operation of law, the ability of the holders of the Optics Notes to recover under any Optics Notes Collateral created over such intercompany loans or notes or any guarantees and/or security interest granted by such Italian subsidiaries (including the Guarantees) may be impaired or restricted.

In addition, any Funding Loan will automatically cease to exist upon the Push-Down Merger (if occurs).

Early redemption of the EUR Optics Notes may reduce the yield expected by the holders of the Optics Notes.

The EUR Optics Notes will be subject to certain optional redemption features, exercisable at the discretion of Optics, enabling Optics to redeem the EUR Optics Notes, in whole or in part, as applicable, in the circumstances and at the redemption prices specified in "*Terms and Conditions of the EUR Optics Notes – Condition 6.2 (Redemption for Taxation Reasons) and Condition 6.3 (Redemption at the Option of Optics (Make-Whole Call)*". Under "*Terms and Conditions of the EUR Optics Notes – Condition 6.2 (Redemption for Taxation Reasons)*". Optics may redeem the EUR Optics Notes if a Payor is required to pay Additional Amounts either (i) as a result of a Change in Tax Law, or (ii) the merger of the Payor into another Person or the conveyance, transfer or lease of all or substantially all of the Payor's assets, unless the sole purpose of the merger would be to permit Optics to redeem the EUR Optics Notes. In the event that Optics exercises its option to redeem the EUR Optics Notes, in whole or in part, prior to the relevant maturity date, Noteholders may suffer a lower than expected yield and may not be able to reinvest the redemption proceeds in securities offering a yield or risk profile that is comparable to that of the EUR Optics Notes. Prospective investors should consider investment and reinvestment risks in light of other investments available to them at the time of such investment or reinvestment.

USE OF PROCEEDS

The Issuer will not receive any cash proceeds after giving effect to the Exchange Offers.

CAPITALIZATION OF THE TIM GROUP

The following table provides the cash and cash equivalents, the financial liabilities of the TIM Group in accordance with IFRS as of December 31, 2023 and the Capitalization of the TIM Group:

- On an actual basis;
- On an as adjusted basis to give effect to the Exchange Offers (assuming the Initial Exchange is subscribed at the Total Cap amount, with the New Notes issued pursuant to the Initial Exchange split by equal principal amount across each series of the EUR New Notes (€430 million) and each series of the USD New Notes ($431 million), respectively (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023), the consummation of the Acquisition, the Acquisition Exchange and the issuance of the Optics Notes.

Noteholders should read the below table together with "*Use of Proceeds,*" "*Description of Certain Other Financing Arrangements of the TIM Group*" and the TIM Audited Consolidated Financial Statements included elsewhere in this Exchange Offer Memorandum.

Certain amounts set forth below are based on an exchange rate as of December 31, 2023, of €1 = BRL 5.34964.

	As of December 31, 2023	
	Historical	**As Adjusted[2]**
	(unaudited)	
(€m)		
Cash and cash equivalents[1]	**2,912**	**10,872**
Current financial liabilities (short-term debt)	**6,609**	**6,839**
Finance liabilities directly associated with Discontinued operations/Non-current assets held for sale	-	-
Non-current financial liabilities (long-term debt):		
Bonds	15,297	10,285
Amounts due to banks, other financial payables and liabilities	5,987	4,321
Non-current financial liabilities for lease contracts	4,743	2,993
Total Non-current financial liabilities (a)	**26,027**	**17,600**
Equity:		
Share capital	11,620	11,620
Additional Paid-in capital	575	575
Other reserves, retained earnings, including profit (loss) for the period	1,451	1,248
Equity attributable to owners of the Parent	**13,646**	**13,443**
Non-controlling interests	**3,867**	**1,644**
Total equity (b)	**17,513**	**15,087**
Total Capitalization (a+b)	**43,540**	**32,687**

(1) The As Adjusted Cash and Cash equivalents reflects the assumed cash in from the Acquisition, but excludes payment by the TIM Group of any early bird premium or participation premium of, in each case, $2.50 or €2.50 per $1,000 or €1,000 principal amount (as the case may be) per Original Note accepted in connection with the Initial Exchange. For the purposes of calculating the cash-in from the Acquisition, which depends, among other factors, on the results of the Exchange Offers as the amount of debt transferred from TIM to Optics will reduce the cash component of the Purchase Price, the management assumed that the Initial Exchange is subscribed at the Total Cap amount, with the New Notes issued pursuant to the Initial Exchange split by equal principal amount across each series of the EUR New Notes (€430 million) and each series of the USD New Notes ($431 million), respectively (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023).This measure does not reflect the drawdown under the TIM Term Facility Agreement of an amount equal to €1.5 billion on April 10, 2024. If the Initial Exchange is subscribed below the Total Cap, or if no or fewer New Notes are issued pursuant to the Initial Exchange, the cash purchase price of the Acquisition will increase commensurately. The cash and cash equivalents at the Acquisition Closing Date may differ due to a number of factors, including, without limitation, the triggering of any purchase price adjustments pursuant to the Transaction Agreement, the date on which the Acquisition is consummated, ongoing operations of the TIM Group and the other matters set forth in this footnote. The As Adjusted Cash and Cash equivalents do not reflect any adjustments in respect of the order of seizure issued on February 2, 2024 by the preliminary investigation judge (*Giudice per le indagini preliminary*) of the Court of Milan carrying out a preventive seizure (*sequestro preventivo*) of the sums held in the TIM Group's bank accounts amounting to approximately €249.0 million. See "*Risk Factors—Risks Related to The TIM Group—Risks Related to the TIM Group's Legislative and Legal Framework— The TIM Group is exposed to risks in connection with fraud.*"

(2) Reflects the Exchange Offers with the Acquisition and the Acquisition Exchange. As adjusted amounts do not reflect (i) the repayment at maturity of €450 million aggregate principal amount of the 2024 3.625% Euro Notes on January 19, 2024, (ii) the repayment at maturity of €950 million aggregate principal amount of the 2024 4% Euro Notes on April 11, 2024, (iii) the repayment of the Intesa Sanpaolo Loan Agreement of €500 million on March 25, 2024 and (iv) the drawdown under the TIM Term Facility Agreement of €1.5 billion on April 10, 2024.

CAPITALIZATION OF NETCO AND OPTICS

The following table provides the cash and cash equivalents, the financial liabilities of the Optics Group in accordance with IFRS as of December 31, 2023 and the Capitalization of the Optics Group:

- On an actual carve-out basis for NetCo; and
- On a pro forma as adjusted basis of Optics to give effect to the Exchange Offers (assuming the Initial Exchange is subscribed at the Total Cap amount, with the Optics Notes issued pursuant to the Acquisition Exchange split by equal principal amount across each series of the EUR Optics Notes (€430 million) and each series of the USD Optics Notes ($431 million), respectively (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023), the consummation of the Acquisition, the Acquisition Exchange and the issuance of the Optics Notes and the incurrence of other committed financing of Optics in connection with the Acquisition and the equity contributed to Optics.

The presentation below is for illustrative purposes only based on the assumptions set forth above and is not intended to be an indication of the expected results of the Transactions. Actual amounts are subject to adjustments and may vary from estimated amounts depending on several factors, including but not limited to the principal amount of Original Notes tendered in the Exchange Offers, the Acquisition Closing Date, the actual amount of consideration payable by Optics upon such date and fees, costs and expenses payable by Optics in connection with the Transactions. Any additional amounts required by Optics to fund the actual amounts required for the Transactions may be funded by equity, debt and/or other liquidity available to Optics. There is no assurance that the Exchange Offers will be subscribed for in the assumed amount. Completion of the Exchange Offers is conditioned upon the completion of the Acquisition.

Noteholders should read the below table together with "*Use of Proceeds*," "*Description of Certain Other Financing Arrangements of the Optics Group*" and the NetCo Consolidated Financial Statements included elsewhere in this Exchange Offer Memorandum.

The table below does not account for Current and Non-current financial liabilities from lease contracts (net of lease receivables), amounting to €2,147 million.

	As of December 31, 2023	
	Historical NetCo	***As Adjusted Optics***[(1)(*)]
		(unaudited)
(€m)		
Cash and cash equivalents	**152**	**152** [(2)]
Non-current financial liabilities (long-term debt):		
Optics Notes[(3)]	-	5,000
Bank Loans	-	3,500
Amounts due to banks, other financial payables and liabilities	3,571	-
Total Non-current financial liabilities (a)	**3,571**	**8,500**
Total invested capital/equity (b)[(4)]	**5,356**	**10,452**
Total Capitalization (a+b)	**8,927**	**18,952**

(*) The data presented in the "*As Adjusted*" column under "*Capitalization of NetCo and Optics*", have been prepared by Optics. The preparation of such data involved applying specific adjustments to the NetCo Unaudited Combined Pro Forma Carve-out Financial Information. These adjustments were made to reflect the effects of the Transactions, based on certain assumptions, including the expected outstanding debt of Optics as of the Acquisition Closing Date on a *pro forma* basis for the Acquisition. For more information, see "*Summary Historical Consolidated Financial and Other Information of NetCo and Optics*."

(1) Reflects the Exchange Offers, Acquisition and the Acquisition Exchange.

(2) Cash and cash equivalents *As Adjusted for the Transactions* represents the cash and cash equivalents of the Optics Group after giving *pro forma* effect to the Transactions. This measure reflects the cash at NetCo of €152 million. Cash and cash equivalents *As Adjusted* does not account for any potential cash in from TIM or Infratel related to the NRRP advance payments received by TIM at the end of 2023. In addition, Cash and cash equivalents *As Adjusted* does not take into account the payment of any transaction costs associated with the Transactions by

Optics. The cash and cash equivalents at the Acquisition Closing Date may differ due to a number of factors, including, without limitation, the triggering of any purchase price adjustments pursuant to the Transaction Agreement.

(3) In connection with the Acquisition Exchange, assuming the Initial Exchange is subscribed at the Total Cap amount, with the Optics Notes issued pursuant to the Acquisition Exchange split by equal principal amount across each series of the EUR Optics Notes (€430 million) and each series of the USD Optics Notes ($431 million), respectively (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023).

(4) Total As adjusted Optics invested capital/equity is calculated as the Purchase Price (which does not include deferred consideration), plus cash and cash equivalents, less Total Non-current financial liabilities and is not adjusted for €305 million of employment benefits expenses.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF THE TIM GROUP

The following discussion and analysis is intended to assist in providing an understanding of the TIM Group's financial condition, changes in financial condition and results of operations and should be read in conjunction with (i) in the case of financial information as of and for the years ended December 31, 2023 and December 31, 2022, the 2023 TIM Audited Consolidated Financial Statements and (ii) in the case of financial information as of and for the year ended December 31, 2021, the 2022 TIM Audited Consolidated Financial Statements, in each case prepared in accordance with IFRS. Some of the information in this discussion and analysis includes forward-looking statements that involve risks and uncertainties. See "Forward-Looking Statements" and "Risk Factors" for a discussion of important factors to be evaluated in connection with an investment in the Notes.

Unless the context otherwise requires, when used in this section, the term "TIM Group" refer to the business constituting the TIM Group as of the date of this Exchange Offer Memorandum even though it may not have owned such business for the entire duration of the periods presented and without giving effect to the Transactions.

In addition to the conventional financial performance measures established by the IFRS, the TIM Group uses certain alternative performance measures to provide a measure of operating results excluding certain items that it believes are either outside of its recurring operating activities, or items that are non-cash. Excluding such items enables trends in the TIM Group's operating results and cash flow generation to be more easily observable. The TIM Group uses the non-IFRS measures internally to manage and assess the results of its operations, make decisions with respect to investments and allocation of resources and assess the performance of management personnel. Such performance measures are also the de facto metrics used by investors and other members of the financial community to value other companies operating within the TIM Group's industry, and thus are a basis for comparability between the TIM Group and its peers. Such non-IFRS measures are not necessarily comparable to similarly titled measures of other companies. Furthermore, non-IFRS measures have limitations as analytical tools and should not be considered in isolation from, or as an alternative to, data prepared in accordance with IFRS. See "*Presentation of Financial and Other Information*" included elsewhere in this Exchange Offer Memorandum for further details regarding the non-IFRS measures presented in this section.

Basis of Presentation

This discussion and analysis for each of the periods presented is based on the financial information derived from the TIM Audited Consolidated Financial Statements. The TIM Audited Consolidated Financial Statements have been prepared on a going concern basis and in accordance with IFRS, as well as laws and regulations in force in Italy.

For details regarding basis of presentation and the TIM Group's critical accounting policies, judgments and estimates, see Note 2 to each of the 2023 TIM Audited Consolidated Financial Statements and the 2022 TIM Audited Consolidated Financial Statements.

Exchange Rate Information

Certain financial information contained herein has been translated from Brazilian Real ("***BRL***") into Euro solely for your convenience. The TIM Group does not make any representation that any amount translated herein has been, or could be, converted into Euro at the rates indicated or any other rate. The average exchange rate used for the translation of BRL into Euro (expressed in terms of units of BRL per 1 Euro) herein is 5.40158 for the year ended December 31, 2023, 5.43993 for the year ended December 31, 2022 and 6.35936 for the year ended December 31, 2021.

Operating Segments

The TIM Group operates its business through three business units: the Domestic Business Unit, the Brazil Business Unit and Other Operations. For further information, please refer to Notes 1 and 39 to the 2023 TIM Audited Consolidated Financial Statements, Notes 1 and 39 to the 2022 TIM Audited Consolidated Financial Statements and Notes 1 and 39 to the 2021 TIM Audited Consolidated Financial Statements for further details on each segment.

The TIM Group Business Units described below are presented in line with the 2023 TIM Audited Consolidated Financial Statements.

Domestic Business Unit

The Domestic Business Unit includes the TIM Group's activities in Italy relating to voice and data services on fixed-line and mobile networks for retail customers and other wholesale operators, activities in the European, Mediterranean and South American markets relating to providing international voice, data and Internet services for fixed-line and mobile telecommunications operators, ISPs/ASPs (in the wholesale market) and to multinational companies through the networks available to the TIM Group, developing fiber optic networks for wholesale customers, supplying passive access services on the secondary copper and fiber network, providing cloud and edge computing solutions, providing information technology products and services as well as providing other support services for the Domestic Business Unit.

As of and for the years ended December 31, 2022 and 2021, the Domestic Business Unit operated through the following five segments:

- *Consumer*: The Consumer segment is engaged in providing voice and Internet services and products for both fixed-line and mobile markets to individual customers as well as managing customers through stores.

- *Business*: The Business segment is engaged in providing, managing and developing voice, data, and Internet services and products and other ICT solutions for primarily small and medium-size enterprises, SOHOs, the Italian public sector and other large accounts as well as enterprises in the fixed-line and mobile telecommunications markets.

- *Wholesale National Market*: The Wholesale National Market segment is engaged in managing and developing portfolios of regulated and unregulated wholesale services for fixed-line and mobile telecommunications operators in the Italian domestic market and for other MVNO.

- *Wholesale International Market*: The Wholesale International Market segment is engaged in providing voice, data and Internet services for fixed-line and mobile telecommunications operators, ISPs, ASPs in the wholesale market and to multinational companies through its own networks in the European, Mediterranean and South American market.

- *Other*: The Other segment is engaged in providing miscellaneous services, including technological innovation, engineering, construction and operating processes for network infrastructures, information technology services and infrastructure and network maintenance services. This segment also includes corporate support activities for the TIM Group.

As of and for the year ended December 31, 2023, revenues generated by the TIM Group's Domestic Business Unit have been presented as follows:

- *Consumer and Small Medium Business* (SMB): The Consumer and Small Medium Business (SMB) segment comprises all fixed and mobile voice and Internet services and products for non-business customers (including public telephony, caring activities and administrative management of customers), SME customers, and SOHO customers. This segment also includes the TIM Retail company, which coordinates the activities of the stores.

- *Enterprise*: The Enterprise segment consists of ICT solutions and connectivity products and services managed and developed for top customers, public sector customers and large accounts. The Enterprise segment includes the following entities: Olivetti, TI Trust Technologies, Telsy and Noovle.

- *Wholesale National Market:* The Wholesale National Market segment is engaged in managing and developing portfolios of regulated and unregulated wholesale services for fixed-line and mobile telecommunications operators in the Italian domestic market and for other MVNO. The Wholesale National Market includes the following entities: TI San Marino and Telefonia Mobile Sammarinese.

- *Wholesale International Market:* The Wholesale International Market segment includes the activities of the Telecom Italia Sparkle group, which operates in the market for international voice, data and Internet services for fixed and mobile telecommunications operators, ISPs/ASPs (in the wholesale market) and multinational companies through its own networks in the European, Mediterranean and South American markets.

- *Other*: The Other segment includes:

    - *Other Operations*: Other Operations includes technological innovation and development, engineering, construction and operating processes for network infrastructures, IT, systems and properties and all services of FiberCop; and

    - *Staff & Other*: Staff & Other includes services provided by the staff departments and other support activities.

Brazil Business Unit

The Brazil Business Unit is engaged in providing mobile services using universal mobile telecommunications system, global system mobile and long-term evolution technologies in Brazil. It also offers fiber optic data transmission using full IP technology, such as dense wavelength division multiplexing, multiprotocol label switching, as well as residential broadband services.

Other Operations

The Other Operating Business Unit includes ancillary operations of the TIM Group, including financial operations.

Delayering Plan

The TIM Group is in the process of delayering its business segments. The delayering under the 2022-2024 Industrial Plan was initially approved in 2022, and on February 14, 2023 and March 6, 2024, the Board approved the continuation of the Delayering Plan under the 2023-2025 Industrial Plan and 2024-2026 Industrial Plan, respectively. The process for setting up the legal entities to give effect to the delayering was set into motion in November 2022. Following the completion of the Transactions and the Delayering Plan, it is expected that the TIM Group will operate its business through the following three business areas:

- **TIM Enterprise**: The TIM Enterprise segment will comprise the TIM Group's commercial activities in the enterprise market, and will include, among other things, cloud computing, IoT and cybersecurity services. It will also include the TIM Group's data center assets.

- **TIM Consumer**: The TIM Consumer business segment will include the TIM Group's retail business which caters to consumers and small and medium business customers in both fixed-line and mobile markets. It will also include the mobile network assets and service platforms.

- **TIM Brasil**: The existing Brazil Business Unit will be reclassified as the TIM Brasil segment.

For more details of the Delayering Plan, please see "*Summary—The TIM Group's Strategy.*"

As part of the Delayering Plan, the resulting business areas are expected to be TIM Enterprise, TIM Consumer and TIM Brasil, which the TIM Group believes will more accurately represent the TIM Group's horizontal structure following the successful completion of the Transactions. The post delayering business areas described herein are not considered. The TIM Group is currently planning the reorganization of its structure through a revised business segmentation, which will account for the contribution of the NetCo Business to FiberCop and the sale of TIM's stake in FiberCop and it is expected that the TIM Group will continue to pursue its focused strategy. During 2024, once the Transactions are completed, an assessment will be carried out to identify the operating segments in accordance with IFRS 8. This will take into account the specific guidance provided by the standard itself (autonomy of operating flows, method of allocating financial resources, management reporting, etc.).

Key Factors Affecting the TIM Group's Results of Operations and their Comparability

The TIM Group's operations and the operating metrics discussed below have been, and may continue to be, affected by certain key factors as well as certain historical events and actions. The key factors, among others, affecting the ordinary course of the TIM Group's business and its results of operations are discussed below.

Acquisitions and Integration of Businesses, Disposals and Strategic Initiatives

The TIM Group has from time to time made significant direct and indirect equity investments in, and divestments of, several telecommunications businesses and ancillary service providers in various jurisdictions. Due to the significant nature of certain of these acquisitions and disposals, the comparability of the TIM Group's results of operations based on the TIM Audited Consolidated Financial Statements may be affected. For example, on April 4, 2022, the TIM Group completed the acquisition of Oi's mobile business in Brazil, which affects the comparability of financial information for its Brazil Business Unit as of and for the year ended December 31, 2022 and as of and for the year ended December 31, 2021. See "*—Discussion and Analysis of The TIM Group's Results of Operations—Year Ended December 31, 2022 compared to the Year Ended December 31, 2021.*" In addition, the TIM Group generally record goodwill relating to acquisitions. As of December 31, 2023, the goodwill recorded on the TIM Group's consolidated statement of financial position amounted to €19,170 million, compared to €19,111 million as of December 31, 2022, and €18,568 million as of December 31, 2021. Goodwill is subject to impairment reviews in accordance with IFRS and any impairment charge on goodwill would have a negative impact on operating profit. As of December 31, 2021, the TIM Group's goodwill impairment loss amounted to €4.12 billion. As of December 31, 2023, the TIM Group assessed for impairment its CGUs. Since their recoverable amounts were higher than the respective carrying amounts, TIM Group did not record any impairment loss.

Only after the consummation of the Acquisition will an analysis be carried out in accordance with the applicable IFRSs (specifically IAS 36) to determine the amount of goodwill that will be attributed by the TIM Group to NetCo.

Macroeconomic and Geopolitical Developments

The TIM Group's operations are subject to macroeconomic and geopolitical risks that are outside of the TIM Group's control. For example, high levels of inflation or sovereign debt, combined with weak growth and high unemployment, could affect the spending capacity of the TIM Group's consumer and business customers leading to weaker demand, customers being less willing to pay for premium services and an increase in the risk of bad debts, leading to fiscal reforms (including austerity measures), sovereign debt restructurings, currency instability, increased counterparty credit risk, heightened levels of volatility and, potentially, disruptions in the credit and equity markets, as well as other outcomes that might adversely impact the TIM Group's financial condition. See "*Risk Factors—Risks Related to the TIM Group—Risks Related to Macroeconomic Conditions Affecting the TIM Group*."

For example, the TIM Group's results of operations in the periods under review have been affected by adverse economic conditions in its core Italian market as well as in Brazil, including as a result of inflationary pressures and increases in interest rates, which have had a negative effect on consumer confidence and the demand for the TIM Group's products and services in these markets.

Competition and Pricing

In each of the jurisdictions in which the TIM Group operates, the TIM Group faces significant competition and competitive pressures, including, increasingly, from providers of alternative new technologies or improvements in existing technologies, against a backdrop of otherwise challenging market conditions. These factors have resulted in significant pricing pressures in the telecommunications sector, which have impacted the TIM Group's results of operations in the periods under review. See "*Risk Factors—Risks Related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry*," "*Business of the TIM Group*" and "*The TIM Group Industry Overview*." Given the competitive dynamics and the prevalent macroeconomic environments in the markets in which the TIM Group operates, during the periods under review, the TIM Group has introduced pricing mechanisms for adjusting its product and service offerings to account for increased costs, primarily associated with heightened inflation, in order to reduce pressure on cash costs. Certain of the TIM Group's competitors may not pursue price-based competition, which could contribute to a loss of its market share and further increase pricing pressure in its retail business. The

telecommunications market is also experiencing consolidation and globalization, which may further intensify competition and affect the TIM Group's results of operations. For a description of the competitive landscape in the key geographies in which the TIM Group operates, please see "*The TIM Group Industry Overview*."

Mobile Network Upgrades

The TIM Group's ability to provide new or enhanced telecommunications services and to grow its subscriber base depends in part on its ability to upgrade its mobile network infrastructure, which is capital intensive. The TIM Group's has invested heavily in building its market leading, next-generation mobile network infrastructure over time and remain committed to further developing and future-proofing its network by investing in the latest network technologies. Among other things, the TIM Group plans to continue to update and expand its mobile network, with a particular focus on its 5G network expansion in Italy which is supported by the valuable spectrum rights that the TIM Group acquired over time. The TIM Group believes that its investment plans position it to meet customer demand for high-speed services, as well as to provide the critical high-capacity fiber backhaul services required by mobile operators to meet the growing demand for mobile data services.

During the periods under review, the TIM Group has incurred significant capital expenditures in order to upgrade its mobile networks and to obtain necessary licenses and spectrum rights. See "*—Capital Expenditures and Expenses for Mobile Telephone Licenses/Spectrum*" below.

Cyber Attack

Cyber risk represents one of the major risks for the TIM Group as it could generate impacts on the business in terms of access to sensitive information and blockage/slowdown in the provision of services. The TIM Group has structured a risk management process from a preventive and reactive perspective, with assessment of the impact levels and prioritization of mitigation actions in a risk-based approach. See "*Risk Factors—Risks Related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—The TIM Group's businesses are subject to cybersecurity risks*" below.

Debt Service Obligations

The TIM Group's outstanding debt and debt service requirements and may incur additional debt in the future. See "*—Liquidity and Capital Resources*" below and "*Risk Factors—Risks Relating to the TIM Group's Indebtedness*" and "*Description of Certain Other Financing Arrangements of the TIM Group"* included elsewhere in this Exchange Offer Memorandum. The TIM Group's significant level of debt places it at a competitive disadvantage relative to competitors with lower leverage and could have important consequences, including, but not limited to, restricting its ability to exploiting other business opportunities and increase its vulnerability to, and reduce its flexibility to respond to, adverse general economic or industry conditions. See "*Risk Factors—Risks Relating to the TIM Group's Indebtedness—If the Acquisition is not consummated, the substantial leverage and debt service obligations of the TIM Group could adversely affect its business and may jeopardize the fullfilment of its obligations, including its payment obligations under the Original Notes (not tendered or accepted in the Exchange Offer) and the New Notes.*"

Fluctuations in Currency Exchange Rates and Interest Rates

The TIM Group's reporting currency is Euro but a significant portion of its revenue and expenses are currently earned or incurred in other currencies (primarily BRL). The TIM Group is therefore exposed to foreign currency exchange risk. As a result, its reported results of operations can deviate from the results of its businesses on a local currency basis. The exchange rate the Euro and other currencies in the markets in which the TIM Group operates has been volatile in the past and may continue to be volatile in the future. Although the TIM Group attempts to mitigate currency risk to an extent through hedging, sharp changes in the exchange rate could have a material effect on the TIM Group's results of operations.

The TIM Group's borrowings are denominated primarily in Euro, U.S. dollars and BRL, but the TIM Group does not necessarily match the cash flows generated from its operations. In addition, a portion of its borrowings bear a floating rate of interest. While the TIM Group hedges the risk of certain currency and interest rate fluctuations in respect of a portion of its existing debt, these arrangements may not insulate it completely from such exposure. See "*Risk Factors—*

Risk Factors Related to the TIM Group—Risks Related to Macroeconomic Conditions Affecting the TIM Group—Fluctuations in currency exchange and interest rates and the performance of the equity markets in general may adversely affect the TIM Group's results."

TIM Group Operational Data

The TIM Group uses several key operating measures to evaluate the performance of its business. Such operating measures are not measures of financial performance under IFRS, nor have such measures been audited or reviewed by an auditor, consultant or expert. All of these measures are derived from the TIM Group's internal operating and financial systems. As defined by the TIM Group's management, these terms may not be directly comparable to similar terms used by competitors or other companies.

The tables below set forth the TIM Group's key operating measures by business unit and relevant segments as of the years ended December 31, 2023, 2022 and 2021:

*Domestic Business Unit***:** *Fixed*

	For the year ended December 31,		
	2023	**2022**	**2021**
Total retail accesses (thousands)	7,975	8,290	8,647
of which NGN[(1)]	5,580	5,417	5,186
Total wholesale accesses (thousands)	7,247	7,525	7,729
of which NGN	5,280	5,171	4,819
Active Broadband accesses retail (thousands)	7,196	7,443	7,733
Consumer ARPU (€/month)[(2)]	28.1	28.3	30.1
BroadBand ARPU (€/month)[(3)]	38.1	35.6	33.4

(1) Ultra broadband access in FTTx and FWA mode, also including "data only" lines and GBE (Gigabit Ethernet).

(2) Revenues from organic Consumer retail services in proportion to the average Consumer accesses.

(3) Revenues from organic BroadBand services in proportion to the average active TIM retail BroadBand accesses.

Domestic Business Unit: Mobile

	For the year ended December 31,		
	2023	**2022**	**2021**
Lines at period end (thousands)	30,128	30,407	30,466
of which Human	18,071	18,438	19,054
Churn rate (%)[(1)]	12.8	13.3	14.7
BroadBand users (thousands)[(2)]	12,592	12,577	12,783
Retail ARPU (€/month)[(3)]	6.9	7.1	7.5
Human ARPU (€/month)[(4)]	11.4	11.5	11.7

(1) Percentage of total lines that ceased in the period compared to the average number of total lines.

(2) Mobile lines using data services.

(3) Revenues from organic retail services (visitors and MVNO not included) compared to the total average number of lines.

(4) Revenues from organic retail services (visitors and MVNO not included) compared to the average number of human lines.

Brazil Business Unit

	For the year ended December 31,		
	2023	**2022**	**2021**
Lines at period end (thousands)[(1)]	61,248	62,485	52,066
Mobile ARPU[(2)] (BRL)	29.5	26.1	26.4

(1) Includes corporate lines.

(2) Includes blended ARPU (pre-paid and post-paid).

Non-Recurring Events

In the years ended December 31, 2023, 2022 and 2021, The TIM Group recognized non-recurring net operating expenses connected to events and transactions that by their nature do not occur on an ongoing basis in the normal course of operations and which have been presented because their amount is significant. Non-recurring charges include, among others, any goodwill impairment changes, provisions for regulatory disputes and potential liabilities related to them, liabilities with customers and/or suppliers, and provisions for onerous contracts, charges associated with corporate reorganization and restructuring and prior-year adjustments.

Key Income Statement Items

Revenue

Revenue consists of income generated from the equipment sales and delivery of voice and data services on fixed and mobile networks for retail and wholesale customers across the TIM Group's Domestic Business Unit, Brazil Business Unit and Other Operations Unit, including adjustments and eliminations. See "*Operating Segments.*"

Other Income

Other income mainly consists of late payment fees charged for telephone services, recovery of employee benefit expenses, purchases and services rendered, capital and operating grants, damages, penalties and recoveries connected with litigation, estimate revisions and other adjustments, income for special training activities and other income.

Acquisition of Goods and Services

Acquisition and goods services are associated with costs related to the acquisition of goods, revenues due to the other TLC operators and interconnection costs, commercial and advertising costs, professional and consulting services, power, maintenance and outsourced services, lease and rental costs and other similar costs.

Employee Benefit Expenses

Employee benefits and expenses consists of the ordinary employee expenses and costs and restructuring and other expenses.

Other Operating Expenses

Other operating expenses mainly consists of the following subcategories: (i) write-downs and expenses in connection with credit management (ii) provision charges (iii) TLC operating fees and charges (iv) indirect duties and taxes (v) penalties, settlement compensation and administrative fines (vi) subscription dues and fees; donations, scholarships and traineeships and (vii) sundry expenses.

Internally Generated Assets

Internally generated assets primarily refer to the capitalization of costs relating to network infrastructure and systems, as well as software development and development of network solutions, applications and innovative services.

Operating profit (loss) before depreciation and amortization, capital gains (losses) and impairment reversals (losses) on non-current assets (EBITDA)

EBITDA includes operating profit (loss) before depreciation and amortization, capital gains (losses) and impairment reversals (losses) on non-current assets.

EBITDA is unaudited and is not required by or presented in accordance with IFRS or any other generally accepted accounting standards. The TIM Group believes that this measure is useful to readers of the TIM Audited Consolidated Financial Statements as it provides them with a measure of the operating results which excludes certain items the TIM Group considers outside of its recurring operating activities or that are non-cash, making trends more easily observable and providing information regarding its operating results that allows investors to better identify trends in its financial performance. EBITDA should not be considered as a substitute measure for net income or loss, operating profit, cash flow or other combined income or cash flow data prepared in accordance with IFRS and may not be comparable to similarly titled measures used by other companies. Further, this measure should not be considered as an alternative for operating profit as the effects of depreciation, amortization and impairment excluded from this measure do ultimately affect the operating results, which is also presented within the TIM Audited Consolidated Financial Statements in accordance with IAS 1 (Presentation of Financial Statements).

Depreciation and Amortization

Depreciation and amortization includes amortization of intangible assets with a finite useful life, depreciation of tangible assets and amortization of rights of use assets.

Impairment reversals (losses) on non-current assets

Impairment reversals (losses) on non-current assets contains impairment reversal and losses on non-current intangible and tangible assets. In accordance with IAS 36, goodwill is not subject to amortization, but is tested for impairment on an annual basis.

Operating profit (loss) (EBIT)

Operating profit (loss) EBIT is calculated to include impairment losses (reversals) on non-current assets, losses (gains) on disposals of non-current assets and depreciation and amortization.

Share of losses (profits) of associates and joint ventures accounted for using the equity method

Share of losses (profits) of associates and joint ventures accounted for using the equity method reflects the effect of applying the equity method to measure investments in associates and joint ventures.

Other income (expenses) from investments

Other income (expenses) from investments includes dividends from other investments, net gains on the sale of investments in associates and joint ventures accounted for using the equity method, and sundry income and expenses.

Finance income and expenses

Finance income and expenses are recognized on an accrual basis and include interest income, income from financial receivables recorded in non-current assets, income from securities other than investments, recorded in non-current assets, income from securities other than investments recorded in current assets, miscellaneous finance income, interest expenses and other costs related to bonds, interest expenses to banks, interest expenses to others, finance expenses on lease liabilities, commissions and other finance expenses.

Income tax expense

Income tax expense includes all taxes calculated on the basis of taxable income.

Profit (Loss) for the period

Profit (Loss) for the period includes profit (loss) for the year from continuing operations and discontinued operations/non-current assets held for sale.

Discussion and Analysis of the TIM Group's Results of Operations for the year ended December 31, 2023 compared to the year ended December 31, 2022

The below table sets forth the TIM Group's separate consolidated income statement for the year ended December 31, 2023 compared to the year ended December 31, 2022.

Separate Consolidated Income Statement (€m)	**For the year ended December 31,**	
	2023	**2022**
Revenues	**16,296**	**15,788**
Other Income	206	213
Total operating revenues and other income	**16,502**	**16,001**
Acquisition of goods and services	(7,518)	(7,239)
Employee benefits expenses	(2,987)	(3,180)
Other operating expenses	(872)	(816)
Change in inventories	47	22
Internally generated assets	538	559
Operating profit (loss) before depreciation and amortization, capital gains (losses) and impairment reversals (losses) on non-current assets (EBITDA)	**5,710**	**5,347**
Depreciation and amortization	(4,863)	(4,777)
Gains (losses) on disposals of non-current assets	(11)	36
Impairment reversals (losses) on non-current assets	—	—
Operating profit (loss) EBIT	**836**	**606**
Share of profits (losses) of associates and joint ventures accounted for using the equity method	(29)	23
Other income (expenses) from investments	53	206
Finance income	1,095	1,115
Finance expenses	(2,835)	(2,538)
Profit (loss) before tax continuing operations	**(880)**	**(588)**
Income tax expense	(227)	(2,066)
Profit (loss) from continuing operations	(1,107)	**(2,654)**
Profit (loss) from Discontinued operations/Non-current assets held for sale	**-**	**-**
Profit/(loss) for the period	**(1,107)**	**(2,654)**

Non-Recurring Events

The TIM Group's results of operations as of and for the year ended December 31, 2023 were significantly impacted by non-recurring net operating expenses during the course of 2023 connected to events and transactions that by their nature do not occur on an ongoing basis in the normal course of operations and which have been presented because their amount is significant.

Specifically, non-recurring events for the year ended December 31, 2023, included the following:

- €484 million in employee benefits expenses mainly relating to outgoing managerial and non-managerial staff in connection with the Corporate Reorganization and Restructuring Process;
- €44 million mainly for non-recurring expenses associated with agreements and the development of corporate transformation and expansion projects in Italy and Brazil;
- €134 million of other operating expenses primarily as provisions for disputes, settlements, regulatory sanctions and potential liabilities related to them; and
- €11 million in income for recovery of operating expenses.

Revenue

For the year ended December 31, 2023, the TIM Group generated total revenue of €16,296 million, a 3.2% increase compared to €15,788 million for the year ended December 31, 2022. This increase in total revenue was principally due to an increase in revenue generated by the Brazil Business Unit.

The following table sets forth the TIM Group's revenue by business unit for the year ended December 31, 2023 and 2022, respectively:

	For the year ended December 31,	
(€m)	**2023**	**2022**
Domestic	11,922	11,858
Brazil	4,412	3,963
Other Operations	—	—
Adjustments and eliminations	(*38*)	(*33*)
Consolidated Total	**16,296**	**15,788**

Domestic Business Unit

Revenue generated by the TIM Group's Domestic Business Unit for the year ended December 31, 2023, amounted to €11,922 million a 0.5% increase compared to €11,858 million for the year ended December 31, 2022.

The table below breaks down the TIM Group's Domestic Business Unit revenue by operating segment for the year ended December 31, 2023 and 2022, respectively:

	For the year ended December 31,	
(€m)	**2023**	**2022**
Consumer and Small Medium Business (SMB)	5,629	5,913
Enterprise	3,088	2,968
Wholesale National Market	2,014	1,948
Wholesale International Market	1,021	992
Other	170	35
Consolidated Total	**11,922**	**11,858**

Consumer and Small Medium Business (SMB): Revenue from the TIM Group's Consumer and Small Medium Business (SMB) segment for the year ended December 31, 2023 amounted to €5,629 million, a 4.8% decrease compared to €5,913 million for the year ended December 31, 2022.

Mobile services revenue for the year ended December 31, 2023 totaled, in organic terms, €2,169 million, a €88 million or 3.9% decrease compared to the year ended December 31, 2022. The impact of the competitive dynamic remained the same for the year ended December 31, 2023 compared to the year ended December 31, 2022, albeit with a lesser reduction of the customer base calling. However, revenue from traffic for the year ended December 31, 2023 decreased compared to the year ended December 31, 2022, mainly due to the progressive reduction of interconnection tariffs.

Fixed services revenue for the year ended December 31, 2023 totaled, in organic terms, €2,972 million, a €152 million or 4.9% decrease compared to the year ended December 31, 2023. This decrease is due to the reduction in the TIM Group's customer base and ARPU levels.

Handset and Bundle & Handset revenue totaled €506 million for the year ended December 31, 2023, a €52 million decrease compared to the year ended December 31, 2022. This decrease was mainly due the progressive slowdown of the mobile terminal market.

Enterprise: Revenue generated by the Enterprise segment for the year ended December 31, 2023 amounted to €3,088 million, a 4.1% increase compared to €2,968 million for the year ended December 31, 2022. In particular:

Mobile service revenue for the year ended December 31, 2023 slightly increased (an increase of €4 million) compared to the mobile service revenues for the year ended December 31, 2022. Fixed service revenues for the year ended

December 31, 2023 increased by €129 million or 5.8% increase compared to the year ended December 31, 2022, mainly driven by the increase in revenues from ICT services.

Wholesale National Market: The Wholesale National Market segment generated revenue in an amount of €2,014 million for the year ended December 31, 2023, a 3.4% increase compared to €1,948 million for the year ended December 31, 2022. This increase is mainly due to the positive impact of the regulatory price dynamics.

Wholesale International Market: Revenue generated by the Wholesale International Market segment for the year ended December 31, 2023 amounted to €1,021 million, a 2.9% increase compared to €29 million for the year ended December 31, 2022, mainly due to the sales revenues for spectrum/fiber and the growth of revenues related to mobile operator solutions, which is complemented by a strategy for rationalizing voice revenues.

Brazil Business Unit

The Brazil Business Unit generated revenue of €4,412 million (BRL 23,834 million) for the year ended December 31, 2023, a 16.4% increase compared to €3,963 million (BRL 21,531 million) for the year ended December 31, 2022.

This was primarily driven by an increase in service revenue of 10.8%, from BRL 20,829 million for the year ended December 31, 2022 to BRL 23,071 million for the year ended December 31, 2023. Mobile services revenue for the year ended December 31, 2023 increased by 11.2% compared to the year ended December 31, 2022. This performance is mainly related to the continuous recovery of the pre-paid and post-paid segments. Fixed services revenue for the year ended December 31, 2023 increased by 4.6% compared to the year ended December 31, 2022. This increase is mainly driven by the expansion of TIM UltraFibra. Product sales revenue increased from BRL 702 million for the year ended December 31, 2022 to BRL 763 million for the year ended December 31, 2023.

Other Income

For the year ended December 31, 2023, other income decreased to €206 million from €213 million for the year ended December 31, 2022. This decrease was primarily due to the decrease in the estimate revisions and other adjustments of €17 million.

Acquisition of Goods and Services

For the year ended December 31, 2023, acquisition of goods and services amounted to €7,518 million, compared to €7,239 million for the year ended December 31, 2022. This is comprised of increased in the TIM Group's Brazil Business Unit of €125 million (including an exchange gain of €9 million) and in the Domestic Business Unit of €165 million, in each case compared to the year ended December 31, 2022.

Employee Benefits Expenses

For the year ended December 31, 2023, the employee benefits expenses amounted to €2,987 million compared to €3,180 million for the year ended December 31, 2022. The decrease of €193 million was mainly driven by reductions in ordinary employee expenses, mainly due to the savings associated with the reduction in the average salaried employees.

Other Operating Expenses

For the year ended December 31, 2023, other operating expenses increased to €872 million, from €816 million for the year ended December 31, 2022. This increase was mainly attributable to an increase in other charges which was mainly related to regulatory sanctions.

The non-recurring items for the year ended December 31, 2023 amounted to €134 million, mainly due to provisions for regulatory sanctions and onerous contracts.

Internally Generated Assets

For the year ended December 31, 2023, internally generated assets decreased to €538 million, from €559 million for the year ended December 31, 2022, primarily due to increased capitalization of labor costs relating to design, construction and testing of network infrastructure and systems, as well as software development and development of network solutions, applications and innovative services.

EBITDA

For the year ended December 31, 2023, the TIM Group's EBITDA amounted to €5,710 million, a 6.8% increase compared to €5,347 million for the year ended December 31, 2022. EBITDA for the year ended December 31, 2023 was impacted by non-recurring items in the amount of €673 million, whilst for the year ended December 31, 2022, the total impact of €682 million was primarily comprised non-recurring items, of which €484 million related to the application of Article 4 of Italian Law No. 92 of June 28, 2012 and €189 million for the posting of a Contractual Risk Provision for Onerous Contracts (IAS 37).

The table below sets forth the TIM Group's EBITDA by business unit for the year ended December 31, 2023 and the year ended December 31, 2022, respectively:

	For the year ended December 31,	
(€m)	**2023**	**2022**
Domestic	3,577	3,519
% of Revenues	30.0	*29.7*
Brazil	2,141	1,839
% of Revenues	48.5	*46.4*
Other Operations	(8)	(12)
Adjustments and eliminations	-	*1*
Consolidated Total	**5,710**	**5,347**

Domestic Business Unit

EBITDA generated by the TIM Group's Domestic Business Unit for the year ended December 31, 2023 amounted to €3,577 million, an increase of €58 million or 1.6% from the year ended December 31, 2022.

Brazil Business Unit

EBITDA attributable to the TIM Group's Brazil Business Unit for the year ended December 31, 2023 was €2,141 million, a 16.4% increase compared to €1,839 million for the year ended December 31, 2022.

Depreciation and Amortization

For the year ended December 31, 2023, depreciation and amortization amounted to €4,863 million, compared to €4,777 million for the year ended December 31, 2022. The increase of €86 million can be attributed for €59 million to the Brazil Business Unit and for €27 million to the Domestic Business Unit.

Operating profit (loss) (EBIT)

For the year ended December 31, 2023, Operating profit (loss) (EBIT) amounted to €836 million compared to €606 million for the year ended December 31, 2022.

Share of losses (profits) of associates and joint ventures accounted for using the equity method

Share of losses (profits) of associates and joint ventures accounted for using the equity method decreased to a loss of €29 million for the year ended December 31, 2023, from €23 million for the year ended December 31, 2022.

Other income (expenses) from investments

For the year ended December 31, 2023, other income (expenses) from investments amounted to €53 million compared to €206 million for the year ended December 31, 2022, mainly due to net capital gains on the disposal of equity investments in associates and joint ventures accounted for using the equity method.

Finance income and expenses

For the year ended December 31, 2023, finance income (expenses) reflected a net expense of €1,740 million, compared to €1,423 million for the year ended December 31, 2022. This increase is substantially attributable to the dynamics of interest rates and to the higher debt exposure.

Income tax expenses

For the year ended December 31, 2023, income tax expenses amounted to €227 million, compared to €2,066 million for the year ended December 31, 2022. The decrease was mainly due to a decrease in deferred tax.

Profit (loss) for the period

For the year ended December 31, 2023, loss for the period ended December 31, 2023 was €1,107 million compared to a loss of €2,654 million for the year ended December 31, 2022. The reasons for this decrease are disclosed in the foregoing sections.

Discussion and Analysis of the TIM Group's Results of Operations for the year ended December 31, 2022 compared to the year ended December 31, 2021

The below table sets forth the TIM Group's separate consolidated income statement for the year ended December 31, 2022 and December 31, 2021.

(€m)	For the year ended December 31,	
	2022	2021
Revenues	**15,788**	**15,316**

Non-Recurring Events

The TIM Group's results of operations as of and for the year ended December 31, 2022 and the year ended December 31, 2021 were significantly impacted by non-recurring net operating expenses connected to events and transactions that by their nature do not occur on an ongoing basis in the normal course of operations and which have been presented because their amount is significant.

Specifically, non-recurring events for the year ended December 31, 2022, included the following:

- €572 million in employee benefits expenses mainly relating to outgoing managerial and non-managerial staff in connection with the Corporate Reorganization and Restructuring Process;

- €56 million mainly for non-recurring expenses associated with agreements and the development of corporate transformation and expansion projects in Italy and Brazil;

- €77 million of other operating expenses primarily as provisions for disputes, settlements, regulatory sanctions and potential liabilities related to them (including a €41 million provision for onerous contracts relating to a multi-year agreement entered into in the year ended December 31, 2021, which committed the TIM Group to minimum purchases, the total estimated cost of which, for the residual duration of the agreement, became apparent in the year ended December 31, 2022); and

- €23 million in income for recovery of operating expenses.

Net non-recurring events for the year ended December 31, 2021, included the following:

- €4,120 million for the impairment loss on Goodwill attributed to the Domestic Business Unit. The impairment test was performed by referring to the flows of the 2022-2024 Industrial Plan (as described in "*Summary—The TIM Group's Strategy*") and the projections up to 2026 of the domestic market in its current conditions and using a discount rate updated to the financial market conditions as of December 31, 2021. The 2022-2024 Industrial Plan is based on the results of the 2021 final accounting and reflects expectations on future developments and outlines all the actions to create value for the shareholders. The year showed an impairment loss, which is attributed entirely to goodwill;

- €735 million in other operating expenses, mainly comprising provisions made for disputes, transactions, regulatory sanctions and related potential liabilities as well as expenses connected with the COVID-19 pandemic (primarily provisions made as a to account for the worsening of expected credit losses of corporate customers as a result thereof). Other operating expenses – Sundry expenses and provisions included, among other items, €548 million for the posting of a Contractual Risk Provision for Onerous Contracts (IAS 37) relating to certain contracts for the offer of multimedia content connected with existing partnerships;

- €367 million in employee benefit expenses mainly connected with business reorganization and restructuring processes following the application of Article 4 of Italian Law No. 92 of June 28, 2012, and per the agreement entered into between certain TIM Group companies and certain trade union organizations on March 21, 2023;

- €50 million for expenses related to agreements and the development of non-recurring projects, as well as costs for purchases relating to supplies that became necessary for the management of the health emergency; and

- €8 million in net income for adjustments to revenues and the recovery of operating expenses.

Revenue

For the year ended December 31, 2022, the TIM Group generated total revenue of €15,788 million, a 3.1% increase compared to €15,316 million for the year ended December 31, 2021 driven by an increase in revenue generated by the Brazil Business Unit. Excluding revenues from the Oi Group mobile business, acquired in Brazil during 2022, consolidated revenues for the year ended December 31, 2022 would have amounted to €15,640 million.

The following table sets forth the TIM Group's revenue by business unit for the years ended December 31, 2022 and December 31, 2021, respectively:

(€m)	For the year ended December 31, 2022	2021
Domestic	11,858	12,505
Brazil	3,963	2,840
Other Operations	—	—
Adjustments and eliminations	(33)	(29)
Consolidated Total	**15,788**	**15,316**

Domestic Business Unit

For the year ended December 31, 2022, revenue from the Domestic Business Unit amounted to €11,858 million, a decrease of €647 million or 5.2% compared to the year ended December 31, 2021.

For the year ended December 31, 2022, revenue from stand-alone services amounted to €10,799 million, a decrease of €384 million or 3.4% compared to the year ended December 31, 2021, primarily due to the impact of increasing competition on the TIM Group's customer base, as well as reduction in ARPU levels. See "*—Key Factors Affecting the TIM Group's Results of Operations and Their Comparability—Competition and Pricing.*" In organic terms, revenues from stand-alone services for the year ended December 31, 2022 decreased by €422 million or 3.8% compared to the year ended December 31, 2021.

More specifically, for the year ended December 31, 2022, revenue from stand-alone market services amounted to €8,276 million in organic terms, with a negative change of 3.8% compared to the year ended December 31, 2021, mainly due to the decrease in accesses and ARPU levels and the presence in 2021 of non-recurring transactions in the Wholesale segment, partly offset by the growth in revenues from ICT solutions which, for the year ended December 31, 2022, increased by €308 million or 22.7% compared to the year ended December 31, 2021.

Revenues from stand-alone Mobile services for the year ended December 31, 2022 decreased by €91 million or 2.9% to €3,060 million compared to the year ended December 31, 2021, mainly due to the reduction in the TIM Group's customer base connected with Human lines and ARPU levels.

For the year ended December 31, 2022, revenue for Handset and Bundle & Handset, including the change in work in progress, amounted in organic terms to €1,059 million, a decrease of €263 million compared to the year ended December 31, 2021, largely attributable to the performance of the fixed retail segment.

Revenue for the year ended December 31, 2022 include approximately €50 million relating to a portion of the commercial agreement signed in 2022 by TIM and FiberCop with Open Fiber, which required Open Fiber to purchase from FiberCop, in White Areas, the IRU for overhead infrastructure and access connections to customer homes.

The table below breaks down the Domestic Business Unit revenue by operating segment for the year ended December 31, 2022 and December 31, 2021, respectively:

(€m)	For the year ended December 31, 2022	2021
Consumer(*)	4,736	5,263
Business	4,144	4,117
Wholesale National Market(*)	1,948	2,107

Wholesale International Market	992	1,008
Other & Eliminations	38	10
Consolidated Total	**11,858**	**12,505**

(*) Data for Consumer and Wholesale National Market segments differ from those published in the 2021 Consolidated Financial Statements due to reclassifications to such segments caused by organizational changes in the year ended December 31, 2022. In particular, monthly revenue streams related to Mobile Virtual Network Operator (MVNOs) were reclassified from Consumer segment to National Wholesale Market segment.

Consumer: For the year ended December 31, 2022, revenue generated by the TIM Group's Consumer segment amounted to €4,736 million, a decrease of €527 million or 10.0% year on year, primarily due to the challenging competitive dynamics in the consumer market. Revenue from services, which amounted to €4,231 million for the year ended December 31, 2022, and which decreased by €339 million or 7.4% compared to the year ended December 31, 2021, were similarly affected.

Revenue from mobile services for the year ended December 31, 2022 amounted to €1,885 million, a decrease of €120 million or 6.0% compared to the year ended December 31, 2021, in large part due to the impact of the prevalent competitive market dynamics. Although call volume reductions lessened, revenue from traffic decreased due to the progressive reduction of interconnection tariffs.

Revenue from fixed services amounted to €2,369 million for the year ended December 31, 2022, a decrease of €231 million or 8.9% compared to the year ended December 31, 2021, primarily due to lower ARPU levels and a smaller customer base, which in 2021 benefited from government incentive programs such as voucher recognition for ISEE incomes below €20,000, partially offset by growth in Ultrabroadband customers.

Revenue for Handsets and Bundles & Handsets in the Consumer segment for the year ended December 31, 2022 amounted to €505 million, a decrease of €188 million or 27.1% compared to the year ended December 31, 2021, mainly due to the end of the phase 1 voucher program, with a reduction of sales of PCs and tablets.

Business: Revenue generated by the Business segment for the year ended December 31, 2022 amounted to €4,144 million, an increase of €27 million or 0.6% compared to the year ended December 31, 2021. Total mobile revenues and revenues from stand-alone services for the year ended December 31, 2022 each remained stable compared to the year ended December 31, 2021. Total fixed revenue for the year ended December 31, 2022 increased by €27 million or 0.8% compared to the year ended December 31, 2021. Revenue from services grew by 3.4%, mainly driven by the increase in revenues from ICT services.

Wholesale National Market: The Wholesale National Market segment revenue for the year ended December 31, 2022 reached €1,948 million, a decrease of €159 million or 7.6% compared to the year ended December 31, 2021. This decrease was mainly driven by non-recurring transactions in the year ended December 31, 2021.

Wholesale International Market: Wholesale International Market revenue for the year ended December 31, 2022 amounted to €992 million, a decrease of €16 million or 1.6% compared to the year ended December 31, 2021, mainly due to the decrease in one-off events, partially offset by a growth in recurring data revenues (with high margins) and flanked by the TIM Group's strategy to rationalize voice revenue.

Other & Eliminations: Other & Eliminations revenue for the year ended December 31, 2022 amounted to €38 million compared to €10 million the year ended December 31, 2021, a decrease of €28 million compared to the year ended December 31, 2021.

Brazil Business Unit

For the year ended December 31, 2022, the TIM Group's Brazil Business Unit generated revenue of €3,963 million, an increase of €1,123 million compared to €2,840 million for the year ended December 31, 2021. Excluding revenues from the mobile business of the Oi Group (Cozani, acquired on April 20, 2022), revenue for the year ended December 31, 2022 would have amounted to €3,816 million.

The increase has been primarily due to service revenues that for the year ended December 31, 2022 amounted to €3,828 million, an increase of 19% compared to €3,216 million for the year ended December 31, 2021, with mobile service revenues growing 19.8%. This performance is mainly related to the continuous recovery of the pre-paid and post-paid segments. Revenue from fixed services for the year ended December 31, 2022 grew by 7.6% compared to the year ended December 31, 2021, due in large part to the growth rate of TIM Live.

Revenue from product sales for the year ended December 31, 2022 amounted to €129 million compared to €88 million for the year ended December 31, 2021.

Other Income

For the year ended December 31, 2022, other income decreased to €213 million from €272 million for the year ended December 31, 2021. This decrease was primarily due to the decrease in special training income of €66 million which, in the year ended December 31, 2021, included repayments valued for the hours of training delivered during the year.

Acquisition of Goods and Services

For the year ended December 31, 2022, acquisition of goods and services amounted to €7,239 million, compared to €6,550 million for the year ended December 31, 2021. This is comprised of increases in the Brazil Business Unit of €525 million (including an exchange gain of €175 million) and in the Domestic Business Unit of €163 million, in each case compared to the year ended December 31, 2021.

Employee Benefits Expenses

For the year ended December 31, 2022, the employee benefits expenses amounted to €3,180 million compared to €2,941 million for the year ended December 31, 2021. The increase of €239 million was mainly driven by expenses linked to outgoing managerial and non-managerial staff, greater costs associated with exchange rate fluctuations, the local salary dynamics of the Brazil Business Unit, partially offset by reductions in ordinary employee expenses, mainly due to the savings associated with the reduction in the average salaried employees.

Other Operating Expenses

For the year ended December 31, 2022, other operating expenses decreased to €816 million, from €1,502 million for the year ended December 31, 2021. The reduction is mainly attributable to the Domestic Business Unit, in which other operating expenses decreased by €767 million, partly offset by the increase in costs relating to the Brazil Business Unit of €85 million, including a positive exchange effect for €48 million.

The non-recurring items for the year ended December 31, 2022 amounted to €77 million, mainly due to provisions for disputes, transactions, regulatory sanctions and related potential liabilities.

In the year ended December 31, 2021, non-recurring items amounted to €735 million and mainly related to provisions made for disputes, transactions, regulatory sanctions and related potential liabilities as well as expenses connected with the COVID-19 pandemic and provisions made as a consequence of the worsening of expected credit losses of corporate customers, connected with the expected evolution of the pandemic.

Internally Generated Assets

For the year ended December 31, 2022, internally generated assets increased to €559 million, from €475 million for the year ended December 31, 2021, primarily due to increased capitalization of labor costs relating to design, construction and testing of network infrastructure and systems, as well as software development and development of network solutions, applications and innovative services.

EBITDA

For the year ended December 31, 2022, the TIM Group's EBITDA amounted to €5,347 million, a 5.3% increase compared to €5,080 million for the year ended December 31, 2021. Excluding the results of the Oi Group mobile business acquired in Brazil, consolidated EBITDA for the year ended December 31, 2022 would amount to €5,238

million. EBITDA for the year ended December 31, 2022 was impacted by non-recurring items in the amount of €682 million, whilst for the year ended December 31, 2021, the total impact of €1,144 million primarily comprised non-recurring items, of which €26 million related to the COVID-19 pandemic in Italy.

The table below sets forth the TIM Group's EBITDA by business unit for the year ended December 31, 2022 and the year ended December 31, 2021, respectively:

	For the year ended December 31,	
(€m)	**2022**	**2021**
Domestic	3,519	3,730
% of Revenues	*29.7*	*29.8*
Brazil	1,839	1,362
% of Revenues	*46.4*	*48.0*
Other Operations	(12)	(12)
Adjustments and eliminations	*1*	—
Consolidated Total	**5,347**	**5,080**

Domestic Business Unit

EBITDA generated by the Domestic Business Unit for the year ended December 31, 2022 amounted to €3,519 million, a decrease of €211 million or 5.7% for the year ended December 31, 2021.

Brazil Business Unit

EBITDA attributable to the Brazil Business Unit for the year ended December 31, 2022 was €1,839 million, a 35.0% increase compared to €1,362 million for the year ended December 31, 2021. For the year ended December 31, 2022, EBITDA reflected non-recurring charges of €24 million, mainly related to the development of non-recurring projects and the corporate reorganization processes.

Depreciation and Amortization

For the year ended December 31, 2022, depreciation and amortization amounted to €4,777 million, compared to €4,490 million for the year ended December 31, 2021, primarily impacted by an increase in the amortization of rights of use assets in the year ended December 31, 2022.

Impairment reversals (losses) on non-current assets

For the year ended December 31, 2022, impairment reversals (losses) on non-current assets amounted to nil, compared to negative €4,120 million for the year ended December 31, 2021, which related primarily to goodwill impairment loss attributed to the Domestic Business Unit.

Operating profit (loss) (EBIT)

For the year ended December 31, 2022, Operating profit (loss) (EBIT) amounted to €606 million compared to negative €3,529 million for the year ended December 31, 2021.

Share of losses (profits) of associates and joint ventures accounted for using the equity method

Share of losses (profits) of associates and joint ventures accounted for using the equity method decreased to €23 million for the year ended December 31, 2022, from €38 million for the year ended December 31, 2021.

Other income (expenses) from investments

For the year ended December 31, 2022, other income (expenses) from investments amounted to €206 million compared to €126 million for the year ended December 31, 2021, mainly due to (i) a net capital gain of €171 million connected with the August 2022 sale of 41% of the share capital of the holding company Daphne 3, which holds a

30.2% share in INWIT; and (ii) a net capital gain of €33 million connected with the October 2022 sale of the equity investment in Satispay.

Finance income and expenses

For the year ended December 31, 2022, finance income (expenses) reflected a net expense of €1,423 million, compared to €1,150 million for the year ended December 31, 2021. The increase was due to the increased debt exposure of the IFRS 16 lease component in Brazil following the acquisition of Oi and, to a lesser extent, due to interest rate dynamics in Europe.

Income tax expenses

For the year ended December 31, 2022, income tax expense amounted to €2,066 million, compared to €3,885 million for the year ended December 31, 2021. This increase mainly reflects the impact of exercising the revocation option of the realignment of goodwill, resolved by the Board on November 9, 2022, as permitted by the Italian government budget law for the year ended December 31, 2022 (i.e. Italian Law No. 234 of December 30, 2021) and as detailed in the Provision of the Revenue Agency Manager, published on September 29, 2022.

Profit (loss) for the year

For the year ended December 31, 2022, loss for the year was €2,654 million compared to loss for the year of €8,400 million for the year ended December 31, 2021. The reasons for this decrease are disclosed in the foregoing sections.

Liquidity and Capital Resources

The TIM Group's principal sources of liquidity are cash flows generated by its operating activities and its sustainability-linked revolving credit facility, for any requirements not covered by the operating cash flow generated. As of December 31, 2023, the TIM Group's liquidity margin amounted to €8,965 million, comprising cash and cash equivalents of €2,912 million and committed but undrawn amounts under the TIM Group's sustainability-linked revolving credit facility of €4,000 million.

The TIM Group's most significant financial obligations are its debt obligations. As of December 31, 2023, the TIM Group's consolidated gross financial debt was €32,636 million.

Provided below is an overview of the TIM Group's outstanding debt securities as of December 31, 2023:

Issuer	Currency	Aggregate Principal Amount	Coupon / Margin	Maturity Date
TIM S.p.A[(1)].	Euro	450	3.625%	January 19, 2024

Current financial liabilities	1,377	—	—	—	—	1,377
Total	**5,977**	**3,912**	**4,136**	**2,430**	**5,725**	**30,943**

Selected Consolidated Cash Flow Data

The table below sets forth the selected consolidated cash flow data for the years ended December 31, 2023, 2022 and 2021, respectively:

	For the year ended December 31,		
Net Cash Flows (€m)	**2023**	**2022**	**2021**
Cash flows from (used in) operating activities	3,944	4,895	4,336
Cash flows from (used in) investing activities	(4,149)	(5,335)	(5,117)
Cash flows from (used in) financing activities	(456)	(2,869)	3,164
Cash flows from (used in) Discontinued operations/Non-current assets held for sale	-	-	-
Aggregate cash flows	**(661)**	**(3,309)**	**2,383**
Net cash and cash equivalents at beginning of the period	3,555	6,904	4,508
Net cash and cash equivalents at end of the period	**2,912**	**3,555**	**6,904**

Year Ended December 31, 2023 compared to the Year Ended December 31, 2022

For the year ended December 31, 2023, the TIM Group recorded net cash and cash equivalents at the end of the period of €2,912 million, compared to €3,555 million for the year ended December 31, 2022.

Cash flows from (used in) operating activities:

Cash flows from (used in) operating activities decreased to €3,944 million for the year ended December 31, 2023 compared to €4,895 million for the year ended December 31, 2022, primarily due to a decrease in change in employee benefit funds, which amounted to negative €291 million for the year ended December 31, 2023 compared to positive €156 million for the year ended December 31, 2022.

Cash flows from (used in) investing activities:

Cash flows from (used in) investing activities decreased for the year ended December 31, 2023, amounting to negative €4,149 million, compared to negative €5,335 million for the year ended December 31, 2022 mainly due to a decrease in change in financial receivables and other financial assets (excluding active hedging and non-hedging derivatives).

Cash flows from (used in) financing activities:

Cash flows from (used in) financing activities decreased to negative €456 million for the year ended December 31, 2023, compared to cash flows from financing activities of negative €2,869 million for the year ended December 31, 2022, primarily as a result of an increase in incurrence of non-current financial liabilities (including current portion).

Year Ended December 31, 2022 compared to the Year Ended December 31, 2021

For the year ended December 31, 2022, the TIM Group recorded net cash and cash equivalents at the end of the period of €3,555 million, compared to €6,904 million for the year ended December 31, 2021.

Cash flows from (used in) operating activities:

Cash flows from (used in) operating activities increased to €4,895 million for the year ended December 31, 2022 compared to €4,336 million for the year ended December 31, 2021, primarily due to an improvement in losses from continuing operations, which amounted to negative €2,654 million for the year ended December 31, 2022 compared to negative €8,400 million for the year ended December 31, 2021.

Cash flows from (used in) investing activities:

Cash flows from (used in) investing activities was flat for the year ended December 31, 2022, amounting to negative €5,335 million, compared to negative €5,117 million for the year ended December 31, 2021. For the year ended December 31, 2022, greater purchases of assets on a cash basis and acquisition of control of companies and other businesses, net of cash acquired (negative €6,305 million and negative €1,316 million, respectively, for the year ended December 31, 2022) were offset by cash flows from proceeds from sales of subsidiaries or other businesses of €1,278 million.

Cash flows from (used in) financing activities:

Cash flows used in financing activities decreased to negative €2,869 million for the year ended December 31, 2022, compared to cash flows from financing activities of €3,164 million for the year ended December 31, 2021, primarily as a result of a decline in proceeds from non-current financial liabilities year on year, combined with higher repayments of non-current financial liabilities.

Capital Expenditures and Expenses for Mobile Telephone Licenses/Spectrum

The table below sets forth the capital expenditures and expenses for mobile telephone licenses/spectrum by operating segment for the years ended December 31, 2023, 2022 and 2021, respectively:

	For the year ended December 31		
(€m)	**2023**	**2022**	**2021**
Domestic	3,148	3,207	3,377
Brazil	834	870	1,253
Other Operations	—	—	—
Adjustments and eliminations	—	—	—
Consolidated Total	**3,982**	**4,077**	**4,630**
% of Revenues	24.4	25.8	30.2

Year Ended December 31, 2023 compared to the Year Ended December 31, 2022

Capital expenditures and expenses for mobile telephone licenses/spectrum for the year ended December 31, 2023, amounted to €3,982 million compared to €4,077 million for the year ended December 31, 2022.

Domestic Business Unit

For the year ended December 31, 2023, the Domestic Business Unit's capital expenditures and expenses for mobile telephone licenses/spectrum decreased to €3,148 million, from to €3,207 million for the year ended December 31, 2022, mainly due to the completion by Noovle during 2022 of the regions associated with the partnership with Google.

Brazil Business Unit

For the year ended December 31, 2023, the Brazil Business Unit's capital expenditures and expenses for mobile telephone licenses/spectrum decreased to €834 million, from €870 million for the year ended December 31, 2022. Excluding the impact due to exchange rate fluctuations in an amount of more than €6 million, capital expenditures decreased by €42 million compared to the 2022. The reduction was due to lower investments associated with the integration of the Oi group's activities and the 4G network, but partially offset by the acceleration of investments in 5G technology and the continuous expansion of FTTH-UltraFibra technology.

Year Ended December 31, 2022 compared to the Year Ended December 31, 2021

Capital expenditures and expenses for mobile telephone licenses/spectrum for the year ended December 31, 2022, were €4,077 million compared to €4,630 million for the year ended December 31, 2021.

Domestic Business Unit

For the year ended December 31, 2022, the Domestic Business Unit's capital expenditures and expenses for mobile telephone licenses/spectrum decreased to €3,207 million, from to €3,377 million for the year ended December 31, 2021, mainly due to streamlining and prioritization of spending. A significant portion of capital expenditures and expenses for mobile telephone licenses/spectrum for the year ended December 31, 2022 was intended for the development of FTTC/FTTH networks (including €80 million for the acquisition of telecommunications licenses).

Brazil Business Unit

For the year ended December 31, 2022, the Brazil Business Unit's capital expenditures and expenses for mobile telephone licenses/spectrum decreased to €870 million, from €1,253 million for the year ended December 31, 2021. Excluding the impact of changes in exchange rates in an amount of €211 million, for the year ended December 31, 2022, capital expenditures and expenses for mobile telephone licenses/spectrum decreased by €594 million. More specifically, capital expenditures and expenses for mobile telephone licenses/spectrum for the year ended December 31, 2021 included the acquisition of frequencies for 5G services in an amount of €564 million. Technological investments represented 91% of total capital expenditures and expenses for mobile telephone licenses/spectrum and were mainly driven by the TIM Group's goal to achieve complete mobile broadband of Brazilian municipalities, the significant coverage of capitals with new 5G SA technology and the completion of Oi infrastructure integration. Besides mobile core business expansion, the TIM Group continued to develop the Ultrabroadband residential business with FTTH technology (UltraFibre).

Off Balance Sheet Arrangements

The TIM Group is not party to any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on its financial condition, changes in financial condition, revenue or expenses, results of operations, liquidity, capital expenditure or capital resources, other than as disclosed herein or in the notes to the TIM Audited Consolidated Financial Statements.

Post-Balance Sheet Date Events

For a description of material post-balance sheet date events, see "*Summary—Recent Developments*" included elsewhere in this Exchange Offer Memorandum.

Quantitative and Qualitative Disclosures about Market Risk

The TIM Group is exposed to market risks relating to fluctuations in interest rates and exchange rates in the markets in which it operates or have bond issues, mainly in Europe, the United States, United Kingdom and Latin America.

Credit Risk

The TIM Group does not have significant concentrations of credit risk. Credit risk of the TIM Group consists of possible losses that could arise from the failure of either commercial or financial counterparties to fulfil their assumed

obligations, due to general economic and financial factors, the potential occurrence of specific insolvency situations of some borrowers and other more strictly technical-commercial or administrative factors.

Provision charges for bad debts are recorded for specific credit positions that have an element of individual risk. For credit positions that do not have such characteristics, provision charges are recorded by customer segment according to the average inability to collect estimated on the basis of statistics.

Liquidity Risk

The TIM Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities by continuously monitoring forecasted and actual cash flows and by matching the maturity profiles of financial assets and liabilities. As the majority of its external debt is issued and managed centrally, the TIM Group has a significant amount of control and visibility over the payments required to satisfy obligations under the various tranches of its existing debt.

Additionally, as of December 31, 2023, the TIM Group had access to its sustainability-linked revolving credit facility, which provides for borrowings of up to €4,000 million (which is fully undrawn) to cover any liquidity needs not met by operating cash flow generation. See "—*Liquidity and Capital Resources.*"

Interest Rate and Related Risk

For fixed rate debt, changes in interest rates generally affect the fair value of the debt instrument, but not the TIM Group's earnings or cash flows. Accordingly, interest rate risk and changes in fair market value should not have a significant effect on the fixed rate debt until the TIM Group would be required to refinance such debt at maturity. In addition, the TIM Group is exposed to the interest rate risk on the portion of its consolidated gross debt that is index-linked to floating rates. The decision to maintain a certain debt structure at fixed and floating rates aims at minimizing the negative impact of the interest paid and is partially achieved through the use of derivatives, through which fixed-rate liabilities are synthetically converted into variable-rate instruments. For additional information regarding the rates applicable to the TIM Group's outstanding indebtedness, please see "—*Liquidity and Capital Resources.*"

Foreign Currency Risk

The TIM Group's business is exposed to fluctuations in currency exchange rates. The TIM Group generally hedge its foreign exchange exposure, but usually does not cover the risk of transfer relating to its foreign subsidiaries. Movements in exchange rates of the Euro relative to other currencies (in particular BRL) may adversely affect its consolidated results. A rise in the value of the euro relative to other currencies in certain countries in which the TIM Group operates or has made investments will reduce the relative value of the revenues or assets of its operations in those countries and, therefore, may adversely affect its operating results or financial position. The TIM Group also conduct, and will continue to conduct, transactions in currencies other than its primary transactional currencies, particularly in U.S. dollars. In addition, the TIM Group has raised, and in the future may raise in an increasing proportion, financing in currencies other than the Euro, principally U.S. dollars and BRL. According to the TIM Group's policies, hedging of the exposure in foreign currencies relating to the financial liabilities is mandatory. Indeed, the TIM Group has entered into certain hedging transactions to manage its foreign currency and interest rate risks. These include interest rate swaps ("**IRS**") to reduce interest rate exposure on fixed-rate and variable-rate bank loans and bonds, as well as cross currency and IRS to convert the bonds secured in different foreign currencies to its operational currency. For details regarding the TIM Group's outstanding derivative instruments, see Note 18 (Financial Risk Management) and Note 17 (Derivatives) to the 2023 TIM Audited Consolidated Financial Statements Note 18 (Financial Risk Management) and Note 17 (Derivatives) to the 2022 TIM Audited Consolidated Financial Statements included elsewhere in this Exchange Offer Memorandum.

Critical Accounting Policies, Judgments and Estimates

For details regarding critical accounting policies, judgments and estimates, see Note 2 to each of the 2023 TIM Audited Consolidated Financial Statements and the 2022 TIM Audited Consolidated Financial Statements included elsewhere in this Exchange Offer Memorandum.

Related Party Transactions

Other than as disclosed in this Exchange Offer Memorandum and in the notes to the TIM Audited Consolidated Financial Statements, the TIM Group did not have any material transactions with related parties during the years ended December 31, 2023 and 2022 and 2021. See "*Certain Relationships and Related Party Transactions of the TIM Group.*"

MANAGEMENT'S DISCUSSION AND ANALYSIS OF PRO FORMA CARVE OUT FINANCIAL INFORMATION AND RESULTS OF OPERATIONS OF NETCO

The following discussion and analysis are intended to assist in providing an understanding of NetCo's pro forma carve-out financial condition, changes in financial condition and results of operations and should be read in conjunction with the NetCo Unaudited Combined Pro Forma Carve-out Financial Information and NetCo Audited Combined Carve-out Financial Information prepared in accordance with IFRS. Some of the information in this discussion and analysis includes forward-looking statements that involve risks and uncertainties. See "Forward-Looking Statements" and "Risk Factors" for a discussion of important factors to be evaluated in connection with an investment in the Optics Notes. For a description of NetCo Unaudited Combined Pro Forma Carve-out Financial Information and NetCo Audited Combined Carve-out Financial Information, see "Presentation of Financial and Other Information."

Unless the context otherwise requires, the following discussion and analysis as well as references to the "TIM Group" therein reflect the effects and implications of the Transactions as if they had already occurred. See "Business of NetCo" and "—Basis of Presentation" for further information.

In addition to the conventional financial performance measures established by the IFRS, the TIM Group uses certain alternative performance measures to provide a measure of operating results of NetCo excluding certain items that the TIM Group believes are either outside of its recurring operating activities, or items that are non-cash. Excluding such items enables trends in NetCo's operating results and cash flow generation to be more easily observable. The TIM Group believes that the non-IFRS measures are useful to manage and assess the results of operations, make decisions with respect to investments and allocation of resources and assess the performance of management personnel. Such performance measures are also the de facto metrics used by investors and other members of the financial community to value other companies operating within NetCo's industry, and thus are a basis for comparability between NetCo and its peers. Such non-IFRS measures are not necessarily comparable to similarly titled measures of other companies. Furthermore, non-IFRS measures have limitations as analytical tools and should not be considered in isolation from, or as an alternative to, data prepared in accordance with IFRS. See "Presentation of Financial and Other Information" included elsewhere in this Exchange Offer Memorandum for further details regarding the non-IFRS measures presented in this section.

Basis of Presentation

The pro forma combined income statement of NetCo for the year ended December 31, 2023 and the pro forma combined income statement for the year ended December 31, 2022 have not been audited by outside auditors, consultants or experts and are derived from the NetCo Audited Combined Carve-out Financial Information.

The pro forma combined income statement of NetCo for the year December 31, 2023 was prepared to give effect to the Transactions as if they had been completed on January 1, 2023 and the pro forma combined income statement for the year December 31, 2022 was prepared to give effect to the Transactions as if they had been completed on January 1, 2022.

These pro forma combined income statements of NetCo are based on available information and certain current market-based assumptions that the TIM Group's management believes are reasonable. They are presented for illustrative purposes only and do not purport to represent what the actual results of operations would have been if the events for which the pro forma adjustments had occurred on the dates assumed, nor do they purport to project NetCo's results of operations for any future period or financial condition at any future date. For more information, see "*NetCo Unaudited Combined Pro Forma Carve-out Financial Information*."

Key Factors Affecting NetCo's Results of Operations and their Comparability

NetCo's operations and the operating metrics discussed below have been, and may continue to be, affected by certain key factors as well as certain events and actions. The key factors, among others, affecting the ordinary course of NetCo's business and its results of operations are discussed below.

Development of NetCo's fixed-line network infrastructure

NetCo's business model is capital intensive, requiring significant capital expenditures to develop, maintain, repair, upgrade, protect and replace its existing network. In addition, to remain competitive and meet evolving customer demand, NetCo is required to expand, modernize, and update its fixed-line infrastructure, including activities such as construction, and co-financing of fiber-based network deployment. In the periods under review, NetCo has made significant investments and capital expenditures in building its next-generation fixed-line network infrastructure and remains committed to further developing and future-proofing its network by investing in the latest network technologies.

Italy's topography, population density and lack of cable infrastructure have created ideal conditions for fixed-line network to establish itself. In addition, the market appears to be still underpenetrated in certain areas. See "*NetCo Industry Overview—Overview of the Italian Fixed Broadband market and competitive landscape*." Broadband penetration in Italy is lower than other European Union countries, including France, Germany, and Spain. NetCo's results of operations are affected by the continued development of its infrastructure network, namely: (i) the expansion of its FTTH coverage, particularly in those areas where NetCo has been awarded lots through public tenders and(ii) the development, maintenance, repair, upgrade, protection and replacement of its existing fiber and copper based network to provide seamless connectivity to OAOs.

NetCo monitors and plans the development of infrastructure network across its coverage areas within Italy.

The maintenance and development of NetCo's existing fixed-line network and NetCo's fiber roll out plans affect its results of operations, among others, in the following ways:

- drives revenue growth as the more telecommunication operators and geographic areas NetCo can reach with its broadband and ultrabroadband options, the greater its addressable customer base;

- increases NetCo's operating expenses, particularly related to purchases of materials and devices, maintenance services, independent contractors and other labor costs;

- increases both NetCo's maintenance and growth capital expenditures as well as tangible assets; and

- increases NetCo's current and non-current financial liabilities as certain activities related to development and expansion of its fixed-line network are financed with debt financing arrangements.

NetCo has invested €1,627 million and €1,814 million in capital expenditures for the year ended December 31, 2022 and 2023, respectively.

For further information, please see "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Business Activity and Industry—NetCo's business may be adversely affected if it fails to successfully implement its ultrabroadband fixed-line network strategy and objectives*."

Macroeconomic and Geopolitical Developments

NetCo's operations are subject to macroeconomic and geopolitical risks, particularly in Italy, that are outside of NetCo's control. For example, high levels of inflation or sovereign debt, combined with weak growth and high unemployment, could affect the private and public sector spending on, and investment in, telecommunications products and services, leading to weaker demand for such products and services and an increase in the risk of bad debts, leading to fiscal reforms (including austerity measures), sovereign debt restructurings, currency instability, increased counterparty credit risk, heightened levels of volatility and, potentially, disruptions in the credit and equity markets, as well as other outcomes that might adversely impact NetCo's financial condition. See "*Risk Factors—Risks Related to NetCo—Risks Related to Macroeconomic Conditions Affecting NetCo.*"

For example, NetCo's results of operations in the periods under review have been affected by adverse economic conditions, including as a result of inflationary pressures and increases in interest rates, which have had a negative effect on the overall spending by customers in the telecommunication sector and the demand for NetCo's products

and services in such market. See “*Risk Factors—Risks Related to NetCo—Risks Related to Macroeconomic Conditions Affecting NetCo—The inflationary pressure and rising input and borrowing costs may cause a slowdown in Italy’s employment rate and ultimately in NetCo’s direct customers’ services demand*.”

Small number of customers

NetCo derives a significant portion of its revenue from a limited number of customers, among which includes the TIM Group and other main Italian fixed-line and mobile network operators such as Vodafone, Fastweb, WindTre and Iliad.

NetCo’s results of operations are dependent on these key customers. In particular, demand from these customers may materially affect NetCo’s results of operations. Several factors may affect such demand, including, among others, (i) changes in NetCo’s regulatory framework, (ii) the evolving latency and bandwidth requirements of its key customers and/or (iii) advancements in competing technology (*e.g.*, 5G, LEOS and FWA connectivity). In addition, any major disruption in its business, such as a strike, work stoppage or slowdown or a supply chain problem may affect the quality or reliability of NetCo’s products and services, thereby leading to reduced demand for its products and services and negatively impacting NetCo’s results of operations. Furthermore, any consolidation in NetCo’s customer base may result in pricing pressure, which in turn could negatively contribute to its revenue.

For further information relating to NetCo’s relationships with key customers, see “*Business of NetCo—Material Contracts*,” “*Risk Factors—Risks Related to NetCo—Risks related to NetCo’s Business Activity and Industry—Any deterioration of the financial condition of NetCo’s key customers could adversely affect its results of operations*” and “*Risk Factors—Risks Related to NetCo—Risks related to NetCo’s Business Activity and Industry—Following the successful completion of the Transactions, the TIM Group will become a key customer of NetCo and as such any material deterioration of the TIM Group’s business could negatively affect NetCo’s business, financial condition and results of operations*.”

Regulatory Framework

NetCo’s activities in the fixed telecommunications sector in Italy are governed by a comprehensive and evolving set of rules and regulations at both the European and Italian levels. In addition to general environmental, building, zoning, seismic and fire prevention regulations that apply to NetCo’s infrastructure operations, NetCo must comply with a specific regulatory framework for electronic communication services as established by the European Union and implemented into the Italian legal system. Compliance with this complex regulatory landscape in relation to the vertical integration, has had a significant impact on NetCo’s results of operations prior to the Transactions. For example, applicable cost-orientation obligations have limited NetCo’s discretion in setting prices for certain of its services. See “*NetCo Regulation” and “Risk Factors—Risks Related to NetCo—Risks Related to NetCo’s Business Activity and Industry—To the extent cost-orientation obligations based on the BU-LRIC+ model, as implemented by AGCOM, could be maintained with regard to certain of NetCo’s activities, NetCo’s business, results of operations and financial condition may be adversely affected*.”

Nonetheless, NetCo expects that the consummation of the Transactions will result in certain regulatory reliefs, including the expected recognition as a “wholesale-only” operator. Such recognition is expected to relieve NetCo from cost-orientation pricing constraints, thereby enabling fair and reasonable margins on fiber investments and potentially driving revenue growth. However, it is currently uncertain whether, when and to what extent the relevant authority may grant such recognition.

Ability to win attractive public tenders and to execute them profitably

The Italian regulatory environment is broadly supportive of fiber-based network growth, with the Italian government committed to fostering the expansion of the national telecommunications network infrastructure. This commitment is evidenced by government supports, such as funds made available under the NRRP for “*Italia a 1 Giga*” and “*5G backhauling*” initiatives, aimed at technological advancement within public administration and extending reach to rural areas. See “*NetCo Regulation—The Italian Regulatory Framework—Regulatory levies—Government’s UBB Network State Aid Plans*” and “*Business of NetCo—Business Areas*.”

In the FTTH market, the Italian government typically allocates funds and designates specific zones to a single operator, currently either NetCo or Open Fiber, to guarantee the efficient delivery of services. The allocation of these zones is determined through competitive public tenders. The procurement of such tenders affects NetCo's operating results both in the short and long term. In the short term, NetCo's fiber roll out determines an increase in its overall capital expenditures. However, in the long term, NetCo's results of operations are positively impacted given the ability to generate revenue from the expanded network, benefitting from being the sole operator in the tendered areas. Moreover, the Italian government provides funding to mitigate capital expenditures and other expenses associated with roll out in tendered areas. Conversely, the absence of a tender award precludes NetCo from tapping into these government-allocated funds and, therefore, without these tenders, NetCo faces the inability to expand its network infrastructure in tendered areas, which could lead to a substantial impact on its operating results.

Moreover, when NetCo secures government funding through public tenders, it is obligated to execute its deployment plan in accordance with the specific terms and conditions set forth in the relevant contracts. Non-compliance with these contractual obligations may lead to significant penalties, including the possibility of the government reducing, withholding, or demanding repayment of the awarded funds. Accordingly, NetCo is required to precisely estimate resources and costs when competing in such tenders. Any reduction in NetCo's access to public funds may increase its operational costs. In addition, NetCo may face difficulties in securing alternative financing. This may determine a delay in its roll out plan and affect its operating results. See "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Business Activity and Industry—NetCo's business may be adversely affected if it fails to successfully implement its ultrabroadband fixed-line network strategy and objectives*."

Competition and Pricing

During the periods under review the pricing pressure affecting NetCo's results of operations has primarily come from Open Fiber, however there is no assurance that such pricing pressure may not increase in the future, including from FWA and mobile network operators, thereby materially and further affecting NetCo's results of operations. See "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Business Activity and Industry,*" "*Business of NetCo*" and "*NetCo Industry Overview.*" Given the competitive dynamics and the prevalent macroeconomic environments in Italy, during the periods under review, NetCo has introduced pricing mechanisms for adjusting its product and service offerings to account for increased costs, primarily associated with heightened inflation, in order to reduce pressure on cash costs. For a description of the competitive landscape in the key geographies in which NetCo operates, see "*NetCo Industry Overview.*"

Key Income Statement Items

Revenues

Revenues consists of income generated under the Master Services Agreement, the Transitional Services Agreement and from active equipment sales, delivery of broadband and ultrabroadband network access services to wholesale customers as well as provision of other regulated and non-regulated services (i.e. colocation), including adjustments and eliminations.

Other Income

Other income mainly consists of recovery of employee benefit expenses, purchases and services rendered, capital and operating grants, damages, penalties, estimate revisions and other adjustments, income for special training activities and other income.

Acquisition of Goods and Services

Acquisition and goods services are mainly associated with costs related to (i) network access, such as delivery and assurance costs, (ii) energy and fluids, which comprises utilities costs and (iii) maintenance costs, which includes costs of maintenance of the infrastructure.

Employee Benefit Expenses

Employee benefits and expenses primarily consists of ordinary employee expenses.

Internally Generated Assets

Internally generated assets refer to the capitalization of costs relating to network infrastructure and IT systems, as well as software development and development of network solutions, applications and innovative services.

Operating profit (loss) before depreciation and amortization, capital gains (losses) and impairment reversals (losses) on non-current assets (EBITDA)

EBITDA includes operating profit (loss) before depreciation and amortization, capital gains (losses) and impairment reversals (losses) on non-current assets.

EBITDA is not required by or presented in accordance with IFRS or any other generally accepted accounting standards. The TIM Group believes that this measure is useful to readers of the NetCo Unaudited Combined Pro Forma Carve-out Financial Information as it provides them with a measure of the pro forma operating results which excludes certain items the TIM Group considers outside of NetCo's recurring operating activities, making trends more easily observable and providing information regarding its operating results that allows investors to better identify trends in its financial performance. EBITDA should not be considered as a substitute measure for net income or loss, operating profit, cash flow or other combined income or cash flow data prepared in accordance with IFRS and may not be comparable to similarly titled measures used by other companies. Further, this measure should not be considered as an alternative for operating profit as the effects of depreciation, amortization and impairment excluded from this measure do ultimately affect the operating results, which is also presented within the NetCo Audited Combined Carve-out Financial Information in accordance with IAS 1 (Presentation of Financial Statements).

Depreciation and Amortization, gain (losses) on disposals and impairment reversals (losses) on non-current assets

Depreciation and amortization includes amortization of intangible assets with a finite useful life, depreciation of tangible assets and amortization of rights of use assets.

Impairment reversals (losses) on non-current assets contains impairment reversal and losses on non-current intangible and tangible assets.

Operating profit (loss) (EBIT)

Operating profit (loss) EBIT is calculated to include impairment losses (reversals) on non-current assets, losses (gains) on disposals of non-current assets and depreciation and amortization.

Finance income and expenses

Finance income and expenses are recognized on an accrual basis and include interest income, interest expenses to banks, interest expenses to others, finance expenses on lease liabilities, commissions and other finance expenses.

Income tax expense

Income tax expense includes all taxes calculated on the basis of a tax rate at 24% for IRES and 4.5% for IRAP.

Profit (Loss) for the year

Profit (Loss) for the year includes profit (loss) for the year from continuing operations and discontinued operations/non-current assets held for sale.

Discussion and Analysis of NetCo's Pro Forma Carve-out Results of Operations for the year ended December 31, 2023 compared to the year ended December 31, 2022

The below table sets forth NetCo's pro forma combined income statement for the year ended December 31, 2023 compared to the year ended December 31, 2022.

Pro Forma Combined Income Statement	**For the year ended December 31,**	
	2023	**2022**
(€m)	(unaudited)	
Revenues	**3,977**	**3,858**
Other income	240	244
Acquisition of goods and services	(959)	(961)
Employee benefits expenses	(1,015)	(1,050)
Other operating expenses/Changes in inventories/Internally generated assets	110	117
EBITDA	**2,353**	**2,208**
Depreciation and amortization/Gains (losses) on disposals and impairment reversals (losses) on non-current assets	(1,573)	(1,535)
Operating profit (EBIT)	**780**	**673**
Finance income (expenses), net	(336)	(239)
Profit before tax from continuing operations	**444**	**434**
Income tax expense	(133)	(130)
Profit from continuing operations	**311**	**304**
Profit for the year	**311**	**304**

Revenues

On a pro forma basis for the year ended December 31, 2023, NetCo generated revenues of €3,977 million, a 3.1% increase compared to €3,858 million for the year ended December 31, 2022. This increase in revenues was mainly driven by higher sales to Open Fiber pursuant to certain agreements for White and Grey Areas as well as an increase in average unit prices partially offset by a reduction in quantities.

Acquisition of goods and services

On a pro forma basis for the year ended December 31, 2023, acquisition of goods and services amounted to €959 million, compared to €961 million for the year ended December 31, 2022. This decrease was primarily related to higher procurement costs for materials supporting certain operational activities as partially offset by lower costs for services and performance. As a percentage of revenues acquisition of goods and services decreased from 24.9% for the year ended December 31, 2022 to 24.1% for the year ended December 31, 2023.

Employee benefits expenses

On a pro forma basis for the year ended December 31, 2023, employee benefits expenses amounted to €1,015 million compared to €1,050 million for the year ended December 31, 2022. The decrease of €35 million was mainly driven by the reduction of FTE employees allocated to the perimeter, following the application of measures provided by the Italian Government and carried out over the course of 2023. As a percentage of revenues employee benefits expenses decreased from 27.2% for the year ended December 31, 2023 to 25.5% for the year ended December 31, 2025.

Other operating expenses, changes in inventories and internally generated assets

On a pro forma basis for the year ended December 31, 2023, other operating expenses, changes in inventories and internally generated assets decreased to €110 million, from €117 million for the year ended December 31, 2022. As a percentage of revenues operating expenses, changes in inventories and internally generated assets decreased from 3.0% for the year ended December 31, 2022 to 2.8% for the year ended December 31, 2023.

EBITDA

On a pro forma basis for the year ended December 31, 2023, NetCo's EBITDA amounted to €2,353 million, a 7.1% increase compared to €2,208 million for the year ended December 31, 2022. This increase was mainly driven by the factors described above and, in particular, the increase in revenues.

Depreciation and amortization, gains (losses) on disposals and impairment reversals (losses) on non-current assets

On a pro forma basis for the year ended December 31, 2023, depreciation and amortization, gains (losses) on disposals and impairment reversals (losses) on non-current assets amounted to negative €1,573 million, compared to negative €1,535 million for the year ended December 31, 2022, primarily impacted by an increase in capital expenditures.

Operating profit (EBIT)

On a pro forma basis for the year ended December 31, 2023, operating profit (EBIT) amounted to €780 million compared to €673 million for the year ended December 31, 2022. This increase was mainly driven by the impact on EBITDA from (i) an increase in revenues, primarily related to higher sales to Open Fiber under certain agreements for White and Grey Areas, and (ii) a reduction in employee benefit expenses due to a decrease in full-time equivalents, which was only partially offset by an increase in depreciation and amortization.

Finance income (expenses)

On a pro forma basis for the year ended December 31, 2023, finance income (expenses) reflected a net expense of €336 million, compared to €239 million for the year ended December 31, 2022. This increase was primarily due to the evolution of EURIBOR, which underpins the interest rates applied to the FiberCop Term Loan (the average interest rate for the year 2023 was 5.5%, representing a year-over-year increase of 3%).

Profit before tax continuing operations

On a pro forma basis for the year ended December 31, 2023, profit before tax continuing operations amounted to €444 million compared to €434 million for the year ended December 31, 2022. This increase was mainly due to the factors mentioned above.

Income tax expense

On a pro forma basis for the year ended December 31, 2023, income tax expense amounted to €133 million, compared to €130 million for the year ended December 31, 2022.

Profit from continuing operations

On a pro forma basis for the year ended December 31, 2023, profit from continuing operations amounted to €305 million compared to €304 million for the year ended December 31, 2022.

Profit for the year

On a pro forma basis for the year ended December 31, 2023, profit for the year was €305 million compared to a profit for the year of €304 million for the year ended December 31, 2022, due to the factors described above.

Liquidity and Capital Resources of NetCo and Optics

Pro Forma Operating Free Cash Flow

No pro-forma statement of cash flows has been prepared for the year ended December 31, 2023, as, under the circumstances, it would not provide useful information to investors. The following table provides a reconciliation of NetCo's Pro Forma EBITDA to Pro Forma Operating Free Cash Flow for the periods presented, which is based on NetCo's pro forma statement of financial position as of December 31, 2023, which is included elsewhere in this

Exchange Offer Memorandum, and on NetCo's statement of financial position as of December 31, 2022, derived from certain unaudited management accounts that are not included in this Exchange Offer Memorandum.

(Pro Forma) **(€m)**	**For the year ended December 31, 2023** (unaudited)
EBITDA	**2,353**
Change in inventories	(11)
Change in trade receivables	(60)
Change in trade payables	217
Change other operating assets / liabilities	2
Change in provision	5
Change in provision for employee benefits	(12)
Capital expenditures	(1,814)
Operating Free Cash Flow(*)	**680**
Lease payments	(370)
Operating Free Cash Flow-AL(*)	**310**

(*) This measure is not a measure of financial performance under IFRS or any other generally accepted accounting standard. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation or used as an alternative to other indicators of NetCo's operating performance, cash flows or any other measure of performance derived in accordance with IFRS. See "*Presentation of Financial and Other Information*."

Major variations in the change in working capital are attributed to changes in trade receivables, primarily due to an increase in revenues, and changes in trade payables, primarily due to an increase in capital expenditures.

Liquidity of the Optics Group after the Acquisition Closing Date

Going forward, it is expected that the Optics Group will meet its liquidity needs through cash generated from its operating activities, its €2.0 billion RCF and potential future debt issuances depending on overall market conditions.

As of December 31, 2023, after giving effect to the Transactions, the Optics' Pro Forma Adjusted Net Financial Debt-AL would have been €8,348 million, including (i) €5 billion of Optics Notes (assuming the Initial Exchange is subscribed at the Total Cap amount, with the Optics Notes issued pursuant to the Acquisition Exchange split by equal principal amount across each series of the EUR Optics Notes (€430 million) and each series of the USD Optics Notes ($431 million), respectively (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023) and (ii) €3.5 billion under the Senior Facility Agreement (maturing 60 months after the first utilization date under the Senior Facilities Agreement). If a principal amount of between €4.5 billion and €5.0 billion equivalent (the Total Cap amount) of Original Notes are accepted as part of the Initial Exchange with the Optics Notes issued pursuant to the Acquisition Exchange split by equal principal amount across each series of the EUR Optics Notes (€430 million) and each series of the USD Optics Notes ($431 million) (based on an exchange rate of $1.105 per €1.000 as of December 31, 2023), a drawdown of between €3.5 billion and €4.0 billion under the TLB (dependent on the principal amount of Optics Notes issued pursuant to the Acquisition Exchange). In the event that less than €4.5 billion equivalent principal amount of Original Notes are accepted as part of the Initial Exchange, Optics currently intends to draw amounts under the Bridge Facility Agreement (maturing two years following initial utilization) for each incremental euro or US dollar below €4.5 billion equivalent principal amount of New Notes issued pursuant to the Acquisition Exchange which is required to complete the Acquisition.

See "*Description of Certain Other Financing Arrangements of the Optics Group*." The overall debt maturity profile of Optics will depend on the outcome of the Exchange Offers.

Capital Expenditures

The table below sets forth NetCo's capital expenditures for the years ended December 31, 2023 and 2022, respectively:

(Pro forma)	**For the year ended December 31,**	
(€m)	**2023**	**2022**
	(unaudited)	

Investments in intangible assets	74	128
Investments in property, plant and equipment	1,664	1,438
Investments in right of use assets	76	61
Consolidated Total	**1,814**	**1,627**

For more information see "*NetCo Audited Combined Carve-out Financial Information.*"

NetCo's capital expenditures for the year 2023 include a significant portion aimed at the development of FTTC/FTTH networks. The increase compared to the prior year is particularly due to the projects associated with the NRRP, in detail: capital expenditures for the "Italia1 Giga" project experienced an increase of €330 million, and capital expenditures for "5G Backhauling" initiative saw growth by €85 million. These expansions reflect NetCo's commitment to enhancing digital infrastructure and connectivity across Italy.

Off Balance Sheet Arrangements

As of December 31, 2023, NetCo had provided personal guarantees to certain suppliers of Telenergia and received third-party guarantees mainly relating to Telenergia's contractual obligations towards its suppliers and insurance guarantees and performance bonds associated with the NRRP tenders. New insurance guarantees and performance bonds related to the NRRP tenders may be required if the NRRP advance payments received by TIM at the end of 2023 are later transferred to NetCo (from either TIM or Infratel). For further information, please see "*NetCo Audited Combined Carve-out Financial Information—Other information*" and "*Risk Factors—Risks related to the TIM Group's Financial Information—The pro forma financial information of the TIM Group may not be necessarily representative of the results that the TIM Group would have achieved as a result of the Transactions and may not be a reliable indicator of its future performance.*"

Accounting Policies

The accounting policies adopted in preparing the NetCo Unaudited Combined Pro Forma Carve-out Financial Information are based on the accounting principles applied in the preparation of the TIM Group Audited Consolidated Financial Statements which are in conformity with the IFRS, endorsed by the European Union. See "*Consolidated Financial Statements—NetCo Audited Combined Carve-out Financial Information.*"

BUSINESS OF THE TIM GROUP

This business section includes certain technical terms that are commonly used within the TIM Group's industry. See "Appendix B (Glossary)" for a detailed explanation of these terms. The estimates regarding the TIM Group's market share and relative market share are derived from the TIM Group internal data and certain extrapolations. For more detailed information on the industry in which the TIM Group operates, please see "TIM Group Industry Overview."

The following summary of the TIM Group's business as well as references to the "TIM Group" are as of and for the year ended December 31, 2023. Therefore, unless explicitly stated otherwise or the context otherwise requires, the following summary of the TIM Group's business as well as references to the "TIM Group" do not reflect the effects and implications of the Transactions. See "Summary—The Transactions." This section should be read in conjunction with the TIM Audited Consolidated Financial Statements included elsewhere in this Exchange Offer Memorandum and the notes thereto.

Overview

The TIM Group is one of the leading information and communications technology ("ICT") providers, operating principally in Italy and Brazil. The TIM Group offers mobile and fixed-line telephony products and services to individuals and families for communication and entertainment and digitalization services to small and medium enterprises through a portfolio which is personalized to their needs. As of December 31, 2023, the TIM Group provided 30.1 million mobile lines (including both "human" SIM and Machine to Machine ("M2M")) and 8.0 million fixed-line lines (of which 5.6 million were ultrabroadband) in Italy, and 61.2 million mobile lines in Brazil.

History

The TIM Group, formerly known as Telecom Italia, is a joint-stock company established under Italian law on October 20, 1908.

On July 18, 1997, the predecessor to Telecom Italia was merged with and into Società Finanziaria Telefonica per Azioni ("**STET**"), its parent holding company, with STET as the surviving corporation. As of the effective date of the merger, STET changed its name to "Telecom Italia S.p.A." In November 1997, the Ministry of the Treasury of the Republic of Italy completed the privatization of Telecom Italia, selling substantially all of its stake in the predecessor Telecom Italia Group through a global offering and a private sale to a stable group of shareholders.

In July 1998, as part of the privatization of Telebrás, the Brazilian state-owned telecommunications monopoly, the Federal Government sold substantially all its shares of the twelve holding companies into which Telebrás had initially been broken up. After a series of corporate reorganizations, mergers, acquisitions and name changes, the majority of share capital is currently held, directly and indirectly, by Telecom Italia through its indirectly wholly owned subsidiary, TIM Brasil Serviços e Participações S.A., formed in 2002 as the holding company of Telecom Italia's operating companies in Brazil.

On May 21, 1999, Olivetti obtained control of the predecessor Telecom Italia Group through a tender offer where approximately 52.12% of predecessor Telecom Italia Ordinary Shares were tendered to Olivetti.

On August 4, 2003, the predecessor Telecom Italia merged with and into Olivetti. Olivetti, as the surviving company, changed its name to "Telecom Italia S.p.A."

In 2003, the TIM Group launched its 3G mobile network in Italy, becoming one of the first telecommunications companies in Europe to offer such technology at that time. The launch helped to establish the TIM Group as an innovative leader in the telecommunications industry. On June 30, 2005, Telecom Italia Mobile, a leading mobile telecommunications provider in Italy, merged with and into TIM. The acquisition further strengthened the TIM Group's position in the Italian market, enabling it to offer customers a comprehensive range of telecommunications services.

On November 6, 2023, TIM entered into the Transaction Agreement for the sale of the NetCo Business to Optics. See "—*The Transaction*" for further information.

TIM Group Operations

The TIM Group's business comprises three business units: the Domestic Business Unit, which primarily includes its operations in Italy, the Brazil Business Unit and the Other Operations Business Unit, which includes ancillary operations of the TIM Group (including financial operations). See "*—TIM Group Business Units*" for further information.

Italy

In Italy, the TIM Group offers full-service solutions (including mobile voice, landline voice and fixed broadband), leveraging its own and third party operators' fixed and mobile infrastructure. As of September 30, 2023, the TIM Group held a leading position in Italy across both the fixed broadband and mobile (total SIM) retail markets, with market shares of approximately 40.2% and approximately 27.9%, respectively by number of lines (Source: AGCOM (Communication market monitoring system No. 4/2023)). As of December 31, 2023, the TIM Group's 4G mobile network covered approximately 99% of the population in Italy.

The TIM Group's service offerings include broadband speeds of up to ten gigabytes per second ("**Gbps**"), fully flexible television packages, including streaming services and a wide range of mobile data packages, with speeds of up to 2 Gbps on 5G networks. In 2022, the TIM Group completed the phase-out of its 3G network in Italy, enabling the TIM Group to focus on its ongoing investments in 4G and 5G technologies, which the TIM Group believes are more energy efficient and higher performing in terms of the quality of service offered to its customers. Additionally, as of December 31, 2023, the TIM Group provided approximately 7.2 million fixed line broadband retail accesses in Italy. Further, as of December 31, 2023, the TIM Group also provided approximately 30.1 million mobile lines (including both "human" SIM and M2M) in Italy. The TIM Group also holds the 3.6-3.8 GHz spectrum band and believes that it is well positioned to satisfy the market demand for LTE and 5G services. The TIM Group's 5G spectrum rights, acquired at auction in 2018, will expire in 2037.

In Italy, the TIM Group manages 16 data centers in eight cities (within 50,000 sqm if system rooms and approximately 58 MW available IT power) to guarantee the maximum levels of operation, security and energy efficiency as further certified by highest rankings in industry standards and certifications.

The resilience and sustainability of the TIM Group amidst macroeconomic events and geopolitical uncertainty has been demonstrated, particularly, in light of the COVID-19 pandemic and the Ukraine-Russia conflict. In particular, the TIM Group routinely establishes initiatives in support and in the wake of worldwide crises. In light of the declaration of the state of emergency of the Italian government, resolved by the Italian Council of Ministries on February 28, 2022, aimed at assuring, through to December 31, 2022, aid and assistance to the Ukrainian population on national territory, the TIM Group, among other operators, voluntarily started major solidarity initiatives in support, in particular, of its Ukrainian customers living in Italy, to allow them to communicate free of charge or at special prices with their family members in Ukraine. With the support of the European Commission, on April 8, 2022, TIM also signed a joint declaration, together with other EU and Ukraine operators to provide affordable or zero-rated roaming and international call services between the EU and Ukraine. The joint declaration seeks to provide a more stable context in which to help the Ukrainian evacuees throughout Europe to stay in contact with friends and family.

Brazil

In Brazil, the TIM Group offers mobile voice and data services, broadband Internet access, value-added services and other telecommunications services and products. The TIM Group believes that it is one of the main players and a leader in 5G coverage in the South American communications market, the TIM Group being the only operator in all the Brazilian municipalities. In 2021, the TIM Group completed the phase-out of its 2G network in Brazil. According to ANATEL, as of November 30, 2023, the TIM Group held 24% market share of the Brazilian mobile telecommunications market and approximately 3% market share of the Brazilian fixed-line market. As of December 31, 2023, the TIM Group provided 61.2 million mobile lines in Brazil and its mobile network covered areas in which approximately 99% of the Brazilian urban population lives and works.

Following the acquisition by the TIM Group of Oi Movel S.A. ("**Oi**"), which completed in 2022, the TIM Group has the capacity to leverage the additional infrastructure and spectrum from Oi, together with the opportunity to exchange

4G into 5G investments and to accelerate the migration from FTTC to FTTH to drive network quality in Brazil. As a result of this acquisition, the TIM Group believes that it will have improved scale and new revenue generation opportunities, higher efficiency due to additional spectrum and opportunities to capture value from infrastructure overlap. The TIM Group, with the acquisition of Oi, became the leading player among Brazilian competitors in terms of cities covered, population served and spectrum per client. The TIM Brazilian mobile market share, as of December 31, 2023, was 24%.

TIM Group Operations as a Result of the Implementation of the Delayering Plan

As part of the Delayering Plan, the TIM Group is currently planning the reorganization of its business, which will account for the contribution of the NetCo Business to FiberCop and the sale of TIM's stake in FiberCop and it is expected that the TIM Group will continue to pursue its focused strategy. In line with the Delayering Plan, the resulting business is expected to be classified around three business areas: TIM Enterprise, TIM Consumer and TIM Brasil. The TIM Group believes these new future business areas will more accurately represent the TIM Group's horizontal structure following the successful completion of the Transactions. For a detailed description of the TIM Group's planned new business reshaping, please see "*—The TIM Group's Strategy—Delayering Plan—The new business areas set forth under the Delayering Plan: TIM Enterprise, TIM Consumer and TIM Brasil*."

The TIM Group's Key Strengths

The TIM Group believes that it benefits from the following competitive strengths, some of which will be further strengthened by the successful completion of the Transactions and the implementation of the Delayering Plan:

The TIM Group is a leading player in the Italian telecommunications market and benefits from an improving domestic market environment across the different business units after years of challenging market conditions.

The TIM Group is a leading player in the Italian fixed and mobile retail services and mobile wholesale markets.

While the Italian telecommunications market (in both the fixed and mobile retail segments) has experienced some price pressure as a result of years of competitive tension, due to the elevated number of operators, the mobile and fixed retail markets are now showing clearer signs of market rationality. This translates into lower churn rates and offers opportunities to upsell customers with "more for more" propositions. See "*—Strong and resilient profitability profile with demonstrated resilience and upside potential underpinned by ongoing cost saving initiatives and improving market trends*." Moreover, the telecommunications industry has proven to be resilient and essential for companies and consumers during the COVID-19 pandemic, as the industry has facilitated valuable activities such as remote working, e-schooling and virtual entertainment.

The Italian broadband market is still underpenetrated and, accordingly, it shows room for further growth. Due to lack of cable infrastructure and difficult morphology, as of December 31, 2023, Very High Capacity Network ("**VHCN**") coverage in Italy was approximately 54% compared to approximately 73% in the European Union, according to the Digital Decade Country Report 2023, issued by the European Commission. This trend suggests that Italy may offer opportunities for further network deployment, particularly fiber roll-out. Following the successful completion of the Transactions, the TIM Group is expected to benefit from this trend in two significant ways. First, through the Master Services Agreement, the TIM Group will have access to NetCo's future deployed fiber network benefitting from the extended duration of the Master Services Agreement. Secondly, by externalizing the NetCo Business and its potential coverage growth, the TIM Group is expected to benefit from a decrease in capital expenditures and a corresponding reduction in associated risks.

In the consumer segment, the TIM Group believes that the main drivers of data traffic growth include trends such as the growing use of streaming platforms, online shopping, online banking applications, video-on-demand as well as gaming and video activities. The growing adoption of these new applications was boosted by social distancing measures implemented during the COVID-19 lockdowns and the ensuing changes in work and life habits.

In the enterprise segment (which mainly focuses on large enterprises and public administration), relevant drivers for data traffic growth include cloud services, IoT, business continuity and security.

On the back of these long-term trends, data consumption in Italy is expected to continue growing, driven primarily by broadband connectivity usage. As reported by AGCOM, as of September 30, 2023, fixed and mobile data traffic had almost doubled and tripled, respectively, in three years.

The TIM Group also competes in IT services, which, even if such market has been consistently growing in the last years, has historically been, and remains, underpenetrated compared to equivalent markets in other European countries. In the year ended December 31, 2023, the business spending for IT and connectivity services in the Italian market addressable by the enterprise segment was as follows: (i) approximately €3.6 billion (for which the TIM Group addresses approximately 30% of the spending in the serviceable market) spent on IoT, (ii) approximately €4.7 billion (for which the TIM Group addresses approximately 60% of the spending in the serviceable market) spent on cloud services, (iii) approximately €1.8 billion (for which the TIM Group addresses approximately 60% of the spending in the serviceable market) spent on security services; (iv) approximately €2.3 billion (for which the TIM Group approximately 70% of the spending in the serviceable market) spent on traditional connectivity services and (v) approximately €13 billion (for which the TIM Group addresses approximately 56% of the spending in the serviceable market) spent on other IT services and products. The increasing penetration of IT services in Italy is expected to accelerate as Italian companies increase their spending on IT services to improve their competitive advantage and keep pace with the global trend towards digitalization. The TIM Group's ability to foster the digitalization of the country has also passed through the development of strategic innovation programs in the territory, in which TIM has acted effectively as an enabler of open innovation and co-innovation models, through participation in technology transfer centers, such as five public-private partnership state funded Competence Centers. Commitment to innovation allowed TIM to be among the few enterprises representing Italy in the €1.2 billion funds IPCEI project on cloud and Edge computing, awarded by the European Commission during 2023.

The Italian IT services markets are characterized by structural market dynamics which work against international competitors, mainly due to cultural and local commercial complexities, such as language, local regulatory constraints in many markets including banking, energy, and healthcare, the importance of local relationships and proximity to customers, which is particularly applicable to public sector companies. As a result, the TIM Group believes that such dynamics favor local players, thus allowing the TIM Group to capitalize on its leading positioning in the IT services market, given its deep knowledge of the domestic market and long-lasting relationships with a wide cross-section of Italian customers and partners. Italian customers have also been shown to prefer IT service suppliers with whom they share a common language, that have extensive operations in Italy and that have an in-depth know-how of the applicable Italian legal and regulatory framework, which the TIM Group believes makes entering the Italian telecommunications markets more challenging for international players. The TIM Group considers that the growth of its underlying enterprise market is mainly driven by strong ongoing digitalization across the Italian public and private sector institutions, with increased IT services spend on, and diversified growth of, new digital enabling technologies such as (i) IoT (which is expected to grow by a CAGR of approximately 9% between 2022 and 2026), (ii) cloud services (which is expected to grow by a CAGR of approximately 17% between 2022 and 2026), (iii) security (which is expected to grow by a CAGR of approximately 11% between 2022 and 2026), and (iv) traditional connectivity services which is expected to grow by a CAGR of approximately 1.4% and 0.7% between 2022 and 2026) and other IT services (which is expected to remain substantially stable between 2022 and 2026).

In response to the COVID-19 pandemic, the European Union put in place a set of measures applicable to all member states in order to help them through the crisis and create a joint platform for economic and social recovery. The national recovery and resilience plan ("**NRRP**") presented by Italy provided for substantial investment and a set of reforms representing approximately €250 billion in total, which will be funded both at EU level and nationally. One of the plan's main objectives is the digital modernization of Italy's communication infrastructure, both in public administration and the country's production system, in order to provide fast connectivity nationwide for individuals, businesses, schools and hospitals. The plan therefore comprises several measures to boost the creation of high-performance networks, notably fiber and 5G as well as satellite technologies, and simplifies the regulatory framework for their rollout. Under the NRRP, the TIM Group has been awarded approximately €2.9 billion (includes the amount awarded to TIM and the temporary business groups led by TIM), which will allow clear opportunities for the TIM Group in the infrastructure development, digitization and innovation fields. In particular, the TIM Group was awarded two lots under the "connected healthcare" initiative (representing approximately 3,100 healthcare facilities) and four lots under the "connected schools" initiative (representing approximately 5,900 schools). For more information, see "*Regulation of the TIM Group—Regulatory Levies*" and "*Regulation of NetCo—Regulatory Levies.*"

The TIM Group holds a leading market share in Italy in its fixed and mobile retail and enterprise sectors.

The TIM Group benefits from an established leading position across the fixed retail Italian sectors (including voice and fixed broadband) with a 40.2% market share as compared to 15.9%, 14.0%, 13.8% and 3.7% for the next four competitors and 11.4% for the remaining players, as of September 30, 2023. In the mobile market in Italy (including mobile voice and mobile broadband, and including both "human" SIM and M2M), the TIM Group benefitted from a 27.9% market share as compared to 27.2%, 23.7%, 9.7% and 4.1% for the next four competitors and 7.5% for the remaining players, as of September 30, 2023 (Source: AGCOM Communication market monitoring system No. 4/2023). The TIM Group's service offering is a best in class offering with broadband speeds of up to 10 Gbps, fully flexible TV packages including streaming services, and a wide range of data packages available in mobile, with speeds of up to 2 Gbps on 5G.

The TIM Group is an ICT player in Italy and benefits from an established position in the Italian IT services market for large enterprise and is uniquely positioned in the public administration segment through the Domestic Enterprise organization and an ICT value proposition based on multiple lines of business (i.e. fixed, mobile, cloud, cyber security, IoT and professional services). The TIM Group is one of the leading ICT providers for large enterprises, serving approximately 33,000 customers. Moreover, the TIM Group holds 47% market share in connectivity services for the large enterprise market (i.e. services needed to provide connections, or unique, active service access points, to the network). This includes voice services and data services as well as M2B network access and human access. A single subscriber may operate several different connections and multiple connections may be associated with one subscriber or one device. The TIM Group also benefits from approximately 8% market share in IT services (i.e. application of business and technical expertise to enable organizations to create, manage and optimize, or access, information and business processes). The IT services market can be segmented by the type of skills that are employed to deliver the service (such as the design, building and operation of services).

The TIM Group is also a leader and has a unique position in the provision of services for public administration, with approximately 25,000 clients and a consolidated market share with respect to connectivity services and IT services in Italy as of December 31, 2023. Consolidating itself as a pioneer company in the country's digital transformation process, the TIM Group has taken on a key role in the implementation of the NRRP, with particular reference to the National Strategic Hub works to which more than 300 public administrations have already adhered, thus representing a fundamental axis in the national strategy for the digitization of the Italian public administration sustained by approximately €2 billion NRRP Mission 1 funds. Moreover, the TIM Group has started the deployment of LTE Public safety mobile services which was awarded to TIM by the Italian Public Security Department in 2022.

The IT service market is characterized by a relatively high compound market share captured by many local players, mainly due to cultural and local commercial complexities, such as language, local regulatory and privacy constraints in most industries (including banking, energy and healthcare) as well as the importance of local relationships and proximity to customers. The TIM Group is one of the largest local players in this highly fragmented market, in which it believes scale increasingly matters, and the TIM Group is able to capitalize on its position as a leading ICT provider to large customers and the public administration segment due to the trust that it has built with, and its proximity to, such customers and its ability to offer converged end-to-end solutions. The TIM Group believes that due to a trend among its customers to reduce operational complexity, compounded by increasing internal ICT skills shortages, by consolidating key partners for telecommunication and data services, cloud, IoT and security, a natural convergence will occur. Accelerated by NRRP, the growth in IT services spend is also driven by the increasingly mission-critical nature of IT Services in business operations which the TIM Group expects to result in IT Services spend in Italy becoming more recurring and resilient in the face of future market downturns and less correlated to macroeconomic trends.

Following the successful implementation of the Delayering Plan, the TIM Group is expected to further capitalize on its leading positions across its served markets through a highly resilient business model partly due to its ability to offer full-service solutions (including mobile voice, landline voice and fixed broadband) and leverage its own mobile infrastructure, the portion of fixed-line infrastructure which is not included in the NetCo's Business and NetCo's fixed-line infrastructure through the Master Services Agreement. See "*—Summary—The Transactions—Master Services Agreement*" for further information.

The TIM Group has a set of valuable assets, from a top brand, to unique telecommunications and IT infrastructure and know-how and is a dedicated customer service provider.

The TIM Group leads its competitors across a number of key attributes, including its valuable assets, all equipment and infrastructure components and know-how, comprising its extensive and reliable mobile network with one of the largest spectrum portfolios in Italy, all supported by its top brand and dedicated customer service functions.

Top Brand and Know-How

The TIM Group benefits from strong brand recognition in the telecommunications industry in Italy, with a brand awareness of approximately 65% and a top-of-mind awareness, to June 2023, at approximately 43% among a consumer target population representative of the broader Italian population according to MPS Research – Brand Image & Reputation Study – June Report. The TIM Group's leading market positions in Italy in fixed and mobile retail and mobile wholesale markets further underscore the strength of its brands among Italian consumers. The TIM Group is also well advertised throughout Italy, partnering with popular music events, key personalities and opinion leaders, such as Matteo Berrettini, Danielle Madam, Christian Vieri, Federica Pellegrini, Marcell Jacobs, Iza and Marcos Mion, in order to maintain its brand positioning across different target groups and industries.

The TIM Group's top brand is underpinned by its best-in-class technology and know-how. As a fully convergent player in both the business-to-business and business-to-consumer connectivity and service platform, the TIM Group is expected to leverage its extensive and reliable mobile network as well as its future partnership with NetCo to offer a suite of fixed and mobile line services, including 5G, 4G, TV and games, as well as IT services, including cloud, security, AI and IoT. See "—*The Transactions—Master Services Agreement*."

Telecommunications and IT Infrastructure

The TIM Group benefits from unique telecommunications and IT infrastructure in Italy. As part of the Delayering Plan, the TIM Group will invest in various technology advancement initiatives which are expected to allow it to possess the most distinctive digital and telecommunication infrastructure in Italy. In particular, as of December 31, 2023, the TIM Group has provided 30.1 million mobile lines (including both "human" SIM and Machine to Machine ("**M2M**")) and 8.0 million fixed-line retail lines (of which 5.6 million were ultrabroadband) in Italy, and 61.2 million mobile lines in Brazil.

Furthermore, following the successful implementation of the Delayering Plan, the TIM Enterprise business area will be an infrastructure-based ICT player in Italy in light of its assets base, which spans from telecommunication assets to the largest proprietary data center footprint in the country, with 16 data centers, of which seven were "top tier," as of December 31, 2023. Over recent years, the TIM Group has deployed significant investments and has developed specific expertise in leading technologies and solutions. The TIM Group expects that the TIM Consumer business area will own a proprietary backbone in strategic areas, with a mobile virtual network operator agreement within the consumer segment, which will guarantee participation in tenders requiring a proprietary backbone and a mobile core network and to offer flexibility to match client requirements.

Customer service

The TIM Group is dedicated to customer service and maintaining strong relationships with its loyal customer base. In particular, the TIM Group has invested considerably in recent years to improve its customer service, which has resulted in better customer experiences and reduced churn rates. These improvements reflect the TIM Group's focus on better services and the shift to a more digital customer service model. High customer satisfaction is further underpinned by the TIM Group's extensive customer data, a unique combination of digital and physical channels service and a reliable customer service platform. Specifically, the TIM Group benefits from a loyal customer base, with on average a continued relationship of over 20 years with its top ten clients. These longstanding relationships are underpinned by its end-to-end solutions and experienced employee base who provide deep institutional knowledge. The TIM Group deploys a significant amount of resources to attract, maintain and train its employees, project managers and digital and technology specialists. The TIM Group generally has a low turn-over among its employees and believes that its strong commitment to training, together with its reputation as of one of the leading independent players, will allow it to continue to attract and retain skilled employees.

The TIM Group's cutting-edge mobile infrastructure will be further strengthened by the TIM Group's ongoing future-proofing investment program.

The TIM Group's 5G network is among the fastest in Europe in terms of download speed according to Opensignal. The TIM Group's 5G has reached 2,300 municipalities as of December 31, 2023, with service already available in each of them (in Milan, the TIM Group's 5G has reached over 90% coverage), with capex-efficient deployment benefitting from the sharing of network infrastructure with Vodafone. The TIM Group has provided approximately 30.1 million mobile lines (including both "human" SIM and M2M) in Italy as of December 31, 2023. The TIM Group has also entered the world's top 30 companies for having enabled an improvement in the switch from the 4G to the 5G network in terms of download and upload speeds as well as in the spread of videos and gaming experience. Moreover, as of December 31, 2023, the TIM Group's 4G network covered over 99% across Italy, marking the highest level recorded in Italy. Such extensive coverage has been maintained since 2018, following a steady increase from approximately 88% in 2015, approximately 96% in 2016 and approximately 98% in 2017. With this rapid expansion of 4G network coverage, the TIM Group believes that it is well positioned to satisfy the growing market demand for LTE and 5G services.

Future-proofing Investment Program

While the TIM Group has built a market leading, next-generation mobile infrastructure through significant investments over time, it remains committed to further developing and future-proofing its mobile network with the support of NRRP funds by investing in the latest network technologies. In particular, the TIM Group intends to continue updating and expanding its mobile network, which it expects to significantly expand 5G coverage to approximately 90% across Italy by 2025 in line with its 5G 700 MHz licensing obligations and increase its high-speed mobile data capabilities to over 50% of the population with 3.7 GHz. The TIM Group's 5G expansion is underpinned by its valuable spectrum rights acquired in 2018. In the 2018 multiband spectrum auction, TIM has obtained significant spectrum rights on all available frequencies in the 700 MHz and 3.7 and 26 GHz bands (specifically, 2x10 MHz in 700 MHz, 1x80 MHz in 3.6-3.8 GHz and 1x200 MHz in 26.5-27.5 GHz), further consolidating its leading role in the sector. These 5G spectrum rights expire in 2037. Moreover, in the future, the TIM Group will gradually be able to use its 4G frequencies (including its 800 MHz, 1800 MHz, 2100 MHz and 2400 MHz bands) for 5G.

The TIM Group believes that its investment plans uniquely position it to meet customer demand for high speed services, as well as providing the critical high capacity fiber backhaul services required by mobile operators to meet the growing demand for mobile data services and deliver its primary goal of having the best mobile network for its customers. The TIM Group believes that the growth in data traffic will increase utilization of its mobile network and, given the planned quality and reach of its network, the TIM Group expects this will enable it to further differentiate its network in the medium term. The ongoing investment program benefits from government support under the NRRP for the "5G coverage," connected healthcare and connected schools initiatives.

The Brazil Business Unit benefits from next-generation telecommunication infrastructure, driving strong growth, profitability and cash flow generation.

The TIM Group entered the Brazilian market more than 20 years ago. Through the Brazil Business Unit, the TIM Group offers mobile voice and data services, broadband Internet access, value-added services and other telecommunications services and products in Brazilian market.

The Brazilian telecommunications market offers attractive fundamentals as one of the largest consumer markets with approximately 255 million "human" SIMs and M2M SIMs collectively and, according to Anatel, approximately 47 million fixed lines, as of November 30, 2023. Moreover, the Brazilian telecommunication market is expected to enjoy a cycle of ARPU growth after years of competitive tension due to the consolidation of operators from four to three following the Oi acquisition. The TIM Group believes that it is well positioned to benefit from this growth, underpinned by its acquisition of Oi mobile assets, which completed in 2022. The TIM Group believes that the Brazilian market offers strong growth and expects the Brazil Business Unit to be able to leverage the additional infrastructure and spectrum from Oi, together with the opportunity to exchange 4G into 5G investments and accelerate the migration from FTTC to FTTH to drive network quality in order to outgrow the market.

The Brazil Business Unit benefits from next-generation telecommunication infrastructure distributed throughout Brazil. Its mobile network covers areas in which approximately 99% of the Brazilian urban population lives and works (4G urban population coverage). According to ANATEL, as of November 30, 2023, the Brazil Business Unit had approximately a 24% market share of the Brazilian mobile telecommunications market and approximately 3% market share of the Brazilian fixed-line market. The Brazil Business Unit is one of the most profitable group of companies in the Latin American telecommunications market achieving leadership among its peers.

Strong and resilient profitability profile with demonstrated resilience and upside potential underpinned by ongoing cost saving initiatives and improving market trends.

The TIM Group is a leading and historically profitable company. On the key profitability metric of Organic EBITDA margin, the TIM Group is among the top performers in the Italian market with an Organic EBITDA margin of approximately 39% for the year ended December 31, 2023, slightly better than comparable European peers with an average Organic EBITDA margin of approximately 37%, according to TIM's management's analysis of publicly reported financial statements.

The TIM Group generated an Organic EBITDA-AL of €5,304 million for the year ended December 31, 2023 and €3,450 million for the year ended December 31, 2023, after giving pro forma effect to the Transactions. See "*Summary Historical Consolidated Financial and Other Information and Pro Forma Carve Out Information of the TIM Group*." Moreover, the TIM Consumer and TIM Enterprise business areas, are expected to benefit from structural resiliency in the Italian market, allowing for increased predictability as well as profitability.

The TIM Group believes that its resilient profitability profile is a direct result of its focus on cost optimization and organizational efficiency, which it expects to be further underpinned by the Transformation Plan (as defined below) as well as a prudent capital expenditure policy. Specifically, the TIM Group's Transformation Plan (as defined below) includes long-term targets regarding savings on labor and external operational capital expenditure, expected to be achieved by accelerating digitalization, simplifying the cost structure and labor and cost optimization. See "*—The TIM Group's Strategy—Transformation Plan*" for more details.

In addition to ongoing cost-saving initiatives, the mobile and fixed markets are now showing clearer signs of market rationality on price. The fixed churn rate has been stable, with a monthly average churn rate of 1.1% for the year ended December 31, 2023, in comparison to 1.1% and 1.1% for the year ended December 31, 2022 and December 31, 2021, respectively. The mobile churn, despite price increases, has been contained, with a monthly average churn rate of 1.1% for the year ended December 31, 2023, in comparison to 1.1 and 1.2% for the year ended December 31, 2022 and December 31, 2021, respectively. Additionally, for the year ended December 31, 2023, compared to the year ended December 31, 2022, the TIM Group's net adds improved and consumer fixed ARPU (net of activation fee) increased by 4.1%.

The TIM Group had selectively repriced 4.3 million fixed lines and 2.1 million mobile lines between January and March 2023, which the TIM Group believes would have achieved significant revenue upside for the year ended December 31, 2023, in comparison to year ended December 31, 2022. At the same time, the market has introduced inflation indexed tariffs, further aiding price rationality. Such price rationality translates into lower churn rates and offers opportunities to upsell customers with "more for more" propositions. The TIM Group's "more for more" proposition involves repositioning the customer base for higher value deals by providing them more value in terms of calls, data and content for the price paid.

In relation to wholesale tariff pricing, AGCOM has approved, and the EU Commission has greenlighted, an increase in regulated access prices for 2023 in comparison to 2022, for certain jurisdictions, including Italy, which are applicable retroactively from January 1, 2023.

Highly accomplished management team, committed to deleveraging with proven track record of delivery.

The TIM Group benefits from a highly accomplished and experienced management team, led by its CEO, Pietro Labriola, who was appointed as general manager in November 2021 and then appointed as CEO in January 2022 and brings over 20 years of experience at the TIM Group including as the former CEO of TIM Brasil where he transformed TIM Brasil from a newcomer to a market leader. Under Pietro Labriola's leadership, the Brazil Business Unit has

successfully evolved from a newcomer with an EBITDA margin of approximately 34% as of December 31, 2016, to a market leader with an EBITDA margin of 46% margin for the year ended December 31, 2022. The TIM Group's senior managers also include Adrian Calaza as CFO, Claudio Giovanni Ezio Ongaro as Chief Strategy, Business Development & Wholebuy Officer, Elio Schiavo as Chief Enterprise and Innovative Solutions Officer and Andrea Rossini as Chief Consumer, Small & Medium and Mobile Wholesale Market Officer, who together have strong sector knowledge of the broader telecommunications environment and international experience. See "*Risk Factors—Risks Related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—Any changes in the TIM Group's directorship and/or senior management could adversely affect the TIM Group's business*."

The TIM Group's management team is seasoned in running, acquiring and staffing telecommunications businesses and in navigating consumer markets both in Italy and abroad, and they leverage the expertise they acquired over decades of combined experience at top-tier telecommunications companies such as Telecom Argentina, Wind Telecomunicazioni, Wind Tre, Apple and Vodafone. More importantly, the management team has a strong track record of delivering growth from both organic initiatives and strategic acquisitions and has won and maintained strong stakeholder support while maintaining a strong debt capital structure. This industry-leading management team is supported by a deep bench of divisional managers.

The TIM Group's management brings a strong commitment to deleveraging the group, both organically and through the strategic options created by the Delayering Plan, as discussed under "*—The TIM Group's Strategy—Delayering Plan*." The TIM Group's management has also enacted the Transformation Plan (as defined below) with ambitious cost-cutting targets, and for the year ended December 31, 2023, management has achieved approximately €800 million of savings. See "*—The TIM Group's Strategy—Transformation Plan*" for more details.

The TIM Group's Strategy

The TIM Group's strategy embeds two distinctive features, the Delayering Plan and the Transformation Plan (as defined below), as further described below.

Delayering Plan

The Implementation of the Delayering Plan

On March 3, 2022, the TIM Group conceptually approved a plan to reorganize its business segments with the aim of separating its national fixed-line access network infrastructural assets and shifting from its existing business model to a new more horizontal structure encompassing four business areas, one of which, TIM Brasil, would be dedicated to the Brazilian market. The remaining three areas would be: TIM Enterprise, TIM Consumer and a business area comprising also certain network assets, including the entire mobile network, the national backbone and data centers (the "**Delayering Plan**"). On July 6, 2022, the board of directors of TIM (the "**Board**") approved the Delayering Plan (the "**2022-2024 Industrial Plan**"). On February 14, 2023, and on March 6, 2024 the Board approved the continuation of the Delayering Plan for the periods 2023-2025 (the "**2023-2025 Industrial Plan**") and 2024-2026 (the "**2024-2026 Industrial Plan**"), respectively.

The purpose of the Delayering Plan is both "industrial," which translates into unlocking growth and achieving better operational results and "financial," with a specific attention to efficiencies and funding the investments that will increase the value in the medium to long term, the valorization of long-term assets and debt sustainability. To pursue these objectives, the TIM Group seeks to substantially reduce its net leverage and achieve a long-term sustainable capital structure. The TIM Group's strategy to achieve such goals includes utilizing of cash proceeds from corporate transactions and engaging in deleveraging activities, such as the one contemplated in this Exchange Offer Memorandum. Accordingly, on November 6, 2023, the Board entered into the Transaction Agreement to give effect to the Transactions. See "*—The Transactions*."

In addition, the TIM Group maintains a high degree of flexibility to explore additional cash-in options in order to maximize value for the TIM Group and its stakeholders and believes that it is well equipped to navigate the challenging and volatile market conditions.

The implementation of the Delayering Plan is expected to facilitate each of the new business areas pursuing their own focused strategy

The TIM Group operates in a highly regulated and competitive market. See "*TIM Group Regulation*" and "*TIM Group Industry Overview*" for further information. In particular, the new TIM Consumer, TIM Enterprise and the existing TIM Brasil business area will operate in distinct markets, responding to different competitive dynamics and business trends with tailored strategies. The Delayering Plan is set to facilitate the business reorganization of the TIM Group around such new business areas and the implementation of their focused strategies. Accordingly, such organizational refocusing will allow management to operate on clear and business-specific KPIs to measure success in order to facilitate efficient management and improved capital allocation, in order to shorten the path to yet a more satisfying cash generation.

In particular, the TIM Consumer business area, is expected to follow a more focused path with a goal of increasing the perception of a premium and highly reliable telecommunications operator, seeking to benefit from pricing flexibility and planning to be ready for in-market consolidation opportunities. On the other hand, the TIM Enterprise business area is expected to drive the TIM Group's innovation path, intended to confirm it as a unique integrated ICT provider. The TIM Group, through its TIM Enterprise business area, aims to cater to blue-chip companies and the Italian public sector by offering bespoke B2B solutions and proprietary products.

Although not directly impacted by the Italian delayering strategy, activities in Brazil will continue to leverage the additional infrastructure and spectrum obtained through the Oi acquisition, together with the opportunity to exchange 4G into 5G investments and to accelerate the migration from FTTC to FTTH to drive network quality. Through the Oi acquisition, the TIM Group has improved scale, new revenue generation opportunities, higher efficiency mainly due to additional spectrum and opportunities to capture value from infrastructure overlap.

The Delayering Plan is expected to bring regulatory relief

Following the successful completion of the Transactions, the TIM Group expects to benefit from an easing of its current regulatory obligations. AGCOM is expected to classify NetCo as a wholesale-only operator. However, it is uncertain whether such favorable decision will be adopted by AGCOM. Such a classification, if given, will result in improvements to the regulatory environment for the TIM Group in the Italian market, enabling it to compete on a level playing field with other market participants under applicable competition laws.

In particular, the TIM Group expects that, as a result of the Transactions, its current obligations to offer retail access prices replicable by competitors and to submit new retail offers to AGCOM for prior approval will no longer apply to the TIM Group's future retail offers, thereby allowing it to shape commercial offering on more competitive terms. For additional information, please see "*TIM Group Regulation*." Therefore, the TIM Group believes it is strategically positioned to leverage this prospective regulatory change and to implement its pricing strategies with greater autonomy. Moreover, the discontinuation of AGCOM's *ex ante* approval process is expected to boost the TIM Group's ability to quickly adapt to market demands, leading to a more rapid introduction of new services and promotional activities, effectively enhancing its time to market.

The implementation of the Delayering Plan is expected to bring competitive efficiencies

Following the completion of the Transactions, the TIM Group will transition to a smarter asset model, maintaining direct ownership and control over key infrastructure such as, among others, its mobile network, data centers and IP backbone, while providing fixed-line services to retail customers through wholesale access services from NetCo. Such smart asset model is expected to provide the TIM Group with a strategic flexibility while maintaining access to the required infrastructural asset base.

In the mobile retail market, the TIM Group's key strategic assets (such as, among others, the IP backbone, transport and spectrum coverage), are expected to serve as a significant competitive edge over its main competitors. These assets are fundamental for scaling up 5G services. The IP backbone, in particular, is a critical competitive asset for maintaining performance next-generation mobile network that integrates edge computing and cloud technologies. Additionally, the TIM Group's superior spectrum holdings are key to deliver high-quality service. The synergy of

these assets positions the TIM Group to effectively pursue strategies aimed at enhancing the value of its customer base.

In the fixed retail market, the TIM Group's activities in fixed-line services are expected to be sustained through the strategic divestment of those assets concerning its fixed-line network which are contemplated by the Transactions. This maneuver is complemented by a contractual arrangement with NetCo (i.e. the Master Services Agreement), a draft of which is attached to the Transactions Agreement and will be signed on the Acquisition Closing Date.

In particular, the TIM Group will provide, among others, the following services to NetCo pursuant to the Master Services Agreement: (i) mobile telecommunication services, (ii) hosting arrangements within TIM Group's data centers, (iii) access to the corporate network, (iv) the provisions of IT "business support systems" supporting NetCo's employees activities and (v) the provision of certain service components (such as bandwidth) enabling NetCo to sell aggregated services to the OAOs. On the other hand, NetCo will provide, among others, the following services to the TIM Group: (i) a variety of access services required for the purposes of the transmission of data and voice traffic directed to and/or generated by TIM's end customers, (ii) premium connectivity services such as point-to-point fiber optic connectivity, (iii) network services consisting of engineering services for the purposes of network operations and maintenance, delivery services for the access activation in favor of TIM's end customers and assurance services for solving faults experience by TIM's end customers, (iv) real estate services mainly regarding the use, by TIM, of certain real estate properties leased or subleased by NetCo, (v) energy supply and procurement services (which will be specifically provided by Telenergia) and (vi) other minor services. Accordingly, following the Transactions, the TIM Group is expected to benefit from, among other things, the extended duration of the Master Services Agreement. For further information regarding the Master Services Agreement, please see "*—The Transactions—Master Services Agreement*."

As part of the Delayering Plan, the Transactions will allow the TIM Group to significantly delever

Following the successful completion of the Transactions, the TIM Group is expected to significantly delever. The strategic asset dispositions alongside the successful completion of the Exchange Offers, both as contemplated by the Transactions, are expected to contribute substantially to the reduction in the net leverage of the TIM Group, setting the stage for a new phase of debt sustainability. After giving *pro forma* effect to the Transactions, the TIM Group's Adjusted Net Financial Debt-AL would have decreased by €13,768 million to €6,581 million.

The TIM Group's Adjusted Net Financial Debt-AL and Ratio Adjusted Net Financial Debt-AL to Organic EBITDA-AL were €20.3 billion and approximately 3.8x for the year ended December 31, 2023, respectively.

The TIM Group believes that following the Transactions it will benefit from increased financial flexibility and be able to align its net leverage ratio with best-in-class peers, thereby enhancing its competitive position.

See "*Presentation of Financial and Other Information—TIM Audited Consolidated Financial Statements*" and "*Risk Factors—Risks Related to The TIM Group—Risks Related to the TIM Group's Business Activity and Industry—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective*."

The implementation of the Delayering Plan is expected to allow the TIM Group to have strategic flexibility

The successful implementation of the Delayering Plan is expected to grant the TIM Group enhanced strategic flexibility, enabling it to swiftly pursue growth initiatives, both organic and inorganic, within its new organizational model, including, for example, inorganic growth in ICT services to enterprises in the areas of cybersecurity and artificial intelligence. This strategic adaptability is expected to empower the TIM Group to capitalize on emerging market opportunities, streamline operations and foster innovation across its new and reshaped business. By reorganizing its structure, the TIM Group aims to position itself to respond more effectively to the dynamic telecommunications landscape, drive efficiency and optimize its asset portfolio to support sustained growth and value creation.

The new business areas set forth under the Delayering Plan: TIM Enterprise, TIM Consumer and TIM Brasil

For the year ended December 31, 2023, after giving *pro forma* effect to the Transactions, TIM Consumer business area, TIM Enterprise business area, Sparkle and TIM Brasil would have generated €6.2 billion, €3.4 billion, €1.0 billion and €4.4 billion in revenue respectively. These figures consider the effects of Master Services Agreement and Transitional Services Agreement as well as intercompany agreements between TIM Consumer, TIM Enterprise and Sparkle, amounting €0.4 billion between TIM Consumer and TIM Enterprise and €0.2 billion between Sparkle and other domestic entities within the TIM Group. For the same period, after giving *pro forma* effect to the Transactions, TIM Consumer business area, TIM Enterprise business area, Sparkle and TIM Brasil would have generated €1.1 billion, €0.7 billion, €0.1 billion and €1.6 billion of Organic EBITDA-AL and would have incurred in €1.0 billion, €0.3 billion, €0.1 billion and €0.8 billion of Capital Expenditures, respectively.

However, in the TIM Audited Consolidated Financial Statements and in this Exchange Offer Memorandum, the TIM Group presents its financial and operating information per the business units and segments in the manner described under "*—TIM Group Business Units.*" See also "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the TIM Group—Operating Segments*" for more details. As such, in this Exchange Offer Memorandum, the TIM Group does not present its business in terms of the new organizational model.

TIM Enterprise

The TIM Enterprise business area will be the only full ICT provider in the domestic market capable of providing fixed and mobile connectivity, cloud, cyber security and IoT solution swill benefit from a strong position in the Italian IT services market for large enterprise and uniquely positioned in the public administration segment, providing the following end-to-end ICT offerings:

Managed and professional services: This will include change assessment, cloud migration and cost optimization, and running deployment, systems and application management, full outsourcing, managed audit and billing and managed security and governance.

*Solution*s: This will include cloud solutions for modern workplace, customer experience, modern and enterprise applications, digital marketplaces and trusted services. It will also include security solutions for cybersecurity and cyber risk management and crypto. Additionally, it will also provide IoT solutions.

*Cloud infrastructur*e: This will include TIM Cloud, Google Cloud, Edge Cloud and other third-party clouds.

*Data center and Edg*e: This will include data center offerings as well as TIM Edge.

Network: This will include providing traditional voice and VoIP, xDSL and fiber, software defined network offerings in the fixed line retail market and providing 2G, 4G, 5G, human and M2M, device and technical assistance offering, and 5G private network offerings in the mobile market.

The TIM Enterprise business area will be one of the leading ICT providers for large enterprises, employing 5,300 people with over 2,000 different types of certifications, of which over 1,500 employed in pre-sales, sales and post-sales. Moreover, the TIM Enterprise business area will hold a leading market share in connectivity services for the large enterprise market (i.e. services needed to provide connections, or unique, active service access points, to the network). This includes voice services and data services as well as M2M network access and human access. A single subscriber may operate several different connections and multiple connections may be associated with one subscriber or one device.

The TIM Enterprise business area will also benefit from its market share in IT services (i.e. application of business and technical expertise to enable organizations to create, manage and optimize, or access, information and business processes held by the TIM Group). The IT services market can be segmented by the type of skills that are employed to deliver the service, such as the design, building, and operation of services.

The TIM Enterprise business area will also be a leader and will have a leading position in the provision of services for public administration, with approximately 25,000 clients.

The IT service market is characterized by a relatively high compound market share captured by many local players, mainly due to cultural and local commercial complexities, such as language, local regulatory and privacy constraints in most industries (including banking, energy and healthcare), the importance of local relationships and proximity to customers. The TIM Enterprise business area will be one of the largest local players in this highly fragmented market, in which scale increasingly matters, and the TIM Group is able to capitalize on its position as a leading ICT provider to large customers and the public administration segment due to the trust that it has built with, and its proximity to, such customers and its ability to offer converged end-to-end solutions. The TIM Group believes that due to a trend among its customers to reduce operational complexity, compounded by increasing internal ICT skills shortages, by consolidating key partners for telecommunication and data services, cloud, IoT and security, a natural convergence will occur. Accelerated by NRRP, the growth in IT services spend is also driven by the increasingly mission-critical nature of IT services in business operations which the TIM Group expects to result in IT services spend in Italy becoming more recurring and resilient in the face of future market downturns and less correlated to macroeconomic trends.

The TIM Enterprise business area will have clear and distinctive competitive advantages to gain from expected market momentum, including: (i) an unmatched offering in the Italian market, (ii) an owned mobile core network, (iii) 16 directly owned data centers, of which seven were “top tier,” as of December 31, 2023 and (iv) opportunities to develop dedicated customer infrastructure.

The unique combination of (i) deep, established customer relationships (in the case of the TIM Group’s top 10 clients of more than 20 years, as of December 31, 2023), with an average contract duration of approximately three years, (ii) an unparalleled asset base with 16 proprietary data centers, (iii) a proprietary backbone in strategic areas with a dedicated assets and access to a broader network, (iv) a customer base exceeding 33,000 clients and (v) strategic partnerships with leading technology providers such as Google, Oracle, Microsoft, Fortninet, Cisco and VMWare makes the TIM Enterprise business area the natural reference point for many large enterprises and public bodies that seek to streamline their telecommunication and IT infrastructure, ideally with a single counterparty providing seamless end-to-end services. With core data services increasingly integrated with cloud, IoT and security solutions, the TIM Group believes that this convergence can only continue. The TIM Enterprise business area is uniquely positioned to capitalize on this opportunity.

As part of establishing the TIM Enterprise as its own business area, the TIM Group’s management is developing an integrated go-to-market approach between the historically and separately managed brands of the TIM Enterprise business area, including Noovle, Telsy and Olivetti. A scaled-up combined product factory will end historic fragmentation between the brands, thereby creating potential for synergies and capacity for new proprietary capabilities due to fully integrated end-to-end product capabilities. The TIM Group’s primary focus is on the continuing acquisition of scale, focusing on proprietary products and a public administration cloud strategy, personnel reskilling in light of an expanding offering, phasing-out one off restructuring costs and expanding its data centers footprint for improved offerings.

The TIM Enterprise business area is expected to benefit from sustainable growth, underpinned by a further expansion in the ICT market, the optimization of key assets, ensuring more efficient operations and a shift in its operating model, aiming to insource certain external capabilities. In particular, the key features of TIM Enterprise business area’s operating model are expected to be as follows:

- centralized corporate sales and account management involving a single point of contact to engage with customers in order to better identify needs and explore opportunities;
- integrated marketing and solution development, by industry and top clients;
- specialized pre-sales, with product-focused pre-sales specialists supporting account managers during sales process;
- vertical product management, with product-focused business and technical requirement identification to steer competence center development;
- integrated delivery project management with specialized project management for project delivery coordination;
- vertical delivery specialists with product-focused experts responsible for single product delivery;

- integrated research and development to setup common standards and methodology;
- product-specific competence centers to develop internal IP from product management inputs;
- integrated technical practices for management of key partners' technology solutions;
- integrated managed services for infrastructure;
- vertical application managed services (product-specific); and
- integrated operations and assurance in charge of post-sales services, assurance and maintenance.

The TIM Group believes that these measures will result in (i) higher revenues generated by the activities within the TIM Enterprise business area, including revenues generate by ICT services, (ii) significantly increased cash conversion and (iii) optimized capital expenditures as well as operational costs.

TIM Consumer

The TIM Consumer business area will be the leading fixed and mobile services provider in the consumer and Small and Medium Business retail market in Italy. To support its operations, the TIM Consumer business area will continue to rely on the direct ownership of its mobile infrastructure, data centers and backbone and further equipment and infrastructure components (not included in the NetCo Business) and will utilize fixed-line wholesale access services from NetCo through the bespoke and flexible Master Services Agreement.

The TIM Consumer business area will continue to operate in a competitive environment. In order to address these challenges, the TIM Group's management is implementing a recovery strategy. The main goal of the TIM Group is to transform its TIM Consumer business area into an agile, efficient and commercially flexible premium and highly reliable business with a shift in strategy, from volume to value. The Delayering Plan will enable the TIM Group's management to focus on end-to-end responsibility for the entire business, with full accountability for the implementation of the strategy. The TIM Group also expects that delayering will enable higher commercial flexibility by lifting price-replicability and allowing a level playing field with competitors.

As part of the transformation, the TIM Consumer business area has focused on activities that delivered value in the short term both in terms of costs and top line such as a successful implementation of a brand repositioning and pricing redesign, improvised organizational structure and capital expenditure and IT demand optimization. The TIM Consumer business area will continue to focus on striving for sales excellence and data-driven customer value management, providing turn-key ICT solutions for Small and Medium Businesses.

As near-term goal, the TIM Group aims at stabilizing the customer base within its TIM Consumer business area through a turnaround plan. This strategy entails, among other things, reduced churn, with gradual ARPU increases through a "more for more" proposition, a restructuring of its current content strategy and the TIM Vision platform, the optimization and digitalization of the current channel mix and higher FTTH/5G uptake which should provide opportunities for improved pricing and up-selling.

As a long-term objective, following expected market and revenue stabilization, the TIM Group believes that TIM Consumer business area will be able to enhance its performance by expanding beyond connectivity services, thereby broadening its scope from a telecommunication operator to a customer platform business. This strategy involves evaluating new business potentials and defining a go-to market approach. Growth prospects include a more distinct differentiation of entertainment services alongside a restructuring of its content strategy to prioritize profitability. This strategy will pivot towards a new business model that focuses on distributing content from leading third-party providers like Netflix, Apple TV and Disney^{+} on a revenue-sharing basis, thereby requiring minimal investment. The TIM Group also plans to enrich its 5G and ICT portfolio and advance its data-driven strategy. Furthermore, the TIM Group plans to broaden its current offering scaling up certain of its existing products and services, including media and insurance services, as well as expanding on new high-value services, including consumer finance, health and education. These initiatives are designed to lay the foundation for sustainable growth, anchored in high-quality service positioning and a compelling digital service offering.

The TIM Group believes that its TIM Consumer business area will have the opportunity to capitalize on its unique asset portfolio and capabilities to increase its organizational efficiency and support its consumer platform strategy and partner attraction. In particular, the TIM Group expects to benefit from: (i) a robust customer base, rooted in

longstanding relationships with a significant portion of households and enterprises, complemented by comprehensive subscriber data, (ii) a widespread sales channels capillarity across major Italian cities, efficient call centers and a strong online presence, (iii) a well-established and reputable brand, ranking among the top ten most valuable brands in Italy and the leading among Italian telecommunications operators and (iv) a meticulously structured customer interaction system, ranging from widespread presence throughout Italy to more personalized engagement for specific interactions, such as billing relationships and home access via set-top-box. The strengths of the TIM Consumer business area are expected to underpin continued growth and help maintain its competitive position in the market. These advantages are essential for the unit to respond effectively to evolving consumer needs, leveraging technological advancements and capitalizing on its strong market presence to secure ongoing success and a leading role in the industry.

TIM Brasil

The TIM Brasil business area aims at becoming the next generation telecommunications operator driving the digitalization of Brazil, distinguished by offering superior service and network quality and committed to providing a fully differentiated and reliable suite of services in order to deliver superior and sustainable value to its shareholders. TIM S.A., a 67%-owned listed subsidiary of the TIM Group, is already among the most profitable telecommunications companies in Latin America and leads its peers with a free cash flow yield of approximately 10.3% for the year ended December 31, 2023. TIM Brasil business area will continue to operate in a large, increasingly attractive and growing market, which has benefited from recent consolidation from five to three mobile operators (including TIM S.A.'s integration of part of Oi), a healthy regulatory environment, continuous growth in addressable customer base and the favorable effects after reduction of the Brazilian turnover tax ICMS from 28% to approximately 20%-22% for the years ended December 31, 2022 and 2023, respectively. The TIM Brasil business area is uniquely positioned to become the preferred telecommunications operator in Brazil, offering leading value propositions in markets driven by value. In particular, the TIM Brasil business area has received several recognitions within the industry, including being the first operator to provide 4G connectivity across all 5,570 Brazilian cities and delivering innovative services through strategic partnerships with key industry players. See "*Business of the TIM Group*" and "*TIM Group Industry Overview*"

The TIM Group's strategy for its TIM Brasil business area aims at further strengthening cash flow generation in its core connectivity business, through the deployment of 5G coverage, the migration of FTTC to FTTH technology as well as a prudent capital allocation and expenditures. The strategy is further bolstered by the competitive advantage of operating in a market characterized by fragmentation and the presence of numerous regional players as well potential opportunities in the business-to-business IoT market. Benefits to efficiency and scale are expected to originate from the ongoing integration of Oi operations, which is currently subject to one-off operation expenditure and capital expenditure as part of the integration. Further growth opportunities targeted by the TIM Brasil go beyond the core business with the ambition to become a full vertical orchestrator of B2B and IoT services, in partnership with industry leaders.

Transformation Plan

In addition to the Delayering Plan, the TIM Group is also in the process of implementing an ambitious cost-cutting transformation plan (the "**Transformation Plan**") covering TIM Consumer business area and TIM Enterprise business area (collectively, the "**TIM Domestic business area**"). As of December 31, 2023, TIM Domestic business area generated approximately €1.1 billion of total savings, of which approximately €0.7 billion were operating expenditure savings and approximately €0.4 billion were cash cost, respectively. This was achieved mainly through, among other things: (i) a hourly reduction involving more than 70% employees, (ii) voluntary exits of approximately 0.6 thousand employees, (iii) a company-wide insourcing program, reskilling about 1.1 thousand employees, (iv) energy initiatives, (v) an optimization of approximately 200 thousand square meters premises, (vi) a reduction of approximately 18% year-over-year of human calls in its customer care operations and (vii) a dismantling of approximately 14 thousand public payphones.

Following the targets and objectives achieved between 2022 and 2023 under the Transformation Plan (the "**First Wave**"), the TIM Group is further committed to continuing its transformation journey, setting forth new targets for the 2024-2026 period (the "**Second Wave**").

The Second Wave is founded on two key transformation pillars. Specifically, the TIM Group aims to (i) continue streamlining its cash cost baseline by simplifying and right-sizing cost structures, ensuring clear and full cost accountability and (ii) reassess its processes and operating models across all group companies, with a particular focus on advancing the TIM Group's digital capabilities, processes, and operating models. The TIM Group anticipates that these measures will help mitigate total cash cost increase associated with the expected shift in revenue mix. The TIM Group believes that such strategy will allow it to mitigate the expected cost increases resulting from the expected shift in revenue mix, from higher-margin connectivity services to lower-margin ICT and multimedia services. In particular, the TIM Group is expected to focus on a series of high-impact initiatives:

People re-skill and insourcing: The TIM Group is committed to launching a new company-wide insourcing program aim at internalizing current external activities, leveraging internal skills and capacity. This initiative is expected to enhance market responsiveness, reduce external costs and improve margins.

End-to-end Processes: This initiative focuses on digitalizing and automating critical, human-intensive business processes throughout the TIM Group through the implementation of advanced technologies, such as AI. The goal is to simplify and enhance operations and streamline costs, ultimately accelerating revenue generation.

*Customer Car*e: This initiative aims to reduce human interactions by offering targeted interactions and a wider suite of digital customer care alternative, such as a dedicated mobile app and voicebot. The TIM Group expect to capitalize on the reduction of external costs related to outsourced activities and enhance its customer engagement.

Multi-product Sales Channels: In addition to ongoing channel mix and cost optimization activities, this initiative aims to leverage the TIM Group's existing channels to lower per-unit acquisition costs by offering a broader range of products and services, such as insurance and energy.

*Mobile Networ*k: This initiative aims to implement a new data-driven approach which prioritizes sites that offer a higher return on investment and optimize capital expenditures allocation. The TIM Group believes that such initiative will expedite the rollout of the 5G network and close the competitive gap with its competitors.

IT: This initiative aims to enhance productivity by adopting a new operating model that leverages strategic partnerships with key partners.

The assumptions used in estimating total savings, including the components of such estimates and the steps to be taken to realize such savings and the assumptions used in estimating the timing and the expected business and regulatory benefits from as a result of the successful completion of the Transaction and the implementation of the Delayering Plan are forward-looking in nature, inherently uncertain and subject to a variety of business, economic, competitive and legal risks and uncertainties. The TIM Group cannot assure investors that the information on which it has based its assumptions will not change or that it will be able to realize any of the as-yet unrealized cost savings or benefits it believes are possible based on the TIM Group's management estimates and assumptions. Furthermore, the costs that the TIM Group will incur in connection with the Transactions, the Delayering Plan and the Transformation Plan may be substantially higher than currently estimated and may outweigh any benefit. There can be no assurance that the Transactions, the Delayering Plan and the Transformation Plan will be effective or that the savings targets or the expected benefits presented herein will be achieved in whole or in part.

For further information, please see *"Risk Factors—Risks related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—The TIM Group's business will be adversely affected if the TIM Group is unable to successfully implement its strategic objectives and factors beyond its control may prevent it from successfully implementing its strategy," "Risk Factors—Risks related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—The separation of NetCo from the TIM Group may be complex, could cause the TIM Group to incur unexpected uncertainties and costs" and "Risk Factors—Risks related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—Following the successful completion of the Transactions,*

any deterioration of the relationship with, or in the financial condition of, NetCo could negatively impact the TIM Group's business, financial condition and results of operations."

TIM Group Business Units

For the year ended December 31, 2023, the TIM Group conducted its business through three business units: the Domestic Business Unit, the Brazil Business Unit and the Other Operations Business Unit. However, as part of the Delayering Plan, the TIM Group is currently planning the reorganization of its business, which will account for contribution of the NetCo Business to FiberCop and the sale of TIM's stake in FiberCop and it is expected that the TIM Group will continue to pursue its focused strategy. In line with the Delayering Plan, the resulting business areas are expected to be: TIM Enterprise, TIM Consumer and TIM Brasil. The TIM Group believes these new future business areas will more accurately represent the TIM Group's horizontal structure following the successful completion of the Transactions. See "*—The TIM Group's Strategy—Delayering Plan*" and "*—The TIM Group's Key Strengths*" for further information.

For the year ended December 31, 2023, the Domestic Business Unit and the Brazil Business Unit represented approximately 73% and 27% of the TIM Group's revenue, respectively. The operations of each of the TIM Group's three reportable business units are described below.

Domestic Business Unit

As of December 31, 2023, the operations of the Domestic Business Unit included:

- providing voice and data services on fixed-line and mobile networks for customers and wholesale operators in Italy;
- providing international voice, data and Internet services for fixed-line and mobile telecommunications operators, Internet service providers ("**ISP**") or access service providers ("**ASP**") (in the wholesale market) and to multinational companies through the networks available to it;
- managing the development of fiber optic networks for wholesale customers;
- supplying passive access services to the secondary copper and fiber networks;
- providing cloud and edge computing solutions;
- providing information technology products and services; and
- providing other support services.

As of December 31, 2023, the TIM Group's Domestic Business Unit operated through five segments:

*Consumer and Small Medium Business ("**SMB**")*

The Consumer and SMB segment comprises all fixed and mobile voice and Internet services and products for non-business customers (including public telephony, caring activities and administrative management of customers), Small and Medium Enterprise ("**SME**") customers and Small Office Home Office ("**SOHO**") customers. This segment also includes the TIM Retail company, which coordinates the activities of physical stores.

Enterprise

The Enterprise segment consists of ICT solutions and connectivity products and services managed and developed for top customers, public sector customers and large accounts. The Enterprise segment includes the following entities: Olivetti, TI Trust Technologies, Telsy and Noovle.

Wholesale National Market

The Wholesale National Market segment is engaged in managing and developing portfolios of regulated and unregulated wholesale services for fixed-line and mobile telecommunications operators in the Italian domestic market and for other MVNOs which do not own their own radio spectrum or wireless networks. The Wholesale National Market includes the following entities: TI San Marino and Telefonia Mobile Sammarinese.

Wholesale International Market

The Wholesale International Market segment includes the activities of the Telecom Italia Sparkle group, which provides international voice, data and Internet services for fixed and mobile telecommunications operators, ISPs, ASPs (in the wholesale market) and multinational companies through its own networks in the European, Mediterranean and South American markets.

Other

The Other segment includes:

- *Other Operations*: Other Operations includes technological innovation and development, engineering, construction and operating processes for network infrastructures, IT systems and properties and all services of FiberCop; and

- *Staff & Other*: Staff & Other includes services provided by the staff departments and other support activities.

Brazil Business Unit

The Brazil Business Unit is engaged in providing mobile services using universal mobile telecommunications systems, global system mobile and long-term evolution technologies in Brazil. It also offers fiber optic data transmission using full IP technology, such as dense wavelength division multiplexing, multiprotocol label switching as well as residential broadband services.

The Brazil Business Unit has developed a comprehensive service portfolio catering to both consumer and corporate clients, including small, medium and large enterprises. Beyond traditional mobile voice and data offerings, TIM Brasil is expanding into fixed ultrabroadband services and exploring innovative revenue streams in emerging and adjacent markets, such as financial services, mobile advertising and IoT. The Brazil Business Unit enhances its customer offerings with additional services and digital content, augmenting mobile device functionality. This extensive portfolio management enables the creation of customized packages and convergent offers in select regions.

At the same time, TIM Brasil is embracing business transformation, venturing into new markets and seizing opportunities beyond its traditional core operations. Key initiatives to achieve the TIM Group’s vision for its Brazil Business Unit are summarized below:

- Striving to be recognized as Brazil’s best mobile operator by improving services and offers, thereby enhancing customer experience;

- Accelerating growth through an asset-light broadband model, focusing on the migration of FTTC customers to FTTH, in addition to expanding its presence through partnerships;

- Broadening its B2B and IoT technology footprint, leveraging strategic initiatives to tap into anticipated market growth, with a particular focus on 5G opportunities;

- Strengthening its strategic partnerships to boost value creation, where TIM Brasil already collaborates with industry leaders and continues to pursue new business prospects; and

- Pursuing fixed broadband opportunities by capitalizing on growth in the ultrabroadband market through innovative financial and business models.

Other Operations Business Unit

The Other Operations Business Unit includes ancillary operations of the TIM Group, including financial operations.

TIM Group Operational Data

The following tables show the TIM Group's historical operating data for the periods presented. Please see "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the TIM Group*" for more details.

Domestic Business Unit: Fixed

	For the year ended December 31		
	2023	2022	2021
	(in thousands (€) unless otherwise indicated)		
Total TIM Retail accesses	7,975	8,290	8,647
of which Next Generation Networks ("NGN")[(1)]	5,580	5,417	5,186
Total wholesale accesses	7,247	7,525	7,729
of which NGN	5,280	5,171	4,819
Active broadband accesses	7,196	7,443	7,733
Consumer ARPU (€/month)[(2)]	28.1	28.3	30.1
Broadband ARPU (€/month)[(3)]	38.1	35.6	33.4

(1) Ultrabroadband access in FTTx and FWA mode, also including "data only" lines and Gigabit Ethernet.

(2) Revenues from organic Consumer retail services in proportion to the average Consumer accesses.

(3) Revenues from organic Broadband services in proportion to the average active TIM retail Broadband accesses.

Domestic Business Unit: Mobile

	For the year ended December 31		
	2023	2022	2021
	(in thousands (€) unless otherwise indicated)		
Lines at period end	30,128	30,407	30,466
of which human	18,071	18,438	19,054
Churn rate (%)[(1)]	12.8	13.3	14.7
Broadband users[(2)]	12,592	12,577	12,783
Retail ARPU (€/month)[(3)]	6.9	7.1	7.5
Human ARPU (€/month)[(4)]	11.4	11.5	11.7

(1) Percentage of total lines that ceased in the period compared to the average number of total lines.

(2) Mobile lines using data services.

(3) Revenues from organic retail services (visitors and MVNO not included) compared to the total average number of lines.

(4) Revenues from organic retail services (visitors and MVNO not included) compared to the average number of human lines.

Brazil Business Unit

	For the year ended December 31		
	2023	2022	2021
	(in thousands (€) unless otherwise indicated)		
Lines at period end[(1)]	61,248	62,485	52,066
Mobile ARPU[(2)]	29.5	26.1	26.4

(1) Includes corporate lines.

(2) Represents blended pre-paid and post-paid ARPU.

Products and Services

The TIM Group offers a wide range of mobile and fixed-line telecommunications and value-add services and equipment to its consumer and business customers. The TIM Group caters to consumer customers, SMBs, SOHOs, the Italian public sector and other large accounts, enterprises, fixed-line and mobile telecommunications operators, ISPs, ASPs (in the wholesale market) and multinational companies. For the year ended December 31, 2023, the service revenue amounted to approximately 91% of TIM Group revenue. The TIM Group collaborates with the main European telecommunications operators to promote Open RAN technology within the framework of a common memorandum of understanding and participates in the Open RAN design within the O-RAN Alliance. These initiatives aim at speeding up the implementation of new generation mobile networks such as 5G, cloud and edge computing.

A brief description of the services provided, and equipment supplied by the TIM Group through each of its business units, organized by targeted markets, is provided below:

Italy and International Market

In Italy, the TIM Group offers full-service solutions, including mobile voice, a wide range of mobile data packages, landline voice, fixed broadband and fully flexible television packages, including streaming services and fiber connections. It also provides ICT offerings and digital services, including cloud services.

The TIM Group also services ISPs, ASPs (in the wholesale market) and multinational companies also through its own networks in the European, Mediterranean and South American market.

Consumer

Some of the key services and equipment offered by the TIM Group to its consumer customers are provided below:

- mobile voice, messaging and data services by consolidating 4G and developing 5G networks;
- loans and payment plans for customers acquiring smartphones along with network connection;
- insurance policies for customers acquiring smartphones along with network connection;
- FTTH fiber connections to homes, offering high performance of up to 10 Gbps, with approximately 40% of Italian residential units covered by FTTH. Approximately 70% of the TIM Group's Italian fixed customers used ultrabroadband connections as of December 31, 2023;
- home Wi-Fi services with a 10 Gbit modem that assures a powerful, stable, secure connection in all areas of the home and dedicated assistance for an extremely high-level browsing experience;
- access to connection services in sparsely covered areas using fixed wireless access ("**FWA**") technologies, including through a Wi-Fi subscription and a pay-as-you go model;
- special offers, including discounts and unlimited gigabytes, for such customers who avail of both mobile and fixed-line services;
- family plans, including Wi-Fi television for unlimited browsing;
- special packages for customers under the age of 30 years and for low-income families; and
- portfolio of digital services, including cloud services in partnership with Google.

The TIM Group has also entered into partnerships with Disney+, Netflix, Amazon Prime (for providing entertainment services), DAZN and Infinity+ (for soccer and sporting event streaming services). It has also partnered with Lega Serie A and UEFA Champions League for streaming services.

Additionally, the TIM Group has started the TIM Next loyalty program, offering customers the chance to replace their smartphones with newer models, thus encouraging the collection and recycling of used smartphones.

The TIM Group has also introduced pricing initiatives, such as the introduction of inflation adjustment mechanisms for new customers, to achieve gradual (rather than sudden) repricing of contracts.

Businesses

The TIM Group offers services to the full range of business customers, from SMBs to large national and international enterprise customers, as well as the Italian public sector. The TIM Group offers mobile (4G and 5G), Wi-Fi and fixed-line services, as well as digital services (including cloud services, information security services and IoT solutions) to its SMB customer base. It provides fiber connection, offering performance of up to 10 Gbps and guaranteed minimum bandwidth for more sophisticated customers. The TIM Group also provides after sale services. Additionally, the TIM Group provides specific content on digital channel for SMB customers in order to increase the purchase of solutions for fixed, mobile and ICT offerings. The TIM Group also provides online services dedicated to customers on apps and the web.

Furthermore, the TIM Group has simplified its sales processes and extended its portfolio with solutions tailored to the needs of its SMB customers. Such simplification aimed to consolidate the main needs of its SMB customers, including information security, cloud computing for capacity and storage, data backup and the adoption of SaaS solutions. The TIM Group has also expanded its ICT offer through advanced connectivity solutions (VoIP) and partnerships with major market players.

In terms of products and services for clients in the large enterprise and the public administration segment, the TIM Group offers:

- *Managed and professional services*: including change assessment, cloud migration and cost optimization and running deployment, systems and application management, full outsourcing, audit and billing management, security management and governance;
- *Solution*s: including cloud solutions for modern workplace, customer experience, modern applications, digital marketplaces and trusted services. It also includes security solutions for cybersecurity and cyber risk management and crypto. Additionally, it includes providing IoT vertical solutions;
- *Cloud infrastructur*e: including services such as TIM Cloud, Google Cloud, Edge Cloud and third-party clouds;
- *Data center and Edg*e: including data center offerings as well as TIM Edge; and
- *Networ*k: including providing traditional voice and VoIP, xDSL and fiber, software defined network offerings in the fixed line market; and providing 2G, 4G, 5G, human and M2M, devise and technical assistance offering and 5G private network offerings in the mobile market.

Brazil

The TIM Group offers mobile services using universal mobile telecommunications system, global system mobile and long-term evolution technologies in Brazil. It also offers fiber optic data transmission using full IP technology, such as dense wavelength division multiplexing, multiprotocol label switching as well as residential broadband services. The TIM Group is in the process of migrating customers and integrating the Oi network. On March 30, 2023, the shareholders of TIM approved the merger of Cozani RJ Infraestrutura e Redes de Telecomunicações S.A. ("**Cozani**") with TIM, which occurred on April 1, 2023, according to Anatel's No. 4951 of April 5, 2022 published by Anatel. Cozani is a special purpose company acquired from Oi, which provides telecommunications services, especially personal mobile services and multimedia communication services.

Mobile

The TIM Group was the first operator to cover 100% of Brazil’s municipalities with 4G and launched its 5G network in Brazil in 2022. It has partnered with Deezer and Amazon Prime Video through exclusive partnership agreements. It has also entered into a partnership with Intelsat to offer complimentary internet connectivity on Gol and LATAM airlines’ flights for certain customers. The TIM Group has also been a pioneer in the Brazilian telecommunications market. It was the first and only telecommunication operator to offer Apple One in plans and to launch 5G free trials to encourage 5G migration. The TIM Group has also been an active operator in the use of remote e-sim activation. The strategy underlying these partnerships mainly consists in increasing customers’ loyalty, thus creating an added value for the TIM Group. More generally, the TIM Group’s partnership portfolio in Brazil is based on five main areas: (i) Content & Security, featuring partners such as YouTube Premium, Disney+, Apple One, Deezer, HBO Max, Amazon Prime Video and Exa, (ii) Education, featuring partners such as Descomplica, (iii) Health, featuring partners such as Cartão de Todos, (iv) Retail (Zé Delivery) and (v) financial services, featuring partners such as C6 Bank.

The TIM Group operates a sales app for independent retailers to re-sell SIMs and top-ups, thereby securing additional income streams. As a result of the improvements of the TIM Group’s customer experience in Brazil, in 2022, the TIM Group was awarded the Reclame Aqui RA 1000 certificate for excellence in customer service in the Perceived Quality and Satisfaction survey run by Brazil’s National Telecommunication Agency (*Agência Nacional de Telecomunicações*, “**Anatel**”). In addition, the TIM Group is the sponsor of Rock in Rio, one of the world’s largest music festivals, which serves to strengthen the tie of the TIM brand with music, entertainment and the Brazilian society at large.

Fiber

The TIM Group via its TIM UltraFibra service provides high quality ultrabroadband with high speed data connection. It has expedited the expansion of its footprint and FTTH network coverage focusing on strengthening existing active clusters and migrating customers from FTTC to FTTH to maximize customer experience.

Business

The TIM Group is characterized for its innovative and comprehensive portfolio, catering to both consumers as well as small, medium and large companies. Beyond traditional voice and data services, the TIM Group offers a fixed-line ultrabroadband service, TIM UltraFibra, and is advancing into the IoT space, establishing new revenue streams with applications in areas such as smart lighting, precision agriculture and herd management. The TIM Group is also at the forefront of crafting 5G-based opportunities in various verticals, including logistics and 4.0, to further its innovative offerings.

The TIM Group enhances its customers’ mobile experience by offering a variety of content and services designed to augment daily device functionality. With its comprehensive and varied portfolio, the TIM Group believes it is well-positioned to tailor packages to customer preferences and bundle services, such as voice and data, for clients in specific regions.

Network Assets, Licenses and Frequencies

In Italy, the TIM Group operates a mobile access network based on 4G and 5G standards. The TIM Group acquired spectrum rights in the 2018 multiband spectrum auction on all available frequencies in the 700 MHz, 3.7 and 26 GHz bands (specifically, 2x10 MHz in 700 MHz, 1x80 MHz in 3.7 GHz and 1x200 MHz in 26 GHz).

In Brazil, the TIM Group operates a mobile access network based on GSM, 3G, 4G and 5G standards. In the spectrum auction in 2021 for spectrum dedicated to 5G wireless technology, TIM Group was awarded the B3 batch of 3.5 GHz, along with several other batches.

The details of the TIM Group’s telephone licenses and similar rights in operation as of December 31, 2023, are provided below:

	Useful life *(years)*	**Maturity**

	Useful life	Maturity

2.3 GHz, 3.5 GHz and 26 GHz band (5H)	from 10 to 20	2030-2041

The TIM Group's telecommunication assets include the technological infrastructure that is used for the provision of telecommunications services (transport and distribution of voice/data traffic). As of December 31, 2023, the TIM Group's technological infrastructure assets were mainly attributable to TIM (€5,276 million) and FiberCop (€4,595 million), respectively, in Italy and to the Brazil Business Unit (€2,114 million).

The TIM Group's ultrabroadband coverage in Italy is composed by a mix of technologies:

- FTTC for nationwide NGAN up to 200 Mbit/s (under the "Italia a 1 Giga");
- FTTH coverage, through investments in FiberCop;
- 4G mobile ultrabroadband coverage with over 56,000 4G nodes (including both macro and micro); and
- 5G mobile ultrabroadband coverage with over 5,500 5G nodes (including 3.7 GHz and 700 MHz bands).

In October 2022, the TIM Group was the first operator in Italy and among the first in Europe to launch the consumer and business offer with high-performance FTTH fiber connections up to 10 Gigabits per second using its XGS-PON (10 Gigabit capable Symmetric Passive optical networks) technology. The TIM Group's network is also connected to other carriers in Italy, the main global CDN and to OTT providers.

In Brazil, the TIM Group's wireless networks use GSM, 3G, 4G and 5G technologies and cover approximately 100% of the urban Brazilian population. In March 2022, the TIM Group announced that it had completed its implementation of standalone 5G network "Core" in Brazil. This was necessary to provide 5G services in accordance with government requirements. Anatel has approved a revised schedule for granting access to the 3.5 GHz spectrum band in order to activate the 5G network in certain parts of Brazil after August 2022, commencing the commercial operations of 5G Standalone (5G SA) throughout Brazil. In 2022, the TIM Group began the 5G rollout and currently provides 5G coverage in Brasília and all 26 state capitals of Brazil. In Brazil, radio frequency authorizations are generally valid for an initial period of 15 years and are renewable for an additional 15 years. The TIM Group's current radio frequency authorizations for operations in Brazil started expiring in September 2022. The TIM Group has submitted investment plans to the local telecommunications regulator to obtain authorizations for these expiring radio frequencies. The TIM Group has started requesting renewals for the same period. There are ongoing administrative proceedings as well as judicial discussions regarding these renewals. In the case of authorizations that cannot be renewed, current telecommunications law sets forth that the spectrum is returned to the Federal Government under Anatel's management. This is why revisions to the Law No. 9,472/1997 (the "**General Telecommunications Law**") are expected to have a meaningful impact for the sector, as the proposed updated law allows for subsequent and unlimited renewals of radio frequency authorizations of up to 20 years each, generating an environment possibly more conducive to long-term investments. See "*TIM Group Regulation*." In Brazil, the TIM Group's wireless network has both centralized and distributed functions and includes mainly transmission equipment. For the year ended December 31,

2023, it consisted primarily of more than 60,000 eNodeBs in its 4G network, more than 17,000 NodeBs for the 3G layer and more than 13,000 BTSs for 2G network, considering site-sharing, hardware equipment and software installation and upgrades. In Brazil, the TIM Group's optical fiber network has capacity to offer high quality ultrabroadband service, available through its TIM UltraFibra service. In 2023, the TIM Group continued to increase the quantity of sites connected by optical fiber in Brazil, as well as integrating mobile sites acquired from the Oi acquisition, reaching more than 10,500 of sites connected by optical fiber.

Customer Services

The TIM Group is focused on providing high quality customer services and customer retention is one of its key objectives.

Italy

The TIM Group reaches around 5,750 Italian municipalities with ultrabroadband fixed services, and around 7,800 Italian municipalities with ultrabroadband mobile services where the services are available for the benefit of citizens, businesses and the Italian public sector.

The TIM Group undertakes a wide range of activities to improve quality of its services and products and to encourage customer retention. Some of these activities are as follows:

- *Data-driven direct marketing*: the TIM Group uses data analytics to predict and manage key customer KPIs and to trigger direct marketing activities aimed at reducing customer churn, while protecting and maximizing its ARPU and monthly average revenue per user ("**MARPU**"). Such activities range from simple caring calls to pro-customer price management activities or gifts (for example individual price-plan upselling or free data package). The TIM Group actively promotes proactive customer caring initiatives by enriching the data-lake and improving digital tools and data-driven processes;

- *Digital service*s: the TIM Group strives to provide an appealing digital environment to its customers through a wide offering of multimedia services, including music, content and games for customers' entertainment. It leverages its partnerships with content providers, such as DAZN and Disney$^+$, to provide sought after content;

- *Cross-selling or upselling*: the TIM Group undertakes data-driven campaigns that aim to increase penetration of convergent customer base (for example, providing FTTH upgrade or best technology for connectivity) to encourage reduction in churn propensities;

- *Customer satisfactio*n: the TIM Group's management is focused on customer satisfaction, which is monitored through a dual system (Customer Satisfaction Index and Net Promoter Score) that constantly monitors detailed trends and tracks them to micro-drivers, allowing intervention and management at operational and commercial level;

- *Digital payment*s: the TIM Group encourages customers to shift to a digital or automatic payments model to facilitate churn reduction; and

- *Direct relationshi*p: for more complex and large customers (e.g., corporate clients and Italian public administrations) the TIM Group believes that the key element is maintaining the trust built over the years through increasingly good relationships, supported by improving services and support tools.

Brazil

In order to serve the TIM Group's large customer base, the TIM Group has aligned the ratio between its internally managed and outsourced customer service operations to its outsourced customer service operation to the best practices of Brazilian telecommunications business. As of December 31, 2023, the TIM Group managed 16 inbound call centers with approximately 10,119 sales and customer service representatives, including four partner sites specializing in customer service. Of these representatives, approximately 4,500 have "remote working" arrangements, while approximately 1,390 are fully remote. This operational structure enables the TIM Group to concentrate on delivering

high-value customer services, maintaining focus on core processes and ensuring the efficiency of critical "Referral Channels."

For the corporate market, for the year ended December 31, 2023, the TIM Group had approximately 362 third-party business partners and 95 employees focused on serving SMBs and a direct sales force team of 87 employees focused on large companies.

Since 2020, digital channels have been a crucial aspect of the TIM Group's customer service through its mobile application MEU TIM and the MEU TIM web portal. These digital channels have been to be valuable for self-service, prepaid customer upselling additional services. In addition to providing an enhanced customer experience due to their prompt response capabilities, digital channels have also allowed the TIM Group to reduce costs in areas such as customer service operations and sales commissions. The TIM Group continues to roll out new features across its digital channels, increasing its ability to promptly resolve challenging issues that may arise for its customers.

In 2023, the TIM Group implemented a strategy to position the MEU TIM mobile app as the primary point of contact for its customers, focusing on a continuous journey informed by research and interviews with its clients. Throughout this period, the TIM Group consistently introduced new features across its digital channels, leveraging those insights to enhance its ability promptly address challenging issues that may arise for its customers.

The TIM Group has also expanded the service offerings for its digital customers, adding the Google Business Message (GBM) and Apple Message for Business (AMB) channels on top of already implemented channels, i.e. CHAT MEU TIM (available via web browsers and a mobile app) and Whatsapp, thus enabling customers to choose the channel that best serves their interests, according to their profiles, needs and behaviors.

The TIM Group also connects with its customers via social media, such as X (formerly known as Twitter), Facebook, Instagram and LinkedIn. In 2023, the MEU TIM mobile app maintained one of best rating among the Brazilian telecommunications operators' customer service mobile apps, with a rating of 4.7 of 5.0 "stars" on Apple's App Store.

Since 2021, the TIM Group has been working to keep the "Customer Experience" as a foundational pillar, creating initiatives that seek to put the customer as the center of decision-making. The approach used to promote this cultural transformation was guided by the relationship between customers and employees.

The TIM Group has evaluated and taken action to improve the experience and professional development of its employees, with educational projects to promote engagement and insight, focused not only on technical, functional or soft skills competences, but also on the new capabilities required to reach industrial and business goals. These efforts strengthened the bonds between an employee's business functions and the products and services they deliver to customer. The impact was noticeable in the TIM Group's Organizational Climate Survey, a study performed by consulting company, Mercer, considering several companies across the country. In 2023, The TIM Group maintained a favorability of 86% compared to the previous year, placing the TIM Group 14 percentage points above the Global Telecom Market and ten percentage points above the General Market Brazil. The business area responsible for supporting these initiatives was divided in three sections: Design, Execution and Monitoring.

The TIM Group's design team created a policy with "Customer Experience" guidelines. This document defined the expected behaviors and patterns in communication and interactions with customers, outlined a monitoring model, as well as refactored the products and services development cycles, to better cover all elements of Customer Experience.

The Execution area sought to solve legacy issues, with many of them solved. These actions were grouped in the Customer Experience governance plan, on four strategic pillars:

- *Customer Centric*: being customer oriented, understanding their needs, the relationship and the value proposition they expect when interacting with the TIM Group;
- *User Experienc*e: understand the perceptions and reactions of customers, including their emotions, beliefs, preferences, physical and psychological responses, as well their behaviors before, during and after they use the products, offers and services;

- *Customer Monitoring*: making use of tools and techniques such as big data and predictive analytics to extract value from customer information and to identify opportunities in revenue increase, costs reduction and quality improvement; and

- *Crew Experience*: with the understanding that its employees are key to create great customer experiences, empower their employees so that it is clear they are a consumer-oriented organization.

In addition, the TIM Group continued to use the so-called "Net Promoter Score" as a fundamental key performance indicator to measure customer experience with its call center. There is an ongoing project to expand this survey to its other customer service channels.

The TIM Group has also sought to maximize customer satisfaction through improvements in its processes and systems, including customer journey mapping, where employees are invited to assume the customer perspective using empathy maps and design thinking tools. The goal of using these methods is to reduce customer effort, increase customer success and to ensure positive emotions towards the TIM brand.

The TIM Group also enhanced its interactive voice response channels to include more customer-oriented services.

The TIM Group completed the migration of prepaid and postpaid consumer back-office services (front end was implemented in 2015) to the Siebel customer relationship management, or CRM, platform. The migration to the Siebel system from legacy systems for corporate clients is still ongoing.

In 2023, the TIM Group has started testing the integration of generative AI in its operations, such as virtual agent assistance, real time speech and text and chat bots.

Brand and Marketing

The TIM Group is actively involved in a diverse range of initiatives, encompassing both paid and unpaid activities, to promote its products and services. The TIM Group credits its brand strategy for expanding its customer base and fostering customer loyalty, leading to significant growth in total revenue. Using different media channels such as linear and on-demand TV, radio, print, online platforms and outdoor advertising, the TIM Group promotes its premium brand. Social media is also a key touchpoint for the TIM Group to increase relevance and drive engagement with new generations and specific target groups. The TIM Group increasingly relies on digital marketing and social media to generate interest in its offerings, emphasizing the integration of sales activities with innovative proposition development and creative campaigns to boost market share in SMBs, enterprise businesses and the public sector.

The TIM Group engages in marketing activities both in Italy and abroad. In Italy, during 2023, the TIM Group fostered its premium positioning in a campaign with the tagline, "The Power of Connections," leveraging its successful TV format that showcased stories of human connections empowered by TIM's technology. This campaign featured prominent Italian personalities, including distinguished sports figures and reinforced the TIM Group's presence in the music industry to appeal to different target groups.

With a century-long history dedicated to Italy's development, the TIM Group's commitment goes beyond providing reliable services to individuals and businesses. The TIM Group aims to be a catalyst for change and progress in the country, recognizing its brand responsibility to maximize the positive impact on society. Accordingly, the communication platform welcomed a new initiative, summarized in the tagline "Equality Can't Wait," which emphasizes the TIM Group's commitment to the promotion and awareness of gender equality. "The Power of Connections to Break Stereotypes" was the first campaign on gender equality launched to support the Italian women's national football team at the World Cup in Australia and New Zealand, supporting the right of women to dream free from stereotypes. Female testimonials, representing various professionals connected to the TIM world, highlighted severe gender disparities across different industries, issuing a challenge to take action. Furthermore, in line with the promotion of gender equality, the TIM Group launched "Women+," a mobile app to support and empower women in the labor market.

TIM has also reinforced its image as an innovator aspiring to be recognized not merely as a telecommunications and ICT service provider but also as a digital partner offering advanced solutions and consumer-oriented services. The

strengthening of its brand leadership, widening the gap with competitors on various brand KPIs and the acknowledgment of numerous awards for TIM advertising and campaigns provide tangible evidence of the impact of the TIM Group's brand strategy.

In Brazil, the TIM Group has been strengthening brand credibility by supporting social development initiatives and digitization.

Sales and Distribution

The TIM Group continues to move towards an omni-channel sales approach for its direct sales, offering customers the ability to research, purchase and collect products through three primary sales channels: stores (both owned and franchised) and online. The TIM Group has increasingly focused on delivering an integrated and seamless experience across different segments of its direct distribution channels. The TIM Group believes that these omni-channel offerings help it achieve high customer engagement and satisfaction and reach higher value customers. The TIM Group intends to focus on increasing sales through digital channels and channels with lower costs to both increase efficiency and leverage on data to improve customer satisfaction. The TIM Group also intends to shift its focus from volume driven approach to a value driven approach when it comes to customer acquisition. In the future, the TIM Group intends to adopt a complete data-driven channel management, through in-stores retail analytics solution to drive incentives, footprint and performance.

Italy

Direct Channels

The TIM Group continues to move towards an omni-channel sales approach for its direct sales, offering customers the ability to research, purchase and collect products through three primary sales channels: stores, online and customer care. The TIM Group has increasingly focused on delivering an integrated and seamless experience across different elements of its direct distribution channels. The TIM Group believes that these omni-channel offerings help it achieve high customer engagement, higher value customers and high customer satisfaction.

For the year ended December 31, 2023, the TIM Group offered its products and services through approximately 4,800 points of sale in Italy, out of which approximately 700 were monobrand stores. The monobrand stores are generally located in highly frequented and strategically important areas, such as high streets in urban centers. The TIM Group has revamped its physical store presence with new layouts to a more personal service both for its existing customer base and new clients.

The TIM Group also sells products and services directly through its website and mobile apps.

Indirect Channels

The TIM Group uses indirect channels as a means of increasing its customer reach and as a supplement to the TIM Group's direct distribution channels. The TIM Group's indirect B2B sales and distribution channels include business partners, distributors and wholesale partners.

The TIM Group conducts sales to SOHOs customers through its existing indirect sales and distribution channels, both in stores and online, using specialist sales advisers to help deliver customer acquisition and upgrades. The TIM Group conducts sales to SMB customers primarily through its sales force, which consisted of 73 business partners and 143 senior accounts as of December 31, 2023.

Brazil

In Brazil, the TIM Group follows a strategic approach to consumer customers through both physical and digital channels, with the ambition to migrate sales mix for a higher percentage of digital sales to reduce acquisition costs and improve customer satisfaction. For its business customers, the TIM Group attempts to provide efficient and scalable operation for SMBs and customized customer service for large companies.

For the year ended December 31, 2023, the TIM Group had approximately 16,500 points of sale (of which 158 were owned stores) through premium shops and dealers (exclusive or multi-brand) and consolidated partnerships with large retail chains. In addition to these retail stores, the TIM Group's customers have access to prepaid phone services through supermarkets, newsstands and other small retailers, which amounted to approximately 197,000 points of sale throughout Brazil.

In December 2021, the TIM Group launched a new store model intending to offer a welcoming service, combining experimentation and innovation. Since then, the TIM Group has opened six concept stores and over 40 stores in this new model. The new format has several spaces where customers are able to try out smartphones and accessories integrated with 5G technology, as well as equipment for connecting homes using the TIM Group's fixed ultrabroadband services. Consumers themselves are able to carry out basic activities, such as consulting with the sales representatives, printing, paying invoices, purchasing plans and services and even discussing with tech experts' tips for operating their devices, apps and more.

Pricing

Telecommunications operators face significant pricing pressure resulting from competition from other operators. Additionally, excessive or aggressive pricing is policed periodically by regulators, such as AGCOM, AGCM and Anatel. In this regard, in advance of gaining the regulatory benefits expected to result from the successful completion of the Transactions, TIM Group's retail rates are subject to AGCOM's approval. See "*Risk Factors—Risks Related to the TIM Group—Risks Related to the TIM Group's Business and Industry—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective*" and "*TIM Group Regulation*" for further information. Anatel also publishes rates for certain services, such as fixed-line services, which are permitted to be adjusted for inflation. See "*TIM Group Regulation*."

Major Suppliers, Contractors and Distributors

The TIM Group's primary suppliers are involved in the provision and deployment of fixed-line and mobile telecommunications network as well as in the supply of mass-market products, such as, for example, smart devices and software licenses.

To operate in Italy and Brazil, the TIM Group relies on its own fixed-line and mobile infrastructure. However, following the successful completion of the Transactions, in Italy the TIM Group will rely on the direct ownership of its mobile infrastructure, data centers, backbone and further equipment and infrastructure components that are not included in the NetCo Business, and will acquire fixed-line wholesale access services to maintain its fixed offerings to its retail customers. See "*Summary—The Transactions*." Accordingly, on the Acquisition Closing Date, the TIM Group will enter into the Master Services Agreement with NetCo, which, following the Transactions, will become a prominent provider of broadband and ultrabroadband wholesale access services in Italy.

NetCo is expected to become a supplier of fixed-line wholesale access services over the medium to long term for the TIM Group. Their relationship is expected to be positive for the TIM Group as result of several factors, including, among others (i) the extended duration of the Master Services Agreement and(ii) the provision of certain services by the TIM Group to NetCo, enabling NetCo to offer its services to OLOs. Furthermore, the Master Services Agreement is expected to continue guaranteeing competitiveness of the TIM Group for its retail operations.

See "*Summary—The Transactions—Master Services Agreement*," "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Business and Industry,*" "*Risk Factors—Risks Related to the TIM Group—Risks Related to the TIM Group's Business and Industry—Following the successful completion of the Transactions, the TIM Group will acquire from NetCo certain fixed-line wholesale access services. Therefore, the TIM Group's costs and results of operations could be materially affected if NetCo, for any reason, fails to develop, maintain, repair, upgrade, protect and replace its existing fixed-line network in Italy in order to meet the needs of the TIM Group"* and "*Risk Factors—Risks Related to the TIM Group—Risks Related to the TIM Group's Business and Industry—Following the successful completion of the Transactions, any deterioration of the relationship with, or in the financial condition of, NetCo*

could negatively impact the TIM Group's business, financial condition and results of operations" for further information.

IT Systems and Security

The TIM Group recognizes cyber security as one of its greatest areas of risk as it handles enormous amount of information technology assets that are either their own or are being managed to deliver services to its customers.

In Italy, the TIM Group has a defined security plan for its information technology assets, to mitigate risks by regular monitoring. The security operation center of the TIM Group is available 24/7 to manage security incidents and help limit their impacts. The TIM Group also has an insurance program to cover cyber risks. In relation to the equipment it supplies, the TIM Group uses advanced testing laboratories to test the devices for safety before they are released to the market and isolated environments to identify possible vulnerabilities in the hardware and software products used in its network. In relation to the Russia-Ukraine war, the TIM Group, which is acting in coordination with the Agency for National Cyber Security (ACN), has raised the alert level in relation to cyber risk.

On April 21, 2023, the TIM Group acquired TS-Way, an Italian company specialized in prevention and analysis services for information technology attacks and cyber threat intelligence. The acquisition was completed through Telsy, a member of the TIM Group that is focused on the cybersecurity sector, and which operates under the scope of TIM Enterprise.

In Brazil, the TIM Group has obtained certifications for the management of cyber security and transparency, such as ISO 27001.

Please see "*Risk Factors—Risks Related to the TIM Group—Risks Related to the TIM Group's Business and Industry—System and network failures could result in reduced user traffic and reduced revenue and could harm the TIM Group's reputation*" and "*Risk Factors—Risks Related to the TIM Group—Risks Related to the TIM Group's Business and Industry—The TIM Group's businesses are subject to cybersecurity risks*" for more details.

Employees

As of December 31, 2023, the TIM Group had 47,149 employees, including 37,639 employees in Italy and 9,267 employees in Brazil. The average age of the TIM Group's employees was approximately 49 for the same period.

Certain of the TIM Group's employees are represented by trade unions. In November 2022, TIM signed an agile working agreement focused on young people and fragile resources with trade unions in respect of the period from February 2023 to February 2024. This agreement impacted approximately 28,500 employees of the TIM Group for the year ended December 31, 2023.

On March 21, 2023, TIM and certain trade unions signed an agreement pursuant to Article 4 of Italian Law No. 92/2012. The agreement involved an incentive for up to 2,000 people to take redundancy and was valid until November 30, 2023.

In April 2024, TIM and the trade unions signed an agreement for the application of the Defensive Solidarity contract for the period from April 2024 to June 2025, which on April 12, 2024, was ratified by the Ministry of Labor. In that occasion, TIM, in reaffirming the value of negotiations and trade union relations, and in line with consolidated company relations, confirmed that all employment positions will be safeguarded for the duration of the solidarity contract. The agreement provides for an average percentage of weekly reduction in working hours of 11.4% and includes also Noovle S.p.A., Olivetti S.p.A., Telecontact Center S.p.A. and T.I. Sparkle S.p.A. Agile working agreement has been extended until September 15, 2024.

In August 2022, the TIM Group signed an expansion contract for the period 2022-2024 (the "**Expansion Contract**") which terminated in February 2024. This Expansion Contract aimed to support the business transformation process, renewal of technical-professional skills, and to ensure the presence of new professional profiles through a recruitment plan. This Expansion Contract defined the measures to support the objectives of the 2023–2025 Industrial Plan to empower TIM and certain companies of the TIM Group, including TI Sparkle S.p.A., Telecontact S.p.A., Noovle

S.p.A. and Olivetti S.p.A., and involved approximately 30,000 TIM Group employees. The Expansion Contract was based on 4 pillars:

(i) the recruitment plan, targeting the hiring of specific roles and skills;

(ii) the early retirement plan;

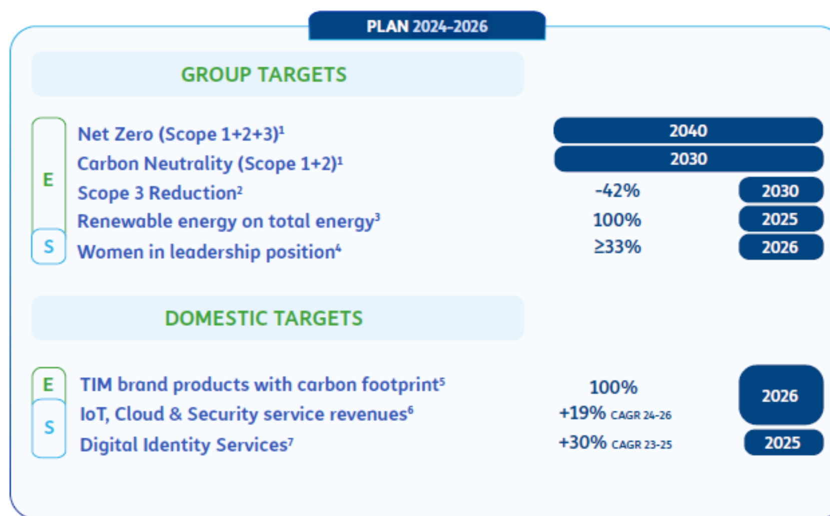
(iii) the training and retraining project, which included both re-skilling and paths aimed at acquiring new skills; and

(iv) working hours reduction.

As of December 31, 2023, 43% of the TIM Group's board of directors were women and 28% of women hold managerial positions within the TIM Group.

Sustainability of the TIM Group

The TIM Group is dedicated to ensuring its business operations are sustainable in all spheres of its operations. It takes steps to regularly monitor its operations to ensure that it can unceasingly improve its performance. The efforts that the TIM Group has implemented to enhance sustainability include the greater use of renewable sources of energy (green electricity amounted approximately to 72% of the TIM Group's total electricity purchased in 2023), the increase of reusing and recycling of materials, the implementation of policies aimed at reducing CO_2 emissions and greater 'circularity' of the TIM Group's products, services and assets. The TIM Group is currently operating under its "ESG Plan" for 2023-2025 and it is working on its "ESG Plan" for 2024-2026 (the "**2024-2026 ESG Plan**"). The TIM Group has set 8 targets, 5 at the TIM Group level and 3 targets for its operations in Italy to meet over a short-term basis. A snapshot of TIM Group's ESG targets and its performances towards these targets under the 2024-2026 ESG Plan, is set out below:



[1] Baseline 2023. For scope 3, categories 1, 2 and 11 are considered
[2] The target has been reformulated to take into account the change of the baseline to 2023 and according to SBTi's annual reduction expected up to 2030
[3] Electricity purchase

Source: Company Information

In defining the TIM Group's targets, the TIM Group has focused on four main areas of intervention:

- *Environmental protection*: the TIM Group aims for an efficient infrastructure with an increasing use of renewable energy, circular models for recycling and recovery of waste as well as the engagement with suppliers with ESG credentials and commercial offerings;

- *Digital growth of Ital*y: the TIM Group commits to bringing ultra-fast connectivity throughout Italy and to continue to offer and develop innovative digital services for individuals, businesses and local and national public administrations;

- *TIM peopl*e: the TIM Group will continue to enhance its workforce's skills, foster talent and to reduce the gender gap; and

- *Strengthen governanc*e: the TIM Group is committed to integrate good governance into its decision-making at all levels, to minimize risks and costs.

Some of the key steps that the TIM Group has taken towards achieving its targets in Italy in 2023, through more than 70 projects, are as follows:

- the reduction of its scope 1 emissions (i.e. emissions from production activities such as trigeneration, transport, ozone depleting gases, heating and generator sets) by 8% compared to 2022;

- the reduction of its scope 2 emissions (i.e. emissions from purchase of electricity to power infrastructure and offices by a 32% compared to 2022;

- the implementation of a new "Power Purchase Agreement" with a duration of 9 years for the supply of approximately 200 GWh/year of green energy for the period 2023-2031, which supplements the agreement signed in 2021 for the supply of 350 GWh/year for 10 years, for a total supply of 540 GW/year;

- the decommissioning of 95% of the public telephone booths out of a total fleet of 14,000 systems;

- the switching off of obsolete landline and mobile telephony devices, for a progressive saving of approximately 154 GWh/year;

- the online activation of eSIMs, providing customers with the opportunity to configure the eSIM via digital identity on their smartphones;

- the launch of the new innovation plan for Sparkle's terrestrial and underwater optical network with new technologies at speeds of up to 800G in Europe, Middle East and South America; and

- the approval of the TIM Group's new code of ethics, recognizing sustainability as a reference point for the TIM Group's long-term strategy.

Compliance with safety at work requirements is assured at the TIM Group level through the application of current applicable legislation starting from when the risk assessment is performed and updated from time to time, along with the relevant document. To strengthen its internal control system, particularly with respect to health and safety matters in the workplace, the TIM Group has implemented a health and safety management system certified according to the ISO 45001:2018 standard.

The TIM Group has achieved various certifications, ten of which specifically focus on ESG issues. In addition, in 2023 the TIM Group introduced a new UNI/PdR 125:2022 certification that recalls the UNI ISO 30415:2021 "*Human resources management: Diversity and inclusion*" that certifies a gender equality management system and its importance for the TIM Group.

Additionally, the TIM Group recognizes the risk of electromagnetic pollution which is inherent to the telecommunication industry. Accordingly, in relation to construction of mobile network infrastructure (radio base stations), all regulations and processes on electromagnetic pollution limits are strictly respected by the TIM Group.

Further, the TIM Group believes that the digital sector is the engine of economic and social growth. Accordingly, it takes proactive steps to offer products and services which cater towards a green economy. The TIM Group has been the driving force towards digital transition in Italy and Brazil.

In 2024, the TIM Group has improved its position in the ratings of the environmental organization CDP (formerly Carbon Disclosure Project), earning an "A" and improving on last year's performance, when it had received a "B" rating, and confirming its position once again this year as one of the world's promoters of concrete initiatives to combat climate change. TIM's achievement, with an "A" rating in both in Italy and Brazil, is the result of the decarbonization strategy that sets long-term ESG targets and aims to reduce greenhouse gas emissions through energy efficiency, increasing use of renewable energy and choosing sustainable suppliers.

In 2023, Sustainalytics also classified the TIM Group as industry top rated company with a low ESG risk. In 2023, Moody's ESG Solutions ranked the TIM Group in its first industry group, among other telecommunications companies with an ESG performance above the sector average with a low risk. Furthermore, other remarkable ESG ratings providers have rated the TIM Group. For example, ISS ESG rated the TIM Group with "B-" level and awarded the TIM Group with a "prime status," whereas MSCI ranked both TIM Italy and TIM Brasil in 2023 with an "A" level. Other important recognitions for the TIM Group in 2023 were (i) the inclusion in the "Dow Jones Sustainability Europe Index" through the industry leaders and first telecommunications company in Italy, (ii) the inclusion in the "Refinitiv D&I Index" as the first telecommunications company worldwide, (iii) the Platinum LEED (Leadership in Energy & Environmental Design) certification for the South Milan data center premises and Gold LEED for other 3 data centers and (iv) the award at the Institutional Investor Awards 2023 with the "Best ESG Program 2023" in the "Mid Cap" category. The TIM Group has also been awarded the "Diversity Brand Award 2024" for its commitment to diversity and inclusion matters.

Property and Leases

The TIM Group operated through 692 monobrand stores (212 owned stores, 304 franchise stores, 184 dealer monobrand) in Italy in addition to its headquarters and branch office in Rome.

Insurance

The TIM Group maintains insurance coverage for property damage, data breaches, business interruptions, directors' and officers' liability, professional indemnity, third party liability, product liability, employer's liability, crimes, goods in transit liability and construction related liability. The TIM Group's insurance coverage is regularly reviewed to ensure that it is adequate and that deductibles and premiums are at reasonable levels. The TIM Group does not insure against certain operational risks for which insurance is unavailable or which can only be insured on what it believes to be on unreasonable terms, such as political risk, war and terrorism. The TIM Group believes that the levels of risks insured, risks retained and the limits of insurance indemnity are broadly in line with industry practice, but it cannot guarantee that it could not be adversely affected by damage or accidents despite possessing said insurance coverage.

Legal Proceedings and Disputes

From time to time, the TIM Group has become involved in litigation relating to claims arising out of its operations in the normal course of business. Some of the material litigations involving the TIM Group are described below, along with the potential financial loss to the TIM Group, calculated as of December 31, 2023 (unless specifically stated below, the TIM Group does not make any determination or estimation as to the predicted outcome of the following litigations). Additionally, for informational purposes only, certain amounts in this section "*Legal Proceedings and Disputes,*" have been translated from BRL into Euro, and the exchange rate used for this translation is calculated at the average exchange rate for the year ended December 31, 2023.

- *Vivendi case:* On December 15, 2023, TIM was notified of a writ of summons from Vivendi, in its capacity as shareholder of TIM, challenging the validity and effectiveness of TIM's board of directors' resolution of

November 5, 2023, which approved the Transactions and the Transaction Agreement. Vivendi did not file a precautionary injunction, nor did it seek an emergency injunction against the execution of the board of directors' resolution and the resulting contractual acts. TIM has entered an appearance in the lawsuit on February 12, 2024 to challenge the merits of the arguments and claims made by Vivendi, confirming the validity of the board of directors' resolution and the contractual arrangements entered into with Optics to give effect to the Transactions. On April 11, 2024, TIM and Vivendi respectively filed their first additional briefs, by which neither party filed additional claims nor requested precautionary injunctions. The first hearing has been scheduled for May 21, 2024.

- *Brazil unit case*: The Brazil Business Unit is involved in certain disputes with tax and regulatory authorities which could lead to a loss of approximately BRL 19,200 million (€3,600 million). These disputes include disputes with: (i) federal tax authorities, over among things, disallowance of tax effect of mergers, tax deductibility of amortization of goodwill, irregularities in managing and reporting of certain regional tax benefits, collectively, amounting to potential loss of approximately BRL 3,100 million; (ii) state tax authorities, in relation to *Imposto Sobre Circulação de Mercadorias e Serviços* (state tax on circulation of goods and services) over among things, reduction of the tax base due to discounts granted to customers, use of tax credits declared by group companies, with respect to the return of loaned telephone handsets, collectively, amounting to potential loss of approximately BRL 10,400 million; (iii) municipal tax authorities over certain matters which could amount to a potential loss of approximately BRL 1,700 million; and (iv) with *Fundo para o Desenvolvimento Tecnológico das Telecomunicações* (FUNTELL, Brazilian fund for technological development of telecommunication) and *Fundo de Universalização dos Serviços de Telecomunicações* (FUST, Brazilian fund for universalization of telecommunication services) over contributions to ANATEL which could amount to a potential loss of approximately BRL 4,000 million.

- *Golden Power cas*e: TIM has appealed the imposition of penalty of €74.3 million in 2017 under the Golden Power Legislation for failure to notify Vivendi group's acquisition of control over the TIM Group. The matter is currently being appealed before the Administrative Tribunal for the Lazio Region (*Tribunale Amministrativo Regionale del Lazio*) and the penalty has been suspended, in light of the TIM Group posting a guarantee bond of €74.3 million with the Italian Golden Power Authority in May 2018 and renewed in November 2022. See "*Risk Factors—Risks Related to The TIM Group—Risks Related to the TIM Group's Legislative and Legal Framework—The Italian Golden Power Authority has exercised, and may in the future exercise, its significant powers under the Golden Power Legislation with respect to the TIM Group, including with respect to the TIM Group's ability to enter into strategic transaction*s."

- *Antitrust case A42*8:

  - Vodafone has filed an appeal in relation to the TIM Group's non-compliance with AGCM's order in relation to the TIM Group's subsequent conduct after the judgements in relation to abuse of dominance (the "**Antitrust Case A428**"), although on January 13, 2017, the TIM Group was served notice of AGCM's final assessment which had recognized that the TIM Group had complied with the Antitrust Case A428 decision.

  - Colt Technology Services commenced legal action for alleged inefficiency and discriminatory conduct by the TIM Group in the wholesale service supply process in light of Antitrust Case A428. Writ of summons before the Milan court were served in August 2015. The damage claimed was quantified as €27 million in loss of profits and damages to its image and commercial reputation. Colt Technology Services had previously advanced an extrajudicial claim for approximately €23 million in June 2015, which the TIM Group had rejected. On February 21, 2024, the Court of Milan rejected in its entirety all claims raised by Colt Technology Services, sentencing the latter to refund the legal expenses.

  - COMM 3000 S.p.A. (formerly known as KQNQWest Italia S.p.A.) commenced legal action for alleged anticompetitive behavior and abuse of dominance by the TIM Group over the period 2009-2011, in the form of technical boycotting by the TIM Group in light of Antitrust Case A428. They claimed damages for a total of €37 million. In the judgment with ruling in April 2019, the Court of

Rome partially received the petitions of COMM 3000 S.p.A., sentencing TIM to pay an amount lower than the amount in the COMM 3000 S.p.A.'s damages claim. In June 2019, TIM appealed against the judgment. In the judgment given in April 2021, the Court of Appeal of Rome partly upheld TIM's appeal, reducing the amount of the compensation due to COMM 3000. In November 2021, TIM has appealed to the Italian Supreme Court (*Corte Suprema di Cassazione*) over the judgment of the Court of Appeal of Rome. The hearing in chambers was held on June 13, 2023. By interim order of July 19, 2023, the Court remanded the case. A new hearing has not been scheduled yet.

- Eutelia and Clouditalia Telecomunicazioni S.p.A. commenced legal action for alleged technical boycott and margin squeeze conduct by the TIM Group in light of Antitrust Case A428. They claimed damages for a total of €40 million. TIM filed an appearance, contesting the claims made by the opposing party and submitting a counterclaim, subject to quantification of the damages incurred during the proceedings. The public hearing for the examination of the court-appointed expert witness, originally scheduled for October 18, 2023, has been postponed to May 22, 2024.

- *Antitrust Case A514*:

  - TIM has commenced an appeal to the Italian Council of State (*Consiglio di Stato*) in relation to the fine of approximately €116 million paid by the TIM Group in 2020 for abusing its dominant position by putting in place an anticompetitive strategy designed to hinder the competitive development of investment in ultrabroadband network infrastructure ("**Antitrust Case A514**"). TIM's previous appeal before the Administrative Tribunal for the Lazio Region was rejected. TIM has appealed before the Italian Council of State against the decision of the Administrative Tribunal for the Lazio Region. Currently, the Italian Council of State arranged for an official technical consultant to be appointed to provide a report on three aspects relating to the profitability of the TIM Group's investment in White areas.

  - In January 2022, Irideos commenced legal action against TIM in the Court of Rome for alleged anti-competitive behavior of TIM from 2017 to 2019 (with effects also in subsequent years) on the wholesale market and the retail market in light of the Antitrust Case A514. Irideos has sought compensation claim of €23.2 million. At the hearing held on June 1, 2022, the investigating judge assigned the parties time for depositing the briefs with terms running from February 15, 2023, and deferred the case to be heard on June 7, 2023. The public hearing for the examination of the evidence was held on October 5, 2023. Having acknowledged the request for postponement made by Irideos, on the grounds of the proceedings pending on Case A514 before the Italian Council of State, the Court adjourned the case to the hearing of October 10, 2024.

- *Open Fiber case*: In March 2020, Open Fiber ("**OF**") commenced legal action against TIM before the Court of Milan, claiming damages of €1,500 million for alleged abuse of an exclusive and dominant position in relation to OF. The alleged actions consist of: (i) preemptive investments in FTTC networks in white areas; (ii) initiating specious legal action to obstruct Infratel tenders; (iii) spurious repricing of certain wholesale services; (iv) commercial lock-in offers on the retail market; (v) false disclosure to AGCOM in connection with the approval of a wholesale offer and spreading rumors about TIM being interested in acquiring OF; and (vi) discriminatory access conditions to TIM passive infrastructure. Enel S.p.A. intervened in the proceedings, asking that TIM be ordered to compensate all damages suffered and being suffered by Enel S.p.A. and OF, without, however, quantifying such damages. During the course of proceedings, OF redetermined the damage allegedly suffered, increasing it to €2,600 million plus interest and monetary revaluation. OF has also clarified that it believes such damages are still to be suffered. Enel S.p.A. then quantified the damages allegedly suffered as approximately €228 million, plus interest. On October 19, 2022, the hearing was held for admission of the evidence, after which the judge reserved the right to deliberate. By order of July 17, 2023, the Court of Milan lifted the reservation and scheduled the hearing for closing arguments on April 3, 2024. At that hearing, the judge asked the parties to file brief summary notes to outline the conduct (and alleged violations) at issue in the case and decided to schedule a further hearing to await the outcome of the assessments by the court-appointed technical expert that has, in the meantime, been ordered

in the antitrust case currently pending before the Council of State. As a result, the case was adjourned to the following hearing on June 12, 2024.

- *Eutelia and Voice Plus appeal*s: In June 2009, Eutelia and Voice Plus commenced legal action against TIM for investigation into TIM's alleged acts of abuse of dominant position in the premium services market (based on the public offer of services provided through "**Non-Geographic Numbers**"). They claimed damages at a total of approximately €730 million. In a judgment issued in February 2018, the Milan Court rejected the Eutelia and Voice Plus' claim for compensation, ordering them, jointly and severally, to pay the legal costs. In March 2018 Eutalia and Voiceplus proposed an appeal against the judgment at first instance. TIM appealed against the claim, requesting confirmation in full of the judgment in the first instance. The appeal of Eutelia and Voiceplus was fully rejected with the judgment of August 5, 2019. In December 2019, Eutelia and Voiceplus appealed to the Italian Supreme Court over the judgment of the Court of Appeal. TIM notified a counterclaim asking confirmation of the ruling appealed against. The hearing in chambers was held on February 16, 2023. On the request of Eutelia and Voice Plus, at the hearing of February 16, 2023, public discussion was ruled, for which a date has not yet been scheduled.

- *Poste (Italian postal service) appea*l: Poste has appealed the decision of the Rome Court of Appeals from 2019 where it had failed to receive a favorable order for recovering approximately €58 million in relation to certain contracts for supply of IT goods and services from the TIM Group. By order of February 29, 2024, the Italian Supreme Court declared Poste's appeal inadmissible.

- *Iliad case*s:

  - Iliad S.p.A. ("**Iliad**") has commenced legal action against the TIM Group for application of unlawful contractual conditions to customer with reference to mobile and fixed telephone offers for €120.4 million. The case has been deferred for the ruling of the conclusions to the hearing of May 28, 2024.

  - Iliad has also commenced legal action against the TIM Group for anti-competitive conduct, including through the Kena Mobile brand, which was allegedly aimed at hindering Illiad's entry to and consolidation in the mobile phone market in Italy, seeking damages of at least €71.4 million. TIM filed an appearance, counterclaiming with reference to the denigration implemented by Iliad in regard to TIM and formulating a symmetrical claim for compensation for damages. In the first preliminary brief, Iliad updated its claim for damages, taking it to €242.8 million. Following submission of the closing arguments and statements of defence, the Court of Milan partially upheld Iliad's claim, declaring that TIM's actions were unlawful, pursuant to Article 2598 paragraph 1 no. 3 of the Italian Civil Code, with reference to only one of the violations alleged by Iliad. As to the Iliad's claim for damages, the Court of Milan dismissed it arguing that it was totally ungrounded. As a consequence, on December 15, 2023, Iliad challenged the ruling of the Court of Milan and filed an appeal. The first hearing will be held on May 8, 2024.

  - Iliad has also commenced legal action against among other, TIM and INWIT before the Court of Milan to assess the alleged unlawful conduct of INWIT, Telecom and Vodafone, consisting of refusal to allow Iliad to upgrade its mobile telephone transmission systems installed on INWIT-owned infrastructures. Iliad is seeking compensation for the damages allegedly suffered, which it has reserved the right to quantify during the course of proceedings. The first appearance was filed at the hearing held on April 5, 2023, and the court reserved the objection of nullity of the writ of summons raised by TIM. At the hearing on March 6, 2024, the Court scheduled the next hearing for May 14, 2024

- *C6 partnership–- Arbitration proceedings*: The TIM Group and C6 bank had entered into an arrangement under which the TIM Group would receive commission on every account opened by the TIM Group customer. Additionally, the TIM Group received shares in the bank upon achieving certain targets connected to the number of active accounts. Disagreement between the TIM Group and C6 bank has led to the parties taking the matter into arbitration. If the decision is held against the TIM Group, its partnership with C6 bank will be terminated.

- *Oi acquisition–- Arbitration proceedings*: The TIM Group is disputing closing adjustments under the share purchase agreement entered into in relation to the acquisition of Oi and is seeking to be indemnified for approximately BRL 231 million. The matter is pending in arbitration proceedings. The TIM Group has deposited BRL 670 million with the 7th Business Court of the Judicial District of Rio de Janeiro, with such deposit to be released once the arbitration proceedings are completed.

- *Fastweb (Ethernet ATM migration*): The TIM Group has commenced legal action against Fastweb for failing to achieve the migration from ATM bitstream technology to Ethernet bitstream technology in the agreed manner and has sought, among other reliefs, approximately €79.2 million in damages. Fastweb filed an appearance and submitted a counterclaim for abuse of a dominant market position and breach of contract counterclaiming around €81.4 million in damages. Having noted that the counterclaim made by Fastweb would appear to go beyond the profile of breach of contract and that, in this case, the specialized business chambers may be competent to judge the matter, the investigating judge has returned the case to the Chambers President for due consideration. The Chambers President has submitted the case to the President of the specialized business chambers. The first hearing was scheduled for December 14, 2022. The hearing for the admission of the preliminary motions has been postponed to June 13, 2023. Following the filing of the preliminary briefs, Fastweb updated the quantification of the damages allegedly suffered as a result of TIM's unlawful conduct to approximately €101.1 million, of which €13.2 million are conditional upon the Court upholding TIM's main claim. At the hearing held on June 13, 2023, the investigating judge reserved judgment. The investigating judge then rendered a decision and ordered the appointment of an expert witness. The hearing for the examination of the court-appointed expert witness has been scheduled for September 17, 2024.

- *Restitution of license fee from 199*8: The TIM Group had commenced legal action against the Italian government seeking compensation of concession charges for 1998 of approximately €529 million, excluding among other things, legal interest, where its claim was held to be inadmissible. TIM Group has appealed the order. On April 3, 2024, the Court of Appeal of Rome ruled in favor of the TIM Group's appeal, awarding it approximately €1 billion. This sum includes the original license fee of approximately €500 million, in addition to revaluation and accrued interests. The judgment is immediately enforceable. However, as of the date of this Exchange Offer Memorandum, it is uncertain whether the Italian government will appeal the judgement.

- *Telenergia litigatio*n: TIM had commenced a litigation on November 17, 2022, against Telenergia before the Court of Rome, with a claim equal to approximately €34 million relating to the reimbursement to TIM of surtaxes paid by TIM, through Telenergia, to the Italian tax authority for the supply of energy in 2010 and 2011. The litigation was initiated on the basis that, due to the most recent guidance applicable to energy supply, a customer (i.e. TIM) is entitled to seek reimbursement from the Italian tax authority of undue surtaxes related to the supply of energy only upon conviction of the supplier (i.e. Telenergia).

For additional information and a description of other litigation of the TIM Group, please see Note 23 to the 2023 TIM Audited Consolidated Financial Statements. For additional details in relation to regulatory proceedings, please see "*TIM Group Regulation*."

BUSINESS OF NETCO

This business section includes certain technical terms that are commonly used within NetCo's industry. See "Glossary" for a detailed explanation of these terms. The estimates regarding NetCo's market share and relative market share are derived from the TIM Group and Optics internal data and certain extrapolations. For more detailed information on the industry in which NetCo operates, please see "NetCo Industry Overview." Unless explicitly stated otherwise, the following summary of NetCo's business as well as references to the "TIM Group" reflect the effects and implications of the Transactions as if they had already occurred. See "Summary—The Transactions."

Overview

NetCo is the largest national independent not vertically integrated open-source fixed-line network provider by revenue in a major European country with €3,977 million revenue and €1,948 million Organic EBITDA-AL for the year ended December 31, 2023, after giving *pro forma* effect to the Transactions. NetCo will be the leading national fixed-line wholesale network in Italy, providing mission-critical digital infrastructure to households and businesses. As of December 31, 2023, NetCo, through its comprehensive suite of services and indirectly via its extensive customer base comprising approximately 550 telecommunications operators, has captured 84% of the access services for the fixed broadband market share, excluding FWA and 76% including FWA, as of September 2023. Additionally, NetCo holds in excess of 60% of premium connectivity market share as of December 31, 2022.

NetCo exhibits attractive infrastructure characteristics, including: (i) a difficult to replicate, operate and maintain network infrastructure with broad national FTTC coverage and an expanding FTTH network with limited overlap outside of Black Areas (as defined below), (ii) strong underlying demand in the Italian fixed broadband market, (iii) longstanding relationships with major operators, including TIM as the anchor tenant, as well as Fastweb, Vodafone, WindTre and SkyWifi, who generate high sales volumes, (iv) a hedge to technology risk, as its existing ADSL and FTTC network provides a natural hedge against the possibility of slower than expected FTTH take-up, and (v) strong profitability and cash flow conversion, with Organic EBITDA-AL for 2022 and 2023, after giving *pro forma* effect to the Transactions, of €1,812 million and €1,948 million, respectively.

NetCo's extensive network infrastructure in Italy will include 9.0 million kilometers of backbone fiber optics, more than 7 million square meters of real estate and more than 14.8 million kilometers of fiber optics corresponding to 372,000 kilometers of fiber cables, of which 135,000 kilometers of backbone and 237,000 kilometers of access as of December 31, 2023. After giving effect to the Transactions, NetCo will also have a strong workforce of approximately 19.9 thousand employees.

Italy represents one of the most attractive markets in Europe, given its low fixed broadband penetration in comparison to other European markets and is the only country to lack a DOCSIS co-axial cable infrastructure among major European countries. See "*NetCo Industry Overview*." Within Italy, NetCo's FTTx infrastructure stands at approximately 22 million homes passed as of December 31, 2023, delivering good broadband speeds of 50 to 200 Mbps. Currently, there are 9.2 million homes passed in Italy by FTTH infrastructure representing an attractive opportunity for continued FTTH development. Fiber network overlap is currently limited to Black Areas (as defined below) only and there is a low risk of new entrants in the FTTH market given the challenges of building a scaled infrastructure and driving penetration. NetCo is well positioned to benefit from the secular growth trend of fixed broadband in Italy, which is expected to reach 88% penetration by 2031 as a result of expected FTTH coverage expansion and progress in digitalization.

A significant portion of NetCo's subscribers comes from operators other than the TIM Group. NetCo's relationships with its direct customer base are also characterized by longevity, with an average customer relationship duration of multiple years and anchor customers that, following the Transactions, will include the TIM Group and other leading operators underpinned by multi- term contracts.

NetCo's fiber roll-out strategy is backed by strong and stable profitability and cash flow generation, with Organic EBITDA-AL Margins of approximately 49% and 47%, for the years ended December 31, 2023 and 2022, respectively, after giving *pro forma* effect to the Transactions. NetCo's FTTC network also provides high stability and long term visibility of revenue.

NetCo's physical infrastructure assets are central to Italy's economy, providing long term cash flows with limited correlation to economic cycles.

Furthermore, NetCo is backed by strong support from KKR, which has a strong track record in investing in infrastructure. NetCo was also subject to a memorandum of understanding (the "**MoU**") between the Italian Government and KKR signed on August 10, 2023 with respect to the Italian government obtaining a minority stake in NetCo. The MoU has been superseded by the Agreed Form SHA, which reflects the provisions of the MoU (with such amendments as agreed between KKR and the Italian government).

NetCo's Key Strengths

NetCo is expected to benefit from the following competitive strengths, some of which will be further strengthened by the successful completion of the Transactions:

NetCo owns the largest independent fiber network in Europe and is expected to be the first independent network player in a major European economy.

NetCo is expected to become the main national fixed line wholesale network in Italy and the third largest by revenue in Europe. Its scaled national infrastructure network is expected to become the first largest and independent fiber network (including its FTTH and FTTC networks) in a major European economy, meaning that it will not be vertically integrated or owned by a fixed-line or mobile telecommunication operator and will be able to offer services on an operator-neutral basis and as an independent player. For the year ended December 31, 2023, after giving *pro forma* effect to the Transactions, NetCo generated €4 billion in revenue. NetCo is expected to be the only operator in Italy with a national infrastructure capable of reaching almost every home passed. With an infrastructure network that is invested across several fixed line technologies (ADSL, FTTC and FTTH), NetCo's FTTx coverage extended to 22 million homes passed and its FTTH coverage of 9.2 million homes passed as of December 31, 2023 represented 58% of its roll-out plan.

NetCo is expected to benefit from 9.0 million kilometers of backbone fiber optics, more than 7.0 million square meters of real estate and more than 14.8 million kilometers of fiber optics corresponding to 372,000 kilometers of fiber cables, of which 135,000 kilometers of backbone and 237,000 kilometers of access network and NetCo is also expected to benefit from a strong workforce of 19.9 thousand employees.

NetCo's fixed line network in Italy represents mission-critical strategic infrastructure.

NetCo is expected to own a wholly penetrated fixed-line network in Italy, potentially ensuring the widest national coverage through a network that will extend across several technologies, including both copper and fiber, and reaching nearly all Italian households and businesses. Its nationwide network includes 13.7 million copper accesses, providing nearly 100% FTTC coverage and NetCo is committed to increasing its 1.5 million FTTH accesses as of September 30, 2023. The scale and depth of NetCo's infrastructure makes it hard to replicate.

NetCo underpins a mission-critical fiber connectivity market with growing demand for reliability, high speeds and bandwidth from across society, including consumers, businesses, the public sector and carriers. With increasing digitization in all areas of life and business and continuous growth in Internet traffic, the mission-criticality of NetCo's fixed line network is underlined by the fact that down time in the network could trigger significant financial, social, reputational and security impacts.

NetCo has strong relationships with all major Italian operators and will further benefit from the Master Services Agreement with TIM.

NetCo is expected to have a strong customer base with blue-chip customers, in areas where it competes, and commercial relationships with all the major operators in the areas where it is the sole network provider of ADSL, FTTC and FTTH. In particular, in Black Areas, TIM Group as NetCo's anchor tenant, as well as Fastweb, Iliad and Tiscali combined account for more than half of NetCo's subscriber base. NetCo also benefits from agreements with Vodafone, WindTre and SkyWifi, either directly or via wholesale agreements with Fastweb.

Additionally, upon the successful completion of the Acquisition, on the Acquisition Closing Date, TIM and NetCo will enter into a master services agreement (the "**Master Services Agreement**" or "**MSA**") pursuant to which NetCo will provide or procure certain services to TIM and TIM will provide or procure certain services to NetCo. NetCo will mainly provide: (i) a variety of access services required for the purposes of the transmission of data and voice traffic directed to and/or generated by TIM's end customers, (ii) premium connectivity services such as point-to-point fiber optic connectivity, (iii) network services consisting of engineering services for the purposes of network operations and maintenance, delivery services for the access activation in favor of TIM's end customers and assurance services for solving faults experience by TIM's end-consumers, (iv) real estate services mainly regarding the use, by TIM, of certain real estate properties leased or subleased by NetCo, (v) energy supply and procurement services (which will be specifically provided by Telenergia,) and (vi) other minor services. On the other hand, the TIM Group will mainly provide certain ancillary services including : (i) mobile telecommunication services for NetCo's employees, (ii) hosting arrangements within TIM Group's data centers, (iii) access to the corporate network, (iv) the provisions of IT services supporting NetCo's employees activities and (v) the provision of certain service components (such as bandwidth) enabling NetCo to sell aggregated services to the OAOs. The MSA will have a general duration consisting of a first term of 15 years with a renewal mechanism for an additional term.

NetCo will be the main wholesale operator in Italy and anticipates the completion of its FTTH infrastructure deployment in Grey Areas as outlined in the NRRP tenders, by 2027.

NetCo reached 84% of the access services market for fixed broadband, excluding FWA, and 76% including FWA as of September 2023. NetCo is expected to become the sole wholesale provider of fixed broadband (including ADSL and FTTC) at scale in each area it serves in Italy, except for FTTH where there is network overlap in Black Areas. NetCo's unique positioning in the fixed-line broadband market is underpinned by the extensive and comprehensive reach of its network infrastructure due to significant historical investment, which is difficult to fully replicate mainly due to the high costs and capital expenditures associated with developing a comparable infrastructure that offers similar national coverage, latency and bandwidth.

In Italy, FTTH coverage and competition is segmented according to European Union guidelines into Black, Grey and White Areas, with an added level of granularity within Grey and White Areas provided by the TIM Group's accounting of the impact of the "Italia a 1 Giga" plan (based on management's estimates):

- White Areas are areas without ultrabroadband (UBB) networks (connectivity), where private investors do not intend to invest in the next three years without public support. Within these White Areas, low density area (reaching approximately 4.3 million households) s have been granted a concession by Infratel to Open Fiber for service provision. In contrast, in very low density areas (reaching approximately 0.5 million households), undertaking fiber roll-out investments is not considered economically efficient.

- Grey Areas are areas in which an ultrabroadband network is present or is expected to be developed in the next three years by a single private operator per lot. Subsidies associated with the "Italia a 1 Giga" plan are allocated to only specific segments of these Grey Areas. Given the lack of significant overlap between NetCo's and Open Fiber's fiber networks, NetCo and Open Fiber act as the sole providers in their respective subsidized areas.

- Black Areas are areas in which at least two ultrabroadband networks of different operators are present or are expected to be developed over the next three years. In Italy's case, the Black Areas would be those areas of the market where both NetCo and Open Fiber are present and their respective fiber networks overlap.

Specifically, outside of certain Black Areas, where NetCo's market share and that of its sole competitor, Open Fiber, are determined by wholesale agreements with telecommunications operators, there is limited FTTH overlap and NetCo is expected to remain the main FTTH provider where NetCo rolls out FTTH, as a result of unit economics and government concessions:

- In certain Grey Areas, NetCo has started to roll out its FTTH network, aiming to bring its coverage up from 19% to 100% by 2027, while competitors have no official roll-out plan in these areas and low ARPU relative

to capital expenditure per house passed makes competition and overbuild, in which a network provider builds a competing network in an area already served by an existing network, economically unattractive.

- In other, more suburban Grey Areas, the roll-out of FTTH is allotted to either NetCo or Open Fiber on an exclusive, subsidized, area-by-area basis as determined by the result of the "Italia 1 Giga" tender mapping through the NRRP. In May 2022, the TIM Group was awarded seven lots for the FTTH rollout, covering approximately 2.9 million "unique addresses" that could potentially receive connectivity. This number was halved following the completion of walk-in activities in July 2023. Italy's "Italia a 1 Giga" plan aims to provide better connectivity in rural areas, covering approximately 6.9 million unique addresses. The plan involves subsidies of €3.7 billion and aims to cover areas not included in any fixed ultrabroadband roll-out plan. Under the tender scheme, subsidies to cover a maximum of 70% of the overall eligible investments are available under a roll-out timetable to be completed by June 2026. The temporary business group (raggruppamento temporaneo di imprese) between TIM and FiberCop, which has been awarded €1,628 million of subsidies to roll out fiber to its seven lots under the "*Italia a 1 Giga*" tender represent the maximum amount of subsidies that was available to it under the scheme. As part of the Acquisition, the "Italia 1 Giga" plan and its associated subsidies will be transferred, in whole or in part, to NetCo.

In White Areas, NetCo is expected to mainly operate through its existing FTTC network. No NetCo FTTH roll out is foreseen in certain White Areas where Open Fiber operates as the sole FTTH network provider.

Although wholesale telecommunication operators in Italy currently compete on a single network, with the exception of Black Areas and certain Grey Areas where long-term wholesale agreements are in place, Italy has two main network operators deploying fiber nationally: NetCo and Open Fiber. In contrast, peer European countries such as Spain, Germany, the United Kingdom, and France feature at least four fiber network deployers focusing on different geographic areas.

Italy also features a supportive framework incentivizing investments in digital infrastructure with subsidies and support through the aforementioned "Italia a 1 Giga" plan.

NetCo operates in a very attractive Italian market with strong digitalization tailwinds and where its FTTC network provides a hedge against slow FTTH take-up.

Italy is one of the most attractive markets in Europe, having a low fixed broadband penetration rate of 66% of households in comparison to rates exceeding 80% for peer European countries as of 2021.

Italy is the only major European country to lack DOCSIS co-axial cable infrastructure, having instead one primary nationwide network for Internet connectivity based on copper infrastructure. See "*NetCo Industry Overview*." This has resulted in an extensive, high-quality FTTC network with average distance between cabinets and premises among the shortest in Europe, thereby ensuring high connection speeds. This FTTC network provides a valuable complement to the significant opportunities for FTTH development in Italy.

These FTTC connections remain resilient and cash generative in the Italian market, delivering high speed broadband speeds of up to 200 Mbps, supporting a strong customer base in the long term. As of September 30, 2023, FTTC accounted for approximately 65% of NetCo's subscribers, whereas FTTH and ADSL and traditional voice accounted for 11% and 25%, respectively. In the medium term, FTTC connections are expected to maintain stability as the migration from FTTC to FTTH is anticipated to be balanced by the shift from legacy technologies (primarily ADSL and traditional voice) to FTTC.

As a result of the sufficiency and quality of Italy's FTTC connections, the FTTH market in Italy also remained underpenetrated at 13%, as compared to an average of 35% across the European Union as of September 30, 2022 (*source: FTTH Council, April 2023*), supporting significant digitization opportunities as customers migrate. The availability of FTTH in the Italian market is anticipated to grow rapidly from 53.7% coverage of homes available in 2022 to 85% by 2026, with NetCo expected to be a significant contributor to such growth. See *"—NetCo will be the main wholesale operator in Italy and anticipates the completion of its FTTH infrastructure deployment in Grey Areas as outlined in the NRRP tenders, by 2027.*"

For NetCo, the ownership of the sole national FTTC network provides a natural hedge against the possibility of slower fiber take-up by subscribers, despite FTTH becoming widely available.

Stable revenues with large, resilient cash flows.

NetCo's strategy is underpinned by strong and stable profitability and cash flow generation with high long term visibility, with Organic EBITDA-AL for 2022 and 2023, *pro forma* after giving effect to the Transactions, of €1,812 million and €1,948 million, respectively. In particular, NetCo's resilient cash flows are further underpinned by its stable cash flow generated by its ADSL and FTTC services and certain multi-year wholesale contracts in place, including the Master Services Agreement.

After giving *pro forma* effect to the Transactions, for the year ended December 31, 2023, NetCo's revenue amounted to €4 billion.

As NetCo rolls out its fiber network, it is expected that NetCo will significantly reduce its operational costs base and capital expenditure requirements. After giving pro forma effect to the Transactions, for the year ended December 31, 2023 and 2022, NetCo's assurance and maintenance capital expenditures represented approximately 18% and 21% of its capital expenditures, respectively. FTTH and FTTC are more energy-efficient than copper, requires lower central office density and less maintenance than copper, and their greater reliability requires fewer field support staff.

KKR's track record in managing infrastructure in Italy in partnership with the TIM Group provides a strategic advantage in managing NetCo following the Transactions, as further supported by a slate of blue-chip investors

KKR is a leading global investment firm with more than $553 billion of assets under management, including more than $50 billion in infrastructure assets. After the Transactions, KKR will indirectly exercise sole control over NetCo. KKR will be able to provide NetCo with a dedicated team of highly experienced professionals, enhanced through the interaction with KKR Capstone, a team of approximately 100 operating executives who work with portfolio company senior managers to help identify and implement operational improvements.

KKR's investment in NetCo will follow its strong track record of investments in fiber infrastructure and will represent a natural continuation of its investment in FiberCop in which it indirectly acquired a 37.5% stake in 2021. KKR has successfully completed eight fiber transactions globally, including, among others, the acquisition of a 30% stake in the Norwegian Telenor Fiber AS in 2023 and the acquisition of a 49% stake in the Spanish dark fiber operator Eléctrica Infraestructuras de Telecomunicación SAU (Reintel) in 2022. KKR believes that through these acquisitions it has helped accelerate the speed of fiber roll-out, customers' and subscribers' migration and the overall development of the telecommunications infrastructure space in the respective countries. With its involvement in NetCo, KKR aims to leverage the strong track record and experience in Italy it has gained since the 2021 acquisition of its stake in FiberCop, the TIM Group company that combines its secondary network and its fiber network infrastructure.

Furthermore, a blue-chip slate of investors will be investing in NetCo alongside KKR, as minority shareholders on the terms set forth in the Agreed Form SHA, including (directly or indirectly) the MEF, the Abu Dhabi Investment Authority, F2i (Fondi Italiani per le Infrastrutture) and Canada Pension Plan Investment Board. This strategic partnership is expected to align NetCo's strategy with the Italian digitalization agenda. See "*Principal Shareholders of Optics—Principal Shareholders of Optics—Shareholders' Agreement*."

NetCo's Strategy

NetCo, as a prominent independent wholesale provider of fixed broadband services in Italy, aims to benefit from growth opportunities from Italy's underpenetrated fixed broadband and ultrabroadband connections, as only approximately 66% of Italian households have a broadband connection versus an average European penetration of approximately 78% as of December 31, 2022 (*source: "Digital Economy and Society Index 2022" – European Commission*). The ongoing investment program to deploy FTTH, in certain areas, also benefits from government support under the NRRP for the "*Italia a 1 Giga*" and "*5G Backhauling*" initiatives, for which the TIM Group has been awarded and will receive a reimbursement totalling approximately 70% and 90% of the total eligible investments for the "*Italia a 1 Giga*" and "5G Backhauling" plans, respectively. Data consumption in Italy is expected to continue growing, driven primarily by broadband connectivity usage and will be further supported by the FTTH deployment.

As reported by AGCOM, fixed data traffic over the first nine months of the year has doubled between 2019 and 2023. Following a FTTH investment cycle, NetCo expects to become a focused infrastructure company with stable cash flows as a regulated business set to guarantee third-party access to large communication service providers.

Leading on sustainability by advancing digitization

NetCo intends to accelerate Italy's transition to a digital and sustainable economy through innovative infrastructure and digital solutions. NetCo aims to create efficient infrastructure with an increasing use of renewable energy, circular models for recycling and recovery of waste and selection of suppliers by evaluating their commitment to sustainability. The fiber roll-out is key to NetCo's sustainability project as, in addition to being more energy efficient, production of fiber results in significantly lower CO_2 emissions than copper wires, and fiber is made of abundant, non-harmful silicon dioxide. In addition, NetCo's energy-saving plan has already led to 28 GWh of fixed network energy savings in 2023 via decommissioning activities that included the shutdown of obsolete technologies and services, such as network exchanges. NetCo also adopts new processes to avoid waste and transform it into value, such as measuring the revenue generated by lower waste production and an increase in the resale of waste and unused goods

Go-to independent wholesale provider

NetCo intends to become the leading independent wholesale provider of fixed broadband services in Italy by offering services on a non-discriminatory operator-neutral basis. This will drive scale and network utilisation as well as further reinforce the aforementioned digitalization tailwinds in Italy.

Future-proofing investment program

While NetCo has built a next-generation fixed infrastructure through significant investments over time, it remains committed to further developing and future-proofing its network with the support of the NRRP plan by investing in the latest network technologies. NetCo intends to continue its FTTH roll-out, with the aim to achieve approximately 48% FTTH coverage of all households by 2025, up from approximately 38% as of December 31, 2023 and approximately 32% as of December 31, 2022.

NetCo's investment plans are expected to meet customer demand for high-speed services and to provide the critical high capacity fiber backhaul services required by mobile operators to meet the growing demand for mobile data services. Growth in data traffic is expected to increase the utilization of NetCo's fiber network. The ongoing investment program benefits from government support under the NRRP for the "Italia a 1 Giga" and "5G Backhauling" initiatives.

NetCo's cost savings potential

The shift from copper to fiber is expected to reduce the operational cost structure and result in slowing capital expenditure requirements, as fiber features lower real estate requirements, while increased take-up from the operational status of the planned deployment of FTTH network is expected to further contribute to economies of scale and growth in profitability. Further, additional significant savings are expected from other aspects of the business, including:

- the use of more efficient technology enabling a significant reduction in maintenance costs, providing for 4x savings for certain technologies; and

- the natural retirement of NetCo's workforce will contribute to adjust the staff base over time while allowing NetCo to hire young talent and reskilling the current workforce. For context, 53% of NetCo's workforce is more than 55 years old as of December 31, 2023.

Moreover, in relation to wholesale tariffs, AGCOM has approved, and the EU Commission has greenlighted, an increase in regulated access prices for 2023 in comparison to 2022, for certain jurisdictions, including Italy, which are applicable retroactively from January 1, 2023.

NetCo's Business

With €3,977 million revenue and €1,948 million Organic EBITDA-AL for the year ended December 31, 2023, after giving *pro forma* effect to the Transactions, NetCo is the first national independent open-source fixed-line network provider nor vertically integrated in a major European country by revenue. As the leading national broadband and ultrabroadband wholesale operator, with a significant portion of subscribers deriving from telecommunications operators other than the TIM Group, NetCo offers critical digital infrastructure related services and products in the Italian telecommunication sector.

NetCo's network is supported by a considerable asset base, featuring approximately 9.0 million kilometers of fiber optics backbone, 14.8 million kilometers of fiber optics corresponding to 372,000 kilometers of fiber cables, of which 135,000 kilometers of backbone and 237,000 kilometers of access network in primary and secondary networks and more than 7 million square meters of real estate as of December 31, 2023. NetCo's strong market position is further reinforced by a significant workforce of approximately 19.9 thousand employees. This positions NetCo as the largest national open-access fixed-line network provider in terms of homes passed that functions without vertical integration.

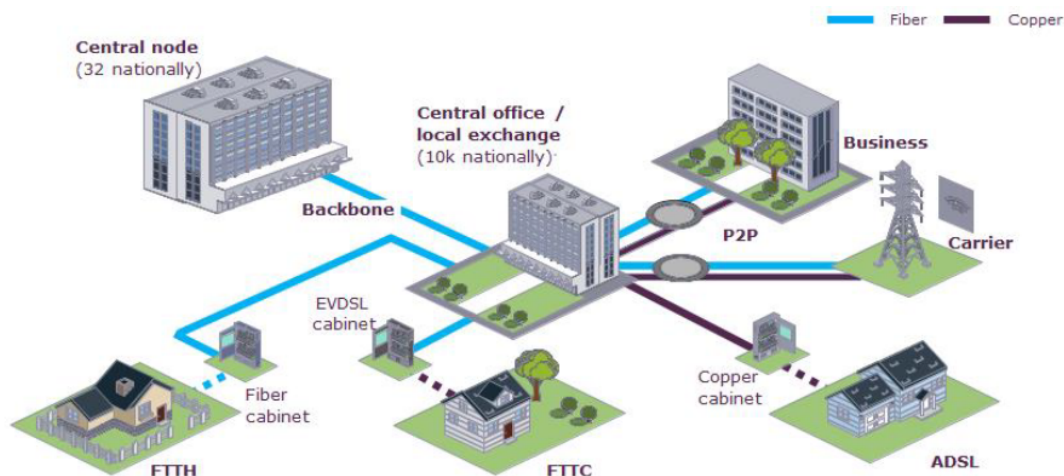
Historically, the cost-oriented model used by AGCOM for wholesale access markets offered by the TIM Group, upon the recommendation of the European Commission, is BU-LRIC^{+} (as defined below) model. The BU-LRIC^{+} model determines service pricing by considering network and equipment costs, projected sales volumes, maintenance, commercial costs and the impact of the cost of capital. However, NetCo is expected to become a wholesale-only enterprise within the scope of Article 80 of the European Electronic Communications Code (the "**EECC**") and Article 91 of the Italian Communications Code. Accordingly, NetCo's pricing determinations will no longer be based on a cost-oriented model but will be subject to criteria set in the AGCOM's Market Analyses. For more information, please see "NetCo Regulation" and "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Business Activity and Industry—To the extent cost-orientation obligations based on the BU-LRIC+ model, as implemented by AGCOM, could be maintained with regard to certain of NetCo's activities, NetCo's business, results of operations and financial condition may be adversely affected*." As a wholesale-only fixed-line network provider, NetCo's business model does not involve direct selling to the public but, instead, it includes a diverse range of network, broadband and ultrabroadband solutions to telecommunications operators, mainly through long-term wholesale agreements.

NetCo's business spans a comprehensive range of activities over its fixed-line network, leveraging broadband and ultrabroadband technologies. NetCo offers connectivity services (for voice and data related services) to telecommunications operators, develops fiber optic networks for wholesale clients and provides active access services and associated equipment to its access networks. In addition to these services, NetCo manages the maintenance and repair of its fixed-line network infrastructure and the care of related offices and buildings, as well as the provision of network engineering functions.

Backbone and Access Networks

NetCo's network infrastructure consists of two main components: the backbone and the access networks. The backbone consists mainly of optical fibers and transport nodes. The access network consists of copper cables, optical cables and access nodes. As of December 31, 2023, NetCo passed approximately 22 million homes with FTTC and FTTH-only (i.e. without taking into account overlaps with FTTC), demonstrating extensive coverage throughout Italy.

The graphic below shows, for illustrative purposes, the structure of NetCo's network, from the central nodes in the national backbone, to the local exchange and then onward to business and individual premises.



Source: Company information

Backbone

NetCo's backbone consists of a robust optical fiber network that connects 32 national central offices to 565 regional central offices and approximately 10,000 local central offices.

The 32 strategically located central nodes are also known as national points of presence ("**PoPs**") and implement the national backbone. These national PoPs are critical nodes for network traffic and are equipped with advanced control policies, service provisioning capabilities and secure customer data storage facilities owned by the telecommunication operators that buy connectivity services from NetCo. The national backbone architecture is entirely based on optical cables and designed to optimize performance and reliability.

The regional backbone consists of 565 regional central offices, regional PoPs, and connects the 32 national PoPs to the approximately 10,000 local central offices. Spanning 9.0 million kilometers, NetCo's regional backbone is constructed entirely of fiber optics cables. Through the access network it links customer sites to the PoPs of the telecommunication operators that buy connectivity services from NetCo.

Access Network

NetCo has an extensive access network infrastructure of approximately 114.4 million kilometers of copper pairs and 14.8 million kilometers of fiber passing through aerial and ducted cables, spanning the Italian territory. With respect to NetCo's FTTC network, which uses copper network to connect customer premises to the street cabinet), the fiber access network extends from the local central offices to the street cabinets, where active equipment is installed to manage the flow of information and ensure efficient and reliable communication. With respect to NetCo's FTTH network, no active equipment is installed and the access network, both primary and secondary, is entirely passive and consists of fiber optics cable and passive optical components.

Local PoPs are connected to street cabinets by either fiber or copper. As of December 31, 2023, 86% of cabinets were fiber-connected, supporting the FTTx infrastructure. The remaining 14% relied on copper connections to local PoPs, thereby providing ADSL connectivity to end-consumers. This configuration ensures a comprehensive service delivery across the network.

FTTx street cabinets are connected via optical cables directly to 3,700 out of 10,000 local central offices, thereby requiring a lower number of streets cabinets to operate.

Broadband connectivity is provided from the local central offices mainly using ADSL technology. As of December 31, 2023, NetCo's ADSL passed approximately 24 million homes.

The type of ultrabroadband connectivity provided through the street cabinets is determined by the cable infrastructure:

- *FTTC*. FTTC involves fiber connections to the cabinets, with copper lines completing the connection to households and commercial buildings. This configuration allows for higher speeds of up to 200 Mpbs compared to ADSL due to the fiber connection to the cabinets, while maintaining the existing copper infrastructure to individual premises. As of December 31, 2023, NetCo's FTTC services passed approximately 22 million homes.

- *FTTH*. FTTH represents the most advanced level of service, with fiber connections running from the cabinets directly to households and commercial buildings. This offers the highest speed available, with fiber optics connections extending to both street cabinets and individual premises. The development of FTTH infrastructure is a primary focus for the Italian government, market participants and the overall advancement of the network infrastructure. In October 2022, NetCo, as part of the TIM Group, was the first operator in Italy and among the first in Europe to launch the consumer and business offer with high-performance FTTH fiber connections up to 10 Gigabits per second using its XGS-PON (10 Gigabit capable Symmetric Passive optical networks) technology. As of December 31, 2023, NetCo's FTTH services reached approximately 9.2 million homes.

NetCo's strategic deployment of its network infrastructure underscores its commitment to deliver top-tier telecommunications services and maintaining its strong market presence in Italy. The dual investment in copper and fiber technologies alongside a strategic placement of PoPs reflects NetCo's dedication to constructing a scalable and resilient network and to adapting to the changing needs of its customer base.

Business Areas

Following the successful completion of the Transactions, NetCo's business will be mainly comprised of the following three business areas: the Access Services Area, the Premium Services Area and the Others Business Services Area. In 2023, on a pro forma basis, access services, premium and other services amounted to 61%, and 39% of NetCo's revenue, respectively, whereas in 2022, these services represented 64% and 36% of NetCo's revenue, respectively. The operations of each of NetCo's three business areas are described below.

Access Services

The primary revenue driver for NetCo is its Access Services area, which includes revenue deriving from services provided to telecommunications operators which have not developed any infrastructure or have developed partial infrastructure and use NetCo's network to provide various connections to their respective retail consumers via traditional voice, ADSL, FTTC and FTTH. Given Italy's lack of DOCSIS co-axial cable infrastructure, these technologies represent the major broadband and ultrabroadband options available, setting Italy apart from other European countries where cable infrastructure may also be prevalent. For more information, please see "*NetCo Industry Overview*." NetCo's Access Services offering encompasses the full range of these connectivity solutions. For the year ended December 31, 2023, after giving pro forma effect to the Transactions, NetCo's revenue from ADSL and traditional voice services, FTTC services and FTTH services represented approximately 31%, 60% and 9% of NetCo's revenue. In 2022, these services accounted for 36%, 58% and 6% of NetCo's revenue, respectively.

NetCo, being the Italian incumbent network operator, leases, in all or in part on non-discriminatory conditions, its network to other authorized telecommunications operators ("**OAOs**") and other licensed telecommunications operators ("**OLOs**"). NetCo's comprehensive architecture, enables it to meet the specific requirements of such telecommunications operators by offering access at different points within its architecture. The services provided are tailored to the particular segment of the network that the relevant operators intend to benefit from.

Access Services network coverage

As of December 31, 2023, NetCo's access network coverage was 24 million households, excluding FWA lines. NetCo is the sole wholesale provider of FTTC services at scale in Italy serving approximately 22 million households nationwide, except for limited portions of Black Areas where Fastweb and Vodafone can compose FTTC services but must still rent passive sub-loop unbundling (SLU) from NetCo to offer connectivity from the cabinet to their respective

end users (which is therefore accounted within ADSL & Traditional Voice services). NetCo is one of the only two main fixed-line network providers of FTTH with approximately nine million households located predominantly in Black Areas. Despite a growing market preference for higher-speed connectivity, NetCo remained the sole provider of ADSL services 24 million homes passed within the same period.

NetCo's coverage varies across different areas.

Black Areas

In Black Areas, NetCo either functions as the sole provider or engages in competition with its direct competitor, Open Fiber. As of December 31, 2023, in Black Areas, NetCo was the main provider of FTTC services, with a total coverage of approximately 100% (or approximately 8.5 million households). In the FTTH segment, NetCo had a total coverage of approximately 82% (or approximately 7.0 million households) for the same year. For FTTH services, the construction of additional network infrastructure is carefully planned and executed. The aim is to achieve the most efficient use of resources and investment, known as unit economics, which helps to balance cost-efficiency with the delivery of high-quality services. As of December 31, 2023, NetCo had completed 82% of its planned FTTH roll out in Black Areas.

Grey Areas

In Grey Areas, as of December 31, 2023, NetCo maintained its position as the main FTTC network provider, with a total coverage of approximately 100% (or approximately 11 million households, of which 7.6 million are in the portion of Grey Areas subject to competition and 3.4 million are in certain other subsidized Grey Areas). In contrast to its extensive FTTC network, NetCo's FTTH infrastructure within Grey Areas subject to competition was more limited, with a total coverage reaching approximately 24% and serving approximately 1.8. million households. As of December 31, 2023, NetCo served more than 0.2 million households in certain subsidized Grey Areas through the tender awarded under the *"Italia a 1 Giga"* plan.

White Areas

In White Areas, for the year ended December 31, 2023, NetCo's FTTx coverage reached 48% (or approximately 2.3 million households).

Despite NetCo's current limited FTTH coverage in Grey and White Areas, the Italian regulatory environment is broadly supportive of fiber-based network growth, with the Italian government committed to fostering the expansion of the national telecommunications infrastructure. This commitment is evidenced by the government support, such as funds available under the NRRP for "Italia a 1 Giga" and "5G backhauling" initiatives, aimed at technological advancement within public administration and extending reach to rural areas, including the subsidized portions of the Grey and White Areas. For further details on NetCo's regulatory framework, please see "*NetCo Regulation.*" Aligned with the Italian government's objectives, NetCo is exploring opportunities to expand into these underserved areas and is actively participating in the "Italia a 1 Giga" tender.

Access Services offerings

NetCo's service offerings include Bitstream Access, Virtual Unbundled Local Access (VULA) both on fiber (VULAH) and copper networks (VULAC), Unbundled Local Loop (LLU), Sub Loop Unbundled Access on copper network (SLU) and passive fiber services (full-GPON and semi-GPON) on FTTH network, each designed to meet the diverse needs of its customers. NetCo mainly focuses on Bitstream Access and VULA solutions.

NetCo's Access Services revenue model is structured around two key components: an initial activation fee and a recurring fee. This approach affords NetCo a clear and consistent revenue stream, ensuring stability and predictability in its financial performance.

Premium Services

In its Premium Services Area, NetCo offers a wide array of services to telecommunications operators which have not developed any infrastructure or have developed partial infrastructure. Such operators rely on NetCo's extensive

network to deliver various connectivity solutions to business customers, including corporate clients and the Italian public sector. In particular, it offers six main services, as further detailed below:

- *Colocation*. NetCo offers a comprehensive colocation service, allowing OLOs to host their infrastructure within its strategically located PoPs and other sites.
- *Dark Fiber.* NetCo provides an essential service in the form of dark fiber leasing, which is a critical component for backhaul connectivity. NetCo grants OLOs an Indefeasible Right of Use ("**IRU**") for laid, yet inactive, fiber optic cables.
- *Premium Connectivity Links.* NetCo offers a connectivity service, catering to operators with a need for high-grade, high-performance connectivity solutions for their business clients.
- *Infrastructure*. NetCo provides a suite of infrastructure services spanning from essential backhauling solutions to access to advanced network capabilities. It offers an IRU to operators, granting them the right to access or use the route between cable pit 'one' of a local exchange and cable pit 'one' of a higher-level exchange.
- *Others.* NetCo is set to expand its service offerings to include operations and maintenance and other related services.

Other Services

The Other Services mainly relates to technical assistance services, awarded government subsidies as well as certain services rendered to the TIM Group under the Master Services Agreement. See "*Summary— The Transactions—Master Services Agreement*" for further details.

Property and Leases

As of December 31, 2023, NetCo managed operations across approximately 14,200 offices, industrial complexes, mixed-use properties and parcels of land, covering a total area of more than 7 million square meters, of which 29% were directly owned.

Intellectual Property

As part of its business operations, NetCo may take actions to protect its proprietary rights in its network and related technology, including through registration of trademarks and application for patents. As of December 31, 2023, none of NetCo's patents are material to its business and business operations.

Patents

As of December 31, 2023, NetCo held 68 issued patents and an additional 5 patents applications pending. Typically, patents are protected for a duration of 20 years. The patents currently held by NetCo are scheduled to expire at various times between the years 2025 and 2043, with 43 of these patents set to expire by December 2030. As of December 31, 2023, NetCo has not been made aware of any legal challenges to the validity of its patents by any third parties.

Customers

NetCo is the leading national provider of wholesale broadband and ultrabroadband services in Italy, extending its services to approximately 5,750 municipalities and passing approximately 22 million homes with FTTC and FTTH-only (i.e. without taking into account overlaps with FTTC) as of December 31, 2023, after giving effect to the Transactions. Remarkably, a significant portion of such customer base is derived from a variety of operators other than the TIM Group, demonstrating NetCo's extensive market penetration and capacity to attract a diverse range of end-users.

Through its services, and indirectly through its customer base of approximately 550 telecommunications operators, NetCo reached approximately 84% of the access services market for fixed broadband, excluding FWA and 76%

including FWA, as of September 2023 and more than 60% of the premium connectivity market as of December 31, 2022, spanning from consumer customers, SMEs, SOHOs, the Italian public sector and other large accounts, enterprises, fixed-line telecommunications operators, Internet service providers or access service providers in the wholesale market to multinational companies. Furthermore, its customer base is predominantly national, with approximately 59.0 million of subscribers being Italian, reflecting a well-distributed demographic reach across the country.

In Black Areas, NetCo's key tenants include TIM and Fastweb, with Iliad and Tiscali also being tenants outside of Black Areas, NetCo's key tenants expand to also encompass Vodafone, Wind3, Sky Wifi, and other telecommunications operators.

NetCo is committed to sustaining its strategic, multi-year relationships with its direct customers, striving to be an irreplaceable component of their operations. NetCo's customer relationships are characterized by multi-year business relationships. This includes a cadre of anchor customers, which, following the successful completion of the Transactions, will include the TIM Group, which is one of NetCo's anchor clients, accounting for a significant portion of NetCo's revenue. For further information see *Summary—The Transactions—Master Services Agreement*." A portion of the TIM Group's customers will transition to NetCo, further solidifying NetCo's customer base. Additionally, NetCo has established wholesale agreements with most of the principal operators in competing areas, ensuring a competitive edge and fostering enduring partnerships. This strategic positioning allows NetCo to leverage its unique market status to secure favorable terms and maintain multi-year customer relationships.

Material Contracts

NetCo's business derives mainly from multi-year wholesale agreements with business and retail telecommunications operators. NetCo's customer relationships vary with the type of connectivity service provided. As the leading FTTC provider, NetCo provides network access to all telecommunications operators in Italy. In the FTTH market, NetCo competes mainly with Open Fiber in Black Areas due to overlapping networks. In White and Grey Areas, although both NetCo and Open Fiber operate, their networks do not currently have significant overlapping coverage. See "*NetCo Industry Overview*" for further information. As a result, in Black Areas, NetCo has developed strong relationships with certain key clients, including the TIM Group and Fastweb.

TIM Group

The TIM Group is the natural anchor tenant of NetCo mainly due to historical ownership reasons and the Master Services Agreement expected to be signed on the Acquisition Closing Date. See "*Summary—The Transactions—The Master Services Agreement*."

Master Services Agreement

Please see "*Summary—The Transactions—Master Services Agreement*."

Transitional Services Agreement

Please see "*Summary—The Transactions—Transitional Services Agreement*."

Employees

As a result of the Transactions, a number of employees from the TIM Group will transition to NetCo. See "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Business and Industry—NetCo is exposed to the risk of labor disputes*" and "*Business—The TIM Group—Employees.*" As of December 31, 2023, after giving pro forma effect to the Transactions, NetCo had approximately 19.9 thousand employees, approximately 19.0 thousand of which were full-time employees. The average age of NetCo's employees was 53. As of December 31, 2023, approximately 20% of women hold managerial positions in NetCo.

The majority of NetCo's employees' relationships is subject to collective bargaining agreements. In general, the collective bargaining agreements include terms that regulate remuneration, minimum salary, salary complements, extra time, benefits, bonuses and partial disability. NetCo's employees in Italy are subject to various collective

bargaining agreements (*contratti colletivi nazionali di lavoro*) ("**CCNL**") including, CCNL for employees in the telecommunications sector, and CCNL for executives in the industrial sector.

NetCo is required by Italian law to employ employees considered by law to be disabled in a percentage constituting at least 7% of its workforce. It is also required by Italian law to employ employees considered by law to be disadvantaged in a percentage constituting at least 1% of its workforce. As of December 31, 2023, the TIM's Group did not have the required number of employees considered by law to be disabled, but because it had opened a collective redundancy procedure its obligations were suspended for the duration of the procedure. Following successful completion of the Transactions, NetCo is expected to start the affiliation procedures with the employment centers of certain Italian large cities.

Pensions

Italian law provides that, upon termination of employment, Italian employees are entitled to severance (*pagamento di fine rapporto*) based on their annual salary, the duration of their employment and the rate of inflation. NetCo has in place both defined-contribution and defined-benefit pension plans. NetCo makes pension contributions on behalf of its employees as required by applicable Italian law. Other than increases in contributions required by law, no significant pension liabilities are expected going forward. All obligations, liabilities and commitments that relate to employees (including among other things, liabilities for statutory severance (*pagamento di fine rapporto*), bonus payment obligations and statutory social security contributions) accrued until the Acquisition Closing Date that are recorded for the purposes of determining the consideration for the contribution from the TIM Group to NetCo will be transferred to NetCo. Without prejudice to the obligations undertaken towards employees, which NetCo will be required to respect, in the context of the Transactions, the liabilities towards the employees that will be transferred from the TIM Group to NetCo (including, without limitation, severance payments, statutory social security liability or any salary increases not in the ordinary course of business compared with the last twelve months prior to Acquisition Closing Date) that have arisen or accrued prior to the Acquisition Closing Date or as a result of the Transactions will not be transferred to NetCo.

Insurance

NetCo maintains insurance coverage for property damage, data breaches, business interruptions, directors' and officers' liability, professional indemnity, third party liability, product liability, employer's liability, crimes, goods in transit liability and construction related liability. NetCo's insurance coverage is regularly reviewed to ensure that it is adequate, and that deductibles and premiums are at reasonable levels. NetCo does not insure against certain operational risks for which insurance is unavailable or which can only be insured at unreasonable terms, such as political risk, war and terrorism. NetCo retains levels of risks insured, risks retained and the limits of insurance indemnity which are mainly in line with the industry practice, but it cannot guarantee that it could not be adversely affected by damage or accidents despite possessing said insurance coverage. See "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Business and Industry—Uninsured losses, losses in excess of insurance coverage for certain risks and unanticipated changes in NetCo's insurance costs could have a material adverse effect on its business, financial condition, cash flows and/or results of operations*" for further details.

Environmental, Social and Governance

NetCo is dedicated to ensuring its business operations are respectful of ESG principles in all spheres of its operations. One of its primary goals is to accelerate Italy's transition to a digital and sustainable economy through innovative infrastructure and solutions.

Fiber optics are significantly more energy-efficient than copper, with estimates suggesting that fiber is significantly more energy-efficient. Additionally, fiber-based networks require fewer central offices, enabling a reduction in central office density when transitioning from copper to fiber. This consolidation contributes to lower energy consumption and operational costs.

Maintenance demands for fiber are also substantially lower than for copper. The durability of fiber, less susceptible to atmospheric conditions, results fewer faults and a longer mean time between failures in comparison to copper. Consequently, the shift to fiber is expected to result in a considerable reduction in maintenance costs.

From an environmental perspective, the production of fiber optics is associated with significantly lower CO_2 emissions compared to the production of copper wires.

NetCo takes steps to regularly monitor its operations to ensure that it can unceasingly improve its performance. By pursuing these strategies, NetCo can contribute to economic prosperity, environmental resilience and societal well-being, thereby shaping a more sustainable and inclusive future for Italy.

Environmental

NetCo's commitment to the implementation of ESG criteria and values includes, among other things, the greater use of renewable sources of energy, decommissioning activities and the adoption of responsible processes to avoid waste and transform it into added value.

NetCo is in the process of pursuing a strategic transition from copper to fiber-based infrastructure, recognizing the long-term sustainability benefits of fiber as a superior alternative to the legacy copper network. This shift is not only aimed at enhancing the technological capabilities offered to its customers but also at minimizing NetCo's environmental impact. In particular, NetCo aims at creating a sustainable and efficient infrastructure with an increasing use of renewable energy, decommissioning activities and a selection of suppliers committed to sustainability. Fiber optics are significantly more energy-efficient than copper and their production and use result in significantly lower CO_2 emissions compared to copper wires. Moreover, fiber is composed of silicon dioxide, the second most abundant material on the earth's crust, and its use does not pose environmental hazards. The decommissioning of copper networks also presents an opportunity to generate a stockpile of copper that can be recycled, further contributing to circular economy and resource efficiency.

For the year ended December 31, 2023, NetCo's energy-saving plan led to 28 GWh of fixed-line network energy savings and decommissioning activities, including shutting down obsolete technologies and services, contributed to these savings. These actions will accelerate in the next years with projects aiming at switching off legacy technologies.

Social

Beyond environmental considerations, NetCo is equally dedicated to amplifying its positive social impact. This commitment is underscored by efforts to expand FTTH coverage, thereby advancing digital service penetration and addressing the Italian Digital Divide, which affected approximately 38%, or 9.2 million, of households as of December 31, 2023.

In addition, NetCo is deeply committed to continue investing in its human resources and to cultivating an inclusive and diverse corporate culture with certain initiatives aimed at promoting gender equality, bridging the digital divide and enhancing media literacy.

Furthermore, NetCo has developed a comprehensive corporate welfare framework designed to support the well-being of its employees and to nurture a strong sense of belonging within the organization.

Governance

NetCo has inherited the TIM Group's long-lasting achievements in sustainability, responsibility and positive impact on its operations and the community, further strengthening NetCo's ESG governance. Through regular monitoring and reporting, NetCo ensures diligent oversight and transparent communication of its projects and objectives. Engaging with stakeholders remains a cornerstone of NetCo's approach, essential for measuring progress and fostering ongoing enhancement.

Legal Proceedings and Disputes

As of the date of this Exchange Offer Memorandum, NetCo is not currently involved in any legal proceedings which, either individually or in the aggregate, are expected to have a material adverse effect on its reputation, results of operations and financial condition. See "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Business and Industry—NetCo may be involved in disputes and litigation with regulators, competition authorities, competitors*

and other parties and may become the subject of a number of investigations by judicial authorities, the ultimate outcome of which is generally uncertain."

TIM GROUP INDUSTRY OVERVIEW

Unless otherwise stated, all information regarding markets, market position and other industry data contained in this Exchange Offer Memorandum is based on the TIM Group's own estimates, internal surveys, market research, customer feedback, publicly available information and industry reports prepared by consultants. In many cases, there is no readily available external information (whether from trade associations, government bodies, other industry organizations or competitors) to validate market-related analyses and estimates, resulting in the TIM Group's relying on its own knowledge of the industry and markets it operates in and its own internally developed estimates. Certain of the information presented herein has been derived from external sources, including reports prepared by a major consulting firm, public websites and company financial reports and other independent third-party research. Any third-party sources the TIM Group uses generally state that the information contained therein has been obtained from sources believed to be reliable, but that the accuracy and completeness of such information are not guaranteed, and that the projections they contain are based on significant assumptions. Similarly, while the TIM Group believes that internal surveys, industry forecasts, customer feedback and market research the TIM Group has used in making its estimates are generally reliable, none of this data has been independently verified. Market data and statistics are inherently subject to uncertainties and not necessarily reflective of actual market conditions. There can be no assurance that any of the assumptions underlying these statements are accurate or correctly reflect the TIM Group's position in the industry or the relevant markets, and none of the TIM Group's internal surveys or information have been verified by any independent sources. None of the TIM Group or the Dealer Managers makes any representation or warranty as to the accuracy or completeness of the industry and market data set forth in this Exchange Offer Memorandum, and none of the TIM Group or the Dealer Managers have independently verified this information and cannot guarantee its accuracy.

Italian market overview

As of September 30, 2023, the TIM Group held a leading position in Italy across the fixed broadband and mobile (total SIM) markets, with retail market shares of approximately 40% and approximately 28%, respectively by number of lines (Source: Market shares as per AGCOM (Communication market monitoring system no. 4/2023), data as of September 2023).

Italy's population in 2022 was 58.9 million (the third largest country by population in the EU) with 25.3 million households in 2022 according to data from ISTAT. Approximately 72% of the population lives in urban areas and 28% in rural areas according to data from the World Bank, with a trend toward urban areas averaging 40 basis points per year between 2010 and 2022. Italy is a founding member state and the third largest economy in the EU with a GDP of USD 2.0 trillion and GDP per capita of USD 34,776 in 2022, according to data from the World Bank. The effects of the COVID-19 pandemic, which struck Italy before the other European countries, resulted in a slowdown of the Italian economy of 9.0% in 2020, followed by a rebound of 8.3% in 2021 and 3.7% in 2022. According to the Bank of Italy, Italy's gross domestic product is expected to record a growth of 0.6% in 2024. Such growth is in line with the growth recorded in 2023, which was mainly due to a high inflationary environment and tightening of financial conditions.

As of the date of this Exchange Offer Memorandum, Italy is rated by Moody's, S&P and Fitch (collectively the "**Rating Agencies**") at Baa3, BBB, and BBB, respectively. All three ratings have been reconfirmed by the Rating Agencies in the past six months. Italian household expenditure on telecommunications services comprised 1.9% of total expenditures, while revenues on telecommunications services represented 1.4% of the GDP in 2022.

The Italian telecommunications market generated €26.9 billion (including wholesale) during the twelve months ended December 31, 2022, slightly decreasing by approximately 3.3% year over year, mostly as a result of declining prices. In particular:

- revenues generated by the Italian mobile market decreased by approximately 5.3%, to €11.7 billion; and
- revenues generated by the Italian fixed broadband market decreased by approximately 1.7%, to €15.2 billion.

The COVID-19 pandemic and the consequent measures put in place by the Italian government to limit social interactions resulted in a strong increase of data traffic per line. Hence, following the COVID-19 pandemic, the annual

average daily unitary data traffic increased by approximately 48.7% and approximately 56.5% year on year in 2020 for the fixed and mobile networks respectively, and continued to grow both in 2021 and 2022. As a result, the average daily data traffic for 2022 was 23.7% and 69.6% higher compared to 2020 for the fixed and mobile networks, respectively according to AGCOM. The growth was confirmed also in the first nine months of 2023, where average daily data traffic was higher if compared to the same period of 2022, with a growth of 13.3% and 22.3% for the fixed and mobile networks, respectively.

The Italian telecommunications market is rapidly evolving, mainly due to the deployment of broadband and ultrabroadband technologies, with the introduction and expansion of 5G mobile, FTTC and FTTH networks. The market has seen approximately €46 billion of investments in fixed assets between 2017 and 2022, approximately 4.9% of all investment activities in the Italian economy. The digital modernization of Italy's communication infrastructure is accelerating due to the substantial investments provided under the NRRP, approximately 27% of which will be allocated to support the digital transition – *see below.* The growing availability of ultrabroadband connections is increasingly allowing operators to develop converged offerings combining telecommunication services with media and entertainment, IT and digital services.

The Italian telecommunications market remains highly competitive, especially in the voice and data connectivity services. Moreover, in the new digital world, telecommunication operators have to deal with over-the-top ("**OTT**") and device manufacturers with completely different assets and competitive logics. In this context, traditional telecommunication players had to adapt their business models to seize new opportunities, limit the threats from new competitors and develop customized offering to avoid a trend for on-going commoditization of their traditional services. This occurs particularly in the following markets:

- media and entertainment, which sees further development of video-on-demand ("**VOD**") and subscription video-on-demand ("**SVOD**") and OTT services, implying an increasing demand for ultrabroadband connectivity; and

- information and communication technology, where the traditional fixed and mobile connectivity solutions tend to decrease in favor of IT components linked to digital transformation, for example with the adoption of cloud solutions supporting the technological infrastructures of large businesses. In this sector, telecommunications operators are best positioned to monetize future growth that should be driven by the digitization of SMBs and NRRP investments in the coming years.

The current positioning of telecommunications operators in convergent markets is therefore expected to evolve through:

- the development of new services in the media and entertainment sector (e.g., TV, Music and Gaming) and new digital services (e.g., smart home, digital advertising and mobile payment-digital identity); and

- the development of Innovative Services in the IT market, in particular in the end-to-end connectivity, Cloud, IoT, AI and Cybersecurity fields.

National Recovery and Resilience Plan (NRRP)

In June 2021, the European Commission approved the recovery and resilience plan submitted by Italy. This forms part of the EU's coordinated response to the COVID-19 pandemic with a focus on a green and digital transition from the pandemic. Italy's recovery and resilience plan allocates 27% of NRRP funds to support the digital transition. Measures under the digital transition plan will support the digitalization of businesses and the expansion of ultrafast broadband networks and 5G connectivity. Italy's recovery and resilience plan sets out a series of initiatives with the aim of taking ultrabroadband connections throughout Italy by the end of 2026 and full 5G coverage of the populated areas fixed by the new European Digital Compass Strategy for 2030. Funds specifically allocated to network connectivity total to €6.7 billion and have been broadly allocated as follows:

- "*Italia a 1 Giga*" plan: €3.86 billion;

- "*Italia 5G*" Plan: €2.02 billion;

- “*Sanità Connessa*” (Connected Health) plan: €0.50 billion;
- “*Scuola Connessa*” (Connected Schools) plan: €0.26 billion; and
- “*Collegamento Isole Minori*” (Smaller Islands Connection) plan: €0.06 billion.

It is expected that the stimulus effect on economic activity of the remaining NRRP funds will also boost the growth in the digital economy and related infrastructure and that this will also indirectly stimulate growth for the country’s telecommunications operators.

Overview of the Italian Fixed Broadband market and competitive landscape

Generating revenue of approximately €15 billion (including wholesale) during the year ended December 31, 2022, Italy is the fourth-largest fixed-line market in Europe (Source: AGCOM). While the Italian fixed telecommunications market continues to be marked by declining fixed voice revenues, broadband and ultrabroadband revenues continue to experience steady growth. There were 18.9 million broadband and ultrafast broadband subscribers as of September 30, 2023. Additionally, there were 20.1 million fixed lines in Italy as of September 30, 2023 (Source: AGCOM) and the Italian broadband market is expected to grow at 0.8% CAGR.

Due to the absence of cable infrastructure and difficult topography, FTTC connections remain a resilient alternative in the Italian market, with an average distance between cabinets and premises among the shortest in Europe, allowing high connection speeds. Similarly, the FTTH market in Italy also remains underpenetrated, at 13% as compared to an average of 35% across the European Union as of September 30, 2022 (Source: FTTH Council, April 2023). Over the last five years the proportion of active DSL lines has declined at a rapid pace, falling from 65.3% in 2017 to 13.5% of total fixed lines subscriptions as of September 30, 2023. In parallel, higher-quality access technologies have increased considerably, with FTTC and FTTH connections reaching 14.2 million as of September 30, 2023, up from 1.6 million of 2017 (Source: AGCOM). The ultrafast broadband technologies can achieve different speeds, with FTTC ranging from 30 Mbps to 200 Mbps, FTTH 10 Gbps, and FWA 40 Mbps (4G) to 300 Mbps (5G).

This momentum has increased the proportion of lines with higher broadband speed within the total commercially available connections: the proportion of lines with speeds of more than 30 Mbps of total broadband and ultrafast broadband lines rose from 34.8% in 2018 to 77.3% as of June 30, 2023. Data consumption over the same time period has increased at a rapid pace, the average daily data traffic increased from approximately 70 PetaBytes (“**PB**”) in 2019 to over 148 PB in the first 9 months of 2023 with an average daily traffic per broadband line increasing from approximately 4GB to over 8GB. The expansion of broadband continues to be driven not only by the evolution of enabling devices (e.g., smart TVs, smart speakers, connected devices, etc.), but also by the growing demand for speed and IP services (e.g., media and entertainment, IT, digital services). Growing consumption of data services by businesses is also expected to accelerate the adoption of fixed broadband, including growth in the utilization of cloud services, IOT urban, industrial and merchant services as well as cybersecurity.

In recent years, telecommunication operators have mainly focused on developing broadband and ultrabroadband penetration and defending voice through the introduction of bundled voice, broadband and services packages, in a context of high competition with significant pressure on prices.

The competitive landscape in the Italian fixed broadband market is dominated by TIM Group with 38.4% retail market share as of September 30, 2023, which is more than two times larger than the next competitor, Vodafone with a 16.5% market share. Following the Transaction, TIM Group will continue to provide retail fixed broadband connectivity services to its customers through the Master Services Agreement with NetCo. See “*Summary—The Transactions*.”

Competition in the retail fixed broadband market also includes other ISPs such as WindTre and Fastweb, and new entrants such as Sky, Tiscali, Poste, Enel and Iliad. The latter launched its fixed broadband offer in January 2022, achieving 172,000 subscribers as of September 30, 2023. Some competition comes as well from FWA providers, such as EOLO and Linkem (approximately 3% and 2% of total fixed broadband connections, respectively). However, the FWA technology remains limited representing only approximately 2.1 million connections as of September 30, 2023, or approximately 10.3% of the total broadband lines in Italy.

Overview of the Italian Mobile market and competitive landscape

The Italian mobile telecommunications market generated approximately €11.7 billion revenues for the year ended December 31, 2022, posting a decrease of approximately 5.3% if compared to the previous year. As of September 30, 2023, the mobile telephony market in Italy counted approximately 78.9 million users (corresponding to human SIM cards in use, excluding M2M (as defined below)), broadly stable compared to the prior year (+0.4%), with a mobile phone penetration rate of approximately 134%. The number of "human" SIMs has declined in recent years as a result of the impact of economic conditions on consumers' purchasing power, and the spread of attractive off-net voice rates which have reduced the need for multiple SIMs per user. On the other hand, Machine to Machine ("**M2M**") SIM cards, for internet-enabled devices and sensors (IoT), have continued to grow in 2023 by approximately 3.7% year over year, reaching 29.7 million connections as of September 30, 2023.

Historically, the vast majority of "human" SIMs were activated under prepaid offers, averaging 88% over the last four years (between September 30, 2019, and September 30, 2023). The Italian mobile telephony market is composed of approximately 87% residential and approximately 13% business users (this contrasts with the fixed telecommunications market where business spending represents a larger proportion of the total).

Voice traffic at 192 billion minutes has remained broadly stable with 1.7% CAGR between 2019 and 2022, while the average monthly mobile data traffic per SIM has continued to grow at 36.6% over the same period. The mobile telephony price index, however, kept decreasing at 0.9% CAGR between September 2019 and September 2023 under strong competitive pressure. Mobile service spending has also declined by 5.5% between 2019 and 2022.

The competitive dynamic of the Italian mobile market continues to be marked by an aggressive offering by Iliad, both in terms of price and mobile data plans. Following its entry in the Italian mobile market in 2018 on the back of the remedies imposed on the merger of Wind and Tre, Iliad has gained approximately 13% of the market share (based on "human" lines) as of September 30, 2023, mainly at the expense of largest mobile national operators ("**MNOs**"). Despite this, TIM Group still maintains a strong position with approximately 24% of mobile market share (only human SIMs), almost at par with WindTre (approximately 25%) and Vodafone (approximately 22%). In the post-paid segment, TIM continues to hold a dominant position with approximately 51% market share. In addition, a large number of MVNOs, such as Poste Mobile, Fastweb, Lycamobile, Coop Voce and Tiscali, are active in the Italian mobile market, corresponding to a cumulative market share of approximately 16% as of September 30, 2023. Several existing MVNOs (*e.g.*, Fastweb, Coop Voce and Tiscali) are using TIM's mobile network to connect their customers, implying additional wholesale revenue for TIM.

Lately, the fierce competition in the mobile market has been decreasing. This was reflected in the stabilization of mobile number portability, with the number of portability operations reduced by approximately 45% between the year ended December 31, 2019 and the year ended December 31, 2023. For the year ended December 31, 2023, the TIM Group was a competitive MNO in Italy in terms of market mobile number portability, with a net balance of a loss of approximately 129 thousand lines, in comparison to a net balance of a loss of approximately 379 thousand lines for the year ended December 31, 2021. Additionally, in the year ended December 31, 2023, the TIM Group also saw an ARPU rebound, with €11.2 per month human Calling ARPU (net of mobile termination rate ("**MTR**") discontinuity), an increase of 1.6% year-on-year.

Similarly, cumulative market share erosion of the three largest players (i.e. TIM, WindTre and Vodafone) has been slowing down, representing a 2.5% decrease from September 2022 to September 2023, compared to a decrease of 4.3% from September 2019 to September 2020 (based on "human" lines). The pricing pressure on tariffs has also been easing up, with major mobile operators increasing prices of packages with a "more for more" proposition, offering best-in-class network performance and quality of services. Moreover, some operators, including TIM, have started introducing a CPI-linked mechanisms in their customer contracts. This initiative is supported by AGCOM, who recently published new guidelines for annual CPI-linked price adjustments from 2024. According to the new guidelines for annual CPI-linked price adjustments, CPI-linked price adjustments are not qualified as a change of contract conditions (i.e. there is no right for customers to withdraw without penalty). To include CPI-linked price adjustments in existing contracts, it will require explicit acceptance by the end-user to such adjustments (otherwise, contract is maintained until its expiry of a maximum of two years); and on new contracts, CPI-linked price adjustments can be included through a specific clause. As a part of the approval process of these new guidelines, public consultation

process was launched by AGCOM on April 11, 2023, and with final approval granted on December 5, 2023 (Source: AGCOM).

Looking forward, the on-going 5G deployment and the development of mobile broadband is expected to unlock significant growth potential in the medium term, namely through such services as Mobile Payment and the Internet of Things.

Brazilian market overview

In Brazil, the Brazil Business Unit offers mobile voice and data services, broadband internet access, value-added services and other telecommunications services and products. The TIM Group is one of the key players in the Brazilian market and a leader in full 4G coverage of areas where approximately 99% of the Brazilian population lives and works. As of December 31, 2023, the TIM Group held approximately 24% market share of the Brazilian mobile market, being a strong (the third largest) operator, and approximately 2.7% of the fixed broadband market, offering access via its FTTC and FTTH, as of November 30, 2023.

Brazil is the largest economy in Latin America with a GDP of $1.9 trillion and GDP per capita of $8,918 in 2022 according to data from the World Bank. The effects of COVID-19 pandemic resulted in a contraction of the Brazilian economy by a decrease of the GDP by 3.3% in 2020, with a subsequent recovery of 5.0% in 2021, 2.9% in 2022 and grew 2.9% in 2023. Brazil's population in 2022 was 203.1 million. Approximately 88% of the population lives in urban areas and 12% in rural areas according to data from the World Bank, with a trend toward urban areas averaging 31 basis points per year between 2010 and 2022.

The Brazilian mobile and fixed broadband market accounted together for 302.1 million lines as of November 30, 2023, increasing by approximately 1.5% year-on-year, thanks to the growth in both mobile and fixed broadband. In particular:

- Total mobile lines amounted to 254.9 million, increasing 0.1% year on year; and
- Total fixed broadband lines amounted to 47.2 million, increasing by approximately 5.5% year on year.

Overview of the Brazilian Mobile market and competitive landscape

The number of "human" SIMs in the Brazilian market shrunk over 18 months ended November 2023, posting a decrease of 4.5% between June 2022 and December 2023, mainly driven by the deactivation of a large number of inactive former Oi accounts. As a result, the number of total mobile lines has stabilized at approximately 213 million as of December 2023. The number of M2M SIMs, on the other hand, has grown by 10.2% year-on-year to 43.0 million as of December 2023. The proportion of post-paid SIMs has increased to approximately 58% of total SIM cards in December 2023, growing by approximately 310 basis points per year since 2018.

4G has established itself as the leading mobile technology, available in all 5,570 municipalities and accounting for approximately 76% of total lines as of December 2023 compared to approximately 57% five years ago (December 2018). The deployment of 4G LTE technology has been a key area of competition for Brazil's mobile operators. 5G technology has also been emerging over the past 24 months, accounting for approximately 7% of total lines (or 19 million lines) as of November 30, 2023, more than doubling in the last 6-8 months.

Brazilian mobile market is relatively mature, with a high penetration of mobile services (approximately 126% as of December 2023). However, rapid growth in mobile data consumption, demand for LTE, 5G and digital services, as well as the on-going migration of clients from prepaid to postpaid plans offer good growth potential for the market going forward.

In April 2022, the TIM Group, Vivo and Claro, have completed the acquisition of Oi's mobile assets, leading to a market consolidation from 4 to 3 main players who accounted together for approximately 96% of all mobile lines as of December 2023. As a result, the TIM Group's mobile customer base grew from 52.3 million in March 2022 to 61.2 million in December 2023, implying a 23.9% market share following the integration of Oi mobile customer base. The

TIM Group competes with two other MNOs, Vivo with 38.7% market share and Claro with 33.8% market share. The in-market consolidation is expected to help customer base and ARPU stabilization in the market.

Overview of the Brazilian Fixed market and competitive landscape

The subscriber technology mix is progressively shifting away from cable towards FTTH, which accounted for approximately 74% of total accesses as of November 30, 2023, compared to approximately 30% in November 2019. This trend results in a positive impact on average speeds with approximately 90% of fixed broadband accesses benefitting from speeds of over 34Mbps as of December 2023, compared to approximately 59% three years ago.

Brazilian fixed broadband market remains highly fragmented and characterized by fierce competition and price wars. Small and medium-size regional ISPs represent approximately 54% of the market as of December 2023, while the large telecommunication operators, Claro, Vivo and Oi, command approximately 21%, approximately 14% and approximately 10% market shares, respectively.

The presence of the TIM Group on the fixed broadband market remains limited with a market share of approximately 2% as of December 2023, comparable to other smaller ISPs.

NETCO INDUSTRY OVERVIEW

Unless otherwise stated, all information regarding markets, market position and other industry data contained in this Exchange Offer Memorandum represent NetCo's industry overview after giving effect to the Transactions, and is based on the TIM Group's own estimates, internal surveys, market research, customer feedback, publicly available information and industry reports prepared by consultants. In many cases, there is no readily available external information (whether from trade associations, government bodies, other industry organizations or competitors) to validate market-related analyses and estimates, resulting in the TIM Group relying on its own knowledge of the industry and markets the NetCo operates in and the TIM Group's own internally developed estimates. Certain of the information presented herein has been derived from external sources, including reports prepared by a major consulting firm, public websites and company financial reports and other independent third-party research. Any third-party sources the TIM Group uses generally state that the information contained therein has been obtained from sources believed to be reliable, but that the accuracy and completeness of such information are not guaranteed, and that the projections they contain are based on significant assumptions. Similarly, while we believe that internal surveys, industry forecasts, customer feedback and market research the TIM Group has used in making its estimates are generally reliable, none of this data has been independently verified. Market data and statistics are inherently subject to uncertainties and not necessarily reflective of actual market conditions. There can be no assurance that that any of the assumptions underlying these statements are accurate or correctly reflect NetCo's position in the industry or the relevant markets, and none of the TIM Group's internal surveys or information have been verified by any independent sources. None of the Issuer or the Dealer Managers makes any representation or warranty as to the accuracy or completeness of the industry and market data set forth in this Exchange Offer Memorandum, and none of the Issuer or the Dealer Managers have independently verified this information and cannot guarantee its accuracy.

Italian market overview

As of December 31, 2023, NetCo holds a leading position in Italy in the fixed access market, with 15.5 million accesses.

Italy's population in 2022 was 58.9 million (the third largest country by population in the EU) with 25.3 million households in 2022 according to data from ISTAT. Approximately 72% of the population lives in urban areas and 28% in rural areas according to data from the World Bank, with a trend toward urban areas averaging 40 basis points per year between 2010 and 2022. Italy is a founding member state and the third largest economy in the EU with a GDP of USD 2.0 trillion and GDP per capita of USD 34,776 in 2022, according to data from the World Bank. The effects of the COVID-19 pandemic, which struck Italy before the other European countries, resulted in a slowdown of the Italian economy of 9.0% in 2020, followed by a rebound of 8.3% in 2021, and 3.7% in 2022. According to the Bank of Italy, Italy's gross domestic product is expected to record a growth of 0.6% in 2024. Such growth is in line with the growth recorded in 2023, which was mainly due to a high inflationary environment and tightening of financial conditions.

As of the date of this Exchange Offer Memorandum, Italy is rated by Moody's, S&P and Fitch (collectively the "**Rating Agencies**") at Baa3, BBB, and BBB, respectively. All three ratings have been reconfirmed by the Rating Agencies in the past six months. Italian household expenditure on telecommunications services comprised 1.9% of total expenditures, while revenues on telecommunications services represented 1.4% of the GDP in 2022.

The Italian telecommunications market generated €26.9 billion (including wholesale) during the twelve months ended December 31, 2022, slightly decreasing by approximately 3.3% year over year, mostly as a result of declining prices. In particular, revenues generated by the Italian fixed market decreased by approximately 1.7%, to €15.2 billion.

The COVID-19 pandemic and the consequent measures put in place by the Italian Government to limit the social interactions resulted in a strong increase of data traffic per line. Hence, following the COVID-19 pandemic, the annual average daily unitary data traffic increased by approximately 48.7% and approximately 56.5% year on year in 2020 for the fixed and mobile networks respectively, and continued to grow both in 2021 and 2022. As a result, the average daily data traffic for 2022 was 25.6% and 69.6% higher compared to 2020 for the fixed and mobile networks, respectively. The growth was confirmed also in the first nine months of 2023, where average daily data traffic was higher if compared to the same period of 2022, with a growth of 13.3% and 22.3% for the fixed and mobile networks, respectively.

The Italian telecommunications market is rapidly evolving, mainly due to the deployment of broadband and ultrabroadband technologies, with the introduction and expansion of 5G mobile, FTTC, and FTTH fixed networks. The market has seen approximately €46 billion of investments in fixed and mobile assets between 2017 and 2022, approximately 4.9% of all investment activities in the Italian economy.

The digital modernization of Italy's communication infrastructure is accelerating due to the substantial investments provided under the NRRP, a plan approved by the European Commission in June 2021 in response to the COVID-19 pandemic with a focus on green and digital transition following the pandemic. Italy's recovery and resilience plan allocates 27% of NRRP funds to support such digital transition and sets out a series of initiatives with the aim of taking ultrabroadband connections throughout Italy by the end of 2026 and full 5G coverage of the populated areas set by the new European Digital Compass Strategy for 2030. Funds specifically allocated to network connectivity total to €6.7 billion and have been broadly allocated as follows: (i) "*Italia a 1 Giga"* plan: €3.86 billion,(ii) "*Italia 5G*" Plan: €2.02 billion, (iii) "*Sanità Connessa*" (Connected Health) plan: €0.50 billion, (iv) "*Scuola Connessa*" (Connected Schools) plan: €0.26 billion, and (v) "*Collagamento Isole Minori*" (Smaller Islands) plan: €0.06 billion.

In connection with the "*Italia a 1 Giga*" plan of €3.86 billion, a temporary business group (*raggruppamento temporaneo di imprese*) between TIM and FiberCop was awarded 7 of the 15 lots provided under the plan, which was tendered out by Infratel, with a value of more than €1.6 billion in funding, as well as approximately €1 billion in direct investment from the TIM Group. The regions in which the awarded lots are located are Piedmont, Valle d'Aosta, Liguria, Abruzzo, Molise, Sardinia, Umbria, Marche, Calabria and Basilicata, as well as the autonomous Provinces of Trento and Bolzano.

It is expected that the stimulus impact on economic activity of the remaining NRRP funds will also boost the growth in the digital economy and related infrastructure. The growing availability of ultrabroadband connections is increasingly allowing operators to develop converged offerings combining telecommunication services with media and entertainment, IT and digital services.

Overview of the Italian Fixed Broadband market and competitive landscape

Generating revenue of approximately €15 billion (including wholesale), Italy is the fourth-largest fixed-line market in Europe (Source: AGCOM). While the Italian fixed telecommunications market continues to be marked by declining fixed voice revenues, broadband and ultrabroadband revenues continue to experience steady growth. There were 18.9 million broadband and ultra broadband subscribers as of September 30, 2023, which resulted in a broadband penetration of approximately 75% if compared to Italy's 25.3 million households according to data from ISTAT. Several telecommunications providers offer retail fixed-line access services to these subscribers. According to AGCOM, as of September 30, 2023, TIM, Fastweb, Tiscali, Vodafone, Wind3, Sky Wifi and others held approximately 38%, 14%, 4%, 17%, 14%, 3% and 10% market share in terms of broadband and ultrabroadband retail services, respectively. Furthermore, with other European countries such as France, Germany, Spain, and the United Kingdom achieving broadband penetration in terms of households of approximately 103%, 92%, 91%, 101%, respectively Italy's market is comparatively underpenetrated.

Furthermore, in the European telecommunications landscape, Italy stands out for its attractive and competitive wholesale FTTH access pricing. The average VULA FTTH access price in Italy is €14 per month per line, which is lower compared to other major European markets. For instance, in France, the average price as of March 30, 2021 was €15 for dense areas. Spain's NEBA services rates for consumers average at €17 in 2018, while Germany's pricing, which includes both up-front and recurring fees, was at €18 in March 30, 2021. The United Kingdom tops the list with an average price of €19, as of April 2024.

Due to the lack of cable infrastructure and difficult morphology, FTTC connections remain a resilient alternative in the Italian market (9.95 million lines or approximately 53% of the broadband and ultrabroadband market), with an average distance between cabinets and premises among the shortest in Europe, allowing high connection speeds. Similarly, the FTTH market in Italy (4.3 million lines or a 23% of the market) also remains underpenetrated, with penetration of 13% compared to an average of 35% across the European Union and the United Kingdom as of September 30, 2022 (Source: FTTH Council, April 2023). Over the last five years the proportion of active DSL lines has declined at a rapid pace, falling from 65.3% in 2017 to 13.5% of total fixed broadband lines subscriptions as of September 30, 2023. In parallel, higher-quality access technologies have increased considerably, with FTTC and

FTTH connections reaching 14.2 million with a 96.2% and 53.7% coverage, respectively, as of September 30, 2023, up from 4.7 million as of the end of 2017 (Source: AGCOM). Finally, FWA providers have entered the market in recent years; however, the FWA technology remains limited representing only approximately 2.1 million connections as of September 30, 2023, or approximately 11% of the total broadband lines in Italy. The ultra-fast broadband technologies are capable of achieving different speeds, with FTTC ranging from 30Mbps to 200Mbps, FTTH 10Gbps, and FWA 40 Mbps (4G) to 300Mbps (5G).

In recent years, telecommunication operators have mainly focused on developing broadband and ultrabroadband penetration and defending voice through the introduction of bundled voice, broadband and services packages, in a context of high competition with significant pressure on prices. This momentum has increased the proportion of lines with higher broadband speed within the total commercially available connections: the proportion of lines with speeds of more than 30 Mbps of total broadband and ultra-fast broadband lines rose from 45% in 2018 to 82.9% as of June 30, 2023. Data consumption over the same time period has increased at a rapid pace, the average daily data traffic increased from approximately 70 PBetabytes ("**PB**") in 2019 to over 148 PB in the first 9 months of 2023 with average daily traffic per broadband line increasing from approximately 4GB to over 8GB. The expansion of broadband continues to be driven not only by the evolution of enabling devices (smart TVs, smart speakers, connected devices, etc.), but also by the growing demand for speed and IP services (media and entertainment, IT, digital services). Growing consumption of data services by businesses is also expected to accelerate the adoption of fixed broadband, including growth in the utilization of cloud services, IOT urban, industrial and merchant services, as well as cybersecurity.

The wholesale Italian fixed broadband market currently consists of NetCo and Open Fiber S.p.A., as the main players. Out of the two service providers to the fragmented Italian fixed broadband market, NetCo is the leading wholesale provider with 15.5 million fixed lines as of December 31, 2023 and the only national provider of wholesale broadband services to the Italian market (including ADSL). NetCo has a national network covering over 99% of households and is the sole nationwide provider of FTTC network in Italy, with FTTx (i.e. FTTC or FTTH) covering approximately 95% of active lines, in each case as of December 31, 2023. On the other hand, it is estimated that Open Fiber covers in FTTH approximately 14.5 million households of which approximately 4.3 million are covered in FTTH in the so-called White Areas. The definition of "technical units" used by NetCo is different than similar metrics used by competitors, including Open Fiber, and, as a result, a direct comparison using such metrics is not possible.

NetCo and Open Fiber, as infrastructure operators of the fixed broadband infrastructure, mainly compete on the FTTH network given NetCo is the sole wholesale provider of FTTC services at scale in Italy.

As discussed above, NetCo is the exclusive wholesale operator of the FTTC network. With regards to the FTTH network, coverage and competition is segmented according to European Union guidelines, with an added level of granularity provided by the TIM Group's accounting of the impact of the "*Italia a 1 Giga"* plan (based on management's estimates), which, combined, reflect to the current level of competition:

- White Areas are areas without ultrabroadband (UBB) networks (connectivity), where private investors do not intend to invest in the next three years. Within these White Areas, low density areas (reaching approximately 4.3 million households) have been granted a concession by Infratel to Open Fiber for service provision. In contrast, in very low density areas (reaching approximately 0.5 million households), undertaking fiber roll-out investments is not considered economically efficient. This distinction is not recognized by the European Union guidelines.

- Grey Areas are areas in which an ultrabroadband network is present or will be developed in the next three years by a single private operator. Subsidies associated with the "Italia a 1 Giga" plan are allocated to only specific segments of these Grey Areas. This distinction is not recognized by the European Union guidelines. Given the lack of significant overlap between NetCo's and Open Fiber's fiber networks, NetCo and Open Fiber act as the sole providers in their respective subsidized areas.

- Black Areas are areas in which at least two ultrabroadband networks of different operators are present or will be developed over the next three years. In Italy's case, the Black Areas would be those areas of the market where both NetCo and Open Fiber are present and their respective fiber networks overlap.

TIM GROUP REGULATION

The TIM Group's operations are subject to EU, Italian and Brazilian electronic communications regulations, general competition law and a variety of other regulations, including privacy and security-related regulations. This section summarizes the key areas of such regulatory frameworks and considers the effect and implications of the Transactions.

The EU Electronic Communications Regulatory Framework

Overview

The EU electronic communications regulatory framework is the basis for the national electronic communications laws in all Member States in the EU ("**Member States**"), including Italy where the TIM Group operates. The Member States are required to transpose directives issued by the EU Council and Parliament into national legislation, while the regulations issued by the same EU institutions are binding for any Member State without the need for their transposition into national law. Additionally, EU recommendations suggest certain actions and good practices although they do not have any binding effect on the operators active in the different Member States. The EU electronic communications regulatory framework contains provisions on the execution of sectoral activities of national telecommunications providers and sets out general rules applicable to all providers of electronic communication networks and services, as well as specific regulatory obligations that may be imposed by the national regulatory authorities ("**NRAs**"). In all Member States NRAs are independent bodies that are tasked with regulating and supervising the electronic communications sector and ensuring compliance with the EU electronic communications regulatory framework in each Member State.

Directive (EU) 2018/1972) establishing the European Electronic Communication Code ("**EECC**") entered into force on December 20, 2018, and is applicable to TIM Group's operations since its implementation through Italian Legislative Decree of November 8, 2021, No. 207. Article 125 of the EECC expands the scope of the objectives and regulatory tools of the repealed EU Directives issued in 2002 and amended in 2009 (the so-called "**Telecom Package**"). The EECC includes a comprehensive set of measures related to: (i) wholesale-only operators and innovative regulatory models applicable for investments in VHCN, (ii) new rules on spectrum, such as minimum license duration to improve investment return, (iii) regulation of services, including the introduction of an improved level playing field between telecommunications operators and new operators of communications ecosystems such as the Over-the-Top ("**OTT**"), and (iv) a revised scope of Universal Service Obligation ("**USO**") for the benefit of users with low income or special social needs with a view to pursue adequate broadband internet access service as well as voice communications services at a fixed location.

On February 23, 2023, the European Commission put forward a legislative proposal for a new Regulation (the "**Gigabit Infrastructure Act**") on measures to reduce the cost of deploying gigabit electronic communications networks and repealing the previous EU Directive 2014/61/EU ("**Broadband Cost Reduction Directive**"), with the aim of setting new rules to enable faster, cheaper and more effective rollout of Gigabit networks, including 5G across the EU by promoting the reuse of existing physical infrastructures and streamlining the procedures for granting permits for civil works. Under the Gigabit Infrastructure Act Member States must ensure that network operators (telecoms, as well as energy, transport and water) give telecoms operators access to their physical infrastructure and network operators are required to give access to their physical infrastructure, on reasonable terms and conditions, including price. On February 6, 2024, the Council and the EU Parliament reached a provisional agreement on the proposed text.

Regulation (EU) 2018/1971 of the European Parliament and the Council entered into force on December 20, 2018 and it has repealed Regulation (EC) 1211/2009 and amended Regulation (EU) 2015/2120 ("**BEREC Regulation**"). The BEREC Regulation established the Body of European Regulators for Electronic Communications ("**BEREC**") and the Agency for Support for BEREC (the "**BEREC Office**"). BEREC acts as a forum for cooperation among each Member State's NRA and between the NRAs and the European Commission. In addition, BEREC Regulation has introduced maximum retail rates charged to consumers for regulated intra-EU communications in the amount of €0.19 per minute for calls and €0.06 per SMS message, with a five years application between May 15, 2019 and May 14, 2024 (Article 5*a* of Regulation 2015/2120, as introduced by Article 50 of the BEREC Regulation). The provisional agreement on the Gigabit Infrastructure Act is set to extend the validity of the abovementioned price caps until 2032 and envisages the end of surcharges on intra-EU communications from January 1, 2029, following an impact

assessment by the Commission and the definition of safeguards, such as sustainability, fair use and anti-fraud measures.

The European Commission Delegated Regulation (EU) 2021/654 supplementing the EECC ("**Delegated Regulation**") that was published in the Official Journal of the EU ("**OJEU**") on April 22, 2021, set the single maximum EU-wide wholesale mobile voice termination rate to €0.2 cent per minute from January 1, 2024 and the single maximum EU-wide wholesale fixed voice termination rate to €0.07 cent per minute from July 1, 2021.

The European Commission's Recommendation EU 2020/2245 of December 18, 2020 on relevant product and service markets susceptible to *ex ante* regulation, identifies those products and service markets in which *ex ante* regulation may be justified. In alignment with the objectives of the EU electronic communications regulatory framework to progressively reduce *ex ante* sector-specific rules as competition in the markets develops and, ultimately, to ensure that electronic communications markets are governed only by competition laws, the number of relevant markets in which imposition of *ex ante* regulation may be justified has been significantly reduced since the first Commission's Recommendation issued in 2003. By applying the three criteria test from Articles 67(1)(a), (b) and (c) of the EECC, the European Commission has identified (i) the wholesale local access provided at a fixed location market and (ii) the wholesale dedicated capacity market, as the product and service markets in which *ex ante* regulation may still be justified.

In September 2016, through its Connectivity for a Competitive–Digital Single Market–- Towards a European Gigabit Society Communication (COM/2016/587 final, the "**Gigabit Society Communication**"), the European Commission has set out a vision for connectivity in the EU over the following decade that includes growth of the high capacity networks, and has established specific strategic objectives to be achieved by 2025. Such objectives include, among others, uninterrupted 5G coverage for all urban areas and major terrestrial transport paths.

Additionally, in order to achieve a successful digital transformation of Europe by 2030, the European Commission has adopted the 2030 Digital Compass: the European way for the Digital Decade (COM/2021/118 final) ("**Digital Compass**") setting forth the initiative for a creation of a set of digital principles and a legislative proposal that would include a governance framework to monitor the progress of the envisioned digital transformation. The Digital Compass include the following aims:

- *Skills*: securing that at least 80% of all adults possess basic digital skills and that there are 20 million ICT specialists hired in the EU, with predominantly women taking up such jobs;

- *Infrastructur*e: putting in place a secure, functional and sustainable digital infrastructures that would include (i) gigabit connectivity for all EU households and 5G coverage for all populated areas, (ii) cutting-edge and sustainable semiconductors (including processors) with at least 20% of the world's production originating from Europe, (iii) a 10,000 climate-neutral highly secure edge nodes and (iv) the development of the first quantum computer in Europe by 2025;

- *Busines*s: (i) having three out of four companies using cloud computing services, big data and artificial intelligence, (ii) having more than 90% small and medium size businesses reaching at least a basic level of digital intensity, and (iii) doubling the number of EU unicorns; and

- *Governmen*t: digitalization of public services that would ensure an online availability of all key public services and e-medical records accessible to all citizens, with 80% of citizens using a digital ID solution.

The related Decision (EU) 2022/2481 establishing the Digital Decade Policy Programme (the "**Policy Programme**") was published in OJEU on December 19, 2022. The Policy Programme introduces a novel form of governance based on cooperation between the Member States and the European Commission to ensure that Member States pool their resources and ultimately jointly achieve the envisioned EU digital transformation.

Commission implementing Decision (EU) 2023/1353 of June 30, 2023 sets out key performance indicators to measure the progress towards the digital targets. On September 27, 2023, the Commission adopted the Communication C(2023) 7500 final establishing Union-level projected trajectories for the digital targets and published the first report on the State of the Digital Decade. On December 12, 2022, the European Commission adopted the revised Communication

on State aid for broadband networks (the "**Broadband State Aid Guidelines**"), used by the European Commission primarily when it assesses the allocation of state aid for the deployment of fixed and mobile broadband networks and the take-up of available broadband services to support the digital transition, also ensuring its minimal impact on the competition.

On February 23, 2023, the European Commission presented a set of actions aimed to make Gigabit connectivity available to all citizens and businesses across the EU by 2030, in line with the objectives of Europe's Digital Decade, and to enable the transformation of the connectivity sector in the EU. Beyond the aforementioned proposal for a Gigabit Infrastructure Act, this so called "Connectivity package" includes:

- A draft Recommendation, addressed to the Member States' NRAs, on the regulatory promotion of Gigabit connectivity ("**Gigabit Recommendation**"). The Commission Recommendation C(2024) 523 final was adopted on February 6, 2024, it provides guidance to NRAs on how to design access obligations on operators designated as having SMP on the market for wholesale local access provided at fixed location and promotes their consistent and effective implementation with regard to legacy networks and VHCNs. In particular, the Gigabit Recommendation sets out the conditions under which the national regulatory authority should, according to EECC, not impose or maintain regulated wholesale access prices on VHCN wholesale inputs. The Gigabit Recommendation also indicates how NRAs can smoothly conduct the migration from copper to fiber. It replaces the Commission Recommendation 2010/572/EU of September 20, 2010 on regulated access to Next Generation Access Networks ("**NGA**") and the Commission Recommendation 2013/466/EU of September 11, 2013 on consistent non-discrimination obligations and costing methodologies to promote competition and enhance the broadband investment environment.

- An exploratory consultation on the future of the connectivity sector and its infrastructure, to gather views on how increasing demands for connectivity and technological advances may affect the future developments and needs, including on the potential need for all players benefitting from the digital transformation to fairly contribute to the investments in connectivity infrastructure. Based on the outcome of the consultation, on February 21, 2024, the European Commission presented a set of possible actions to foster the innovation, security and resilience of digital infrastructures and opened a public consultation until June 30, 2024, aimed at achieving a consensus on:

    - The White Paper on "How to master Europe's digital infrastructure needs?," that analyses the challenges Europe currently faces in the rollout of future connectivity networks, and presents possible scenarios to attract investments, foster innovation, increase security, and achieve a true Digital Single Market.

    - The Recommendation on the security and resilience of submarine cable infrastructures, that presents a set of actions at national and EU level aimed at improving submarine cable security and resilience, through a better coordination across the EU, both in terms of governance and funding.

Some of the key areas of the EU telecommunication regulatory framework which will continue to apply to the TIM Group's operations following the successful completion of the Transactions are discussed in more detail below.

International Roaming

Regulation (EU) 2022/612 of the European Parliament and of the Council of April 6, 2022 on roaming on public mobile communications networks within the EU ("**Roaming Regulation**") provides a detailed set of rules concerning intra-EU roaming services and sets forth certain measures for the benefit of consumers that include: (i) an obligation for roaming providers to offer the same quality of service in roaming and at the national level where the same networks and technologies are available in the visited Member State, (ii) an improved access to free emergency services and (iii) a greater transparency on the costs of value-added services and roaming costs on non-terrestrial mobile networks, such as ships and planes. It also suggests a review of the price caps for intra-EU international fixed and mobile calls introduced by BEREC Regulation, by May 14, 2024.

Roaming Regulation further provides for the prolongation of the Roam Like at Home regime (RLAH) by abolishing roaming service surcharges on top of domestic tariffs until June 30, 2032, subject to "*fair use*" limits. For intra-EU

traffic exceeding the "*fair use*" limits, roaming providers are allowed to apply a surcharge on top of domestic tariffs, which shall in any case not exceed the maximum wholesale charges that the visited network operator may levy on the roaming provider for the provision of regulated roaming services through the visited network. In any case, the charges subject to the following caps for the period from 2022 to 2027:

		from 1/7/2022	**from 1/1/2023**	**from 1/1/2024**	**from 1/1/2025**	**from 1/1/2026**	**from 1/1/2027**
Voice	*€cent/min*	2.2	2.2	2.2	1.9	1.9	1.9
SMS	*€cent/SMS*	0.4	0.4	0.4	0.3	0.3	0.3
Data........................	*€/GB*	2.0	1.8	1.55	1.3	1.1	1.0

The abovementioned maximum wholesale charges for regulated roaming calls and SMS messages applicable from January 1, 2025 shall remain valid until June 30, 2032 unless otherwise provided in the context of the review of the Roaming Regulation that the EU Commission shall evaluate.

Net Neutrality

Net neutrality is a principle providing that there should be no restriction on an individual's access to the networks making up the infrastructure of the internet and that any discrimination, restriction, or interference between the types and sources of data conveyed across such networks should be eliminated, irrespective of the sender and receiver, the content accessed or distributed, and the applications or services used or provided. Regulation (EU) 2015/2120 laying down measures concerning open internet access (the "**TSM Regulation**") provides new rules on net neutrality. In particular, TSM Regulation:

- establishes end-users' access rights to distribute information and content, use and provide applications and services and use terminal equipment of their choice, also forbidding internet service providers from blocking or slowing down specific content and applications or services, except in a very limited set of circumstances;

- allows the implementation by providers of internet access services of reasonable, transparent, non-discriminatory and proportionate traffic management measures aimed at improving quality of the network based on objectively different technical quality of service requirements for specific categories of traffic; such measures shall not be based on commercial considerations but on objectively different technical quality of service requirements of specific categories of traffic and shall not monitor the specific content and shall not be maintained for longer than necessary;

- allows operators to offer services, excluding internet access services, optimized for specific content, applications or services subject to the network capacity and unobstructed availability and quality of internet access services for end-users;

- allows end users to agree with providers of internet access services on tariffs for specific data volumes and speeds of the internet access services. Such commercial practices should not limit the exercise of end users' rights and are subject to monitoring by the NRAs. Additionally, contrary to BEREC's and NRA's previous indications, the European Court of Justice rulings in September 2021 established that zero rating infringes the Net Neutrality rules and is not allowed.

  Zero-rating (also called toll-free data or sponsored data) is the practice of mobile network operators ("**MNOs**"), MVNOs, and internet service providers not to charge end customers for data used by specific applications or internet services through their network, in limited or metered data plans. It allows customers to use provider-selected content sources or data services like an app store, without worrying about bill shocks, which could otherwise occur if the same data were normally charged according to their data plans and volume caps. This has especially become an option to market 4G networks but has also been used in the past for SMS or other content services.

- places further transparency obligations for ensuring open internet access on providers of internet access services in addition to those already included in the electronic communications regulatory framework.

Privacy and Data Protection

GDPR has been directly applicable in all EU Member States since May 25, 2018. The purpose of GDPR is to provide for the protection of the individual's right to privacy with respect to the processing of personal data, while allowing a certain degree of flexibility for service providers to process such personal data. As such, GDPR significantly changes the EU and EEA data protection landscape, including strengthening of individuals' rights, stricter requirements on companies processing personal data and stricter sanctions with substantial administrative fines for breaching GDPR of up to 4% of an annual turnover. The TIM Group has put in place a specific project to carry out all the activities needed to ensure its compliance with the rules introduced by GDPR.

Additionally, the TIM Group's operations are subject to the complimentary sectorial rules under the e-Privacy Directive implemented into Italian law on June 30, 2003, which imposes additional limitations on the data processing by the electronic communications services operators. Currently, this directive is being under review by the European Commission and the regulatory proposal foresees fines for non-compliance with the rules thereunder that are equal to those for breaches of GDPR. For further information, please see "*Risk Factors— Risks Related to the TIM Group's Legislative and Legal Framework—The TIM Group's activities could be materially negatively affected by failure to comply with GDPR and Italian Privacy Code*."

Data Act

Following publication in the Official Journal on December 22, 2023, the Data Act, a European regulation that introduces harmonized rules on fair access to data and its use, entered into force on January 11, 2024 and will be directly applicable starting from September 12, 2025.

The Data Act covers several areas:

- Business to Business

The aim is to ensure fairness in the allocation of the value of data generated by connected devices among actors in the data economy. The Data Act provides for a shared right in the use of data between the manufacturer and the user of connected devices, allowing the latter to access–- without undue delay and free of charge–- the data generated by the device and to share such data with third parties to provide after-sales services or other innovative services based on them.

However, the Data Act provides that the circulation of data between companies may require the payment of a reasonable and non-discriminatory price which includes the cost of making it available and the investments made for the collection and production of such data.

The Data Act also recognizes that some data may represent trade secrets, the circulation of which would harm companies' interests and proprietary rights. The text of the Data Act has therefore introduced a series of provisions aimed at protecting such information.

- Business to Government

The Data Act also aims at enabling the access by public sector bodies to data held by the private sector in emergency situations, such as health emergencies or serious natural disasters, and in other exceptional cases, where it is not possible to find the data on the market and the lack of such data prevents the public entity from carrying out a specific task of public interest provided for by law. Data sharing in emergency situations must be carried out free of charge, while in the remaining exceptional cases private entities will be entitled to reasonable compensation.

- Cloud Services

The Data Act introduces interoperability requirements for data processing services – such as cloud or edge computing services – aimed at preventing vendor lock-in phenomena and at facilitating the possibility for users to switch to a new supplier.

Furthermore, the Data Act offers specific safeguards to prevent unlawful transfers of non-personal data held by cloud service providers to third countries in contrast with data protection obligations under EU or Member States' law.

Security

The new Directive 2022/2555 on Network and Information Systems ("**NIS2**"), which replaces the current Directive 2016/1148 (NIS) entered into force on January 16, 2023 and must be transposed into national legislation by October 17, 2024 and will be applicable from October 18, 2024.

NIS2 envisages the extension of the scope of application of the rules on the security of networks and information systems, including on the one hand sectors currently covered by other regulations, which are simultaneously repealed (i.e. the security measures of networks and services of electronic communications, currently included in the EECC) and on the other hand extending the rules to new subjects (e.g., data centers, CDNs, etc.).

While NIS2 confirms the obligation to adopt security measures that are proportionate to the risk, it introduces a series of minimum requirements, including with regard to supply chain security management, and it revises the mandatory notification procedure for cyber incidents.

The penalties for non-compliance can be up to 2% of the turnover.

The Italian Regulatory Framework

Overview

The electronic communications regulatory framework applicable to the TIM Group's operations in Italy, is based primarily on the Electronic Communications Code, i.e. Legislative Decree No. 259/2003, as amended by Legislative Decree No. 207 ("**ECC**") that entered into force on December 24, 2021. By implementing this latest amendment, Italy has transposed the EECC into Italian national law.

Another law affecting the TIM Group's business, related to consumer, data and security protection and specific aspects of the communication sector is the Decree Law No. 76/2020, converted by Italian Law No. 120/2020, and Decree Law No. 77/2021, converted by Law no. 108/2021 (also known as "*Decreti Semplificazioni*"). Especially the latter piece of law contains important simplification measures to speed up the completion of both 5G and the ultrabroadband fiber optic networks in Italy. Furthermore, Decree-Law no. 36/2022 (also known as NRRP 2 Decree), converted by Law no. 29 of June 2022, which introduces measures in the ECC, namely simplified authorization measures for mobile network development, and Decree-Law no. 13/2023 (also known as NRRP 3 Decree) converted by Law No. 41/2023, which introduces other important simplification measures in the authorization process, with the aim of fostering the development of fixed and mobile ultrabroadband.

The telecommunications sector in Italy is primarily supervised by AGCOM, Italy's NRA for the communications sector. The key powers and duties of AGCOM consist of ensuring fair market competition and protecting fundamental rights of all users of electronic communication networks and services and, more generally, all citizens, also extending to different functions related to the communications sector. Additional powers related to the electronic communications sector were granted to AGCOM by the Italian Decree Law No. 119/2018 dated December 18, 2018, that also amended the ECC with a view to foster investment in ultra broadband networks. Such AGCOM's powers include defining adequate measures of investment remuneration to integrate the merger of different access networks placed under the control of a non-vertically integrated subject offering only wholesale network services. Governmental responsibility for electronic communication networks and services in Italy lies with the Ministry of the Enterprises and Made in Italy, having a principal responsibility related to the national broadband plan, spectrum and numbering management as well as integrity and security of the networks.

On May 12, 2023, the Ministry of Enterprises and Made in Italy launched a public consultation on the draft Legislative Decree amending the Electronic Communications Code. The consultation was primarily aimed at providers of electronic communications networks and services. Its purpose was to gather market input and comments on the implementation of the new sector legislation one year after the entry into force of the ECC, in line with the objectives

of Directive (EU) 2018/1972 set out in the Digital Single Market Strategy for Europe. The consultation was closed on June 15, 2023.

Following the market consultation, the Council of Ministers approved a Legislative Decree on December 18, 2023, as part of a preliminary examination, which provides for corrections to Legislative Decree No. 207 of November 8, 2021. The text, which was sent to Parliament on December 22, 2023 for the necessary opinion, and which will be returned to the Council of Ministers for final approval, updates the current provisions, adapting them to technological developments in the field of electronic communication services (5G connection) with particular regard to the innovation and implementation of digital infrastructures (repeaters for 5G connections; fiber optic cables) supported by the NRRP. In addition, the revision makes corrections to procedural provisions in order to simplify and shorten bureaucratic procedures.

Market Analysis

The Italian regulatory framework requires AGCOM, in its role as Italian NRA, to carry out periodic market analyses according to the specific EU guidelines before imposing any obligations on any individual operator with an SMP. Such market analysis sets the rules for a period of up to five years. In such context, AGCOM may impose *ex ante* obligations on an operator with SMP when a specific market is found to have three characteristics: (i) high and non-transitory structural, legal or regulatory barriers to entry; (ii) a market structure which does not tend towards effective competition within the relevant time horizon, having regard to the state of infrastructure-based competition and other sources of competition behind the barriers to entry; and (iii) competition law alone is insufficient to adequately address the identified market failures.

In both cases, pursuant to Article 79 of the ECC, AGCOM must impose, based on proportionality principle, one or more of the following obligations on an operator with SMP:

(a) the obligation to make public specific information, such as that relating to accounting, prices, technical specifications, network characteristics, or terms and conditions (*transparency obligation*);

(b) the obligation to ensure equivalent conditions in equivalent circumstances to other providers of equivalent services, as well as same conditions and quality as provided for its own services (*non-discrimination obligation*). Such obligation may include the so-called replicability test (*i.e.* the obligation, for a vertically integrated operator, to set prices in the retail market that can be replicated by an efficient operator);

(c) the obligation to keep separate accounts in relation to specified activities related to interconnection or access (*accounting separation obligation*);

(d) the obligation to meet reasonable requests by competitors for access to civil engineering as well as access to, and use of, specific network elements and associated facilities at fair terms (*access obligation*);

(e) the obligation to apply cost-oriented prices and cost accounting (*cost-orientation obligation*).

Delayering of vertically integrated operators

Pursuant to Article 89 of the ECC, an operator with SMP shall inform AGCOM at least 90 days ahead of any intended transfer of their network assets to a separate legal entity under different ownership, or the establishment of a separate business entity to provide all retail providers with fully equivalent access products (*separazione volontaria da parte di un'impresa verticalmente integrata*). In such event, AGCOM shall conduct a specific market analysis to assess the effect of such delayering project on the relevant markets and therefore impose, maintain, amend, or withdraw *ex ante* obligations.

In November 2020, AGCOM concluded the preliminary assessment of TIM's voluntary separation project for the creation of FiberCop, a newco, controlled by the TIM Group and owned through minority shareholdings also by KKR Infrastructure Fund and Fastweb, which, on March 31, 2021, acquired the secondary copper and fiber access network owned by the TIM Group and Flash Fiber (the joint venture entity created together with Fastweb back in 2016 and merged into FiberCop in the context of the abovementioned transaction completed on March 31, 2021).

With Resolution No 637/20/CONS, published in December 2020, AGCOM launched the public consultation on the voluntary separation project of the TIM Group's fixed access network, whose outcomes were published in October 2021 with Resolution No. 253/21/CONS. However, on July 7, 2022, the TIM Group communicated to AGCOM that the delayering plan envisaged as part of the Transactions would supersede the original voluntary separation project to which the public consultation referred.

On January 19, 2024, TIM notified AGCOM of its intention to proceed with a delayering project pursuant to Article 89 of the ECC (*i.e.* the Transactions). The successful overcoming of vertical integration is expected to lead to a withdrawal of the replicability test obligation applying to the TIM Group's retail offers. See also "*Risk Factors—Risk related to the business activity and industries of the TIM Group—the TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business*," and "*Risk Factors—Risk Related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective*."

The following sections summarize the key areas of the Italian wholesale and retail markets that have been scrutinized by AGCOM to assess competition conditions, along with the recent developments concerning the electronic communications market, as well as the main obligations imposed by AGCOM on the TIM Group with the latest Market Analyses.

Wholesale Fixed Access Markets

AGCOM's Resolution 348/19/CONS published on August 8, 2019 sets the obligations and economic conditions for wholesale access services for the period from 2018 to 2021. With reference to the most important geographic issues under the market analysis, AGCOM has taken the following major decisions:

- confirmation of TIM's status as an SMP operator in the wholesale local access provided at a fixed location market ("**Market 3a**"), and wholesale central access provided at a fixed location for mass-market products market ("**Market 3b**") in Italy with the exclusion of the city of Milan, where the *ex ante* regulation has been entirely withdrawn;
- confirmation, as a consequence, of the following obligations on TIM in both Market 3a and Market 3b:
    - the obligation to provide access to and use of certain of TIM's network elements;
    - transparency obligations in relation to wholesale access services to copper and fiber network;
    - non-discrimination obligations, both in relation to the obligation to ensure equivalent conditions in equivalent circumstances to other providers of equivalent services, as well as same conditions (including price) and quality (including technology) as provided for its own services (AGCOM confirmed the equivalence model provided for in Resolution 652/16/CONS) and also in relation to the replicability test. See *"—Retail Markets—Retail Offers*";
    - accounting separation obligations; and
    - cost-orientation obligations.

With Resolution No 637/20/CONS, published in December 2020, AGCOM started a new coordinated analysis of the markets for fixed network access services pursuant to Article 50-ter of the ECC (now Article 89). The new market analysis procedure, which is still ongoing after having been extended by AGCOM's Resolutions nos. 412/21/CONS of December 21, 2021, and 152/23/CONS of June 21, 2023, will update the regulatory framework for the markets for wholesale fixed network access services based on changed competitive conditions and new European regulatory framework. In this regard, with Resolution 152/23/CONS, AGCOM called a public consultation concerning a scheme

for a new market analysis aimed at regulating the period 2024-2028. The said scheme envisages the following major proposals:

- confirmation of the TIM's status as an SMP operator in Market 1 (wholesale local access provided at a fixed location market in Italy) with the exclusion of the cities of Milan and Cagliari, where the *ex ante* regulation has been entirely withdrawn;
- confirmation of the obligations imposed on TIM in the Market 1 with Resolution 348/19/CONS, with the following amendments: (i) removal of the obligation to provide WLR services and DSLAM access; (ii) application of the disaggregation model already used on copper services to certain new fiber services (VULA FTTH and semi-GPON); (iii) extension of the full equivalence regime to the obligation to provide access to civil engineering; (iv); (iv) new fiber access obligations such as semi-GPON and full GPON access; (v) extension of the ex ante replicability test to flagship offers; and (vi) withdrawal of the cost-orientation obligation for VULA (FTTC and FTTH), semi-VULA, full-GPON and semi-GPON in 59 municipalities considered "*contestable*," where prices will be subject to fairness and reasonableness principles; and
- withdrawal of *ex ante* regulation in Market 3b (wholesale central access provided at a fixed location for mass-market products market).

However, since, at the time the said scheme was published, the Transactions had not yet been notified to AGCOM in their details, such scheme does not take into account the envisaged effects of the successful completion of the Transactions. See "*Risk Factors—Risks Related to the TIM Group—Risks related to the business activity and industries of the TIM Group—the TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business*," and "*Risk Factors—Risks Related to the TIM Group—Risks related to the TIM Group's Business Activity and Industry—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective*."

Wholesale call termination on individual public telephone networks provided at a fixed location

On February 2, 2022, AGCOM published Resolution 13/22/CONS withdrawing regulatory obligations previously imposed to voice call origination on a fixed network (including the third billing obligation) applicable after a transitional period of 24 months and simplifying the regulation of voice fixed termination. Further, AGCOM's Resolution include the following:

- confirmation of TIM and 25 other operators' status of SMP operators with regard to the voice fixed termination market;
- confirmation of the 2019 termination price of €0.041 per minute until June 30, 2021;
- entry into force of the single maximum EU-wide wholesale rate of €0.07 per minute on July 1, 2021;
- cost orientation under a symmetrical regime for the prices of the services that are ancillary and additional to the termination service;
- withdrawal of cost accounting and accounting separation obligations imposed to TIM, as well as of half-yearly reporting obligations, for termination services without any transitional period; and
- reduction (from 12 months to 6 months) of the notice period required for all SMP operators for communicating the intention of decommissioning of one or more Time Division Multiples ("**TDM**") interconnection nodes, as well as removal from the publication of the final decision on the obligation to activate new interconnections with a TDM interface.

Wholesale Mobile Markets

On January 22, 2019, AGCOM published the Resolution 599/18/CONS as a part of the fifth round of the mobile termination market analysis, in which AGCOM decided to:

- identify twelve operators who provide or were about to provide mobile voice call termination services (MNOs, and Full Mobile Virtual Network Operators) as SMP operators;
- confirm the implementation of the cost model detailed in its Resolution 60/11/CONS to set termination rates for the period from 2018 to 2021 and set symmetric tariffs per minute for the mobile termination services amounting provided by all SMP operators (€0.98 in 2018, €0.90 in 2019, €0.76 in 2020, and €0.67 from 2021) on the basis of a Weighted Average Cost of Capital ("**WACC**") equal to 8.55%;
- enforce the price control obligations for the provision of interconnection kits to all SMP operators with retroactive effect from 2018;
- withdraw the cost accounting obligation enforced on TIM, Vodafone and Wind-Tre; and
- confirm that for calls originating by operators that are extra EU/EEA, all SMP operators are not allowed to apply higher termination rates than those applied to Italian operators by such extra EU/EEA operators whose tariffs are regulated by the relevant authorities.

As mentioned above (see "*—The EU Electronic Communications Regulatory Framework—Overview*") the European Commission Delegated Regulation (EU) 2021/654 set the single maximum EU-wide wholesale mobile voice termination rate to €0.2 cent per minute. Such single maximum mobile termination rates are fully applicable from January 1, 2024.

Retail Markets

Retail Offers

The TIM Group's retail offers, in application of the non-discrimination and price-control obligations imposed to date as a result of AGCOM's Market Analyses relating to the Wholesale Fixed Access Market, shall be replicable by efficient third-party retail operators, and are therefore subject to *ex ante* replicability tests carried out by AGCOM upon communication, by the TIM Group, of a new offer 20 days ahead of distribution.

With Resolution 348/19/CONS, AGCOM removed the *ex ante* replicability test for some of the TIM Group's ultrabroadband retail offers. In particular, all FTTH or FTTC retail offers (including bundles) that are considered "*flagship*," with speeds equal to o– higher than 100 Mbps–- which are very relevant in the migration phase from –opper to NGA networks–- will be notified to AGCOM simultaneously with their launch and will be subject to the supervision of AGCOM on an *ex post* basis through the replicability test.

Also the renewal of offers, the modifications of already existing offers which do not imply a change of margins, and the optional conditional sales associated to an offer already approved will be notified to AGCOM concurrently with their launch and AGCOM will eventually assess their replicability, if necessary, *ex officio* or at the request of an operator.

In the scheme for a new Market Analysis relating to the Wholesale Fixed Access Market published by AGCOM on June 21, 2023, AGCOM, having considered the development of ultrabroadband offers and the diffusion of so-called "Best Technology Available" ("**BTA**") offers, proposed to re-apply replicability test obligations to the TIM Group's "*flagship*" offers, as described above, and to maintain all other replicability obligations on the TIM Group's retail offers. Pursuant to such proposal, TIM's retail offers, potentially including "*flagship*" offers, will continue to be sent to AGCOM in advance (20 days before their launch), in order to allow an *ex ante* application of the replicability test by AGCOM, with the exception of renewal of offers, modifications of already existing offers which do not imply a change of margins, and optional conditional sales associated to an offer already approved.

However, since, at the time the said scheme was published, the Transactions had not yet been notified to AGCOM in their details, such scheme does not take into account the envisaged effects of the successful completion of the Transactions. See also "*—Wholesale Fixed Access Markets*," "*Risk Factors—Risk related to the business activity and industries of the TIM Group—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business*," and "*Risk Factors—Risks Related to the TIM Group—Risks related to the TIM Group's Business Activity and Industry—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective*."

In the fourth quarter of 2022 TIM launched the 10/2 Gbit/s FTTH retail offer in both consumer and business markets.

28-Day Billing

AGCOM Resolution 121/17/CONS introduced instructions on billing intervals for telephony, prescribing, monthly intervals for fixed telephony, or multiples thereof, and four-week intervals for mobile telephony. In its Resolution 269/18/CONS, AGCOM had set December 31, 2018 as the date by which the operators had to return a number of days of service equal to the eroded days to their fixed network customers that were affected by the previous 28-day billing, or propose to such customers any alternative compensatory measures. In June 2019, TIM had decided to offer to the affected fixed network customers that were active prior to March 31, 2018, a possibility of accepting a compensatory solution and subsequently, from September 2019, TIM accepted customers' requests for the refund for the eroded days. In both cases, TIM had informed its customers of these options by ways of the notification on the bill, on the web and in the main newspapers.

Guidelines for Online Termination and Switching Costs and further developments on the sector regulation on users' protection

On November 2, 2018, AGCOM published Resolution 487/18/CONS setting the new guidelines on the charges applicable by operators in the event of customers' withdrawal.

Italian Law No. 40/2007 ("**Bersani Law**") allows customers to withdraw from the permanent contract at any time, *provided* that the costs they can be required to pay for the line termination or line switching shall be real and economically justified (for example, a deactivation costs for the fixed line).

The Bersani Law was subsequently amended by the Italian annual competition law no. 124/2017 and further implemented through the guidelines issued with AGCOM's Resolution 487/18/CONS. Such Resolution has introduced the following limits on the cost recovery that operators can apply in case of specific types of withdrawals and terminations:

- in case of withdrawal or line switching, the cost to be paid by the costumer should be lower of the average rental fee (contract value) and the actual deactivation cost paid by the operators;
- in case of early termination in the midst of the duration of a promotion, operators may charge only a share of the discounts proportionate to the residual duration of the promotion at the moment of the withdrawal; and
- in case of products with instalments offered in conjunction with the electronic communication service, customers can, at their option, pay the remaining instalments instead of reimbursement with a single payment.

TIM challenged the resolution regarding the provisions that limit the right to fully recover the costs in case of withdrawals with respect to the contracts that include discounts from promotions and product instalments. The administrative judge dismissed TIM's appeal, as the guidelines would not be directly damaging. TIM once again appealed against Resolution 487/18/CONS together with Resolution 591/20/CONS that ordered TIM to pay an administrative fine for the rules on cost recovery for withdrawals and terminations. In March 2022, the Administrative Tribunal for the Lazio Region (*Tribunale Amministrativo Regionale del Lazio*) ("**TAR**") rejected the appeal. TIM

appealed this decision and the proceeding is currently pending before the second instance administrative Court (Council of State).

The ECC as resulting from the transposition in Italy of the EECC, has provided a new set of rules on protection of users of electronic communications services. Following a public consultation procedure, AGCOM, by means of its Resolution No. 307/23/CONS, approved a new comprehensive regulation defining the concrete implementation of such new rules in the context of retail contracts (the "**Retail Customers Protection Regulation**"). Pursuant to the Retail Customers Protection Regulation, among others:

- retail operators shall amend their terms and conditions to include clear, accessible, and detailed information on, among others, minimum service levels and redress rights in case of underperformance, plan details, costs and terms of use of terminal equipment, offer activation and recurring costs, switching/withdrawal costs and procedures, and information as to services offered to people with disabilities and as to dispute resolution mechanisms;
- contracts cannot provide for an initial client commitment of more than 24 months (after which, a client can withdraw without additional costs) and, in case of prior withdrawal, no penalty can be applied to clients other than the payment of outstanding costs;
- clients can withdraw without additional costs within 60 days since the communication of changes to the terms and conditions (including pursuant to indexation mechanisms not purely based on Consumer Prices Indexes), as well as in case of material and continued or frequent underperformance; and
- contracts shall include clear, detailed, and accessible information as to any price indexation mechanism based on Consumer Prices Indexes, and no such price indexation mechanism shall be added to an existing contract if not with the client's prior explicit and written consent.

Indexation of Retail Offers

On January 3, 2024 AGCOM published Resolution no. 307/23/CONS on the protection of end users regarding contracts for the supply of electronic communications services, repealing Resolution no. 519/15/CONS. The provisions included therein apply to contracts between operators and consumers as well as, where expressly stated, to micro-enterprises, small businesses and non-profit organizations.

The new Resolution regulates the pre-contractual and contractual phases, as well as the termination of the contract and applies to all contracts regardless of their stipulation date, with the exception of the provision relating to termination costs in the event of withdrawal, which applies only to contracts stipulated after the January 3, 2024.

The provisions relating to developments and interventions on the systems are implemented within 6 months from the entry into force of the Resolution.

Finally, the Resolution also regulates the annual adjustment of prices based on the consumer price index. In this regard, TIM is evaluating to challenge such provisions as they are deemed to be excessively stringent and, in some respects, also illegitimate.

The Universal Service

In the past, under the previous version of the Italian Communication Code ("CC"), TIM was the only operator designated to provide the US. However, pursuant to the new Italian CC, AGCOM, in order to designate one or more companies as suppliers of the US, must first identify minimum bandwidth for an adequate broadband internet access service (Article 94, paragraph 3 of the Italian CC) and subsequently must verify that the availability and the economic accessibility at a fixed location of such service along with voice service cannot be guaranteed throughout the national territory under normal commercial conditions and through other potential instruments of public policies (Article 95 and Article 96 of the Italian CC). In this regard, by its Decision No. 309/23/CONS of December 5, 2023, AGCOM identified broadband internet access with a download speed of 20 Mbps as the broadband internet access service to be provided as part of the US, and clarified that, pending further AGCOM's determinations, TIM cannot be considered

to be automatically bound to provide such US broadband internet access services. However, pursuant to Article 95 of the Italian CC, in case AGCOM determines that the retail prices of US services are not accessible to low-income or special-need consumers, it may impose obligations to provide US services at accessible prices generally applicable to all retail providers, and, if US services are not available, AGCOM can designate one or more providers to guarantee such availability throughout the national territory (Article 96 of the Italian CC).

The Universal Service Fund ("**USF**") was established as a fund collecting and holding mandatory contributions paid by the major Italian communications companies in order to finance the net costs for US provided by the designated US operator, TIM.

AGCOM is responsible for verifying the net cost of the US provision and assessing whether this amount represents an unfair burden for the designated operator. If such burden is determined to be unfair, the designated operator may be entitled to an adequate compensation through the USF.

AGCOM assessed the net cost and authorized the funding mechanism until 2005, but did not recognize any net cost contribution for 2006 and 2007. The net cost for the provision of US for the period from 2004 to 2007 was subsequently calculated on the basis of a methodology established by AGCOM's Resolution 1/08/CIR in 2008 with a retroactive effect, that led to a significant decrease in the amount to be financed. The Council of State had overruled AGCOM's resolution. In response to such decision, AGCOM issued Resolutions 207/17/CONS and 145/17/CONS initiating proceedings for the review of the calculation of US net costs for 2004 and 2005, and 2006 and 2007, respectively. Additionally, by its Resolution 103/19/CIR issued on September 11, 2019, AGCOM has recognized a supplementary US net cost charged to the other operators for the period from 2004 to 2007, to be equal to €26.7 million. Finally, by its Resolution 88/18/CIR, published on June 21, 2018, AGCOM has determined that the net cost for 2008 equals zero and the net cost for 2009 amounts to €11.61 million and it is to be shared by the fixed and mobile operators.

On July 7, 2015, the Council of State delivered a decision rejecting TIM's appeal filed against TAR's decision related to AGCOM's Resolution issued in 2011 in connection with the proceedings for the review of the calculation of US net costs from 1999 to 2003 (excluding 2001). The subsequent decision of the Supreme Civil Court issued on December 27, 2017, rejected the following appeal filed by TIM and confirmed the need for a renewal of the proceeding to calculate the US net costs for the period above. AGCOM began the renewal proceedings for these years and periods by its Resolution 102/19/CIR on September 11, 2019. Such proceeding has been dismissed through Resolution No. 190/19/CIR following the decision of the Council of State dated October 8, 2019, that confirmed the possibility for AGCOM to renew the proceeding but provided a new guidance on the principles to be followed in doing so.

Following the Council of State's decision, Vodafone had requested a refund from TIM of the amounts paid for 1999, 2000, 2002, 2003 and subsequent periods. Through the abovementioned decision published in October 2019, the Council of State has also accepted the appeal of Vodafone, requiring TIM to return the disputed sums.

In September 2020, AGCOM ended the public consultation related to the review of the unfairness of US net cost charges for the period from 1999 to 2009. In resolution 263/20/CIR, AGCOM defined a new approach to demonstrate unfairness of US net cost charges and, on the basis of such new approach, AGCOM recognized the unfairness of the charges for the period from 2002 to 2009, while AGCOM did not find the net cost charges for 1999 and 2000, to be unfair.

On March 29, 2021, in its Resolution 18/21/CIR, AGCOM confirmed the obligation for mobile operators to participate in US contribution mechanism for the period from 2001 to 2009. However, AGCOM's Resolution 18/21/CIR was challenged by the other authorized operators ("**OAOs**"). Vodafone and Wind requested the suspension of the payment of the contributions to the USF until the conclusion of the proceeding, and the Ministry informed the fixed and mobile OAOs not to proceed with the payment of contributions of the years in question.

On February 17, 2022, the TAR annulled AGCOM's Resolution 18/21/CIR by accepting one of the grounds of appeal advanced by the OAOs focused on the threshold parameter relating to the unfairness of the burden that was contested with regard to the economic and financial impacts on the OAOs in question. The further OAOs appeal grounds were instead rejected by the TAR.

In the context of the second instance proceeding, the Council of State, with two decisions dated April 18, 2023 and May 2, 2023 (respectively, orders No. 3885/2023 and No. 4356/2023), decided to request a preliminary ruling by the European Court of Justice on the conditions to be met for AGCOM to impose USF obligation to the OAOs. The rulings of the EU Court of Justice are expected to be issued in 2025.

On September 14, 2021, AGCOM published Resolution 92/21/CIR with the final aim to assess the possible unfair nature of the US net costs for years 2010-2013. However, on June 27, 2022, AGCOM issued Resolution 1/22/CIR suspending the deadlines of the proceeding originally established by Resolution 92/21/CIR and then extended by Resolutions 58/22/CONS and 143/22/CONS in light of the impacts that could result from the abovementioned judicial proceeding against Resolution 18/21/CIR pending before the Council of State.

In relation to the US quality targets, the Council of State, on April 21, 2022 issued a decision annulling the sanction originally imposed on TIM by AGCOM's Resolution 28/11/CONS in the amount of €174,000 for failing to meet the missing quality targets for 2009.

The Council of State upheld TIM's appeal that challenged the sanction due to the failure to transpose the commitments proposal presented by TIM during the sanctioning procedure.

Finally, by Resolution 98/23/CONS, AGCOM has withdrawn the obligation to ensure the availability of public payphone service in the US framework.

Regulatory levies

Contribution Fees for the Functioning of AGCOM and for maintaining the authorizations as provider of electronic communications networks and services, together with numbering resources and spectrum rights of use

The TIM Group and the other electronic communications operators in the Italian market are required to pay annual contribution fees to cover AGCOM's costs for its regulatory activities. The contribution fees are determined in accordance with the AGCOM's specific resolutions issued yearly by AGCOM and are calculated on the basis of each operator's revenues.

Contribution fees for the electronic communications sector were determined by AGCOM as equal to 1.3 per thousand of each operator's revenues for 2022, and equal to 1.4 per thousand of each operator's revenues for both of 2023 and 2024, while contributions fees for the "media" sector were determined as equal to 1.9 per thousand of each operator's revenues for 2022, and equal to 2 per thousand of each operator's revenues for both of 2023 and 2024, and contributions fees for AGCOM's anti-piracy activities were determined as equal to 0.1 per thousand of each operator's revenues for 2023 and equal to 0.3 per thousand of each operator's revenues for 2024. On the basis of such resolutions, TIM paid, under reserve, approximately €15.7 million for 2022 and approximately €16.1 million for 2023.

In addition, the TIM Group is required to pay additional annual levies to the Ministry for the Enterprises and the Made in Italy for maintaining its authorizations as provider of electronic communications networks and services, together with numbering resources and spectrum rights of use (see below "*—The Italian Regulatory Framework—Spectrum*").

Government's UBB Network State Aid Plans

In June 2016, the European Commission authorized the Italian government's ultra broadband ("**UBB**") State Aid Plan ("**UBB State Aid Plan**") in an amount of €4 billion. The purpose of UBB is to foster expansion of NGA, a new or upgraded access networks, that compared to the existing services will allow for the substantial improvements in broadband speeds and quality of service for 25% of the Italian population living in about 7,200 municipalities across Italy belonging to UBB "*white areas*" (i.e. the areas where NGA is currently not available and there is no interest of private operators to deploy it in the near future). According to UBB State Aid Plan, these 7,200 municipalities are grouped into two clusters, cluster C and cluster D. According to UBB State Aid Plan, 70% of the connections in cluster C will be provided with at least a speed of 100 Mbit/s for downloading and 50 Mbit/s for uploading services, while the remaining 30% should be able to reach at least a speed of 30 Mbit/s for downloading and 15 Mbit/s for uploading services. Connections falling under cluster D should be able to download at a speed of at least 30 Mbit/s for and upload at a speed of at least 15 Mbit/s.

On June 3, 2016, Infratel published an invitation for a tender procedure of €1.4 billion for a 20-years concession for deploying and managing an UBB "*passive*" infrastructure, composed by ducts and dark fiber, in the White Areas in Abruzzo, Molise, Emilia Romagna, Lombardia, Tuscany and Veneto regions. On March 7, 2017, the tender was awarded to Open Fiber.

On August 8, 2016, Infratel published another invitation for a second tender regarding the ultrabroadband white areas that include ten additional Italian regions (Piemonte, Valle d'Aosta, Friuli Venezia Giulia, Liguria, Marche, Umbria, Lazio, Campania, Basilicata, Sicily and Trento Autonomous Province), for a total public financing of approximately €1.25 billion. TIM did not submit any bids. On July 28, 2017, the second tender was awarded to Open Fiber.

The Italian Strategy for Ultra Broadband "*Towards the Gigabit Society*" (the "**Strategy**"), approved on May 25, 2021 by the Interministerial Committee for the Digital Transition ("**ICDT**"), defined the actions necessary to achieve the digital transformation objectives set by the European Commission in its Gigabit Society Communication and Digital Compass. See "*—The EU Electronic Communications Regulatory Framework—Overview*."

The NRRP approved by the Italian government on April 29, 2021, allocates 27% of the resources to the digital transition, of which €6.7 billion are intended for strategic projects related to the ultrabroadband services, in line with the Government's strategy launched in 2015. In addition to the objective to complete the coverage plan for UBB white areas and create measures to support demand, the Strategy mentioned in the previous paragraph is composed by five further public intervention plans to cover the geographical areas in which the supply of infrastructures and very high-speed digital services by market operators is absent, insufficient, or the improvement is not imminently expected. The €6.7 billion funds have been allocated by NRRP's for the following plans:

- *"Italia a 1 Giga" Plan;*
- *"Italia 5G" Plan;*
- *"Connected Health" Plan;*
- *"Connected School" Plan;* and
- *"Smaller Islands" Plan*.

Through these measures and plans, the Italian government intends to bring forward by 2026 the 1 Gbit/s connectivity objectives for all Italian citizens across the national territory and full 5G coverage in the populated areas set by the Digital Compass for 2030.

Pursuant to the provisions of the abovementioned agreements with Infratel, the transfer of TIM's business as a going concern envisaged as part of the successful completion of the Transactions, including the envisaged take-over of NetCo in TIM's position in the Broadband and Ultrabroadband Tenders ("**BB/UBB**"), the "Italy at 1 Giga" Plan, and the "Italia 5G" Plan's fiber Backhauling Tender, is subject, for the purposes of such agreements, to the obtainment of the consent of Infratel.

"Italia a 1 Giga" Plan

The "*Italia a 1 Giga*" is a €3.86 billion plan that would guarantee a fixed coverage of 1 Giga in download and at least 200 Mbit/s in upload speed in the grey and black areas where, until 2026, the plans of private operators could not guarantee "*reliable*" download connections of at least 100 Mbit/s.

On January 15, 2022, Infratel published the "*Italia a 1 Giga*" invitation for a tender procedure granting public funds for the financing of investment projects aimed at the construction of new electronic communications infrastructures and related access equipment capable of providing services with at least 1 Gbit/s in download and 200 Mbit/s in upload speed, with a deadline of March 31, 2022. The tender included 15 lots covering around 6.9 million citizens and the funding foreseen in the tender amounted to €3.68 billion. Each competitor was able to win up to eight lots. 70% of the expenses incurred will be paid from the public contribution, while remaining share of no less than 30% will be paid by the beneficiary of the public funds. The results of the tenders were published on May 24, 2022 and are as follows:

- a temporary business group (*raggruppamento temporaneo di imprese*) between TIM and FiberCop won the tenders relating to: Sardinia (lot 1), Abruzzo, Molise, Marche and Umbria (lot 3), Piemonte, Liguria and Val d'Aosta (lot 4), South Calabria (lot 5), North Calabria (lot 11) and Basilicata (lot 14) for approximately up to €1.6 billion; and

- Open Fiber won the tenders relating to: Puglia (lot 2), Tuscany (lot 6), Lazio (lot 7), Sicily (lot 8), Emilia-Romagna (lot 9) Campania (lot 10), Friuli Venezia Giulia-Veneto (lot 12) and Lombardia (lot 13) for approximately €1.8 billion.

The tender relating to Trento and Bolzano (lot 15) was resubmitted in April 2022 with a deadline of June 3, 2022 and was awarded to a temporary business group (*raggruppamento temporaneo di imprese*) between TIM and FiberCop on June 28, 2022 for approximately up to €65 million. On July 29, 2022, the relevant agreements were signed between Infratel and the operators that had been awarded the individual lots.

"Italia 5G" Plan

The "*Italy 5G*" is a €2.02 billion plan, that provides for 5G coverage with 150 Mbit/s download speed and at least 50 Mbit/s upload speed in the following areas:

- European 5G corridors: these corridors cover 2,645 km and the funds allocated under the plan amount to €420 million;

- extra-urban roads ready for 5G: these roads are extended on an area of approximately 10,000 km, with the plan funds of €600 million; and

- no 5G/4G areas: the funds allocated to this project amount to €1 billion.

To identify the areas to be financed, Infratel has mapped the 4G and 5G mobile coverage plans of private operators for the period from 2021 to 2026, including the sites' fiber backhauling connections. As a result of the mapping, the following were identified as subjects to the public intervention:

- 13,200 mobile radio sites, that include approximately 18,600 Radio Base Stations ("**SRBs**"), for the implementation of fiber backhauling; and

- 15% of the national territory primarily consisting of crucial land transport routes, such as roads and railways, for the implementation of 5G.

The results were subject to a public consultation opened until December 15, 2021. Following the results of the public consultation, to encourage the creation of infrastructures for the development of 5G networks without investments from the market, on March 21, 2022 Infratel published the following two tenders:

- fiber backhauling tender; and

- new 5G sites tender.

The European Commission approved the State aid measure, including the above tenders on April 25, 2022. The deadline for submitting the bids expired on May 9, 2022.

Fiber Backhauling Tender

The tender provides for incentives for the investments in the construction of fiber optic links of over 10,000 existing mobile radio sites, up to 90% of its costs. It is divided into six multi-regional lots with an investment incentive of up to €725 million, and the relevant agreements related to each lot were signed between Infratel and TIM on July 29, 2022.

As of December 31, 2023, TIM has received an advance payment for the "Italia a 1 Giga" Plan, "Italia 5G" Plan and Fiber Backhauling Tender of €758 million. See "*Risk Factors—Risks related to the TIM Group's Financial*

Information—The pro forma financial information of the TIM Group may not be necessarily representative of the results that the TIM Group would have achieved as a result of the Transactions and may not be a reliable indicator of its future performance" and "*Risk Factors—Risks related to NetCo's Financial Information—NetCo Audited Combined Carve-out Financial Information and NetCo Unaudited Combined Pro Forma Carve-out Financial Information, as the case may be, may not be necessarily representative of the results that NetCo would have achieved as a separate and independent company and may not be a reliable indicator of its future performance*."

New 5G Sites Tender

The second tender is related to the construction of new 5G mobile network infrastructures (fiber, infrastructure and electronic components) in more than 2400 areas. This would ensure a transmission at least 150 Mbit/s download and 30 Mbit/s upload speeds, to be financed up to 90% of the costs with the funds of approximately €974 million. The second tender is divided into six multi-regional lots, different from the lots included in the fiber backhauling tender. This tender was abandoned and was republished with changes on May 20, with a deadline for the bids set for June 10, 2022. The new invitation for the bids provides for funding of approximately €567 million and reduces a number of sites for 50%. On June 28, 2022, Infratel announced that all lots were awarded to INWIT forming a temporary joint venture with TIM and Vodafone for approximately up to €346 million. On July 29, 2022, the relevant agreements relating to the awarded lots were signed between Infratel and the group of companies led by INWIT.

"Connected Health" Plan

The "*Connected Health*" plan aims to provide connectivity with symmetrical speeds, starting from 1 Gbit/s to 10 Gbit/s to approximately 12,280 healthcare facilities throughout Italy. In order to implement the plan, on January 28, 2022 Infratel launched a tender for the supply of ultrabroadband connectivity services at the public health service facilities in Italy, including the supply and installation of the access network and management and maintenance services, expiring on April 11, 2022.

The invitation provides for an allocation of €387 million and is divided into eight territorial lots. Each bidder could be awarded up to four lots. The provisional results of the tenders awarding €314 million was announced on June 6, 2022. TIM won two of the eight lots comprising the regions of Lombardia, Emilia-Romagna, Marche and Umbria, and was awarded approximately €78 million. The relevant agreements related to these lots were signed between Infratel and TIM on September 20, 2022.

"Connected School" Plan

The "*Connected School*" plan aims to complete the 2020-2023 School Plan launched by the Italian Government on May 5, 2020, that provided for the supply of an ultrabroadband connection speed up to 1 Gbit/s with a minimum guaranteed speed of 100 Mbit/s. The plan captures 35,000 school buildings, comprising 78% of the total number of the school buildings in Italy. Particularly, these include kindergartens, primary schools, the first and second level secondary schools, including those located in the White Areas.

In order to implement the plan, between September and December 2020, Infratel carried out a public consultation and issued an invitation for tender with public funding of €274 million divided into seven lots. Each bidder could be awarded up to two lots. On February 26, 2021 Infratel announced the results of the tender awarding €271 million. TIM won two lots that include the regions of Tuscany, Veneto, Marche, Abruzzo, Molise and Puglia, that were awarded €84 million.

The new "*Connected School*" plan launched in 2022 aims to complete the public intervention by including the remaining 9,900 school buildings into the plan.

In order to implement this plan, on January 28, 2022 Infratel launched a new tender, with a total budget of over €184 million to be awarded for the supply of ultrabroadband internet connectivity services at schools in Italy, including the supply and installation of the access network and management and maintenance services. The tender was divided into eight territorial lots and the same operator could be awarded up to four lots. The provisional award of the tenders was announced on June 6, 2022 with approximately €166 million awarded. TIM won four lots comprising the regions of

Piemonte, Liguria, Valle d'Aosta, Tuscany, Lazio, Campania, Calabria, Sicily and Sardinia, winning over €99 million. The related relevant agreements were signed between Infratel and TIM on September 20, 2022.

"Smaller Islands" Plan

The "*Smaller Islands*" an approximately €60.5 million plan aims to provide an adequate connectivity to 18 smaller islands currently without fiber optic connections with the mainland. In particular, the islands will be equipped with an optical backhaul that will allow a development of an ultrabroadband connectivity. The optical backhaul will be accessible to all operators through Submarine Backhaul Access Points ("**SBAP**") identified according to the criterion of the shortest distance from the neutral delivery point ("**NDP**"), if present on the island, and from the landing point of the submarine cable.

The plan would be implemented through direct intervention models, with the new network financed and owned by the State and managed by one or more operators, chosen on the basis of a competitive, open, transparent and non-discriminatory process.

The tender to identify the economic operators to be entrusted with the design, supply and installation of submarine fiber optic cables for the construction of the "*Smaller Islands*" plan was launched on November 18, 2021 and ended on December 22, 2021. The tender was abandoned and resubmitted by Infratel on February 11, 2022 with certain modifications. The tender was awarded to Elettra TLC on April 28, 2022 for approximately €45 million.

New consultation on mapping backhauling networks 2023

On December 18, 2023 Infratel launched a new consultation, expiring on January 31, 2024, in order to update the mapping of the backhauling networks. The mapping has the objective of knowing whether the collection points of the fixed access network (on physical carrier or FWA radio) existing, or planned by 2026, have a backhaul network with sufficient capacity to transport the traffic offered by the network access capable of providing download connection speeds equal to or greater than 300 Mbit/s in the peak period for each UI passed.

In the event of a market failure, *i.e.* if the capacity of the backhauling network, existing or planned, is deemed insufficient to cope with the expected development of the corresponding access networks based on the current and future needs of end users, further public intervention to support backhauling networks could be defined.

Ultrabroadband Vouchers Plan

The objective of the Ultrabroadband Vouchers Plan, launched on May 2020 with a total allocation of more than €1 billion, is to promote and incentivize the demand for ultrabroadband connectivity services (NGA and VHCN) across Italy, with the aim to increase the number of households and businesses having access to digital services via high-speed networks of at least 30 Mbit/s. This plan has been implemented through two incentive schemes (i) vouchers for families and (ii) vouchers for businesses.

Vouchers for families

Phase 1

A first phase of the overall intervention was launched on November 9, 2020, with an allocation of €200 million, in favor of families with an Equivalent Economic Situation Indicator ("**ISEE**") of less than €20,000. These families would receive a contribution of €500, consisting of €200 for connectivity and €300 for borrowed tablets or PCs. This scheme was created in response to the first phase of the Covid-19 pandemic as a helpful tool to deal with the effects of the health emergency and to guarantee suitable connection services to ensure continuity of the school and work related activities for the families. The first phase ended on November 9, 2021 and based on the allocation results the measure proved to offer little incentive. In particular, out of the available €200 million, more than €93 million were not allocated, and out of available 400,000 bonuses only 210,000 bonuses were assigned.

Phase 2

On April 27, 2022, Infratel therefore launched a public consultation starting the second phase of disbursement of vouchers for families. Approximately €407.5 million were allocated for the intervention. The consultation expired on May 31, 2022.

On March 22, 2023, Infratel launched a supplementary consultation to the consultation concluded on May 31, 2022, which expired on April 22, 2023, to acquire opinions and observations regarding the following proposals for action:

- intervention in favor of families, without ISEE limitations and without an active "data" contract on the fixed broadband and ultrabroadband network;
- provision of a voucher of €300, to encourage subscriptions to at least 300 Mbps in the form of a discount on the activation price (where present) and on the amount of the service provision fees for a period of up to 24 months, and will include the supply of the related electronic devices (CPE);
- exclusion of families who have already benefited from the connectivity voucher during phase 1, intended for less well-off families; and
- disbursement of an additional contribution equal to a maximum of €130 to cover costs relating to civil works that they may incur within their own private property in order to prepare it for the passage of the necessary infrastructures.

On December 11, 2023, Infratel launched an additional supplementary consultation, which expired on January 11, 2024, to acquire opinions and observations regarding the following the additional proposal, resulting from discussions with the European Commission, to provide a voucher of €100 for the activation of subscriptions to at least 300 Mbps plans, in the form of a discount on the activation price (where present) and on the amount of the service provision fees for a period of up to 24 months, and including the supply of the related electronic devices (CPE), to families without any data services or with services below 30 Mbps.

TIM submitted its observations to the abovementioned public consultations on May 31, 2022, on April 20, 2023, and on January 11, 2024, respectively. However, the results of none of such consultations have been published yet.

Vouchers for businesses

The incentive scheme for businesses, approved by the European Commission on December 15, 2021, was launched on March 1, 2022 and aims to promote ultra-fast internet connectivity for businesses and the digitalization of the production system. The net amount allocated to this scheme is approximately €590 million.

Under the scheme, businesses will be able to request a single voucher to guarantee an increase in connection speed, from 30 Mbit/s to over 1Gbit/s, ranging from €300 to €2,500 depending on the guaranteed download speed and the duration of the contract. Following the decision of the European Commission, the scheme, initially scheduled to expire in December 2022, was extended until December 31, 2023, subject to the availability of the allocated resources.

On March 22, 2023, Infratel launched a new consultation regarding the "Voucher Plan for the incentivization for business connectivity demand–- Application services" expiring on April 22, 2023 in order to acquire opinions and observations regarding the following proposals for action:

- intervention in favor of micro, small and medium-sized enterprises, as well as natural persons with a VAT number who exercise, on their own or in associated form, an intellectual profession pursuant to article 2229 of the Italian Civil Code, or one of the unorganized professions of referred to in the law of January 14, 2013, No. 4;
- provision of a voucher of variable value, for the activation of application services in 5G, Cloud, Cyber Security, Big Data, Artificial Intelligence, Blockchain, Drones, to support the activities of the beneficiaries; and

- voucher contribution available also for companies or professionals who already have a contract with at least 30 Mbps download speed.

TIM submitted its observations on April 20, 2023. The results of this new consultation have not yet been published.

Spectrum

Public auction for the frequencies for five services was concluded in October 2018, and TIM was awarded the following blocks:

- 2 x 10 MHz FDD in the 700 MHz band available starting from July 1, 2022;
- 80 MHz TDD in the 3.6-3.8 GHz band available from January 1, 2019; and
- 200 MHz in the 26.5-27.5 GHz band available from January 1, 2019.

All the frequency rights of use will expire on December 31, 2037 and can be extended for up to eight years.

The below table sets forth the total amount of TIM's licence fee of €2,399.38 million, that was paid in paid several instalments over the period from 2018 to 2022.

2018	2019	2020	2021	2022
€ 477,473,285	€ 18,342,111	€ 110,052,665	€ 55,026,332	€ 1,738,485,953

According to AGCOM Resolution 147/22/CONS, TIM was authorized to quit the provision of 3G/UMTS services, starting from June 1, 2022. The spectrum resources made available will be used to improve the capacity of the LTE and 5G networks.

Following a favorable opinion issued by AGCOM in its Resolution 338/20/CONS, in April 2021 TIM paid about €240 million for the renewal of 2x15MHz FDD spectrum rights of use in the 2100 MHz band until December 31, 2029.

Similarly, following a favorable opinion issued by AGCOM in its Resolution 66/22/CONS in March 2022 TIM was authorized to extend to December 31, 2029 the rights of use of the frequencies in the band 3,4–3,6 GHz (in nine regions) and to swap a 20 MHz block with Linkem. After such swapping, TIM has the rights of use of 20 MHz in all the Italian regions in the 3,4-3,6 GHz band, as well as the right of use of overall 100 MHz in the band 3,4-3,8 GHz. In May 2022 TIM paid approximately €5 million for the extension of the 20 MHz spectrum rights of use in the 3.4-3.6 GHz band until December 31, 2029.

Italian Golden Power Legislation and National Cyber Security Perimeter legislative framework

Under the Golden Power Legislation, the Italian Golden Power Authority may, among others, prohibit or impose undertakings on: (i) the acquisition of certain shareholdings in Strategic Companies, and (ii) resolutions, acts or transactions concerning a Strategic Company and resulting in a change in ownership, control, possession or intended use of the relevant strategic assets or relationships, including, among others, any merger, de-merger, transfer of business/branch of business as going concern, and the enforcement and, according to a prudential interpretation, the granting or extension of pledges over the shares or assets of Strategic Companies. The Company is required to notify the Italian Golden Power Authority of the transactions, resolutions or acts listed above. In the event of non-compliance with the obligations, specific penalties are provided, including administrative fines of up to twice the value of the transaction and in any case not less than 1% of the company's turnover (or the cumulative turnover of the companies involved in the transaction) in the last financial year for which the financial statements were approved.

The scope of application of the Italian Golden Power Legislation also Ides broadband communication systems based on 5G technology that are classified as strategic for the national defence and security, as well as certain 5G technological components. In particular, under the Golden Power Legislation, the acquisition of goods, including high technological components, or services related to the design, implementation, maintenance and management of 5G networks is subject to the approval of the Golden Power Authority. To such end, Strategic Companies operating in the sector of 5G broadband communications are required to provide (and to update if necessary every four months)

the Italian Golden Power Authority in advance with an annual plan of purchases of goods and services relating to the design, implementation, maintenance and management of 5G networks. The said such plan is subject to the approval of the Italian Golden Power Authority, including through the potential imposition of undertakings.

Failure to comply with the said reporting obligation provided under the Italian Golden Power Legislation or with any veto or undertakings imposed by the Italian Golden Power Authority may result in monetary fines, up to 3% of the Company's turnover. Contracts executed in violation of the said reporting obligation or of any undertaking imposed by the Italian Golden Power Authority are null and void. In the event of execution of contracts before the expiry of the deadline for the approval of the Plan, the Government may order the restoration of the previous situation at the expense of the defaulting party and impose a financial penalty in the event of delay in the said restoration.

The regulatory framework on National Security was enriched by the creation, in 2019, of the National Cyber Security Perimeter (PSNC). The legislation is intended to ensure a high level of security of networks, information systems and IT services of public administrations, public and private entities and operators with an established office in the national territory, on which the exercise of an essential function of the State depends, i.e. the provision of an essential service for the maintenance of civil social or economic activities, fundamental to the interests of the State and whose malfunctioning, interruption, even partial, or improper use, may result in a prejudice to national security.

Failure to comply with the obligations may result in administrative fines of up to €1.8 million.

Antitrust

Antitrust Issues in Italy

TIM is subject to Italian competition laws, particularly Italian Law No. 287 dated October 10, 1990 ("*Provisions aiming at protecting competition and the market*") that established the AGCM. AGCM's primary responsibilities and powers include the following:

- application of (i) Law no. 287/1990, (ii) the relevant EU provisions, including Article 101 and Article 102 of the Treaty on the Functioning of the European Union ("**TFEU**"), when applicable, (iii) Legislative Decree No. 206/2005 concerning consumer protection and Legislative Decree No. 146/2007 concerning unfair commercial practices;
- fight against (i) practices and/or agreements that could be restrictive for the competition landscape and (ii) abuses of dominant positions and review mergers and concentrations of enterprises; and
- monitoring conflicts of interest in the case of individuals holding government positions.

In addition, AGCM may adopt interim measures and make binding and enforce commitments upon the proposing parties in order to prevent identified competition concerns and violations.

Antitrust Issues at the European Level

TIM is subject to the European competition framework. European competition regulation covers various matters, including anticompetitive agreements (Article 101 TFEU), abuse of dominance (Article 102 of TFEU), mergers with an EU dimension reaching certain turnover thresholds, and state aid (Article 107 of TFEU).

The European Commission is empowered by the TFEU to apply antitrust rules (Articles 101 and 102 TFEU) directly and for that purpose it holds a number of investigative powers, such as inspection at business and non-business premises and written requests for information. It may also impose fines on subjects and their undertakings infringing the EU antitrust rules. The main antitrust rules on procedures are set out in Council Regulation (EC) 1/2003.

Since May 1, 2004, all National Competition Authorities (in Italy, AGCM) have been empowered to fully apply EU antitrust rules by virtue of Articles 101 and 102 of the TFEU, in order to ensure that competition is not distorted or restricted. The national courts may also apply these provisions in order to protect the individual rights guaranteed to the EU citizens by TFEU.

As part of the overall enforcement of EU competition law, the European Commission has also developed and implemented a policy on the application of EU competition law to actions for damages before national courts. European Commission also cooperates with national courts in order to ensure the coherent application of the EU competition rules within the Member States' judicial systems.

Furthermore, in the event of mergers, acquisitions or extraordinary transactions promoted by or involving TIM or part of its assets, the relevant transaction may be subject to *ex-ante* control by the European Commission, pursuant to Regulation (EC) 139/2004 on the control of concentrations between undertakings (the "**Merger Regulation**"). According to the Merger Regulation, a concentration with "Community dimension" (i.e. involving a turnover over the thresholds provided for by Article 1 of the Merger Regulation) shall be notified to the European Commission prior to its implementation. In case the concentration does not have a Community dimension, it may be subject to ex-ante control from AGCM, provided that the thresholds provided for by Article 16 of Italian Law No. 287 of October 10, 1990 are met. Upon analysis of the prospected transaction, the European Commission may, inter alia: (i) declare the transaction compatible with the common market; (ii) impose on the parties certain conditions and obligations aimed at ensuring the transaction's compatibility with the common market; or (iii) declare the transaction incompatible with the common market. Non-compliance with the obligations set out in the Merger Regulation may lead to fines up to 10% of the aggregate turnover of the infringing undertaking in case of, *inter alia,* failure to notify a transaction, breach of the standstill obligation, failure to comply with one or more of the conditions imposed, as well as in case of implementation of a transaction declared incompatible with the common market.

Telecommunication Regulatory Framework in Brazil

Overview

The telecommunications sector is regulated by Anatel, which was established by law and is administratively independent and financially autonomous from the Ministry of Communication (*Ministério das Comunicações*). Anatel is responsible for reviewing and amending all administrative regulation regarding services, completion and customer's rights related to telecommunications, issuing formal authorizations and performing inspections, as set forth in the General Telecommunications Law and the *Regulamento da Agência Nacional de Telecomunicações*, or the Anatel Decree.

Despite liberalization, which occurred in 1997, the Brazilian telecommunications market still faces persistent dominant positions held by fixed incumbent operators. In particular, broadband access is currently offered by operators over their own infrastructure and the respective regulatory framework is not always based on effective implementation of the wholesale access obligations.

In 1998, a presidential decree approved the first General Plan for Universalization Goals (*Plano Geral de Metas de Universalização*) ("**PGMU**"), obligations binding on the landline telephony services (*Serviço Telefônico Móvel Comutado*) ("**STFC**"), applicable only for fixed incumbents. PGMU is reviewed every five years, and the last universalization plan, formulated by the government, was published in January 2021 considering that fixed telephony concession will end in 2025. The PGMU V, replaces the 4G targets established in PGMU IV for construction of a backhaul in the municipalities that do not have a fiber optic connection.

A presidential decree issued on June 30, 2011, established a bidding process for 4G radio frequency ("**RF**"), an important landmark for the telecommunications sector. The bid occurred in 2012 and, in order to guarantee full rural service by 2018, Anatel linked the 4G blocks in the 2,500 MHz band to the 450 MHz band in specific geographic regions of Brazil. As a result, the four winning operators of the 4G blocks in the 2,500 MHz band linked to the 450 MHz band are subject to coverage commitments in rural areas. Such presidential decree also resulted in two new regulations to measure mobile and fixed broadband quality standards.

In November 2013, Anatel approved the dedication of a single band, of the 700 MHz spectrum, exclusively to mobile services and in September 2014, Anatel concluded the 700 MHz spectrum auction that granted to us, Vivo, Claro and Algar the operation of the 700 MHz frequency for the 4G mobile technology, to be added to the current LTE service in the 2.5 GHz RF. The TIM Group bid on Block 2 of that auction, for national coverage of the 700 MHz band, and won the same with a bid of BRL 1,947 million (a 1% premium over the minimum price of BRL 1,927 million).

The auction also required the winning bidders to proportionally reimburse the broadcasters for the clean-up of the spectrum previously held and used by them. The TIM Group spent approximately BRL 1,199 million in order to create in March 2015 the EAD with the other winning bidders, to ensure the spectrum clean-up. The price allocated to the clean-up of the spectrum related to unsold blocks was shared proportionately among the winning bidders who bought the other blocks. To offset such additional cost to the winning bidders, the price of the 700 MHz spectrum was discounted using Anatel's WACC methodology. As of September 2019, all Brazilian municipalities were able to receive TIM's expanded 4G coverage through the 700 MHz band.

In December 2015, Anatel auctioned remaining radio frequencies in the 1,800 MHz, 1,900 MHz and 2,500 MHz bands. The TIM Group submitted bids for the left over lots of the 2,500 MHz band, which had originally been auctioned in 2012. This particular band spectrum provides for 4G mobile services. The TIM Group were the first ranked bidder in the lots for Recife, in the state of Pernambuco, and Curitiba, in the state of Paraná, based on the Brazil Business Unit's bids which totaled BRL 57.5 million. The corresponding authorization terms were executed by Anatel in July 2016.

On November 2021, the TIM Group acquired eleven lots in the 5G Auction, with a total value offered of BRL 1.05 billion, in three frequency bands 3.5 GHz, 2.3 GHz and 26 GHz. The acquired bands have a set of obligations that must be met with financial contributions or the construction of mobile and fixed network infrastructure.

Currently, according to Decree No. 10,402/2020, which regulates Law No. 13,879/2019, it is possible to renew licenses for successive periods. However, some conditions are being disputed with Anatel and judicially, such as value and term of renewal.

In 2018, Decree No. 9,612/2018 (the "**Connectivity Plan**"), was published, establishing a series of guidelines for execution of terms of conduct adjustment, onerous granting of spectrum authorization and regulatory acts in general which includes: (i) expansion of high capacity telecommunications transport networks; (ii) increased coverage of mobile broadband access networks; and (iii) broadening the coverage of fixed broadband access network in areas with no available internet access by means of this type of infrastructure. It also establishes that the network implemented from the commitments will be subject to sharing from its entry into operation, except when there is appropriate competition in the respective relevant market. As well as Decree No. 10,480/2020 that regulates the Antennas Law (Law No. 13,116/2015) with the objective of stimulating the development of the telecommunications network infrastructure.

In 2021, there were some important ordinances published, namely: (i) MCom's Decree No. 2,447/2021, which approved the TIM Group's issuance of up to BRL 5,753 billion in debentures, (ii) MCom's Decree No. 2,556, which set priorities and goals for the establishment of investments determined by Anatel, (iii) Decree No. 10,748, which established the Federal Network for the Management of Cyber Incidents, regulating the National Information Security Policy, which aims to improve and coordinate the bodies and entities of the federal public administration in the prevention, treatment and response to cyber incidents, (iv) Decree No. 10,887, which provided for the organization of the National Consumer Defence System, with the objective of guaranteeing greater protection to consumer relations, increasing legal certainty, and making the administrative process more efficient, and (v) Data Protection Authority Decree No. 15, which established the Governance Committee, responsible for establishing institutional strategies and strategic guidelines related to public governance.

Additionally, there relevant decrees involving 5G were: (i) Decree No. 10,799, that updated Decree No. 9,612/2018 (telecom public policies), allowing the Government's network to be built by other entities, not only Telebras, (ii) Decree No. 10,800 established the Amazon Integrated and Sustainable Program ("**PAIS**"). One of its objectives is to expand telecom networks to the Amazon region, in addition to creating a management committee to monitor them, among other provisions, and (iii) MCom's Decree No. 1,924/21 about 5G guidelines, mainly about network security; obligation to provide an exclusive government network; backhaul for agribusiness; coverage of federal highways aligned with the Ministry of Infrastructure, among others. In order to use Universal Telecom Services Fund ("**FUST**"), (i.e. the contribution that the telecom sector makes annually), Law No. 14,109/2020 was introduced authorizing the use of FUST, including by the private sector, to expand connectivity in rural or urban areas with a low human development Index ("**HDI**") as well as policies for education and tech innovation of services in rural areas.

In 2020, the Decree No. 10,480/2020 was published by the federal government, which regulates antennas (Law No. 13,116/2015) with the purpose of stimulating the development of telecommunications network infrastructure. This decree was aimed to foster development of telecommunication network infrastructure and is a major step towards unlocking historical problems in the sector preventing its development, for example, some historical problems that the regulation seeks to cure include free right of way on highways and railways, positive silence, small cells and dig once.

On June 15, 2021, Provisional Measure 1,018/2020 was transformed into Law No. 14,173/2021, reducing the charges for satellite internet terrestrial stations and changing some of the FUST application rules. The law reduces FUST collection between 2022 and 2026 for telecommunications operators that run universalization programs approved by the management council (yet to be approved) with their own resources. The benefit will be valid for five years from January 1, 2022 and will be progressive: 10% in the first year; 25% in the second year; 40% in the third year; and 50% from the fourth year onwards. In addition, the new legislation removes the obligation to share towers within a distance of less than 500 metres from each other. The withdrawal of this obligation was considered essential for the implementation of 5G in Brazil, including to allow for the expected increase in density for the new technology.

In 2022, Decree No. 10.952/2022 was published, establishing the transfer of BRL 3.5 billion of FUST collection for connectivity of students and teachers of basic public education and data provided by INEP as criteria for transferring resources. The decree also stipulates that the resources may be used for a fixed connection, *provided* that cost-effectiveness is proven or that there is no offer of mobile data in the location where the beneficiary students live.

In March 2022 Decree No. 11,004/22 was published, which defines how FUST will be operationalized and foresees how the resources will be applied to any telecommunications service.

Also in 2022, Decree No. 11.304/2022 was published, establishing new rules for the Customer Service (SAC). The new "**SAC Decree**" brought more flexible rules regarding service hours, provision of protocol and digital service.

In July 2022. Law No. 14.424/2022 was published, which authorizes the installation of telecommunications infrastructure in cases where the competent body does not respond within the established period.

In 2023, Resolution No. 163 was published, which provides for the Resource Application Plan of the National Bank for Economic and Social Development - BNDES, for the period 2023-2025 with an investment perspective of BRL 686,314,215, 62.

Anatel

Over the years, Anatel has published several resolutions that apply obligations to the telecommunications sector, such as:

Resolutions Published in 2023:

(i) Resolution No. 759/2023: this Resolution approved the Plan for Assignment, Destination and Distribution of Frequency Bands in Brazil ("**PDFF**")

(ii) Resolution No. 760/2023: this Resolution approved the new "Signal Jammer Resolution"

(iii) Resolution No. 761/2023: this Resolution amend the Resolution No 717/2019 which approved the RQUAL

(iv) Resolution No 765/2023: this Resolution approved the new RGC – General Consumer Protection Regulation

(v) Resolution No 766/2023: this Resolution approved the allocation of RF sub-bands in the 4.9 GHz band.

Main Public Consultations Held in 2023:

(i) Public Consultation No. 23/2023: Technical and Operational requirements for RF Spectrum Use

(ii) Public Consultation No. 64/2023– PGMC - General Plan of Competition

(iii) Public Consultation No. 65/2023: RUE – Spectrum Use Regulations

(iv) Public Consultation No. 68/2023: Technical and Operational requirements for authorization in a delimited area (polygons)

(v) Public Consultation No. 71/2023: Regulation for Sectoral Data Collection

(vi) Call for Subsidies No. 13/2023: Regulation of Users' Duties (Fair Share)

(vii) Call for Subsidies No 21/1023: Review of Regulation for the Application of Administrative Sanctions (RASA)

(viii) Call for Subsidies No 23/2023: Technological transition from 2G and 3G standards to 5G (2G/3G switch off)

(ix) Call for Subsidies No 25/2023: Evaluation of roaming application on highways.

Telecommunications Self-Regulation System

In March 2020, telecommunication operators signed the Telecommunications Self-Regulation System ("**SART**"), which proposes to establish common rules and procedures that must be followed by all participating companies, in relation to the most important topics related to providers and customers, such as telemarketing (approved in September 2019), offers (approved in March 2020), billing (approved in February 2021) and attendance (approved in March 2020).

Other Agencies

Recently, TIM Group monitored and participated in Public Consultations carried out by ANEEL, on topics related to infrastructure sharing (poles) and distributed generation. The results of the Public Consultations are expected for the years 2023 and 2024.

Review of the Current Regulatory Model for the Provision of Telecom Services

In 2019, PLC 79/2016 was approved and converted into Law No. 13,879 on October 4, establishing a new regulatory framework for the telecommunications sector in Brazil also constituting the biggest regulatory change in the last 20 years.

The new telecommunications framework allows the fixed telephone concessionaires to adapt their agreements from a concession regime to an authorization regime. This change of concession to authorization must be requested by the concessionaire and should be approved by Anatel. In return, concessionaires must, among other conditions, make investment commitments to expand fixed broadband services, in areas without adequate competition for these services, in order to minimize gaps and inequalities among Brazilian areas. Additionally, it also changes the rules on authorization of radiofrequency uses, establishing subsequent renewals and allows Radiofrequency trading among players (spectrum secondary market).

In June 2020, the Federal Government published Decree No. 10,402/2020 which regulates Law No. 13,879/2019 and provides for the adaptation of the concession instrument to authorization of telecommunications services and on the extension and transfer of radiofrequency authorization, grants of telecommunications services and satellite exploration rights.

Decree No. 10,402/2020 establishes that the partial or full transfer of the authorization to use radio frequencies between telecommunications service providers will be carried out against payment by Anatel and must be preceded by Anatel's consent, in addition to enabling the maintenance of obligations associated with radiofrequencies (serving the public interest), the application of restrictions of a competitive nature when necessary/convenient and the analysis of tax regularity of the company to which the authorization is being transferred. It also confirmed that the current authorizations are covered by the new rule for successive renewals.

Authorizations

With the privatization of the Telebrás system and pursuant to the Minimum Law (*Lei Mínima*), Band A and Band B service providers were granted concessions under Cellular Mobile System ("**SMC**") regulations. Each concession was a specific grant of authority to supply mobile telecommunications services in a defined geographical area, subject to certain requirements contained in the applicable list of obligations attached to each concession.

The predecessors of the companies part of the Brazil Business Unit were granted SMC concessions and in December 2002, such SMC concessions were converted into PCS authorizations, with an option to renew the authorizations for an additional 15 years. TIM S.A. acquired PCS authorizations in conjunction with auctions of bandwidth by Anatel in 2001, and subsequently acquired additional authorizations and operations under the PCS regulations as well.

The Brazil Business Unit holds all of the authorizations previously issued in the name of other companies controlled, directly or indirectly, by TIM Participações.

Obligations of Telecommunication Companies

Among all the obligations imposed on telecommunications providers, Resolution No. 632/2014 has the most significant impact. Pursuant to this resolution, Anatel approved the adoption of a single regulation for the telecommunications sector, the RGC, with general rules for customer service, billing, and service offers, which are applicable to fixed, mobile, broadband and cable TV customers. This regulation was subject to a Public Consultation in 2020, and a new Regulation was published by Anatel in November 2023 (Resolution No. 765/2023) and will come into force as of September 2, 2024. In December 2019, Anatel approved RQUAL, which came into force in March 2022. After reviewing certain indicators, operators will be classified from A-E (expected to take place in 2023). See "— *Quality Management Regulation*."

PCS Regulation

In September 2000, Anatel promulgated regulations regarding PCS wireless telecommunications services that are significantly different from the ones applicable to mobile companies operating under Band A and Band B.

According to rules issued by Anatel, renewal of a concession to provide mobile telecommunications services, as well as permission from Anatel to transfer control of cellular companies, are conditioned on agreement by such cellular service provider to operate under the PCS rules. TIM Sul, TIM Nordeste and TIM Maxitel converted their cellular concessions into PCS authorizations in December 2002, and later transferred them to TIM Sul, TIM Nordeste and TIM Maxitel, which are now TIM S.A.

In recent years, Anatel initiated certain administrative proceedings against TIM Celular (now TIM S.A.) for non-compliance with certain quality standards and noncompliance with its rules and authorization terms. The Brazil Business Unit has been fined by Anatel in some proceedings and are still discussing the penalty imposed in appeals before the agency. As a result of these proceedings, Anatel applied some fines that did not cause a material adverse effect on the Brazil Business Unit. On December 31, 2023, the total amount of these fines was BRL 301 million (after adjusting for inflation). However, only BRL 32.8 million (after adjusting for inflation) was classified as "probable loss" by Brazil Business Unit's legal advisors. The significant amount related to fines classified as "possible loss" is a result of ongoing litigation.

On August 22, 2019, Anatel's board of officers unanimously approved the execution of a TAC with TIM S.A., effective for four years from signature. The agreement covers fines imposed against the TIM Group in the total amount of BRL 639 million. The commitment TIM S.A. assumed, as also approved by its board of directors on June 19, 2020, foresees actions to develop its services from three different perspectives: (i) customer experience, quality and infrastructure, through initiatives to improve the licensing process of base stations, efficient use of resources, (ii) evolution of digital service channels, decreasing complaint rates and user repair demands, and (iii) reinforcement of transportation and access networks. In addition, the agreement also includes the commitment to bring mobile broadband through the 4G network to 350 cities with less than 30 thousand inhabitants thus reaching over 3.4 million people and the application of Internal Controls Management to ensure compliance with the closed proposal and the commitment to not impose inspection obstructions. As released to the market on June 16, 2020, and previously

approved by Anatel on August 22, 2019, the TAC provided the implementation of the new infrastructure in three years, with the TIM Group's assurance that these areas will be shared with other providers.

In the TIM Group's view, by January 2024, 68% of commitments had already been completed, 15% under analysis and 17% in progress.

The TIM Group has been complying with the TAC implementation schedule and has been presenting its understanding to Anatel in cases in which the Agency indicates signs of non-compliance in the Schedule Item Non-Compliance Investigation Procedures (PADIC) eventually established.

Significant Market Power

In November 2012, Anatel published a new competition framework, the *General Plan for Competition Targets* (the "**PGMC 2012**"). Also in November 2012, Anatel published a series of regulations identifying groups with significant market power in the following relevant markets as defined by the PGMC 2012: (i) wholesale offer of fixed access infrastructure for data transmission through copper or coaxial cable in rates equal or higher than 10 Mbps (Act No. 6,617, of November 8, 2012); (ii) wholesale offer of fixed infrastructure for local and long distance transportation for data transmission in rates equal or higher than 34 Mbps (Act No. 6,619, of November 8, 2012); (iii) passive infrastructure for transport and access networks (Act No. 6,620, of November 8, 2012); (iv) mobile network termination (Act No. 6,621, of November 8, 2012); and (v) national roaming (Act No. 6,622, of November 8, 2012). On December 5, 2016, Anatel published public consultations on (i) the revision of PGMC 2012's relevant markets and remedies; and (ii) the proposal of a specific Regulation for the Approval of Reference Offers, for public comment until March 22, 2017.

In July 2018, Anatel published the new PGMC (the "**New PGMC**") reviewing some of its points and set up new markets: (i) national roaming and (ii) high capacity data transport. According to the New PGMC proposal, cities in Brazil will be classified by levels of competition (1 – competitive, 2 – moderately competitive, 3 – less competitive, 4 – non-competitive), and asymmetric measures will be applied according to the market competition. In addition, also based on the proposal submitted to public consultation, wholesale relevant markets will be defined as follows:

PGMC 2012	PGMC 2018
Wholesale mobile call termination	Wholesale mobile interconnection
National roaming	National roaming
Full unbundling and bistream, or wholesale fixed network infrastructure access less than 10 Mbps	Wholesale fixed network infrastructure access
Leased lines, interconnection class V, interlinking, or wholesale fixed network infrastructure transport less than 34 Mbps	Leased lines
Ducts, trenches and towers, or passive infrastructure	Towers regulated by law
-	Wholesale fixed interconnection
	High capacity data transport

Under the PGMC 2018, the TIM Group has been identified as having SMP in the following wholesale markets: (i) mobile network termination; (ii) data traffic exchange; (iii) data traffic; (iv) national roaming; and (v) high capacity data transport (five municipalities). The measures applied to an significant market power operator in those markets include: (i) the application of mobile termination rates on a glide path based on a price cap system and the partial application of the Bill & Keep ("**B&K**") system (at a 50% threshold (i.e. not a significant market power operator pays only if the terminated traffic on the significant market power operator network is more than 50% of the total traffic exchanged) and only until the next revision of the New PGMC in 2021); and (ii) an obligation to offer the service of national roaming service to non-SMPs.

Due to such classification, the TIM Group is subject to increased regulation under the New PGMC, which could have an adverse effect on its business, financial condition and results of operations. Specifically, because the TIM Group

has been classified as having SMP in the mobile network interconnection, the rates charged by mobile service providers to other mobile service providers to terminate calls on their mobile networks (“*Value to Use the Mobile network,”* the “**VU-M**”), are regulated. On July 4, 2014, Anatel approved, by means of Resolution No. 639/2014, a rule for the definition of maximum reference rates for entities with significant market power, based on a cost model, for VU-M, (“*Tarifa de US da Rede Local”* or “**TU-RL**”), and EILD. Pursuant to Anatel’s rule, reference rates will decline based on a glide path until the cost modelling known as Bottom-Up Long Run Incremental Cost models (“**BU-LRIC**”) is applied (in 2019, for VU-M and TU-RL; and in 2020, for EILD). On July 7, 2014, Anatel published the corresponding Acts Nos. 6,210/2014, 6,211/2014 and 6,212/2014, which determined the specific reference rates effective as of February 2016. On December 19, 2018, Anatel published the corresponding Acts Nos. 9,918/2018, 9,919/2018 and 9,920/2018, which determined the specific reference rates effective as of February 2020. Before coming into force, Anatel started revising these acts and, on February 24, 2020, published the new Acts Nos. 986/2020 and 987/2020. Finally, on April 2023, Anatel published the corresponding Acts 3.246/2023, which predict TU-RL and VU-M values from February 2024.

Because of the TIM Group’s classification as having significant market power in the national roaming market, it must also offer roaming services to other mobile providers without significant market power at the rates approved by Anatel.

The TIM Group is also required to provide access to its high-capacity data transport network due to its classification as having SMP in that market.

Until July 2018, roaming reference values were provided for in Act No. 9,157/2018. After deliberation by Anatel’s board of directors in June 2022, the new values are now provided for in Act No. 8,822/2022.

In the high-capacity data transport, Anatel’s board of directors recently approved Act No. 15,944/2022, replacing Act No. 9,161/2018.

Interconnection Regulation

Telecommunication operators must publish a public interconnection offer on both economic and technical conditions and are subject to the “*General Interconnection Regulatory Framework*” (“**GIRF**”) issued by Anatel in 2005.

In October 2011, Anatel established a mechanism for reducing fixed-to-mobile call rates, that results on a glide path to the reduction of mobile interconnection rates VU-M from 2012 to 2018, in accordance with Resolution No. 600/2012.

In addition to the VU-M reduction, Anatel established a bill and keep (“**B&K**”), rule between SMP and non-SMP PCSs. From January 2013 until February 2015, the B&K was 80%/20%. On February 12, 2015, Anatel approved, by means of Resolution No. 649/2015, the following new B&K percentages, amending the percentages established by Resolution No. 600: 75%/25%, from 2015 until 2016; 65%/35%, from 2016 until 2017; 55%/45%, from 2017 until 2018; and 50%/50%, from 2018 until 2019, which was the object of a judicial suit (ongoing), in order to suspend its effects. In July 2015, companies part of the Brazil Business Unit filed a lawsuit seeking to annul Resolution No. 649/2015 and maintain the percentages originally established by Resolution No. 600/2012, which currently remains pending a final decision. However, as discussed above, the New PGMC in 2021 set the partial B&K threshold to 50% (i.e. a non-SMP operator pays only if the terminated traffic on the SMP operator network is more than 50% of the total traffic exchanged) and will be applied until the next revision of the New PGMC. In addition, Anatel determined the end of the existing additional 20% on the value of mobile termination rate paid by SMPs to non-SMPs.

Related to fixed interconnection, Anatel revised the criteria for pricing the use of fixed networks in May 2012. According to such regulation, after January 1, 2014, a full B&K regime (in which no payments are due for the traffic termination) was implemented for local STFC operators dealing with other local STFC operators. Currently, therefore, no payments are due for the use of a local STFC operator’s network by other local STFC operator. With respect to interconnection of STFC operators with long distance and mobile operators, the TIM Group understands that, in July 2018, when Anatel issued New PGMC 2018, the asymmetrical measure that permitted STFC operators without SMP to charge a TU-RL 20% higher than the TU-RL charged by STFC operator, with SMP was revoked.

On July 4, 2014, Anatel approved, by means of Resolution No. 639/2014, a rule for the definition of maximum reference rates for entities with significant market power, based on a cost model, for VU-M and TU-RL, and for EILD. On July 7, 2014, Anatel published the corresponding Acts No. 6,210/2014, 6,211/2014 and 6,212/2014, which determined the specific reference rates effective as of February 2016.

On December 19, 2018, Anatel published the corresponding Acts Nos. 9,918/2018, 9,919/2018 and 9,920/2018, which determined the specific reference rates effective as of February 2020. Before coming into force, Anatel started revising these acts and, on February 24, 2020, published the new Acts Nos. 986/2020 and 987/2020. Recently, Anatel published Act 3,246/2023, in which it edited the Reference Values until 2027 from the change from Top Down model to Bottom Up model.

Wholesale Rates Regulation

Under its PCS authorizations, the companies part of the Brazil Business Unit are allowed to set prices for its service plans, subject to approval by Anatel, *provided* that such amounts do not exceed a specified inflation adjusted cap. Anatel currently uses the telecommunication services index (*Índice de Serviços de Telecomunicações*) ("**IST**"), a specific price inflation index that it developed, in evaluating prices and determining the relevant cap for prices charged in the telecommunications industry. As mentioned above, on July 4, 2014, Anatel approved the calculation of VU-M, TU-RL and EILD reference rates based on a cost model. The TIM Group expects that the adjustment of its prices will follow the market trend, and that the adjustment will be below the annual inflation rate based on the IST.

Number Portability

In March 2007, Anatel issued a new regulation regarding number portability in Brazil for fixed telephony and PCS providers. Portability is limited to migration between providers of the same telecommunications services. For PCS providers, portability can take place when a customer changes its services provider within the same Registration Area as well as when a customer changes the service plan of the same area. Anatel finished the nationwide number portability ("**NP**") implementation schedule in March 2009.

Value-Added Services and Internet Regulation

Value-Added Services ("**VSR**") are not considered under Brazilian telecommunications regulations to be telecommunications services, but rather an activity that adds features to a telecommunications service. Regulations require all telecommunications service providers to grant network access to any party interested in providing VSR, on a non-discriminatory basis, unless technically impossible. Telecommunications service providers also are allowed to render VSR through their own networks. Internet connection, when offered to users on a single basis, by parties other than telecommunications service providers, is considered by Brazilian legislation to be a value-added service, and its providers are not considered to be telecommunications companies. Current regulations allow the TIM Group or any other interested party to offer internet connection through the TIM Group's network. In such case, internet connection would be deemed as a portion of the telecommunications service that enables users to navigate the internet.

In April 2014, the Brazilian President passed Law No. 12,965/2014, known as the Legal Framework for the Use of the Internet (*Marco Civil da Internet*) (the "**Internet Framework**"), which establishes the principles, guarantees, rights and duties for the use of the Internet in Brazil. Key topics covered in the Internet Framework are: net neutrality; collection, use and storage of personal data; confidentiality of communications; freedom of expression and the treatment of illegal, immoral or offensive contents.

The Presidential Decree No. 8,711/2016 was enacted by the Brazilian President on May 11, 2016 and provided additional detail on the Internet Framework in three main aspects: (i) clarification of the scope and implementation of the net neutrality rules, (ii) implementation of the rights and obligations related to privacy and data protection regarding Brazilian internet users, and (iii) governance of the Internet Framework, including authorities entitled to enforce the legislations. See "*—Review of the Current Regulatory Model for the Provision of Telecom Services*."

Privacy and Data Protection

On August 14, 2018, the Brazilian President passed the Brazilian General Data Protection Law (*Lei Geral de Proteção de Dados Pessoais*) (the "**LGPD**"). This new law is closer to GDPR, including significant extraterritorial application and considerable fines of up to 2% of a company's global turnover of the previous financial year. The LGPD came into effect on September 18, 2020. However, the administrative sanctions provisions of LGPD only became enforceable as of August 1, 2021, pursuant to Law No. 14,010/2020. Cybersecurity incidents and data breach or leakage events may subject the TIM Group to the following penalties: (1) warnings, with the imposition of a deadline for the adoption of corrective measures; (2) a one-time fine of up to 2% of gross sales of the company or a group of companies or a maximum amount of BRL 50 million per violation; (3) a daily fine, up to a maximum amount of BRL 50 million per violation; (4) public disclosure of the violation; (5) the restriction of access to the personal data to which the violation relates, until corrective measures are implemented; (6) deletion of the personal data to which the violation relates; (7) partial suspension of the databases to which the violation relates for up to 12 months, until corrective measures are implemented; (8) suspension of the personal data processing activities to which the violation relates for up to 12 months; and (9) partial or full prohibition on personal data processing activities. The postponement of the administrative sanctions did not prevent the competent authorities to begin supervision procedures and enactment of additional rules to be complied with prior to such effectiveness date, nor did it prevent individual or collective lawsuits based on violation of data subject's rights and subject to civil liability.

The TIM Group has set up a team tasked with adapting its processes and technologies to ensure compliance with the LGPD requirements. Notably, the companies part of the Brazil Business Unit have, among other developments, nominate a Data Protection Officer in December 2018, created specific clauses for the protection of personal data in its contracts with suppliers and business partners, developed training for all employees and salesforce as well as customized training for top leadership on the topic of data protection, established internal and external normative in order to set and establish conditions to process personal data, created a flow and process to handle data breaches, created a channel to receive and answer requests from data subject to exercise data protection rights and a Privacy Central was created on the TIM Group's Brazil website. In order to comply with the LGPD and to manage the data subject rights an internal team was formed to lead the necessary actions. Additionally, in 2022 TIM S.A., obtained the ISO 27001 certification, a standard for the information security management system and created an Executive Data Protection Committee, led by its Chief Executive Officer, Mr. Alberto Mario Griselli.

Frequencies and Spectrum Background

In connection with the PCS authorization auctions in 2001 and 2002, Anatel divided the Brazilian territory into three separate regions, each of which is equal to the regions applicable to the public regime fixed-line telephone service providers. PCS services could only be provided under Bands C, D and E at that time with initially 1800 MHz band and afterwards also the 900 MHz band. The TIM Group acquired the D band in regions II and III and the E band in region I, completing The TIM Group's national coverage when considering TIM Sul, TIM Nordeste and Maxitel coverage (each ultimately merged into TIM S.A.). In March 2016, the authorizations for the D and E bands were renewed.

In December 2007, the Brazil Business Unit acquired new authorizations for the 1,800 MHz frequency in São Paulo and Rio de Janeiro in order to improve its RF capacity in these regions. Within the same auction, Claro and Vivo acquired authorizations to provide PCS services in regions where the Brazil Business Unit had historically provided services but where Claro and Vivo previously did not, using 1,800 MHz and 1,900 MHz bands. This resulted in increased competition in these regions. In the same auction, Oi received authorization to provide PCS services in the state of São Paulo using 1,800 MHz (band M in the whole state and band E in the state's countryside).

In December 2007, the Brazil Business Unit acquired 3G frequencies sub-bands (1,900–2,100 MHz), with national coverage; these authorizations were granted in April 2008 and are valid until 2023. Oi, Claro, Vivo and Algar Telecom also acquired 3G frequencies sub-bands in the same auction carried out by Anatel. All the authorization winners were subject to coverage and/or expansion commitments, divided by Municipality among the winners, in unserved areas.

In December 2010, Anatel auctioned an empty 3G band of radio spectrum consisting of (10+10) MHz in 2.1 GHz in the whole country (the "**H Band**") auction, and other left over frequencies in the 900 MHz and 1800 MHz bands that

had not been assigned in previous auctions. In this auction: we, Vivo, Claro and Nextel (now America Movil) acquired blocks of frequencies.

In December 2011, Anatel auctioned 16 blocks in the 1,800 MHz band, which were sold to Claro, Oi, CTBC and TIM. As a result of its participation in the auction, the Brazil Business Unit expanded its 2G coverage and increased its presence in the northern and central-western regions of Brazil, including the states of Paraná, Espirito Santo, Rio Grande do Sul, Santa Catarina and Minas Gerais.

In 2012, Anatel established a bidding process in order to comply with Presidential Decree No. 7,512 of June 2011, which set April 2012 as the deadline to auction the 2.5 GHz band, in order to introduce 4G technology in Brazil. Anatel modelled the auction with two national blocks of (20+20) MHz (W and Z) and two national blocks of (10+10) MHz (V1 and V2). In order to guarantee full rural service by 2018, Anatel linked the 4G blocks to the 450 MHz band in specific geographic regions of Brazil. Then, in 2022, through Act No. 12,827, published on September 13, 2022, the 450 MHz block was extinguished. As indicated in the notice, the winners of the auction committed themselves to the waiver if services were not activated within the established time frame.

The Brazil Business Unit participated in the auction as a group bidding in the name of TIM and Intelig (now TIM S.A.). The Brazil Business Unit did not bid for the W block (Amazonas as a rural area), which the Brazil Business Unit viewed as having a high premium if compared to the X block (67%). The Brazil Business Unit successfully acquired the V1 block, which in its view held the best capital expenditure/operating expenditure profile associated with rural services in its selected regions (the States of Rio de Janeiro, Espirito Santo, Santa Catarina, and Paraná). The joint bid allowed the Brazil Business Unit to take advantage of the flexibility of the auction rules. These bands brought heavy coverage obligations as its short-range characteristics demands large investments.

In November 2013, Anatel approved the dedication of a single band, of the 700 MHz spectrum, exclusively to mobile services and in September 2014, Anatel concluded the 700 MHz spectrum auction that granted to us, Vivo, Claro and Algar the operation of the 700 MHz frequency for the 4G mobile technology, to be added to the current long term evolution ("**LTE**") service in the 2.5 GHz RF. The Brazil Business Unit bids on Block 2 of that auction, for national coverage of the 700 MHz band, and won the same with a bid of BRL 1,947 million (a 1% premium over the minimum price of BRL 1,927 million).

The auction also required the winning bidders to proportionally reimburse the broadcasters for the clean-up of the spectrum previously held and used by them. The Brazil Business Unit spent BRL 1,199 million in order to create in March 2015 the Ethernet Access Direct ("**EAD**") with the other winning bidders, to ensure the spectrum clean-up. The price allocated to the clean-up of the spectrum related to unsold blocks was shared proportionately among the winning bidders who bought the other blocks. To offset such additional cost to the winning bidders, the price of the 700 MHz spectrum was discounted using Anatel's WACC methodology. As of September 2019, all Brazilian municipalities are able to receive TIM's expanded 4G coverage through the 700 MHz band.

In December 2015, Anatel auctioned remaining radio frequencies in the 1,800 MHz, 1,900 MHz and 2,500 MHz bands. The Brazil Business Unit submitted bids for the left over lots of the 2,500 MHz band, which had originally been auctioned in 2012. This particular band spectrum provides for 4G mobile services. The Brazil Business Unit was the first ranked bidder in the lots for Recife, in the state of Pernambuco, and Curitiba, in the state of Paraná, based on the Brazil Business Unit's bids which totalled BRL 57.5 million. The corresponding authorization terms were executed by Anatel in July 2016.

In November 2021, TIM acquired eleven lots in the 5G Auction, with a total value offered of BRL 1.05 billion, in three frequency bands 3.5 GHz, 2.3 GHz and 26 GHz. The acquired bands have a set of obligations that must be met with financial contributions or the construction of mobile and fixed network infrastructure.

Currently, according to Decree No. 10,402/2020, which regulates Law No. 13,879/2019, it is possible to renew licenses for successive periods. However, some conditions are being disputed with Anatel and judicially, such as value and term of renewal.

In April 2023, Anatel extended the validity of radiofrequency authorizations in the 1,800 MHz and 2,100 MHz bands, which will be valid until 2032 and 2038, respectively.

The actual scenario of frequencies granted to the Brazil Business Unit by Anatel is presented on the table below:

Territory	**Frequencies**							
UF	**450 MHz**	**700 MHz**	**800 MHz**	**900 MHz**	**1800 MHz**	**Additional 1800 MHz**	**1900 MHz (3G)**	**2100 MHz (3G)**

Tocantins		December 2029	March 2031*	March 2031*	March 2031*	April 2032	April 2038	April 2038

* Terms already renewed for 15 years.

** Only covers complementary areas in the specified states. The Radio frequency Blocks of the Municipalities of the National Code 92, which were part of Lot 208, were returned.

*** Except for the cities in sector 3 of PGO for 3G and excess radio frequency.

Industrial Exploration of Dedicated Lines

In December 2010, Anatel approved a public hearing that considered alterations of the Industrial Exploration of Dedicated Lines (*Exploração Industrial de Linha Dedicada* or "**EILD**"), which established mechanisms for the operation of transmissions circuits up to 34 Mbps to increase transparency between operators and concessionaires. In May 2012, Anatel approved the new EILD regulations (*Regulação de Exploração Industrial de Linha Dedicada*) (the "**REILD**"), detailing mechanisms to optimize the operating structure for transmission loop contracts in order to increase contract price transparency and affording equal treatment to independent service providers from concessionaire groups. The REILD specifically sets out more effective rules on project definition including Standard EILD or Special EILD, in addition to contract and delivery terms, and specifies EILD delivery dispute resolution procedures. Concurrently, in May 2012, Anatel approved new EILD reference prices, a step towards value fixation in controversies between service providers.

Considering that EILD is also a market subject to the asymmetric regulation defined by Anatel in the PGMC 2012, operators classified by Anatel as pertaining to group with significant market power in the EILD market, such as Oi, were required to submit reference prices and offers for Anatel's approval, as well as to only offer EILD through a specific system designed for the PGMC 2012. In September 2013, Anatel ratification, for the first time, reference prices and offers of the operators with significant market power in the EILD market. At least every six months new reference prices and offers must be submitted for Anatel's approval. The Brazil Business Unit is not currently classified as having an SMP in the EILD market.

Nevertheless, the TIM network is still growing and, with its backbone now reaching the North region of Brazil by using optical fiber technologies and not only via satellite, this has allowed TIM to strengthen and expand the services offered in that region, particularly in the states of Pará, Amapá and the city of Manaus, the capital of the state of Amazonas and a very important industrial zone.

The greatest benefits of the use of the optical fiber technology are the higher network stability and assurance, greater voice and data traffic capacity and the higher transmission rates that the Brazil Business Unit can now provide to its customers, all of which are essential features to support the increasing telecommunication services demands in the region. In addition to these perspectives, the Brazil Business Unit contributes to reduce social disparities, offering the same technology to its customers, as well as content residing locally in its data centers, making no difference to the technical architecture built in a big metropolitan centers.

The Brazil Business Unit has started discussions to apply the EILD reference rates based on cost model to the existing agreements it has with operators with significant market power in the EILD market. As part of the strategy of reducing operating expenses and as consequence of the expansion of its optic network infrastructure the Brazil Business Unit is gradually deactivating leased lines such as EILD. The agreements for network sharing between the national operators is also a key factor to the reducing of leased lines. The number of leased circuits has considerably decreased along the last year. New lines are hired only in the cases where leasing is demonstrated to be the most cost effective solution.

Migration of the Mobile Networks with Analog Technology

In February 2011, Anatel approved Resolution No. 562/11, which modified a provision of the regulation on conditions of use of RF, determining that, after a period of 360 days from the publication, the use of analog technology in RF sub bands of 800 MHz would no longer be allowed.

In relation to the use of such RF, the Brazil Business Unit no longer has subscribers of analog technology. However, the Brazil Business Unit's analog networks were still used by STFC concessionaires to provide services to subscribers in rural areas of the country, through a service called RuralCel.

In December 2016, Anatel approved Resolution No. 672/16, which prohibited the use of analog technology in the radio frequency sub bands of 800 MHz, 900 MHz, 1,800 MHz, 1,900 MHz and 2,100 MHz. The Brazil Business Unit

shut down its RuralCel service in 2017, and consequently turned off the related radio base stations, as attested to by Oi and recognized by Anatel in Decision-making No. 6/2017.

Quality Management Regulation

In October 2011, Anatel published PCS and multimedia communication service ("**SCM**") quality management regulations to establish quality parameters which were to have been met by the mobile telephone and internet connection operators in up to 12 months. Most quality parameters established relating to the quality of the networks, both mobile and fixed, became effective in October and November 2012.

In response to the need to better quantify the financial impacts, Oi submitted a request for cancellation together with a request for review to Anatel for the presentation of technical surveys of the economic impacts of the new regulations. The aforementioned request was submitted to public hearing by Anatel, which resulted in a series of divergent opinions regarding the quality measures by the different operations that are being analysed by Anatel.

With regard to STFC, in December 2012, Anatel approved the Quality Management Regulation for STFC service providers, which aims to create a new quality management model available, such as the Quality for PCS and SCM.

In February 2013, Anatel published the STFC quality management regulations to establish quality parameters that must be met by fixed-line operators within 120 days. All established parameters took effective in June 2013.

In December 2019, Anatel approved the new RQUAL based on a reactive regulation. In this new model, quality is measured on the basis of three main indicators – a Service Quality Index, a Perceived Quality Index and a User Complaints Index – and operators are classified into five categories (A to E). Based on this regulation, Anatel will be able to take measures according to specific cases, such as consumer compensation, the adoption of an action plan or the adoption of precautionary measures to ensure quality standard improvements.

At the end of November 2021, after a joint work by Anatel, operators and the Quality Assurance Support Authority to define the objectives, criteria and reference values of indicators, Anatel's board of directors formalized the reference documents that anchor this regulation (the Operational Manual and the Reference Values) and stipulated the entry into force on March 1, 2022. Anatel will also disclose the official indexes, and the quality label (intended to increase competition for quality) in 2023, considering the results of the new indicators monitored in the second half of 2022. Meanwhile, adjustments to the criteria and reference values can be made by Anatel.

After a joint effort by Anatel, operators, and the Quality Assurance Support Authority (ESAQ) to define the objectives, criteria, and reference values of the indicators, at the end of November 2021, Anatel's ***b***oard of ***d***irectors formalized the reference documents that support this regulation: the Operational Manual and the Reference Values; and established the operational entry into force on March 1, 2022. Currently, the results of the quality indicators are already being disclosed monthly by the Agency on its website, specifically in relation to the Quality Seal (which stimulates competition in quality). In November 2023, the Agency determined the temporary and partial suspension of the Reference Values Document and the quality seals for the years 2022 and 2023 and granted a period of 120 days for the presentation of new proposals for methods and parameters for the definition of quality seals**.**

Fraud Detection and Prevention

"*Subscription fraud*," which consists of using identification documents or personal data information of another individual to obtain mobile services, is the main fraud relating to mobile, fixed and long distance service. The Brazil Business Unit is focused on implementing prevention measures in its points of sales to avoid such subscription fraud, such as: (i) digital authentication for its sales front-end system; (ii) a strong training program; (iii) maintenance of a list of offenders to prevent fraud; (iv) analysis of the documentation presented; and (v) monitoring and identification of point of sale. The Brazil Business Unit also works to detect and prevent fraud by frequently improving and updating its traffic behavior monitoring and subscriber data.

The Brazil Business Unit's security operations management develops programs and strategies to mitigate risks through macro business processes such as:

- *Network:* Actions aimed to combat theft, robbery or damage of equipment and network infrastructure by the application of physical and electronic protections, such as equipment tracking, installation of protective security equipment, virtual and physical surveillance and intelligence analysis.

- *Investigations of Specific Incidents:* These anti-fraud efforts are focused on the reduction of illicit activities. The program consolidates and analyses all the facts related to known incidents in order to identify circumstances in which the Brazil Business Unit's services may be being used to perpetuate noncompliance with laws, codes and other policies such as extortion, pedophilia, aggression, theft, drug trafficking and harassment.

- *Personal Security:* These efforts focus on the combined use of organizational, technical and human resources aimed at preserving the physical, intellectual and emotional integrity of the human resources of the group, ensuring compliance with the precepts pointed out in the security operations mission and focused on the foreign public on a visit to Brazil.

- *Commercial Security:* These efforts seek to mitigate the losses resulting from theft and robbery of smartphones, among them the deployment of safes in the stores for the storage of high value devices in all stores, prioritizing street-front stores.

- *Security in Logistics:* These efforts are directed to combat loss due to theft or theft of merchandise whether in transportation or storage.

Taxes on Telecommunications Goods and Services

The telecommunications goods and services offered are subject to a variety of federal, state and local taxes (in addition to taxes on income), the most significant of which are ICMS, ISS, COFINS, PIS, FUST, FUNTTEL, FISTEL, CONDECINE and Corporate Income Tax and Social Contribution on Net Income, which are described below.

ICMS: The principal tax applicable to goods and telecommunication services is a state value-added tax (*Imposto sobre Operações Relativas à Circulação de Mercadorias e sobre Prestações de Serviços de Transporte Interestadual, Intermunicipal e de Comunicação*) ("**ICMS**"), which the Brazilian states levy at varying rates on certain revenues arising out of the sale of goods and services, including certain telecommunications services. Currently, the ICMS tax rate for domestic telecommunications services is levied at rates between 17% and 29%. The ICMS tax rate levied on the sale of mobile handsets and other products such as modem and SIM cards averages between 17% and 22%. With respect to the sale of mobile handsets, among other goods, ICMS may be charged in a different tax regime, under which another taxpayer in the distribution chain of the goods (such as, for example, the manufacturer of the goods) is required to anticipate and pay ICMS amounts that would otherwise be due in other steps of the distribution chain. There is also an exception for certain handsets whose manufacturers are granted certain local tax benefits, thereby reducing the rate to as low as 7%.

ISS: ISS is a municipality tax with rates varying from 2% to 5%. Since January 2018, the tax incidence over certain (but not all) Value-Added Services has increased with the inclusion of those receivables within the ISS basis of calculation due to Law No. 157/2016.

COFINS: COFINS is a social contribution levied on gross revenues. Since 2000, companies began to pay COFINS tax on their bills at a rate of 3%. In December 2003, through Law No. 10,833, COFINS legislation was further amended, becoming a non-cumulative tax, raising the rate to 7.6% for most transactions. However, telecommunications services revenues, among others, continued subject to a cumulative basis at a rate of 3%. In 2015, Decree No. 8,426 came into effect, which restored COFINS on financial revenues at a rate of 4%, except for some types of financial revenues (for example, revenues from foreign exchange variations of exportation of goods and services, revenues resulting from foreign exchange fluctuations of obligations undertaken by the company, including loans and financing and revenues related to hedging transactions on stock exchange values, and revenues from commodities and futures exchanges or over-the-counter transactions and related to the Brazil Business Unit's operational activities). In December 2022, Decree No. 11,322/22 reduced by half the PIS and Cofins rates levied on financial income earned by companies subject to the non-cumulative regime. The COFINS rates changed from 4% to 2%. According to the Decree, the reduction would take effect from January 1, 2023. However, on January 2, 2023, it

was revoked by the newly elected Government, re-establishing the PIS and Cofins rates levied on financial income to its original values.

PIS: PIS is another social contribution levied at the rate of 0.65%, on gross revenues from telecommunications service activities. In 2002, Law No. 10,637 was enacted, making such contribution non-cumulative and increasing the rate to 1.65% on gross revenues, except in relation to telecommunications services, for which the method continued on a cumulative basis at a rate of 0.65%.

In 2015, Decree No. 8,426 came into effect, which restored PIS on financial revenues at a rate of 0.65%, except for some types of financial revenues (for example, revenues from foreign exchange variations of exportation of goods and services, revenues resulting from foreign exchange fluctuations of obligations undertaken by the company, including loans and financing and revenues related to hedging transactions on stock exchange values, and revenues from commodities and futures exchanges or over-the-counter transactions and related to the Brazil Business Unit's operational activities). As noted above, in December 2022, Decree No. 11,322/22 reduced by half the PIS and Cofins rates levied on financial income earned by companies subject to the non-cumulative regime. The PIS rates changed from 0.65% to 0.33%. According to the Decree, the reduction would take effect from January 1, 2023. However, on January 2, 2023, it was revoked by the new Government, re-establishing the PIS and Cofins rates levied on financial income to its original values.

FUST: In 2000, the Brazilian government created the *Fundo de Universalização dos Serviços de Telecomunicações,* a fund that is supported by a tax applicable to all telecommunications services. The purpose of the FUST is to stimulate the expansion, use and improvement of the quality of telecommunications networks and services, to reduce regional inequalities and to stimulate the use and development of new connectivity technologies in order to promote economic and social development. FUST tax is imposed at a 1% rate, levied on gross operating revenues, net of discounts, ICMS, PIS and COFINS, and the cost may not be passed on to clients. Telecommunication companies can draw from the FUST to meet the universal service targets required by Anatel.

In 2005, Anatel enacted Ordinance No. 7/05 requiring that FUST should be paid on revenues arising from interconnection charges since its effectiveness. A notice was issued deciding that companies part of the Brazil Business Unit must adjust values on the FUST calculation basis in order to include interconnection revenues received from other telecommunications companies. A writ of mandamus was filed against Anatel to avoid the terms of Ordinance No. 7/05. The first level decision was issued in the favor of companies part of the Brazil Business Unit's favor. Such decision was challenged by Anatel and the appeal confirmed the first level decision. Anatel appealed to High Courts in order to reverse the appeal.

In December 2020, Law No. 14,109 was approved with the purpose of stimulating the use of FUST to expand and improve the quality of telecommunications services, reducing regional inequalities and stimulating the use of new technologies to promote economic and social development. In the case of using FUST's resources, the law requires the connection of all public schools by 2024 with broadband internet access. The law also provided a 50% reduction in the payment of the mandatory annual contribution of telecommunications operators to the Fund when they execute programs, projects, plans, activities, initiatives, and actions approved by the Fund's Management Council through the use of their own resources. This requirement remains in force until December 2016, but it may be further renewed.

In the first quarter of 2022, the Federal Government signed Decree 11,004/2022, which regulates the use of FUST and establishes directions for the use of resources by the Management Board, established in 2022.

FUNTTEL: In 2000, the Brazilian government created the *Fundo para Desenvolvimento Tecnológico das Telecomunicações* ("**FUNTTEL**"), a fund that is supported by, among other sources of income, a contribution tax applicable to all telecommunications companies. FUNTTEL is a fund managed by BNDES and FINEP, government research and development agencies. The purpose of FUNTTEL is to promote the development of telecommunications technology in Brazil and to improve competition in the industry by financing research and development in the area of telecommunications technology. FUNTTEL tax is imposed at a rate of 0.5% on gross operating revenues, net of discount, ICMS, PIS and COFINS, and it cost may not be passed on to clients.

FISTEL: Fundo de Fiscalização das Telecomunicações ("**FISTEL**"), is a fund supported by among other sources a tax applicable to telecommunications services, which was established in 1966 to provide financial resources to the

Brazilian government for its regulation and inspection of the sector. Such tax consists of: (1) an installation inspection fee assessed on telecommunications stations upon the issuance of their authorization certificates, as well as every time a new mobile number is activated, and (2) an annual operations inspection fee that is based on the number of authorized stations in operation, as well as the total basis of mobile numbers at the end of the previous calendar year. The amount of the installation inspection fee is a fixed value, depending on the kind of equipment installed in the authorized telecommunication station.

Effective in 2001, the installation and inspection fee is assessed based on net activations of mobile numbers (that is, the number of new mobile activations reduced by the number of cancelled subscriptions), as well as based on the net additions of radio base stations. The operations inspection fee equals 33% of the total amount of installation inspection fees that would have been paid with respect to existing equipment. The public funds raised from this installation fee are appropriated to either the Brazilian Communication Company ("**EBC**"), or the Brazilian National Cinema Agency (*Agência Nacional do Cinema*) ("**ANCINE**"), in order to benefit Brazilian cinema industry. Also, Anatel charges the installation inspection fee when there is an extension of the term of validity of the right to use radio frequencies associated with the operation of the personal mobile service. The Brazil Business Unit understands that such collection is unjustified and is challenging this rate in court.

In December 2020, Law No. 14,108 was sanctioned and exempts FISTEL for 5 (five) years from the base stations and equipment that integrate the machine to machine ("**M2M**") ecosystems and, also, extinguishes the prior licensing. The definition and regulation of M2M communication systems shall be established by Anatel. The Brazilian government also laid out in the budget law for 2021 a tax exemption forecast of FISTEL value. Additionally, in June 2021, Law No. 14,173 was approved, lowering the FISTEL fees on VSATs from BRL 201.12 to BRL 26.83.

Corporate Income Tax and Social Contribution on Net Income: Income tax expense is a combination of two different types of taxes, the corporate income tax, or IRPJ, and the social contribution tax on net income, or CSLL. The corporate income tax is payable at the rate of 15% plus an additional rate of 10% (levied on the part of taxable profits that exceed BRL 0.02 million per month or BRL 0.24 million per year). The social contribution tax is currently assessed at a rate of 9% of adjusted net income.

The rules for deductibility of goodwill were maintained for transactions which occurred prior to the end of 2017. The tax treatment by TIM Celular (now TIM S.A.) of the goodwill arising from the purchase of the companies AES Atimus SP and RJ was not impacted by the new rules.

Regarding dividends, Law No. 12,973 ensured the full and unconditional exemption on payment or credit of profits or dividends earned between 2008 and 2013, previously paid or not. Uncertainty remained, however, in relation to exemption on profits and dividends generated in the calendar year 2014, if higher than the taxable income in the same period in the case of companies that do not opt for early adoption of the new post-RTT tax regime that year. According to the Federal tax authorities the exception is not applicable to the excess amount, or in other words, to the profits and dividends paid in excess of the taxable income.

Dividends are not subject to withholding income tax when paid. However, as the payment of dividends is not tax deductible for the company that is distributing them, there is an alternative regime for stockholder compensation called "interest on equity," which allows companies to deduct any interest paid to stockholders from net profits for tax purposes.

These distributions may be paid in cash. The interest is calculated in accordance with daily pro rata variation of the Brazilian government's long-term interest rate ("**TJLP**"), as determined by the Central Bank from time to time, and cannot exceed the greater of: (1) 50% of the net income (before taxes and already considering the deduction of the own interest amount attributable to stockholders) related to the period in respect of which the payment is made; or (2) 50% of the sum retained profits and profits reserves as of the date of the beginning of the period in respect of which the payment is made.

Any payment of interest to stockholders is subject to withholding income tax at the rate of 15% (or 12.5% for some jurisdictions, as provided in certain Double Taxation Treaties), or 25% in the case of a stockholder domiciled in a low or nil tax jurisdiction. These payments may be qualified, at their net value, as part of any mandatory dividend. As described herein, TIM Brasil Serviços e Participações S.A. and its subsidiaries paid interest on equity in 2021.

Tax losses carried forward are available for offset during any year up to 30.0% of annual taxable income. No time limit is currently imposed on the application of net operating losses on a given tax year to offset future taxable income within the same tax year, nevertheless there is no monetary restatement.

Companies are taxed based on their worldwide income rather than on income produced solely in Brazil. As a result, profits, capital gains and other income obtained abroad by Brazilian entities are added to their net profits for tax purposes. Therefore, profits, capital gains and other income obtained by foreign branches or income obtained from subsidiaries or foreign corporations controlled by a Brazilian entity are computed in the calculation of an entity's profits, in proportion to its participation in such foreign companies' capital.

In the end of 2017, the *Receita Federal* ("**RFB**") issued Normative Instruction No. 1,771/2017 in order to determine the tax treatment due to the accounting CPC 47 – Customer Contract Revenue, which tax treatment went into effect in 2018.

Income tax and social contribution were regulated by Decree 580/2018 and Normative Instruction RFB No. 1,700/2017 in addition to other federal laws and decrees. In December 2018, this decree was revoked and replaced by Decree No. 9,580, which consolidates the main provisions related to income tax and social contribution. As of the date hereof, no relevant impacts to the Company were identified regarding such changes.

Anatel Administrative Proceedings

Under the terms of its PCS authorization, TIM Celular (now TIM S.A.) implemented mobile personal telecommunications coverage for the assigned area. Under such term of authorization, TIM Celular (now TIM S.A.) is required to operate in accordance with the quality standards established by Anatel. If it fails to meet the minimum quality standards required, TIM Celular (now TIM S.A.) is subject to Obligation Non-Compliance Determination Procedures, or PADO, and applicable penalties. Anatel has brought administrative proceedings against the TIM Group, which are currently pending for (1) noncompliance with certain quality service indicators (the quality management regulation, or RGQ, and/or RQUAL); and (2) default of certain other obligations assumed under the Terms of Authorization and pertinent regulations. In its defense before Anatel, the TIM Group attributed the lack of compliance to items beyond its control and not related to its activities and actions. The Brazil Business Unit cannot predict the outcome of these proceedings at this time, but have accrued the amount in its balance sheet as a provision for all those cases in which the Brazil Business Unit estimates its loss to be probable.

NETCO REGULATION

NetCo's operations are subject to EU and Italian electronic communications regulations, general competition law and a variety of other regulations, including privacy and security-related regulations. This section summarizes the key areas of such regulatory frameworks and considers the effect and implications of the Transactions.

The EU Electronic Communications Regulatory Framework

Overview

The EU electronic communications regulatory framework is the basis for the national electronic communications laws in all Member States in the EU ("**Member States**"), including Italy where NetCo operates. The Member States are required to transpose directives issued by the EU Council and Parliament into national legislation, while the regulations issued by the same EU institutions are binding for any Member State without the need for their transposition into national law. Additionally, EU recommendations suggest certain actions and good practices although they do not have any binding effect on the operators active in the different Member States. The EU electronic communications regulatory framework contains provisions on the execution of sectoral activities of national telecommunications providers and sets out general rules applicable to all providers of electronic communication networks and services, as well as specific regulatory obligations that may be imposed by the national regulatory authorities ("**NRAs**"). In all Member States NRAs are independent bodies that are tasked with regulating and supervising the electronic communications sector and ensuring compliance with the EU electronic communications regulatory framework in each Member State.

Directive (EU) 2018/1972 establishing the European Electronic Communication Code ("**EECC**") entered into force on December 20, 2018, and is applicable to TIM Group's operations since its implementation through Italian Legislative Decree of November 8, 2021, No. 207. Article 125 of the EECC expands the scope of the objectives and regulatory tools of the repealed EU Directives issued in 2002 and amended in 2009 (the so-called "**Telecom Package**"). The EECC includes a comprehensive set of measures related to: (i) wholesale-only operators and innovative regulatory models applicable for investments in VHCN, (ii) new rules on spectrum, such as minimum licence duration to improve investment return, (iii) regulation of services, including the introduction of an improved level playing field between telecom operators and new operators of communications ecosystems such as Over-the-Top ("**OTT**"), and (iv) a revised scope of Universal Service Obligation ("**USO**") for the benefit of users with low income or special social needs with a view to pursue adequate broadband internet access service as well as voice communications services at a fixed location.

The regulatory framework is also supplemented by EU Directive 2014/61/EU ("**Broadband Cost Reduction Directive**") that aims to facilitate and promote the roll-out of high-speed electronic communications networks (ECN) (i.e. fast broadband internet with speeds above 30 Mbps) in the EU. This objective is pursued by promoting the reuse of existing physical infrastructure, creating the conditions for coordinating civil works and more efficiently installing new physical infrastructure, equipping newly constructed and majorly renovated buildings with physical infrastructure; and streamlining the procedures for granting permits for civil works. Under the Broadband Cost Reduction Directive Member States must ensure that network operators (telecoms, as well as energy, transport and water) give telecoms operators access to their physical infrastructure and network operators are required to give access to their physical infrastructure, on reasonable terms and conditions, including price.

On February 23, 2023, the European Commission put forward a legislative proposal for a new Regulation (the "**Gigabit Infrastructure Act**") on measures to reduce the cost of deploying gigabit electronic communications networks and repealing the Broadband Cost Reduction Directive, with the aim of setting new rules to enable faster, cheaper and more effective rollout of Gigabit networks, including 5G across the EU. On February 6, 2024, the Council and the EU Parliament reached a provisional agreement on the proposed text.

Regulation (EU) 2018/1971 of the European Parliament and the Council entered into force on December 20, 2018 and it has repealed Regulation (EC) 1211/2009 and amended Regulation (EU) 2015/2120 ("**BEREC Regulation**"). The BEREC Regulation established the Body of European Regulators for Electronic Communications ("**BEREC**") and the Agency for Support for BEREC (the "**BEREC Office**"). BEREC acts as a forum for cooperation among each Member State's NRA and between the NRAs and the European Commission.

The European Commission's Recommendation EU 2020/2245 of December 18, 2020 on relevant product and service markets susceptible to *ex ante* regulation, identifies those products and service markets in which *ex ante* regulation may be justified. In alignment with the objectives of the EU electronic communications regulatory framework to progressively reduce *ex ante* sector-specific rules as competition in the markets develops and, ultimately, to ensure that electronic communications markets are governed only by competition laws, the number of relevant markets in which imposition of *ex ante* regulation may be justified has been significantly reduced since the first Commission's Recommendation issued in 2003. By applying the three criteria test from Articles 67(1)(a), (b) and (c) of the EECC, the European Commission has identified (i) the wholesale local access provided at a fixed location market and (ii) the wholesale dedicated capacity market, as the product and service markets in which *ex ante* regulation may still be justified.

In September 2016, through its Connectivity for a Competitive–Digital Single Market - Towards a European Gigabit Society Communication (COM/2016/587 final, the "**Gigabit Society Communication**"), the European Commission has set out a vision for connectivity in the EU over the following decade that includes growth of the high capacity networks, and has established specific strategic objectives to be achieved by 2025. Such objectives include, among others:

- gigabit connectivity for all main socio-economic drivers such as schools, transport hubs and main providers of public services as well as digitally intensive enterprises; and

- access to internet connectivity offering a downlink with a speed of at least 100 Mbps, upgradable to gigabit speed for all European rural and urban households.

Additionally, in order to achieve a successful digital transformation of Europe by 2030, the European Commission has adopted the 2030 Digital Compass: the European way for the Digital Decade (COM/2021/118 final) ("**Digital Compass**") setting forth the initiative for a creation of a set of digital principles and a legislative proposal that would include a governance framework to monitor the progress of the envisioned digital transformation. The Digital Compass includes the following aims:

- *Skills*: securing that at least 80% of all adults possess basic digital skills and that there are 20 million ICT specialists hired in the EU, with predominantly women taking up such jobs;

- *Infrastructure*: putting in place a secure, functional and sustainable digital infrastructures that would include (i) gigabit connectivity for all EU households and 5G coverage for all populated areas, (ii) cutting-edge and sustainable semiconductors (including processors) with at least 20% of the world's production originating from Europe, (iii) a 10,000 climate-neutral highly secure edge nodes and (iv) the development of the first quantum computer in Europe by 2025;

- *Business*: (i) having three out of four companies using cloud computing services, big data and artificial intelligence, (ii) having more than 90% small and medium size businesses reaching at least a basic level of digital intensity, and (iii) doubling the number of EU unicorns; and

- *Government*: digitalization of public services that would ensure an online availability of all key public services and e-medical records accessible to all citizens, with 80% of citizens using a digital ID solution.

The related Decision (EU) 2022/2481 establishing the Digital Decade Policy Programme (the "**Policy Programme**") was published in OJEU on December 19, 2022. The Policy Programme introduces a novel form of governance based on cooperation between the Member States and the European Commission to ensure that Member States pool their resources and ultimately jointly achieve the envisioned EU digital transformation.

Commission implementing Decision (EU) 2023/1353 of June 30, 2023 sets out key performance indicators to measure the progress towards the digital targets. On September 27, 2023, the Commission adopted the Communication C(2023) 7500 final establishing Union-level projected trajectories for the digital targets and published the first report on the State of the Digital Decade.

On December 12, 2022, the European Commission adopted the revised Communication on State aid for broadband networks (the "**Broadband State Aid Guidelines**"), used by the European Commission primarily when it assesses the allocation of state aid for the deployment of fixed and mobile broadband networks and the take-up of available broadband services to support the digital transition, also ensuring its minimal impact on competition.

On February 23, 2023, the European Commission presented a set of actions aimed to make Gigabit connectivity available to all citizens and businesses across the EU by 2030, in line with the objectives of Europe's Digital Decade, and to enable the transformation of the connectivity sector in the EU. Beyond the aforementioned proposal for a Gigabit Infrastructure Act, this so called "connectivity package" includes:

- A Recommendation, addressed to the Member States' NRAs, on the regulatory promotion of Gigabit connectivity (European Commission Recommendation C(2024) 523, the "**Gigabit Recommendation**") was adopted on February 6, 2024, providing guidance to NRAs on how to design access obligations on operators designated as having SMP on the market for wholesale local access provided at a fixed location and promoting their consistent and effective implementation with regard to legacy networks and VHCNs. In particular, the Gigabit Recommendation further details the conditions under which the national regulatory authority should, according to the EECC, not impose or maintain regulated wholesale access prices on VHCN wholesale inputs. The Recommendation also indicates how National Regulation Authorities can smoothly conduct the migration from copper to fibre. It replaces the Commission Recommendation 2010/572/EU of September 20, 2010 on regulated access to Next Generation Access Networks (NGA) and the Commission Recommendation 2013/466/EU of September 11, 2013 on consistent non-discrimination obligations and costing methodologies to promote competition and enhance the broadband investment environment.

- An exploratory consultation on the future of the connectivity sector and its infrastructure, to gather views on how increasing demands for connectivity and technological advances may affect the future developments and needs, including on the potential need for all players benefitting from the digital transformation to fairly contribute to the investments in connectivity infrastructure. Based on the outcome of the consultation, on February 21, 2024, the European Commission presented a set of possible actions to foster the innovation, security and resilience of digital infrastructures and opened a public consultation, until June 30, 2024, aimed at achieving a consensus on:

    - The White Paper on "How to master Europe's digital infrastructure need?" that analyzes the challenges Europe currently faces in the rollout of future connectivity networks, and presents possible scenarios to attract investments, foster innovation, increase security, and achieve a true Digital Single Market.

    - The Recommendation on the security and resilience of submarine cable infrastructures, that presents a set of actions at national and EU level aimed at improving submarine cable security and resilience, through a better coordination across the EU, both in terms of governance and funding.

Some of the key areas of the EU telecommunication regulatory framework which apply to the NetCo's operations upon successful completion of the Transactions are discussed in more detail below.

Net Neutrality

Net neutrality is a principle providing that there should be no restriction on an individual's access to the networks making up the infrastructure of the internet and that any discrimination, restriction, or interference between the types and sources of data conveyed across such networks should be eliminated, irrespective of the sender and receiver, the content accessed or distributed, and the applications or services used or provided. Regulation (EU) 2015/2120 laying down measures concerning open internet access (the "**TSM Regulation**") provides new rules on net neutrality. In particular, TSM Regulation:

- establishes end-users' access rights to distribute information and content, use and provide applications and services and use terminal equipment of their choice, also forbidding internet service providers from blocking or slowing down specific content and applications or services, except in a very limited set of circumstances;

- allows the implementation by providers of internet access services of reasonable, transparent, non-discriminatory and proportionate traffic management measures aimed at improving quality of the network based on objectively different technical quality of service requirements for specific categories of traffic; such measures shall not be based on commercial considerations but on objectively different technical quality of service requirements of specific categories of traffic and shall not monitor the specific content and shall not be maintained for longer than necessary;

- allows operators to offer services, excluding internet access services, optimized for specific content, applications or services subject to the network capacity and unobstructed availability and quality of internet access services for end-users;

- allows end users to agree with providers of internet access services on tariffs for specific data volumes and speeds of the internet access services. Such commercial practices should not limit the exercise of end users' rights and are subject to monitoring by the NRAs. Additionally, contrary to BEREC's and NRA's previous indications, the European Court of Justice rulings in September 2021 established that zero rating infringes the Net Neutrality rules and is not allowed.

  Zero-rating (also called toll-free data or sponsored data) is the practice of mobile network operators ("**MNOs**"), MVNOs, and internet service providers not to charge end customers for data used by specific applications or internet services through their network, in limited or metered data plans. It allows customers to use provider-selected content sources or data services like an app store, without worrying about bill shocks, which could otherwise occur if the same data were normally charged according to their data plans and volume caps. This has especially become an option to market 4G networks but has also been used in the past for SMS or other content services.

- places further transparency obligations for ensuring open internet access on providers of internet access services in addition to those already included in the electronic communications regulatory framework.

Privacy and Data Protection

GDPR has been directly applicable in all EU Member States since May 25, 2018. The purpose of GDPR is to provide for the protection of the individual's right to privacy with respect to the processing of personal data, while allowing a certain degree of flexibility for service providers to process such personal data. As such, GDPR significantly changes the EU and EEA data protection landscape, including strengthening of individuals' rights, stricter requirements on companies processing personal data and stricter sanctions with substantial administrative fines for breaching GDPR of up to 4% of an annual turnover. NetCo has put in place a specific project to carry out all the activities needed to ensure its compliance with the rules introduced by GDPR.

Additionally, NetCo's operations are subject to the complimentary sectorial rules under Directive 2002/58/EC (the "**e-Privacy Directive**") implemented into Italian law on June 30, 2003, which imposes additional limitations on the data processing by the electronic communications services operators. Currently, this directive is under review by the European Commission and the regulatory proposal foresees fines for non-compliance with the rules thereunder that are equal to those for breaches of GDPR. For further information, please see "*Risk Factors— Risks Related to NetCo's Legislative and Legal Framework— NetCo's activities could be materially negatively affected by failure to comply with GDPR and Italian Privacy Code.*"

Security

The new Directive 2022/2555 on Network and Information Systems ("**NIS2**"), which replaces the current Directive 2016/1148 (NIS) entered into force on January 16, 2023 and must be transposed into national legislation by October 17, 2024 and will be applicable from October 18, 2024.

NIS2 envisages the extension of the scope of application of the rules on the security of networks and information systems, including on the one hand sectors currently covered by other regulations, which are simultaneously repealed (i.e. the security measures of networks and services of electronic communications, currently included in the EECC) and on the other hand extending the rules to new subjects (e.g., data centers, CDNs, etc.).

While NIS2 confirms the obligation to adopt security measures that are proportionate to the risk, it introduces a series of minimum requirements, including with regard to supply chain security management, and it revises the mandatory notification procedure for cyber incidents.

The penalties for non-compliance can be up to 2% of the turnover.

Data Act

Following publication in the Official Journal on December 22, 2023, the Data Act, a European Regulation that introduces harmonized rules on fair access to data and its use, entered into force on January 11, 2024 and will be directly applicable starting from September 12, 2025.

The Data Act covers several areas, among which:

- Business to Business. The aim is to ensure fairness in the allocation of the value of data generated by connected devices among actors in the data economy. The Data Act provides for a shared right in the use of data between the manufacturer and the user of connected devices, allowing the latter to access – without undue delay and free of charge – the data generated by the device and to share such data with third parties to provide after-sales services or other innovative services based on them.

  However, the Data Act provides that the circulation of data between companies may require the payment of a reasonable and non-discriminatory price, which includes the cost of making it available and the investments made for the collection and production of such data.

  The Data Act also recognizes that some data may represent trade secrets, the circulation of which would harm companies' interests and proprietary rights. The text of the Regulation has therefore introduced a series of provisions aimed at protecting such information.

- Business to Government. The Regulation also aims at enabling the access by public sector bodies to data held by the private sector in emergency situations, such as health emergencies or serious natural disasters, and in other exceptional cases, where it is not possible to find the data on the market and the lack of such data prevents the public entity from carrying out a specific task of public interest provided for by law. Data sharing in emergency situations must be carried out free of charge, while in the remaining exceptional cases private entities will be entitled to reasonable compensation.

The Italian Regulatory Framework

Overview

The electronic communications regulatory framework applicable to NetCo's operations in Italy, is based primarily on the Electronic Communications Code, i.e. Legislative Decree No. 259/2003, as amended by Legislative Decree No. 207 ("**ECC**") that entered into force on December 24, 2021. By implementing this latest amendment, Italy has transposed the EECC into Italian national law.

Another law affecting NetCo's business, related to consumer, data and security protection and specific aspects of the communication sector is the Decree Law No. 76/2020, converted by Law No. 120/2020, and Decree Law No. 77/2021, converted by Law no. 108/2021 (also known as "*Decreti Semplificazioni*"). Especially the latter piece of law contains important simplification measures to speed up the completion of both 5G and the ultrabroadband fiber optic networks in Italy. Furthermore, Decree-Law No. 36/2022 (also known as NRRP 2 Decree), converted by Law No. 29 of June 2022, which introduces measures in the ECC, namely simplified authorization measures for mobile network development, and Decree-Law no. 13/2023 (also known as NRRP 3 Decree) converted by Law No. 41/2023, which introduces other important simplification measures in the authorization process, with the aim of fostering the development of fixed and mobile ultrabroadband.

The telecommunications sector in Italy is primarily supervised by AGCOM, Italy's NRA for the communications sector. The key duties of AGCOM consist of ensuring fair market competition and protecting fundamental rights of

all users of electronic communication networks and services and, more generally, all citizens, also extending to different functions related to the communications sector. Additional powers related to the electronic communications sector were granted to AGCOM by the Italian Decree Law No. 119/2018 dated December 18, 2018, that also amended the ECC with a view to foster investment in ultra broadband networks. Such AGCOM's powers include defining adequate measures of investment remuneration to incentivize the merger of different access networks placed under the control of a non-vertically integrated subject offering only wholesale network services. Governmental responsibility for electronic communication networks and services in Italy lies with the Ministry of the Enterprises and Made in Italy, having a principal responsibility related to the national broadband plan, spectrum and numbering management as well as integrity and security of the networks.

On May 12, 2023, the Ministry of Enterprises and Made in Italy launched a public consultation on the draft Legislative Decree amending the Electronic Communications Code. The consultation was primarily aimed at providers of electronic communications networks and services. Its purpose was to gather market input and comments on the implementation of the new sector legislation one year after the entry into force of the ECC, in line with the objectives of Directive (EU) 2018/1972 set out in the Digital Single Market Strategy for Europe. The consultation was closed on June 15, 2023.

Following the market consultation, the Council of Ministers approved a Legislative Decree on December 18, 2023, as part of a preliminary examination, which provides for corrections to Legislative Decree No. 207 of November 8, 2021. The text, which was sent to Parliament on December 22, 2023 for the necessary opinion, and which will be returned to the Council of Ministers for final approval, updates the current provisions, adapting them to technological developments in the field of electronic communication services (5G connection) with particular regard to the innovation and implementation of digital infrastructures (repeaters for 5G connections; fiber optic cables) supported by the NRRP. In addition, the revision makes corrections to procedural provisions in order to simplify and shorten bureaucratic procedures.

Market Analysis

The Italian regulatory framework requires AGCOM, in its role as Italian NRA, to carry out periodic market analyses according to the specific EU guidelines before imposing any obligations on any individual operator with an SMP. Such market analysis sets the rules for a period of up to five years. In such context, AGCOM may impose *ex ante* obligations on an operator with SMP when a specific market is found to have three characteristics: (i) high and non-transitory structural, legal or regulatory barriers to entry; (ii) a market structure which does not tend towards effective competition within the relevant time horizon, having regard to the state of infrastructure-based competition and other sources of competition behind the barriers to entry; and (iii) competition law alone is insufficient to adequately address the identified market failures.

In both cases, pursuant to Article 79 of the ECC, AGCOM must impose, based on proportionality principle, one or more of the following obligations on an operator with SMP:

(a) the obligation to make public specific information, such as those relating to accounting, prices, technical specifications, network characteristics, or terms and conditions (*transparency obligation*);

(b) the obligation to ensure equivalent conditions in equivalent circumstances to other providers of equivalent services, as well as same conditions and quality as provided for its own services (*non-discrimination obligation*). Such obligation may include the so-called replicability test (i.e. the obligation, for a vertically integrated operator, to set prices in the retail market that can be replicated by an efficient operator);

(c) the obligation to keep separate accounts in relation to specified activities related to interconnection or access (*accounting separation obligation*);

(d) the obligation to meet reasonable requests by competitors for access to civil engineering, as well as access to, and use of, specific network elements and associated facilities at fair terms (*access obligation*);

(e) the obligation to apply cost-oriented prices and cost accounting (*cost-orientation obligation*). The cost-oriented model currently used by AGCOM for wholesale access markets, upon recommendation of the

European Commission, is the bottom-up, long run, incremental, cost-plus methodology ("**BU-LRIC+**"). The BU-LRIC+ models the incremental capital (including sunk capital) and operating costs borne by a hypothetically efficient operator in providing all access services, and adds a mark-up for recovery of common costs. The full costs are calculated on a forward-looking basis (i.e. based on up-to-date technologies, maintenance, total accesses, etc.) that an efficient network operator would incur to build a modern network able to provide all required services. To determine the final price, the BU-LRIC+ methodology also considers the cost of capital invested, to allow an efficient rate of return on capital employed usually through the weighted average cost of capital ("**WACC**") and, if justified, the application of a risk premium.

Co-investment Offer in a VHC network

Article 76 of EECC provides for an innovative deregulation regime for very high-capacity fiber networks deployed by an operator with SMP in the context of a co-investment offer ("**CIO**"). In particular, if: (i) the commitments proposed by the operator with SMP through the CIO are deemed by AGCOM to meet certain competitive requirements by AGCOM set forth in Article 76 of the EECC; and (ii) at least one potential co-investor has joined the CIO, then AGCOM does not impose any of the obligations provided for by Article 79 of the EECC for operators with SMP.

On January 29, 2021, TIM notified AGCOM of a CIO pursuant to Articles 76 and 79 of the EECC related to the construction of a new fiber network. The CIO was subsequently amended and integrated by TIM in March, April, June, and December 2021, in accordance with the indications provided by AGCOM in its "*Preliminary Conclusions*" issued at the end of the market test that was commenced by AGCOM's Resolution 110/21/CONS. On May 16, 2022, AGCOM sent a draft of the notification related to the CIO to the European Commission (case IT-2022-2375). However, on June 7, 2022 AGCOM withdrew the notification following TIM's notification of an indexation mechanism to the price inflation related to the CIO, pointing to a recent, unforeseen, and significant increase in inflation. The indexation mechanism was subsequently amended by TIM in July, September, and October 2022 on the basis of indications provided by AGCOM. By its Resolution 385/22/CONS published on November 7, 2022, AGCOM launched a market test on the staggered mechanism of indexation of prices proposed by TIM to set the annual inflation rate to be applied to the prices of the CIO from 2023. The revised version of the CIO, as requested by AGCOM, also *provided* that the economic conditions for 2021 would be applicable to co-investors joining by April 2023. On February 9, 2023, the Authority communicated to TIM its preliminary conclusions requiring a revision of the price indexation model of the co-investment offer. On December 6, 2023, AGCOM invited TIM to submit such new offer, stating that further inactivity would be deemed by AGCOM as an express decision by TIM not to proceed with the CIO. Following a communication sent by TIM on December 15, 2023, in which TIM declared that AGCOM's requests on the indexation mechanism could not be met and that the CIO would therefore be removed from TIM's website, AGCOM published Resolution 339/23/CONS, declaring that TIM's CIO, in its latest version, was not approved.

Delayering of vertically integrated operators

Pursuant to Article 89 of the ECC, an operator with SMP must inform AGCOM at least 90 days ahead of any intended transfer of their network assets to a separate legal entity under different ownership, or the establishment of a separate business entity to provide all retail providers with fully equivalent access products (*separazione volontaria da parte di un'impresa verticalmente integrata*). In such event, AGCOM shall conduct a specific market analysis to assess the effect on the relevant markets and therefore impose, maintain, amend, or withdraw *ex ante* obligations.

In November 2020, AGCOM concluded the preliminary assessment of TIM's voluntary separation project for the creation of a newco, FiberCop, controlled by the TIM Group and owned through minority shareholdings also by KKR Infrastructure Fund and Fastweb, which, on March 31, 2021, acquired the secondary copper and fiber access network owned by the TIM Group and Flash Fiber (the joint venture entity created together with Fastweb back in 2016 and merged into FiberCop in the context of the abovementioned transaction completed on March 31, 32021).

With Resolution No 637/20/CONS, published in December 2020, AGCOM launched the public consultation on the voluntary separation project of the TIM Group's fixed access network, the outcome of which was published in October 2021 with Resolution No. 253/21/CONS. However, on July 7, 2022, the TIM Group communicated to AGCOM that the delayering plan envisaged as part of the Transactions would supersede the original voluntary separation project to which the public consultation referred.

On January 19, 2024, TIM notified AGCOM of its intention to proceed with a delayering project, consisting in the Transactions, pursuant to Article 89 of the ECC, aiming among other to obtain recognition by AGCOM of NetCo's status as a wholesale-only operator. See also "*Risk Factors—Risk related to the business activity and industries of NetCo—NetCo operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business*," and "*Risk Factors—Risks Related to the TIM Group's Business Activity and Industry—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective*."

Wholesale-only operators

Pursuant to Article 91 of the ECC, when an operator absent from any retail market for electronic communications services (also as a result of the delayering of a vertically integrated operator) is designated by AGCOM as having SMP in one or more wholesale markets, the "wholesale-only" regime applies to such operator in the event that AGCOM acknowledges the presence of two elements: (i) none of the companies or business units within the operator or controlled by the operator, nor any shareholder having control over the operator, have activities in any retail market for electronic communications services provided to end-users within the EU; and (ii) the operator is not bound to deal with a single and separate operator in the retail market for electronic communication services provided to end-users due to an exclusive/*de facto* exclusive agreement.

The wholesale-only regime provides that AGCOM, if justified in the context of the Market Analyses, may impose on the relevant wholesale-only operator with SMP the obligations relating to non-discrimination, accounting separation, and access, as well as the obligation to apply fair and reasonable pricing (excluding, in principle, cost-orientation obligations). In this regard, the successful overcoming of vertical integration and the potential acknowledgment by AGCOM, in the context of the Market Analyses, of NetCo's status as a wholesale-only operator are expected to lead to NetCo ceasing to be subject, among other things, to the applicability of cost-orientation obligations. See "*Risk Factors—Risk related to the business activity and industries of NetCo—NetCo operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business," and "Risk Factors—Risks Related to the TIM Group—Risks related to the TIM Group's Business Activity and Industry—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective*."

The following sections summarize the key areas of the Italian markets that have been scrutinized by AGCOM to assess competition conditions, along with the recent developments concerning the electronic communications market, as well as the main obligations imposed by AGCOM on the TIM Group with the latest Market Analyses.

Wholesale Fixed Access Markets

AGCOM's Resolution 348/19/CONS published on August 8, 2019 sets the obligations and economic conditions for wholesale access services for the period from 2018 to 2021. With reference to the most important geographic issues under the market analysis, AGCOM has taken the following major decisions:

- confirmation of TIM's status as an SMP operator in the wholesale local access provided at a fixed location market ("**Market 3a**"), and wholesale central access provided at a fixed location for mass-market products market ("**Market 3b**") in Italy with the exclusion of the city of Milan, where the *ex ante* regulation has been entirely withdrawn;
- confirmation, as a consequence, of the following obligations on TIM in both Market 3a and Market 3b:
    - the obligation to provide access to and use of certain of TIM's network elements (in particular, LLU and SLU wholesale local access to copper network, wholesale local access to fiber network, wholesale Bitstream access to ethernet, copper and fiber network,

multicast access, access to FWA network in decommissioning areas – if adopted by TIM to complete NGA coverage of MDF areas – and disaggregation of LLU, SLU and VULA FTTC provisioning and assurance activities);

- transparency obligations in relation to wholesale access services to copper and fiber network. In particular, obligation to: (i) publish an annual Reference Offer in relation to certain copper, fiber and FWA networks' services, to be approved by AGCOM; (ii) provide information on sites and infrastructures where wholesale local access is available; and (iii) publish on its website news relating to the deployment of any new fiber access infrastructure;

- non-discrimination obligations, both in relation to the obligation to ensure equivalent conditions in equivalent circumstances to other providers of equivalent services, as well as same conditions (including price) and quality (including technology) as provided for its own services (AGCOM confirmed the equivalence model provided for in Resolution 652/16/CONS) and also in relation to the obligation to submit retail offers ahead of their launch for AGCOM's replicability test;

- accounting separation obligations for each of the services provided under the relevant markets, with identification of the prices applied to OAO for wholesale access and those relating to the transfer charge (i.e. prices applied to internal transfers); and

- cost-orientation obligations, with application of the BU-LRIC^{+} model for the relevant wholesale access prices. However, in 26 municipalities considered "*contestable*," AGCOM withdrew the cost-orientation obligation for copper and NGA bitstream services (Market 3b) and gave the possibility to apply VULA prices lower than the average national amount starting from 2021, subject to AGCOM acknowledging an adequate competition level of alternative networks and a significant FTTH take-up in 2020 with a target threshold that was set by decision 12/21/CONS, but it was not met in June 2021 (Resolution 42/22/CONS). The list of "contestable" municipalities has been then updated achieving a total number of 43 municipalities for year 2022 (as defined through Resolution 385/21/CONS) and 55 municipalities for year 2023 (Resolution 41/23/CONS).

With Resolution No 637/20/CONS, published in December 2020, AGCOM started a new coordinated analysis of the markets for fixed network access services pursuant to Article 50-ter of the ECC (now Article 89). The new market analysis procedure, which is still ongoing after having been extended by AGCOM's Resolutions nos. 412/21/CONS of December 21, 2021, and 152/23/CONS of June 21, 2023, will update the regulatory framework for the markets for wholesale fixed network access services based on changed competitive conditions and new European regulatory framework. In this regard, with Resolution 152/23/CONS, AGCOM called a public consultation concerning a scheme for a new market analysis aimed at regulating the period 2024-2028. The said scheme envisages the following major proposals:

- confirmation of the TIM's status as an SMP operator in Market 1 (wholesale local access provided at a fixed location market in Italy) with the exclusion of the cities of Milan and Cagliari, where the *ex ante* regulation has been entirely withdrawn;

- confirmation of the obligations imposed on TIM in the Market 1 with Resolution 348/19/CONS, with the following amendments: (i) removal of the obligation to provide WLR services and DSLAM access; (ii) application of the disaggregation model already used on copper services to certain new fiber services (VULA FTTH and semi-GPON); (iii) extension of the full equivalence regime to the obligation to provide access to civil engineering; (iv) new fiber access obligations such as semi-GPON and full GPON access; (v) extension of the ex ante replicability test to flagship offers; and (vi) withdrawal of the cost-orientation obligation for VULA (FTTC and FTTH), semi-VULA, full-GPON and semi-GPON in 59 municipalities considered "*contestable*," where prices will be subject to fairness and reasonableness principles; and

- withdrawal of *ex ante* regulation in Market 3b (wholesale central access provided at a fixed location for mass-market products market).

However, since, at the time the said scheme was published, the Transactions had not yet been notified to AGCOM in their details, such scheme does not take into account the envisaged effects of the successful completion of the Transactions. See "*Risk Factors—Risk related to NetCo's Business Activity and Industry—NetCo operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business,*" and "*Risk Factors—Risks Related to NetCo's Business Activity and Industry—The implementation of the Transactions may be complex and there can be no assurance that NetCo will be able to deliver any or all of the related expected benefits of the Transactions from a regulatory perspective*."

2022 and 2023 prices for wholesale fixed network access services

By its Resolution 337/22/CONS, subsequently supplemented with Resolution 388/22/CONS, AGCOM opened a public consultation on the prices for the period from 2022 to 2023 for wholesale access services to the fixed network of copper and fiber network offered by TIM and FiberCop. As clarified by AGCOM, the definition of the abovementioned prices for 2022 and 2023 is necessary in order to ensure, pending the completion of the coordinated analysis of the access markets launched by Resolution 637/20/CONS, the necessary regulatory predictability for all operators active in the market, both at wholesale and retail level, and avoid the retroactive application of economic conditions, as repeatedly requested by the European Commission.

After the operators' hearings and comments of the European Commission on the draft decision, by its Resolution 132/23/CONS, AGCOM approved the following 2023 fees of the main wholesale access services compared to the values approved for 2021.

	Fees (€)		Variations
Services	**2023**	**2021-2022**	**(2023 vs 2021)**
LLU	9.91	8.90	+11.3%
SLU	5.89	5.30	+11.1%
FTTC VULA	13.07	12.50	+4.6%
Dark fiber in primary access network – 15 years IRU	1,874.38	2,484.53	-24.6%
Dark fiber in secondary access network – 15 years IRU	1,314.72	1,563.21	-15.9%
FTTH VULA	14.26	15.35 (2021) 14.84 (2022)	-7.1%
Fiber in-house wiring	2.50	2.80	-10.7%
Copper in-house wiring	0.51	0.47	+8.5%

Source: AGCOM – Resolution 132/23/CONS published on June 9, 2023

This decision reduces the differential between wholesale access prices in fiber and copper by creating, on the one hand, an incentive to invest in new FTTH networks for both the incumbent and new entrants, and on the other hand, an acceleration of customer migration from legacy copper networks to new fiber networks. It is in some ways a historical decision that reverses a ten-year trend of reduction: it had been ten years since AGCOM had adjusted copper and FTTC rates upwards, pursuing a policy of maintaining or reducing tariffs.

In the scheme for a new Market Analysis published by AGCOM on June 21, 2023, AGCOM proposed, among others, the following fees of the main wholesale access services for years 2024-2028:

	Fees (€)				
Services	**2023**	**2025**	**2026**	**2027**	**2028**
LLU	10.26	10.44	10.65	10.87	11.16
SLU	7.24	7.37	7.52	7.69	7.90
FTTC VULA	13.07	13.18	13.40	13.74	14.18
Dark fiber in primary access network – 15 years IRU	1,889.38	1,905.02	1,920.33	1,935.65	1,950.97
Dark fiber in secondary access network – 15 years IRU	1,346.67	1,378.63	1,410.58	1,442.53	1,474.49
FTTH VULA	14.24	14.23	14.21	14.19	14.18
Fiber in-house wiring	2.45	2.39	2.34	2.29	2.23

Copper in-house wiring	0.63	0.63	0.63	0.63	0.63

Source: AGCOM – Resolution 152/23/CONS published on June 21, 2023

With particular regard to FTTC and FTTH VULA rates, AGCOM's proposal provides for a glide path to limit burdens on FTTC operators and provide them with more time to migrate to FTTH networks, which are expected to become increasingly available in the course of the regulatory period. However, since, at the time the said scheme was published, the details of the Transactions had not yet been notified to AGCOM, such scheme does not take into account the envisaged effects of the successful completion of the Transactions. See also "*—Wholesale Fixed Access Markets*," "*Risk Factors—Risk related to the business activity and industries of NetCo—NetCo operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business," and "Risk Factors—Risks Related to the TIM Group—Risks related to the TIM Group's Business Activity and Industry—The TIM Group operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business. There can be no assurance that the TIM Group will be able to deliver all of the related expected benefits of the Transactions from a regulatory perspective*."

Terminating Segment of Leased Lines

AGCOM's Resolution 333/20/CONS related to the market of wholesale high-quality access provided at a fixed location divided in two relevant markets concerning the terminating segment of leased lines, published on August 31, 2020, provides the following:

- withdrawal of an *ex ante* regulation in the competitive area of Milan;
- removal of the cost-orientation obligation for leased lines services 24 municipalities that have been found "*contestable*" in relation to this specific market. In such municipalities, prices shall anyway comply with fairness and reasonableness principles;
- withdrawal of the obligation to provide the following access services for new activations: (i) analogic terminating circuits, and digital PDH terminating circuits with a speed less than or equal to 2 Mbps, (ii) ethernet over SDH termination and (iii) Ethernet over SDH interconnection links.

Consistently with a previous round of market analysis, prices of PDH and SDH circuits are set according to a network cap model valid for the years 2019, 2020 and 2021, while corresponding one-off fees were reduced by 2% per year. On the other hand, monthly fees and one-off fees for terminating ethernet over optical fiber services will be evaluated yearly by way of the Reference Offer approval procedure.

As for the year 2022, AGCOM proposed in consultation (Resolution No. 337/22/CONS) to confirm prices for the year 2021 for all the services in non-contestable areas, to limit retroactive effect. Considering the instable condition of inflation, in the consultation AGCOM proposed to confirm 2021 prices approved for leased lines over SDH also for year 2023 and confirmed cost orientation for fiber products. After the national consultation and comments of the European Commission on the draft decision, by its Resolution 132/23/CONS AGCOM confirmed all the proposed provisions, except for the prices of Ethernet over fiber leased lines products that were updated consistently with price evolution of VULA FTTH services, for 2022 (-3.36% with respect to 2021) and 2023 (-2.04% with respect to 2022).

In the scheme for a new Market Analysis published by AGCOM on June 21, 2023, AGCOM:

- proposed to extend the withdrawal of an *ex ante* regulation to the competitive areas of Turin, Barletta, Cornaredo, and Basiglio;
- in line with Resolution 333/20/CONS, proposed to set PDH and SDH circuits prices in the remaining municipalities according to a network cap model valid for the years 2024-2028, while maintaining one-off fees at the levels approved for 2023 (with the exception of prices of Ethernet over fiber leased lines services, subject to cost orientation obligations based on the bottom-up model); and

- proposed to update the list of "*contestable*" municipalities in relation to this specific market to include a total of 67 municipalities and, consequently, remove the cost-orientation obligations for leased lines services in such municipalities (providing that regulated prices approved for 2023 shall continue to apply until December 31, 2024).

However, since, at the time the said scheme was published, the details of the Transactions had not yet been notified to AGCOM, such scheme does not take into account the envisaged effects of the successful completion of the Transactions. See also "*—Wholesale Fixed Access Markets*," "*Risk Factors—Risk related to NetCo's Business Activity and Industry—NetCo operates in a heavily regulated industry and regulatory decisions or changes in the regulatory environment, as well as failure to comply with such regulatory framework, could adversely affect its business*," and "*Risk Factors—Risk related to NetCo's Business Activity and Industry—The implementation of the Transactions may be complex and there can be no assurance that NetCo will be able to deliver any or all of the related expected benefits of the Transactions from a regulatory perspective*."

Wholesale call termination on individual public telephone networks provided at a fixed location

On February 2, 2022, AGCOM published Resolution 13/22/CONS withdrawing regulatory obligations previously imposed to voice call origination on a fixed network (including the third billing obligation) applicable after a transitional period of 24 months and simplifying the regulation of voice fixed termination. Further, AGCOM's decisions contained in this Resolution, are the following:

- confirmation of TIM and 25 other operators' status of SMP operators with regard to the voice fixed termination market;

- confirmation of the 2019 termination price of €0.041 per minute until June 30, 2021;

- entry into force of the single maximum EU-wide wholesale rate of €0.07 per minute on July 1, 2021;

- cost orientation under a symmetrical regime for the prices of the services that are ancillary and additional to the termination service;

- withdrawal of cost accounting and accounting separation obligations imposed to TIM, as well as of half-yearly reporting obligations, for termination services without any transitional period; and

- reduction (from 12 months to 6 months) of the notice period required for all SMP operators for communicating the intention of decommissioning of one or more Time Division Multiples ("**TDM**") interconnection nodes, as well as removal from the publication of the final decision on the obligation to activate new interconnections with a TDM interface.

The Universal Service

The Universal Service ("**US**") is a minimum set of services of a certain quality, that must be guaranteed to all customers, regardless of their geographical location in Italy, and offered at a reasonable price, taking into account specific national conditions. Currently, under Article 94 of the ECC, such US services are (i) provision of broadband internet access services, and (ii) provision of voice communication services, including the underlying connection, at a fixed location (see Article. 94, paragraph 1 of Italian Legislative Decree No. 207/2021).

In the past, under the previous version of the Italian Communication Code (CC), TIM was the only operator designated to provide the US. However, pursuant to the new Italian CC, AGCOM, in order to designate one or more companies as suppliers of the US, must first identify minimum bandwidth for an adequate broadband internet access service (Art. 94, paragraph 3 of the Italian CC) and subsequently must verify that the availability and the economic accessibility at a fixed location of such service along with voice service cannot be guaranteed throughout the national territory under normal commercial conditions and through other potential instruments of public policies (Article 95 and Article 96 of the Italian CC). In this regard, by its Decision No. 309/23/CONS of December 5, 2023, AGCOM identified broadband internet access with a download speed of 20 Mbps as the broadband internet access service to be provided as part of

the US, and clarified that, pending further AGCOM's determinations, TIM cannot be considered to be automatically bound to provide such US broadband internet access services.

The Universal Service Fund ("**USF**") was established as a fund collecting and holding mandatory contributions paid by the major Italian communications companies in order to finance the net costs for US provided by the designated US operator, TIM.

AGCOM is responsible for verifying the net cost of the US provision and assessing whether this amount represents an unfair burden for the designated operator. If such burden is determined to be unfair, the designated operator may be entitled to an adequate compensation through the USF.

AGCOM assessed the net cost and authorized the funding mechanism until 2005 but did not recognize any net cost contribution for 2006 and 2007. The net cost for the provision of US for the period from 2004 to 2007 was subsequently calculated on the basis of a methodology established by AGCOM's Resolution 1/08/CIR in 2008 with a retroactive effect, that led to a significant decrease in the amount to be financed. The Council of State had overruled AGCOM's resolution. In response to such decision, AGCOM issued Resolutions 207/17/CONS and 145/17/CONS initiating proceedings for the review of the calculation of US net costs for 2004 and 2005, and 2006 and 2007, respectively. Additionally, with Resolution 103/19/CIR issued on September 11, 2019, AGCOM has recognized a supplementary US net cost charged to the other operators for the period from 2004 to 2007, to be equal to €26.7 million. Finally, with Resolution 88/18/CIR, published on June 21, 2018, AGCOM has determined that the net cost for 2008 equals zero and the net cost for 2009 amounts to €11.61 million and it is to be shared by the fixed and mobile operators.

On July 7, 2015, the Council of State delivered a decision rejecting TIM's appeal filed against TAR's decision related to AGCOM's Resolution issued in 2011 in connection with the proceedings for the review of the calculation of US net costs from 1999 to 2003 (excluding 2001). The subsequent decision of the Supreme Civil Court issued on December 27, 2017, rejected the following appeal filed by TIM and confirmed the need for a renewal of the proceeding to calculate the US net costs for the period above. AGCOM began the renewal proceedings for these years and periods with Resolution 102/19/CIR on September 11, 2019. Such proceeding has been dismissed through Resolution No. 190/19/CIR following the decision of the Council of State dated October 8, 2019, that confirmed the possibility for AGCOM to renew the proceeding but provided a new guidance on the principles to be followed in doing so.

Following the Council of State's decision, Vodafone had requested a refund from TIM of the amounts paid for 1999, 2000, 2002, 2003 and subsequent periods. Through the abovementioned decision published in October 2019, the Council of State has also accepted the appeal of Vodafone, requiring TIM to return the disputed sums.

In September 2020, AGCOM ended the public consultation related to the review of the unfairness of US net cost charges for the period from 1999 to 2009. In resolution 263/20/CIR, AGCOM defined a new approach to demonstrate unfairness of US net cost charges and, on the basis of such new approach, AGCOM recognized the unfairness of the charges for the period from 2002 to 2009, while AGCOM did not find the net cost charges for 1999 and 2000, to be unfair.

On March 29, 2021, in its Resolution 18/21/CIR, AGCOM confirmed the obligation for mobile operators to participate in US contribution mechanism for the period from 2001 to 2009. However, AGCOM's Resolution 18/21/CIR was challenged by the other authorized operators ("**OAOs**"). Vodafone and Wind requested the suspension of the payment of the contributions to the USF until the conclusion of the proceeding, and the Ministry informed the fixed and mobile OAOs not to proceed with the payment of contributions of the years in question.

On February 17, 2022, the TAR annulled AGCOM's Resolution 18/21/CIR by accepting one of the grounds of appeal advanced by the OAOs focused on the threshold parameter relating to the unfairness of the burden that was contested with regard to the economic and financial impacts on the OAOs in question. The further OAOs appeal grounds were instead rejected by the TAR.

In the context of the second instance proceeding, the Council of State, with two decisions dated April 18, 2023 and May 2, 2023 (respectively, orders No. 3885/2023 and No. 4356/2023), decided to request a preliminary ruling by the European Court of Justice on the conditions to be met for AGCOM to impose USF obligation to the OAOs. The rulings of the EU Court of Justice are expected to be issued in 2025.

On September 14, 2021, AGCOM published Resolution 92/21/CIR with the final aim to assess the possible unfair nature of the US net costs for years 2010-2013. However, on June 27, 2022, AGCOM issued Resolution 1/22/CIR suspending the deadlines of the proceeding originally established by Resolution 92/21/CIR and then extended by Resolutions 58/22/CONS and 143/22/CONS in light of the impacts that could result from the abovementioned judicial proceeding against Resolution 18/21/CIR pending before the Council of State.

Finally, by Resolution 98/23/CONS, AGCOM has withdrawn the obligation to ensure the availability of public payphone service in the US framework.

Regulatory levies

Contribution Fees for the Functioning of AGCOM and for maintaining the authorizations as provider of electronic communications networks and services, together with numbering resources and spectrum rights of use

NetCo and the other electronic communications operators in the Italian market are required to pay annual contribution fees to cover AGCOM's costs for its regulatory activities over the electronic communications sector. The contribution fees are determined in accordance with the AGCOM's specific resolutions issued yearly by AGCOM and are calculated on the basis of each operator's revenues.

Contribution fees for the electronic communications sector were determined by AGCOM as equal to 1.3 per thousand of each operator's revenues for 2022, and equal to 1.4 per thousand of each operator's revenues for both of 2023 and 2024, while contributions fees for the "media" sector were determined as equal to 1.9 per thousand of each operator's revenues for 2022, and equal to 2 per thousand of each operator's revenues for both of 2023 and 2024. On the basis of such resolutions, TIM paid, under reserve, approximately €15.7 million for 2022 and approximately €16.1 million for 2023.

In addition, the TIM Group is required to pay additional annual levies to the Ministry for the Enterprises and the Made in Italy for maintaining its authorizations as provider of electronic communications networks and services.

Government's UBB Network State Aid Plans

In June 2016, the European Commission authorized the Italian government's ultrabroadband ("**UBB**") State Aid Plan ("**UBB State Aid Plan**") in an amount of €4 billion. The purpose of UBB is to foster expansion of NGA, a new or upgraded access networks, that compared to the existing services will allow for the substantial improvements in broadband speeds and quality of service for 25% of the Italian population living in about 7,200 municipalities across Italy belonging to UBB "*white areas*" (i.e. the areas where NGA is currently not available and there is no interest of private operators to deploy it in the near future). According to UBB State Aid Plan, these 7,200 municipalities are grouped into two clusters, cluster C and cluster D. According to UBB State Aid Plan, 70% of the connections in cluster C will be provided with at least a speed of 100 Mbit/s for downloading and 50 Mbit/s for uploading services, while the remaining 30% should be able to reach at least a speed of 30 Mbit/s for downloading and 15 Mbit/s for uploading services. Connections falling under cluster D should be able to download at a speed of at least 30 Mbit/s for and upload at a speed of at least 15 Mbit/s.

On June 3, 2016, Infratel published an invitation for a tender procedure of €1.4 billion for a 20-years concession for deploying and managing an UBB "*passive*" infrastructure, composed by ducts and dark fiber, in the white areas in Abruzzo, Molise, Emilia Romagna, Lombardia, Tuscany and Veneto regions. On March 7, 2017, the tender was awarded to Open Fiber.

On August 8, 2016, Infratel published another invitation for a second tender regarding the ultrabroadband white areas that include ten additional Italian regions (Piemonte, Valle d'Aosta, Friuli Venezia Giulia, Liguria, Marche, Umbria, Lazio, Campania, Basilicata, Sicily and Trento Autonomous Province), for a total public financing of approximately €1.25 billion. TIM did not submit any bids. On July 28, 2017, the second tender was awarded to Open Fiber.

The Italian Strategy for Ultra Broadband "*Towards the Gigabit Society*" (the "**Strategy**"), approved on May 25, 2021 by the Interministerial Committee for the Digital Transition ("**ICDT**"), defined the actions necessary to achieve the

digital transformation objectives set by the European Commission in its Gigabit Society Communication and Digital Compass. See "*—The EU Electronic Communications Regulatory Framework—Overview*."

The NRRP approved by the Italian government on April 29, 2021, allocates 27% of the resources to the digital transition, of which €6.7 billion are intended for strategic projects related to the ultrabroadband services, in line with the Government's strategy launched in 2015. In addition to the objective to complete the coverage plan for UBB white areas and create measures to support demand, the Strategy mentioned in the previous paragraph is composed by five further public intervention plans to cover the geographical areas in which the supply of infrastructures and very high-speed digital services by market operators is absent, insufficient, or the improvement is not imminently expected. The €6.7 billion funds have been allocated by NRRP's for the following plans:

- *"Italia a 1 Giga" Plan;*
- *"Italia 5G" Plan;*
- *"Connected Health" Plan;*
- *"Connected School" Plan;* and
- *"Smaller Islands" Plan*.

Through these measures and plans, the Italian government intends to bring forward by 2026 the 1 Gbit/s connectivity objectives for all Italian citizens across the national territory and full 5G coverage in the populated areas set by the Digital Compass for 2030.

Pursuant to the provisions of the abovementioned agreements with Infratel, the transfer of TIM's business as a going concern envisaged as part of the successful completion of the Transactions, including the envisaged take-over of NetCo in TIM's position in the BB/UBB, the "Italia a 1 Giga" Plan, and the "Italia 5G" Plan's fiber Backhauling Tender, is subject, for the purposes of such agreements, to the obtainment of the consent of Infratel.

"Italia a 1 Giga" Plan

The "*Italia a 1 Giga*" is a €3.86 billion plan that would guarantee a fixed coverage of 1 Giga in download and at least 200 Mbit/s in upload speed in the Grey and Black Areas where, until 2026, the plans of private operators could not guarantee "*reliable*" download connections of at least 100 Mbit/s.

In April 2021, Infratel started mapping UBB fixed coverage plans for the period starting from 2021 and ending in 2026 by all private operators, including FWA coverage, based on 21.3 million grey and black addresses collected during the previous mappings. The results of the fixed mapping were published on August 6, 2021. The intervention threshold was set at the coverage of 300 Mbit/s, and based on such threshold approximately 6.2 million street addresses were identified as the object of public intervention. Following a public consultation on the methods of intervention, invitations for tenders with an incentive model on a regional or multi-regional basis will be used for the disbursement of public funding.

Within the "*Italia a 1 Giga*" plan, on October 13, 2021, Infratel launched a complementary consultation that ended on November 15, 2021, relating to updates to the mapping of UBB fixed coverage in the white areas of the 2016 BUL Plan, which covers 11.8 million citizens, including:

- the street addresses of the BUL tender awarded to the public concessionaire Open Fiber; and
- street addresses corresponding to approximately 450,000 real estate units located in remote areas (so-called "*scattered houses*"), not included in previous public intervention plans.

On the basis of the coverage plans declared by Open Fiber and private operators, 1.6 million street addresses that do not have access to at least 300 Mbit/s coverage, have been identified as subject of public funding for the completion of the "*Italia a 1 Giga*" by 2026.

The "*Italy at 1 Giga Plan*" was sent to the European Commission on November 8, 2021 and was approved on January 27, 2022.

On January 15, 2022, Infratel published the "*Italia a 1 Giga*" invitation for a tender procedure granting public funds for the financing of investment projects aimed at the construction of new electronic communications infrastructures and related access equipment capable of providing services with at least 1 Gbit/s in download and 200 Mbit/s in upload speed, with a deadline of March 31, 2022. The tender included 15 lots covering around 6.9 million citizens and the funding foreseen in the tender amounted to €3.68 billion. Each competitor was able to win up to eight lots. 70% of the expenses incurred will be paid from the public contribution, while remaining share of no less than 30% will be paid by the beneficiary of the public funds. The results of the tenders were published on May 24, 2022 and are as follows:

- a temporary business group (*raggruppamento temporaneo di imprese*) between TIM and FiberCop won the tenders relating to: Sardinia (lot 1), Abruzzo, Molise, Marche and Umbria (lot 3), Piemonte, Liguria and Val d'Aosta (lot 4), South Calabria (lot 5), North Calabria (lot 11) and Basilicata (lot 14) for approximately up to €1.6 billion; and

- Open Fiber won the tenders relating to: Puglia (lot 2), Tuscany (lot 6), Lazio (lot 7), Sicily (lot 8), Emilia-Romagna (lot 9) Campania (lot 10), Friuli Venezia Giulia-Veneto (lot 12) and Lombardia (lot 13) for approximately €1.8 billion.

The tender relating to Trento and Bolzano (lot 15) was resubmitted in April 2022 with a deadline of June 3, 2022 and was awarded to a temporary business group (*raggruppamento temporaneo di imprese*) between TIM and FiberCop on June 28, 2022 for approximately up to €65 million. On July 29, 2022, the relevant agreements were signed between Infratel and the operators that had been awarded the individual lots.

"Italia 5G" Plan

The "*Italia 5G*" is a €2.02 billion plan, that provides for 5G coverage with 150 Mbit/s download speed and at least 50 Mbit/s upload speed in the following areas:

- European 5G corridors: these corridors cover 2,645 km and the funds allocated under the plan amount to €420 million;

- extra-urban roads ready for 5G: these roads are extended on an area of approximately 10,000 km, with the plan funds of €600 million; and

- no 5G/4G areas: the funds allocated to this project amount to €1 billion.

To identify the areas to be financed, Infratel has mapped the 4G and 5G mobile coverage plans of private operators for the period from 2021 to 2026, including the sites' fiber backhauling connections. As a result of the mapping, the following were identified as subjects to the public intervention:

- 13,200 mobile radio sites, that include approximately 18,600 Radio Base Stations ("**SRBs**"), for the implementation of fiber backhauling; and

- 15% of the national territory primarily consisting of crucial land transport routes, such as roads and railways, for the implementation of 5G.

The results were subject to a public consultation opened until December 15, 2021. Following the results of the public consultation, to encourage the creation of infrastructures for the development of 5G networks without investments from the market, on March 21, 2022 Infratel published the following two tenders:

- fiber backhauling tender; and

- new 5G sites tender.

The European Commission approved the State aid measure, including the above tenders on April 25, 2022. The deadline for submitting the bids expired on May 9, 2022.

Fiber Backhauling Tender

The tender provides for incentives for the investments in the construction of fiber optic links of over 10,000 existing mobile radio sites, up to 90% of its costs. It is divided into six multi-regional lots with an investment incentive of approximately €949,1 million. On June 13, 2022, all lots were awarded to TIM for a total value of approximately €725 million, and the relevant agreements related to each lot were signed between Infratel and TIM on July 29, 2022.

New 5G Sites Tender

The second tender is related to the construction of new 5G mobile network infrastructures (fiber, infrastructure and electronic components) in more than 2400 areas. This would ensure a transmission at least 150 Mbit/s download and 30 Mbit/s upload speeds, to be financed up to 90% of the costs with the funds of approximately €974 million. The second tender is divided into six multi-regional lots, different from the lots included in the fiber backhauling tender. This tender was abandoned and was republished with changes on May 20, with a deadline for the bids set for June 10, 2022. The new invitation for the bids provides for funding of approximately €567 million and reduces a number of sites for 50%. On June 28, 2022, Infratel announced that all lots were awarded to INWIT forming a temporary joint venture with TIM and Vodafone for approximately up to €346 million. On July 29, 2022, the relevant agreements relating to the awarded lots were signed between Infratel and the group of companies led by INWIT.

"Connected Health" Plan

The "*Connected Health*" plan aims to provide connectivity with symmetrical speeds, starting from 1 Gbit/s to 10 Gbit/s to approximately 12,280 healthcare facilities throughout Italy. In order to implement the plan, on January 28, 2022 Infratel launched a tender for the supply of ultrabroadband connectivity services at the public health service facilities in Italy, including the supply and installation of the access network and management and maintenance services, expiring on April 11, 2022.

The invitation provides for an allocation of €387 million and is divided into eight territorial lots. Each bidder could be awarded up to four lots. The provisional results of the tenders awarding €314 million was announced on June 6, 2022. TIM won two of the eight lots comprising the regions of Lombardia, Emilia-Romagna, Marche and Umbria, and was awarded approximately €78 million. The relevant agreements related to these lots were signed between Infratel and TIM on September 20, 2022.

"Connected School" Plan

The "*Connected School*" plan aims to complete the 2020-2023 School Plan launched by the Italian Government on May 5, 2020, that provided for the supply of an ultrabroadband connection speed up to 1 Gbit/s with a minimum guaranteed speed of 100 Mbit/s. The plan captures 35,000 school buildings, comprising 78% of the total number of the school buildings in Italy. Particularly, these include kindergartens, primary schools, the first and second level secondary schools, including those located in the White Areas.

In order to implement the plan, between September and December 2020, Infratel carried out a public consultation and issued an invitation for tender with public funding of €274 million divided into seven lots. Each bidder could be awarded up to two lots. On February 26, 2021 Infratel announced the results of the tender awarding €271 million. TIM won two lots that include the regions of Tuscany, Veneto, Marche, Abruzzo, Molise and Puglia, that were awarded €84 million.

The new "*Connected School*" plan launched in 2022 aims to complete the public intervention by including the remaining 9,900 school buildings into the plan.

In order to implement this plan, on January 28, 2022 Infratel launched a new tender, with a total budget of over €184 million to be awarded for the supply of ultrabroadband internet connectivity services at schools in Italy, including the supply and installation of the access network and management and maintenance services. The tender was divided into

eight territorial lots and the same operator could be awarded up to four lots. The provisional award of the tenders was announced on June 6, 2022 with approximately €166 million awarded. TIM won four lots comprising the regions of Piemonte, Liguria, Valle d'Aosta, Tuscany, Lazio, Campania, Calabria, Sicily and Sardinia, winning over €99 million. The related relevant agreements were signed between Infratel and TIM on September 20, 2022.

"Smaller Islands" Plan

The "*Smaller Islands*" an approximately €60.5 million plan aims to provide an adequate connectivity to 18 smaller islands currently without fiber optic connections with the mainland. In particular, the islands will be equipped with an optical backhaul that will allow a development of an ultrabroadband connectivity. The optical backhaul will be accessible to all operators through Submarine Backhaul Access Points ("**SBAP**") identified according to the criterion of the shortest distance from the neutral delivery point ("**NDP**"), if present on the island, and from the landing point of the submarine cable.

The plan would be implemented through direct intervention models, with the new network financed and owned by the State and managed by one or more operators, chosen on the basis of a competitive, open, transparent and non-discriminatory process.

The tender to identify the economic operators to be entrusted with the design, supply and installation of submarine fiber optic cables for the construction of the "*Smaller Islands*" plan was launched on November 18, 2021 and ended on December 22, 2021. The tender was abandoned and resubmitted by Infratel on February 11, 2022 with certain modifications. The tender was awarded to Elettra TLC on April 28, 2022 for approximately €45 million.

New consultation on mapping backhauling networks 2023

On December 18, 2023 Infratel launched a new consultation, expiring on January 31, 2024, in order to update the mapping of the backhauling networks. The mapping has the objective of knowing whether the collection points of the fixed access network (on physical carrier or FWA radio) existing, or planned by 2026, have a backhaul network with sufficient capacity to transport the traffic offered by the network access capable of providing download connection speeds equal to or greater than 300 Mbit/s in the peak period for each household passed.

In the event of a market failure, i.e. if the capacity of the backhauling network, existing or planned, is deemed insufficient to cope with the expected development of the corresponding access networks based on the current and future needs of end users, further public intervention to support backhauling networks could be defined.

Spectrum

According to AGCOM's Resolution 157/22/CONS, in July 2022 TIM paid approximately €9.68 million for the renewal of 2x112 MHz FDD spectrum rights of use in the 27.5 – 29. GHz band until the end of 2029.

Italian Golden Power Legislation and National Cyber Security Perimeter legislative framework

Under the Golden Power Legislation, the Italian Golden Power Authority may, among others, prohibit or impose undertakings on: (i) the acquisition of certain shareholdings in Strategic Companies, and (ii) resolutions, acts or transactions concerning a Strategic Company and resulting in a change in ownership, control, possession or intended use of such strategic assets or relationships, including, among others, any merger, de-merger, transfer of business/branch of business as going concern, and the enforcement and, according to a prudential interpretation, the granting or extension of pledges over the shares or assets of Strategic Companies. See "*Risk Factors—Risks related to the legislative and legal framework—The Italian Golden Power Authority has exercised, and may in the future exercise, its significant powers under the Golden Power Legislation with respect to the TIM Group, including with respect to the TIM Group's ability to enter into strategic transactions*."

The Company is required to notify the Italian Golden Power Authority of the transactions, resolutions or acts listed above. In the event of non-compliance with the obligations, specific penalties are provided, including administrative fines of up to twice the value of the transaction and in any case not less than 1% of the company's turnover or the

cumulative turnover of the companies involved in the transaction in the last financial year for which the financial statements were approved.

The regulatory framework on National Security was enriched by the creation, in 2019, of the National Cyber Security Perimeter (PSNC). The legislation is intended to ensure a high level of security of networks, information systems and IT services of public administrations, public and private entities and operators with an established office in the national territory, on which the exercise of an essential function of the State depends, i.e. the provision of an essential service for the maintenance of civil social or economic activities, fundamental to the interests of the State and whose malfunctioning, interruption, even partial, or improper use, may result in a prejudice to national security.

Failure to comply with the obligations may result in administrative fines of up to €1.8 million.

Antitrust

Antitrust Issues in Italy

NetCo is subject to Italian competition laws, particularly Law no. 287 dated October 10, 1990 ("*Provisions aiming at protecting competition and the market*") that established the AGCM. AGCM's primary responsibilities and powers include the following:

- application of (i) Law no. 287/1990, (ii) the relevant EU provisions, including Article 101 and Article 102 of the Treaty on the Functioning of the European Union ("**TFEU**"), when applicable, (iii) Legislative Decree No. 206/2005 concerning consumer protection and Legislative Decree No. 146/2007 concerning unfair commercial practices;
- supervision of the (i) practices and/or agreements that could be restrictive for the competition landscape, (ii) abuses of dominant positions and (iii) mergers and concentrations of enterprises; and
- monitoring conflicts of interest in the case of individuals holding government positions.

In addition, AGCM may adopt interim measures and make binding and enforce commitments upon the proposing parties in order to prevent identified competition concerns and violations.

Antitrust Issues at the European Level

NetCo is subject to the European competition framework. European competition regulation covers various matters, including anticompetitive agreements (Article 101 TFEU), abuse of dominance (Article 102 of TFEU), mergers with an EU dimension reaching certain turnover thresholds, and state aid (Article 107 of TFEU).

The European Commission is empowered by the TFEU to apply antitrust rules (Articles 101 and 102 TFEU) directly and for that purpose it holds a number of investigative powers, such as inspection at business and non-business premises and written requests for information. It may also impose fines on subjects and their undertakings infringing the EU antitrust rules. The main antitrust rules on procedures are set out in Council Regulation (EC) 1/2003.

Since May 1, 2004, all National Competition Authorities (in Italy, AGCM) have been empowered to fully apply EU antitrust rules by virtue of Articles 101 and 102 of the TFEU, in order to ensure that competition is not distorted or restricted. The national courts may also apply these provisions in order to protect the individual rights guaranteed to the EU citizens by TFEU.

As part of the overall enforcement of EU competition law, the European Commission has also developed and implemented a policy on the application of EU competition law to actions for damages before national courts. European Commission also cooperates with national courts in order to ensure the coherent application of the EU competition rules within the Member States' judicial systems.

Furthermore, in the event of mergers, acquisitions or extraordinary transactions promoted by or involving TIM or part of its assets, the relevant transaction may be subject to *ex-ante* control by the European Commission, pursuant to Regulation (EC) 139/2004 on the control of concentrations between undertakings (the "**Merger Regulation**").

According to the Merger Regulation, a concentration with "Community dimension" (i.e. involving a turnover over the thresholds provided for by Article 1 of the Merger Regulation) shall be notified to the European Commission prior to its implementation. In case the concentration does not have a Community dimension, it may be subject to ex-ante control from AGCM, provided that the thresholds provided for by Article 16 of Italian Law No. 287 of October 10, 1990 are met. Upon analysis of the prospected transaction, the European Commission may: (i) declare the transaction compatible with the common market; (ii) impose on the parties certain conditions and obligations aimed at ensuring the transaction's compatibility with the common market; or (iii) declare the transaction incompatible with the common market. Non-compliance with the obligations set out in the Merger Regulation may lead to fines up to 10% of the aggregate turnover of the infringing undertakings in case of, *inter alia,* failure to notify a transaction, breach of the standstill obligation, failure to comply with one or more of the conditions imposed, as well as in case of implementation of a transaction declared incompatible with the common market.

MANAGEMENT OF THE TIM GROUP

It is currently expected that on April 23, 2024, the shareholders' meeting of TIM will convene, resolve, among others, on the appointment of the New Board and a new board of statutory auditors. Accordingly, the New Board may decide not to confirm certain members of the TIM Group's senior management. For further information, please see "*Risk Factors—Risks Related to the TIM Group—Risks Related to the TIM Group's Business Activity and Industry—Any changes in the TIM Group's directorship and/or senior management could adversely affect the TIM Group's business*."

Board of Directors of TIF

The following table sets forth, as of the date of this Exchange Offer Memorandum, certain information regarding the individuals who currently serve on the board of directors of TIF.

Name	Age	Position
Paolo Barroero	58	Chairman
Fabio Adducchio	33	Director
Tom Loesch[(1)]	67	Director
Costanzo Perona	61	Director
Antonio Sica	59	Director
Karen Wauters[(1)]	62	Director

(1) Independent director.

Audit Committee of TIF

The following table sets forth, as of the date of this Exchange Offer Memorandum, certain information regarding the individuals who currently serve on the Audit Committee of TIF.

Board of Directors of TIM

The following table sets forth, as of the date of this Exchange Offer Memorandum, certain information regarding the individuals who currently serve on the board of directors of TIM.

Name	Age	Position
Salvatore Rossi	74	Chairman
Pietro Labriola	56	Director, Chief Executive Officer and General Manager
Paolo Boccardelli[(1)]	52	Director
Paola Bonomo[(1)]	54	Director
Paola Camagni[(1)]	53	Director
Maurizio Carli[(1)]	65	Director
Cristiana Falcone[(1)]	50	Director
Federico Ferro Luzzi[(1)]	55	Director
Giulio Gallazzi[(1)]	59	Director
Giovanni Gorno Tempini	61	Director
Marella Moretti[(1)]	58	Director
Ilaria Romagnoli[(1)]	56	Director
Paola Sapienza[(1)]	58	Director
Massimo Sarmi	75	Director
Alessandro Pansa	72	Director

(1) Independent director.

Executive Officers of TIM

The following table sets forth, as of the date of this Exchange Offer Memorandum, certain information regarding the individuals who currently serve as key managers of TIM.

Name	Age	Position
Pietro Labriola	56	Chief Executive Officer and General Manager
Eugenio Santagata	50	Chief Public Affairs & Security Officer
Claudio Giovanni Ezio Ongaro	55	Chief Strategy & Business Development Officer
Adrian Calaza Noia	56	Chief Financial Officer
Paolo Chiriotti	53	Chief Human Resources & Organization Officer
Agostino Nuzzolo	55	Head of Legal & Tax
Giovanni Gionata Massimiliano Moglia	63	Chief Regulatory Affairs Officer
Simone De Rose	58	Head of Procurement
Elio Schiavo	60	Chief Enterprise & Innovative Solutions Officer
Andrea Rossini	53	Chief Consumer, Small & Medium Market Officer
Elisabetta Romano	60	Chief Network, Operations & Wholesale Officer
Alberto Mario Griselli	53	Director President of TIM S.A.

The Directors have their business address at TIM's legal seat at Via Gaetano Negri 1, 20123 Milan, Italy.

Board of Statutory Auditors of TIM

The following table sets forth, as of the date of this Exchange Offer Memorandum, certain information regarding the individuals who currently serve on the board of statutory auditors of TIM.

Name	Position
Francesco Fallacara(1)	Chairman
Angelo Rocco Bonissoni	Acting Auditor
Francesca di Donato	Acting Auditor
Anna Doro(1)	Acting Auditor
Massimo Gambini	Acting Auditor
Ilaria Antonella Belluco (1)	Alternate Auditor
Laura Fiordelisi(1)	Alternate Auditor
Franco Maurizio Lagro	Alternate Auditor
Paolo Prandi(1)	Alternate Auditor

(1) Elected by minority shareholders.

MANAGEMENT OF THE OPTICS GROUP

Board of Directors of Optics

The following table sets forth, as of the date of this Exchange Offer Memorandum, certain information regarding the individuals who currently serve on the board of directors of Optics.

Name	Age	Position
James Anthony Gordon	38	Chairman
Leonardo Maria Pica	30	Director
Riccardo Busani	35	Director
Bruno Abbate	58	Director

The directors of Optics have their business address at Optics' legal seat at Corso Vercelli 40, 20145 Milan, Italy.

Board of Directors and Executive Officers of NetCo

Upon the successful completion of the Transactions, KKR Funds' interest in FiberCop will transition from its indirect 37.5% stake in FiberCop (through Teemo Bidco S.à r.l.), to becoming the controlling indirect shareholder of NetCo. The Agreed Form SHA will define the appointment process for NetCo's board of directors as well as its executive officers alongside other governance provisions contained therein. Therefore, the future governance structure of NetCo is expected to be implemented after the consummation of the Transactions. See "*Principal Shareholders of Optics—Optics' Principal Shareholder—KKR—Shareholders' Agreement*."

See "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Business Activity and Industry—There is no assurance that NetCo's future controlling shareholder's strategy and estimates will be consistent with TIM's management's*" and "*Risk Factors—Risks Related to NetCo—Risks Related to NetCo's Financial Information—There is no assurance that NetCo's future controlling shareholder's strategy and estimates will be consistent with TIM's management's*."

PRINCIPAL SHAREHOLDERS OF THE TIM GROUP

TIM's principal shareholders are Vivendi and its subsidiaries (the "**Vivendi Group**") and Cassa Depositi e Prestiti S.p.A. and its subsidiaries (the "**CDP Group**"). As of December 31, 2023, on the basis of the results of TIM's shareholders' register, communications made to CONSOB and to TIM pursuant to Article 120 of the Italian Consolidated Financial Act, TIM's principal shareholders' shareholdings in the ordinary share capital of TIM is as follows:

	Type of ownership	% of ordinary share capital (As of December 31, 2023)
Vivendi Group	(direct)	23.75
CDP Group	(direct)	9.81

As of the date of this Exchange Offer Memorandum no further information about the shareholders' ownership is available.

PRINCIPAL SHAREHOLDERS OF OPTICS

Optics

Optics BidCo S.p.A., was incorporated in Italy as Optics BidCo S.r.l. on October 6, 2023, registered with the Companies Register of Milan, Monza, Brianza, Lodi (*Registro delle Imprese di Milano, Monza, Brianza, Lodi*) on October 10, 2023 and then converted to a *società per azioni*. Optics is registered under number 13174810963 with the Companies Register of Milan, Monza, Brianza, Lodi (*Registro delle Imprese di Milano, Monza, Brianza, Lodi*) and has its registered office at Corso Vercelli 40, 20145 Milan, Italy.

Optics BidCo S.p.A. has an authorized share capital of €50,000 divided into 50,000 fully paid shares without par value. Optics BidCo S.p.A. is a wholly-owned direct subsidiary of Optics HoldCo S.r.l., which is a wholly-owned direct subsidiary of Optics EblCo S.r.l. KKR holds Optics EBLco S.r.l., through its wholly owned subsidiary KKR Optics Aggregator GP S.à r.l. (in its capacity as general partner of KKR Optics Aggregator SCSp).

Upon the consummation of the Acquisition, funds managed and/or advised by KKR will indirectly exercise sole control over NetCo through a wholly owned subsidiary, expected to be EBLco S.r.l. On or after the Acquisition Closing Date, it is expected that Azure Vista, CPPIB, F2i and the MEF will invest for a stake of up to approximately 17.5%, 17.5%, 11% and 16% of Optics HoldCo, respectively. The final stakes of their respective investments will depend on the actual equity capital needed at completion of the Transactions. Additional minority shareholders are also expected to invest in NetCo through Optics Holdco under the Shareholders' Agreement described below under "*—Shareholders' Agreement*."

Optics' Principal Shareholder—KKR

KKR is a leading global investment firm with a long history of investing in Europe. Founded in 1976 by Henry Kravis and George Roberts and led by Scott Nuttall and Joe Bae, KKR had approximately $553 billion of assets under management as of December 31, 2023. With offices around the world, KKR manages assets through a variety of investment funds and accounts covering multiple asset classes. KKR seeks to create value by bringing operational expertise to its portfolio companies and through active oversite and monitoring of its investments. KKR complements its investment expertise and strengthens interactions with investors through its client relationships and capital markets platforms.

Following the Transactions, KKR's controlling investment in NetCo will be held through KKR Infrastructure, which has a long-term approach to investing. KKR Infrastructure holds approximately 80 infrastructure investments globally within four strategies investing across North America, Europe and Asia-Pacific in a number of sub-sectors and geographies and has over 110 team members, including 90 investment professionals and an additional 25 value creation executives dedicated to infrastructure. KKR Infrastructure adopts a differentiated and disciplined risk-based strategy to its investments with focus on downside protection and low risk of capital impairment, and a conservative approach to leverage and structuring. As of September 30, 2023, KKR Infrastructure had more than $55 billion in assets under management.

Shareholders' Agreement

On the Acquisition Closing Date, it is expected that: (i) KKR, through its investment vehicle EBLco, and a separate SPV (the "**K-Infra SPV**," and EBLco and K-Infra SPV together, the "**Lead Investor**"), will acquire indirect sole control of NetCo. The following shareholders will also invest in NetCo through Optics Holdco, each as a minority shareholder, on the terms set forth in the Agreed Form SHA:

(i) MEF;

(ii) Azure Vista;

(iii) F2i; and

(iv) CPPIB.

The Lead Investor will be entitled to designate a majority of Optics Holdco board so long as it holds at least 25% of the equity securities in Optics Holdco. The remaining directors will be appointed to the Optics Holdco board by all other shareholders of Optics Holdco at one director per 8.75% shareholding in Optics Holdco, and each other shareholder may aggregate their holding with each other shareholder for the purposes of this threshold (for instance, two shareholders with a 13.5% holding each may individually appoint one director, and then collectively use their remaining 4.75% each to jointly appoint a third director), subject to the MEF always being entitled to designate at least one director for appointment to the Optics Holdco board who will be appointed as chairperson of the Optics Holdco board, who shall not have a casting vote. The attendance of the chairperson is not required for a directors' meeting to have the required quorum. The attendance of the chairperson is required for resolutions pertaining to certain 'Strategic Matters' (i.e. only matters of national strategic and security relevance), however these are not expected to influence strategic commercial behavior of NetCo. All governance provisions applicable to Optics Holdco in the Agreed Form SHA will also apply to the board of any of its subsidiaries (including NetCo).

The Lead Investor will be entitled to control the majority of the voting rights so long as investment funds, vehicles and/or accounts advised and managed by KKR & Co. Inc. hold at least 25% of the equity securities in Optics Holdco, with the remaining votes being divided amongst the other shareholders pro rata to their shareholdings.

All actions will be taken by the Optics Holdco board, other than:

(i) "Reserved Matters," including (but not limited to) customary minority shareholder protections such as (a) any amendments to the organizational documents of Optics Holdco or its subsidiaries which disproportionately and adversely affect a shareholder when compared to the other shareholders, except for amendments mandatorily required by applicable law, (b) the filing of a petition for voluntary bankruptcy, dissolution, liquidation or winding up by NetCo (or any of its subsidiaries), and (c) any material related party transaction(s), each of which will require the affirmative vote of each shareholder holding at least 8.75% of the share capital of Optics Holdco;

(ii) "Additional Reserved Matters," including (but not limited to) (a) any amendments to the then-existing Optics Holdco business plan that would result in a change (whether positive or negative) in excess of 12.5% of the Optics Holdco's operational or roll-out capital expenditure compared to the then-existing Optics Holdco business plan, (b) any amendments to the budget of Optics Holdco which would result in a budgetary deviation (including with respect to the operational or rollout capital expenditure and/or instances where such deviation would reasonably result in delays or adverse effects to the roll out plan) exceeding 12.5% compared to the budget of Optics Holdco for that financial year and (c) any merger or acquisition or disposal, other than a transaction in Italy related to towers, data centers and/or wholesale fiber involving an equity value below 10% of the equity value of Optics Holdco (excluding any transaction by which NetCo becomes the beneficial owner of more than 50% of the equity and voting securities, or all or substantially all of the assets, of Open Fiber), each of which will require the affirmative vote of each shareholder holding at least 17.5% of the share capital of Optics Holdco; and

(iii) "Qualified Reserved Matters," including (but not limited to) veto rights in relation to (a) amendments to the budget of Optics Holdco (or NetCo) that would result in a misalignment with the business plan and (b) the pursuit or settlement of any material regulatory proceedings before any competent regulatory or competition authority, each of which will require the affirmative vote of each shareholder holding at least 30% of the share capital of Optics Holdco.

In the event that the number of votes in favor of a matter brought before the Optics Holdco board for approval are equal to the number of votes against such matter, or in the case of a failure to secure the required consent with respect to Reserved Matters, Additional Reserved Matters and/or Qualified Reserved Matters(a "**Deadlock**"), the shareholders agree to cooperate in good faith to attempt to resolve such Deadlock, and any shareholder may issue a written notice to the other shareholders in the relevant matter setting out the specifications of such Deadlock ("**Deadlock Notice**") whereupon senior officials designated by the shareholders involved in the relevant matter shall consult in good faith for a period of 30 calendar days from receipt of the Deadlock Notice. If the Deadlock remains unresolved upon expiry

of the period of 30 calendar days from receipt of the Deadlock Notice, the matter shall be deemed not approved by the Optics Holdco board.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS OF THE TIM GROUP

In the ordinary course of the TIM Group's business, the TIM Group enters into various agreements and transactions with related parties. These agreements and transactions, when not dictated by specific laws, are carried out on arm's length terms, in compliance with the TIM Group's related-party transactions procedure, which sets forth rules designed to ensure the transparency and fairness of any transactions it enters into in accordance with CONSOB Regulation No. 17221/2010 of March 12, 2010, as subsequently amended and supplemented, concerning "*Related-Party Transactions*" (the "**CONSOB Regulation 17221/2010**").

The related-party transactions described in this section are those qualifying as transactions of 'greater importance,' for the purposes of CONSOB Regulation 17221/2010 and Article 7 of TIM Group's related-party transactions procedure, in the years ended December 31, 2023, 2022 and 2021. In accordance with CONSOB Regulation 17221/2010, no significant transactions were concluded in the years ended December 31, 2023, 2022 and 2021, that materially impacted the financial position or results of operations, or which had a significant effect on the financial position or performance, of the TIM Group.

For further information on the recent transactions described below and other related-party transactions, including the effect thereof and of transactions with subsidiaries, transactions with associated, subsidiaries of associates and joint ventures, transactions with other related parties and transactions with pension funds on the TIM Group's separate consolidated income statement, consolidated statement of financial position and consolidated statements of cash flows (as applicable), see Note 36 to the 2022 TIM Audited Consolidated Financial Statements, see Note 36 to the 2023 TIM Audited Consolidated Financial Statements each included elsewhere in this Exchange Offer Memorandum.

National Strategic Hub (Polo Strategico Nazionale)

On August 24, 2022, after an open tender procedure process, a newly incorporated project company established by the TIM Group, and of which TIM holds 45% of the share capital, together with Cassa Depositi e Prestiti (through its subsidiary CPD Equity), Leonardo and Sogei, was awarded a public-private partnership contract with the Department of Digital Transformation of the Presidency of the Italian Council of Ministries (*Presidenza del Consiglio dei Ministri*), granting concessions for the design, preparation, fitting out and management of the National Strategic Hub's (*Polo Strategico Nazionale*) infrastructure for the provision of cloud services for the Italian national and local public administrations. Since the second half of 2021, with merely prudential approach, CPD Equity, as a subsidiary of Cassa Depositi e Prestiti (and a TIM's shareholder) has been included in the scope of related companies of the TIM Group. The exercise of pre-emption rights was approved by TIM Group's Board, with the favorable opinion of its related-party committee, in compliance with the TIM Group's related-party transactions procedure. A complete description of this transaction is publicly available in accordance with Article 5 of Consob Regulation 17221/2010 and in accordance with the TIM Group's related-party transactions procedure. For more information, see Note 40 to the 2023 TIM Audited Consolidated Financial Statements, included elsewhere in this Exchange Offer Memorandum.

Italtel S.p.A.

On April 1, 2022, TIM increased its stake in the share capital held by the TIM Group in Italtel S.p.A. to 17.72%. Italtel S.p.A. is also subject to the significant influence of TIM in accordance with IAS 28 (Investments in Associates and Joint Ventures). Therefore, starting April 1, 2022, Italtel S.p.A. is considered an associate and its subsidiaries are considered related parties of the TIM Group, in accordance with the TIM Group's related-party transactions procedure. For more information, see Note 40 to the 2023 TIM Audited Consolidated Financial Statements, included elsewhere in this Exchange Offer Memorandum.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS OF THE OPTICS GROUP

In the course of its ordinary business activities Optics expects to regularly enter into agreements with companies within the Optics Group. These agreements will relate to intercompany loans or similar transactions.

Optics believes that all transactions within its Group will be negotiated and executed on an arm's-length basis and that the terms of these transactions will be comparable to those with unrelated third-party suppliers and service providers.

Certain companies within the Optics Group will also engage in various financing transactions with shareholders in connection with the Acquisition.

Management Equity Program

Optics intends to establish a management equity participation program on or after the completion of the Acquisition. The subscribing managers will be expected to enter into an equity participation agreement ("**Equity Participation Agreement**") governing their rights and obligations in connection with their investments in Optics. Any such Equity Participation Agreement is expected to be entered into on customary terms.

DESCRIPTION OF CERTAIN OTHER FINANCING ARRANGEMENTS OF THE TIM GROUP

The following contains a summary of the terms of the TIM Group's key items of indebtedness as of December 31, 2023. It does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the underlying documents. Capitalized terms not otherwise defined in this section shall, unless the context otherwise requires, have the same meanings set out in the underlying debt documents, as applicable. TIM Group Loans. For more information on events occurred after December 31, 2023, see "Summary—Recent Developments."

Revolving Credit Facility

On January 16, 2018, TIM, as borrower, entered into a revolving credit facility agreement with, inter alios, certain lenders party thereto (the "**2018 RCF Lenders**") (as amended, restated, supplemented or otherwise modified on May 13, 2021, and as further amended, restated, supplemented or otherwise modified from time to time, the "**RCF Agreement**").

On May 13, 2021, TIM entered into an amendment and restatement to the RCF Agreement with the 2018 RCF Lenders and certain additional revolving lenders, pursuant to which certain additional revolving lenders parties thereto agreed to participate in the Revolving Credit Facility (as defined below) and the 2018 RCF Lenders agreed to transfer their existing rights and obligations under the RCF Agreement, with such lenders thereby extending a euro-denominated tranche of revolving commitments in an aggregate principal amount of €4,000 million (the "**Revolving Credit Facility**"). As of December 31, 2023, the Revolving Credit Facility is fully undrawn. The RCF Agreement includes sustainability-linked provisions that allow the applicable margin to be adjusted upon the TIM Group achieving certain Annual Targets (as specified in the RCF Agreement). The RCF Agreement does not contain any financial covenants. The RCF Agreement contains certain customary representations and warranties, affirmative covenants and events of default (including, among others, an event of default upon a change of control and in case of illegality). If an event of default occurs, the lenders under the Revolving Credit Facility will be entitled to take various actions, including the acceleration of amounts due under the Revolving Credit Facility.

The RCF Agreement contains certain negative covenants which, among other things and subject to certain significant exceptions and qualifications, limit TIM's ability to (i) create Encumbrances, (ii) materially change the nature of TIM's business and (iii) engage in mergers or consolidations with entities outside the TIM Group.

The obligations of TIM under the Revolving Credit Facility are unsecured and are not guaranteed by any member of the TIM Group.

Term Loans

As of December 31, 2023, TIM has entered into the following loan agreements (collectively, the "**Term Loan Agreements**" and the loans borrowed thereunder, collectively, the "**Term Loans**"):

- loan agreement, dated as of March 25, 2021, with Intesa Sanpaolo S.p.A., as lender, in an aggregate principal amount of €500 million (the "**Intesa Sanpaolo Loan Agreement**"). The loan matured and was fully repaid on March 25, 2024;

- loan agreement, dated as of October 12, 2021, with Banca Nazionale del Lavoro S.p.A., as lender, in an aggregate principal amount of €100 million and maturing on October 28, 2024 (the "**BNL Loan Agreement**");

- loan agreement, dated February 26, 2019, as amended by amendment dated May 21, 2021, with Bank of America Merrill Lynch Designated Activity Company, as lender, in an aggregate principal amount of €100 million and maturing on May 21, 2025 (the "**Bank of America Merrill Lynch Loan Agreement**" and, together with the Intesa Sanpaolo Loan Agreement and the BNL Loan Agreement, the "**Bilateral Loan Agreements**"); and

- a euro-denominated facility agreement, dated as of July 6, 2022, and backed by a guarantee of SACE S.p.A., in accordance with Article 1, subsection 1 of Decree-Law No. 23 of April 8, 2020, as subsequently amended

and supplemented from time to time (the "**SACE Guarantee**"), which in turn is backed by a counter-guarantee by the Republic of Italy – and is deemed as a public support intervention for the development of production activities within the scope of Legislative Decree No. 123 dated March 31, 1998 (*Provisions for the rationalization of public support interventions for companies pursuant to Article 4, paragraph 4, letter c, of Law No. 59 dated March 15, 1997*) – (as amended, restated, supplemented or otherwise modified from time to time the "**Facility Agreement Guaranteed by SACE**") providing for a term loan facility in an aggregate principal amount of €2,000 million maturing on June 30, 2028 and on which TIM is required to make scheduled quarterly amortization payments as per the Amortization Plan (as set out in the Facility Agreement Guaranteed by SACE), each equal to 8.33% of the term loan principal amount, starting from September 30, 2025.

The Term Loan Agreements contain certain customary representations and warranties, affirmative covenants and events of default (including, among others, an event of default upon a change of control and in case of borrower illegality). Identification of the occurrence of a change of control and the applicable consequences, including, at the discretion of the lenders, the establishment of guarantees or the early repayment of the amount paid in cash or as shares and the cancellation of the commitment in the absence of agreements to the contrary, are specifically covered in the individual Term Loan Agreements.

The Term Loan Agreements contain certain negative covenants which, among other things and subject to certain significant exceptions and qualifications, limit TIM's ability to (i) create encumbrances, (ii) materially change the nature of TIM's business and, (iii) engage in mergers or consolidations with entities outside TIM Group.

The Bilateral Loan Agreements do not contain any financial covenants. The Facility Agreement Guaranteed by SACE includes a financial maintenance covenant based on the TIM Group's Leverage Ratio (as defined in the Facility Agreement Guaranteed by SACE).

As of December 31, 2023, the Term Loans have been drawn in full.

EIB Loans

From time to time, TIM receives term loans from the European Investment Bank ("**EIB**") for financing specific infrastructure development projects. As of December 31, 2023, TIM had outstanding borrowings under:

- a loan agreement dated as of November 25, 2019 in an aggregate principal amount of €350 million (the "**2019 EIB Loan**"), as increased pursuant to an incremental loan agreement dated as of May 19, 2021, in an additional aggregate principal amount of €120 million (the "**2021 Incremental EIB Loan**");

- a loan agreement dated as of May 19, 2021, in an aggregate principal amount of €230 million (the "**2021 EIB Loan**"); and

- a loan agreement dated as of May 5, 2023, in an aggregate principal amount of €360 million, which is backed by a 60% SACE Guarantee (the "**2023 EIB Loan**" and, together with the 2019 EIB Loan, the 2021 Incremental EIB Loan and the 2021 EIB Loan, the "**EIB Loans**").

The 2019 EIB Loan, the 2021 Incremental EIB Loan and the 2021 EIB Loan are partially secured.

As of December 31, 2023, each of the EIB Loans has been fully drawn.

The EIB Loans contain customary mandatory redemption events, such as change of laws or illegality, and certain market standard covenants each subject to certain significant exceptions and qualifications, including the undertaking not to pledge TIM's assets as collateral for loans (negative pledge), the undertaking not to change TIM's business purpose and customary information undertakings. Additionally, the EIB Loans also contain, among others, the following covenants, undertakings and mandatory redemption events:

- In the event of any change of control (as defined under the EIB Loans) EIB has the right to cancel the commitments and/or request the immediate repayment of all outstanding loans. TIM has undertaken to inform EIB of any change of control that is due to occur;

- TIM has undertaken to notify EIB of any merger or de-merger transactions (except for transactions among the members of the TIM Group). Following consultations with TIM, EIB has the right to cancel the commitments and/or request the immediate repayment of all outstanding loans, if such transaction is deemed to be prejudicial to EIB's credit position or to the Projects; and

- Subject to certain exceptions provided under the EIB Loans, TIM has undertaken not to sell, transfer or confer assets or business segments.

- TIM has undertaken to ensure that, for the entire duration of the EIB Loans, the total financial debt of TIM Group (excluding TIM), unless the debt is fully and irrevocably guaranteed by TIM, is lower than 35% of the TIM Group's total financial debt; and

- *"Inclusion clause,"* under which, subject to certain exceptions relating to subsidized loans (*finanziamenti agevolati*) as defined under the EIB Loans, TIM has agreed that if it is required to comply with financial covenants pursuant to other facilities agreement that are not present or are more restrictive and/or favorable than those granted to EIB, EIB will have the right, if it considers such covenants prejudicial, to (i) request the provision of additional guarantees, (ii) agree additional amendments to the EIB Loans to incorporate such covenant into the EIB Loans or (iii) agree to any alternative solution.

- *Network event*: in the event of the disposal of the entire fixed network or a substantial part of it (in any case, more than half in quantitative terms) to third parties not controlled by the TIM Group, or in the event of disposal of the controlling interest in the company in which the fixed network or a substantial part of it has previously been transferred, TIM has undertaken to immediately notify EIB, which, following consultations with TIM, may then opt to demand additional guarantees or amendments to the EIB Loans or to agree to an alternative solution. If such requests are not satisfied within 30 days, EIB has the right to cancel the commitments and/or request the immediate repayment of all outstanding loans.

FiberCop Term Loan

On December 23, 2021, FiberCop, as borrower, entered into a euro-denominated facility agreement with, *inter alios*, certain lenders party thereto and UniCredit S.p.A., as agent, (the "**FiberCop Term Loan Agreement**") providing for a term loan facility in an aggregate principal amount of €1,500 million (the "**FiberCop Term Loan**"). As of the date of this Exchange Offer Memorandum, the FiberCop Term Loan has been drawn in full.

The FiberCop Term Loan will mature five years after December 23, 2021. FiberCop is required to repay the FiberCop Term Loan in full on maturity.

The FiberCop Term Loan is not supported by guarantees and the obligations of FiberCop under the FiberCop Term Loan Agreement are unsecured, ranking *pari passu* with the claims of all its unsecured and unsubordinated creditors, except for obligations mandatorily preferred by law.

The FiberCop Term Loan Agreement includes a financial maintenance covenant based on FiberCop's Leverage Ratio (as defined in the FiberCop Term Loan Agreement). The FiberCop Term Loan Agreement contains certain customary representations and warranties, affirmative covenants, certain negative covenants, events of default and mandatory prepayment events, such as change of control and sale of assets (each as defined in the FiberCop Term Loan Agreement). If an event of default occurs, the lenders under the FiberCop Term Loan will be entitled to take various actions, including the acceleration of amounts due under the FiberCop Term Loan.

In connection with FiberCop Term Loan, FiberCop is in the process of submitting a waiver request to the agent to obtain the lenders' consent to waive any actual or potential breach of any clause of the FiberCop Term Loan, or any event of default or mandatory early redemption provisions set out thereunder, that would otherwise arise as a result of the completion of the Acquisition and to undertake not to exercise any rights and remedies they may have under the

FiberCop Term Loan on completion of the Acquisition, and waive the provisions in terms of mandatory early redemption under the FiberCop Term Loan that might arise as a result of the completion of the Acquisition, with the effect that any amount under the FiberCop Term Loan that would immediately be payable by FiberCop under the FiberCop Term Loan will not automatically become due and payable on the closing of the Acquisition, *provided* that FiberCop will repay any such amounts due in full, together with any accrued interest, within 60 days of the Acquisition Closing Date. In the event that the waiver request is not granted, it is understood that Optics will repay the loan promptly in connection with the completion of the Acquisition. Any necessary funds to proceed with such repayment are expected to be made available to FiberCop by Optics on the basis of drawings to be made under the Senior Facilities Agreement and Senior Bridge Facility Agreement.

TIM S.A. Loans

As of December 31, 2023, TIM S.A. has entered into the following loan agreements (together, the "**TIM S.A. Loan Agreements**" and the loans borrowed thereunder, collectively, the "**TIM S.A. Loans**"):

- loan agreement, dated as of December 23, 2015, between Finnish Export Credit as lender, KfW IPEX as facility agent, TIM Celular (which has been merged into TIM S.A.) as borrower and TIM Participações S.A. (which has also been merged into TIM S.A.) as guarantor, in an aggregate principal amount of $150 million (the "**Finnish Export Credit Loan Agreement**"). After the merge of TIM Celular and TIM Participações S.A. into TIM S.A., the loan agreement has only TIM S.A. as borrower and no guarantor. The loan agreement is divided in three tranches of up to $50 million to be disbursed in 2016, 2017 and 2018. On April 20, 2016, the first tranche of $45 million was disbursed. The second tranche of $48 million was disbursed on April 20, 2017 and the third tranche of $40 million was disbursed on September 17, 2018. As of December 31, 2023, the total outstanding amount under this credit agreement, converted from U.S. dollars and including accrued interest, was BRL 125 million and there will be no more disbursements. The agreements mature on January 2, 2024, December 31, 2024 and December 30, 2025, respectively;

- credit agreement, dated as of May 2, 2018, between Banco Nacional de Desenvolvimento Econômico e Social ("**BNDES**") as lender and TIM Celular (which has been merged into TIM S.A.) as borrower, an aggregate principal amount of BRL 1,500 million, comprising three credit lines with equal conditions of interest rates and tenors: (a) Credit Line A, in an aggregate principal amount of BRL 1,090 million and eight years tenor; (b) Credit Line B, in an aggregate principal amount of BRL 390 million and eight years tenor; and (c) Credit Line C, in an aggregate principal amount of BRL 20 million and eight years tenor (the "**BNDES Loan Agreement**"). On November 4, 2022, TIM S.A. drew down a total amount of BRL 311.4 million under the BNDES Credit Line A and BRL 7.8 million under the BNDES Credit Line C. In March 2019, the Credit Line B, was substituted by a new credit agreement with different conditions with Agência Especial de Financiamento Industrial S.A. ("**FINAME**") (listed below). As of December 31, 2023, the total amount under this credit agreement was BRL 188 million;

- credit agreement, dated as of March 20, 2019, between FINAME, an entity within the BNDES system, as lender and TIM S.A. as borrower, in an aggregate principal amount of BRL 390 million (the "**FINAME Loan Agreement**"). TIM S.A. has drawdown a total amount of BRL 390 million under the credit line. This agreement replaces the Credit Line B of the BNDES Loan Agreement with better interest rate and maturity conditions and has a maturity up to 10 years. There were no additional costs to sign this loan and was fully disbursed in November 2021. As of December 31, 2023, the total outstanding amount under this credit agreement was BRL 392 million;

- credit agreement, dated as of January 31, 2020, between Banco do Nordeste do Brasil S.A. as lender and TIM S.A. as borrower, in an aggregate principal amount of BRL 752.5 million, that is secured by a bank guarantee and certain receivables (the "**BNB Loan Agreement**"). The credit agreement has a total term of eight years, with three years of grace period and five years of amortization period and is divided in two tranches of BRL325 million and BRL 427 million, respectively. On May 10, 2022, TIM S.A. drew down a total amount of BRL 249 million under this credit line. As of December 31, 2023, the total outstanding amount under this credit agreement was BRL 206 million;

- credit agreement, dated as of April 1, 2021, between BNP Paribas as lender and TIM S.A. as borrower, in an aggregate principal amount of $87.7 million and term of 2.8 years. (the "**BNP Loan Agreement**"). Disbursement occurred on April 8, 2021. As of December 31, 2023, the total outstanding amount under this credit agreement was BRL 515 million; and

- credit agreement, dated as of April 1, 2021, between The Bank of Nova Scotia as lender and TIM S.A. as borrower, in an aggregate principal amount of $100 million and term of three years (the "**2021 BNS Loan Agreement**"). Disbursement occurred on April 22, 2021. As of December 31, 2023, the total outstanding amount under this credit agreement was BRL 486 million.

TIM Group Bonds

* Notes issued under the EMTN Programme.

\# Includes €850 million aggregate principal amount of EUR Original Initial February 2028 Notes (as defined below) issued on January 27, 2023 and €400 million aggregate principal amount of EUR Original Additional February 2028 Notes (as defined below) issued on April 12, 2023.

(#) Includes €750 million aggregate principal amount of EUR Original Initial July 2028 Notes (as defined below) issued on July 20, 2023 and €750 million aggregate principal amount of EUR Original Additional July 2028 Notes (as defined below) issued on September 28, 2023.

(1) The exchange rate used for the translation of BRL into Euros (expressed in terms of units of BRL per €1) is 5.34964; the exchange rate used for the translation of U.S. Dollar into Euro (expressed in terms of units of U.S. Dollars per €1) is 1.1050.

(2) Initial amount €750,000,000 repurchased for €300,000,000 on July 20, 2023.

(3) Initial amount €1,250,000,000 repurchased for €300,014,000.00 on July 20, 2023.

(4) Weighted average issue price for bonds issued with multiple tranches.

(5) Original Notes which will be offered as part of the Exchange Offers.

(6) Repaid in full at maturity on January 19, 2024.

(7) Repaid in full at maturity on April 11, 2024.

The notes issued by TIM, Telecom Italia Finance and Telecom ltalia Capital do not contain any financial covenants or clauses that result in the automatic early redemption of the bonds in relation to events other than the insolvency of the TIM Group. Furthermore, the repayment of the notes and the payment of interest thereon are not covered by any specific guarantees nor are there commitments provided relating to the assumption of future guarantees, except for the full and unconditional guarantees provided by TIM for the bonds issued by Telecom Italia Finance and Telecom Italia Capital, as further detailed below.

TIM Bonds

Existing Notes

On May 30, 2014, TIM issued $1,500 million aggregate principal amount of 5.303% senior notes due 2024 (the "**2024 Dollar Notes**"). The 2024 Dollar Notes mature on May 30, 2024. Interest on the 2024 Dollar Notes is payable semi-annually in cash on each May 30, and November 30, commencing November 30, 2014. The 2024 Dollar Notes are listed on the Irish Stock Exchange.

On January 27, 2023, TIM issued €850 million aggregate principal amount of 6.875% senior notes due on February 2028 (the "**EUR Original Initial February 2028 Notes**"). On April 12, 2023, TIM issued €400 million aggregate principal amount of additional senior notes to be consolidated and form a single series with the Original February 2028 Euro Notes (the "**EUR Original Additional February 2028 Notes**," together with the Original February 2028 Euro Notes, the "**EUR Original February 2028 Notes**"). The 2028 February Euro Notes mature on February 15, 2028. Interest on the 2028 February Euro Notes is payable semi-annually on each February 15, and August 15, commencing August 15, 2023. The 2028 February Euro Notes are listed on the Exchange.

On July 20, 2023, TIM issued €750 million aggregate principal amount of 7.875% notes due on July 2028 (the "**EUR Original Initial July 2028 Notes**"). On September 28, 2023, TIM issued €750 million aggregate principal amount of additional senior notes to be consolidated and form a single series with the Original July 2028 Euro Notes (the "**EUR Original Additional July 2028 Notes**," together with the Original July 2028 Euro Notes, the "**EUR Original July 2028 Notes**" and, together with the 2024 Dollar Notes, the EUR Original February 2028 Notes, the "**Existing Notes**"). The EUR Original July 2028 Notes will mature on July 31, 2028. Interest on the EUR Original July 2028 Notes is payable semi-annually on each January 31, and July 31, commencing January 31, 2024. The EUR Original July 2028 Notes are listed on the Exchange.

The indenture governing the 2024 Dollar Notes and the trust deeds governing the EUR Original February 2028 Notes and the EUR Original July 2028 Notes contain certain covenants, agreements and events of default, including limitations on the ability of TIM to (i) create liens; and (ii) engage in mergers or consolidations, in each case subject to certain exceptions.

The Existing Notes: are general unsecured obligations of TIM; (b) rank *pari passu* in right of payment to any existing and future with all existing and future senior indebtedness of TIM; (c) are senior in right of payment to all future subordinated indebtedness of TIM; (d) are effectively subordinated to all existing and future secured indebtedness of TIM to the extent of the value of the assets securing such indebtedness; and (c) are structurally subordinated to all existing and future indebtedness and other claims and liabilities, including preferred stock, of subsidiaries of TIM.

The covenants of the Existing Notes are substantially consistent with the covenants applicable to the Notes, as further described in "*Conditions of the Notes*" included elsewhere in this Exchange Offer Memorandum.

The terms and conditions of the Existing Notes contain a provision restricting the ability of TIM to create security interests in respect of certain indebtedness and to guarantee certain secured indebtedness of its subsidiaries, as further described in condition 3.1 (*Covenants—Restrictions on Security Interests*) of the terms and conditions of the notes of the EUR Original February 2028 Notes and of the EUR Original July 2028 Notes.

The terms and conditions of the Existing Notes also contain provisions relating to certain events constituting a "Change of Control" or a "Network Event" in relation to TIM. Upon the occurrence of an event constituting a Change of Control or a Network Event (each as defined in Condition 6.5 (Redemption at the Option of the Holders on the Occurrence of a Change of Control and Network Event) of the terms and conditions of the EUR Original February 2028 Notes and of the EUR Original July 2028 Notes), each holder of the Existing Notes shall have the option to require TIM to redeem (or, at TIM's option, to purchase) the Existing Notes held by it (in whole but not in part) at 101% of their principal amount together with interest accrued to (but excluding) the date of redemption.

EMTN Programme

The TIM Group has established several Euro Medium Term Note Programmes, supplemented by supplements over the years, (as renewed from time to time, the "**EMTN Programme**") including, among others:

- prospectus dated February 17, 2005 (the "**2005 Long-Term Prospectus**");
- prospectus dated June 30, 2015, as supplemented by the supplement dated January 4, 2016 and May 17, 2016, (collectively, the "**2015 Prospectus**");
- prospectus dated July 8, 2016, as supplemented by the supplements dated July 8, 2016, September 12, 2016 and January 4, 2017, (collectively, the "**2016 Prospectus**");
- prospectus dated July 13, 2016 as supplemented by the supplement dated October 4, 2017, (collectively, the "**2017 Prospectus**");
- prospectus dated June 8, 2018, as supplemented by the supplements dated October 5, 2018, December 10, 2018, January 4, 2019 and April 4, 2019, (collectively, the "**2018 Prospectus**"); and
- prospectus dated June 18, 2020, as supplemented by the supplements dated September 15, 2020 and January 8, 2021, (collectively, the "**2020 Prospectus**"), (collectively, the "**Prospectuses**").

TIM issues notes under the EMTN Programme from time to time, as described below (the "**EMTNs**"). The EMTN Programme permits issuance of notes in any currency.

The EMTNs: (a) are general unsecured obligations of the Issuer; (ii) rank *pari passu* in right of payment to any existing and future with all existing and future senior indebtedness of TIM; (iii) are senior in right of payment to all future subordinated indebtedness of the Issuer; (iv) are effectively subordinated to all existing and future secured indebtedness of TIM to the extent of the value of the assets securing such indebtedness; and (v) are structurally subordinated to all existing and future indebtedness and other claims and liabilities, including preferred stock, of subsidiaries of TIM.

The Prospectuses also contains certain covenants, agreements and events of default, including, subject to certain significant exceptions and qualifications, limitations on the ability of TIM to: (i) create or permit to subsist Security Interest, other than Permitted Encumbrances, or secure Capital Market Indebtedness (each, as defined in the respective Prospectuses); (ii) sell or lease all or substantially all of its assets; (iii) buy or lease all or substantially all of the assets of another company; (iii) engage in mergers or consolidations, in each case subject to certain exceptions. The EMTNs are governed by the laws of England and Wales.

2024 3.625% Euro Notes

On January 20, 2016, TIM issued €750 million aggregate principal amount of notes under the 2015 Prospectus, at an issue price of 99.632% (the "**2024 3.625% Euro Notes**"). The 2024 3.625% Euro Notes matured and were redeemed in full on January 19, 2024. Interest on the 2024 3.625% Euro Notes was payable annually on January 19, commencing January 19, 2017. The 2024 3.625% Euro Notes were listed on the Exchange.

On July 20, 2023, TIM repurchased for cash €300 million of the 2024 3.625% Euro Notes in accordance with the terms and conditions of the tender offer memorandum, dated July 11, 2023.

2024 4% Euro Notes

On January 11, 2019, TIM issued €1,250 million aggregate principal amount of notes under the 2018 Prospectus, at an issue price of 99.436% (the "**2024 4% Euro Notes**"). The 2024 4% Euro Notes matured and have been repaid on April 11, 2024. Interest on the 2024 4% Euro Notes is payable annually on April 11, commencing April 11, 2019. The 2024 4% Euro Notes are listed on the Exchange.

On July 20, 2023, TIM repurchased for cash €300.014 million of the 2024 4% Euro Notes in accordance with the terms and conditions of the tender offer memorandum, dated July 11, 2023.

2025 2.75% Euro Notes

On April 15, 2019, TIM issued €1,000 million aggregate principal amount of notes under the 2018 Prospectus, at an issue price of 99.320% (the "**2025 2.75% Euro Notes**"). The 2025 2.75% Euro Notes will mature on April 15, 2025. Interest on the 2025 2.75% Euro Notes is payable annually on April 15, commencing April 15, 2020. The 2025 2.75% Euro Notes are listed on the Exchange.

2025 3% Euro Notes

On September 30, 2016, TIM issued €1,000 million aggregate principal amount of notes under the 2016 Prospectus, at an issue price of 99.806% (the "**2025 3% Euro Notes**"). The 2025 3.000% Euro Notes will mature on September 30, 2025. Interest on the 2025 3% Euro Notes is payable annually on September 30, commencing September 30, 2017. The 2025 3% Euro Notes are listed on the Exchange.

2026 2.875% Euro Notes

On June 28, 2018, TIM issued €750 million aggregate principal amount of notes under the 2018 Prospectus, at an issue price of 100% (the "**2026 2.875% Euro Notes**"). The 2026 2.875% Euro Notes will mature on January 28, 2026. Interest on the 2026 2.875% Euro Notes is payable annually on January 28, commencing January 28, 2019. The 2026 2.875% Euro Notes are listed on the Exchange.

2026 3.625% Euro Notes

On May 25, 2016, TIM issued €1,000 million aggregate principal amount of notes under the 2015 Prospectus, at an issue price of 100% (the "**2026 3.625% Euro Notes**"). The 2026 3.625% Euro Notes will mature on May 25, 2026. Interest on the 2026 3.625% Euro Notes is payable annually on May 25, commencing May 25, 2017. The 2026 3.625% Euro Notes are listed on the Exchange.

2027 Euro Notes

On October 12, 2017, TIM issued €1,250 million aggregate principal amount of notes under the 2017 Prospectus, at an issue price of 99.185% (the "**2027 Euro Notes**"). The 2027 Euro Notes will mature on October 12, 2027. Interest on the 2027 Euro Notes is payable annually on October 12, commencing October 12, 2018. The 2027 Euro Notes are listed on the Exchange.

2029 Euro Notes

On January 18, 2021, TIM issued €1,000 million aggregate principal amount of notes under the 2020 Prospectus, at an issue price of 99.074% (the "**2029 Euro Notes**"). The 2029 Euro Notes will mature on January 18, 2029. Interest on the 2029 Euro Notes is payable annually on January 18, commencing January 18, 2022. These 2029 Euro Notes are listed on the Exchange. The net proceeds from the issue of the 2029 Euro Notes were committed to be used to finance or refinance, in whole or in part, existing or new eligible green and social projects in accordance with TIM Group Sustainability Financing Framework.

2055 Euro Notes

On March 17, 2005, TIM issued €850 million aggregate principal amount of notes under the 2005 Long-Term Prospectus, at an issue price of 99.667% (the "**2055 Euro Notes**"). The 2055 Euro Notes will mature on March 17, 2055. Interest on the 2055 Euro Notes is payable annually on March 17. The 2055 Euro Notes are listed on the Exchange.

TICAP Bonds

As of December 31, 2023, the outstanding notes issued by Telecom Italia Capital and guaranteed by TIM comprise: (a) $1,000 million aggregate principal amount of 6.375% senior guaranteed notes due 2033 (the "**2033 TICAP Bonds**"); (b) $1,000 million aggregate principal amount of 6.000% senior guaranteed notes due 2034 (the "**2034 TICAP Bonds**"); (c) $1,000 million aggregate principal amount of 7.200% senior guaranteed notes due 2036 (the "**2036 TICAP Bonds**"); and (d) $1,000 million aggregate principal amount of 7.721% senior guaranteed notes due 2038 (the "**2038 TICAP Bonds**"). The 2033 TICAP Bonds, 2034 TICAP Bonds, 2036 TICAP Bonds and the 2038 TICAP Bonds are collectively referred to herein as the "**TICAP Bonds**."

The TICAP Bonds are senior unsecured obligations of Telecom Italia Capital and are guaranteed on a senior basis by TIM.

The indentures governing the TICAP Bonds contain certain covenants, agreements and events of default, including limitations on the ability of TIM and Telecom Italia Capital to (i) create encumbrances; and (ii) engage in mergers or consolidations, in each case subject to certain exceptions. The TICAP Bonds are governed by the laws of the State of New York.

TIF Bonds

As of December 31, 2023, the outstanding notes issued by Telecom Italia Finance and guaranteed by TIM comprise of $1,015 million aggregate principal amount of 7.750% senior guaranteed notes due 2033 (the "**TIF Bonds**"). The TIF Bonds were issued from time to time under: (i) Euro Medium Term Note Programme established under prospectus dated February 17, 2005, as supplemented by supplement dated June 28, 2005 (collectively the "**2005 TIF Prospectus**"); and (ii) Euro Medium Term Note Programme established under offering circular dated May 14, 2002 (which had replaced offering circular dated June 8, 2001), as supplemented by supplements dated January 23, 2003 and January 31, 2003 issued by Olivetti S.p.A., Olivetti Finance N.V. and Olivetti International Finance N.V. (collectively, the "**Olivetti Prospectus**"). Telecom Italia Finance had assumed the liabilities of Olivetti Finance N.V. and Olivetti International Finance N.V. pursuant to corporate reorganization in 2004.

The TIF Bonds are senior unsecured obligations of Telecom Italia Finance and are guaranteed on a senior basis by TIM.

The 2005 TIF Prospectus governing the TIF Bonds contain certain covenants, agreements and events of default, including, subject to certain significant exceptions and qualifications, limitations on the ability of TIM and Telecom Italia Finance to (i) create or permit to subsist Security Interest, other than Permitted Encumbrances, or secure Capital Market Indebtedness (each, as defined in the 2005 TIF Prospectus); (ii) sell or lease all or substantially all of its assets; (iii) buy or lease all or substantially all of the assets of another company; and (iii) engage in mergers or consolidations, in each case subject to certain exceptions. The Olivetti Prospectus governing the TIF Bonds contain certain covenants, agreements and events of default, including, subject to certain significant exceptions and qualifications, limitations on

the ability of TIM and Telecom Italia Finance to create or permit to subsist Security Interest (as defined in the Olivetti Prospectus). The TIF Bonds are governed by the laws of England and Wales.

TIM S.A. Bond

On June 15, 2021, TIM S.A. issued sustainability-linked simple and unsubordinated, not convertible into shares, debentures (*Instrumento Particular de Escritura de Emissão de Debêntures Simples, da Espécie Quirografária, não Conversíveis em Ações*) in an aggregate principal amount of BRL 1,600 million through a public placement, with Pentágono Distribuidora de Títulos e Valores Mobiliários S.A., acting as the fiduciary agent (the "**TIM S.A Bonds**"). The TIM S.A. Bonds will mature on June 16, 2028.

The indenture governing the TIM S.A. Bonds includes certain ESG commitments by TIM S.A., including: (i) TIM S.A. establishing a 4G presence in 100% of Brazilian municipalities by December 2023; and (ii) TIM S.A. increasing by 80% or more the eco-efficiency in data traffic (bit/joule) by December 2025, compared to the base year of 2019.

TIM Brasil Serviços e Participações S.A Bond

On July 25, 2023, TIM Brasil Serviços e Participações S.A. issued simple and unsubordinated debentures, not convertible into shares, (*Instrumento Particular de Escritura de Emissão de Debêntures Simples, da Espécie Quirografária, não Conversíveis em Ações, com garantia real*) in an aggregate principal amount of BRL 5,000 million through a public placement, with Pentágono Distribuidora de Títulos e Valores Mobiliários S.A., acting as the fiduciary agent (the "**TIM Brasil Serviços e Participações S.A. Bond**"). The TIM Brasil Serviços e Participações S.A. Bonds will mature on July 25, 2028. The debentures are non-convertible and unsubordinated.

Exchange Rate Risk Hedging

As of December 31, 2023, the exchange rate risk of the Existing Notes, EMTNs, TICAP Bonds and TIF Bonds denominated in currencies other than Euro was hedged in full by the TIM Group. Details of the hedges are indicated in the table below:

Denomination Currency	Nominal Amount in Denomination Currency	End of Period	Rate Applied	Interest Period	Hedging of Notional Amount in euro (million)	Hedging of rate in euro
USD	1,500	May-2024	5.303%	Semi-annual	1,321	4.180%
USD	1,000	Nov-2033	6.375%	Semi-annual	849	5.994%
USD	1,000	Sep-2034	6.000%	Semi-annual	794	4.332%
USD	1,000	Jul-2036	7.200%	Semi-annual	791	5.884%
USD	1,000	Jun-2038	7.721%	Semi-annual	645	7.451%

DESCRIPTION OF CERTAIN OTHER FINANCING ARRANGEMENTS OF THE OPTICS GROUP

The following contains a summary of the terms of the Optics' Group key items of indebtedness and is presented, unless otherwise indicated, as of the date hereof. It does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the underlying documents. Capitalized terms not otherwise defined in this section or in this Exchange Offer Memorandum shall, unless the context otherwise requires, have the same meanings set out in the underlying debt documents, as applicable.

Senior Facilities Agreement and Bridge Facility Agreement

Overview

On December 19, 2023, Optics Bidco S.p.A. (the "**Company**") entered into a senior secured term and revolving facilities agreement between, among others, Banco BPM S.p.A., Bank of America Europe Designated Activity Company, Banco Bilbao Vizcaya Argentaria S.A., Milan Branch, BNP Paribas, Italian Branch, BPER Banca S.p.A., Caixabank, S.A., Succursale in Italia, CIBC Capital Markets (Europe) S.A., Citibank, N.A. London Branch, Crédit Agricole Corporate and Investment Bank, Milan Branch, Deutsche Bank Aktiengesellschaft, Deutsche Bank Luxembourg S.A., J.P. Morgan SE, Mediobanca – Banca di Credito Finanziario S.p.A., Mizuho Bank, Ltd., Morgan Stanley Bank AG, MUFG Bank, Ltd. - Milano Branch, National Westminster Bank Plc, Natixis S.A. – Milan Branch, SMBC Bank EU AG Milan Branch, Société Générale and UniCredit S.p.A. as mandated lead arrangers and UniCredit S.p.A. as facility agent and security agent (the "**Facility Agent**" and "**Security Agent**") (as amended pursuant to an amendment and restatement agreement dated April 8, 2024, the "**Senior Facilities Agreement**").

Also on December 19, 2023, the Company entered into a senior bridge facility agreement between, among others, Banco BPM S.p.A., BNP Paribas, Italian Branch, BPER Banca S.p.A., Crédit Agricole Corporate and Investment Bank, Milan Branch, J.P. Morgan SE, Mizuho Bank, Ltd., MUFG Bank, Ltd. - Milano Branch, Natixis S.A. – Milan Branch, SMBC Bank EU AG Milan Branch, Société Générale and UniCredit S.p.A. as mandated lead arrangers, the Facility Agent and the Security Agent (as amended pursuant to an amendment and restatement agreement dated April 8, 2024, the "**Senior Bridge Facility Agreement**").

The Senior Facilities Agreement provides a euro term loan facility (the "**TLB**") to the Company as original borrower (the "**Borrower**") and a revolving facility (the "**RCF**," and together with the TLB, the "**Credit Facilities**" or the "**Facilities**") to the Company as Borrower and original guarantor. The Senior Bridge Facility Agreement provides a euro term loan facility (the "**Bridge**") to the Company as Borrower and original guarantor. The total commitments under the TLB and the Bridge are equal in aggregate to €8.5 billion (which, as at the signing date of the Senior Facilities Agreement and the Senior Bridge Facility Agreement, comprised of €5 billion under the TLB and €3.5 billion under the Bridge. The total commitments under the RCF are equal to €2 billion. The Senior Facilities Agreement and the Senior Bridge Facility Agreement contain the ability for the Company (prior to the Push-Down Merger and, following the Push-Down Merger, any member of the Group) to incur indebtedness (which may be in the form of loans, bonds or notes) for the purpose of directly or indirectly, or otherwise in connection with or pursuant to, refinancing or replacing of all or any portion of the TLB, the Bridge, the RCF, any additional facility incurred under the Senior Facilities Agreement and/or any other permitted refinancing from time to time, in each case, including any indebtedness incurred for the purpose of the payment of principal, interest, fees, discounts, expenses, commissions, swap breakage costs, premium or other similar amounts payable under or in connection with the permitted refinancing and any amount of the Bridge, the TLB, RCF, any additional facility incurred under the Senior Facilities Agreement and/or any other permitted refinancing, as the case may be, being refinanced or replaced and any fees, costs and expenses incurred in connection therewith, subject to certain conditions set out in the Senior Facilities Agreement. On January 17, 2024, the Company exercised an option in relation to the Senior Facilities Agreement and the Senior Bridge Facility Agreement to decrease the TLB and increase the Bridge by an amount equal to €1 billion (the "**Pre-Syndication Toggle**"), such that, as at the date of this Exchange Offer Memorandum, the total commitments under the TLB are equal to €4 billion and the total commitments under the Bridge are equal to €4.5 billion following the exercise of the Pre-Syndication Toggle.

The Senior Facilities Agreement and the Senior Bridge Facility Agreement include provisions relating to a cancellation of commitments under the TLB and/or the Bridge in connection with any exchange offer, debt exchange, liability management exercise, consent process or other similar transaction undertaken by TIM and/or the Group prior to the

closing date which results in the incurrence by the Group of financial indebtedness as a result of an exchange, transfer or assumption of indebtedness incurred by TIM or any of its affiliates (other than the Group) (a "**Liability Management Exercise**"). The Company shall cancel, or offer to cancel, the Senior Bridge Facility and the TLB by an amount equal to the principal amount of financial indebtedness incurred or to be incurred in the context of the Liability Management Exercise. The Company shall promptly (and in any event within 10 business days) of becoming aware of the occurrence of the Liability Management Exercise Unconditional Date, notify the Facility Agent of the occurrence of such Liability Management Exercise Unconditional Date, the LM Amount, and the amount of each of the TLB and the Bridge that it proposes to cancel in order to ensure that the TLB and the Bridge are in aggregate cancelled in an amount not less than the LM Amount (subject to the opt-out described below).

The Company may also offer TLB Lenders and Bridge Lenders the option of electing that such Lenders' TLB commitments and/or Bridge commitments (as applicable) are not cancelled in the amount of their pro-rata share. If the relevant TLB Lender and/or Bridge Lender (as applicable) exercises such opt-out option and such opt-out option causes the relevant leverage ratio as at the first utilization date to exceed the Lock-Up Adjusted Leverage Ratio, (as projected by the Company in good faith), the amount of the opt-out option of the TLB Lenders and/or the Bridge Lenders (as applicable) shall be reduced to the extent required such that the relevant leverage ratio as of the first utilization date (as projected by the Company in good faith on a pro forma basis taking into account such cancellation and assuming the remaining commitments under the TLB and the Bridge are drawn in full on the first utilization date) shall not exceed the Lock-Up Adjusted Leverage Ratio. The "**Lock-Up Adjusted Leverage Ratio**" means the ratio of total net debt on the last day of the most recently ended measurement period to adjusted reported EBITDA for that measurement period, calculated on a pro forma basis, not being greater than 7.5:1.

Senior Facilities Agreement

Purpose

Borrowings funded under the TLB have been applied towards (directly or indirectly):

(a) financing or refinancing any amounts payable under or in connection with (i) the contribution of the network business of TIM S.p.A. to FiberCop S.p.A. ("**NetCo**") (the "**Contribution**") and (ii) the acquisition by the Company of the shares in NetCo, (iii) the refinancing of certain indebtedness of the Company and its subsidiaries (the "**Group**"), of NetCo and its subsidiaries (the "**NetCo Group**") and (iv) the other transactions contemplated by the transaction documents (in each case including the financing thereof) (the "**Transaction**");

(b) refinancing (including by way of intercompany loan) any indebtedness of the Group (together with any related costs and expenses), including any indebtedness owing to TIM S.p.A. and existing indebtedness of NetCo;

(c) financing or refinancing all transaction costs in connection with the Transaction; and/or

(d) financing or refinancing the general corporate purposes and/or working capital requirements of the Group, *provided* that the TLB may only be used to fund dividends or distributions to the shareholders of the Borrower or for purposes described in this paragraph (d) to the extent there are amounts available after refinancing the existing indebtedness of the Group.

Borrowings under the RCF may be applied towards (directly or indirectly) the general corporate and working capital purposes of the Group (including, for the avoidance of doubt, capital expenditure, acquisitions, guarantee or bonding requirements, investments and taxes). The RCF may be drawn in cash or letter of credit and can be made available by lenders thereunder way of bilateral ancillary facility and fronted ancillary facilities. The RCF is available until the date falling one month before the maturity date of the RCF (being 60 months after the first utilization date under the Senior Facilities Agreement).

Repayments and prepayments

Repayment of the TLB is due on the date falling 60 months after the first utilization date under the Senior Facilities Agreement.

Repayment of loans drawn under the RCF and related interest payments will be due and payable at the end of the interest period for each loan. The applicable interest period is selected in the relevant utilization request or selection notice and will either be one, three or six months subject to certain exceptions.

If it becomes unlawful in any applicable jurisdiction for a lender to perform its obligations under the Senior Facilities Agreement, such lender under the Senior Facilities Agreement will have the right to cancel its commitments. Each Borrower shall repay the relevant lender's participation in any loans made to that Borrower on the date specified by the relevant lender in the notice delivered to the Company (being no earlier than the last Business Day of any applicable grace period permitted by law).

On a change of control or sale of all or substantially all of the assets of the Group (taken as a whole), a lender may, by notice to the Company to be received not later than the date that is 30 days after the date on which the Agent was notified of such event, cancel all of its commitments and declare all outstanding amounts owed to it due and payable within 15 Business Days of the notice.

In addition, the Senior Facilities Agreement requires that, in respect of each financial half-year of the Company starting from the seventh full financial half-year occurring after the first utilization date under the TLB, a mandatory prepayment of loans under the TLB is made in an amount equal to a percentage of excess cash flow (net of a minimum threshold amount and the amount of any voluntary prepayments made during such financial year and amounts reinvested in the business of the Group within certain time limits and certain other permitted uses of such amounts).

Additional mandatory prepayment provisions include mandatory prepayment of the net proceeds received in cash in respect of the net proceeds of (i) disposals; (ii) insurance claims; and (iii) claims under the due diligence reports and the TIM Transaction Documents, in each of the above cases subject to certain exclusions and subject to a minimum annual threshold.

The Senior Facilities Agreement allows for voluntary prepayments (subject to de minimis amounts).

Interest and fees

Borrowings under both the TLB and the RCF initially bear interest at a rate equal to the aggregate of EURIBOR and a margin of 2.25% per annum. EURIBOR has a zero floor under the Senior Facilities Agreement. Borrowings under both the TLB may also bear interest at a rate equal to Term SOFR for loans denominated in U.S. dollars and compounded SONIA for loans denominated in sterling.

The margin for each loan under the TLB and the RCF shall step up to (i) following the second anniversary of the first utilization date up to and including the third anniversary of the first utilization date, 2.75 per cent. per annum; (ii) following the third anniversary of the first utilization date up to and including the fourth anniversary of the first utilization date, 3.00 per cent. per annum; and (iii) following the fourth anniversary of the first utilization date, 3.50 per cent. per annum.

Default interest on each of the Credit Facilities will be calculated as an additional 1.00% on the overdue amount.

Commitment fees are payable (i) in respect of the TLB, on the available and undrawn commitments under the TLB from and including the Closing Date until the end of the availability period applicable to the TLB, at a rate of 35% of the applicable margin; and (ii) in respect of the RCF, on the aggregate undrawn and uncancelled amount of the RCF, until the end of the availability period applicable to the RCF, at a rate of 35% of the applicable margin for the RCF. Commitment fees shall also be payable in respect of the TLB on available and undrawn amounts: (i) from and including the date falling 91 days after the date of the Senior Facilities Agreement to and including the date falling 180 days after the date of the Senior Facilities Agreement at the rate of 15% of the initial margin applicable to the

TLB and (ii) from the date falling 181 days after the date of the Senior Facilities Agreement until the Closing Date, at the rate of 30% of the initial margin applicable to the TLB.

Such commitment fees are payable on the Closing Date (to the extent accrued) and thereafter on the last day of each successive period of three months following the Closing Date which ends during the relevant availability period applicable to each applicable facility and, if cancelled in full, on the cancelled amount of the relevant lender's commitment at the time the cancellation becomes effective.

The Company is required to pay customary agency fees to each of the Agent and the Security Agent in connection with the Senior Facilities Agreement.

Additional Facilities

The Company may elect to request additional facilities either as a new facility or as additional tranches of the Senior Facilities Agreement (the "**Additional Facilities**"). The Company and the lenders in respect of the Additional Facilities may agree to certain terms in relation to the Additional Facilities, including the margin, the termination date (each subject to certain parameters and conditions as set out in the Senior Facilities Agreement) and the availability period thereof. Unless the indebtedness incurred is otherwise permitted under the Senior Facilities Agreement or a Release Condition (as defined below) applies, the maximum aggregate principal amount of the indebtedness outstanding under all Additional Facilities (after taking into account the application of proceeds of any relevant indebtedness) may not at any time exceed the maximum amount such that the Company would have complied with the Lock-Up Adjusted Leverage Ratio on the last accounting date preceding the date on which that Additional Facility is utilized (or, at the option of the Company, if earlier, the last accounting date preceding the date on which that Additional Facility is established), with compliance to be determined on a pro forma basis assuming any such utilization and any transaction directly or indirectly funded by that utilization has occurred on the first day of the relevant measurement period.

Guarantees

The Senior Facilities Agreement is guaranteed by the Company and by any Additional Guarantor which shall accede to the Senior Facilities Agreement from time to time. The Senior Facilities Agreement requires that (subject to agreed security principles as set out in the Senior Facilities Agreement (the "**Agreed Security Principles**") and any additional limitations on guarantees applicable under Italian law) each member of the NetCo Group which is a "Material Subsidiary" (which is generally defined under the Senior Facilities Agreement to include, among other things, any wholly owned subsidiary of the Company that has earnings before interest, tax, depreciation and amortization representing 5% or more of consolidated EBITDA of the Group) as at the first utilization date, will be required to become a guarantor under the Senior Facilities Agreement within the earlier of (a) the date falling 60 days after the Closing Date and (b) the date falling 20 business days following the envisaged reverse merger between the Company and NetCo (the "**Backstop Date**").

In addition, any member of the NetCo Group which is a Material Subsidiary (subject to the Agreed Security Principles) as at the first utilization date is required to become a guarantor under the Senior Facilities Agreement within the Backstop Date. Furthermore, the Company shall procure that on or prior to the Backstop Date (and within 60 days of each delivery of the Group's annual audited consolidated financial statements), the obligors account for at least 80% of the consolidated EBITDA of the Group (excluding the EBITDA of any member of the Group not required to become a Guarantor in accordance with the Agreed Security Principles).

Security

Subject to the Agreed Security Principles and any additional limitations applicable under mandatory provisions under Italian law, the following security interests will be granted on a first priority basis (to the extent legally possible) in favor of the Security Agent over certain assets as described below:

(a) security over the issued share capital of the Company held by Optics HoldCo (the "Parent");

(b) security over receivables arising from material intercompany loans from the Parent to the Company;

(c) security over receivables arising from material structural intercompany loans from the Company (or, after the NetCo Merger, the Parent) to NetCo, if any;

(d) security over the issued share capital of NetCo held by the Company or, following the Push-Down Merger, Optics Holdco ((on a basis whereby (a) the grant of security shall not trigger any tag-along rights in favor of any shareholder of NetCo and (b) the enforcement of such security will not be subject to any lock-up under any shareholder arrangements relating to the shares in NetCo); and

(e) security over the shares of any other Obligor.

Representations and warranties

The Senior Facilities Agreement contains certain customary representations and warranties (subject to certain exceptions and qualifications and with certain representations and warranties being repeated), including status and incorporation, power and authority, binding obligations, non-conflict with constitutional documents, applicable laws and certain other obligations, consents and filings, litigation, labor disputes, no default, accounts, environmental warranties, intellectual properly, assets, applicable laws, taxation, information, *pari passu* ranking, security interests, guarantees and indebtedness, pension schemes group structure chart and insolvency.

Affirmative covenants

The Senior Facilities Agreement requires certain members of the Group to observe certain affirmative covenants, including:

(a) maintenance of relevant authorizations and consents;

(b) compliance with laws;

(c) payment of taxes;

(d) maintenance of *pari passu* ranking;

(e) compliance with obligations relating to pension schemes;

(f) provision of financial and other information and (in certain circumstances) granting access to books and records to the facility agent and the security agent;

(g) maintenance of intellectual property;

(h) maintenance of insurance;

(i) maintenance of guarantor and security coverage and further assurances;

(j) compliance with applicable environmental laws;

(k) using commercially reasonable endeavours to complete a merger pursuant to Article 2501-bis of the Italian Civil Code of the Company with NetCo, with NetCo as the surviving entity (the "**NetCo Merger**") within six months of the closing date; and

(l) prepayment of the existing indebtedness at the NetCo level, to be completed within 60 days of the closing date.

The Senior Facilities Agreement also contains an "information covenant" under which, among other things and in the first instance, the Company is required to deliver to the Agent annual financial statements, quarterly financial statements and compliance certificates.

Negative covenants

The Credit Facilities Agreement contains certain customary operating and financial covenants (see "—*Financial covenant*" below), subject to certain exceptions and qualifications, including covenants restricting the ability of certain members of the Group to do the following:

(a) merge with other companies;

(b) incur additional indebtedness;

(c) enter into transactions other than on arm's length basis;

(d) enter into certain hedging arrangements;

(e) make dividends and payments on subordinated debt, grant loans, guarantees or indemnities;

(f) create security over its assets;

(g) acquire other businesses or other ownership interests in entities that are not members of the Group;

(h) dispose of its assets (and any related re-investment rights or prepayment requirements in relation to such sales);

(i) engage in business which is not a similar line of business;

(j) enter into investments in any joint venture or similar arrangement; and

(k) enter into certain leasing arrangements.

Certain obligations, covenants and restrictions set out in the Senior Facilities Agreement shall be amended, suspended or shall cease to apply in the event that he long-term corporate credit rating of the Company is equal to or better than BBB- (or its equivalent) from at least two rating agencies (one of which being either Standard & Poor's or Moody's) (the "**Release Condition**").

Financial covenant

The Senior Facilities Agreement requires that the ratio of the total net debt of the Group on the last day of any measurement period ending on or after the last day of the second complete financial half-year ending after the closing date to the adjusted reported consolidated EBITDA of the Group for that measurement period shall not be greater than 9.0:1. Upon occurrence of the Release Condition, such ratio shall be adjusted to 10:1.

The Company is permitted to prevent or cure breaches of the net leverage covenant by applying a "cure" amount (generally, amounts received by the Company in cash pursuant to any new equity or permitted subordinated debt) as if consolidated EBITDA had been increased by such amount. There is no requirement to apply any cure amount in prepayment of the TLB. No cures may be applied in consecutive accounting periods, no more than four cures may be applied at the option of the Company towards the calculation of adjusted reported consolidated EBITDA or total net debt or borrowings, and no more than three cures may be applied towards the calculation of adjusted reported consolidated EBITDA.

Events of default

The Senior Facilities Agreement contains certain events of default, the occurrence of which would allow the requisite majority of lenders (under and as defined in the Senior Facilities Agreement) to, amongst other actions, accelerate all outstanding loans and terminate their commitments, including, among other events (subject in certain cases to agreed grace periods, financial thresholds and other qualifications):

(a) failure to pay off any amounts when due under the finance documents entered into in connection with the Facilities;

(b) breach of the financial covenant or failure to comply with other obligations under the finance documents;

(c) inaccuracy of a representation or statement when made (subject to materiality qualifications);

(d) cross defaults;

(e) (subject to certain thresholds) insolvency, insolvency proceedings and commencement of certain creditors' processes, such as expropriation, attachment, sequestration, distress or execution;

(f) unlawfulness, invalidity rescission and repudiation, or unenforceability of the finance documents entered into in connection with the Credit Facilities; and

(g) breach of material obligations under the Intercreditor Agreement by any holding company of the Company.

Governing law and jurisdiction

The Senior Facilities Agreement and any non-contractual obligations arising out of or in connection with it are governed by English law and the courts of England have exclusive jurisdiction to settle any disputes arising out of or in connection with the Senior Facilities Agreement.

Bridge Facility Agreement

Purpose

Borrowings funded under the Bridge have and may be applied towards the same uses as the Senior Facilities Agreement. See "—*Senior Facilities Agreement—Purpose*" above. The Bridge is available until the date falling 60 days after the closing date.

Repayments and prepayments

The initial maturity date under the Senior Bridge Facility Agreement is the date falling 18 months and two days after the first utilization date, with the ability in certain circumstances to automatically extend the initial maturity date to the date falling 24 months after the first utilization date.

If it becomes unlawful in any applicable jurisdiction for a lender to perform its obligations under the Senior Bridge Facility Agreement, such lender under the Senior Bridge Facility Agreement will have the right to cancel its commitments. The Borrower shall repay the relevant lender's participation on the date specified by the relevant lender in the relevant notice delivered to the Borrower (being no earlier than the last Business Day of any applicable grace period permitted by law).

On a change of control or sale of all or substantially all of the assets of the Group (taken as a whole), a lender may, by notice to the Company to be received not later than the date that is 30 days after the date on which the Agent was notified of such event, cancel all of its commitments and declare all outstanding amounts owed to it due and payable within 15 Business Days of the notice.

Additional mandatory prepayment provisions include mandatory prepayment of the net proceeds received in cash in respect of: (i) any disposal; (ii) any insurance claim; and (iii) claims under the due diligence reports and the TIM Transaction Documents, in each of the above cases subject to certain exclusions and above a minimum annual threshold.

The Senior Bridge Facility Agreement allows for voluntary prepayments (subject to de minimis amounts).

Interest

Borrowings under the Bridge initially bear interest at a rate equal to the aggregate of EURIBOR and a margin of 1.50% per annum. EURIBOR has a zero floor under the Senior Bridge Facility Agreement.

The margin for each loan under the Bridge shall step up to (i) following the date falling three months after the first utilization date up to and including the date falling nine months after the first utilization date, to 1.75 per cent. per annum; (ii) from the date following the date falling nine months after the first utilization date up to and including the first anniversary of the first utilization date, to 2.00 per cent. per annum, (iii) from the day following the first anniversary of the first utilization date up to and including the date falling 15 months after the first utilization date, to 2.25 per cent. per annum; (iv) from the day following the date falling 15 months after the first utilization date up to and including the date falling 18 months after the first utilization date, to 2.50 per cent. per annum; (v) from the day following the date falling 18 months after the first utilization date up to and including the date falling 21 months after the first utilization date, to 2.75 per cent. per annum; and (vi) from and following the day following the date falling 21 months after the first utilization date, to 3.25 per cent. per annum.

Default interest on the Bridge will be calculated as an additional 1.00% on the overdue amount.

Guarantees

The Senior Bridge Facility Agreement is guaranteed by the Company and by any additional Guarantor as per the Senior Facilities Agreement - see "*—Senior Facilities Agreement—Guarantees*" above. Each guarantor under the Senior Facilities Agreement will also become a guarantor under the Senior Bridge Facility Agreement.

Security

The Senior Bridge Facility Agreement is secured by the same security interests granted under the Senior Facilities Agreement - see "*—Senior Facilities Agreement—Security*" above.

Representations and warranties

The Senior Bridge Facility Agreement contains certain customary representations and warranties (subject to certain exceptions and qualifications and with certain representations and warranties being repeated), including status and incorporation, power and authority, binding obligations, non-conflict with constitutional documents and no default.

Affirmative covenants

The Senior Bridge Facility Agreement requires certain members of the Group to observe certain affirmative covenants, which are substantially consistent with those contained in the Senior Facilities Agreement.

The Senior Bridge Facility Agreement also contains similar "information covenants" as the Senior Facilities Agreement, under which, among other things and in the first instance, the Company is required to deliver to the Senior Facility Agent annual financial statements, quarterly financial statements and compliance certificates.

Negative covenants

The Senior Bridge Facility Agreement contains certain customary covenants, subject to certain exceptions and qualifications, which are substantially consistent with those contained in the Senior Facilities Agreement. A Release Condition also applies under the Senior Bridge Facility Agreement on terms which are consistent with those contained in the Senior Facilities Agreement.

Events of default

The Senior Bridge Facility Agreement contains certain events of default which are substantially consistent with those contained in the Senior Facilities Agreement, the occurrence of which would allow the requisite majority of lenders (under and as defined in the Senior Facilities Agreement) to, amongst other actions, accelerate all outstanding loans

and terminate their commitments, including, among other events (subject in certain cases to agreed grace periods, financial thresholds and other qualifications).

Governing law and jurisdiction

The Senior Bridge Facility Agreement and any non-contractual obligations arising out of or in connection with it are governed by English law and the courts of England have exclusive jurisdiction to settle any disputes arising out of or in connection with the Senior Bridge Facility Agreement.

Intercreditor Agreement

General

To establish the relative rights of certain of the Optics Group's creditors under Optics Group's financing arrangements, Optics Holdco S.r.l. (as the "**Original Investor**" and the "**Original Third Party Security Provider**"), the Company (as the "**Original Debtor**") entered into an intercreditor agreement (the "**Intercreditor Agreement**") dated December 19, 2023, with, among others, UniCredit S.p.A. (as "**Senior Facility Agent**," "**Bridge Facility Agent**" and "**Security Agent**"). The Optics Notes Trustee will accede to the Intercreditor Agreement as a Senior Notes Trustee on the Issue Date.

The Intercreditor Agreement is governed by English law and sets out, among other things, the relative ranking of certain indebtedness of the Debtors, the relative ranking of certain security granted by the collateral providers, when payments can be made in respect of certain debt of the Debtors, when enforcement action can be taken in respect of that indebtedness, the terms pursuant to which certain of that indebtedness will be subordinated upon the occurrence of certain insolvency events and turnover provisions.

The Intercreditor Agreement additionally provides for Hedge Counterparties and Operating Facility Lenders (each as defined below) to receive guarantees and indemnities from the Debtors on substantially the same terms (including the relevant limitations) as such guarantees and indemnities are provided by the obligors to the finance parties under the Senior Facilities Agreement.

Capitalized terms set forth and used in this section entitled "*—Intercreditor Agreement*" have the same meanings as set forth in the Intercreditor Agreement, which may have different meanings from the meanings given to such terms and used elsewhere in this Exchange Offer Memorandum. In particular, in this summary the term "Senior Notes" includes the indebtedness to be incurred under the Indenture and the Trust Deed in respect of the Optics Notes as defined elsewhere in this Exchange Offer Memorandum.

Definitions

The following capitalized terms used in this summary of the Intercreditor Agreement have the meaning given to them below:

"**Bridge Facility Agreement**" means the senior bridge facility agreement dated on or about the date of the Intercreditor Agreement and made between, inter alios, the Company, the Bridge Lenders and the Bridge Facility Agent.

"**Bridge Lender Discharge Date**" means the first date on which all Bridge Lender Liabilities have been fully and finally discharged, whether or not as the result of an enforcement, and the Bridge Lenders are under no further obligation to provide financial accommodation to any of the Debtors under any of the Bridge Facility Finance Documents.

"**Bridge Lender Liabilities**" means the Liabilities owed by the Debtors and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to the Bridge Lenders under the Bridge Facility Finance Documents.

"**Creditors**" means the Senior Secured Creditors, the Senior Parent Creditors, the Hedge Counterparties, the intra-Group lenders and the investors in the Group.

"**Enforcement Action**" means:

(a) in relation to any liabilities:

(i) the acceleration of any liabilities or the making of any declaration that any liabilities are prematurely due and payable (other than as a result of it becoming unlawful for a Senior Secured Creditor or a Senior Parent Creditor to perform its obligations under, or of any voluntary or mandatory prepayment arising under, any of the debt documents);

(ii) the making of any declaration that any liabilities are payable on demand;

(iii) the making of a demand in relation to a liability that is payable on demand;

(iv) the making of any demand against any member of the Group in relation to any guarantee liabilities of that member of the Group;

(v) the exercise of any right to require any member of the Group or any Third Party Security Provider to acquire any liability, including exercising any put or call option against any member of the Group or any Third Party Security Provider for the redemption or purchase of any liability but excluding any such right which arises as a result of the permitted debt purchase transactions provisions of the Senior Facilities Agreement (or any other similar or equivalent provision of any of the Secured Debt Documents) and/or any other acquisition of liabilities, acquisition or transaction which any member of the Group or any Third Party Security Provider is not prohibited from entering into by the terms of the Secured Debt Documents and excluding any mandatory offer arising as a result of a change of control or asset sale (howsoever described) as set out in the Senior Notes finance documents or the Senior Parent Notes Finance Documents (or any other similar or equivalent provision of any of the Secured Debt Documents);

(vi) the exercise of any right of set-off, account combination or payment netting against any member of the Group or any Third Party Security Provider in respect of any liabilities other than the exercise of any such right:

(A) as close-out netting by a Hedge Counterparty or by a hedging ancillary lender;

(B) as payment netting by a Hedge Counterparty or by a hedging ancillary lender;

(C) as inter-hedging agreement netting by a Hedge Counterparty;

(D) as inter-hedging ancillary document netting by a hedging ancillary lender; and/or

(E) which is otherwise permitted by the terms of any of the Secured Debt Documents, in each case to the extent that the exercise of that right gives effect to a permitted payment; and

(vii) the suing for, commencing or joining of any legal or arbitration proceedings against any member of the Group or any Third Party Security Provider to recover any liabilities;

(b) the premature termination or close-out of any hedging transaction under any hedging agreement, save to the extent permitted by the Intercreditor Agreement;

(c) the taking of any steps to enforce or require the enforcement of any transaction security (including the crystallization of any floating charge forming part of the transaction security);

(d) the entry into any composition, compromise, assignment or similar arrangement with any member of the Group or any Third Party Security Provider which owes any liabilities, or has given any security, guarantee or indemnity or other assurance against loss in respect of the liabilities (other than any action permitted under the Intercreditor Agreement or any debt buy-back, tender offer, exchange offer or similar or equivalent arrangement not otherwise prohibited by the debt documents); or

(e) the petitioning, applying or voting for, or the taking of any steps (including the appointment of any liquidator, receiver, examiner, administrator or similar officer) in relation to the winding up, dissolution, examinership, administration or reorganization of any member of the Group or any Third Party Security Provider which owes any liabilities, or has given any security, guarantee, indemnity or other assurance against loss in respect of any of the liabilities, or any of such member of the Group's or such Third Party Security Provider's assets or any suspension of payments or moratorium of any indebtedness of any such member of the Group or any Third Party Security Provider, or any analogous procedure or step in any jurisdiction, except that the following shall not constitute Enforcement Action:

(i) the taking of any action falling above which is necessary (but only to the extent necessary) to preserve the validity, existence or priority of claims in respect of liabilities, including the registration of such claims before any court or governmental authority and the bringing, supporting or joining of proceedings to prevent any loss of the right to bring, support or join proceedings by reason of applicable limitation periods; or

(ii) a Senior Secured Creditor or Senior Parent Creditor bringing legal proceedings against any person solely for the purpose of: (a) obtaining injunctive relief (or any analogous remedy outside England and Wales) to restrain any actual or putative breach of any debt document to which it is party, (b) obtaining specific performance (other than specific performance of an obligation to make a payment) with no claim for damages or (c) requesting judicial interpretation of any provision of any debt document to which it is party with no claim for damages; or

(iii) bringing legal proceedings against any person in connection with any securities violation, securities or listing regulations or common law fraud; or

(iv) to the extent entitled by law, the taking of any action against any creditor (or any agent, trustee or receiver acting on behalf of that creditor) to challenge the basis on which any sale or disposal is to take place pursuant to the powers granted to those persons under any relevant documentation; or

(v) any person consenting to, or the taking of any other action pursuant to or in connection with, any merger, consolidation, reorganization or any other similar or equivalent step or transaction initiated or undertaken by a member of the Group or any Third Party Security Provider (or any analogous procedure or step in any jurisdiction) that is not prohibited by the terms of the Secured Debt Documents to which it is a party.

"**Equity Contribution**" means (a) any subscription for shares issued by, and any capital contributions to, the Original Borrower (in each case *provided* that any such shares are not redeemable at the option of their holder whilst any amount remains outstanding under the Facilities, unless otherwise permitted by the Intercreditor Agreement)and/or (b) any loans, notes, bonds or like instruments issued by or made to the Original Borrower which are subordinated to the Facilities pursuant to the Intercreditor Agreement (with no right to prepayment or acceleration or cash return payable whilst any amount remains outstanding under the Facilities, in each case, unless otherwise permitted by the Intercreditor Deed) or otherwise on terms satisfactory to the Senior Facility Agent or Bridge Facility Agent, as applicable, acting reasonably.

"**First/Second Lien Discharge Date**" means the later to occur of the Senior Discharge Date and the Second Lien Discharge Date.

"**Group**" means the Company and each of its Subsidiaries for the time being *provided* that, notwithstanding anything to the contrary, no Excluded Subsidiary (or any of its Subsidiaries for the time being) shall be a member of the Group (or a Subsidiary, Holding Company or Affiliate of any member of the Group or a Joint Venture) for the purposes of the Senior Finance Documents.

"**Hedge Counterparty**" means any person that executes or accedes to the Intercreditor Agreement as a Hedge Counterparty.

"**Hedging Liabilities**" means the liabilities owed by any Debtor to Hedge Counterparties in respect of certain hedging agreements.

"**Majority Permitted Parent Financing Creditors**" means, in relation to any Permitted Parent Financing Debt, the requisite number or percentage of Permitted Parent Financing Creditors under the Permitted Parent Financing Agreement on whose instructions the Senior Parent Creditor Representative is required to act in relation to the relevant matter.

"**Majority Permitted Second Lien Financing Creditors**" means, in relation to any Permitted Second Lien Financing Debt, the requisite number or percentage of Permitted Second Lien Financing Creditors under the Permitted Second Lien Financing Agreement on whose instructions the Second Lien Creditor Representative is required to act in relation to the relevant matter.

"**Majority Permitted Senior Financing Creditors**" means, in relation to any Permitted Senior Financing Debt, the requisite number or percentage of Permitted Senior Financing Creditors under the Permitted Senior Financing Agreement on whose instructions the Senior Creditor Representative is required to act in relation to the relevant matter.

"**Majority Priority Creditors**" means, at any time, those Priority Creditors whose Priority Credit Participations at that time aggregate more than 66⅔ per cent. of the total Priority Credit Participations at that time.

"**Majority Priority Facility Lenders**" means, in relation to any Priority Facility, the requisite number or percentage of Priority Facility Lenders under the Priority Facility Agreement on whose instructions the Priority Facility Agent is required to act in relation to the relevant matter.

"**Majority Second Lien Creditors**" means, at any time, those Second Lien Secured Creditors whose Second Lien Secured Credit Participations (as defined below) at that time aggregate more than 66⅔% of the total Second Lien Secured Credit Participations at that time.

"**Majority Second Lien Lenders**" has the meaning given to the term "Majority Lenders" in the Second Lien Facility Agreement.

"**Majority Senior Creditors**" means, at any time, those Senior Creditors whose Senior Credit Participations at that time aggregate more than 66⅔% of the total Senior Credit Participations at that time.

"**Majority Senior Lenders**" means, at any time, subject to certain provisions of the Senior Facilities Agreement, a Senior Lender or Senior Lenders whose Commitments (as defined in the Senior Facilities Agreement) aggregate at least 66⅔% of the Total Commitments (as defined in the Senior Facilities Agreement) (or, if the total commitments have been reduced to zero, aggregate at least 66⅔% of the total commitments immediately prior to that reduction).

"**Majority Senior / Notes Tranche Lenders**" shall mean, at any time, those Senior Lenders and Senior Notes Tranche Holders whose Senior Lender / Notes Tranche Participations at that time aggregate more than 66⅔ per cent. of the total Senior Lender / Notes Tranche Participations at that time.

"**Majority Senior / Notes Tranche / Bridge Lenders**" shall mean, at any time, those Senior Lenders, Senior Notes Tranche Holders and Bridge Lenders whose Senior Lender / Notes Tranche / Bridge Lender Participations at that time aggregate more than 66⅔ per cent. of the total Senior Lender / Notes Tranche / Bridge Lender Participations at that time.

"**New Debt Financing**" means any new, additional or increased Liabilities under any Secured Debt Document and/or in connection with any Debt Refinancing (as defined below).

"**Operating Facility**" means any facility or financial accommodation (including, without limitation, any overdraft or other current account facility, any foreign exchange facility, any guarantee, bonding, documentary or standby letter of credit facility, any credit card or automated payments facility, any short term loan facility and any derivatives facility) provided to a member of the Group by an Operating Facility Lender which is notified to the Security Agent by the Company in writing as a facility or financial accommodation to be treated as an "Operating Facility" for the purposes of the Intercreditor Agreement.

“**Operating Facility Document**” means, at the election of the Company, any document relating to or evidencing an Operating Facility.

“**Operating Facility Lender**” means any person that executes or accedes to the Intercreditor Agreement as an Operating Facility Lender.

“**Operating Facility Liabilities**” means the liabilities owed by any Debtor and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to the Operating Facility Lenders under or in connection with the Operating Facility Documents.

“**Permitted Parent Financing Agreement**” means, in relation to any Permitted Parent Financing Debt, the facility agreement, indenture or other equivalent document by which that Permitted Parent Financing Debt is made available or, as the case may be, issued.

“**Permitted Parent Financing Creditors**” means, in relation to any Permitted Parent Financing Debt, each of the lenders, holders or other creditors in respect of that Permitted Parent Financing Debt from time to time (including the applicable Senior Parent Creditor Representative).

“**Permitted Parent Financing Debt**” means any indebtedness incurred by any member of the Group which is notified to the Security Agent by the Company in writing as indebtedness to be treated as “Permitted Parent Financing Debt” for the purposes of the Intercreditor Agreement *provided* that (a) the incurrence of such indebtedness is not prohibited by the terms of the Secured Debt Documents (as defined below) and (b) the providers of such indebtedness or the agent, trustee or other relevant representative in respect of that Permitted Parent Financing Debt have agreed to become a party to the Intercreditor Agreement in such capacity, in each case to the extent not already a party in that capacity.

“**Permitted Parent Financing Documents**” means, in relation to any Permitted Parent Financing Debt, the Permitted Parent Financing Agreement, any fee letter entered into under or in connection with the Permitted Parent Financing Agreement and any other document or instrument relating to that Permitted Parent Financing Debt and designated as such by the Company and the Senior Parent Creditor Representative in respect of that Permitted Parent Financing Debt.

“**Permitted Parent Financing Liabilities**” means all liabilities of any Debtor and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to any Permitted Parent Financing Creditors under or in connection with the Permitted Parent Financing Documents.

“**Permitted Second Lien Financing Agreement**” means, in relation to any Permitted Second Lien Financing Debt, the facility agreement, indenture or other equivalent document by which that Permitted Second Lien Financing Debt is made available or, as the case may be, issued.

“**Permitted Second Lien Financing Creditors**” means, in relation to any Permitted Second Lien Financing Debt, each of the lenders, holders or other creditors in respect of that Permitted Second Lien Financing Debt from time to time (including the applicable Second Lien Creditor Representative).

“**Permitted Second Lien Financing Debt**” means any indebtedness or obligations incurred by any member of the Group which is notified to the Security Agent by the Company in writing as indebtedness to be treated as “Permitted Second Lien Financing Debt” for the purposes of the Intercreditor Agreement *provided* that (a) the incurrence of such indebtedness or obligations is not prohibited by the terms of the Secured Debt Documents (as defined below) and (b) the providers of such indebtedness or obligations or the agent, trustee or other relevant representative in respect of that Permitted Second Lien Financing Debt have agreed to become a party to the Intercreditor Agreement in such capacity, in each case to the extent not already a party in that capacity.

“**Permitted Second Lien Financing Documents**” means, in relation to any Permitted Second Lien Financing Debt, the Permitted Second Lien Financing Agreement, any fee letter entered into under or in connection with the Permitted Second Lien Financing Agreement and any other document or instrument relating to that Permitted Second Lien Financing Debt and designated as such by the Company and the Second Lien Creditor Representative in respect of that Permitted Second Lien Financing Debt.

"**Permitted Second Lien Financing Liabilities**" means all liabilities of any Debtor and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to any Permitted Second Lien Financing Creditors under or in connection with the Permitted Second Lien Financing Documents.

"**Permitted Senior Financing Agreement**" means, so long as any amounts under the Bridge Facility are or may be outstanding, the Bridge Facility Agreement and in relation to any Permitted Senior Financing Debt, the facility agreement, indenture or other equivalent document by which that Permitted Senior Financing Debt is made available or, as the case may be, issued.

"**Permitted Senior Financing Creditors**" means, so long as any amounts under the Bridge Facility are or may be outstanding, the Bridge Lenders and, in relation to any other Permitted Senior Financing Debt, each of the lenders, holders or other creditors in respect of that Permitted Senior Financing Debt from time to time (including the applicable Senior Creditor Representative).

"**Permitted Senior Financing Debt**" means (a) any indebtedness or obligations incurred by any member of the Group under the Bridge Facility Agreement; and (b) any other indebtedness or obligations incurred by any member of the Group which is notified to the Security Agent by the Company in writing as indebtedness to be treated as "Permitted Senior Financing Debt" for the purposes of the Intercreditor Agreement (which may, for the avoidance of doubt, include any Senior Notes Tranche Notes), *provided* that (a) the incurrence of such indebtedness or obligations is not prohibited by the terms of the Secured Debt Documents (as defined below) and (b) the providers of such indebtedness or obligations or the agent, trustee or other relevant representative in respect of that Permitted Senior Financing Debt have agreed to become a party to the Intercreditor Agreement in such capacity, in each case to the extent not already a party in that capacity.

"**Permitted Senior Financing Documents**" means, so long as any amounts under the Bridge Facility are or may be outstanding, the Bridge Facility Finance Documents and in relation to any Permitted Senior Financing Debt, the Permitted Senior Financing Agreement, any fee letter entered into under or in connection with the Permitted Senior Financing Agreement and any other document or instrument relating to that Permitted Senior Financing Debt and designated as such by the Company and the Senior Creditor Representative under that Permitted Senior Financing Debt.

"**Permitted Senior Financing Liabilities**" means all liabilities of any Debtor and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to any Permitted Senior Financing Creditors under or in connection with the Permitted Senior Financing Documents.

"**Primary Creditors**" means the Senior Secured Creditors and the Senior Parent Creditors.

"**Priority Creditors**" means the Priority Facility Lenders and the Priority Hedge Counterparties.

"**Priority Creditor Discharge Date**" means the first date on which all Priority Facility Liabilities and Priority Hedging Liabilities have been fully and finally discharged (if applicable, including by way of defeasance permitted in accordance with the Priority Facility Finance Documents and/or the relevant Hedging Agreements), whether or not as a result of an enforcement, and the Priority Creditors are under no further obligation to provide any financial accommodation to any of the Debtors under the Priority Facility Finance Documents and/or the relevant Hedging Agreements.

"**Priority Facility**" means any facility which is notified to the Security Agent by the Company in writing as a facility to be treated as a "Priority Facility" for the purposes of the Intercreditor Agreement *provided* that such Priority Facility is established in accordance with the Intercreditor Agreement.

"**Priority Facility Agent**" means, in relation to any Priority Facility, the agent, trustee or other relevant representative in respect of that Priority Facility.

"**Priority Facility Agent Liabilities**" means the Agent Liabilities owed by the Debtors and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to the relevant Priority Facility Agent under or in connection with the Priority Facility Finance Documents.

"**Priority Facility Agreement**" means, in relation to any Priority Facility, the facility agreement, indenture or other equivalent document by which that Priority Facility is made available or, as the case may be, issued.

"**Priority Facility Arranger Liabilities**" means the Arranger Liabilities owed by the Debtors to any Priority Facility Arranger under or in connection with the Priority Facility Finance Documents.

"**Priority Facility Discharge Date**" means the first date on which all Priority Facility Liabilities have been fully and finally discharged (if applicable, including by way of defeasance permitted in accordance with the Priority Facility Finance Documents), whether or not as a result of an enforcement, and the Priority Facility Lenders are under no further obligation to provide any financial accommodation to any of the Debtors under the Priority Facility Finance Documents.

"**Priority Facility Finance Documents**" means, in relation to any Priority Facility, the Priority Facility Agreement, any fee letter entered into under or in connection with the Priority Facility Agreement and any other document or instrument relating to that Priority Facility and designated as such by the Company and the Priority Facility Agent in respect of that Priority Facility.

"**Priority Facility Lenders**" means, in relation to any Priority Facility, each of the lenders or other creditors in respect of that Priority Facility from time to time (including the applicable Priority Facility Agent) which becomes a party to the Intercreditor Agreement as a Priority Facility Lender.

"**Priority Facility Liabilities**" means all Liabilities of any Debtor and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to any Priority Facility Lenders under or in connection with the Priority Facility Finance Documents.

"**Priority Hedge Counterparties**" means any Hedge Counterparties in respect of Priority Hedging Liabilities.

"**Priority Hedging Liabilities**" means any Hedging Liabilities, which are notified to the Security Agent by the Company in writing as Hedging Liabilities to be treated as "Priority Hedging Liabilities" for the purposes of the Intercreditor Agreement.

"**Second Lien Arranger Liabilities**" means the liabilities owed by the Debtors and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to any Second Lien Arranger under or in connection with the Second Lien Finance Documents.

"**Second Lien Creditor Representative**" means, in relation to any Permitted Second Lien Financing Debt, the agent, trustee or other relevant representative in respect of that Permitted Second Lien Financing Debt.

"**Second Lien Debt**" means any Financial Indebtedness outstanding under any Second Lien Facility.

"**Second Lien Discharge Date**" means the date that the Second Lien Lender Liabilities and the Permitted Second Lien Financing Liabilities have been discharged.

"**Second Lien Facility**" has the meaning given to the term "Facility" in the Second Lien Facility Agreement.

"**Second Lien Facility Agreement**" means any second lien facility agreement entered into or to be entered into by a member of the Group which is notified to the Security Agent by the Company in writing as a facility agreement to be treated as the "Second Lien Facility Agreement" for the purposes of the Intercreditor Agreement *provided* that (i) the providers of the indebtedness under such agreement have agreed to become3 a party to the Intercreditor Agreement as a Second Lien Facility Finance Party, or (ii) the agent, trustee or other relevant representative in respect of the Second Lien Facility Agreement has agreed to become a party to the Intercreditor Agreement as a Second Lien Facility Finance Party and Second Lien Facility Agent on behalf of the providers of such indebtedness.

"**Second Lien Lenders**" means each Lender under and as defined in the Second Lien Facility Agreement.

“**Second Lien Lender Liabilities**” means the liabilities owed by the Debtors and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to the Second Lien Lenders under the Second Lien Finance Documents.

“**Second Lien Liabilities**” means the Second Lien Lender Liabilities and any Permitted Second Lien Financing Liabilities.

“**Second Lien Secured Creditors**” means the Second Lien Facility finance parties and/or the Permitted Second Lien Financing Creditors, as the context requires.

“**Secured Debt Documents**” means the Senior Facilities Finance Documents (as defined below), the Priority Facility Finance Documents, the Senior Notes finance documents, the Permitted Senior Financing Documents, the hedging agreements regulated by the Intercreditor Agreement, the Operating Facility finance documents, the Second Lien Finance Documents, the Permitted Second Lien Financing Documents, the Senior Parent Notes Finance Documents and/or the Permitted Parent Financing Documents.

“**Secured Party**” means, to the extent legally possible and subject to the Agreed Security Principles, each of the Security Agent, any receiver or delegate and each of the creditor representatives of the relevant secured creditors, the arrangers under the Senior Facilities Agreement, the Operating Facility Lenders, the Senior Secured Creditors and the Senior Parent Creditors from time to time but, to the extent required by the Intercreditor Agreement, only if it is a party to the Intercreditor Agreement or has acceded to it, in the appropriate capacity, pursuant to its terms.

“**Senior Agent Liabilities**” means the liabilities owed by the Debtors and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to the Senior Facility Agent under or in connection with the Senior Facilities Finance Documents.

“**Senior Arranger Liabilities**” means the liabilities owed by the Debtors to any Senior Arranger under or in connection with the Senior Facilities Finance Documents.

“**Senior Creditor Liabilities**” means the Senior Lender Liabilities, the Hedging Liabilities, the Priority Facility Liabilities and the Operating Facility Liabilities.

“**Senior Creditor Representative**” means, so long as any amounts under the Bridge Facility are or may be outstanding, the Bridge Facility Agent and in relation to any other Permitted Senior Financing Debt, the agent, trustee or other relevant representative in respect of that Permitted Senior Financing Debt.

“**Senior Creditors**” means the Senior Lenders, Senior Notes Tranche Holders, Priority Facility Lenders and the Hedge Counterparties.

“**Senior Discharge Date**” means the first date on which each of the Senior Creditor Discharge Date, the Senior Notes Discharge Date and the Permitted Senior Financing Discharge Date has occurred.

“**Senior Financing Agreement**” means the Priority Facility Agreement, the Senior Facilities Agreement, the Second Lien Facility Agreement, any Senior Notes Indenture, any Permitted Senior Financing Agreement and/or any Permitted Second Lien Financing Agreement, as the context requires.

“**Senior Lender**” means each of the lenders, issuing banks and ancillary lenders under the Senior Facilities Agreement.

“**Senior Lender Liabilities**” means the liabilities owed by the Debtors and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to the Senior Lenders under the Senior Facilities finance documents.

“**Senior Liabilities**” means the Senior Creditor Liabilities, the Second Lien Lender Liabilities, the Senior Notes Liabilities, the Permitted Senior Financing Liabilities and the Permitted Second Lien Financing Liabilities (as applicable).

“**Senior Noteholders**” means the registered holders from time to time of the applicable Senior Notes.

“**Senior Notes**” means high yield notes, exchange notes, debt securities and/or other debt instruments issued or to be issued by any member of the Group which are notified to the Security Agent by the Company in writing as indebtedness to be treated as “Senior Notes” for the purposes of the Intercreditor Agreement.

“**Senior Notes Creditors**” means, on and from the first Senior Notes Issue Date, the Senior Noteholders and each Senior Notes Trustee.

“**Senior Notes/Permitted Financing Credit Participations**” means the aggregate of all the Senior Secured Credit Participations at any time of the Senior Notes Creditors and the Permitted Senior Financing Creditors.

“**Senior Notes Tranche Finance Documents**” means the Senior Notes Tranche Notes, each Senior Notes Tranche Trust Deed, each Senior Notes Tranche Subscription Agreement, each guarantee granted by a member of the Group in respect of the Senior Notes Tranche Notes, the Intercreditor Agreement, the Security Documents and any other document entered into in connection with the Senior Notes Tranche Notes and designated a Senior Notes Tranche Finance Document by the Company and the applicable Senior Notes Tranche Trustee (which, for the avoidance of doubt, excludes any document to the extent it sets out rights of any initial purchasers of the Senior Notes Tranche Notes (in their capacities as initial purchasers) against any member of the Group).

“**Senior Notes Tranche Finance Parties**” means any Senior Notes Tranche Notes Trustee (on behalf of itself and the Senior Notes Tranche Holders which it represents), any Senior Notes Tranche Holder and the Security Agent.

“**Senior Notes Tranche Holder Discharge Date**” means the first date on which all Senior Notes Tranche Holder Liabilities have been fully and finally discharged, whether or not as the result of an enforcement, and the Senior Notes Tranche Holders are under no further obligation to provide financial accommodation to any of the Debtors under any of the Senior Notes Tranche Finance Documents.

“**Senior Notes Tranche Holders**” means each holder of Senior Notes Tranche Notes from time to time.

“**Senior Notes Tranche Holder Liabilities**” means the Liabilities owed by the Debtors and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to the Senior Notes Tranche Finance Parties under the Senior Notes Tranche Finance Documents (excluding any Senior Notes Tranche Notes Trustee Amounts).

“**Senior Notes Tranche Notes**” means any debt securities and/or other debt instruments issued or to be issued by any member of the Group in connection with any refinancing or replacement of all or any part of the Senior Lender Liabilities (or any such refinancing or replacement indebtedness from time to time) which are notified to the Security Agent by the Company in writing as indebtedness to be treated as Permitted Senior Financing Indebtedness and further as “Senior Notes Tranche Notes” for the purposes of the Intercreditor Agreement.

“**Senior Notes Tranche Notes Trustee**” means any entity acting as trustee under any issue of Senior Notes Tranche Notes (to the extent it has acceded to the Intercreditor Agreement).

“**Senior Notes Trustee**” means any entity acting as trustee under any issue of Senior Notes (to the extent it has acceded in such capacity to the Intercreditor Agreement in accordance with its terms) in each case as the context requires.

“**Senior Parent Creditors**” means, on and from the first Senior Parent Notes Issue Date, the Senior Parent Noteholders, the Senior Parent Notes Trustee and any Permitted Parent Financing Creditors.

“**Senior Parent Creditor Representative**” means in relation to any Permitted Parent Financing Debt, the agent, trustee or other relevant representative in respect of that Permitted Parent Financing Debt.

“**Senior Parent Debt Issuer**” means, in relation to any Senior Parent Notes or Permitted Parent Financing Debt, the member of the Group which is the issuer, or, as the case may be, the borrower of those Senior Parent Notes or that Permitted Parent Financing Debt, *provided* that no member of the Group which is:

(a) an issuer or, as the case may be, a borrower of any outstanding Senior Term Debt, outstanding Senior Notes, outstanding Second Lien Debt, outstanding Permitted Senior Financing Debt or outstanding Permitted Second Lien Financing Debt; or

(b) a subsidiary of a member of the Group falling within (a) above (other than a subsidiary which is a financing vehicle), may be a Senior Parent Debt Issuer.

"**Senior Parent Finance Parties**" means any Senior Parent Notes Trustee (on behalf of itself and the Senior Parent Noteholders that it represents), any Senior Parent Noteholder, the Security Agent and the Permitted Parent Financing Creditors.

"**Senior Parent Liabilities**" means the Senior Parent Notes Liabilities and any Permitted Parent Financing Liabilities.

"**Senior Parent Noteholders**" means the registered holders from time to time of the Senior Parent Notes.

"**Senior Parent Notes**" means high yield notes, exchange notes, debt securities and/or other debt instruments issued or to be issued by any member of the Group which are notified to the Security Agent by the Company in writing as indebtedness to be treated as "Senior Parent Notes" for the purposes of the Intercreditor Agreement.

"**Senior Parent Notes Finance Documents**" means, generally, the Senior Parent Notes, each indenture for Senior Parent Notes, guarantees of the Senior Parent Notes, the Intercreditor Agreement, the relevant security documents securing the liabilities in respect of the Senior Parent Notes and any other document designated as such by the Company and the applicable Senior Parent Notes Trustee.

"**Senior Parent Notes Liabilities**" means, generally, the liabilities owed by any Debtor and/or (to the extent arising pursuant to the terms of any Third Party Security) any Third Party Security Provider to the Senior Parent Notes Creditors and the Security Agent under the finance documents for the Senior Parent Notes (excluding, generally, certain amounts owed to the relevant Senior Parent Notes Trustee in respect of each issuance of Senior Parent Notes).

"**Senior Parent Notes Trustee**" means any entity acting as trustee under any issue of Senior Parent Notes (to the extent it has acceded in such capacity to the Intercreditor Agreement in accordance with its terms) in each case as the context requires.

"**Senior Secured Creditors**" means the Senior Creditors, the Senior Notes Creditors, the Second Lien Lenders, the Permitted Senior Financing Creditors and/or the Permitted Second Lien Financing Creditors, as the context requires.

"**Third Party Security**" means Transaction Security granted by a Third Party Security Provider.

"**Third Party Security Provider**" means the Original Third Party Security Provider and any other person that is not a member of the Group and that has provided Transaction Security over any or all of its assets but is not a Debtor in respect of any of the direct Borrowing Liabilities or Guarantee Liabilities of the Secured Obligations to which that Transaction Security relates and which has acceded to the Intercreditor Agreement as a Third Party Security Provider.

Debt Refinancing, Priority Facilities and Priority Hedging Liabilities

The Intercreditor Agreement permits any of the liabilities under the debt documents to be refinanced, replaced, increased or otherwise restructured in whole or in part including by way of Permitted Senior Financing Debt, Second Lien Debt, Permitted Second Lien Financing Debt and/or Permitted Parent Financing Debt or the issue of additional Senior Notes and/or Senior Parent Notes, or the establishment of new or additional Operating Facilities or the establishment of new or additional Priority Facilities (each a "**Debt Refinancing**").

Each party to the Intercreditor Agreement shall be required to enter into any amendment to or replacement of the then current Secured Debt Documents and/or take such other action as is required by the Company in order to facilitate such a Debt Refinancing including changes to, the taking of, or release and retake of any guarantee or security (except for any release of the security over the shares in the Company, unless following the relevant transaction such share security is replaced by security provided by an alternative holding company which continues to own all the shares or other equivalent ownership interests in the Company or in another person which acts as the common holding company

for all operating entities in the Group and those shares or other ownership interests are subject to the transaction security), subject to certain conditions.

In any event, prior to the later of the Senior Lender Discharge Date, the Bridge Lender Discharge Date and the Senior Notes Tranche Holders Discharge Date, unless otherwise agreed by the Majority Senior / Notes Tranche / Bridge Lenders, the Company shall not (i) establish any Debt Refinancing which is a Priority Facility which would rank ahead of the Senior Lender Liabilities, the Bridge Lender Liabilities and/or the Senior Notes tranche Holder Liabilities, and/or a Second Lien Facility or any Permitted Second Lien Financing Debt, any Senior Parent Notes or any Permitted Parent Financing debt, in each case that would become subject and benefit from the Intercreditor Agreement, or (ii) cause any Hedging Liabilities to be treated as Priority Hedging Liabilities.

At the option of the Company, a Debt Refinancing may be made available on a basis which is senior to, *pari passu* with or junior to any of the other liabilities, shall be entitled to benefit from all or any of the security, may be made available on a secured or unsecured basis (subject to certain restrictions) and may be effected in whole or in part by way of a debt exchange, non-cash rollover or other similar or equivalent transaction, in each case unless otherwise prohibited by the Debt Financing Agreements or the Intercreditor Agreement.

Under the terms of the Intercreditor Agreement each agent, each Secured Party and each Primary Creditor agrees that it shall co-operate with the Company, each other member of the Group, each Third Party Security Provider and each agent in order to facilitate any Debt Refinancing (including by way of, at the request and cost of the Company, executing any document or agreement and/or giving instructions to any person).

In the event of any refinancing or replacement of all or any part of the Senior Lender Liabilities (or any such refinancing or replacement indebtedness from time to time), the Company shall be entitled to require that the definition of Instructing Group is amended such that the relevant refinancing or replacement indebtedness is treated in the same manner as the Senior Facilities (meaning that for the purpose of calculating the voting entitlement of any person, at the option of the Company all or any part of the relevant refinancing or replacement indebtedness may be treated as Senior Secured Credit Participations of the Senior Creditors and not Senior Notes/Permitted Financing Credit Participations).

In the event that any Priority Facility becomes subject to the provisions of the Intercreditor Agreement, the Company shall be entitled to require that all or any part of the liabilities in relation to Hedging Liabilities and/or the Operating Facility Liabilities shall rank in right and priority of payment *pari passu* with that Priority Facility (which, for the avoidance of doubt, may result in such Hedging Liabilities and/or, as the case may be, Operating Facility Liabilities ranking ahead of the Senior Lender Liabilities, the Senior Notes Liabilities, the Permitted Senior Financing Liabilities, the Senior Parent Notes Liabilities and/or the Permitted Parent Financing Liabilities) in each case unless otherwise prohibited by the Debt Financing Agreements.

Ranking and Priority

Priority of Debts

Subject to the provisions set out under the caption "*—Senior Parent Liabilities and Security*" below, the Intercreditor Agreement provides that the liabilities owed by the Debtors (other than any Senior Parent Debt Issuer to the extent relating to liabilities in respect of Senior Parent Notes and/or Permitted Parent Financing Debt where that Senior Parent Debt Issuer is the issuer or the borrower) to the Primary Creditors and the Operating Facility Lenders shall rank in right and priority of payment in the following order and are postponed and subordinated to any prior ranking liabilities as follows:

(a) **first**, the Senior Lender Liabilities, the Senior Notes Liabilities, the Permitted Senior Financing Liabilities, the Hedging Liabilities, the Operating Facility Liabilities, the Priority Facility Liabilities, the Second Lien Lender Liabilities, the Permitted Second Lien Financing Liabilities, the Senior Arranger Liabilities, the Second Lien Arranger Liabilities, the Senior Agent Liabilities, the Priority Facility Agent Liabilities, amounts due to the Senior Notes Trustee, the Second Lien Agent Liabilities and amounts due to the Senior Parent Notes Trustee *pari passu* and without any preference amongst them; and

(b) **second**, the Senior Parent Notes Liabilities and the Permitted Parent Financing Liabilities *pari passu* and without any preference amongst them,

The liabilities owed by any Senior Parent Debt Issuer (to the extent relating to Liabilities in respect of Senior Parent Notes and/or Permitted Parent Financing Debt where that Senior Parent Debt Issuer is the issuer or the borrower) to the Primary Creditors and the Operating Facility Lenders shall rank *pari passu* in right and priority of payment without any preference amongst them.

Priority of Security

The Intercreditor Agreement provides that the security shall secure the liabilities (but only to the extent that such security is expressed to secure those liabilities) in the following order:

(a) **first**, the Senior Lender Liabilities, the Senior Notes Liabilities, the Permitted Senior Financing Liabilities, the Hedging Liabilities, the Operating Facility Liabilities, the Priority Facility Liabilities, the Senior Arranger Liabilities, the Senior Agent Liabilities, the Priority Facility Agent Liabilities, amounts due to the Senior Notes Trustee, the Second Lien Agent Liabilities and amounts due to the Senior Parent Notes Trustee *pari passu* and without any preference amongst them;

(b) **second**, the Second Lien Lender Liabilities, the Permitted Second Lien Financing Liabilities and the Second Lien Arranger Liabilities *pari passu* and without any preference amongst them; and

(c) **third**, the Senior Parent Notes Liabilities and the Permitted Parent Financing Liabilities *pari passu* and without any preference amongst them.

Senior Parent Liabilities and Security

The Senior Parent Notes Liabilities and the Permitted Parent Financing Liabilities owed by a Senior Parent Debt Issuer (to the extent relating to Liabilities in respect of Senior Parent Notes and/or Permitted Parent Financing Debt where that Senior Parent Debt Issuer is the issuer or, as the case may be, the borrower) are senior obligations of that Senior Parent Debt Issuer. Notwithstanding the preceding sentence, the Senior Parent Notes Creditors and the Permitted Parent Financing Creditors agree that, until the First/Second Lien Discharge Date, they may not take any steps subject to the security documents in connection with any Enforcement Action, other than as expressly permitted by the Intercreditor Agreement.

For the avoidance of doubt, the restrictions set out in the preceding paragraph shall not impair the right of the Senior Parent Creditors and/or the Permitted Parent Financing Creditors to institute suit for the recovery of any payment due by a Senior Parent Debt Issuer in respect of the Senior Parent Notes Liabilities and/or the Permitted Parent Financing Liabilities (in each case to the extent relating to liabilities in respect of Senior Parent Notes and/or Permitted Parent Financing Debt where that Senior Parent Debt Issuer is the issuer or, as the case may be, the borrower).

Intra-Group Liabilities and Investor Liabilities

The Intercreditor Agreement provides that the intra-Group liabilities and the liabilities of the Group to an investor are postponed and subordinated to the liabilities owed by the Debtors and the Third Party Security Providers to the Primary Creditors and the Operating Facility Lenders, but does not purport to rank any of those liabilities as between themselves.

Additional and/or Refinancing Debt

The Creditors and the Operating Facility Lenders acknowledge in the Intercreditor Agreement that the Debtors (or any of them) may wish to incur incremental borrowing liabilities (including guarantees of such liabilities) or refinance or replace borrowing liabilities (including incurring guarantee liabilities in respect of such refinancing or replacement). Such liabilities are intended to rank *pari passu* with any other liabilities and/or share *pari passu* in any security and/or to rank behind any other liabilities and/or to share in any security behind any such other liabilities.

The Creditors and the Operating Facility Lenders undertake in the Intercreditor Agreement (at the cost of the Debtors) to co-operate with the Company and the Debtors with a view to enabling and facilitating such financing, refinancing or replacement and such sharing in the security (provided it is not prohibited by the terms of the Debt Financing Agreements at such time) to take place in a timely manner. In particular, but without limitation, each of the Secured Parties authorizes and directs each of its respective agents and the Security Agent to execute any amendment to or replacement of the Intercreditor Agreement and such other debt documents and/or (subject to certain pre-conditions) release and retake of security required by the Company to reflect, enable and/or facilitate any such arrangements (including, as regards the ranking of any such arrangements).

If a Debtor incurs any new, additional or increased liabilities under any Secured Debt Document and/or in connection with any Debt Refinancing, at the option of the Company, the relevant Debtor and/or any Third Party Security Provider may (but subject to the relevant Debt Financing being elected to be secured in accordance with the applicable terms of the Intercreditor Agreement and subject to the Agreed Security Principles) grant to the relevant Secured Parties in respect of all or any part of such Debt Financing additional security by executing additional security documents which will benefit from the order of priority and ranking set out in the Intercreditor Agreement.

Restrictions Relating to Senior Secured Liabilities

The Company, the Debtors and the Third Party Security Providers may make payments of the Senior Liabilities at any time.

The Intercreditor Agreement provides that the Senior Secured Creditors, the Operating Facility Lenders, the Company, the Debtors and the Third Party Security Providers may at any time amend or waive the terms of the finance documents in relation to the Senior Facilities (the "**Senior Facilities Finance Documents**"), the Senior Notes, the Permitted Senior Financing Debt, the Second Lien Facility (the "**Second Lien Finance Documents**"), the Permitted Second Lien Financing Documents, the Operating Facility Documents and/or any Priority Facility Finance Documents in accordance with their respective terms from time to time (and subject only to any consent required under them).

Security and Guarantees: Senior Secured Creditors

The Senior Secured Creditors and the Operating Facility Lenders may take, accept or receive the benefit of:

(a) any security from any member of the Group or any Third Party Security Provider in respect of any of the Senior Liabilities in addition to the shared security *provided* that, to the extent legally possible and subject to the Agreed Security Principles:

 (i) the security provider (for the avoidance of doubt, excluding any Third Party Security Provider) becomes party to the Intercreditor Agreement as a Debtor (if not already a party in that capacity);

 (ii) all amounts actually received or recovered by any Senior Secured Creditor or Operating Facility Lender with respect to any such security shall immediately be paid to the Security Agent and applied in accordance with the provisions set out under the caption "*—Application of Proceeds*;" and

 (iii) any such security may only be enforced in accordance with the provisions set out under the caption "*—Enforcement of Security—Security Held by Other Creditors*."

(b) any guarantee, indemnity or other assurance against loss from any member of the Group or any Third Party Security Provider regarding any of the Senior Liabilities in addition to those in:

 (i) the Senior Facilities Agreement, any Senior Notes Indenture, any Permitted Senior Financing Document, the Second Lien Facility Agreement, any Permitted Second Lien Financing Document, any Operating Facility Document or any Priority Facility Finance Document;

 (ii) the Intercreditor Agreement; or

 (iii) any guarantee, indemnity or other assurance against loss in respect of any of the liabilities, the benefit of which (however conferred) is, to the extent legally possible and subject to the Agreed Security

Principles, given to, or expressed to be given to, all the senior secured parties in respect of their senior secured liabilities

provided that (except for any guarantee, indemnity or other assurance against loss permitted to be given to any ancillary lender or issuing bank), to the extent legally possible, and subject to the Agreed Security Principles,

(A) the guarantee provider becomes party to the Intercreditor Agreement as a Debtor (if not already a party in that capacity); and

(B) such guarantee, indemnity or assurance against loss is expressed to be subject to the Intercreditor Agreement.

(c) any security, guarantee, indemnity or other assurance against loss from any member of the Group or Third Party Security Provider in connection with:

(i) any escrow or similar or equivalent arrangements entered into in respect of amounts which are being held (or will be held) by a person which is not a member of the Group prior to release of those amounts to a member of the Group; or

(ii) any actual or proposed defeasance, redemption, prepayment, repayment, purchase or other discharge of any Senior Lender Liabilities, Operating Facility Liabilities, Senior Notes liabilities, Permitted Senior Financing Liabilities, Priority Facility Liabilities and/or Second Lien Liabilities (in each case *provided* that such defeasance, redemption, prepayment, repayment, purchase or other discharge is not prohibited by the terms of the Intercreditor Agreement).

Restriction on Enforcement: Senior Lenders, Operating Facility Lenders, Senior Notes Creditors, Priority Creditors and Permitted Senior Financing Creditors

The Intercreditor Agreement provides that no Senior Lender, Operating Facility Lender, Senior Notes Creditor, Permitted Senior Financing Creditor or Priority Creditor may take certain Enforcement Action without the prior written consent of an Instructing Group (as defined below).

Notwithstanding the above restriction or anything to the contrary in the Intercreditor Agreement, after the occurrence of certain specified insolvency events (an "**Insolvency Event**") in relation to the Company, a Debtor or a Third Party Security Provider, each Senior Lender, Operating Facility Lender, Senior Notes Creditor, Priority Creditor and/or Permitted Senior Financing Creditor may, to the extent it is permitted to do so under the relevant Debt Documents, take certain Enforcement Action and/or claim in the winding up, dissolution, administration, reorganization or similar insolvency event or process in relation to that Debtor for liabilities owing to it (but no Senior Secured Creditor or Operating Facility Lender may direct the Security Agent to enforce the common security in any manner).

Option to Purchase: Senior Notes Creditors and Permitted Senior Financing Creditors

Senior Notes Creditors holding at least a simple majority of the Senior Notes liabilities or Permitted Senior Financing Creditors holding at least a simple majority of the Permitted Senior Financing Liabilities (but excluding for this purpose Bridge Lender Liabilities and Senior Notes Tranche Holder Liabilities) (the "**Senior Secured Acquiring Creditors**") may, after the occurrence of an acceleration event which is continuing, by giving not less than ten (10) days' notice to the Security Agent (with the first notice to prevail in the event that more than one set of Creditors serves such a notice), require the transfer to them (or to a nominee or nominees), in accordance with the applicable transfer provisions of the Intercreditor Agreement, of all, but not part, of the rights, benefits and obligations in respect of the Senior Lender Liabilities, the Priority Facility Liabilities, the Bridge Lender Liabilities, the Senior Notes Tranche Holder Liabilities and the Operating Facility Liabilities (a "**Senior Liabilities Transfer**") if:

(i) that transfer is lawful and, subject to paragraph (ii) below, otherwise permitted by the terms of the Senior Facilities Agreement, the Priority Facility Agreements and the Operating Facility Documents;

(ii) any conditions relating to such a transfer contained in the Senior Facilities Agreement, the Priority Facility Agreements and the Operating Facility Documents are complied with, other than:

(A) any requirement to obtain the consent of, or consult with, a member of the Group or a Third Party Security Provider in relation to such transfer, which consent or consultation shall not be required; and

(B) to the extent to which all the Senior Secured Acquiring Creditors provide cash cover for any letter of credit, the consent of the relevant letter of credit issuing bank relating to such transfer;

(iii) the Senior Facility Agent, on behalf of the Senior Lenders, is paid an amount equal to the aggregate of:

(A) any amounts provided as cash cover by the Senior Secured Acquiring Creditors for any letter of credit (as envisaged in paragraph (ii)(B) above);

(B) all of the Senior Lender Liabilities at that time (whether or not due), including all amounts that would have been payable under the Senior Facilities Agreement if the Senior Facilities were being prepaid by the relevant Debtors on the date of that payment; and

(C) all costs and expenses (including legal fees) incurred by the Senior Facility Agent and/or the Senior Lenders and/or the Security Agent as a consequence of giving effect to that transfer;

(iv) the Priority Facility Agent, on behalf of the Priority Facility Lenders, is paid an amount equal to the aggregate of:

(A) any amounts provided as cash cover by the Senior Secured Acquiring Creditors for any Letter of Credit (as envisaged in paragraph (ii)(B) above);

(B) all of the Priority Facility Liabilities at that time (whether or not due), including all amounts that would have been payable under the Priority Facility Agreements if the Priority Facilities were being prepaid by the relevant Debtors on the date of that payment; and

(C) all costs and expenses (including legal fees) incurred by the Priority Facility Agent and/or the Priority Facility Lenders and/or the Security Agent as a consequence of giving effect to that transfer;

(v) the Operating Facility Lenders are paid an amount equal to the aggregate of:

(A) all of the Operating Facility Liabilities at that time (whether or not due), including all amounts that would have been payable under the Operating Facility Documents if the Operating Facilities were being prepaid by the relevant Debtors on the date of that payment; and

(B) all costs and expenses (including legal fees) incurred by the Operating Facility Lenders and/or the Security Agent as a consequence of giving effect to that transfer.

(vi) as a result of that transfer:

(A) the Senior Lenders have no further actual or contingent liability to a Debtor under the Senior Facilities Finance Documents;

(B) the Priority Facility Lenders have no further actual or contingent liability to a Debtor under the Priority Facility Finance Documents; and

(C) the Operating Facility Lenders have no further actual or contingent liability to a Debtor under the Operating Facility Documents.

(vii) an indemnity is provided from each of the Senior Secured Acquiring Creditors (other than any Senior Agent) or from another third party acceptable to all the Senior Lenders, the Priority Facility Lenders and the

Operating Facility Lenders in a form reasonably satisfactory to each Senior Lender, each Priority Facility Lender and Operating Facility Lender in respect of all costs, expenses, losses and liabilities which may be sustained or incurred by any Senior Lender, Priority Facility Lender or Operating Facility Lender in consequence of any sum received or recovered by any Senior Lender, Priority Facility or Operating Facility Lender from any person being required (or it being alleged that it is required) to be paid back by or clawed back from any Senior Lender or Operating Facility Lender for any reason;

(viii) the transfer is made without recourse to, or representation or warranty from, the Senior Lenders, the Priority Facility Lenders or the Operating Facility Lenders, except that each Senior Lender, Priority Facility Lender and Operating Facility Lender shall be deemed to have represented and warranted on the date of that transfer that it has the corporate power to effect that transfer and it has taken all necessary action to authorize the making by it of that transfer; and

(ix) the Senior Parent Creditors have not exercised their rights to purchase as described under the provisions set out in the paragraph captioned "*—Option to Purchase: Senior Parent Creditors*" or having exercised such rights, have not failed to complete the acquisition of the relevant Senior Secured Liabilities in accordance with such provisions.

Subject to the Intercreditor Agreement, the Senior Secured Acquiring Creditors may only require a Senior Liabilities Transfer if, at the same time, they require a transfer of the Hedging Liabilities in accordance with the Intercreditor Agreement and if, for any reason, such transfer cannot be made in accordance with the Intercreditor Agreement, no Senior Liabilities Transfer may be required to be made.

At the request of a Senior Agent (on behalf of the Senior Secured Acquiring Creditors), the Senior Facility Agent and the Operating Facility Lenders shall notify that Senior Agent of the foregoing payable sums in connection with such transfer.

Instructing Group

The term "Instructing Group" means at any time:

(a) prior to the Senior Discharge Date:

(i) in relation to any instructions to the Security Agent to enforce the transaction security or refrain or cease from enforcing the transaction security or to take any other enforcement action:

(A) those Senior Secured Creditors (other than the Second Lien Secured Creditors) whose Senior Secured Credit Participations at that time aggregate to more than 66⅔% of the Total Senior Secured Credit Participations at that time; and/or

(B) (x) if agreed by the Company under the terms of any Priority Facility that this paragraph (i)(B)(x) will apply and notified as such by the Company to the Security Agent and/or (y) if the Company has notified the Security Agent that any Hedging Liabilities are to be treated as Priority Hedging Liabilities pursuant to the provisions of the Intercreditor Agreement, in each case, prior to the Priority Creditor Discharge Date, the Majority Priority Creditors; or

(ii) in relation to any other matter:

(A) those Senior Secured Creditors (other than the Second Lien Secured Creditors) whose Senior Secured Credit *Participations* at that time aggregate more than 66⅔% of the Total Senior Secured Credit Participations at that time; and

(B) (x) if agreed by the Company under the terms of any Priority Facility that this paragraph (ii)(B)(x) will apply and notified as such by the Company to the Security Agent and/or (y) if the Company has notified the Security Agent that any Hedging Liabilities are to be treated

as Priority Hedging Liabilities pursuant to the provisions of the Intercreditor Agreement, in each case, prior to the Priority Creditor Discharge Date, the Majority Priority Creditors;

(b) on or after the Senior Discharge Date but before the Second Lien Discharge Date, and subject always to the provisions set out under the caption "*—Payment Blockage Provisions—Restrictions on Enforcement by Second Lien Secured Creditors*," those Second Lien Secured Creditors whose Second Lien Secured Credit Participations at that time aggregate to more than 66⅔% of the Total Second Lien Secured Credit Participations at that time; and

(c) on or after the First/Second Lien Discharge Date but before the Senior Parent Discharge Date, and subject always to the provisions set out under the caption "*—Payment Blockage Provisions—Restrictions on Enforcement by Senior Parent Creditors*," the Majority Senior Parent Creditors.

In the foregoing definition of "Instructing Group":

"**Majority Senior Parent Creditors**" means, at any time, those Senior Parent Creditors whose Senior Parent Credit Participations at that time aggregate to more than 66⅔% of the total aggregate amount of all Senior Parent Credit Participations at that time.

"**Second Lien Secured Credit Participation**" means:

(a) in relation to a Second Lien Lender, its second lien commitments; and

(b) in relation to a Permitted Second Lien Financing Creditor, the aggregate amount of its commitments under each Permitted Second Lien Financing Agreement (drawn or undrawn and calculated in a manner consistent with the second lien commitments) and/or the principal amount of outstanding Permitted Second Lien Financing Debt held by that Permitted Second Lien Financing Creditor (as applicable and without double counting).

"**Senior Parent Credit Participation**" means:

(a) in relation to a Senior Parent Noteholder, the principal amount of outstanding Senior Parent Notes Liabilities held by that Senior Parent Noteholder; and

(b) in relation to a Permitted Parent Financing Creditor, the aggregate amount of its commitments under each Permitted Parent Financing Agreement (drawn or undrawn and calculated in a manner consistent with the senior commitments) and/or the principal amount of outstanding Permitted Parent Financing Debt held by that Permitted Parent Financing Creditor (as applicable and without double counting).

"**Senior Secured Credit Participation**" means:

(a) in relation to a Senior Creditor, its Senior Credit Participation in relation to the Senior Facilities Agreement, the Priority Facility Agreements and the hedging agreements only;

(b) in relation to a Senior Noteholder, the principal amount of outstanding Senior Notes liabilities held by that Senior Noteholder; and

(c) in relation to a Permitted Senior Financing Creditor, the aggregate amount of its commitments under each Permitted Senior Financing Agreement (drawn or undrawn and calculated in a manner consistent with the senior commitments) and/or the principal amount of outstanding Permitted Senior Financing Debt held by that Permitted Senior Financing Creditor (as applicable and without double counting).

"**Total Second Lien Secured Credit Participations**" means the aggregate of all the Second Lien Secured Credit Participations at any time.

"**Total Senior Secured Credit Participations**" means the aggregate of all the Senior Secured Credit Participations at any time.

Restrictions Relating to Second Lien Secured Creditors and Second Lien Liabilities

Restriction on Payment and Dealings

The Intercreditor Agreement provides that, until the Senior Discharge Date, no Debtor or Third Party Security Provider shall (and the Company shall ensure that no member of the Group will) make any payment of the Second Lien Liabilities at any time unless:

(a) that payment is permitted by the provisions set out below under the captions "*—Permitted Second Lien Liabilities Payments*," and the fourth paragraph under the caption "*—Effect of Insolvency Event; Filing of Claims*" or by a refinancing of the Second Lien Debt or the Permitted Second Lien Financing Debt as permitted by the Intercreditor Agreement; or

(b) the taking or receipt of that payment is permitted by the provisions set out below under the caption "*—Permitted Second Lien Enforcement.*"

Permitted Second Lien Liabilities Payments

Prior to the Senior Discharge Date, any member of the Group or Third Party Security Provider may, directly or indirectly, make payments with respect to the Second Lien Liabilities at any time:

(a) if:

(i) the payment is of:

(A) any of the principal amount of the Second Lien Liabilities which is either (1) not prohibited from being paid by the Senior Financing Agreements; or (2) paid on or after the final maturity date of the relevant Second Lien Liabilities (subject to certain conditions); or

(B) any other amount which is not an amount of principal or capitalized interest;

(ii) no Second Lien Payment Stop Notice (as defined below) is outstanding;

(iii) no payment default under the Senior Facilities Agreement, any Senior Notes Indenture or any Permitted Senior Financing Documents (the "**Senior Payment Default**") has occurred and is continuing;

(b) if the Majority Senior Lenders, the Senior Notes Trustee and the Permitted Majority Senior Financing Creditors or the Senior Creditor Representative in respect of that Permitted Senior Financing Debt (as applicable) (the "**Required Senior Consent**") give prior consent to that payment being made; or

(c) if the payment is of

(i) Second Lien Agent Liabilities;

(ii) any costs and expenses of any holder of security in relation to protection, preservation or enforcement of such security;

(iii) of costs, commissions, taxes, fees and expenses incurred in respect of or in relation to (or reasonably incidental to) any of the Second Lien Debt Documents (including in relation to any reporting or listing requirements under such documents);

(d) if the Payment is funded directly or indirectly with Second Lien Debt, Permitted Second Lien Financing Debt, Permitted Parent Financing Debt and/or the proceeds of any indebtedness incurred under or pursuant to any Second Lien Debt Document and/or Senior Parent Notes;

(e) if the payment is funded directly or indirectly with the proceeds of an Equity Contribution (other than any Equity Contribution received by the Group on or prior to the first utilization date) or Available Shareholder Amounts; or

(f) of any other amount not exceeding €5,000,000 (or its equivalent) in aggregate in any financial year of the Company.

On or after the Senior Discharge Date, any Debtor or Third Party Security Provider may make payments to the Second Lien Creditors in respect of the Second Lien liabilities in accordance with the terms of the Second Lien Finance Documents, as applicable.

Payment Blockage Provisions—Restrictions on Enforcement by Second Lien Secured Creditors

Until the Senior Discharge Date, except with the Required Senior Consent, no Debtor shall make (and the Company shall procure that no other member of the Group shall make), and no Second Lien Secured Creditor may receive from any other member of the Group, any Permitted Second Lien Payment (other than, for the avoidance of doubt, a roll-up or capitalization of any amount and Second Lien Agent Liabilities, and payments permitted under (b) to (f) under the caption "*—Permitted Second Lien Liabilities Payments*") if:

(a) a Senior Payment Default is continuing; or

(b) an insolvency event of default under the Senior Facilities Agreement, any Senior Notes Indenture and/or any Permitted Senior Financing Agreement and/or a breach of the revolving facility financial maintenance covenant under the Senior Facilities Agreement (a "**Material Event of Default**") is continuing, from the date which is one Business Day after the date on which any Senior Agent delivers a notice (a "**Second Lien Payment Stop Notice**") specifying the event or circumstance in relation to that Material Event of Default to the Company, the Security Agent and the Second Lien Agents until the earliest of:

    (i) the date falling 120 days after delivery of that Second Lien Payment Stop Notice;

    (ii) in relation to payments of Second Lien Liabilities, if a Second Lien Standstill Period is in effect at any time after delivery of that Second Lien Payment Stop Notice, the date on which that Second Lien Standstill Period expires;

    (iii) the date on which the relevant Material Event of Default has been remedied or waived in accordance with the Senior Facilities Agreement, any Senior Notes Indenture or any Permitted Senior Financing Agreement (as applicable);

    (iv) the date on which the Senior Agent which delivered the relevant Second Lien Payment Stop Notice delivers a notice to the Company, the Security Agent and the Second Lien Agents cancelling the Second Lien Payment Stop Notice;

    (v) the Senior Discharge Date; and

    (vi) the date on which the Security Agent or a Second Lien Agent takes Enforcement Action permitted under the Intercreditor Agreement against a Debtor or a Third Party Security Provider.

Unless each of the Second Lien Agents waives this requirement, (i) a new Second Lien Payment Stop Notice may not be delivered unless and until 360 days have elapsed since the delivery of the immediately prior Second Lien Payment Stop Notice; and (ii) no Second Lien Payment Stop Notice may be delivered by a Senior Agent in reliance on a Material Event of Default more than 75 days after the date that Senior Agent received notice of that Material Event of Default.

The Senior Agents may only serve one Second Lien Payment Stop Notice with respect to the same event or set of circumstances. Subject to the immediately preceding paragraph, this shall not affect the right of the Agents to issue a Second Lien Payment Stop Notice in respect of any other event or set of circumstances. No Second Lien Payment

Stop Notice may be served by an Agent in respect of a Material Event of Default which had been notified to the Agents at the time at which an earlier Second Lien Payment Stop Notice was issued.

Any failure to make a payment due under the Second Lien Debt Documents as a result of the issue of a Second Lien Payment Stop Notice or the occurrence of a Senior Payment Default shall not prevent (i) the occurrence of an Event of Default (as defined under a Second Lien Financing Agreement) as a consequence of that failure to make a payment in relation to the relevant Second Lien Debt Document; or (ii) the issue of a Second Lien Enforcement Notice on behalf of the Second Lien Secured Creditors.

Payment Obligations and Capitalization of Interest Continue

No Debtor or Third Party Security Provider shall be released from the liability to make any payment (including of default interest, which shall continue to accrue) under any Second Lien Debt Document by the operation of the provisions set out under each section above under the caption "*—Restrictions Relating to Second Lien Secured Creditors and Second Lien Liabilities*" even if its obligation to make such payment is restricted at any time by the terms of any of those provisions.

The accrual and capitalization of interest (if any) in accordance with the Second Lien Debt Documents shall continue notwithstanding the issue of a Second Lien Payment Stop Notice.

Cure of Payment Stop—Second Lien Secured Creditors

If:

(i) at any time following the issue of a Second Lien Payment Stop Notice or the occurrence of a Senior Payment Default, that Second Lien Payment Stop Notice ceases to be outstanding and/or, as the case may be, the Senior Payment Default ceases to be continuing; and

(ii) any Debtor then promptly pays to the Second Lien Secured Creditors an amount equal to any Payments which had accrued under the Second Lien Debt Documents and which would have been Permitted Second Lien Payments but for that Second Lien Payment Stop Notice or Senior Payment Default,

then any Event of Default (including any cross default or similar provision under any other Debt Document) which may have occurred as a result of that suspension of Payments shall be waived and any Second Lien Enforcement Notice which may have been issued as a result of that Event of Default shall be waived, in each case without any further action being required on the part of the Second Lien Secured Creditors or any other Creditor or Operating Facility Lender.

Restrictions on Enforcement by Second Lien Secured Creditors

Until the Senior Discharge Date, except with the prior consent of or as required by an Instructing Group:

(i) no Second Lien Secured Creditor shall direct the Security Agent to enforce or otherwise require the enforcement of any security; and/or

(ii) no Second Lien Secured Creditor shall take or require the taking of any Enforcement Action in relation to the Second Lien Liabilities,

except as permitted under the provisions set out below under the caption "*—Permitted Second Lien Enforcement*" below, *provided*, *however*, that no such action required by the Security Agent need be taken except to the extent the Security Agent otherwise is entitled under the Intercreditor Agreement to direct such action.

Permitted Second Lien Enforcement

Subject to the provisions set out under the caption "—E*nforcement on behalf of Second Lien Secured Creditors*," the restrictions set out under the caption "*—Payment Blockage Provisions—Restrictions on Enforcement by Second Lien Secured Creditors*" above will not apply if:

(i) an Event of Default (as defined under a Second Lien Financing Agreement, a "**Second Lien Event of Default**") (the "**Relevant Second Lien Default**") is continuing;

(ii) each Senior Agent has received a notice of the Relevant Second Lien Default specifying the event or circumstance in relation to the Relevant Second Lien Default from the relevant Second Lien Agent;

(iii) a Second Lien Standstill Period (as defined below) has elapsed; and

(iv) the Relevant Second Lien Default is continuing at the end of the relevant Second Lien Standstill Period.

Promptly upon becoming aware of a Second Lien Event of Default, the relevant Second Lien Agent may by notice (a "**Second Lien Enforcement Notice**") in writing notify the Senior Agents of the existence of such Second Lien Event of Default.

Second Lien Standstill Period

In relation to a Relevant Second Lien Default, a Second Lien Standstill Period shall mean the period beginning on the date (the "**Second Lien Standstill Start Date**") the relevant Senior Agent serves a Second Lien Enforcement Notice on each of the Senior Agents in respect of such Second Lien Event of Default and ending on the earlier to occur of:

(i) the date falling 120 days after the Second Lien Standstill Start Date;

(ii) the date the Senior Secured Parties (other than the Second Lien Secured Creditors) take any Enforcement Action in relation to a particular Second Lien Borrower or Second Lien Guarantor or Third Party Security Provider, *provided*, *however*, that if a Senior Parent Standstill Period ends pursuant to this paragraph, the Second Lien Secured Creditors may only take the same Enforcement Action in relation to the relevant Second Lien Borrower or Second Lien Guarantor or Third Party Security Provider as the Enforcement Action taken by the Senior Secured Parties (other than the Second Lien Secured Creditors) against such Second Lien Borrower or Second Lien Guarantor or Third Party Security Provider and not against any other member of the Group or other Third Party Security Provider;

(iii) the date of an Insolvency Event in relation to the relevant Second Lien Borrower or a particular Second Lien Guarantor or Third Party Security Provider against whom Enforcement Action is to be taken;

(iv) the expiry of any other Second Lien Standstill Period outstanding at the date such first-mentioned Second Lien Standstill Period commenced (unless that expiry occurs as a result of a cure, waiver or other permitted remedy);

(v) the date on which the consent of each of the Senior Facility Agent (acting on the instructions of the Majority Senior Lenders), any Senior Notes Trustee (acting on behalf of the Senior Noteholders), any Priority Facility Agent (acting on behalf of the Priority Facility Lenders) and any Senior Creditor Representative (acting on the instructions the Majority Permitted Senior Financing Creditors) has been obtained; and

(vi) a failure to pay the principal amount outstanding under any Second Lien Facility or on any Permitted Second Lien Financing Debt, as the case may be, at the final stated maturity of the amounts outstanding on that Second Lien Facility or on that Permitted Second Lien Financing Debt, as the case may be (*provided* that, unless the Senior Lender Discharge Date and the Senior Notes Tranche Holder Discharge Date has occurred or as otherwise agreed by the Majority Senior / Notes Tranche Lenders and the Company, such final stated maturity does not fall on a date prior to the first anniversary of the latest maturity date under the Senior Facilities Agreement and any Senior Notes Tranche Notes).

Subsequent Second Lien Facility Defaults

The Second Lien Secured Creditors may take Enforcement Action under the provisions set out in caption "*—Permitted Second Lien Enforcement*" in relation to a Relevant Second Lien Default even if, at the end of any relevant Second Lien Standstill Period or at any later time, a further Second Lien Standstill Period has begun as a result of any other Second Lien Event of Default.

Enforcement on behalf of Second Lien Secured Creditors

If the Security Agent has notified the Second Lien Agents that it is enforcing Security created pursuant to any security document over shares of a Second Lien Borrower or a Second Lien Guarantor, no Second Lien Secured Creditor may take any action referred to under the provisions set out under the caption "*—Permitted Second Lien Enforcement*" against that Second Lien Borrower or Second Lien Guarantor (or any Subsidiary of that Second Lien Borrower or Second Lien Guarantor) while the Security Agent is taking steps to enforce that Security in accordance with the instructions of an Instructing Group where such action might be reasonably likely to adversely affect such enforcement or the amount of proceeds to be derived therefrom.

Option to Purchase: Second Lien Secured Creditors

Subject to the final two paragraphs of this section below, any of the Second Lien Agent(s) (on behalf of the Second Lien Secured Creditors) may, after an acceleration event under any of the Senior Facilities Agreement, any Senior Notes Indenture or in relation to any Permitted Senior Financing Debt which is continuing, by giving not less than 10 days' notice to the Security Agent, require the transfer to the Second Lien Secured Creditors (or to a nominee or nominees) of all, but not part, of the rights, benefits and obligations in respect of the Senior Lender Liabilities, the Senior Notes Liabilities, any Permitted Senior Financing Liabilities, any Priority Facility Liabilities and the Operating Facility Liabilities if:

(i) that transfer is lawful and, subject to paragraph (ii) below, otherwise permitted by the terms of the Senior Facilities Agreement (in the case of the Senior Lender Liabilities), any Senior Notes Indenture(s) pursuant to which any Senior Notes remain outstanding (in the case of the Senior Notes Liabilities), any Permitted Senior Financing Agreement pursuant to which any relevant Permitted Senior Financing Liabilities remain outstanding (in the case of the Permitted Senior Financing Liabilities) and/or any Operating Facility Documents pursuant to which any relevant Operating Facility Liabilities remain outstanding (in the case of the Operating Facility Liabilities) and/or any Priority Facility Agreement pursuant to which any relevant Priority Facility Liabilities remain outstanding (in the case of the Priority Facility Liabilities);

(ii) any conditions relating to such a transfer contained in the Senior Facilities Agreement (in the case of the Senior Lender Liabilities), any Senior Notes Indenture(s) pursuant to which any Senior Notes remain outstanding (in the case of the Senior Notes Liabilities), any Permitted Senior Financing Agreement pursuant to which any relevant Permitted Senior Financing Liabilities remain outstanding (in the case of the Permitted Senior Financing Liabilities) and/or any Operating Facility Documents pursuant to which any relevant Operating Facility Liabilities remain outstanding (in the case of the Operating Facility Liabilities) and/or any Priority Facility Agreement pursuant to which any relevant Priority Facility Liabilities remain outstanding (in the case of the Priority Facility Liabilities) are complied with, in each case, other than as specified in the Intercreditor Agreement;

(iii) each of the Senior Facility Agent (on behalf of the Senior Lenders), the applicable Senior Notes Trustee (on behalf of the relevant Senior Noteholders), the applicable Senior Creditor Representative (on behalf of the relevant Permitted Senior Financing Creditors) and the Operating Facility Lenders is paid the amounts required under the Intercreditor Agreement;

(iv) the applicable Priority Facility Agent, on behalf of the Priority Facility Lenders, is paid the amounts required under the Intercreditor Agreement;

(v) as a result of that transfer the Senior Lenders, the Priority Facility Lenders, the Senior Notes Creditors, the Permitted Senior Financing Creditors and the Operating Facility Lenders have no further actual or contingent liability to the Company or any other Debtor or a Third Party Security Provider under the relevant Secured Debt Documents;

(vi) an indemnity is provided from each Second Lien Secured Creditor (other than any Second Lien Agent) (or from another third party acceptable to all the Senior Lenders, the Senior Notes Creditors, the Permitted Senior Financing Creditor, the Operating Facility Lenders and the Priority Facility Lenders) in a form reasonably satisfactory to each Senior Lender, Priority Facility Lender, Senior Notes Creditor, Permitted Senior

Financing Creditor and Operating Facility Lender in respect of all costs, expenses, losses and liabilities which may be sustained or incurred by any Senior Lender, Priority Facility Lender, Senior Notes Creditor, Permitted Senior Financing Creditor or Operating Facility Lender in consequence of any sum received or recovered by any Senior Lender, Priority Facility Lender, Senior Notes Creditor, Permitted Senior Financing Creditor or Operating Facility Lender from any person being required (or it being alleged that it is required) to be paid back by or clawed back from any Senior Lender, Senior Notes Creditor, Permitted Senior Financing Creditor or Operating Facility Lender for any reason; and

(vii) the transfer is made without recourse to, or representation or warranty from, the Senior Lenders, the Priority Facility Lenders, the Senior Notes Creditors, the Permitted Senior Financing Creditors or the Operating Facility Lenders, except that each Senior Lender, Senior Notes Creditor, Permitted Senior Financing Creditor and Operating Facility Lender shall be deemed to have represented and warranted on the date of that transfer that it has the corporate power to effect that transfer and it has taken all necessary action to authorize the making by it of that transfer.

Subject to the terms of the Intercreditor Agreement, a Second Lien Agent (on behalf of all the Second Lien Secured Creditors) may only require a transfer of Senior Secured Liabilities if, at the same time, they require a transfer of hedging liabilities regulated by the Intercreditor Agreement and if, for any reason, such transfer cannot be made in accordance with the Intercreditor Agreement, no transfer of Senior Secured Liabilities may be required to be made.

At the request of a Second Lien Agent (on behalf of all the Second Lien Secured Creditors), the Senior Facility Agent, the Priority Facility Agent any relevant Senior Notes Trustee, any relevant Senior Creditor Representative and the Operating Facility Lenders shall notify the Second Lien Agents of the foregoing payable sums in connection with such transfer.

Restrictions Relating to Senior Parent Creditors and Senior Parent Liabilities

Restriction on Payment and Dealings

The Intercreditor Agreement provides that, until the First/Second Lien Discharge Date, no Senior Parent Debt Issuer shall (and no Third Party Security Provider shall and the Company shall ensure that no member of the Group will):

(a) pay, repay, prepay, redeem, acquire or defease any principal, interest or other amount on or in respect of, or make any distribution in respect of, any Senior Parent Notes liabilities and any Permitted Parent Financing Liabilities in cash or in kind or apply any such money or property in or towards discharge of any Senior Parent Notes Liabilities and any Permitted Parent Financing Liabilities except as permitted by the provisions set out below under the captions "*—Permitted Senior Parent Payments*," "*—Permitted Senior Parent Enforcement*," and the fourth paragraph under the caption "*—Effect of Insolvency Event; Filing of Claims*" or by a refinancing of the Senior Parent Notes or the Permitted Parent Financing Debt as permitted by the Intercreditor Agreement;

(b) exercise any set-off against any Senior Parent Notes liabilities and any Permitted Parent Financing Liabilities, except as permitted by the provisions set out under the caption "*—Permitted Senior Parent Payments*" below, the provisions set out under the caption "*—Payment Blockage Provisions—Restrictions on Enforcement by Senior Parent Creditors*" below or the fourth paragraph under the caption "*—Effect of Insolvency Event; Filing of Claims*" below or by a refinancing of the Senior Parent Notes or the Permitted Parent Financing Debt as permitted by the Intercreditor Agreement; or

(c) create or permit to subsist any security over any assets of any member of the Group or any Third Party Security Provider or give any guarantee (and the Senior Parent Notes Trustee or Senior Parent Creditor Representative, as the case may be, may not, and no Senior Parent Creditor may, accept the benefit of any such security or guarantee from any member of the Group or any Third Party Security Provider) for, or in respect of, any Senior Parent Notes liabilities or any Permitted Parent Financing Liabilities other than:

    (i) guarantees by a member of the Group of any obligations of the Group under the Senior Parent Notes Finance Documents and/or the Permitted Parent Financing Documents;

(ii) at the option of the Company and/or (with respect to any Third Party Security), the relevant Third Party Security Provider, all or any of the transaction security (*provided* that, for the avoidance of doubt, each of the parties agrees that the security shall rank and secure any Senior Parent Notes and any Permitted Parent Financing Debt as set out in "*—Ranking and Priority—Priority of Security*)";

(iii) any security over any assets of any Senior Parent Debt Issuer or Third Party Security Provider (other than, any such assets over which a Senior Parent Debt Issuer has granted security);

(iv) any other security or guarantee provided by a member of the Group or a Third Party Security Provider (the "**Credit Support Provider**") *provided* that, to the extent legally possible:

(A) the Credit Support Provider (other than any Third Party Security Provider) becomes party to the Intercreditor Agreement as a Debtor (if not already a party in that capacity);

(B) all amounts actually received or recovered by the Senior Parent Notes Trustee, the Senior Parent Creditor Representative or the Senior Parent Creditors, as the case may be, with respect to any such security shall immediately be paid to the Security Agent and applied in accordance with the provisions set out under the caption "*—Application of Proceeds*";

(C) any such security may only be enforced in accordance with the provisions set out under the caption "*—Enforcement of Security—Security Held by Other Creditors*"; and

(D) such guarantee is expressed to be subject to the Intercreditor Agreement; and

(v) any security, guarantee, indemnity or other assurance against loss from any member of the Group or a Third Party Security Provider in connection with:

(A) any escrow or similar or equivalent arrangements entered into in respect of amounts which are being held (or will be held) by a person which is not a member of the Group or a Third Party Security Provider prior to release of those amounts to a member of the Group or a Third Party Security Provider; or

(B) any actual or proposed defeasance, redemption, prepayment, repayment, purchase or other discharge of any Senior Lender Liabilities, Operating Facility Liabilities, any Priority Facility Liabilities, any Senior Notes liabilities and/or any Permitted Senior Financing Liabilities (in each case *provided* that such defeasance, redemption, prepayment, repayment, purchase or other discharge is not prohibited by the terms of the Intercreditor Agreement).

Permitted Senior Parent Payments

Prior to the First/Second Lien Discharge Date, any member of the Group or Third Party Security Provider may, directly or indirectly, make payments with respect to the Senior Parent Notes liabilities and any Permitted Parent Financing Liabilities then due in accordance with the finance documents in relation to the Senior Parent Notes and the Permitted Parent Financing Debt (such payments, collectively, "**Permitted Senior Parent Payments**"):

(a) if:

(i) the payment is of:

(A) any of the principal amount of the Senior Parent Notes liabilities and the Permitted Parent Financing Liabilities which is either (1) not prohibited from being paid by the Senior Financing Agreements; or (2) paid on or after the final maturity date of the relevant Senior Parent Notes liabilities and Permitted Parent Financing Liabilities (subject to certain conditions); or

(B) any other amount which is not an amount of principal or capitalized interest;

(ii) no Senior Parent Payment Stop Notice (as defined below) is outstanding;

(iii) no Senior Payment Default has occurred and is continuing; and

(iv) no payment default under the Second Lien Facility Agreement or the Permitted Second Lien Financing Documents has occurred and is continuing;

(b) if the Required Senior Consent has been obtained;

(c) if consent has been obtained from the Majority Second Lien Lenders and the Majority Permitted Second Lien Financing Creditors or the Creditor Representative in respect of that Permitted Second Lien Financing Debt Senior Lenders (as applicable);

(d) if the payment is of certain amounts due to the Senior Parent Notes Trustee for its own account;

(e) if the payment is made by the relevant Senior Parent Debt Issuer and funded directly or indirectly with amounts which have not been received by that Senior Parent Debt Issuer from another member of the Group;

(f) if the payment is of any costs and expenses of any holder of security in relation to protection, preservation or enforcement of such security;

(g) if the payment is of costs, commissions, taxes, fees and expenses incurred in respect of or in relation to (or reasonably incidental to) any of the Senior Parent Notes Indenture and any Permitted Parent Financing Documents (including in relation to any reporting or listing requirements under such documents);

(h) if the payment is funded directly or indirectly with Permitted Parent Financing Debt and/or the proceeds of any indebtedness incurred under or pursuant to any Senior Parent Notes;

(i) if the payment is funded directly or indirectly with the proceeds of an Equity Contribution (other than any Equity Contribution received by the Group on or prior to the First Utilisation Date) or Available Shareholder Amounts; or

(j) of any other amount not exceeding €5,000,000 (or its equivalent) in aggregate in any financial year of the Company.

On or after the First/Second Lien Discharge Date, the Debtors may make payments directly or indirectly in respect of the Senior Parents Liabilities at any time.

Payment Blockage Provisions—Restrictions on Enforcement by Senior Parent Creditors

Until the Senior Discharge Date, except with the Required Senior Consent, and until the Second Lien Discharge Date, except with the Required Second Lien Consent, no Senior Parent Debt Issuer shall make (and the Company shall procure that no other member of the Group shall make), and neither the Senior Parent Notes Trustee, any holder of Senior Parent Notes or the Permitted Parent Financing Creditors may receive from any other members of the Group, any Permitted Senior Parent Payment (other than, for the avoidance of doubt, a roll-up or capitalization of any amount and certain amounts due to the Senior Parent Notes Trustee for its own account, payments funded by amounts not received from another member of the Group or payments funded by Permitted Parent Financing Debt and/or the proceeds of any indebtedness incurred or pursuant to any Senior Parent Notes) if:

(a) a Senior Payment Default and/or a Second Lien Payment Default is continuing; or

(b) an event of default under the Senior Facilities Agreement, any Second Lien Facility Agreement, any Senior Notes Indenture, any Permitted Senior Financing Agreement and/or any Permitted Second Lien Financing Agreement (a "**Senior Event of Default**") (other than a Senior Payment Default and/or a Second Lien Payment Default) is continuing, from the date which is one business day after the date on which any of the Senior Facility Agent, the Senior Notes Trustee and any Senior Creditor Representative (together, the "**Senior Agents**") delivers a payment stop notice (a "**Senior Parent Payment Stop Notice**") specifying the event or

circumstance in relation to that Senior Event of Default to the Company, the Security Agent, the Senior Parent Notes Trustee and any Senior Parent Creditor Representative until the earliest of:

(i) the date falling 179 days after delivery of that Senior Parent Payment Stop Notice;

(ii) in relation to payments of the Senior Parent Notes liabilities and any Permitted Parent Financing Liabilities, if a Parent standstill period is in effect at any time after delivery of that payment stop notice, the date on which that standstill period expires;

(iii) the date on which the relevant Senior Event of Default has been remedied or waived in accordance with the Senior Facilities Agreement, any Senior Notes Indenture or any Permitted Senior Financing Agreement (as applicable);

(iv) the date on which the Senior Agent which delivered the relevant Senior Parent Payment Stop Notice delivers a notice to the Company, the Security Agent, the Senior Parent Notes Trustee and the Senior Parent Creditor Representative cancelling the Senior Parent Payment Stop Notice;

(v) the First/Second Lien Discharge Date; and

(vi) the date on which the Security Agent, the Senior Parent Notes Trustee and any Senior Parent Creditor Representative take Enforcement Action permitted under the Intercreditor Agreement against a Debtor and/or a Third Party Security Provider.

Unless the Senior Parent Notes Trustee and any Senior Parent Creditor Representative waive this requirement, (i) a new Senior Parent Payment Stop Notice may not be delivered unless and until 360 days have elapsed since the delivery of the immediately prior Senior Parent Payment Stop Notice; and (ii) no Senior Parent Payment Stop Notice may be delivered by a Senior Agent in reliance on a Senior Event of Default more than 45 days after the date that Senior Agent received notice of that Senior Event of Default.

The Senior Agents may only serve one Senior Parent Payment Stop Notice with respect to the same event or set of circumstances. Subject to the immediately preceding paragraph, this shall not affect the right of the Senior Agents to issue a Senior Parent Payment Stop Notice in respect of any other event or set of circumstances. No Senior Parent Payment Stop Notice may be served by a Senior Agent in respect of a Senior Event of Default which had been notified to the Senior Agents at the time at which an earlier Senior Parent Payment Stop Notice was issued.

Any failure to make a payment due under any Senior Parent Notes Indenture and any Permitted Parent Financing Documents as a result of the issue of a Senior Parent Payment Stop Notice or the occurrence of a Senior Payment Default shall not prevent (i) the occurrence of an Event of Default (as defined in any Senior Parent Notes Indenture or any Permitted Parent Financing Documents, as applicable) as a consequence of that failure to make a payment in relation to the relevant Senior Parent Notes Indenture and any Permitted Parent Financing Documents; or (ii) the issue of a Senior Parent Enforcement Notice (as defined below) on behalf of the Senior Parent Creditors.

Payment Obligations and Capitalization of Interest Continue

Neither the relevant Senior Parent Debt Issuer, any other Debtor nor Third Party Security Provider shall be released from the liability to make any payment (including of default interest, which shall continue to accrue) under any Senior Parent Notes Indenture and any Permitted Parent Financing Document by the operation of the provisions set out under each section above under the caption "*—Restrictions Relating to Senior Parent Creditors and Senior Parent Liabilities*" even if its obligation to make such payment is restricted at any time by the terms of any of those provisions.

The accrual and capitalization of interest (if any) in accordance with any Senior Parent Notes Indenture and any Permitted Parent Financing Document shall continue notwithstanding the issue of a Senior Parent Payment Stop Notice.

Cure of Payment Stop—Senior Parent Creditors

If:

(i) at any time following the issue of a Senior Parent Payment Stop Notice or the occurrence of a Senior Payment Default, that Senior Parent Payment Stop Notice ceases to be outstanding and/or, as the case may be, the Senior Payment Default ceases to be continuing; and

(ii) the relevant Senior Parent Debt Issuer or the relevant Debtor then promptly pays to the Senior Parent Creditors an amount equal to any payments which had accrued under any Senior Parent Notes Indenture and any Permitted Parent Financing Document and which would have been Permitted Senior Parent Payments but for that Senior Parent Payment Stop Notice or Senior Payment Default,

then any Event of Default (including any cross default or similar provision under any other debt document) which may have occurred as a result of that suspension of payments shall be waived and any Senior Parent Enforcement Notice which may have been issued as a result of that Event of Default shall be waived, in each case without any further action being required on the part of the Senior Parent Creditors or any other Creditor or Operating Facility Lender.

Restrictions on Amendments and Waivers

The Intercreditor Agreement provides that the Senior Parent Creditors, the relevant Senior Parent Debt Issuers and other Debtors may amend or waive the terms of the Senior Parent Notes Finance Documents and/or the Permitted Parent Financing Documents in accordance with their respective terms from time to time (and subject only to any consent required under them).

Restrictions on Enforcement by Senior Parent Creditors

Until the First/Second Lien Discharge Date, except with the prior consent of or as required by an Instructing Group:

(i) no Senior Parent Creditor shall direct the Security Agent to enforce, or otherwise require the enforcement of, any security; and/or

(ii) no Senior Parent Creditor shall take or require the taking of any Enforcement Action in relation to the guarantees by a member of the Group of any of the obligations of any member of the Group under the Senior Parent Notes Finance Documents and/or Permitted Parent Financing Documents,

except as permitted under the provisions set out below under the caption "*—Permitted Senior Parent Enforcement*" below, *provided*, *however*, that no such action required by the Security Agent need be taken except to the extent the Security Agent otherwise is entitled under the Intercreditor Agreement to direct such action.

Permitted Senior Parent Enforcement

The restrictions set out under the caption "*—Payment Blockage Provisions—Restrictions on Enforcement by Senior Parent Creditors*" above will not apply if:

(i) an Event of Default (as defined in any Senior Parent Notes Finance Document and any Permitted Parent Financing Agreement, as applicable, each a "**Senior Parent Event of Default**") (the "**Relevant Senior Parent Default**") is continuing;

(ii) each Senior Agent has received a notice of the Relevant Senior Parent Default specifying the event or circumstance in relation to the Relevant Senior Parent Default from the Senior Parent Notes Trustee or any Senior Parent Creditor Representative (as the case may be);

(iii) a Senior Parent Standstill Period (as defined below) has elapsed; and

(iv) the Relevant Senior Parent Default is continuing at the end of the relevant Senior Parent Standstill Period.

Promptly upon becoming aware of a Senior Parent Event of Default, the Senior Parent Notes Trustee or any Senior Parent Creditor Representative, as the case may be, may by notice (a "**Senior Parent Enforcement Notice**") in writing notify the Senior Agents of the existence of such Senior Parent Event of Default.

Senior Parent Standstill Period

In relation to a Relevant Senior Parent Default, a Senior Parent Standstill Period shall mean the period beginning on the date (the "**Senior Parent Standstill Start Date**") the relevant Senior Agent serves a Senior Parent Enforcement Notice on each of the Senior Agents in respect of such Senior Parent Event of Default and ending on the earlier to occur of:

(i) the date falling 179 days after the Senior Parent Standstill Start Date (the "**Senior Parent Standstill Period**");

(ii) the date the Senior Secured Parties take any Enforcement Action in relation to a particular guarantor of the Senior Parent Notes and/or any Permitted Parent Financing Debt (a "**Senior Parent Guarantor**") and/or a Third Party Security Provider, *provided*, *however*, that if a Senior Parent Standstill Period ends pursuant to this paragraph, the Senior Parent Creditors may only take the same Enforcement Action in relation to the Senior Parent Guarantor and/or a Third Party Security Provider as the Enforcement Action taken by the Senior Secured Parties against such Senior Parent Guarantor and/or a Third Party Security Provider and not against any other member of the Group or other Third Party Security Provider;

(iii) the date of an Insolvency Event in relation to the relevant Senior Parent Debt Issuer or a particular Senior Parent Guarantor or Third Party Security Provider against whom Enforcement Action is to be taken;

(iv) the expiry of any other Senior Parent Standstill Period outstanding at the date such first-mentioned Senior Parent Standstill Period commenced (unless that expiry occurs as a result of a cure, waiver or other permitted remedy);

(v) the date on which the consent of each of the Senior Facility Agent (acting on the instructions of the Majority Senior Lenders), the Second Lien Facility Agent (acting on the instructions of the Majority Second Lien Lenders), any Senior Notes Trustee (acting on behalf of the Senior Noteholders), any Senior Creditor Representative (acting on the instructions the Majority Permitted Senior Financing Creditors), any Priority Facility Agent (acting on the instructions of the Majority Priority Facility Lenders) and any Second Lien Creditor Representative (acting on the instructions of the Majority Permitted Second Lien Financing Creditors) has been obtained; and

(vi) a failure to pay the principal amount outstanding on any Senior Parent Notes or on any Permitted Parent Financing Debt, as the case may be, at the final stated maturity of the amounts outstanding on the Senior Parent Notes or on the Permitted Parent Financing Debt, as the case may be (*provided* that unless the Senior Lender Discharge Date and the Senior Notes Tranche Holder Discharge Date has occurred or as otherwise agreed by the Majority Senior / Notes Tranche Lenders and the Company, such final stated maturity does not fall on a date prior to the first anniversary of the latest maturity date under the Senior Facilities Agreement and the Senior Notes Tranche Notes).

Subsequent Senior Parent Event of Default

The Senior Parent Finance Parties may take Enforcement Action under the provisions set out in caption "—*Permitted Senior Parent Enforcement*" above in relation to a Relevant Senior *Parent* Default even if, at the end of any relevant Senior Parent Standstill Period or at any later time, a further Senior Parent Standstill Period has begun as a result of any other Senior Parent Event of Default.

Enforcement on Behalf of Senior Parent Creditors

If the Security Agent has notified the Senior Parent Agents that it is enforcing security created pursuant to any security document over shares of a Senior Parent Guarantor, no Senior Parent Creditor may take any action referred to under the provisions set out under the caption "—*Permitted Senior Parent Enforcement*" above against that Senior Parent Guarantor while the Security Agent is taking steps to enforce that security in accordance with the instructions of an Instructing Group where such action might be reasonably likely to adversely affect such enforcement or the amount of proceeds to be derived therefrom.

Option to Purchase: Senior Parent Creditors

Subject to the final two paragraphs of this section below, any of the Senior Parent Notes Trustee and any Senior Parent Creditor Representative (on behalf of the Senior Parent Creditors) may, after an acceleration event under the Senior Facilities Agreement, any Senior Notes or Permitted Senior Financing Debt which is continuing, by giving not less than 10 days' notice to the Security Agent, require the transfer to the Senior Parent Creditors (or to a nominee or nominees) of all, but not part, of the rights, benefits and obligations in respect of the Senior Secured Liabilities and the Operating Facility Liabilities if:

(i) that transfer is lawful and, subject to paragraph (ii) below, otherwise permitted by the terms of the Senior Facilities Agreement (in the case of the Senior Lender Liabilities), the Second Lien Facility Agreement (in the case of the Second Lien Lenders Liabilities), any Senior Notes Indenture(s) pursuant to which any Senior Notes remain outstanding (in the case of the Senior Notes liabilities), any Permitted Senior Financing Agreement pursuant to which any relevant Permitted Senior Financing Liabilities remain outstanding (in the case of the Permitted Senior Financing Liabilities), any Permitted Second Lien Financing Agreement pursuant to which any relevant Permitted Second Lien Financing Liabilities remain outstanding (in the case of the Permitted Second Lien Financing Liabilities), any Operating Facility Documents pursuant to which any relevant Operating Facility Liabilities remain outstanding (in the case of the Operating Facility Liabilities) and/or any Priority Facility Agreement pursuant to which any relevant Priority Facility Liabilities remain outstanding (in the case of the Priority Facility Liabilities) (as applicable);

(ii) any conditions relating to such a transfer contained in the Senior Facilities Agreement (in the case of the Senior Lender Liabilities), the Second Lien Facility Agreement (in the case of the Second Lien Lenders Liabilities), any Senior Notes Indenture(s) pursuant to which any Senior Notes remain outstanding (in the case of the Senior Notes liabilities), any Permitted Senior Financing Agreement pursuant to which any relevant Permitted Senior Financing Liabilities remain outstanding (in the case of the Permitted Senior Financing Liabilities), any Permitted Second Lien Financing Agreement pursuant to which any relevant Permitted Second Lien Financing Liabilities remain outstanding (in the case of the Permitted Second Lien Financing Liabilities), any Operating Facility Documents pursuant to which any relevant Operating Facility Liabilities remain outstanding (in the case of the Operating Facility Liabilities), and/or any Priority Facility Agreement pursuant to which any relevant Priority Facility Liabilities remain outstanding (in the case of the Priority Facility Liabilities) are complied with, in each case, other than as specified in the Intercreditor Agreement;

(iii) each of the Senior Facility Agent (on behalf of the Senior Lenders), the applicable Priority Facility Agent (on behalf of the Priority Facility Lenders), the Senior Notes Trustee (on behalf of the relevant Senior Noteholders), the applicable Senior Creditor Representative (on behalf of the relevant Permitted Senior Financing Creditors), the Operating Facility Lenders, the Second Lien Facility Agent (on behalf of the Second Lien Lenders) and the applicable Second Lien Creditor Representative (on behalf of the relevant Permitted Second Lien Financing Creditors) is paid the amounts required under the Intercreditor Agreement;

(iv) as a result of that transfer the Senior Lenders, the Priority Facility Lenders, the Second Lien Lenders, the Senior Noteholders, the Permitted Senior Financing Creditors, the Permitted Second Lien Financing Creditors and the Operating Facility Lenders have no further actual or contingent liability to the Company, any other Debtor or a Third Party Security Provider under the relevant Secured Debt Documents;

(v) an indemnity is provided from each Senior Parent Creditor (other than any Senior Parent Agent) (or from another third party acceptable to all the Senior Lenders, the Second Lien Lenders, the Senior Notes Creditors, the Permitted Senior Financing Creditors, the Permitted Second Lien Financing Creditors, the Operating Facility Lenders and the Priority Facility Lenders) in a form reasonably satisfactory to each Senior Lender, Second Lien Lender, Senior Notes Creditor, Permitted Senior Financing Creditor, Permitted Second Lien Financing Creditor, Operating Facility Lender and Priority Facility Lender in respect of all costs, expenses, losses and liabilities which may be sustained or incurred by any Senior Lender, Second Lien Lender, Senior Notes Creditor, Permitted Senior Financing Creditor, Permitted Second Lien Financing Creditor, Operating Facility Lender or Priority Facility Lender in consequence of any sum received or recovered by any Senior Lender, Second Lien Lender, Senior Notes Creditor, Permitted Senior Financing Creditor, Permitted Second

Lien Financing Creditor, Operating Facility Lender or Priority Facility Lender from any person being required (or it being alleged that it is required) to be paid back by or clawed back from any Senior Lender, Second Lien Lender, Senior Notes Creditor, Permitted Senior Financing Creditor, Permitted Second Lien Financing Creditor, Operating Facility Lender or Priority Facility Lender for any reason; and

(vi) the transfer is made without recourse to, or representation or warranty from, the Senior Lenders, the Second Lien Lenders, the Senior Notes Creditors, the Permitted Senior Financing Creditors, the Permitted Second Lien Financing Creditors, the Operating Facility Lenders or the Priority Facility Lenders, except that each Senior Lender, Second Lien Lender, Senior Notes Creditor, Permitted Senior Financing Creditor, Permitted Second Lien Financing Creditor, Operating Facility Lender and Priority Facility Lenders shall be deemed to have represented and warranted on the date of that transfer that it has the corporate power to effect that transfer and it has taken all necessary action to authorize the making by it of that transfer.

Subject to the Intercreditor Agreement, the Senior Parent Notes Trustee or any Senior Parent Creditor Representative (on behalf of all the Senior Parent Creditors) may only require a transfer of Senior Secured Liabilities if, at the same time, they require a transfer of hedging liabilities regulated by the Intercreditor Agreement and if, for any reason, such transfer cannot be made in accordance with the Intercreditor Agreement, no transfer of Senior Secured Liabilities may be required to be made.

At the request of the Senior Parent Notes Trustee or any Senior Parent Creditor Representative (on behalf of all the Senior Parent Creditors), the Senior Facility Agent, the relevant Priority Facility Agent, the Senior Notes Trustee, any relevant Senior Creditor Representative, the Operating Facility Lenders, the Second Lien Facility Agent and any relevant Second Lien Creditor Representative shall notify the Senior Parent Notes Trustee and any Senior Parent Creditor Representative of the foregoing payable sums in connection with such transfer.

Effect of Insolvency Event; Filing of Claims

The Intercreditor Agreement provides that, among other things, after the occurrence of an Insolvency Event in relation to any Debtor or any Third Party Security Provider, or, following an acceleration event which is continuing, any member of the Group, any party entitled to receive a distribution out of the assets of that member of the Group or (to the extent arising pursuant to the terms of any Third Party Security) that Third Party Security Provider in respect of liabilities owed to that party shall (in the case of any Creditor or Operating Facility Lender, only to the extent that such distribution would otherwise constitute a receipt or recovery of a type subject to the provisions set out below under the caption "—*Turnover*" and, in all cases, if prior to a distress event, only if required by the Security Agent acting on the instructions of an Instructing Group), subject to receiving payment instructions and any other relevant information from the Security Agent and to the extent it is able to do so (including pursuant to applicable law and regulation), direct the person responsible for the distribution of the assets of that member of the Group or that Third Party Security Provider to pay that distribution to the Security Agent until the liabilities owing to the Secured Parties have been paid in full. In this respect, the Security Agent shall apply distributions paid to it in accordance with the provisions set out under the caption "—*Application of Proceeds*" below.

Subject to certain exceptions, to the extent that any member of the Group's or Third Party Security Provider's liabilities are discharged by way of set-off (mandatory or otherwise) after the occurrence of an Insolvency Event in relation to that member of the Group, any Creditor and any Operating Facility Lender which benefited from that set-off shall (in the case of any Creditor or Operating Facility Lender, only to the extent that such distribution would otherwise constitute a receipt or recovery of a type subject to the provisions set out below under the caption "—*Turnover*" and, in all cases, if prior to a distress event, only if required by the Security Agent acting on the instructions of an Instructing Group), subject to receiving payment instructions and any other relevant information from the Security Agent, pay an amount equal to the amount of the liabilities owed to it which are discharged by that set-off to the Security Agent for application in accordance with the provisions set out under the caption "—*Application of Proceeds*" below and subject to certain exceptions.

Subject to the provisions set out under the caption "—*Application of Proceeds*" below, if the Security Agent or any other Secured Party receives a distribution in a form other than in cash in respect of any of the liabilities, the liabilities will not be reduced by that distribution until and except to the extent that the realization proceeds are actually applied towards the liabilities.

After the occurrence of an Insolvency Event in relation to any Debtor or any Third Party Security Provider (or, following an acceleration event which is continuing, any member of the Group), each Creditor and each Operating Facility Lender irrevocably authorizes the Security Agent, on its behalf, to:

(i) take any Enforcement Action (in accordance with the terms of the Intercreditor Agreement) against that member of the Group or that Third Party Security Provider's liabilities;

(ii) demand, sue, prove and give receipt for any or all of that member of the Group's liabilities or that Third Party Security Provider's liabilities;

(iii) collect and receive all distributions on, or on account of, any or all of that member of the Group's liabilities or that Third Party Security Provider's liabilities; and

(iv) file claims, take proceedings and do all other things the Security Agent considers reasonably necessary to recover that member of the Group's liabilities or that Third Party Security Provider's liabilities.

Each Creditor and Operating Facility Lender will (i) do all things that the Security Agent (acting in accordance with the terms of the Intercreditor Agreement) reasonably requests in order to give effect to the matters referred to in this "*—Effect of Insolvency Event; Filing of Claims*" section and (ii) if the Security Agent is not entitled to take any of the actions contemplated by this "*—Effect of Insolvency Event; Filing of Claims*" section or if the Security Agent (acting in accordance with the terms of the Intercreditor Agreement) requests that a Creditor or Operating Facility Lender take that action, undertake that action itself in accordance with the instructions of the Security Agent or grant a power of attorney to the Security Agent (on such terms as the Security Agent (acting in accordance with the terms of the Intercreditor Agreement) may reasonably require, although neither the Senior Notes Trustee nor the Senior Parent Notes Trustee shall be under any obligation to grant such powers of attorney) to enable the Security Agent to take such action.

Turnover

Subject to certain exceptions, the Intercreditor Agreement provides that if any Creditor or Operating Facility Lender receives or recovers from any member of the Group or (in relation to any Third Party Security) any Third Party Security Provider:

(i) any payment or distribution of, or on account of or in relation to, any of the liabilities which is prohibited under the Intercreditor Agreement or, following the occurrence of a Senior Distress Event which is continuing, any Senior Lender Liabilities, Hedging Liabilities, Senior Notes liabilities, Permitted Senior Financing liabilities, Priority Facility liabilities or Operating Facility liabilities;

(ii) other than as referred to in the second paragraph of the caption "*—Effect of Insolvency Event; Filing of Claims*" any amount by way of set-off in respect of any of the liabilities owed to it which does not give effect to a payment permitted under the Intercreditor Agreement;

(iii) notwithstanding paragraphs (i) and (ii) above, other than as referred to in the second paragraph of the caption "*—Effect of Insolvency Event; Filing of Claims*" any amount:

    (A) on account of, or in relation to, any of the liabilities after the occurrence of a distress event (including as a result of any litigation or proceedings against a member of the Group or a Third Party Security Provider other than after the occurrence of an Insolvency Event in respect of that member of the Group or that Third Party Security Provider); or

    (B) by way of set-off in respect of any of the liabilities owed to it after the occurrence of a distress event,

    other than, in each case, any amount received or recovered in accordance with the provisions set out below the caption "*—Application of Proceeds*;"

(iv) the proceeds of any enforcement of any security except in accordance with the provisions set out below under the caption "—Application of Proceeds;" or

(v) subject to certain exceptions, any distribution in cash or in kind or payment of, or on account of or in relation to, any of the liabilities owed by any member of Group or any Third Party Security Provider which is not in accordance with the provisions set out under the caption "—*Application of Proceeds*" and which is made as a result of, or after, the occurrence of an Insolvency Event in respect of that member of Group or that Third Party Security Provider,

that Creditor or Operating Facility Lender will, subject to certain exceptions: (i) in relation to receipts and recoveries not received or recovered by way of set-off (x) hold an amount of that receipt or recovery equal to the relevant liabilities (or if less, the amount received or recovered) on trust for the Security Agent and subject to receiving payment instructions and any other relevant information from the Security Agent, promptly pay that amount to the Security Agent for application in accordance with the terms of the Intercreditor Agreement and (y) subject to receiving payment instructions and any other relevant information the Security Agent, promptly pay an amount equal to the amount (if any) by which the receipt or recovery exceeds the relevant liabilities to the Security Agent for application in accordance with the terms of the Intercreditor Agreement; and (ii) in relation to receipts and recoveries received or recovered by way of set-off, subject to receiving payment instructions and any other relevant information from the Security Agent, promptly pay an amount equal to that recovery to the Security Agent for application in accordance with the terms of the Intercreditor Agreement.

Enforcement of Security

Enforcement Instructions

The Security Agent may refrain from enforcing the security unless instructed otherwise by (i) an Instructing Group; (ii) if required as set out in the third paragraph of this section, the Majority Second Lien Creditors or (iii) if required as set out under the fourth paragraph of this section, the "*Majority Senior Parent Creditors*."

Subject to the security having become enforceable in accordance with its terms (i) an Instructing Group; (ii) to the extent permitted to enforce or to require the enforcement of the security prior to the Senior Discharge Date as described under the caption "—*Restrictions Relating to Second Lien Secured Creditors and Second Lien Liabilities*" above, the Majority Second Lien Creditors or (iii) to the extent permitted to enforce or to require the enforcement of the security prior to the First/Second Lien Discharge Date as described under the provisions under the caption "—*Restrictions Relating to Senior Parent Creditors and Senior Parent Liabilities*" above, the Majority Senior Parent Creditors, may give or refrain from giving, instructions to the Security Agent to enforce, or refrain from enforcing, the security as they see fit.

Prior to the Senior Discharge Date, (i) if an Instructing Group has instructed the Security Agent not to enforce or to cease enforcing the security or (ii) in the absence of instructions from an Instructing Group, and, in each case, an Instructing Group has not required any Debtor or Third Party Security Provider to make a distressed disposal, the Security Agent shall give effect to any instructions to enforce the security which the Majority Second Lien Creditors are then entitled to give to the Security Agent as described under the provisions under the caption "—*Permitted Second Lien Enforcement*" above.

Prior to the First/Second Lien Discharge Date, (i) if an Instructing Group or the Majority Second Lien Creditors (as applicable) has instructed the Security Agent not to enforce or to cease enforcing the security or (ii) in the absence of instructions from an Instructing Group or the Majority Second Lien Creditors (as applicable), and, in each case, an Instructing Group or the Majority Second Lien Creditors (as applicable) has not required any Debtor Third Party Security Provider to make a distressed disposal, the Security Agent shall give effect to any instructions to enforce the security which the Majority Senior Parent Creditors are then entitled to give to the Security Agent as described under the provisions under the caption "—*Permitted Senior Parent Enforcement*" above. Any obligations of any Debtor and intra-group lender incorporated in Italy are subject to any applicable Italian insolvency law provisions and any other mandatory provisions of Italian law.

Subject to certain provisions of the Intercreditor Agreement, no secured party shall have any independent power to enforce, or to have recourse to enforce, any security or to exercise any rights or powers arising under the security documents except through the Security Agent in the manner contemplated by the Intercreditor Agreement.

Manner of Enforcement

If the security is being enforced as set forth above under the caption "—*Enforcement of Security—Enforcement Instructions*," the Security Agent shall enforce the security in such manner (including, without limitation, the selection of any administrator, examiner or equivalent officer of any Debtor or Third Party Security Provider to be appointed by the Security Agent) as:

(a) an Instructing Group;

(b) prior to the Senior Discharge Date, if (i) the Security Agent has, pursuant to the third paragraph under the caption "—*Enforcement of Security*" above, given effect to instructions given by the Majority Second Lien Creditors to enforce the security; and (ii) an Instructing Group or the Majority Second Lien Creditors (as applicable) has not given instructions as to the manner of enforcement of the security, the Majority Second Lien Creditors;

(c) prior to the First/Second Lien Discharge Date, if (i) the Security Agent has, pursuant to the fourth paragraph under the caption "—*Enforcement of Security*" above, given effect to instructions given by the Majority Senior Parent Creditors to enforce the security; and (ii) an Instructing Group has not given instructions as to the manner of enforcement of the security, the Majority Senior Parent Creditors,

shall instruct or, in the absence of any such instructions, as the Security Agent sees fit (it being understood that, absent such instructions, the Security Agent may elect to take no action).

Exercise of Voting Rights

To the fullest extent permitted under applicable law, each Creditor (other than the Senior Notes Trustee and the Senior Parent Notes Trustee) and each Operating Facility Lender shall agree with the Security Agent that it will cast its vote in any proposal put to the vote by, or under the supervision of, any judicial or supervisory authority in respect of any insolvency, pre-insolvency or rehabilitation or similar proceedings relating to any member of the Group or any Third Party Security Provider as instructed by the Security Agent. The Security Agent shall give instructions for the purposes of this paragraph as directed by an Instructing Group. Notwithstanding the foregoing, no party can exercise or require any other Creditor or Operating Facility Lender under the Intercreditor Agreement to exercise its power of voting or representation to waive, reduce, discharge, extend the due date for payment or otherwise reschedule any of the liabilities owed to that Creditor or Operating Facility Lender.

Waiver of Rights

To the extent permitted under applicable law and subject to certain provisions of the Intercreditor Agreement, each of the Secured Parties, each Third Party Security Provider and each Debtor waives all rights it may otherwise have to require that the security be enforced in any particular order or manner or at any particular time, or that any sum received or recovered from any person, or by virtue of the enforcement of any of the security or of any other security interest, which is capable of being applied in or towards discharge of any of the secured obligations, is so applied.

Security Held by Other Creditors

If any security is held by a Creditor or Operating Facility Lender other than the Security Agent, then that Creditor or Operating Facility Lender may only enforce that security in accordance with instructions given by an Instructing Group pursuant to the terms of the Intercreditor Agreement (and for this purpose references to the Security Agent shall be construed as references to that Creditor or Operating Facility Lender).

Consultation Period

(a) Subject to paragraph (d) below, before giving any instructions to the Security Agent to enforce the security or refrain or cease from enforcing the security or to take any other Enforcement Action, the creditor representative(s) of the creditors of the Group represented in the Instructing Group concerned (and, if applicable, any relevant Hedge Counterparties) shall consult with each other creditor representative, each other Hedge Counterparty, each Operating Facility Lender and the Security Agent in good faith about the

instructions to be given by the Instructing Group for a period of not less than 10 business days (or, in the case of any consultation involving a Senior Notes Trustee, a Senior Parent Notes Trustee or a Creditor Representative in respect of any high-yield notes, debt securities or other similar instruments, 30 days) from the date on which details of the proposed instructions are received by such creditor representative(s), Hedge Counterparties, Operating Facility Lenders and the Security Agent (or such shorter period as each creditor representative, Hedge Counterparty, Operating Facility Lender and the Security Agent shall agree) (the "Consultation Period"), and only following the expiry of a Consultation Period shall the Instructing Group be entitled to give any instructions to the Security Agent to enforce the security or refrain or cease from enforcing the security or take any other Enforcement Action.

(b) Subject to paragraph (c) below, in the event conflicting instructions are received from any other Instructing Group, the Security Agent shall enforce the security, refrain or cease from enforcing the security or, as the case may be, take the relevant other Enforcement Action in accordance with the instructions given by an Instructing Group referred to in paragraph (a)(i)(A) of the definition of Instructing Group (in each case *provided* that such instructions are consistent with any applicable requirements of the Intercreditor Agreement and the security documents) and the terms of all instructions given by any other Instructing Group shall be deemed revoked.

(c) If paragraph (a)(i)(B) of the definition of Instructing Group applies, then prior to the Priority Facility Discharge Date, if: (i) the (i) the Priority Creditors have not been fully repaid within six months of the end of the first Consultation Period; (ii) the Security Agent has not commenced any enforcement of the security (or a transaction in lieu thereof) or other Enforcement Action within three months of the end of the first Consultation Period; or (iii) an insolvency event has occurred and the Security Agent has not commenced any enforcement of the security (or a transaction in lieu thereof) or other Enforcement Action at that time, then the Security Agent shall follow the instructions given by the Majority Priority Creditors (in each case *provided* that such instructions are consistent with the Intercreditor Agreement and the security documents).

(d) No Agent or Hedge Counterparty shall be obliged to consult in accordance with paragraph (a) above and an Instructing Group shall be entitled to give any instructions to the Security Agent to enforce the security or take any other Enforcement Action prior to the end of a Consultation Period (in each case *provided* that such instructions are consistent with any applicable requirements of the Intercreditor Agreement and the security documents) if:

    (i) the security has become enforceable as a result of an Insolvency Event; or

    (ii) the Instructing Group or any creditor representative of the Creditors represented in the Instructing Group determines in good faith (and notifies each other creditor representative, the Hedge Counterparties and the Security Agent) that to enter into such consultations and thereby delay the commencement of enforcement of the security would reasonably be expected to have a material adverse effect on:

        (A) the Security Agent's ability to enforce any of the security; or

        (B) the realization proceeds of any enforcement of the security and, where this paragraph (b) applies any instructions shall be limited to those necessary to protect or preserve the interests of the Senior Secured Creditors on behalf of which the relevant Instructing Group is acting in relation to the matters referred to in sub-paragraphs (A) and (B) above; and the Security Agent shall act in accordance with the instructions first received.

(e) As soon as reasonably practicable following receipt of any instructions from an Instructing Group to enforce the security, refrain or cease from enforcing the security or, as the case may be, take any other Enforcement Action, the Security Agent shall provide a copy of such instructions to each Agent, Hedge Counterparty and Operating Facility Lender (unless it received those instructions from that person).

Duties Owed

Pursuant to the Intercreditor Agreement, each of the Secured Parties, the Debtors and the Third Party Security Providers acknowledges that, in the event that the Security Agent enforces, or is instructed to enforce, the security prior to the First/Second Lien Discharge Date, the duties of the Security Agent and of any receiver or delegate owed to the Senior Parent Creditors in respect of the method, type and timing of that enforcement or of the exploitation, management or realization of any of that security shall, subject to the section entitled Distressed Disposals below, be no different to or greater than the duty that is owed by the Security Agent, receiver or delegate to the Third Party Security Providers and the Debtors under general law.

Proceeds of Disposals

Non-Distressed Disposals

The Security Agent is irrevocably authorized and instructed (at the request and cost of the relevant Debtor, Third Party Security Provider or the Company) to promptly release (or procure that any other relevant person releases):

(i) any security (and/or any other claim relating to a debt document) over any asset which is the subject of:

  (A) a disposal not prohibited by the terms of the Senior Facilities Agreement, any Senior Notes Indenture, any Permitted Senior Financing Agreement, the Second Lien Facility Agreement, any Permitted Second Lien Financing Agreement, any Senior Parent Notes Indenture and any Permitted Parent Financing Agreement (each a "**Debt Financing Agreement**") or a Third Party Security (including a disposal to a member of the Group, but without prejudice to any obligation of any member of the Group or any Third Party Security Provider in a Debt Financing Agreement to provide replacement security); or

  (B) any other transaction not prohibited by the terms of any Debt Financing Agreement or any Third Party Security pursuant to which that asset will cease to be held or owned by a member of the Group or, as applicable, a Third Party Security Provider;

(ii) any security (and/or any other claim relating to a debt document) over any document or other agreement requested in order for any member of the Group or any Third Party Security Provider, as applicable, to effect any amendment or waiver in respect of that document or agreement or otherwise exercise any rights, comply with any obligations or take any action in relation to that document or agreement (in each case to the extent not prohibited by the terms of any Debt Financing Agreement);

(iii) any security (and/or any other claim relating to a debt document) over any asset of any member of the Group or any Third Party Security Provider, as applicable, which has ceased to be a Debtor or a Third Party Security Provider, as applicable (or will cease to be a Debtor or a Third Party Security Provider, as applicable simultaneously with such release);

(iv) any security which is relevant to any merger, consolidation, reorganization or transaction not prohibited by the terms of any Debt Financing Agreement or any Third Party Security whereby a release of an asset is required to effect such merger, consolidation, reorganization or transaction (subject to any obligation under the Debt Documents to re-take such security); and

(v) any security (and/or any other claim relating to a debt document) over any other asset to the extent that such release is in accordance with the terms of the Debt Financing Agreements.

In the case of a disposal of shares or other ownership interests in a Debtor (or any holding company of any Debtor), or any other transaction pursuant to which a Debtor (or any holding company of any Debtor) will cease to be a member of the Group or a Debtor (including in connection with the resignation of that Debtor or the Debtor being designated as an Unrestricted Subsidiary), the Security Agent (on behalf of itself and the Secured Parties) shall (at the request and cost of the relevant Debtor or the Company) promptly release (or procure the release of) that Debtor and its subsidiaries (and its and their assets) from all present and future liabilities under the Secured Debt Documents.

When making any request for a release pursuant to this "—*Non-Distressed Disposals*" section, the Company shall confirm in writing to the Security Agent that:

(i) in the case of any release requested pursuant to paragraph (i) or (ii) above, the relevant disposal or other action is not prohibited by the terms of any Debt Financing Agreement; or

(ii) in the case of any release requested pursuant to paragraph (iv) above, the relevant release is in accordance with the terms of the Debt Financing Agreements,

and the Security Agent shall be entitled to rely on that confirmation for all purposes under the Secured Debt Documents.

The Security Agent shall (at the cost and expense of the relevant Debtor or Third Party Security Provider or the Company but without the need for any further consent, sanction, authority or further confirmation from any Creditor, Operating Facility Lender, other Secured Party, Debtor or Third Party Security Provider) promptly enter into and deliver such documentation and/or take such other action as the Company (acting reasonably) shall require to give effect to any release or other matter described above.

Without prejudice to the foregoing and for the avoidance of doubt, if requested by the Company in accordance with the terms of any of the Debt Financing Agreements (and *provided* that the requested action is not expressly prohibited by any of the other Debt Financing Agreements), the Security Agent and the other Creditors and Operating Facility Lenders shall (at the cost of the relevant Debtor, the relevant Additional Security Provider and/or the Company) promptly execute any guarantee, security or other release and/or any amendment, supplement or other documentation relating to the security documents as contemplated by the terms of any of the Debt Financing Agreements (and the Security Agent is authorized to execute, and will promptly execute if requested by the Company, without the need for any further consent, sanction, authority or further confirmation from any Creditor or Operating Facility Lender, any such release or document on behalf of the Creditors and the Operating Facility Lenders). When making any request pursuant to this paragraph (d) the Company shall confirm in writing to the Security Agent that such request is in accordance with the terms of a Debt Financing Agreement (and the requested action is not expressly prohibited by way of any of the other Debt Financing Agreements) and the Security Agent shall be entitled to rely on that confirmation for all purposes under the Secured Debt Documents.

In the case of any release of security requested by the Company as part of a transaction permitted by the Senior Facilities Agreement and/or the Bridge Facility Agreement or pursuant to the equivalent provision of any Second Lien Facility Agreement as part of a Permitted Transaction (as that term is defined in the Second Lien Facility Agreement) (each a "Permitted Transaction Request"), when making that request the Company shall confirm to the Security Agent that: (i) such request is a Permitted Transaction Request (absent which statement the Security Agent shall be entitled to assume that the request is not a Permitted Transaction Request); and (ii) it has determined in good faith that it is either not possible or not desirable to implement the relevant transaction on terms satisfactory to the Company by instead granting additional security and/or amending the terms of the existing security.

Notwithstanding anything to the contrary in any Debt Document, nothing in any security document shall operate or be construed so as to prevent any transaction, matter or other step not prohibited by the terms of the Intercreditor Agreement or the Debt Financing Agreements (a "Permitted Action"). The Security Agent (on behalf of itself and the Secured Parties) hereby agrees (and is irrevocably authorized and instructed to do so without any consent, sanction, authority or further confirmation from any Party) that it shall (at the request and cost of the relevant Debtor or the Company) promptly execute any release or other document and/or take such other action under or in relation to any Debt Document (or any asset subject or expressed to be subject to any security document) as is requested by the Company in order to complete, implement or facilitate a Permitted Action. In the event that the Company makes any request pursuant to and in reliance on the preceding sentence, the Security Agent shall be permitted to request a confirmation from the Company that the relevant transaction, matter or other step is a Permitted Action and the Security Agent shall be entitled to rely on that confirmation for all purposes under the Secured Debt Documents.

If any member of the Group is required or permitted under the Senior Debt Documents to apply the proceeds of any disposal or other transaction in prepayment, redemption or any other discharge or reduction of the Senior Liabilities then no such application of those proceeds shall require the consent of any other party or result in any breach of any

Senior Parent Finance Documents and such application shall discharge in full any obligation to apply those proceeds in prepayment, redemption or other discharge or reduction of any Senior Parent Liabilities. This paragraph is without prejudice to any right of any member of the Group to apply any proceeds of any disposal or other transaction in prepayment, redemption or any other discharge or reduction of any Senior Parent Liabilities to the extent permitted or contemplated by the Intercreditor Agreement or any other Senior Debt Document.

The Security Agent is irrevocably authorized by each Secured Party to (and will on the request and at the cost of the Company):

(i) release the security; and

(ii) release each Third Party Security Provider, each investor, each Debtor and each other member of the Group from all liabilities, undertakings and other obligations under the Secured Debt Documents, on the Final Discharge Date (or at any time following such date on the request of the Company).

Distressed Disposals

Generally, a "Distressed Disposal" is a disposal of an asset of a member of the Group which is (a) being effected at the request of an Instructing Group in circumstances where a security interest has become enforceable in accordance with the terms of the relevant security document(s), (b) being effected by enforcement of a security interest in accordance with the terms of the relevant security document(s) or (c) being disposed of to a third party subsequent to a distress event.

If a Distressed Disposal of any asset of a member of the Group is being effected, the Security Agent is irrevocably authorized (at the cost of the relevant Debtor, the relevant Third Party Security Provider or the Company and without any consent, sanction, authority or further confirmation from any Creditor, Operating Facility Lender, other Secured Party, Debtor or Third Party Security Provider):

(i) to release the security interest or any other claim over that asset and execute and deliver or enter into any release of that security interest or claim and issue any letters of non-crystallization of any floating charge or any consent to dealing that may, in the discretion of the Security Agent, be considered necessary or desirable;

(ii) if the asset which is disposed of consists of shares in the capital of a Debtor to release:

  (A) that Debtor and any subsidiary of that Debtor from all or any part of its borrowing liabilities, its guarantee liabilities and its other liabilities;

  (B) any security granted by that Debtor or any subsidiary of that Debtor over any of its assets; and

  (C) any other claim of an investor, an intra-group lender, or another Debtor over that Debtor's assets or over the assets of any subsidiary of that Debtor,

  on behalf of the relevant Creditors, Operating Facility Lenders, Debtors, Third Party Security Providers and certain creditor representatives;

(iii) if the asset which is disposed of consists of shares in the capital of any holding company of a Debtor, to release:

  (A) that holding company and any subsidiary of that holding company from all or any part of its borrowing liabilities, its guarantees liabilities and its other liabilities;

  (B) any security interest granted by that holding company or any subsidiary of that holding company over any of its assets; and

  (C) any other claim of any investor, any intra-group lender or another Debtor over that holding company's assets or the assets of any subsidiary of that holding company,

on behalf of the relevant Creditors, Operating Facility Lenders, Debtors, Third Party Security Providers and certain creditor representatives;

(iv) if the asset which is disposed of consists of shares in the capital of a Debtor or the holding company of a Debtor and the Security Agent (acting in accordance with the Intercreditor Agreement) decides to dispose of all or any part of the liabilities or the Debtor liabilities owed by that Debtor or holding company or any subsidiary of that Debtor or holding company:

(A) (if the Security Agent (acting in accordance with the Intercreditor Agreement) does not intend that any transferee of those liabilities or Debtor liabilities (the "**Transferee**") will be treated as a Primary Creditor or a Secured Party for the purposes of the Intercreditor Agreement), to execute and deliver or enter into any agreement to dispose of all or part of those liabilities or Debtor liabilities, *provided* that, notwithstanding any other provision of any debt document, the Transferee shall not be treated as a Primary Creditor or a Secured Party for the purposes of the Intercreditor Agreement; and

(B) (if the Security Agent (acting in accordance with the Intercreditor Agreement) does intend that any Transferee will be treated as a Primary Creditor or a Secured Party for the purposes of the Intercreditor Agreement), to execute and deliver or enter into any agreement to dispose of: all (and not part only) of the liabilities owed to the Primary Creditors and Operating Facility Lenders and all or part of any other liabilities and the Debtor liabilities,

On behalf of, in each case, the relevant Creditors, Operating Facility Lenders, Debtors and Third Party Security Providers;

(v) if the asset which is disposed of consists of shares in the capital of a Debtor or the holding company of a Debtor (the "**Disposed Entity**") and the Security Agent (acting in accordance with the Intercreditor Agreement) decides to transfer to another Debtor (the "**Receiving Entity**") all or any part of the Disposed Entity's obligations or any obligations of any subsidiary of that Disposed Entity in respect of the intra-group liabilities or the Debtor liabilities, to execute and deliver or enter into any agreement to:

(A) agree to the transfer of all or part of the obligations in respect of those intra-group liabilities or Debtor liabilities on behalf of the relevant intra-group lenders and Debtors to which those obligations are owed and on behalf of the Debtors which owe those obligations; and

(B) (if the Receiving Entity is a holding company of the Disposed Entity which is also a guarantor of Senior Liabilities) to accept the transfer of all or part of the obligations in respect of those intra-group liabilities or Debtor liabilities on behalf of the Receiving Entity or Receiving Entities to which the obligations in respect of those intra-group liabilities or Debtor liabilities are to be transferred.

The net proceeds of each Distressed Disposal (and the net proceeds of any disposal of liabilities or Debtor liabilities) shall be paid to the Security Agent for application in accordance with the provisions set out under the caption "—*Application of Proceeds*" (to the extent that the asset disposed of constituted charged property), as if those proceeds were the proceeds of an enforcement of the relevant security interest and, to the extent that any disposal of liabilities or Debtor liabilities has occurred, as if that disposal of liabilities or Debtor liabilities had not occurred.

In the case of a Distressed Disposal (or a disposal of liabilities) effected by, or at the request of, the Security Agent (acting in accordance with the Intercreditor Agreement), the Security Agent shall take reasonable care to obtain a fair market price in the prevailing market conditions (though the Security Agent shall not have any obligation to postpone any such Distressed Disposal or disposal of liabilities in order to achieve a higher price).

Where Borrowing Liabilities, Guarantee Liabilities and/or Other Liabilities would otherwise be released pursuant to the Intercreditor Agreement, the Creditor or Operating Facility Lender concerned may elect to have those Borrowing Liabilities, Guarantee Liabilities and/or Other Liabilities transferred to the Company in which case the Security Agent is irrevocably authorized (to the extent legally possible and at the cost of the relevant Debtor, the relevant Third Party Security Provider or the Company and without any consent, sanction, authority or further confirmation from any

Creditor, Operating Facility Lender, other Secured Party, Debtor or Third Party Security Provider) to execute such documents as are required to so transfer those Borrowing Liabilities, Guarantee Liabilities and/or Other Liabilities.

Subject to the immediately following two paragraphs, in the case of a Distressed Disposal effected by or at the request of the Security Agent (acting in accordance with the Intercreditor Agreement), unless the consent of each Senior Agent is otherwise obtained, it is a further condition to any release, transfer or disposal that the proceeds of such disposal are in cash (or substantially all in cash) and such sale or disposal is made pursuant to a public auction in respect of which the Primary Creditors are entitled to participate or where a financial adviser selected by the Security Agent has delivered an opinion in respect of such sale or disposal that the amount received in connection therewith is fair from a financial point of view taking into account all relevant circumstances, including the method of enforcement, *provided* that the liability of such financial adviser may be limited to the amount of its fees in respect of such engagement (it being acknowledged that the Security Agent shall have no obligation to select or engage any financial adviser unless it shall have been indemnified and/or secured and/or prefunded to its satisfaction).

If prior to the Second Lien Discharge Date a Distressed Disposal is being effected such that any Second Lien Liabilities will be released or disposed of, or any security securing the Second Lien Liabilities will be released, it is a further condition to the release that either:

(a) each Second Lien Agent has approved the release; or

(b) where shares or assets of a Second Lien Borrower or a Second Lien Guarantor are sold:

  (i) the proceeds of such sale or disposal are in cash (or substantially in cash); and

  (ii) all claims of the Senior Creditors, the Senior Notes Creditors, the Permitted Senior Financing Creditors and the Operating Facility Lenders (other than in relation to performance bonds or guarantees or similar instruments) against a member of the Group (if any) all of whose shares (other than any minority interest not owned by members of the Group) are sold or disposed of pursuant to such Enforcement Action, are unconditionally released and discharged or sold or disposed of concurrently with such sale (and are not assumed by the purchaser or one of its affiliates) and all security under the security documents in respect of the assets that are sold or disposed of is simultaneously and unconditionally released and discharged concurrently with such sale, *provided* that if each of the Senior Facility Agent, any Senior Notes Trustee, any Senior Creditor Representative and any Priority Facility Agent (acting reasonably and in good faith):

    (A) determines that the Senior Secured Creditors will recover a greater amount if any such claim is sold or otherwise transferred to the purchaser or one of its Affiliates and not released and discharged; and

    (B) serves a written notice on the Security Agent confirming the same, the Security Agent shall be entitled to sell or otherwise transfer such claim to the purchaser or one of its affiliates; and

  (iii) such sale or disposal is made:

    (A) pursuant to a public auction in respect of which the Primary Creditors are entitled to participate; or

    (B) where a financial adviser selected by the Security Agent has delivered an opinion in respect of such sale or disposal that the amount received in connection therewith is fair from a financial point of view, taking into account all relevant circumstances, including the method of enforcement, *provided* that the liability of such financial adviser may be limited to the amount of its fees in respect of such engagement (it being acknowledged that the Security Agent shall have no obligation to select or engage any financial adviser unless it shall have been indemnified and/or secured and/or prefunded to its satisfaction).

If prior to the first date on which the discharge date for the Senior Parent Notes and any Permitted Parent Financing Debt has occurred, a Distressed Disposal is being effected such that, generally, the guarantees of the Senior Parent Notes and the guarantees of any Permitted Parent Financing Debt or any security over the assets of a Senior Parent Debt Issuer or any Senior Parent Guarantor will be released and/or the Senior Parent Notes liabilities and any Permitted Parent Financing Liabilities will be released, it is a further condition to the release that either:

- each Senior Parent Agent has approved the release; or
- where shares or assets of a Senior Parent Guarantor or assets of the Senior Parent Debt Issuer are sold:

    (A) the proceeds of such sale or disposal are in cash (or substantially in cash);

    (B) all claims of the Senior Secured Creditors and the Operating Facility Lenders (other than in relation to performance bonds or guarantees or similar instruments) against a member of the Group (if any), all of whose shares (other than any minority interest not owned by members of the Group) or its assets are sold or disposed of pursuant to such Enforcement Action, are unconditionally released and discharged or sold or disposed of concurrently with such sale (and are not assumed by the purchaser or one of its affiliates), and all security interests under the security documents in respect of such shares or such assets that are sold or disposed of is simultaneously and unconditionally released and discharged concurrently with such sale, *provided* that, if each Senior Agent (acting reasonably and in good faith):

        (I) determines that the Senior Secured Creditors will recover a greater amount if such claim is sold or otherwise transferred to the purchaser or one of its affiliates and not released or discharged; and

        (II) serves a written notice on the Security Agent confirming the same,

    the Security Agent shall be entitled to sell or otherwise transfer such claim to the purchaser or one of its affiliates; and

    (C) such sale or disposal is made:

        (I) pursuant to a public auction in respect of which the Primary Creditors are entitled to participate; or

        (II) where a financial adviser selected by the Security Agent has delivered an opinion in respect of such sale or disposal that the amount received in connection therewith is fair from a financial point of view, taking into account all relevant circumstances, including the method of enforcement, *provided* that the liability of such financial adviser may be limited to the amount of its fees in respect of such engagement (it being acknowledged that the Security Agent shall have no obligation to select or engage any financial adviser unless it shall have been indemnified and/or secured and/or prefunded to its satisfaction).

Application of Proceeds

The Intercreditor Agreement provides that the rights of Secured Parties shall be subject to the priorities set out in this section.

Order of Application

The Intercreditor Agreement provides that all amounts from time to time received or recovered by the Security Agent pursuant to the terms of any debt document or in connection with the realization or enforcement of all or any part of the relevant security interests (for the purposes of this "*—Application of Proceeds*" section and the "*—Equalization of the Senior Secured Creditors*" section, the "Recoveries") shall be applied by the Security Agent at any time as the Security Agent (in its discretion) sees fit, to the extent permitted by applicable law (and subject to the provisions of this "*—Application of Proceeds*" section), in the following order of priority:

(i) in discharging any sums owing to the Senior Facility Agent (in respect of the amounts due to the Senior Agent), any Senior Creditor Representative (in respect of amounts due to the Senior Creditor Representative), any Senior Parent Creditor Representative (in respect of amounts due to the Senior Parent Creditor Representative), any Priority Facility Agent (in respect of amounts due to the Priority Facility Agent) any Second Lien Agent (in respect of amounts due to Second Lien Agent), any Second Lien Creditor Representative (in respect of amounts due to Second Lien Creditor Representative) or certain amounts due to the Senior Notes Trustee or amounts due to the Senior Parent Notes Trustee, or any sums owing to the Security Agent, any receiver or any delegate on a *pro rata* and *pari passu* basis;

(ii) in payment of all costs and expenses incurred by any agent, Primary Creditor or Operating Facility Lender in connection with any realization or enforcement of the security taken in accordance with the terms of the Intercreditor Agreement or any action taken at the request of the Security Agent under the Intercreditor Agreement;

(iii) in respect of recoveries resulting from the realization or enforcement of all or any part of the transaction security or a transaction in lieu thereof, in payment to:

(A) the Priority Facility Agent on its own behalf and on behalf of the Priority Facility Arrangers and Priority Facility Lenders; and

(B) the Hedge Counterparties;

for application towards the discharge of:

(I) the Priority Facility Arranger liabilities and the Priority Facility liabilities (in accordance with the terms of the Priority Facility Finance Documents); and

(II) the Priority Hedging liabilities (on a pro rata basis between the Priority Hedging Liabilities of each Hedge Counterparty);

On a pro rata basis and pari passu between paragraphs (1) and (2) above;

(iv) in payment to:

(A) the Priority Facility Agent on its own behalf and on behalf of the Priority Facility Arrangers and Priority Facility Lenders;

(B) the Senior Facility Agent on its own behalf and on behalf of the arrangers under the Senior Facilities Agreement and the Senior Lenders;

(C) the Hedge Counterparties; and

(D) the Operating Facility Lenders;

(E) the Senior Notes Trustee on its own behalf and on behalf of the holders of the Senior Notes; and

(F) each Senior Creditor Representative on its own behalf and on behalf of the arrangers with respect to the Permitted Senior Financing Debt and the Permitted Senior Financing Creditors; and for application towards the discharge of:

(I) the Priority facility Arranger Liabilities and the Priority Facility Liabilities (in accordance with the terms of the Priority facility finance Documents);

(II) the liabilities of the Debtors owed to the arrangers under or in connection with the Senior Facilities and the Senior Lender Liabilities (in accordance with the terms of the finance documents in relation to the Senior Facilities);

(III) the Hedging Liabilities (on a *pro rata* basis between the Hedging Liabilities of each Hedge Counterparty); and

(IV) the Operating Facility Liabilities (on a *pro rata* basis between the Operating Facility Liabilities of each Operating Facility Lender);

(V) the Senior Notes liabilities (other than sums owing to the Security Agent) (in accordance with the terms of the Indenture and other finance documents for the Senior Notes);

(VI) the liabilities of the Debtors owing to the arrangers of the Permitted Senior Financing Debt and the Permitted Senior Financing Liabilities (other than the liabilities owing to a Senior Creditor Representative) (in accordance with the terms of the Permitted Senior Financing Documents and, if there is more than one Permitted Senior Financing Agreement, on a *pro rata* basis between the Permitted Senior Financing Debt in respect of each Permitted Senior Financing Agreement);

on a *pro rata* basis and *pari passu* between the immediately preceding paragraphs (I) to (VI) above;

(v) in payment to:

(A) the Second Lien Facility Agent on its own behalf and on behalf of the Second Lien Arrangers and the Second Lien Lenders; and

(B) each Second Lien Creditor Representative on its own behalf and on behalf of the Permitted Second Lien Financing Arrangers and the Permitted Second Lien Financing Creditors, for application towards the discharge of:

(I) the Second Lien Arranger Liabilities and the Second Lien Lender Liabilities (in accordance with the terms of the Second Lien Finance Documents); and

(II) the Permitted Second Lien Financing Arranger Liabilities and the Permitted Second Lien Financing Liabilities (other than the Permitted Second Lien Financing Agent Liabilities) (in accordance with the terms of the Permitted Second Lien Financing Documents and, if there is more than one Permitted Second Lien Financing Agreement, on a *pro rata* basis between the Permitted Second Lien Financing Debt in respect of each Permitted Second Lien Financing Agreement),

on a *pro rata* basis and *pari passu* between the immediately preceding paragraphs (I) and (II) above;

(vi) in payment to:

(A) each Senior Parent Notes Trustee on its own behalf and on behalf of the Senior Parent Noteholders; and

(B) each Senior Parent Creditor Representative on its own behalf and on behalf of the arrangers under the Permitted Parent Financing Debt and the Permitted Parent Financing Creditors, for application towards the discharge of:

(I) the Senior Parent Notes liabilities (other than any sums owing to the Security Agent) (in accordance with the terms of the Senior Parent Notes Finance Documents); and

(II) the liabilities of the Debtors owed to the arrangers of the Permitted Parent Financing Debt and the Permitted Parent Financing Liabilities (other than the liabilities owing to a Senior Parent Creditor Representative) (in accordance with the terms of the Permitted Parent Financing Documents and, if there is more than one Permitted Parent Financing Agreement, on a *pro rata* basis between the Permitted Parent Financing Debt in respect of each Permitted Parent Financing Agreement),

on a *pro rata* basis and *pari passu* between the immediately preceding paragraphs (I) and (II) above;

(vii) if none of the Debtors or (to the extent relating to a Third Party Security Provider) Third Party Security Providers is under any further actual or contingent liability under any Secured Debt Document, in payment to any person to whom the Security Agent is obliged to pay in priority to any Debtor or any Third Party Security Provider; and

(viii) the balance, if any, in payment to the relevant Debtor or Third Party Security Provider.

The Security Agent is authorized under the Intercreditor Agreement to hold any non-cash consideration received or recovered in connection with the realization or enforcement of all or any part of the security until cash is received for any such non-cash consideration, *provided* that the Security Agent may distribute any such non-cash consideration to a Secured Party which has agreed, on terms satisfactory to the Security Agent, to receive such non-cash consideration and the liabilities owed to that Secured Party shall be reduced by an amount equal to the value of that non-cash consideration upon receipt by that Secured Party of that non-cash consideration.

Liabilities of the Senior Parent Debt Issuer

Generally, all amounts from time to time received or recovered by the Security Agent from or in respect of the Senior Parent Debt Issuer pursuant to the terms of any debt document (other than in connection with the realization or enforcement of all or any part of the relevant security interests) shall be held by the Security Agent on trust to apply them at any time as the Security Agent (in its discretion) sees fit, to the extent permitted by applicable law in the following order of priority:

(i) in accordance with paragraph (i) of the section captioned "*—Order of Application*;"

(ii) in accordance with paragraph (ii) of the section captioned "*—Order of Application*;"

(iii) in accordance with paragraphs (iv) to (vi) of the section captioned "*—Order of Application*," *provided* that payments will be made on a *pro rata* basis and *pari passu* between each of the payments referred to in paragraphs (iv) and (to the extent relating to Liabilities in respect of Senior Parent Notes and/or Permitted Parent Financing Debt where the relevant Senior Parent Debt Issuer is the issuer or, as the case may be, the borrower) (vi);

(iv) if none of the Debtors is under any further actual or contingent liability under any Secured Debt Document, in payment to any person to whom the Security Agent is obliged to pay in priority to any Debtor or any Third Party Security Provider; and

(v) the balance, if any, in payment to the relevant Debtor or Third Party Security Provider.

Equalization of the Senior Secured Creditors

If, for any reason, any Senior Creditor Liabilities, Senior Notes Liabilities, Permitted Senior Financing Liabilities or Operating Facility Liabilities remain unpaid after the relevant enforcement date and the resulting losses are not borne by the relevant Senior Secured Creditors and the Operating Facility Lenders in the proportions which their respective exposures at the relevant enforcement date bore to the aggregate exposures of all the relevant Senior Secured Creditors and the Operating Facility Lenders at the enforcement date, the relevant Senior Secured Creditors and the Operating Facility Lenders will make such payments among themselves as the Security Agent shall require to put the relevant Senior Secured Creditors and the Operating Facility Lenders in such a position that (after taking into account such payments) those losses are borne in those proportions (or, as the case may be, to otherwise reflect the order of priority contemplated under the section "*—Application of Proceeds—Order of Application*").

Turnover of Enforcement Proceeds

If:

(a) the Security Agent or the relevant Agent is not entitled, for reasons of applicable law, to pay amounts received pursuant to the making of a demand under any guarantee, indemnity or other assurance against loss or the enforcement of the security to the Senior Secured Creditors and the Operating Facility Lenders but is entitled to distribute those amounts to Creditors (such Creditors, the "Receiving Creditors") who, in accordance with the terms of the Intercreditor Agreement, are subordinated in right and priority of payment to the Senior Secured Creditors and the Operating Facility Lenders; and

(b) the First/Second Lien Discharge Date has not yet occurred (nor would occur after taking into account such payments), then the Receiving Creditors shall make such payments to the Senior Secured Creditors and the Operating Facility Lenders as the Security Agent shall require to place the Senior Secured Creditors and the Operating Facility Lenders in the position they would have been in had such amounts been available for application against the Senior Liabilities and the Operating Facility Liabilities, provided this shall not apply to any receipt or recovery that has been distributed by:

    (i) a Senior Notes Trustee to the Senior Noteholders in accordance with the Senior Notes finance documents;

    (ii) a Senior Parent Notes Trustee to the Senior Parent Noteholders in accordance with the Senior Parent Notes Finance Documents;

    (iii) a Senior Creditor Representative to the Permitted Senior Financing Creditors in accordance with the Permitted Senior Financing Documents;

    (iv) a Second Lien Creditor Representative to the Permitted Second Lien Financing Creditors in accordance with the Permitted Second Lien Financing Documents; or

    (v) a Senior Parent Creditor Representative to the Permitted Parent Financing Creditors in accordance with the Permitted Parent Financing Documents,

unless the Senior Notes Trustee, the Senior Parent Notes Trustee, the Senior Creditor Representative, the Second Lien Creditor Representative or the Senior Parent Creditor Representative (as applicable) had received at least two Business Days' prior written notice (in accordance with the Intercreditor Agreement) that an acceleration event or an insolvency event in relation to a Debtor or a Third Party Security Provider had occurred or that the receipt or recovery falls within the provisions set out under the caption "—*Turnover*" prior to distribution of the relevant amount.

Group Pushdown

The Intercreditor Agreement, generally, provides that on, in contemplation of, or after, a listing of all or part of the share capital of the Company or any of its subsidiaries on any recognised investment exchange or any other sale or issue by way of flotation or public offering in relation to the Company or any such subsidiary in any jurisdiction (a "**Listing**," and the relevant member of the Group who will issue shares, or whose shares are sold pursuant to the listing, the "**IPO Entity**"), at the Company's option:

(i) the Group shall comprise only the IPO Entity and its subsidiaries from time to time;

(ii) the IPO Entity shall take on the Company's role under the Intercreditor Agreement;

(iii) none of the representations, warranties, undertakings or other provisions of the Intercreditor Agreement shall apply to any holding company of the IPO Entity (whether in its capacity as a Debtor or otherwise);

(iv) no event, matter or circumstance relating to any holding company of the IPO Entity (whether in its capacity as a Debtor or otherwise) shall, or shall be deemed to, directly or indirectly constitute or result in a breach of any representation, warranty, undertaking or other term of the Intercreditor Agreement or a default or an event of default;

(v) each holding company of the IPO Entity shall be irrevocably and unconditionally released from all obligations under the Intercreditor Agreement and the security documents (including any security granted by any such holding company); and

(vi) unless otherwise notified by the Company:

(A) each person which is party to the Intercreditor Agreement as an investor shall be irrevocably and unconditionally released from the Intercreditor Agreement and all obligations and restrictions under the Intercreditor Agreement (and from the date specified by the Company that person shall cease to be party to the Intercreditor Agreement as an investor and shall have no further rights or obligations under the Intercreditor Agreement as an investor); and

(B) there shall be no obligation or requirement for any person to become party to the Intercreditor Agreement as an investor, such amendments being a "Group Pushdown."

In the event that any person is released from or does not become party to the Intercreditor Agreement as an investor as a consequence of the above paragraph, any term of any debt document which requires or assumes that any person be an investor or that any liabilities or obligations to such person be subject to the Intercreditor Agreement or otherwise subordinated shall cease to apply.

The Company must provide written notice to the Security Agent in order to implement a Group Pushdown. Such a notice may be revoked prior to the Listing to which it relates *provided* that (where requested by an Instructing Group) any security which was released is reinstated and any investor which was released from its obligations under the Intercreditor Agreement accedes again.

The parties to the Intercreditor Agreement shall be required to enter into any amendment to or replacement of it and/or take such other action as is required by the Company to facilitate or reflect any of the matters contemplated by the preceding paragraph and the Security Agent is irrevocably authorized to promptly execute any release or other document and/or take such other action under or in relation to any Debt Document (or any asset subject or expressed to be subject to any security document) as is requested in order to complete, implement or facilitate such matters.

Required Consents

The Intercreditor Agreement provides that, subject to certain exceptions, it and/or a security document may be amended or waived only with the written consent of:

(i) if the relevant amendment or waiver (the "**Proposed Amendment**") is prohibited by the Senior Facilities Agreement, the Senior Facility Agent (acting on the instructions of the requisite Senior Lenders in accordance with the applicable provisions of the Senior Facilities Agreement);

(ii) if any Priority Facility has been incurred and the Proposed Amendment is prohibited by the terms of the relevant Priority Facility Agreement, the Priority Facility Agent in respect of that Priority Facility (if applicable, acting on the instructions of the Majority Priority Facility Lenders);

(iii) if any Senior Notes have been issued and the Proposed Amendment is prohibited by the terms of the relevant Senior Notes Indenture, the Senior Notes Trustee;

(iv) if any Second Lien Debt has been incurred and the Proposed Amendment is prohibited by the terms of the Second Lien Facility Agreement, the Second Lien Facility Agent (acting on the instructions of the requisite Second Lien Lenders in accordance with the terms of the Second Lien Facility Agreement);

(v) if any Permitted Senior Financing Debt has been incurred and the Proposed Amendment is prohibited by the terms of the relevant Permitted Senior Financing Agreement, the Senior Creditor Representative in respect of that Permitted Senior Financing Debt (if applicable, acting on the instructions of the Majority Permitted Senior Financing Creditors);

(vi) if any Permitted Second Lien Financing Debt has been incurred and the Proposed Amendment is prohibited by the terms of the relevant Permitted Second Lien Financing Agreement, the Second Lien Creditor Representative in respect of that Permitted Second Lien Financing Debt (if applicable, acting on the instructions of the Majority Permitted Second Lien Financing Creditors);

(vii) if any Senior Parent Notes have been issued and the Proposed Amendment is prohibited by the terms of the relevant Senior Parent Notes Indenture, the Senior Parent Notes Trustee;

(viii) if any Permitted Parent Financing Debt has been incurred and the Proposed Amendment is prohibited by the terms of the relevant Permitted Parent Financing Agreement, the Senior Parent Creditor Representative in respect of that Permitted Parent Financing Debt (if applicable, acting on the instructions of the Majority Permitted Parent Financing Creditors);

(ix) if a Hedge Counterparty is providing hedging to a Debtor under a hedging agreement, that Hedge Counterparty (in each case only to the extent that the relevant amendment or waiver adversely affects the continuing rights and/or obligations of that Hedge Counterparty);

(x) if an Operating Facility Lender is providing one or more facility to a Debtor under an Operating Facility Document, that Operating Facility Lender (in each case only to the extent that the relevant amendment or waiver adversely affects the continuing rights and/or obligations of that Operating Facility Lender and is an amendment or waiver which is expressed to require the consent of that Operating Facility Lender under the applicable Operating Facility Document, as notified by the Company to the Security Agent at the time of the relevant amendment or waiver);

(xi) certain investors (as permitted under the Intercreditor Agreement); and

(xii) the Company.

Notwithstanding the foregoing, any amendment or waiver of any Secured Debt Document that is made or effected in connection with any Debt Refinancing (see "*—Debt Refinancing*"), any incurrence of additional and/or refinancing debt (as referred to in "*—Ranking and Priority—Additional and/or Refinancing Debt*") or Non-Distressed Disposal (see "*—Proceeds of Disposals—Non-Distressed Disposals*") or in connection with any other provision of any Secured Debt Document (*provided* that such amendment or waiver is not expressly prohibited by the terms of any other Secured Debt Document) shall be binding on all parties to the Intercreditor Agreement.

The Intercreditor Agreement or a security document may be amended by the Company and the Security Agent without the consent of any other party, to cure defects, resolve ambiguities or reflect changes in each case of a minor technical or administrative nature or as otherwise for the benefit of all or any of the Secured Parties. Any amendment, waiver or consent which relates only to the rights or obligations applicable to creditors under a particular Debt Financing Agreement (and which does not materially and adversely affect the rights or interests of creditors under other Debt Financing Agreements) may be approved with only the consent of the creditor representative in respect of that Debt Financing Agreement and the Company.

Amendments and Waivers: Security Documents

Subject to the paragraph below and to certain exceptions under the Intercreditor Agreement and unless the provisions of any debt document expressly provide otherwise, the Security Agent may, if authorized by an Instructing Group, and if the Company and (in the case of any security document to which a Third Party Security Provider is a party) the relevant Third Party Security Provider consents, amend the terms of, waive any of the requirements of or grant consents under, any of the security documents which shall be binding on each party.

Subject to the second and third paragraphs of the section captioned "*—Exceptions*" below, any amendment or waiver of, or consent under, any security document which would adversely affect the nature or scope of the charged property or the manner in which the proceeds of enforcement of the security are distributed requires approval as set out under the section captioned "*—Required Consents.*"

Exceptions

Subject to the following paragraph of this "—*Exceptions*" section, an amendment, waiver or consent which adversely relates to the express rights or obligations of an agent, an arranger or the Security Agent (in each case in such capacity) may not be effected without the consent of that agent, that arranger or the Security Agent (as the case may be) at such time.

The foregoing shall not apply:

- to any release of security, claim or liabilities; or
- to any consent,

which, in each case, the Security Agent gives in accordance with the provisions set out under the caption "—*Proceeds of Disposals*" above.

The first paragraph of this "—*Exceptions*" section shall apply to an arranger only to the extent that the arranger liabilities are then owed to that arranger.

Agreement to Override

The Intercreditor Agreement provides that, unless otherwise expressly stated therein, the Intercreditor Agreement overrides anything in the debt documents to the contrary.

OFFER RESTRICTIONS

This Exchange Offer Memorandum does not constitute an offer to participate in the EUR TIF Exchange Offer in any jurisdiction in which, or to any person to or from whom, it is unlawful to engage in the EUR TIF Exchange Offer or for there to be such participation under applicable securities laws. The distribution of this Exchange Offer Memorandum in certain jurisdictions may be restricted by law. Persons into whose possession this Exchange Offer Memorandum comes are required by each of the Issuer, the Dealer Managers and the Exchange and Information Agent to inform themselves about, and to observe, any such restrictions. Noteholders should carefully review the restrictions and limitations applicable in certain jurisdictions and the manner in which this Exchange Offer Memorandum and any other offering material or advertisement in connection with the EUR TIF Exchange Offer will be made available in such jurisdictions, as set forth below.

No action has been or will be taken in any jurisdiction by the Issuer, the Dealer Managers or the Exchange and Information Agent in relation to the EUR TIF Exchange Offer that would permit a public offering of securities or the possession, circulation or distribution of this EUR TIF Exchange Offer Memorandum or any other offering material or advertisement in connection with the EUR TIF Exchange Offer, in any country or jurisdiction where regulatory filings, authorizations or any other action for that purpose would be required. Accordingly, neither the EUR TIF New Notes nor the EUR Optics Notes may be issued, offered, sold, exchanged or substituted directly or indirectly, and neither this Exchange Offer Memorandum nor any other offering material or advertisement in connection with the EUR TIF Exchange Offer may be distributed or published, in or from any such jurisdiction, except in compliance with any applicable rules or regulations of any such country or jurisdiction.

In this Section references to "Notes" shall refer to the "EUR TIF New Notes" and "EUR Optics (TIF) Notes".

United States

The Notes have not been and will not be registered under the U.S. Securities Act or the securities laws of any state or other jurisdiction of the United States and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons (as defined in Regulation S under the U.S. Securities Act) except pursuant to an exemption from, or in certain transactions exempt from or not subject to, the registration requirements of the U.S. Securities Act. Terms used in this "United States" sub-section, unless otherwise specified, have the meanings given to them by Regulation S under the U.S. Securities Act.

The Notes are subject to U.S. tax law requirements and may not be offered, sold or delivered within the United States or its possessions or to a United States person, except in certain transactions permitted by U.S. Treasury regulations. Terms used in this paragraph have the meanings given to them by the U.S. Internal Revenue Code of 1986 and U.S. Treasury regulations promulgated thereunder.

European Economic Area

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the EEA. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or (ii) a customer within the meaning of the Insurance Distribution Directive, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently no key information document required by the PRIIPs Regulation for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPS Regulation.

This Exchange Offer Memorandum is not a prospectus for the purposes of the Prospectus Regulation.

United Kingdom

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom. For the purposes, a "retail investor" means a person who is one (or more) of: (i) a "retail client", as defined in point (8) of Article 2 of Regulation (EU) No 2017/565

as it forms part of UK domestic law by virtue of the EUWA; or (ii) a "customer" within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement the Insurance Distribution Directive, where that customer would not qualify as a "professional client", as defined in point (8) of Article 2(1) of UK MiFIR; or (iii) not a "qualified investor" as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently, no key information document required by the UK PRIIPs Regulation for offering, selling or distributing the Notes or otherwise making them available to retail investors in the United Kingdom has been prepared and, therefore, offering, selling or distributing the Notes or otherwise making them available to any retail investor in the United Kingdom may be unlawful under the UK PRIIPs Regulation.

The communication of the Exchange Offer Memorandum and any other documents or materials relating to the EUR TIM Exchange Offers are not being made, and such documents and/or materials have not been approved, by an authorized person for the purposes of section 21 of the Financial Services and Markets Act 2000. Accordingly, such documents and/or materials are not being distributed to, and must not be passed on to, the general public in the United Kingdom. The communication of such documents and/or materials as a financial promotion is only being made to persons in the United Kingdom who are Investment Professionals (as defined in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "**Order**")) or within Article 49(2)(a) to (d) of the Order, or any other persons to whom it may otherwise lawfully be made under the Order (such persons together being the "**Relevant Persons**"). The Exchange Offer Memorandum is only available to Relevant Persons and the transactions contemplated herein will be available only to, or engaged in only with, Relevant Persons, and this financial promotion must not be relied or acted upon by persons other than Relevant Persons.

Any person dealing with the Notes in a transaction conducted in, from or otherwise involving the United Kingdom:

1. may only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) received by it in connection with the issue or sale of any Notes in circumstances in which section 21(1) of FSMA does not apply to the Issuer; and

2. must comply with all applicable provisions of FSMA with respect to anything done by it in relation to the Notes in, from or otherwise involving the United Kingdom.

Hong Kong

The Notes may not be offered or sold in Hong Kong by means of any document other than to (1) "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571) of Hong Kong and any rules made thereunder, or (2) in circumstances which do not result in the document being a "prospectus" as defined in the Companies Ordinance (Cap. 32) of the laws of Hong Kong or which do not constitute an offer to the public within the meaning of that Ordinance. No invitation, advertisement or document relating to the Notes may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to the Notes which are intended to be disposed of only to persons outside Hong Kong or only to "professional investors," as defined under the Securities and Futures Ordinance (Cap. 571) of the laws of Hong Kong and any rules made thereunder.

Republic of Italy

No action has been or will be taken which could allow an offering to the public in the Republic of Italy within the meaning of Article 1, paragraph 1, letter t) of the Italian Financial Services Act and, in particular, the Exchange Offers have not been submitted to and/or cleared by CONSOB (the Italian securities exchange commission) and the offering of the Notes described in this Exchange Offer Memorandum has not been registered with CONSOB pursuant to Italian securities legislation and will not be subject to formal review or clearance by CONSOB. Accordingly, the Notes may not be offered, sold or delivered, directly or indirectly, nor may copies of the following Exchange Offer Memorandum or of any other document relating to the Notes described in this Exchange Offer Memorandum be distributed in the Republic of Italy, except: (a) to qualified investors (*investitori qualificati*) ("**Qualified Investors**") pursuant to Article 2, paragraph (e) of the Prospectus Regulation, Article 100 of the Italian Financial Services Act, and implementing CONSOB regulations, including CONSOB Regulation No. 11971 of May 14, 1999, as amended ("**Issuers' Regulation**") and CONSOB Regulation No. 20307 of February 15, 2018, as amended ("**CONSOB Regulation on**

Intermediaries") or (b) in any other circumstances which are exempted from the rules on public offerings pursuant to Article 1 of the Prospectus Regulation, Article 100 of the Italian Financial Services Act, Article 34-ter of the Issuers' Regulation and the applicable Italian laws and regulations.

The Notes may not be offered, sold or delivered and neither this Exchange Offer Memorandum nor any other material relating to the Notes may be distributed or made available in the Republic of Italy unless such offer, sale or delivery of Notes or distribution or availability of copies of this Exchange Offer Memorandum or any other offering material or other documentation relating to the Notes in the Republic of Italy is made in compliance with the selling restrictions above and must be made as follows: (a) by *soggetti abilitati* (including investment firms, banks or financial intermediaries, as defined by Article 1, first paragraph, letter r, of the Italian Financial Services Act) permitted to conduct such activities in Italy in accordance, as applicable, with the Italian Banking Act as subsequently integrated and amended, the Italian Financial Services Act, the Issuers' Regulation, the CONSOB Regulation on Intermediaries and any other applicable laws and regulations; and (b) in compliance with all relevant Italian securities, tax and exchange control and other applicable laws and regulations and any other applicable requirements or limitations which may be imposed from time to time by CONSOB, the Bank of Italy (including, the reporting requirements, where applicable, pursuant to Article 129 of the Italian Banking Act and the implementing guidelines of the Bank of Italy issued on August 25, 2015, as amended on August 10, 2016 and November 2, 2020 and as further amended from time to time) and/or any other competent Italian authority.

Any investor purchasing the Notes is solely responsible for ensuring that any offer, sale, delivery or resale of the Notes by such investor occurs in compliance with applicable laws and regulations.

France

This Exchange Offer Memorandum has not been prepared and is not being distributed in the context of an offer to the public of financial securities in France within the meaning of Article L.411 1 of the French Code monétaire et financier and Title 1 of Book II of the Règlement Général de l'Autorité des Marchés Financiers, and has not been approved by, registered or filed with the Autorité des marchés financiers (the "**AMF**"), nor any competent authority of another EEA Member State that would have notified its approval to the AMF under the Prospectus Regulation as implemented in France and in any relevant EEA Member State. Therefore, the Notes may not be, directly or indirectly, offered or caused to be offered or sold to the public in France (offre au public de titres financiers) and this Exchange Offer Memorandum and any other offering or marketing material or information relating to the Notes has not been and will not be released, issued or distributed or caused to be released, issued or distributed to the public in France or used in connection with any offer for subscription or sales of the Notes to the public in France in any way that would constitute, directly or indirectly, an offer to the public in France. Offers, sales and distributions have only been and shall only be made in France to qualified investors (investisseurs qualifiés) acting solely for their own account (*agissant pour compte propre*) and/or to providers of investment services relating to portfolio management for the account of third parties (*personnes fournissant le service d'investissement de gestion de portefeuille pour compte de tiers*), all as defined in and in accordance with Articles L.411 1, L.411 2, D.411 1, D.411 4, D.744 1, D.754 1 and D.764 1 of the French Code monétaire et financier. Prospective investors are informed that (a) this Exchange Offer Memorandum has not been and will not be submitted for clearance to the AMF, (b) in compliance with Articles L.411 2, D.411 1, D.411 4, D.744 1, D.754 1 and D.764 1 of the French Code monétaire et financier, any qualified investors subscribing for the Optics Notes should be acting for their own account (agissant pour compte propre) and (c) the direct and indirect distribution or sale to the public of the Notes acquired by them may only be made in compliance with Articles L.411 1, L.411 2, L.412 1 and L.621 8 through L. 621 8 3 of the French Code monétaire et financier.

Japan

The Notes have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended, the "**Financial Instruments and Exchange Act**"). Accordingly, no Notes have been offered or sold, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan (which term as used herein means any person resident in Japan, including any corporation or other entity organized under the laws of Japan) or to others for re-offering or re-sale, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the Financial Instruments and Exchange Act and other relevant laws and regulations of Japan.

Singapore

This Exchange Offer Memorandum has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, each Dealer Manager has not offered or sold any Notes or caused the Notes to be made the subject of an invitation for subscription or purchase and will not offer or sell any Notes or cause the Notes to be made the subject of an invitation for subscription or purchase, and has not circulated or distributed, nor will it circulate or distribute, this Exchange Offer Memorandum or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the Notes, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act 2001 of Singapore, as modified or amended from time to time (the "**SFA**")) pursuant to Section 274 of the SFA or (ii) to an accredited investor (as defined in Section 4A of the SFA) pursuant to and in accordance with the conditions specified in Section 275 of the SFA.

Switzerland

The offering if the Notes is not a public offering in Switzerland. The Notes offered hereby may not be publicly offered, sold, or advertised, directly or indirectly, in, into, or from Switzerland. This document is not intended to constitute an offer or solicitation to purchase or invest in the Optics Notes described herein. Neither this Exchange Offer Memorandum nor any other offering or marketing material relating to the Notes constitutes a prospectus as such term is understood pursuant to Article 652a or Article 1156 of the Swiss Code of Obligations, and neither this Exchange Offer Memorandum nor any other offering or marketing material relating to the Notes may be publicly distributed or otherwise made publicly available in Switzerland. The Notes offered hereby will not be listed on the SIX Swiss Exchange Ltd. Or on any other exchange or regulated trading facility in Switzerland, and, therefore, the documents relating to the Notes offered hereby, including, but not limited to, this Exchange Offer Memorandum, do not claim to comply with the disclosure standards of the Swiss Code of Obligations and the listing rules of SIX Swiss Exchange Ltd. And corresponding prospectus schemes annexed to the listing rules of the SIX Swiss Exchange Ltd.

CERTAIN TAX CONSIDERATIONS

The following overview contains a description of certain Italian, EU, Luxembourg and U.S. tax consequences in respect of the purchase, ownership and disposal of the Notes. This overview is based on the laws in force in Italy, the EU, Luxembourg and the U.S. as at the date of this Exchange Offer Memorandum (as they are currently applied by the relevant tax authorities) and is subject to any changes in such laws occurring after such date, which changes could be made also on a retroactive basis. The Issuer will not update this overview to reflect changes in laws and if such a change occurs the considerations in this summary could become invalid.

The following overview does not purport to be a comprehensive description of all the tax considerations which may be relevant to a decision to subscribe for, purchase, own or dispose of the Notes and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities or commodities) may be subject to special rules.

In view of the number of different jurisdictions where tax laws may apply to a Noteholder, this Exchange Offer Memorandum does not discuss the tax consequences for Noteholders arising from the exchange of Original Notes pursuant to the Exchange Offer and the receipt of New Notes and Optics Notes. Noteholders are urged to consult their own professional advisers regarding the possible tax consequences under the laws of the jurisdictions that apply to them or to the exchange of their Original Notes and the receipt pursuant to the Exchange Offer of New Notes and Optics Notes. Noteholders are liable for their own taxes and have no recourse to the Issuer, the Dealer Managers or the Exchange and Information Agent or any of their respective directors, officers, agents, employees or affiliates with respect to taxes arising in connection with the Exchange Offer.

Certain Italian Tax Considerations

The following summary is of a general nature and is included herein solely for information purposes. It is based on the laws and published practices presently in force in Italy, though it is not intended to be, nor should it be constructed to be, legal or tax advice. It does not purport to be a comprehensive description of all the tax considerations which may be relevant to a decision to subscribe for, purchase, own or dispose of the Notes and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities or commodities) may be subject to special rules. Prospective purchasers of the Notes are advised to consult their own tax advisers concerning the overall tax consequences under Italian tax law, under the tax laws of the country in which they are resident for tax purposes and of any other potentially relevant jurisdiction of acquiring, holding and disposing of the Notes and receiving payments of interest, principal and/or other amounts under the Notes.

The statements herein regarding Italian taxation are based on the laws and published practices in force in Italy as of the date of this Exchange Offer Memorandum and are subject to any changes in law occurring after such date, which changes could be made on a retroactive basis.

According to Law 111/2023, the Italian Tax Reform could significantly change the taxation of financial incomes and capital gains, that may impact on the current tax regime of the Notes, as summarized below.

Where in this summary English terms and expressions are used to refer to Italian concepts, the meaning to be attributed to such terms and expressions shall be the meaning to be attributed to the equivalent Italian concepts under Italian tax law.

Tax treatment of notes issued by Optics

In this sub-section references to "Notes" shall refer to notes issued by Optics.

Decree No. 239 provides for the applicable regime with respect to the tax treatment of interest, premium and other income (including the difference between the redemption amount and the issue price) (hereinafter collectively referred to as "**Interest**") from notes falling within the category of bonds (*obbligazioni*) or securities similar to bonds (*titoli similari alle obbligazioni*) which are issued, *inter alia*, by Italian resident companies whose shares are not traded on a regulated market or on a multilateral trading facility of any EU Member State or EEA country allowing a satisfactory exchange of information with the Italian tax authorities as included in the White List, provided that the notes are traded

on the aforementioned regulated markets or facilities, or, if not traded in the aforementioned market or multilateral trading facility, when such notes are held by "qualified investors" (*investitori qualificati*) as defined pursuant to Article 100 of the Italian Financial Services Act, as subsequently amended and supplemented as a result of Article 2, paragraph (1)(e) of the Prospectus Regulation, as implemented by Article 35 (1)(d) of the CONSOB Regulation on Intermediaries. For these purposes, pursuant to Article 44 of the Presidential Decree No. 917 of December 22, 1986 (the "**Italian Tax Code**" or the "**ITC**"), as amended and supplemented from time to time, securities similar to bonds are defined as securities that: (i) incorporate an unconditional obligation to pay, at maturity or redemption, an amount not less than their nominal value and (ii) do not give any right to directly or indirectly participate in the management of the issuer or of the business in relation to which the securities are issued nor any type of control on the management.

Italian Resident Holder of Notes

Where an Italian resident Noteholder is *inter alia* (i) an individual not engaged in entrepreneurial activity to which the Notes are connected, (ii) a non-commercial partnership pursuant to Article 5 of the Italian Tax Code (with the exception of general partnership, a limited partnership and similar entities), (iii) a non-commercial private or public institution (except for Italian resident investment funds)or (iv) an investor exempt from Italian corporate income taxation, Interest relating to the Notes, accrued during the relevant holding period, are subject to a tax withheld at source, referred to as *Imposta Sostitutiva*, levied at the rate of 26%, unless such Noteholder has opted for the application of the "*risparmio gestito*" regime – see under "*—Tax Treatment of Capital Gains on the Notes—Capital gains realized by Italian Resident Holders of the Notes*" below

If the Noteholders described under *inter alia* (i) and (iii) above are engaged in an entrepreneurial activity to which the Notes are connected, *Imposta Sostitutiva* applies as a provisional tax.

Interest is subject to the *Imposta Sostitutiva* and is included in the relevant income tax return. As a consequence, the Interest is subject to the ordinary income tax and the *Imposta Sostitutiva* may be recovered as a deduction from the income tax due. Subject to certain conditions (including a minimum holding period requirement) and limitations, Interest relating to the Notes may be exempt from any income taxation (including from the 26% *Imposta Sostitutiva*) if the Noteholders are Italian resident individuals not engaged in entrepreneurial activity or social security entities pursuant to Legislative Decree No. 509 of June 30, 1994 and Legislative Decree No. 103 of February 10, 1996 and the Notes are included in a long-term savings account (*piano di risparmio a lungo termine*) that meets all the requirements from time to time applicable set forth under Italian Law.

Where an Italian resident Noteholder is a company or similar commercial entity, or a permanent establishment in Italy of a foreign company to which the Notes are effectively connected, and the Notes are deposited with an authorized intermediary (as defined below), Interest from the Notes will not be subject to *Imposta Sostitutiva* but must be included in the relevant Noteholder's annual income tax return and are therefore subject to general Italian corporate taxation ("**IRES**") and, in certain circumstances, depending on the status of Noteholder, also to regional tax on productive activities ("**IRAP**").

Under the current regime provided by Law Decree No. 351 of September 25, 2001, converted into law with amendments by Law No. 410 of November 23, 2001 ("**Decree No. 351**"), Article 32 of Law Decree No. 78 of May 31, 2010, converted into law with amendments by Law No. 122 of July 30, 2010, and Legislative Decree No. 44 of March 4, 2014, all as amended, payments of Interest in respect of the Notes made to Italian resident real estate investment funds created under Article 37 of Legislative Decree No. 58, as amended and supplemented, and Article 14-bis of Law No. 86 of January 25, 1994 and Italian real estate investment companies with fixed capital - SICAFs (together, the "**Real Estate Investment Funds**") are subject neither to *Imposta Sostitutiva* nor to any other income tax at the level of the Real Estate Investment Fund, *provided* that the Notes are timely deposited with a qualified intermediary (as defined below) but a withholding or substitute tax of 26% will apply, in certain circumstances, to income realized by unitholders or shareholders in case of distributions, redemption or sale of the units. Moreover, subject to certain conditions and depending on the status and percentage of participation held, income realized by Real Estate Investment Funds is attributed to the relevant investors and subject to tax in their hands irrespective of its actual collection and in proportion to the percentage of ownership of units/shares on a tax transparency basis.

Where an Italian resident Noteholder is an open-ended or a closed-ended investment fund, a *Società di Investimento a Capitale Fisso* ("**SICAF**") (other than a Real Estate Investment Fund) or a *Società di Investimento a Capitale*

Variabile ("**SICAV**") established in Italy (together, the "**Fund**") and either (i) the Fund or (ii) its manager is subject to the supervision of a regulatory authority and the Notes are deposited with an authorized intermediary (as defined below), Interest accrued during the holding period on such Notes will not be subject to *Imposta Sostitutiva* nor to any other income at the level of the Fund, but must be included in the management results of the Fund accrued at the end of each tax period. The Fund will not be subject to taxation on such result, but a withholding tax of 26% will apply, in certain circumstances, to distributions made in favor of unitholders or shareholders or in case of redemption or sale of the units or shares in the Fund.

Where an Italian resident Noteholder is a pension fund (subject to the regime provided for by Article 17 of Legislative Decree No. 252 of December 5, 2005) and the Notes are deposited with an authorized intermediary (as defined below), Interest relating to the Notes and accrued during the holding period will not be subject to *Imposta Sostitutiva*, but must be included in the result of the relevant portfolio accrued at the end of the tax period, which will be subject to a 20% substitute tax. Subject to certain conditions (including a minimum holding period requirement) and limitations, Interest relating to the Notes may be excluded from the taxable base of the 20% substitute tax if the Notes are included in a long-term savings account (*piano di risparmio a lungo termine*) that meets all the requirements from time to time applicable set forth under Italian law.

Pursuant to Decree No. 239, the *Imposta Sostitutiva* is applied by banks, *società di intermediazione mobiliare* (so-called "**SIMs**"), fiduciary companies, *società di gestione del risparmio* ("**SGRs**"), stockbrokers and other qualified entities, identified by a decree of the Ministry of Finance, which are resident in Italy ("**Intermediaries**" and each an "**Intermediary**") or by permanent establishments in Italy of banks or intermediaries resident outside Italy or by organizations or companies non-resident in Italy, acting through a system of centralized administration of securities and directly connected with the Department of Revenue of the Ministry of Finance (which includes *Euroclear* and *Clearstream, Luxembourg*) having appointed an Italian representative for the purposes of Decree No. 239.

For the purposes of applying *Imposta Sostitutiva*, Intermediaries or permanent establishments in Italy of foreign intermediaries are required to act in connection with the collection of Interest or, in the transfer or disposal of the Notes, including in their capacity as transferees. For the purpose of the application of the *Imposta Sostitutiva*, a transfer of Notes includes any assignment or other act, either with or without consideration, which results in a change in ownership of the relevant Notes or in a change in the Intermediary with which the Notes are deposited.

Where the Notes are not deposited with an Intermediary, the *Imposta Sostitutiva* is applied and withheld by any Italian financial intermediary paying Interest to a Noteholder or, absent that, directly by the Issuer paying that Interest.

Non-Italian Resident Holders of Notes

Where the Noteholder is a non-Italian resident without a permanent establishment in Italy to which the Notes are effectively connected, an exemption from *Imposta Sostitutiva* applies *provided* that the non-Italian resident beneficial owner is either: (i) resident, for tax purposes, in a country which allows for a satisfactory exchange of information with the Republic of Italy as listed in the Italian Ministerial Decree of September 4, 1996, as amended from time to time pursuant to Article 11(4)(c) of Decree No. 239 (i.e. the White List); or (ii) an international body or entity set up in accordance with international agreements which have entered into force in Italy; or (iii) a Central Bank or an entity which manages, *inter alia*, the official reserves of a foreign State; or (iv) an institutional investor which is established in a country included in the White List, even if it does not possess the status of a taxpayer in its own country of establishment.

To ensure payment of Interest in respect of the Notes without the application of 26% *Imposta Sostitutiva*, non-Italian resident investors indicated above must:

(a) deposit the Notes in due time together with the coupons relating to such Notes directly or indirectly with:

 (i) an Italian or non-Italian resident bank or financial institution (there is no requirement for the bank or financial institution to be EU resident) (the "**First Level Bank**"), acting as intermediary in the deposit of the Notes held, directly or indirectly, by the Noteholder with a Second Level Bank (as defined below); or

(ii) an Italian resident bank or SIM, or a permanent establishment in Italy of a non-resident bank or SIM, acting as depositary or sub-depositary of the Notes appointed to maintain direct relationships, via telematic link, with the Department of Revenue of the Ministry of Economy and Finance (the "**Second Level Bank**"). Organizations and companies that are not resident of Italy, acting through a system of centralized administration of securities and directly connected with the Department of Revenue of the Italian Ministry of Economy and Finance (which include Euroclear and Clearstream, Luxembourg) are treated as Second Level Banks, *provided* that they appoint an Italian representative (an Italian resident bank or SIM, or the permanent establishment in Italy of a non-resident bank or SIM, or a central depositary of financial instruments pursuant to Article 80 of the Italian Financial Services Act) for the purposes of the application of Decree No. 239. If a non-Italian resident Noteholder deposits the Notes directly with a Second Level Bank, the latter shall be treated both as a First Level Bank and a Second Level Bank; and

(b) file in due time with the First Level Bank or Second Level Bank (as the case may be) a declaration (*autocertificazione*) stating, *inter alia*, that he or she is a resident, for tax purposes (or established, for institutional investors not subject to tax), in a White List State. Such declaration (*autocertificazione*) which must comply with the requirements set forth by an Italian Decree of the Ministry for the Economy and Finance of December 12, 2001 (as amended and supplemented), is valid until withdrawn or revoked and need not be submitted where a certificate, declaration or other similar document meant for equivalent uses was previously submitted to the same depository. Additional requirements are provided for institutional investors. The declaration (*autocertificazione*) is not required for non-Italian resident investors that are international entities and organizations established in accordance with international agreements ratified in Italy and Central Banks or entities which manage, *inter alia*, the official reserves of a foreign state.

The *Imposta Sostitutiva* will be applicable at the rate of 26% to Interest paid to non-Italian Resident Noteholders who do not qualify for the foregoing exemption or do not timely and properly satisfy the relevant conditions and procedural requirements provided for the exemption to apply (including the procedures set forth under Decree No. 239 and in the relevant implementing rules).

Noteholders who are subject to the *Imposta Sostitutiva* may, nevertheless, be eligible for full or partial relief under an applicable double tax treaty entered into by Italy and the State of tax residence of the relevant noteholder, if more favorable, subject to timely filing of required documentation provided by Regulation of the Director of Italian Revenue Agency No. 2013/84404 of July 10, 2013.

Tax Treatment of Capital Gains on the Notes issued by Optics

In this sub-section references to "Notes" shall refer to the notes issued by Optics.

Capital gains realized by Italian Resident Holders of the Notes

Any capital gain obtained from the sale or redemption of the Notes would be treated as part of the taxable income (and, in certain circumstances, depending on the status of the Noteholder, also as part of the net value of the production for IRAP purposes) if realized by an Italian company or a similar commercial entity, including the permanent establishment in Italy of foreign entities to which the Notes are effectively connected, or Italian resident individuals engaged in an entrepreneurial activity to which the Notes are connected.

Where an Italian resident Noteholder is *inter alia* (i) an individual holding the Notes not in connection with an entrepreneurial activity, (ii) a non-commercial partnership pursuant to Article 5 of the Italian Tax Code (with the exception of general partnership, a limited partnership and similar entities) or (iii) a non-commercial private or public institution (except for Italian resident investment funds), any capital gain realized by such Noteholder from the sale or redemption of the Notes would be subject to an *Imposta Sostitutiva* provided for by Legislative Decree No. 461 of November 21, 1997 ("**Decree No. 461**"), levied at the rate of 26% (the "**CGT**").

In respect of the application of the CGT, taxpayers may opt for one of the three regimes described below.

(a) "*Regime della dichiarazione*." Under the tax return regime, which is the default regime for Italian resident Noteholders under (i) through (iii) above, the CGT will be chargeable, on a yearly cumulative basis, on all

capital gains, net of any incurred capital loss offsetable, realized by the Italian resident individual Noteholder holding the Notes not in connection with an entrepreneurial activity pursuant to all sales or redemptions of the Notes carried out during any given tax year. The relevant Noteholder must indicate the overall capital gains realized in any tax year, net of any relevant incurred capital loss offsetable, in the annual tax return and pay the CGT on such gains together with any balance income tax due for such year. Capital losses in excess of capital gains may be carried forward against capital gains realized in any of the four succeeding tax years.

(b) "*Regime del risparmio amministrato*." As an alternative to the tax return regime, Italian resident Noteholders under (i) through (iii) above may elect to pay the CGT separately on capital gains realized on each sale or redemption of the Notes. Such separate taxation of capital gains is allowed subject to (i) the Notes being deposited with Italian banks, SIMs or certain authorized financial intermediaries (including permanent establishments in Italy of foreign intermediaries) and (ii) an express election for the *risparmio amministrato* regime being timely made in writing by the relevant Noteholder. The depository is responsible for accounting for CGT in respect of capital gains realized on each sale or redemption of the Notes (as well as in respect of capital gains realized upon the revocation of its mandate), net of any incurred capital loss, and is required to pay the relevant amount to the Italian tax authorities on behalf of the taxpayer, deducting a corresponding amount from the proceeds to be credited to the Noteholder or using funds provided by the Noteholder for this purpose. Under the *risparmio amministrato* regime, where a sale or redemption of the Notes results in a capital loss, such loss may be deducted from capital gains subsequently realized, within the same securities management, in the same tax year or in the following tax years up to the fourth. Under the *risparmio amministrato* regime, the Noteholder is not required to report the capital gains in the annual tax return.

(c) "*Regime del risparmio gestito*." Any capital gains realized by Italian Noteholders under (i) through (iii) above who have entrusted the management of their financial assets, including the Notes, to an authorized intermediary and have opted for the so-called *risparmio gestito* regime will be included in the computation of the annual increase in value of the managed assets accrued, even if not realized, at year end, subject to a 26% substitute tax, to be paid by the managing authorized intermediary. Under the *risparmio gestito* regime, any decrease in value of the managed assets accrued at year end may be carried forward against increase in value of the managed assets accrued in any of the four succeeding tax years. Under the *risparmio gestito* regime, the Noteholder is not required to report the capital gains realized in the annual tax return.

Subject to certain conditions (including a minimum holding period requirement) and limitations, capital gains realized upon sale or redemption of the Notes may be exempt from any income taxation (including from the 26% *Imposta Sostitutiva*) if the Noteholders are Italian resident individuals not engaged in entrepreneurial activity or social security entities pursuant to Legislative Decree No. 509 of June 30, 1994 and Legislative Decree No. 103 of February 10, 1996 and the Notes are included in a long-term savings account (*piano di risparmio a lungo termine*) that meets all the requirements from time to time applicable set forth under Italian law.

Any capital gains realized by a Noteholder that is a Real Estate Investment Fund will be subject neither to CGT nor to any other income tax at the level of the Real Estate Investment Fund. However, a withholding tax or a substitute tax at the rate of 26% will apply, in certain circumstances, to income realized by unitholders or shareholders in case of distributions, redemption or sale of the units or shares. Subject to certain conditions and depending on the status and percentage of participation held, income realized by a Real Estate Investment Fund is attributed to the relevant investors and subject to tax in their hands, irrespective of its actual collection and in proportion to the percentage of ownership of units on a tax transparency basis.

Any capital gains realized by an Italian Noteholder that is a Fund will not be subject to CGT, but will be included in the result of the relevant portfolio accrued at the end of the relevant tax period. Such result will not be taxed at the level of the Fund, but income realized by unitholders or shareholders in case of distributions, redemption or sale of the units or shares, may be subject to a withholding tax of 26%.

Any capital gains realized by a Noteholder that is an Italian pension fund (subject to the regime provided for by Article 17 of Legislative Decree No. 252 of December 5, 2005) will be included in the result of the relevant portfolio accrued at the end of the tax period, to be subject to the 20% substitute tax. Subject to certain conditions (including a minimum holding period requirement) and limitations, capital gains on the Notes may be excluded from the taxable

base of the 20% substitute tax if the Notes are included in a long-term individual savings account (*piano di risparmio a lungo termine*) that meets all the requirements from time to time applicable set forth under Italian law.

Capital gains realized by Non-Italian Resident Holders of the Notes

The CGT may in certain circumstances be payable on any capital gains realized upon sale, transfer or redemption of the Notes by non-Italian resident individuals and corporations without a permanent establishment in Italy to which the Notes are effectively connected, if the Notes are held in Italy.

However, pursuant to Article 23, first paragraph, letter f), of ITC, any capital gains realized by non-Italian resident persons, without a permanent establishment in Italy to which the Notes are effectively connected, through the sale for consideration or redemption of the Notes are not subject to taxation in Italy to the extent that the Notes are traded on a regulated market in Italy or abroad (according to the meaning identified by the Italian tax authorities in Circular Letter No. 32/E of December 23, 2020), and in certain cases subject to timely filing of required documentation (i.e. a self-declaration stating that the person is not resident in Italy for tax purposes) with Italian qualified Intermediaries (or permanent establishments in Italy of foreign Intermediaries) with which the Notes are deposited, even if the Notes are held in Italy and regardless of the provisions set forth by any applicable double tax treaty.

If the Notes are not traded on a regulated market in Italy or abroad (according to the meaning identified by the Italian tax authorities in Circular Letter No. 32/E if December 23, 2020) and are held in Italy, pursuant to the provisions of Decree No. 461, non-Italian resident holders of the Notes without a permanent establishment in Italy to which the Notes are effectively connected are exempt from CGT in the Republic of Italy on any capital gains realized upon sale for consideration or redemption of the Notes if they are (i) resident, for tax purposes, in a country which recognizes the Italian fiscal authorities' right to an adequate exchange of information, included in the White List, or (ii) an international body or entity set up in accordance with international agreements which have entered into force in Italy, or (iii) an institutional investor, whether or not subject to tax, which is organized or established in a country which is included in the White List, even if it does not possess the status of a taxpayer in its own country of establishment, or (iv) a central bank or an entity which manages, *inter alia*, the official reserves of a foreign State

Under these circumstances, if non-Italian residents without a permanent establishment in Italy to which the Notes are effectively connected hold Notes with an Italian authorized financial Intermediary and are subject to the *risparmio amministrato* regime or elect for the *risparmio gestito* regime, exemption from Italian taxation on capital gains will apply upon condition that they file in time with the authorized financial Intermediary an appropriate self-declaration stating that they meet the requirement indicated above. The *risparmio amministrato* regime is the ordinary regime automatically applicable to non-Italian resident persons and entities holding Notes deposited with an Italian Intermediary (or permanent establishment in Italy of foreign Intermediary), but non-resident holders of the Notes retain the right to waive this regime**.**

If the above-mentioned conditions are not met, capital gains realized by non-Italian Resident Noteholders without a permanent establishment in Italy to which the Notes are effectively connected, from the disposal or redemption of Notes issued by an Italian-resident Issuer and not traded on a regulated market, may be subject to the CGT at the current rate of 26%. However, Noteholders may be able to benefit from an applicable double tax treaty with Italy providing that capital gains realized upon the sale or redemption of the Notes are taxed only in the country where the recipient is tax resident, subject to satisfying certain conditions.

Tax treatment of notes issued by TIF

In this sub-section references to "Notes" shall refer to notes issued by TIF.

Decree No. 239 also provides for the applicable regime with respect to the tax treatment of interest from notes falling within the category of bonds (*obbligazioni*) or debentures similar to bonds (*titoli similari alle obbligazioni*) within the meaning of Article 44 of the ITC, issued by non-Italian resident issuers.

Italian Resident Holder of notes issued by TIF

Pursuant to Decree No. 239, a final *Imposta Sostitutiva* equal to 26% is applied on interest relating to the notes issued by TIF qualifying as bonds (*obbligazioni*) or debentures similar to bonds (*titoli similari alle obbligazioni*) within the meaning of Article 44 of the ITC issued by a non-Italian resident Issuer accrued during the relevant holding period, if received by (i) an Italian individual not engaged in an entrepreneurial activity to which the notes issued by TIF are connected, (ii) an Italian partnership (other than a *società in nome collettivo* or *società in accomandita semplice* or similar partnership), or a de facto partnership not carrying out commercial activities or professional association, (iii) an Italian non-commercial private or public institution, or (iv) an Italian investor exempt from IRES. If the Noteholders described under (i) and (iii) above are engaged in an entrepreneurial activity to which the notes issued by TIF are connected, the *Imposta Sostitutiva* applies on a provisional basis.

Subject to certain limitations and requirements (including a minimum holding period), Italian resident individuals not acting in connection with an entrepreneurial activity or social security entities pursuant to Legislative Decree No. 509 of June 30, 1994 and Legislative Decree No. 103 of February 10, 1996 may be exempt from any income taxation, including the *Imposta Sostitutiva*, on interest relating to the notes issued by TIF if the notes issued by TIF are included in a long-term individual savings account (*piano individuale di risparmio a lungo termine*) that meets the requirements from time to time applicable as set forth by Italian law.

Imposta Sostitutiva is generally applied by an Intermediary.

Where the notes issued by TIF and the relevant coupons are not deposited with an intermediary, the *Imposta Sostitutiva* is applied and withheld by any Italian intermediary (or permanent establishment in Italy of foreign intermediary) that intervenes in the payment of interest to any Noteholder.

Where an Italian resident Noteholder who is beneficial owner of the notes issued by TIF is a company or similar commercial entity, or a permanent establishment in Italy of a foreign company to which the notes issued by TIF are effectively connected and the notes issued by TIF and the relevant coupons are timely deposited with an Intermediary, interest from the notes issued by TIF will not be subject to *Imposta Sostitutiva*, but must be included in the relevant Noteholder's annual income tax return and are therefore subject to IRES (and, in certain circumstances, depending on the "status" of the Noteholder, also to IRAP).

Where an Italian resident Noteholder has opted for the *risparmio gestito* regime with respect to its investment in notes issued by TIF, such Noteholder will be subject to a 26 per cent. annual substitutive tax on the increase in value of the managed assets accrued at the end of each tax year.

For those categories of Noteholders not specifically mentioned in this paragraph and for Noteholders who are pension funds, Funds and Real Estate Funds holding notes issued by TIF, please refer to paragraph "*Tax treatment of Notes issued by TIM and Optics— Italian Resident Holder of Notes*" above.

Non-Italian Resident Holder of notes issued by TIF

No Italian *Imposta Sostitutiva* is applied on payments to a non-Italian resident Noteholder of Interest relating to Notes issued by a non-Italian resident issuer.

If payments of interest relating to the notes issued by a non-Italian resident issuer are beneficially owned by non-Italian residents and the notes are deposited with an Italian bank or other resident intermediary (or permanent establishment in Italy of foreign intermediary) or are sold through an Italian bank or other resident intermediary (or permanent establishment in Italy of foreign intermediary) or in any case an Italian resident intermediary (or permanent establishment in Italy of foreign intermediary) intervenes in the payment of interest on such notes, to ensure payment of interest without application of Italian taxation the non-Italian resident Noteholder may be required to produce to the Italian bank or the relevant intermediary a self-declaration stating that he, she or it is not resident in Italy for tax purposes.

Tax Treatment of Capital Gains on the Notes issued by TIF

In this sub-section references to "Notes" shall refer to notes issued by TIF.

Capital gains realized by Italian Resident Holders of the notes issued by TIF

Please see the "*Tax Treatment of Capital Gains on the Notes issued by TIM and Optics–Italian Resident Holder of Notes*" above.

Capital gains realized by Non-Italian Resident Holders of the notes issued by TIF

Capital gains realized by non-Italian resident Noteholders from the sale or redemption of the notes issued by TIF are not subject to Italian taxation, *provided* that such notes are held outside Italy.

Capital gains realized by non-Italian resident Noteholders, not having a permanent establishment in Italy to which the notes are connected, from the sale or redemption of notes traded on regulated markets in Italy or abroad are neither subject to the *Imposta Sostitutiva* nor to any other Italian income tax (subject to timely filling of required documentation (in particular, a self-declaration stating that the Noteholder is not resident in Italy for tax purposes) with Italian qualified intermediaries (or permanent establishments in Italy of foreign intermediaries) with which the notes are deposited), even if the notes are held in Italy and regardless of the provisions set forth by any applicable double tax treaty. Italian tax authorities have clarified that the notion of multilateral trading facility (MTF) under EU Directive 2014/65/EU (so called MiFID II) can be assimilated to that of "regulated market" for income tax purposes; conversely, organized trading facilities (OTF), not falling in the definition of MTF under MiFID II, cannot be assimilated to "regulated market" for Italian income tax purposes.

Capital gains realized by non-Italian resident Noteholders, not having a permanent establishment in Italy to which the notes are effectively connected, from the sale or redemption of the notes not traded on regulated markets and held in Italy are not subject to *Imposta Sostitutiva provided* that the Noteholder (i) qualifies as the beneficial owner of the capital gain and is resident for income tax purposes in a country included in the White List; or (ii) is an international entity or body set up in accordance with international agreements ratified in Italy; or (iii) is a central bank or an entity which manages, inter alia, the official reserves of a foreign State; or (iv) is an institutional investor which is incorporated in a country included in the White List, even if it does not possess the status of a taxpayer in its own country of incorporation, in any case, to the extent all the requirements and procedures set forth in Decree No. 239 and in the relevant implementation rules, as subsequently amended, in order to benefit from the exemption from *Imposta Sostitutiva* are met or complied with in due time, if applicable. In this case, if the non-Italian Noteholders have opted for the *risparmio amministrato* regime or the *risparmio gestito* regime, exemption from Italian capital gains tax will apply upon condition that they file in due course with the authorized financial intermediary an appropriate self-declaration (*autocertificazione*) stating that they meet the requirements indicated above.

If none of the conditions described above is met, capital gains realized by non-Italian resident Noteholders from the sale or redemption of the Notes not traded on regulated markets and held in Italy are subject to *Imposta Sostitutiva* at the current rate of 26%.

In any event, non-Italian resident individuals or entities without a permanent establishment in Italy to which the notes are effectively connected that may benefit from a double tax treaty with Italy providing that capital gains realized upon the sale or redemption of the notes are to be taxed only in the country of tax residence of the recipient, will not be subject to *Imposta Sostitutiva* in Italy on any capital gains realized upon the sale or redemption of the notes provided all the conditions for its application are met. In this case, if the non-Italian resident Noteholders have opted for the *risparmio amministrato* regime or the *risparmio gestito* regime, exemption from Italian capital gains tax will apply upon the condition that they file in due course with the authorized financial intermediary appropriate documents which include, inter alia, a statement issued by the competent tax authorities of the country of residence of the non-Italian Noteholders.

Payments made by an Italian Resident Guarantor

In this sub-section references to "Notes" shall refer to notes issued by TIF and Optics.

There is no authority directly regarding the Italian tax regime of payments on notes made by an Italian resident guarantor. Accordingly, there can be no assurance that the Italian tax authorities will not assert an alternative treatment of such payments than that set forth in this Exchange Offer Memorandum or that the Italian courts would not support such an alternative treatment.

With respect to payments on the Notes made to Italian resident Noteholders by an Italian resident guarantor, in accordance with one interpretation of Italian tax law, any such payments may be subject to Italian withholding tax at the rate of 26% levied as a final tax or a provisional tax ("*a titolo d'imposta o a titolo di acconto*") depending on the "status" of the Noteholder, pursuant to Presidential Decree September 29, 1973, No. 600, as subsequently amended. In the case of payments to non-Italian resident Noteholders, the withholding tax should be final. Double taxation treaties entered into by Italy may apply allowing for a lower (or, in certain cases, nil) rate of withholding tax in case of payments to non-Italian residents, subject to compliance with relevant subjective and procedural requirements.

In accordance with another interpretation, any such payment made by the Italian resident guarantor should be treated, in certain circumstances, as a payment by the relevant Issuer and should thus be subject to the tax regime described in the previous paragraphs of this section.

Inheritance and gift taxes

In this sub-section references to "Notes" shall refer to notes issued by TIF and Optics.

The transfers of any valuable asset (including the Notes) as a result of death or donation (or other transfers for no consideration) of Italian residents and of non-Italian residents, but in such latter case limited to assets held within the Italian territory (which, for presumption of law, includes bonds issued by Italian resident issuers), are subject to Italian inheritance and gift tax as follows:

(i) transfers in favor of the spouse and of direct descendants or direct ancestors are subject to an inheritance and gift tax applied at a rate of 4% on the value of the inheritance or the gift exceeding €1,000,000 (per beneficiary);

(ii) transfers in favor of the brothers or sisters are subject to an inheritance and gift tax applied at a rate of 6% on the value of the inheritance or the gift exceeding €100,000 (per beneficiary);

(iii) transfers in favor of all other relatives up to the fourth degree or relatives-in-law up to the third degree, are subject to an inheritance and gift tax applied at a rate of 6% on the entire value of the inheritance or the gift; and

(iv) any other transfer is, in principle, subject to an inheritance and gift tax applied at a rate of 8% on the entire value of the inheritance or the gift.

If the beneficiary of any such transfer is a disabled individual, whose handicap is recognized pursuant to Law No. 104 of February 5, 1992, the tax is applied only on the value of the assets (including the Notes) received in excess of €1,500,000 at the rates illustrated above, depending on the type of relationship existing between the deceased or donor and the beneficiary.

With respect to Notes listed on regulated markets and multilateral trading facilities, the value for inheritance and gift tax purposes is the average trading price of the last quarter preceding the date of the succession or the gift (including any accrued interest). With respect to unlisted Notes, the value for inheritance tax and gift tax purposes is generally determined by reference to the value of listed debt securities having similar features or based on certain elements as presented in the Italian tax law.

The transfer of financial instruments as a result of death is exempt from inheritance tax when such financial instruments are included in a long-term individual saving account (*piano di risparmio a lungo termine*) that meets the requirements set forth under Italian tax law.

Registration tax

In this sub-section references to "Notes" shall refer to notes issued by TIF and Optics.

Contracts relating to the transfer of securities, such as Notes, are subject to Italian registration tax as follows: (i) public deeds and deeds executed in Italy with notarized signatures are subject to a fixed registration tax of €200; (ii) private deeds are subject to a fixed registration tax of €200, which applies only in case of use, reference (*enunciazione*) in a subsequent registered deed or voluntary registration.

Stamp Duty

In this sub-section references to "Notes" shall refer to notes issued by TIF and Optics.

Pursuant to Article 13(2-ter) of the Tariff, Annex A, Part I, attached to Presidential Decree No. 642 of October 26, 1972, as subsequently amended, a proportional stamp duty applies on a yearly basis to any periodic reporting communications which may be sent by a financial intermediary to a Noteholder in respect of any Notes which may be deposited with such financial intermediary in Italy. The stamp duty applies at the rate of 0.2% on the market value or – in the lack of a market value – on the nominal value or the redemption amount of the securities held. The stamp duty cannot exceed €14,000 for taxpayers different from individuals. Based on the wording of the law and the implementing decree issued by the Italian Ministry of Economy and Finance on May 24, 2012, the stamp duty applies to any investor who is a client (as defined in the regulations issued by the Bank of Italy of July 29, 2009, as subsequently amended and restated) of an entity that exercises in any form a banking, financial or insurance activity within the Italian territory. The communication is deemed to be sent to the customers at least once a year, even for instruments for which it is not mandatory. In case of reporting periods less than 12 months, the stamp duty is payable on a pro-rata basis.

Stamp duty applies both to Italian resident Noteholders and to non-Italian resident Noteholders, to the extent that the Notes are held with an Italian based financial intermediary (and not directly held by the Noteholders outside Italy), in which case wealth tax (see "*—Wealth Tax on Financial Products Held Abroad*") applies to Italian resident Noteholders only.

Wealth Tax on Financial Products Held Abroad (the so-called IVAFE)

In this sub-section references to "Notes" shall refer to notes issued by TIF and Optics.

In accordance with Article 19 of Decree No. 201 of December 6, 2011, converted with Law No. 214 of December 22, 2011, as subsequently amended, Italian resident individuals, non-commercial entities and certain partnership (*società semplici* or similar partnership in accordance with Article 5 of the ITC) holding financial products (including the Notes) outside of the Italian territory are required to declare in their own annual tax return and pay a wealth tax ("*Imposta sul valore delle attività finanziarie detenute all'estero*" – "**IVAFE**"). The applicable tax rate is 0.2% of the value of such assets (the tax is determined in proportion to the period of ownership). Article 1, paragraph 91, letter b) of Law No. 2013 of December 30, 2023 introduces the new Article 19, par. 20-bis of Decree No. 201 of December 6, 2011 which provides that for financial products held in states or territories with a privileged tax regime, identified by the Decree of the Minister of Economy and Finance of May 4, 1999, as amended from time to time (i.e. the White List), from 2024 the tax rate is equal to 0.4%. The wealth tax cannot exceed €14,000 per year for taxpayers different from individuals.

The tax applies on the market value at the end of the relevant year or – in the lack of the market value – on the nominal value or redemption value of such financial products held outside of the Italian territory. Taxpayers can generally deduct from the tax a tax credit equal to any wealth taxes paid in the State where the financial products are held (up to the amount of the Italian wealth tax due).

Financial assets (including the Notes) held abroad are excluded from the scope of IVAFE if they are administered by Italian financial intermediaries pursuant to an administration agreement and the items of income derived from such instruments have been subject to tax by the same intermediaries. In this case, the below mentioned stamp duty provided for by Article 13(2-ter) of the Tariff, Annex A, Part I, attached to Presidential Decree No. 642 of October 26, 1972 does apply.

Italian Financial Transactions Tax

In this sub-section references to "Notes" shall refer to notes issued by TIF and Optics.

Pursuant to Law No. 228 of December 24, 2012, Italian Financial Transaction Tax ("**FTT**") applies to (a) transfer of ownership of shares and other participating securities issued by Italian resident companies or of financial instruments representing the said shares and/or participating securities (irrespective of whether issued by Italian resident issuers or not) (the "**Relevant Securities**"), (b) transactions on financial derivatives (i) the main underlying assets of which are the Relevant Securities, or (ii) whose value depends mainly on one or more Relevant Securities, as well as to (c) any transaction on certain securities (i) which allow to mainly purchase or sell one or more Relevant Securities or (ii) implying a cash payment determined with main reference to one or more Relevant Securities.

Securities could be included in the scope of application of the FTT if they meet the requirements set out above. On the other hand, securities falling within the category of bonds (*obbligazioni*), such as the Notes, are not included in the scope of the FTT.

Prospective holders of the Notes are strongly advised to seek their own professional advice in relation to the possible application of financial transaction tax in countries other than Italy.

Italian Tax Reporting Obligations

In this sub-section references to "Notes" shall refer to notes issued by TIF and Optics.

Pursuant to Legislative Decree No. 167 of June 28, 1990, converted with amendments into Law No. 227 of August 4, 1990, as amended from time to time, Italian-resident individuals which are non-business entities and non-business partnerships (*società semplici* or similar partnerships in accordance with Article 5 of the ITC) resident in Italy for tax purposes are required, under certain conditions, to report for tax monitoring purposes in their yearly income tax return the amount of investments (including the Notes), directly or indirectly held abroad (or beneficially owned abroad under Italian anti-money laundering provisions) (or, in case the income tax return is not due, in a proper form that must be filed within the same time as prescribed for the income tax return), regardless of the value of such assets (save for deposits or bank accounts having an aggregate value not exceeding €15,000 threshold throughout the year, which per se do not require such disclosure). This also applies in the case that at the end of the tax year, securities are no longer held by the above Italian-resident individuals and entities.

However, the above reporting obligation is not required in case where (i) the financial assets (including Notes) are deposited for management with Italian banks, SIMs, fiduciary companies or other qualified Italian financial Intermediaries and with respect to contracts entered into through their intervention, *provided* that the same Intermediaries apply a withholding tax or *Imposta Sostitutiva* on any income derived from the securities or (ii) one of such Intermediaries intervenes, also as a counterpart, in their transfer, *provided* that income deriving from such financial assets has been subject to the applicable withholding tax or substitute tax by the same Intermediaries.

Additional Notes

In this sub-section references to "Notes" shall refer to notes issued by TIF and Optics.

The Issuer and Optics, as applicable, may issue further notes (as defined in the relevant conditions). Any further notes will be considered fungible for Italian income tax purposes with the initial notes issued under the relevant trust deed only if the conditions set forth in Article 11(2) of Decree No. 239 are met, which requires in particular that (i) the issuance of further notes occurs within twelve months of the original issue of the initial notes, and (ii) the spread between (a) the issue price of the initial notes and (b) the issue price of the further notes is not higher than 1% of the principal amount of the issuance multiplied by the number of full years until the maturity date. If these requirements are not met, the further notes will not be considered fungible for Italian income tax purposes with the initial notes issued under the relevant trust deed.

OECD Common Reporting Standards

In this sub-section references to "Notes" shall refer to notes issued by TIF and Optics.

The EU Savings Directive adopted on June 3, 2003, by the EU Council of Economic and Finance Ministers (as subsequently amended) on taxation of savings income in the form of interest payments has been repealed from January 1, 2016 to prevent overlap between the Savings Directive and the new automatic exchange of information regime implemented under Council Directive 2011/16/EU on Administrative Cooperation in the field of Taxation (as amended, initially, by Council Directive 2014/107/EU and, lastly, by Council Directive 2018/822/EU).

Drawing extensively on the intergovernmental approach to implementing the United States Foreign Account Tax Compliance Act, the OECD developed the Common Reporting Standard ("**CRS**") to address the issue of offshore tax evasion on a global basis. Aimed at maximizing efficiency and reducing cost for financial institutions, the CRS provides a common standard for due diligence, reporting and exchange of financial account information. Pursuant to the CRS, participating jurisdictions will obtain from reporting financial institutions, and automatically exchange with exchange partners on an annual basis, financial information with respect to all reportable accounts identified by financial institutions on the basis of common due diligence and reporting procedures. The first information exchanges began in January 2017.

Italy has enacted Italian Law No. 95/2015 ("**Law 95/2015**"), implementing the CRS (and the amended EU Directive on Administrative Cooperation) Italian Ministerial Decree dated December 28, 2015, which has entered into force on January 1, 2016, implemented Law 95/2015 and provides for the exchange of information in relation to the calendar year 2016 and later.

In the event that holders of the Notes hold the Notes through an Italian financial institution (as meant in the Italian Ministerial Decree of December 28, 2015 implementing Law 95/2015), they may be required to provide additional information to such financial institution to enable it to satisfy its obligations under the Italian implementation of the CRS.

Certain Luxembourg Tax Considerations.

The following information is of a general nature only and is based on the laws presently in force in Luxembourg, though it is not intended to be, nor should it be construed to be, legal or tax advice. Prospective investors in the Notes should therefore consult their own professional advisers as to the effects of state, local or foreign laws, including Luxembourg tax law, to which they may be subject.

Please be aware that the residence concept used under the respective headings below applies for Luxembourg income tax assessment purposes only. Any reference in the present section to a tax, duty, levy, impost or other charge or withholding tax or a tax of a similar nature refers to Luxembourg tax law and/or concepts only. Also, please note that a reference to Luxembourg income tax encompasses corporate income tax (*impôt sur le revenu des collectivites*), municipal business tax (*impôt commercial communal*), a solidarity surcharge (*contribution au fonds pour l'emploi*), as well as personal income tax (*impôt sur le revenu*) generally. Investors may further be subject to net wealth tax (*impôt sur la fortune*) as well as other duties, levies or taxes. Corporate income tax, municipal business tax as well as net wealth tax and the solidarity surcharge invariably apply to most corporate taxpayers resident in Luxembourg for tax purposes. Individual taxpayers are generally subject to personal income tax and the solidarity surcharge. Under certain circumstances, where an individual taxpayer acts in the course of the management of a professional or business undertaking, municipal business tax may apply as well.

In this section references to "Notes" shall refer to notes issued by TIF.

Tax residency

A holder of Notes will not become resident, or deemed to be resident, in Luxembourg by reason only of the holding and/or disposing of the Notes, or the execution, performance, delivery and/or enforcement of the Notes.

Withholding Tax

Non-resident holders of Notes

Under Luxembourg general tax laws currently in force, there is no withholding tax on payments of principal, premium or interest made to non-resident holders of Notes, nor on accrued but unpaid interest in respect of the Notes, nor is any Luxembourg withholding tax payable upon redemption or repurchase of the Notes held by non-resident holders of Notes.

Resident holders of Notes

Under Luxembourg general tax laws currently in force and subject to the law of December 23, 2005 as amended (the "**Relibi Law**") mentioned below, there is no withholding tax on payments of principal, premium or interest made to Luxembourg resident holders of Notes, nor on accrued but unpaid interest in respect of Notes, nor is any Luxembourg withholding tax payable upon redemption or repurchase of Notes held by Luxembourg resident holders of Notes.

Under the Relibi Law, payments of interest or similar income made or ascribed by a paying agent established in Luxembourg, with respect to Notes listed and admitted to trading on a regulated market, to or for the benefit of an individual beneficial owner who is a resident of Luxembourg will be subject to a withholding tax of 20%. Such withholding tax will be in full discharge of income tax if the beneficial owner is an individual acting in the course of the management of his/her private wealth. Responsibility for the withholding of the tax will be assumed by the Luxembourg paying agent. Payments of interest under the Notes coming within the scope of the Relibi Law will be subject to a withholding tax at a rate of 20%.

Luxembourg resident individual holders of Notes acting in the course of their private wealth can opt to self-declare and pay a self-assessed 20% tax levy on receipt of interest payments made by non-Luxembourg paying agents located in an EU Member State other than Luxembourg, or a State of the EEA. If such an option is exercised by an individual holder for a fiscal year, that option is irrevocable for that individual holder for that fiscal year, and makes that individual responsible for applying and paying the 20% tax levy in respect of interest they receive on Notes. For these purposes, the "paying agent" under the Relibi Law is the economic operator which pays interest or allocates the payment of the interest to the immediate benefit of the beneficial owner – i.e. the last person in the payment chain before the Luxembourg resident individual.

Income tax

Resident investors

Any investor who is a resident of Luxembourg for tax purposes or who has a permanent establishment or a permanent representative in Luxembourg to which or whom the Notes are attributable, is subject to Luxembourg income tax in respect of the interest paid or accrued on the Notes. Specific exemptions may be available for certain taxpayers benefiting from a particular tax status.

Resident individual investors

A Luxembourg resident individual acting in the course of the management of their private wealth, is subject to Luxembourg income tax at the ordinary rates in respect of interest received, redemption premiums or issue discounts under the Notes, except if (i) a final withholding tax has been levied by the Luxembourg paying agent on such payments in accordance with the Relibi Law, or (ii) in case of a non-resident paying agent established in a Member State of the European Union or in a Member State of the EEA, if such Luxembourg resident individual investor has opted for the levy of the 20 per cent. tax in full discharge of income tax in accordance with the Relibi Law. The option for the 20 per cent. final tax must cover all interest payments made by such paying agents to the beneficial owner during the full fiscal year.

Under Luxembourg domestic tax law, gains realised upon the sale, disposal or redemption of Notes by a Luxembourg resident individual who acts in the course of the management of their private wealth, are not subject to Luxembourg income tax, provided this sale or disposal took place more than six months after the acquisition of the Notes. A

Luxembourg resident individual, who acts in the course of the management of their private wealth, has further to include the portion of the gain corresponding to accrued but unpaid income in respect of the Notes in their taxable income, except if tax has been levied in accordance with the Relibi Law.

Interest derived from as well as gains realised upon a sale or disposal, in any form whatsoever, of the Notes by a Luxembourg resident individual holder acting in the course of the management of a professional or business undertaking to which the Notes are attributable are subject to Luxembourg income taxes. Taxable gains are determined as being the difference between the sale, repurchase or redemption price (including accrued but unpaid interest) and the lower of the cost or book value of the Notes sold or redeemed.

Resident corporate investors

Interest derived from as well as gains realised by a Luxembourg resident corporate entity, which is a resident of Luxembourg for tax purposes, on the sale or disposal, in any form whatsoever, of Notes are subject to Luxembourg income taxes. Taxable gains are determined as being the difference between the sale, repurchase or redemption price (including accrued but unpaid interest) and the lower of the cost or book value of the Notes sold or redeemed.

Resident investors benefiting from a special tax regime

Luxembourg residents who benefit from a special tax regime, such as, for example, (i) undertakings for collective investment governed by the amended law of December 17, 2010, (ii) specialised investment funds governed by the amended law of February 13, 2007, (iii) family wealth management companies governed by the amended law of May 11, 2007, or (iv) reserved alternative investment funds treated as specialised investment funds for Luxembourg tax purposes and governed by the law of July 23, 2016 are exempt from income taxes in Luxembourg and thus income derived from the Notes, as well as gains realised thereon, are not subject to Luxembourg income taxes.

Non-resident investors

Non-resident investors, who have neither a permanent establishment nor a permanent representative in Luxembourg to which or whom the Notes are attributable, are not subject to Luxembourg income tax on interest received or accrued on the Notes. A gain realised by such non-resident investor, on the sale or disposal, in any form whatsoever, of Notes is further not subject to Luxembourg income tax.

Non-resident corporate investors or non-resident individual investors acting in the course of the management of a professional or business undertaking, and who have a permanent establishment or a permanent representative in Luxembourg to which or whom the Notes are attributable, are subject to Luxembourg income tax on interest accrued or received on the Notes and on any gains realised upon the sale or disposal, in any form whatsoever, on the Notes. Taxable gains are determined as being the difference between the sale, repurchase or redemption price (including accrued but unpaid interest) and the lower of the cost or book value of the Notes sold or redeemed.

Net wealth tax

Luxembourg resident investors or non-resident investors who have a permanent establishment or a permanent representative in Luxembourg to which or whom the Notes are attributable, are subject to Luxembourg net wealth tax on such Notes, except if the investor is (i) a resident or non-resident individual taxpayer, (ii) an undertaking for collective investment governed by the amended law of December 17, 2010, (iii) a securitization company governed by the amended law of March 22, 2004 on securitization, (iv) a company governed by the amended law of June 15, 2004 on venture capital vehicles, (v) a specialized investment fund governed by the amended law of February 13, 2007, (vi) a family wealth management company governed by the amended law of May 11, 2007, (vii) a professional pension institution governed by the amended law of July 13, 2005, or (viii) a reserved alternative investment fund governed by the law of July 23, 2016. However, (i) a securitization company governed by the amended law of March 22, 2004 on securitization, (ii) a company governed by the amended law of June 15, 2004 on venture capital vehicles, (iii) a professional pension institution governed by the amended law of July 13, 2005, and (iv) an opaque reserved alternative investment fund treated as venture capital vehicle for Luxembourg tax purposes and governed by the law of July 23, 2016, remain subject to a minimum net wealth tax.

Other taxes

The issuance, sale and disposal of the Notes will not be subject to a Luxembourg registration or stamp duty other than a fixed €12 or *ad valorem* registration duty in case of a voluntary registration or in case it is appended to a document that requires mandatory registration.

Under present Luxembourg tax law, where an individual holder of Notes is a resident for inheritance tax purposes of Luxembourg at the time of their death, the Notes are included in their taxable estate for inheritance tax purposes. On the contrary, no estate or inheritance taxes are levied on the transfer of Notes upon death of an individual holder of Notes in cases where the deceased was not a resident of Luxembourg at the time of their death. Gift tax may be due on a gift or donation of the Notes, if the gift is recorded in a Luxembourg deed or otherwise registered in Luxembourg.

CERTAIN LIMITATIONS ON VALIDITY AND ENFORCEABILITY OF THE NOTES GUARANTEES AND THE OPTICS NOTES COLLATERAL AND CERTAIN INSOLVENCY LAW CONSIDERATIONS

The following is a summary of certain considerations in relation to bankruptcy, insolvency and certain other applicable regulations in the EU, Italy and Luxembourg. Prospective investors in the Notes should consult their own legal advisors with respect to such limitations and considerations.

It should be noted that bankruptcy, insolvency or similar proceedings, schemes and/or events could be conducted or could occur in any of these jurisdictions, as well as in other jurisdictions. The application of these various laws in multiple jurisdictions could trigger disputes over which jurisdictions' law should apply and could adversely affect your ability to enforce your rights and to collect payment in full under the Notes. In particular, under the EU regulations and regulations of Member States, the insolvency (bankruptcy) proceedings may be initiated not only in the country where the entity is registered (incorporated) but also in other Member States where the bankrupt entity conducts its business activity. Irrespective of the attempts to harmonize the bankruptcy regulations in Member States, the regulations in various states differ and the insolvency (bankruptcy) proceedings conducted in more than one state may create additional legal risks and costs for you.

In the event that the Issuer, TIM or Optics experience financial difficulty, it is not possible to predict with certainty in which jurisdiction or jurisdictions bankruptcy, insolvency or similar proceedings would be commenced, or the outcome of such proceedings.

European Union

The Issuer is incorporated and organized under Luxembourg law. TIM and Optics are incorporated and organized under the laws of Italy.

Regime Applicable to Insolvency Proceedings Opened after June 26, 2017

On June 5, 2015, Regulation (EU) 2015/848 of the European Parliament and of the Council of May 20, 2015, on insolvency proceedings (recast), as amended (the "**Recast EU Insolvency Regulation**") was published on the Official Gazette of the European Union.

The Recast EU Insolvency Regulation applies within the EU, other than Denmark, to insolvency proceedings opened on or after June 26, 2017 (subject to certain exceptions) and with respect to a company whose COMI (as defined herein) is located in a Member State.

Main insolvency proceedings

Pursuant to Article 3(1) of the Recast EU Insolvency Regulation, the court with jurisdiction to open insolvency proceedings in relation to a debtor that has its "center of main interests" ("**COMI**") (as that term is used in Article 3(1) of the Recast EU Insolvency Regulation) in a Member State is the court of the Member State (other than Denmark) within which the center of the debtor's main interests is situated. However, pursuant to Article 4 of the Recast EU Insolvency Regulation, a court requested to open insolvency proceedings will be required to examine whether it has jurisdiction pursuant to Article 3. Such court's decision may be challenged by the debtor or any creditor on grounds of international jurisdiction. The COMI is defined as "the place where the debtor conducts the administration of its interests on a regular basis and which is ascertainable by third parties."

COMI is not a static concept and may change from time to time, but is determined for the purposes of deciding which court has competent jurisdiction to open main insolvency proceedings at the time of the request to open insolvency proceedings: moreover, the determination of where a debtor has its COMI is a question of fact on which the courts of the different Member States may have differed and even conflicting views. Article 3(1), paragraph 2, provides, in most cases, for a rebuttable presumption that a company's COMI is in the jurisdiction where its registered office is located. In order to prevent fraudulent or abusive forum shopping, such presumption only applies if the registered office has not been moved to another Member State within the three-month period prior to the request of the opening of insolvency proceedings. Otherwise, the presumption shall not apply, and the court which shall have jurisdiction to

open insolvency proceedings in relation to a company will be the court of the Member State (other than Denmark) within which the company had its registered office before moving it.

Specifically, Recital 30 of the Recast EU Insolvency Regulation contains a number of examples of where a presumption as to the COMI may be rebutted: for instance, where the company's central administration is located in a Member State other than that of its registered office, and where a comprehensive assessment of all the relevant factors establishes, in a manner that is ascertainable by third parties, that the company's actual center of management and supervision and of the management of its interests is located in that other Member State. In that respect, the factors that courts may take into consideration when determining the COMI of a debtor can include where board meetings are held, the location where the debtor conducts the majority of its business or has its head office and the location where the majority of the debtor's creditors are established and where they recognize as being the center of the company's operations.

If the COMI of a company is, at the time of the request to open insolvency proceedings located in the same Member State as its registered office, the main insolvency proceedings with respect to the company under the Recast EU Insolvency Regulation would be commenced in such jurisdiction and, accordingly, a court in such jurisdiction would be entitled to commence the types of insolvency proceedings referred to in Annex A to the Recast EU Insolvency Regulation. As noted in Preamble 10, Annex A to the Recast EU Insolvency Regulation has been extended to include insolvency proceedings that promote the rescue of economically viable but financially distressed businesses (such as, with respect to insolvency proceedings in Italy, restructuring agreements with creditors (*accordi di ristrutturazione*), in addition to judicial winding up (*liquidazione giudiziale*), pre-bankruptcy composition with creditors (*concordato preventivo*), compulsory administrative winding up (*liquidazione coatta amministrativa*) and extraordinary administration for large insolvent companies (*amministrazione straordinaria*)).

Furthermore, pursuant to Article 6 of the Recast EU Insolvency Regulation, the courts of the Member State in which insolvency proceedings have been opened in accordance with Article 3 have jurisdiction for any action that derives directly from the insolvency proceedings and is closely linked with them, such as avoidance actions.

Secondary insolvency proceedings

Insolvency proceedings opened in one Member State under the Recast EU Insolvency Regulation must be recognized in the other Member States (other than Denmark), although secondary proceedings may be opened in other Member States. If the COMI of a debtor is in one Member State (other than Denmark), under Article 3(2) of the Recast EU Insolvency Regulation, the courts of another Member State (other than Denmark) have jurisdiction to open "secondary" or "territorial" insolvency proceedings only in the event that such debtor has an "establishment" in the territory of such other Member State. Secondary proceedings may be any insolvency proceeding listed in Annex A of the Recast EU Insolvency Regulation. Territorial proceedings are, in effect, secondary proceedings which are commenced prior to the opening of main insolvency proceedings. "**Establishment**" is defined in Article 2(10) of the Recast EU Insolvency Regulation as any place of operations where a debtor carries out or has carried out in the three-month period prior to the request to open main insolvency proceedings a non-transitory economic activity with human means and assets. Accordingly, the opening of secondary insolvency proceedings or territorial insolvency proceedings in another Member State (other than Denmark) will also be possible if the debtor had an establishment in such Member State in the three-month period prior to the request for opening of main insolvency proceedings.

The effects of those territorial proceedings are restricted to the assets of the debtor situated in the territory of such other Member State. Where main proceedings in the Member State (other than Denmark) in which the debtor has its COMI have not yet been commenced, territorial insolvency proceedings may only be commenced in another Member State (other than Denmark) where the debtor has an establishment where either (i) insolvency proceedings cannot be commenced in the Member State in which the debtor's COMI is situated under the conditions laid down by that Member State's law; or (ii) the opening of territorial insolvency proceedings is requested by (a) a creditor whose claim arises from or is in connection with the operation of an establishment situated within the territory of the Member State where the opening of territorial proceedings is requested, or (b) a public authority which, under the law of the Member State within the territory of which the establishment is situated, has the right to request the opening of insolvency proceedings. When main insolvency proceedings are opened, territorial insolvency proceedings become secondary insolvency proceedings. Irrespective of whether the insolvency proceedings are main or secondary or territorial

insolvency proceedings, such proceedings will, subject to certain exceptions, be governed by the *lex fori concursus*, (i.e. the local insolvency law of the court that has assumed jurisdiction over the insolvency proceedings of the debtor).
